Intrinsic

INTRODUCTIONS

January 2018

Our new introductions in 2018 number closer to ten, hopefully that is a sign of our breeding program maturing. With Allium x *Millenium* chosen as the PPA plant of the year I would like to focus you on our Allium Breeding. Our closest to *Millenium* is one called *August Asteroids* a late and heavy bloomer that has a similar size and stature with the color being on the lighter side. *Windy City* on the other hand has a similar color but blooms earlier in late June early July. It's also shorter growing to 15" tall. We have many new Alliums under way including a purple form that resembles our *Pink Planet* and larger form of *Summer Beauty*. Some of these new Alliums reseeded into the gravel garden next to *Eryngium yuccifolium Prairie Moon*, their globe shaped flowers are a very nice compliment to each other especially in dry conditions. We continue to select for sterility too.

Amsonias continue to make slow and steady progress. The bases are being loaded with our Baseball series. This year is time for the *Seventh Inning Stretch*. This illustris hybrid has smaller glossy foliage on 3' plus upright and fuller plants. Light blue flowers are more clustered too. Golden yellow fall color with red stems peaking through. *Delosperma x Orange Crush* PPAF is a creamy orange sport of *Fire Spinner*. This year we also found a yellow sport and a variegated leaf too. Some of our latest Geums are turning out to be our best. *Cherry Bomb's* semi double flowers emerge red but quickly takes on cherry pink color. It has shorter stems growing 12-15" tall. *Top Shelf Margarita* has exceptional dark green foliage which makes a nice foil for the upright 15-18" red stems and buds opening to electric yellow, lightly doubled flowers. In July 2017, 40% of these rebloomed too.

Our newest seed strain is another *Liatris*. *Liatris ligulistylus Butterfly Magnet* is selected for the slightly shorter stems typically 4-5' tall. They are just as attractive to the male Monarchs. *Rudbeckia x American Gold Rush* has had the most interest this year with a handful of new licensees including some of the biggest growers in the country. URC trials are underway too. Trials in Georgia, Illinois and Colorado all looked great in July 2017. This year we have *Rudbeckia x Glitters like Gold* PPAF that resembles *Goldsturm*. This Septoria resistant plant is an improvement over *Goldsturm*. It has large cheesy gold flowers on heavy blooming plants, held on 3' stems.

We have 2 new groundcover sedums. *Sedum album Big Rock* is a robust large green form of album with white flowers in June. *Sedum rupestre Making Progress* PPAF has deep green needle like foliage then in late fall through May the plant turns plum red. It makes a great companion to *Angelina* and *Blue Spruce*. We also have a new seedling that is the *Hydrangea Limelight* of the Sedum world. I look forward to sharing it as soon as possible.

Intrinsic

INTRODUCTIONS

While we have always looked at ornamental grasses as part of our business, it has become more and more of a focus as we continue breeding some of the best new grasses available, including *Andropogon gerardii* *Blackhawks*. This year we are bringing back our dwarf June grass called *Tiny Tot*. It has nice blue foliage and a dwarf habit under 1' tall. On the larger size we have 5' tall *Molinia arundinacea* *Dutch Dreamer*. It is just the right size when it comes to blending the tall and small. Golden yellow fall color on upright plants.

After 18 years of breeding *Pennisetum* we are getting some exciting color breaks including a golden form, extra deep green foliage, and heavy blooming short red flowered types all with nice fall color.

As our breeding program matures, we have begun to see things that we never even considered breeding for. We are currently breeding *Andropogon*, *Bouteloua*, *Carex*, *Fescue*, *Miscanthus*, *Panicum*, *Pennisetum*, *Schizachyrium*, *Sesleria* and *Sporobolus*.

We are even looking at some of the tender, yet perennial, grasses like *Stipas* and *Pennisetums*.

Brent Horvath- Breeder

— Our Breeding Philosophy —

Our plants are bred and selected in the tough conditions of the Midwest with hot humid summers and cold wet winters. We strive to breed plants not as a means, but with an end in mind.

Our goals are simple- improved, durable, ornamental garden plants for our own climate and the rest of the world! Our plants are bred to stand the test of time, if they don't survive or thrive in the garden why bother.

GOT SEDUMS?

Brent Horvath's first book, *The Plant Lover's Guide to Sedums*, is available from Timber Press. It includes everything you need to know about these beautiful gems. Plant profiles highlight 150 of the best varieties to grow, with information on zones, plant size, soil and light needs, origin, and how they are used in the landscape. Additional information includes designing with sedums, growing and propagating them, where to buy them, and where to see them in public gardens.

INTRODUCTIONS

Agastache

x

Anise Hyssop

Velvet Crush PPAF – