How to use this catalog

The following symbols and abbreviations are used throughout these pages.

Shaded Prices

.50

Identify varieties and sizes grown on speculation. Unshaded prices identify Grow to Order (GTO) varieties and sizes. Advance notice required for GTO items.

NEW!: This plant is a new or recent introduction to the market.

USPP#8828 et al: Plant is patented in the U.S. Propagation without permission of patent holder is illegal.

USPPAF: U.S. Plant Patent Applied For. Propagation without permission of applicant is illegal.

BLOOMS: Identifies plants introduced by Blooms of Bressingham®.

Z: USDA Hardiness Zone

H: AHS Heat Zone

AAS Winner: An All-America Selections winner.

Tender: Varieties that are USDA Zone 7 and above.

SEED: Produced from seed.

TC: Produced from tissue culture.

VEG: Vegetatively propagated from tip or root cuttings.

VR: Vernalization Required. Plant requires cold treatment for best performance and/or first year flowering.

VR-B: Vernalization Required. Bulking in final sales container highly recommended prior to vernalization for best performance and first-year flowering.

VB: Vernalization Beneficial. Plant benefits from cooling.

VB-B: Vernalization Beneficial. Bulking in final sales container highly recommended prior to vernalization for best performance and first-year flowering.

LSW: Plant is available rooted in liners when best suited for successful finishing, based on natural flower response and/or plant vigor. LSW does not apply to seedling trays. URCs of VEG items are available outside this window.

TAG \$.xxx: A tag is required for this variety.

Product Size Codes

288, 200, 162, 128, 72, 30, 38:

Number = cell count per 10" x 20" tray.

72V and 30V: Plant is available vernalized in late winter/early spring. Plant requires cold treatment for best performance and/or first-year flowering. Some speculative production. Advance orders by July 1st are strongly recommended.

URC: Unrooted Cutting. Most varieties available year-round.

ROY \$.xx: Royalty and/or Marketing Fee.

Pricing effective

July 1, 2013

(See page 58)
Green Leaf Plants® Truck
We ship as close to requested week as possible.
Minimums and rates vary.
Federal Express
Customer Pick-Up

Substitutions

We do our best to fill your orders as requested. We may suggest substitutions with similar varieties to avoid delay.

Payment Terms

- Net 30 days for customers with approved credit. 1.5% finance charge on past-due invoices.
- **Visa®, MasterCard®, Discover® Card:** Specify card type, card number, expiration date and card holder's name.
- Specify your favorite distributor. See list on catalog back cover.

Loss and damaged shipments

All shipments should be inspected upon arrival. **Truck delivery:** If damage or shortages are apparent, note the problem on the paperwork. **Small package:** If problems are not discovered until boxes are opened, call us within 48 hours. If you suspect your shipment is lost, call us and we will track it for you.

Claims

Report any claims concerning product quality or shortages within 48 hours to Green Leaf Plants® Customer Service (800.321.9573) or your sales representative.

Failure to notify us promptly may result in delay or refusal of claim. Please be aware that vernalized plants may be dormant or just emerging from dormancy. Such plants will outperform those that have not had a cold treatment, but may take some time to resume active growth. **See how to handle dormant liners on page 57.**

More size options including economical, smaller seedling plug and liner sizes!

The Selling Power of Tags

Our modern tags lend eye-catching color and give consumers vital information. Two size options available for Dendranthema Igloo varieties. Tag prices include shipping costs.

Tag	Size	Price
Blooms of Bressingham®	7" tall x 2.5" wide	\$.15
Standard	6" tall x 1.95" wide	\$.115
Igloo Series	Small (default): 4" tall x 1.3" wide	\$.025
	Dangler Hang Tag Upgrade: 3.68" tall x 2.65" wide	\$.15
Plant Select® varieties	6" tall x 1.95" wide	\$.115

Note: Some varieties in this catalog are required to carry a tag. Please see individual variety listings for this notation: **TAG \$.115 et al.** Optional tags are available for all other varieties.

new! Programs Easy, Reliable, Profitable.

New partnerships, innovative genetics, new programs and economical product forms!

Terra Nova Nurseries

World-class breeder of unique plants with superior garden performance. See pages 7-8 for new varieties and partnership with Blooms of Bressingham®.

Grasses

Popular varieties, including the EverColor®, ColorGrass® and Celebration series in a range of cell sizes to meet your needs. See pages 29-30.

Conard-Pyle

Star® Roses & Plants

Innovative genetics from Star Roses & Plants' in-house breeding program as well as their breeder partners around the world. We are pleased to add Star Roses & Plants to our breeder network.

Seedling Trays

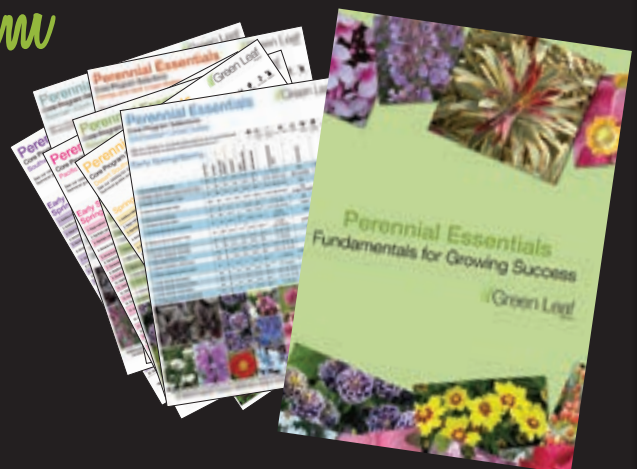

Now offering 288 and 428 seedling trays of over 150 varieties, with the same reliable high quality you've come to expect from Green Leaf Plants! See page 10 for variety list and page 4 for ordering information.

Perennial Essentials Program

We'll help you grow at ease, with proven performers that support a fresh and colorful perennial program that will fuel your sales!

- Contains seven customized regional programs with growing schedules and culture for the U.S. and Canada.
- Each region is broken down by season with details on liner size, finished pot size, finishing time, hardiness, flower color and height.
- Find out which varieties attract hummingbirds and butterflies, are deer resistant or drought tolerant, and which could be used as a cut flower. We find the facts that help you grow!

Available at GLplants.com under Technical Support

{ These introductions are some of the strongest genetics }
{ Terra Nova Nurseries has produced in recent years. }

Echinacea Supreme™ Series USPPAF

‘Supreme Cantaloupe’, ‘Supreme Elegance’, ‘Supreme Flamingo’
Non-fading blooms in flamboyant colors with low usage needs for water, fertilizer and pesticides. (Z4)

Heucherella

‘Buttered Rum’ & ‘Cracked Ice’ USPPAF
Vigorous plants with strong coloring and textural pizzazz.
Cold, heat and humidity tolerant. (Z4)

Blooms/Terra Nova

Blooms of Bressingham® and Terra Nova Nurseries have entered into a licensing agreement to breed, grow and co-brand a selection of new plant varieties, bringing growers an expanded production and distribution source of good garden plants.

Carrying On

The Blooms family tradition of developing and distributing garden-worthy plants.

Blooms Varieties Offered

Tried & Trusted™

Blooms of Bressingham varieties are tested for years – in gardens and pot trials – at secure trial sites, leading perennial growers, universities and botanical gardens throughout North America.

Comprehensive trials establish reliability and provide valuable information on regional performance.

DID YOU KNOW?

Scheduling your production is easy using our helpful codes shown throughout the catalog.

- VR:** Vernalization* is required for the best growth, vigor and flowering performance.
- VB:** Vernalization is beneficial for improved flowering, vigor, and in many cases earlier blooms.
- VR-B:** Bulking* in final sales container highly recommended prior to vernalization, for best flowering performance. Vernalization required.
- VB-B:** Bulking in final sales container highly recommended prior to vernalization, for best flowering performance. Vernalization beneficial.

* For more information related to bulking and vernalization, see page 57.

DID YOU KNOW?

For best results, plant **Aquilegia** (columbine) starters in late summer through early fall, in order to give the plants time to bulk in their final container prior to vernalization. In addition to our standard 72-cell liner, we now offer 288- and 128-seedling trays of most **Aquilegia** varieties.

DENDRANTHEMA

– Hardy Chrysanthemum (Sun) Late Summer - Fall Z5-9, H12-1 *Asteraceae*

Igloo Series – The Igloo series offers fantastic pot performance, producing nearly spherical pots from a single cutting. Second-year garden performance brings larger plants with noticeably earlier flowering. **Liners available**

FOB PA and FL. LSW: April – July. URCs available FOB FL only. Call for price, pack and freight rate.

50S (offered in strip only)

HOUTTUYNIA – Chameleon Plant (Sun/Part Shade) May - June Z5-11, H12-1 *Saururaceae*
cordata 'Chameleon' 18". Heart-shaped leaves splashed with white, pink and vivid red. Underground runners spread rapidly. Invasive in rich, moist soils. VEG

HYPERICUM – St. John's Wort (Sun/Part Shade) May - June *Clusiaceae*
calycinum 12-18". Ground-hugging habit. Bright yellow flowers over narrow green leaves. Z5-9, H9-4 VEG **VR-B**

NEW! Hypearls™ Compact Series – Z6-9, H9-6 VEG, **ROY \$.20**
Hypearls™ Compact Star USPPAF 18". Deep pink, rounded berries emerge from deep yellow flowers. Compact, well-branched shrub with green, rounded leaves suitable for containers or small garden spaces.

Hypearls™ Compact Yellow USPPAF 18". Deep yellow flowers develop into deep yellow berries. Compact, green bushy plant for the landscape or container.

Hypearls™ Series – Z6-9, H9-6 VEG, **ROY \$.10 except as noted**
Hypearls™ Jacqueline 28". Pointed berries start out as yellow-orange and age to deep red. Vigorous green foliage and small yellow flowers begin in July.

NEW! Hypearls™ Madelon USPPAF 24". Bright yellow flowers mature to deep rosy red berries. Reddish-tipped stems set off yellow flowers and berries. **ROY \$.20**

Hypearls™ Olivia 36". Berry color starts out yellow then matures to salmon over time. Yellow flowers in July attract bees.

xmoserianum 'Tricolor' **Tender** 12". Arching red shoots and medium green leaves, variegated with cream and pink. Cup-shaped yellow flowers to 2" across, summer-fall. Z7-9, H9-7 VEG **VR-B**

IBERIS – Hardy Candytuft (Sun) May - June Z4-9, H9-3 *Brassicaceae*
sempervirens 'Alexander's White' 10". Bright white flowers with deep green, spreading foliage. Z3-9, H9-3 VEG **VR-B**

sempervirens 'Little Gem' 4-5". Attractive mounds of pure white flowers in spring. VEG **VR-B**

sempervirens 'Purity' 8-10". Clump forming habit with large, long lasting white flowers. VEG **VR-B**

sempervirens Snowflake ('Schneeflocke') 12". Shorter, more compact, and larger white flowers than species. VEG **VR-B**

KNIPHOFIA – Red Hot Poker, Tritoma (Sun) Z5-9, H9-1 *Liliaceae*
'Border Ballet' 24". Heavy-blooming variety in shades of red, pink, yellow and orange. Blooms in August. SEED **VR-B**

'Elvira' USPP #22134 30". Hot-orange flower spikes in late June with strappy, thick green foliage. **BLOOMS TC VR-B, TAG \$.15, ROY \$.25**

uvaria 'Echo Mango' USPP #21706 40". Repeat blooming *Kniphofia* with unbelievably bright mango-orange flower spikes. TC **VR-B, ROY \$.25**

uvaria 'Echo Rojo' USPP #22791 36". Long-blooming, sizzling red-orange flower spikes emerge in June followed by an encore performance in late summer. TC **VR-B**

uvaria 'Flamenco' mix 32" stems with 8" spikes of yellow, orange and fiery-red. Blooms late June to July. SEED **VB-B**

LAMIASTRUM – Yellow Archangel (Shade/Part Shade) May - June Z4-8, H8-1 *Lamiaceae*
galeobdolon 'Herman's Pride' 12". Green and silver leaves with yellow flowers. VEG **VR-B**

galeobdolon 'Variegatum' 12". Silver-spotted with yellow flowers in spring. VEG **VR-B**

× hybrida Paparazzi™ Paris USPPAF 5"	Lavender-blue flowers with dark purple eye.			.48	.52	.68	.83	1.21	1.52	

DID YOU KNOW?

The best time to transplant most **Phlox** liners is late summer through fall. This schedule allows time for the plant to fill out the container (bulk) prior to vernalization, and will provide the biggest flower show and impact when spring arrives. This applies to **divaricata**, **subulata**, and **stolonifera** species as well as the **Paparazzi™ Collection**, but is not critical for **Phlox paniculata**.

PHLOX – Continued

stolonifera (Creeping Phlox) (Part Shade/Shade) April - May Z4-8, H8-1

stolonifera 'Home Fires' 8". Shade groundcover with deep pink flower clusters. VEG **VR-B**

stolonifera 'Sherwood Purple' 6". Fragrant purple-blue flowers. Excellent shady groundcover. VEG **VR-B**

subulata (Moss Phlox) (Sun/Part Shade) Spring Z2-8, H9-4 **except as noted**.

4-6". Early spring bloom. Evergreen mats of pine needle-like foliage.

subulata 'Amazing Grace' White petals with a dash of lipstick red at center. Flowers mature to pale pink. VEG **VR-B**

subulata 'Apple Blossom' Pale pink blooms. VEG **VR-B**

subulata 'Atropurpurea' Rich wine-red flowers. VEG **VR-B**

subulata 'Candy Stripe' White flowers with a bold pink brush stroke down each petal. VEG **VR-B**

subulata 'Coral Eyes' Pale pink flowers with a coral-red eye. VEG **VR-B**
First Available January 2014

subulata 'Crimson Beauty' Rosy red flowers. VEG **VR-B**

subulata 'Drummon's Pink' Candy pink flowers are larger than those of most *P. subulata* varieties. VEG **VR-B**

subulata 'Emerald Blue' Clear lavender-blue flowers. VEG **VR-B**

subulata 'Emerald Cushion Blue' Lavender-blue flowers. Superior mounding habit. VEG **VR-B**

subulata 'Emerald Pink' Dark pink flowers with deeper magenta eye. Z3-8, H9-4 VEG **VR-B**

subulata 'Fort Hill' Deep pink, fragrant blooms. VEG **VR-B**

subulata 'Millstream Daphne' Intense pink blooms. VEG **VR-B**

subulata 'Oakington Blue Eyes' Sky-blue flowers. **BLOOMS** VEG **VR-B**

subulata 'Purple Beauty' Deep purple blooms. VEG **VR-B**

subulata 'Red Wings' Deep crimson blooms with dark red centers. VEG **VR-B**

subulata 'Ronsdorfer Beauty' Rich rose pink flowers with magenta-red center ring. VEG **VR-B**

subulata 'Scarlet Flame' Vivid scarlet blooms. VEG **VR-B**

subulata 'Snowflake' Pristine white flowers. VEG **VR-B**

subulata 'White Delight' Bright white flowers on dark green, spreading foliage. VEG **VR-B**

PHYGELIUS – Cape Fuchsia (Sun/Part Shade) May - July Z7-10 *Scrophulariaceae*

Cherry Ripe® ('Blacher') USPP #17948 **Tender** 21". Compact selection with bright red tubular flowers and yellow throats. Rich reddish colored stems and dark green foliage. VEG, **ROY \$.10**

'Passionate' USPP #17798 **Tender** 20-28". Moderately sized plant with tubular rosy-orange colored flowers and a yellow throat. Attractive dark green foliage with bronzy burgundy stems. VEG, **ROY \$.10**

Mat-Forming Habit, Spring – Summer

	URC	288	200	162	128	72	72V	30	30V
album 'Athoum' 4". Thick, green stems of tightly growing succulent leaves form a mat and white flowers in summer. Z4-9, H9-1 VEG	.112				.43	.62			
album 'Coral Carpet' 2-6". Creeping groundcover with red tinged, deep green leaves. Tiny pale pink flowers in summer. Z5-10, H9-1 VEG	.112				.43	.62			
dasyphyllum 'Major' 4". Prostrate mats of tight blue foliage. Small, white flowers. Z4-9, H9-5 VEG	.112				.43	.62			
ewersii 3". Rounded blue-gray leaves with dark pink flowers in early summer. Z5-9, H9-1 VEG	.112				.43	.62			
hakonense 'Chocolate Ball' 3". Chocolate-colored, needle-like foliage on ground-hugging plants. Z6-9 VEG	.112		.39	.43	.62				
kamtschaticum 6-8". Scalloped, deep green leaves are covered with mounds of yellow gold flowers. Z4-9, H9-1 VEG	.112		.39	.43	.62				
kamtschaticum 'Variegatum' 6-8". White-marbled, pink-tinged foliage. Gold flowers. Z4-9, H9-1 VEG	.112		.39	.43	.62				
kamtschaticum 'Weihenstephaner Gold' 4-6". Golden yellow flowers and red seed heads on prostrate, scalloped green foliage. Z3-8, H8-1 VEG	.112		.39	.43	.62				
makinoi 'Ogon' Tender 4". A ground-hugging form with chartreuse foliage and dainty yellow flowers in spring. Z7-9 VEG	.112		.39	.43	.62				
makinoi 'Salsa Verde' 3". Emerald green, succulent foliage with sprays of yellow flowers in summer. Z6 VEG	.112		.39	.43	.62				
oreganum 'Glaucum' 4". Green whorls of narrow, succulent leaves and white flowers in summer. Z4-9, H9-5 VEG	.112				.43	.62			
pachyclados 2". Deep blue scalloped foliage forms a tight mound and white star-shaped flowers in summer. Z5-9, H9-5 VEG	.112				.43	.62			
reflexum (syn. rupestre) 'Blue Spruce' 8-12". Mats of blue-green needle-like foliage. Yellow flowers in July. Z6-9, H9-6 VEG	.112		.39	.43	.62				
rupestre 'Angelina' 8". Chartreuse needle-like foliage with russet tones in cooler weather. Sprays of yellow flowers in June. Z3-11 VEG	.112		.39	.43	.62				
sexangulare 4". Dense carpets of fine green foliage. Bright yellow flowers in spring. Foliage turns copper in strong light. Similar to, and often sold as, <i>S. acre</i> . Z5 VEG	.112		.39	.43	.62				
sieboldii (October Plant) 6". Semi-evergreen, blue-green, succulent foliage resembles eucalyptus. Pink flowers in September – October. Z6-9, H9-6 VEG	.112		.39	.43	.62				
spurium 'Dragon's Blood' 4-6". Spreading, succulent green foliage with splashes of bronze that are more pronounced in high light conditions. Red flowers in summer. Z3-9, H9-1 VEG	.112				.43	.62			
spurium 'Fuldaglut' 3-4". Dark green spreading foliage turns red-orange in fall. Red flowers in July. Z4-9, H9-1 VEG	.112		.39	.43	.62				
spurium 'John Creech' 2". Groundcover with pink blooms in June. Z4-9, H9-1 VEG	.112		.39	.43	.62				
spurium 'Tricolor' 3-4". Small green and white leaves with splashes of red. Pink flowers. Z4-8, H8-3 VEG	.112		.39	.43	.62				
spurium 'Voodoo' 4-6". Bronzy red foliage all year round. Hot pink flowers in mid-summer. Z4-9, H9-1 SEED		.165		.355	.62				
tetractinum 3". Rounded leaves form mats of succulent green foliage. Red-bronze color in fall and yellow flowers in summer. Z4-9, H9-1 VEG	.112		.39	.43	.62				

Upright Habit, Late Summer - Fall

NEW! Candy™ Series – From Terra Nova. Z4-9, H9-1 VEG, **TAG \$.115, ROY \$.20**

'Raspberry Truffle' USPP #22755 10". Scalloped, deep burgundy-purple leaves and rosy pink flowers.	.144				.72				
'Class Act' USPP #20125 18". Showy rose-pink flowers with a full, upright habit. Winner of the Royal Horticultural Award of Garden Merit. From Terra Nova. Z4-9, H9-1 VEG, TAG \$.115, ROY \$.20	.144				.72

Stevia - STEVIA
Sweet Woodruff - GALIUM
Thyme - THYMUS

ALLIUM – (Sun) Z5-11, H8-1 *Liliaceae*
schoenoprasum – Chives 12-24". Green, spike-like, aromatic foliage. Lavender spheres in May. SEED

ALOYSIA – (Sun) Z8-11, H12-8 *Verbenaceae*
triphylla (syn. *citriodora*) – **Lemon Verbena** **Tender** 10'. Strongly lemon-scented foliage. Vigorous grower. VEG

ARTEMISIA – (Sun) Z3-7, H7-1 *Asteraceae*
dracunculus '**Sativa**' – **French Tarragon** To 3'. The real thing! Accept no seed-grown substitutes. A valuable herb. Narrow green leaves with distinct anise scent. VEG

GALIUM – (Part Shade) May - June Z5-8, H8-5 *Rubiaceae*
odoratum (*Asperula odoratum*) – **Sweet Woodruff** 6". Neat, symmetrical foliage. Tiny white flowers, sweetly fragrant. Used as a flavoring for May wine. A great shade groundcover. VEG

HELICHRYSUM – Curry (Sun) June-September Z7-10, H10-7 *Asteraceae*
italicum (syn. *angustifolium*) **Tender** 24". Evergreen subshrub with dense, silver-gray, linear foliage. Butter-yellow flowers and strong curry-scented foliage. VEG
italicum '**Nana**' **Tender** 8-12". Compact habit with narrow silver leaves and curry fragrance. VEG

LAVANDULA – (Sun) June - August *Lamiaceae*
Lavandin (*Lavandula* ×*intermedia*) – Cultivars selected from crosses of *L. latifolia* and *L. angustifolia*. Taller and more rot-resistant than either parent. Z5-8, H8-5 (**except as noted**) VEG VR
×*intermedia* '**Dilly Dilly**' 12". Compact growth habit. Flower spikes rise high above foliage. Z6-9

×*intermedia* '**Fred Boutin**' 18". Slender, branched stems with small lavender-blue flowers and dense, woolly, almost white foliage. Dense growth habit.

×*intermedia* '**Provence**' 30". Subtle lavender-blue flowers and sturdy, rot-resistant foliage.

×*intermedia* '**Silver Edge**' ('Walvera') 3". Variegated foliage with blue-green centers. Creamy margins mature to silvery white. Compact, upright form with violet-blue flowers in July and August. **ROY \$.15**

	URC	288	200	162	128	72	72V	30	30V
angustifolia 'Blue Cushion' USPP #9119 16". Spectacular dwarf habit and free-flowering performance. Excellent for border, herb garden or container. Z5-8, H8-5 BLOOMS VEG VR, ROY \$.25	.119		.38	.42	.46	.62	.78	1.10	
angustifolia Blue Lance ('Kilablula') 9-11". Very showy, thick and full purple flower spikes even before flowers open. Compact grower. Excellent uniformity and fragrance. Vernalization not required for flowering. Z5-7, H8-5 VEG, ROY \$.05	.119			.42	.46	.62		1.10	
angustifolia 'Coconut Ice' 16-18". Flowers open light pink and quickly change to white. Silvery-green upright foliage. Z6-9, H9-6 VEG VR	.119			.42	.46	.62		1.10	
Ellagance Series – Ellagance varieties combine great garden performance and container-worthy uniformity. First-year flowering in a nice color range. Reliable and easy to grow, heavy-branching and free-flowering. No vernalization needed. Z5-7, H8-5 SEED									
NEW! angustifolia 'Ellagance Pink' 12-15". Pink flower spikes above gray-green foliage with well-branched plant habit.		.245			.415	.62		1.10	
angustifolia 'Ellagance Purple' 12-15". "The most sensational purple ever seen," says the breeder.		.245			.415	.62		1.10	
angustifolia 'Ellagance Sky' 12-15". Pale lavender-blue blooms and lots of them.		.245			.415	.62		1.10	
angustifolia 'Ellagance Snow' 12-15". As pure as fresh snow, this white lavender is less prone to bluing in cooler temperatures than <i>L. 'Ellagance Ice'</i> .		.245			.415	.62		1.10	
angustifolia 'Hidcote' 12". More compact than the species, with deep blue flowers. Z5-8, H8-5 VEG VB	.119		.38	.42	.46	.62	.78	1.10	1.32
angustifolia 'Jean Davis' 10-12". Pale-pink flowers over typical silvery foliage. Z5-8, H8-5 VEG VR	.119		.38	.42	.46	.62	.78	1.10	
angustifolia 'Lady' 10". Fast-growing; soft blue flowers first year, every year. Z5-8, H8-5 SEED/VEG	.119	.175			.355	.62		1.10	
angustifolia 'Munstead' 12-18". Fragrant, deep purple blooms. Z5-8, H8-5 VEG VR	.119		.38	.42	.46	.62	.78	1.10	1.32
NEW! angustifolia 'Thumbelina Leigh' 9-11". Adorable compact habit with sturdy stems of fragrant foliage and flowers for a tidy display. Z5-8, H8-5 VEG VB, ROY \$.08	.119			.42	.46	.62	.78	1.10	1.32
dentata – French Lavender Tender 28". Purple-blue flowers, narrow toothed silver-green leaves. Smaller blooms than <i>L. angustifolia</i> . Z8-9 VEG	.119		.38	.42	.46	.62		1.10	
'Goodwin Creek Grey' Tender 36" where hardy, 12-18" in non-hardy zones. Small, intense purple flowers on long wands. Dense hairs on foliage lend a bright gray cast to entire plant. Z7-10, H8-5 VEG VR	.119		.38	.42	.46	.62		1.10	
pinnata – Fern Leaf Lavender Tender 24". Shrub-like habit with pinnate, grey-green leaves. Large blue-purple flower spikes. Z9-11, H11-9 VEG VB	.119				.46	.62	.78	1.10	1.32
NEW! stoechas Butterfly Garden® Series – Compact series with showy large flowers and bracts without vernalization. Naturally well-branched habit. Z8-9, H9-8 VEG, TAG \$.115, ROY \$.15									
Butterfly Garden® Early Summer Tender 9-12". Colorful purple flower heads with showy bracts. Earlier than rest of series.	.119		.38	.42	.46	.62			
Butterfly Garden® Giant Summer Tender 11-13". Multitude of purple flowers and bracts. Larger in stature than rest of series.	.119		.38	.42	.46	.62			
Butterfly Garden® Green Summer Tender 10-12". Purple flowers and purple bracts with bright green foliage.	.119		.38	.42	.46	.62			
Butterfly Garden® Pink Summer Tender 10-12". Deep pink colored flowers and bracts.	.119		.38	.42	.46	.62			
Butterfly Garden® Silver Summer Tender 10-12". Deep purple flowers and bracts with silvery foliage.	.119		.38	.42	.46	.62			
stoechas 'Kew Red' Tender 18-24". Bright, rose-red flowers with short rose-colored bracts. Fragrant gray-green foliage. Z8-9, H9-8 VEG	.119			.42	.46	.62

spicata 'Kentucky Colonel' – Spearmint 24". A robust grower with large leaves and sweet/spicy flavor, great for jelly and juleps. Z3-7, H7-1 VEG

spicata – Spanish Mint 12-24". Spearmint-scented green leaves with flowers of lilac and white. Fast growing and considered invasive in some areas. Z3-7, H7-1 VEG

spicata – Spearmint 36". Spearmint-scented green leaves with purple-blue flowers. Rapid growth could be considered invasive in some zones. Z3-7, H7-1 VEG

suaveolens – Apple Mint 36". Vigorous, spreading growth habit with apple-scented leaves that are somewhat wrinkled and hairy. Pinkish-white whorled flowers in summer. Z6-9, H9-5 VEG

suaveolens 'Variegata' – Variegated Pineapple Mint 24". Attractive green and white variegated leaf. Sweet pineapple scent. Z6-9, H9-5 VEG

MONARDA – Bee Balm – See PERENNIALS section page 36

NEPETA – Catmint – See PERENNIALS section page 37

OCIMUM – (Sun) Z9-11, H11-1 *Lamiaceae*

basilicum 'Genovese' – Sweet Basil **Tender** 24". One of the most important culinary herbs. Upright and bushy growth habit with rounded, deep emerald-green leaves and white flowers. SEED **LSW: February – June**

basilicum – Greek Columnar Basil **Tender** 36". Sweet basil flavor and fragrance with a hint of cinnamon. Green leaves with pink-purple flowers tinged with white and an upright growth habit. VEG

basilicum 'Kasar' – African Blue Basil **Tender** 28-32". Tasty in the kitchen, beautiful in the border. Purple shading radiates from base of leaf to green tip. VEG

×citriodorum 'Pesto Perpetuo' **Tender** 36-48". Green leaves with a white margin on a non-flowering basil. Excellent culinary and ornamental with a bushy, upright habit and robust flavor with a bit of lemon. VEG, **ROY \$.05**

ORIGANUM – (Sun) *Lamiaceae*

majorana 'Compactum' – Marjoram 3-6". Sub-shrub with culinary, medicinal and aromatic uses. Small round leaves. Neat, compact habit; more disease-resistant than the species. Z4-9, H10-2 VEG

×majoricum – Italian Oregano 18-24". A culinary herb. Deliciously scented. Z6-9 VEG

Variegated Oregano 16". Green with creamy variegated edge. Spreading/mounding habit. Z4-9 VEG

vulgare 'Aureum' – Golden Oregano 12". Light lavender-purple flowers and chartreuse spreading foliage. More green and prefers a bit of shade in summer months. Z5-9, H10-2 VEG

vulgare 'Compactum' 6". Spicy flavor and fragrance with a smaller mounding habit and smaller leaves than the straight species *O. vulgare*. Pale pink to white flowers. Z5-9, H10-2 VEG

vulgare hirtum – Greek Oregano 12-28". Strong-growing hardy strain. Z4-9, H10-2 VEG

vulgare 'Hot and Spicy' 36". Selected for its highly aromatic scent and spicy flavor. White flowers in summer. Z4-9, H10-2 VEG

PETROSELINUM – Parsley (Sun) Z5-9, H9-1 *Apiaceae*

crispum – Triple Curled Parsley 8-10". An essential herb for garnish or cooking, this variety is known for its tightly curled leaves and strong flavor. Biennial. SEED **LSW: February – June**

crispum var. neapolitanum – Italian Parsley 10-12". Flat, segmented leaves with a strong flavor excellent for culinary use. Biennial. SEED **LSW: February – June**

Early-Blooming Perennials

Achillea tomentosa	Dicentra	Primula
Ajuga	Erysimum	Salvia
Amsonia 'Blue Ice'	Euphorbia	Saponaria
Anemone sylvestris	Fragaria	Sedum 'Major' and 'Ogon'
Aquilegia	Galium	Silene
Arabis	Geum	Tradescantia
Arenaria	Houttuynia	Veronica 'Georgia Blue', 'New Century', 'Sunshine' and 'Waterperry Blue'
Armeria	Iberis	Vinca
Bellis	Lamiastrum	Viola
Bergenia	Lamium	
Carex	Lithodora	
Centaurea	Myosotis	
Cerastium	Papaver nudicaule	
Chrysogonum	Phlox divaricata, stolonifera, subulata	
Dianthus	Phlox Paparazzi™ Series	
	Polemonium	

Groundcovers

Aegopodium	Lobelia chinensis	Vinca
Ajuga	Mazus	Waldsteinia
Anthemis	Mentha	
Ceratostigma	Muehlenbeckia	
Chrysogonum	Origanum	
Delosperma	Phlox stolonifera and subulata	
Fragaria	Sedum - prostrate forms	
Galium	Stachys byzantina	
Geranium 'Rozanne'	Thymus	
Hedera	Verbena canadensis	
Helianthemum	Veronica – Spring	
Houttuynia	Blooming Goldwell, 'Georgia Blue', 'New Century', 'Sunshine' and 'Waterperry Blue'	
Hypericum calycinum and 'Tricolor'		
Iberis		
Lamiastrum		
Lamium		

Perennials that Attract Butterflies

Achillea	Coreopsis	Origanum
Agastache	Echinacea	Penstemon
Amsonia	Eupatorium	Perovskia
Asclepias	Helenium	Phlox
Aster	Heliopsis	Rudbeckia
Buddleja	Lavandula	Salvia
Calamintha	Liatris	Veronica - Summer Blooming
Caryopteris	Monarda	
Centranthus	Nepeta	

Perennials that Attract Hummingbirds

Agastache	Kniphofia	Stachys
Alcea	Liatris	Verbena
Asclepias	Lobelia	
Buddleja	Lupinus	
Campanula	Monarda	
Delphinium	Penstemon	
Digitalis	Phygelius	
Heuchera	Physostegia	
Hibiscus	Salvia	

Perennials for Cut Flowers

Achillea	Eupatorium	Perovskia
Alchemilla	Euphorbia	Phlox paniculata
Anthemis	Gaillardia	Rudbeckia
Artemisia	Helenium	Salvia
Aster	Helianthus	Scabiosa
Baptisia	Heliopsis	Sedum
Buddleja	Herbs	Solidago
Campanula persicifolia	Heuchera	Stachys
Centranthus	Hypericum	Tanacetum
Coreopsis	Kniphofia	Verbena bonariensis
Delphinium	Lavandula	Veronica
Dianthus	Leucantherum	
Digitalis	Liatris	
Echinacea	Lupinus	
Erigeron	Lysimachia	
Eryngium 'Big Blue'	Monarda	
	Penstemon	

Perennials for Shade

Aegopodium	Heucherella
Ajuga	Houttuynia
Alchemilla	Lamiastrum
Anemone	Lamium
Aquilegia	Lobelia
Aruncus	Mazus
Bergenia	Myosotis
Carex	Phlox divaricata and stolonifera
Ceratostigma	Polemonium
Digitalis	Primula
Eupatorium	Tradescantia
Galium	Tiarella
Geranium	Vinca minor
Hedera	Viola
Heuchera	

Deer-Resistant Perennials

Aegopodium	Geranium	Stachys
Agastache	Lamiastrum	Teucrium
Allium	Lamium	Thymus
Amsonia	Lavandula	Verbascum
Artemisia	Mazus	Vinca
Asclepias	Melissa	
Buddleja	Mentha	
Calamintha	Nepeta	
Cerastium	Origanum	
Digitalis	Perovskia	
Echinacea	Salvia	
Euphorbia	Santolina	

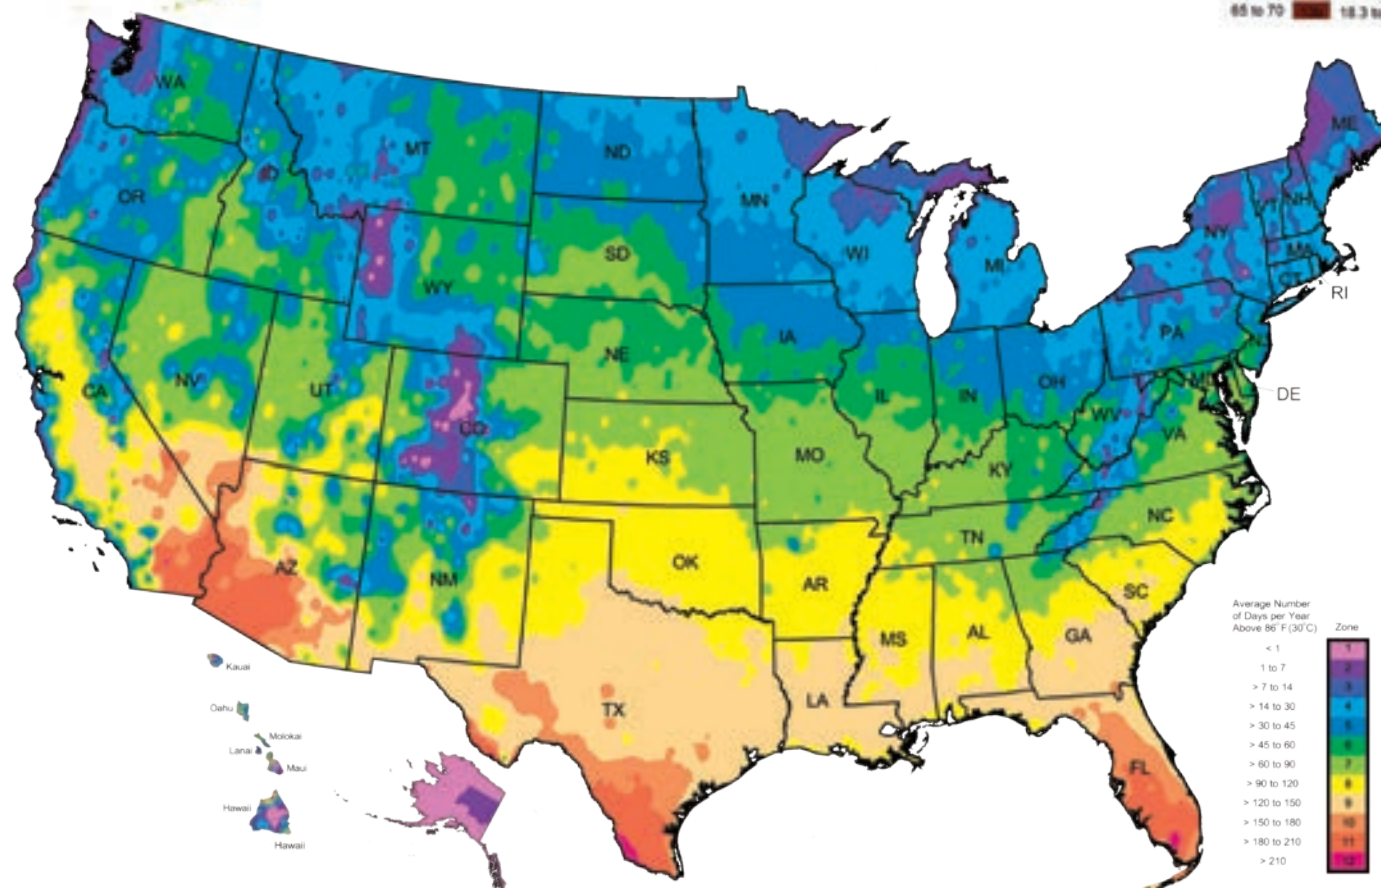

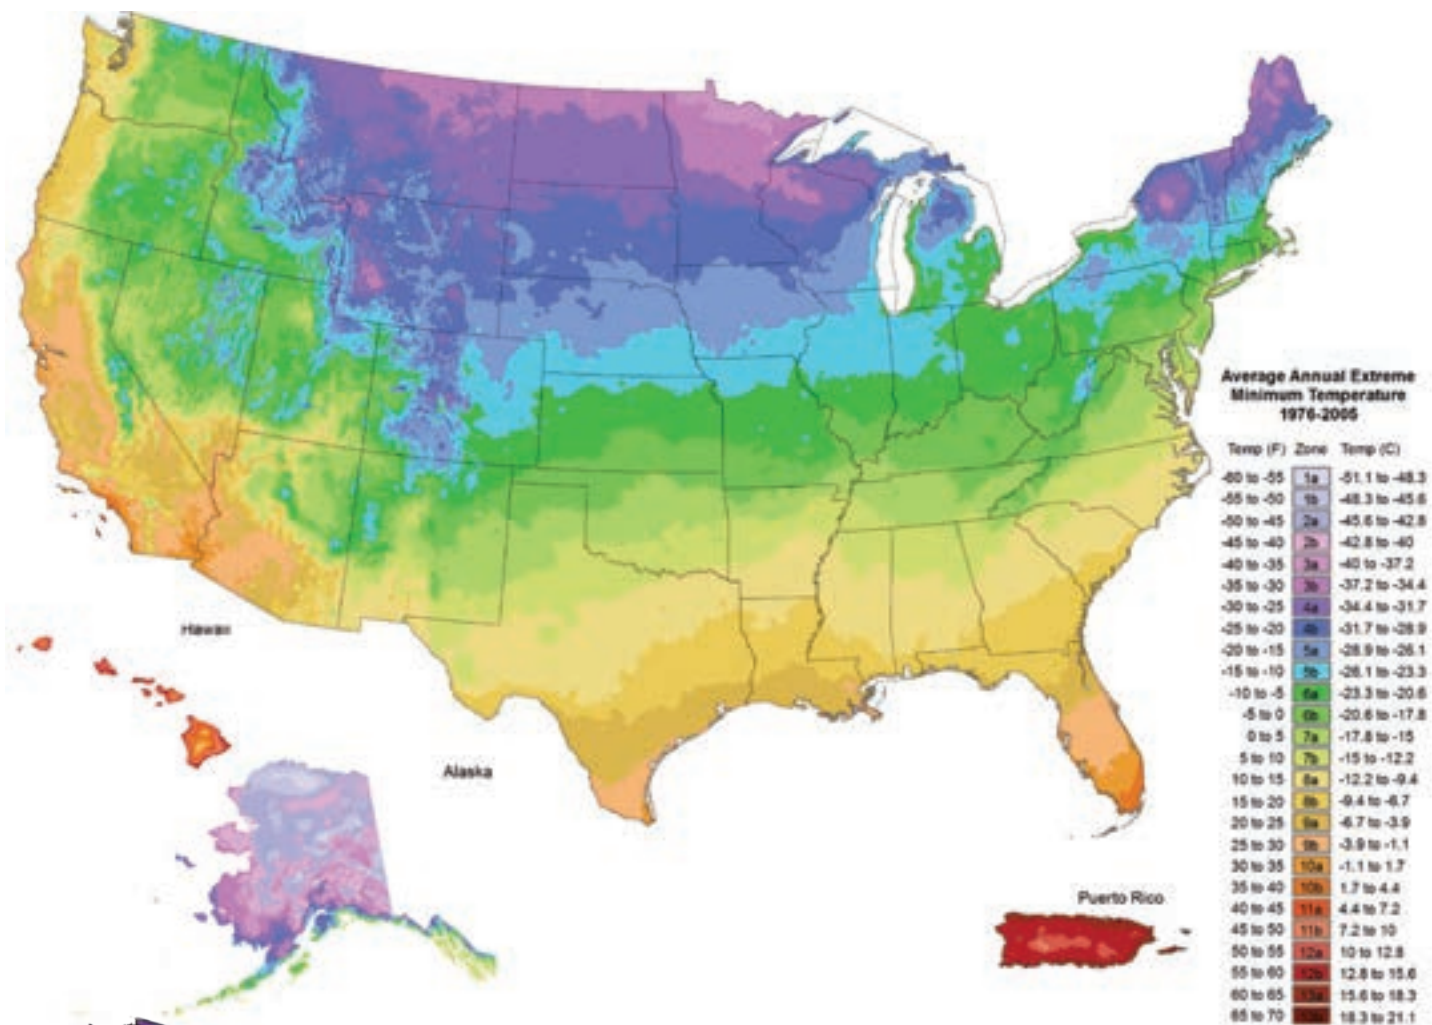

Late-Blooming Perennials

Agastache	Helianthus	Salvia 'Black and Blue', 'Santa Barbara' and 'Wendy's Wish'
Anemone	Heliopsis	
Aster	Hibiscus	
Buddleja	Hypericum	Scabiosa
Caryopteris	Kniphofia	Sedum
Ceratostigma	Lobelia	Solidago
Dendranthema	Lysimachia	Verbena
Echinacea	Nipponanthemum	
Eupatorium	Pennisetum	
Gaillardia	Perovskia	
Geranium 'Rozanne'	Rudbeckia	
Helenium		

Perennials for Green Roofs

Allium	Dianthus
Ajuga	Sedum
Armeria	Sempervivum
Delosperma	Teucrium

Zone Maps + Perennial Culture

General Perennial Culture

Transplant:

- For most perennials, it is preferred to plant the top of the liner root ball level with soil.
- Water in after transplant.
- To encourage root development, avoid overwatering.

Temperature:

- Most perennials prefer moderate temperatures for best growth and performance. With such a variety of genera and species, there is a wide variation of preferred temperatures, but most prefer to be grown in the range of 55° to 65°F night and 65° to 75°F day temperatures.
- Climate, other crops, and temperature control capability will all play a role in what set points to determine.

Media:

- Recommend well-drained media with at least 15% air porosity.
- Use nursery-type mix for finishing rather than peat and vermiculite based types.
- Make sure bark is sufficiently composted or nutritional problems can occur.
- Make sure water holding capacity is not too low or too high for your geographic location's expected precipitation.
- Monitor pH and EC during production.
 - General recommended pH: 5.8 to 6.5.
 - General recommended EC: 1 to 2 ms/cm using saturated paste method.

Irrigation Options for Perennials:

- Drip tubes or lines
- Ebb/flow system
- Overhead irrigation: Make sure the water droplet size is heavy enough to penetrate canopy as crop increases in size. Wind can adversely affect direction of water and there is increased risk of foliar disease.
- Regularly test your irrigation water: pH, EC, alkalinity, and pathogens.

Fertilization:

- Always use a complete N-P-K fertilizer with micronutrients; e.g., 20-10-20, 20-5-19, 21-5-20, etc. while plants are actively growing.
- Choose a fertilizer based on an analysis of your water's alkalinity and pH.
- Injecting liquid fertilizer at every irrigation gives the best control of nutrient levels. Constant liquid feed rates range anywhere from 75-200 ppm Nitrogen for perennials with the average being 100 to 150 ppm nitrogen. Test pH and EC regularly and leach with clear water if EC begins to creep up.
- Controlled release fertilizers (CRFs) with micronutrients can also be used and especially recommended for overhead irrigation for less runoff and waste. Use 150 to 180 day release rates for spring and summer crops. Keep in mind there is little nutrient release at temperatures below 60°F and faster nutrient release with high temperatures.
 - CRFs can be incorporated or top dressed so be sure to read the fertilizer label for proper measurements.
- Liquid feed and CRFs can also be combined by using low rates for both.

Insects and Disease:

- Scouting and early detection are important.
- Pests to watch for include aphids, thrips, whiteflies, spider mites, fungus gnats, shore flies, slugs and snails.
- Diseases to watch for include Botrytis, crown rots, fungal leaf spots, mildews, root rots, rusts and viruses.
- To prevent disease
 - Use a well-drained media and do not allow plants to sit in standing water.
 - Avoid excessive nitrogen.
 - Provide good air circulation.
 - Keep foliage dry overnight.
 - Remove old plant debris and weeds from the growing area.

Overwintering:

- A well-drained site with gravel, stone or tile is essential to avoid winter loss from excessive moisture. Eliminate puddles.
- Allow enough time to establish root systems in late summer/early fall before overwintering. Generally 8 to 10 weeks before hard frost is sufficient.
- Reduce fertilization in late summer/early fall to avoid soft growth in overwintering.
- Plants are usually placed pot to pot for space efficiency and improved insulation.
- Cut back dead/dying foliage to minimize foliar disease development. Evergreen types should not be cut back. Monitor evergreen types through the winter for foliar diseases or dehydration and treat accordingly.
- Covering
 - Use white poly on unheated or low heat hoop structures instead of clear to minimize heat buildup.
 - Fleece or thermal blankets can provide extra protection in colder zones. If plants are not covered with an insulating blanket, be prepared to irrigate as needed.
 - Cover as late as possible when night temperatures are consistently in the mid 30s.
 - Apply rodent bait to overwintering area prior to covering.
 - Apply a broad-spectrum systemic fungicide drench prior to freezing or covering.
 - Allow for ventilation to avoid temperature buildup under the cover (try to maintain 30° to 40°F).
 - Gradually uncover as early as possible in spring when temperatures are consistently in the high 30s or 40s at night.
- Some perennials do not tolerate multiple freeze-thaw periods or very wet winters. These are generally items that require good drainage in a garden situation. These items tend to rot easily and are best grown in a greenhouse structure, and not allowed to freeze. Hold temperatures slightly above freezing and keep as cool as possible on sunny days by ventilating. Examples of these items include *Gaillardia*, *Lithodora*, *Lobelia*, and *Stachys*.
- Apply another broad-spectrum, systemic fungicide drench or spray in spring.
- Once your plants begin to break, they must be protected from frost and freezing temperatures to avoid damage.

Vernalization and Bulking:

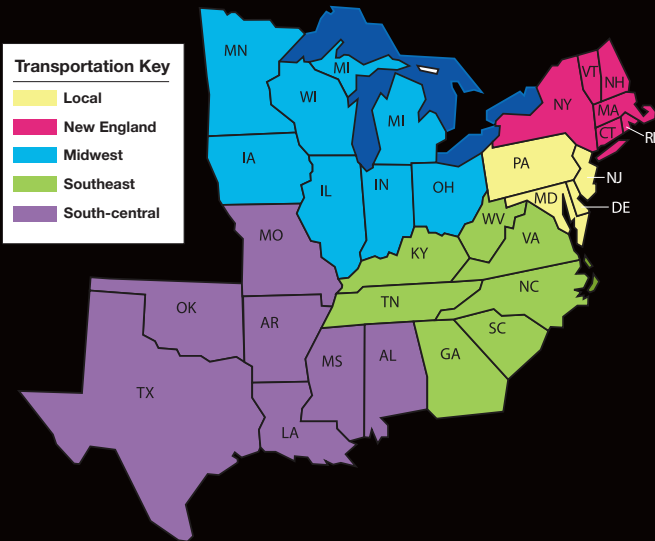

Vernalization is the exposure for specific lengths of time to cold temperatures, required by some plants to initiate bud formation, new growth or to improve overall plant vigor. Refer to the **VR** (vernalization required) and **VB** (vernalization beneficial) codes in our catalog variety descriptions. These codes indicate which plants require or benefit from a vernalization period. Plants that do not show a code do not require vernalization for production. There is also a B code extension to the VR and VB codes (**VR-B** and **VB-B**) to indicate which items require bulking. These are varieties that need to be planted in their final sales container in late summer-fall. This is to broaden the foliage canopy and develop the root system prior to vernalization which will provide a larger flower canopy in spring and better overall performance.

How to Handle Dormant Liners

Upon Receipt: Your winter or early spring shipment may be partially or completely dormant, showing little or no top growth. Healthy roots should be white to tan in most cases and never mushy.

- Do not allow plants to dry out completely.
- Place flats on bench until active growth resumes, or transplant into desired container. Light is important in breaking dormancy.
- Once your plants begin to break, they must be protected from frost and freezing temperatures.
- Do not fertilize dormant plants until they are actively growing.
- Application of a broad-spectrum fungicide after emergence is a good practice.
- Closely monitor for Botrytis.

Transportation

Shipping When and Where You Need It

Green Leaf Plants® Truck Delivery

Big or small loads, local or regional, Green Leaf Plants® delivers your order in ideal condition, at an economical, lower than common carrier rate. Climate-controlled trucks bring product fresh to your door year-round from the Mid-Atlantic to the Midwest, from New England to the deep South.

Green Leaf Plants® trucks make regular deliveries to the states shown above. We ship as close to requested week as possible. Contact our transportation department for truck delivery options outside our regular truck routes.

Truck routes and order minimums

Local: DC, DE, MD, NJ, PA (40 trays)

New England: CT, MA, NY, RI (40 trays) NH, VT (60 trays)

Midwest: IL, IN, MI, OH (60 trays); IA, MN, WI (88 trays)

Southeast: VA, WV (40 trays); GA, KY, NC, SC, TN (60 trays)

South-central: AL, AR, LA, MO, MS, OK, TX (88 trays)

- Friendly driver-assisted unloading
- Convenient, scheduled delivery during **your hours of operation**
- Climate-controlled trucks
- Orders delivered on metal or wooden racks

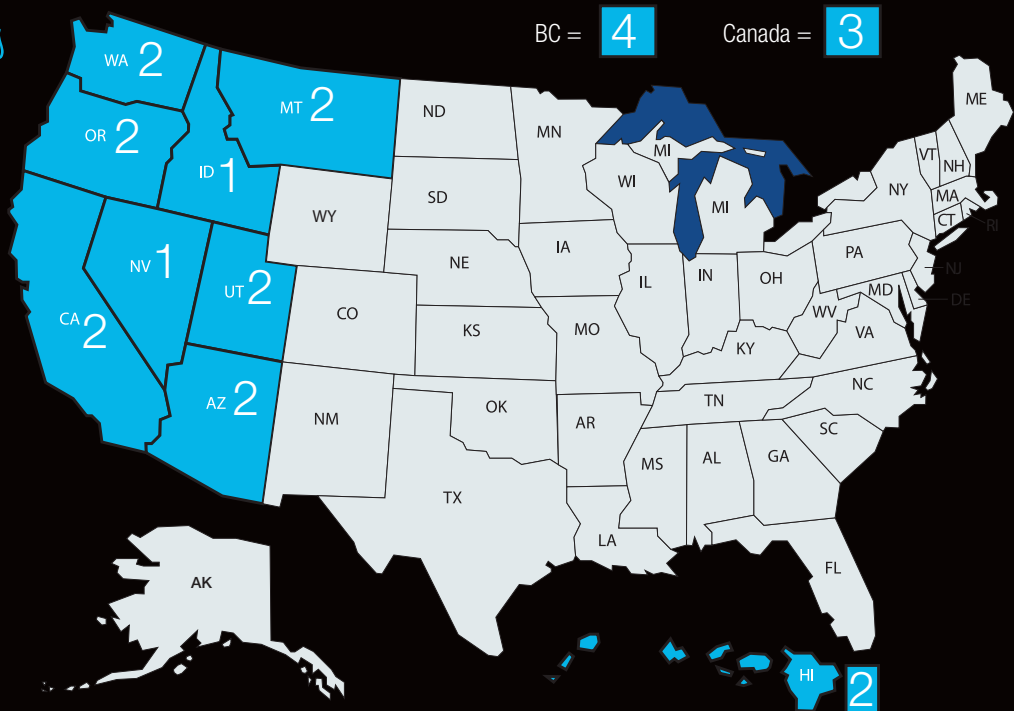

DID YOU KNOW?

We now accept last minute liner orders! Need something in a hurry? Give us a call and we'll do our best to ship the product the same week you order it.

Shipping Restrictions and Phyto Fees

Is your state shaded and numbered? See below.

1. FOB PA: Liners by advance order only. Restrictions and minimums apply. Call for details. (ID, NV)
2. FOB PA: Liners must be produced after Oct 1st and shipped by May 31st. (AZ, CA, HI, MT, OR, UT, WA)
3. Federal Phytosanitary Certificate required for liner and unrooted cutting shipments. Fee: \$30 (Canada)
4. FOB PA: Liners must be produced after Oct 1st and shipped by May 31st. Federal Phytosanitary Certificate required for liner and unrooted cutting shipments. Fee: \$30 (BC)

DO YOU KNOW?

We offer many more product lines beyond perennials, grasses and herbs. Detailed information, including sell sheets and technical guides are located at GLplants.com.

Contact your favorite broker sales rep or Green Leaf Plants® customer service staff at 800.321.9573 to get started.
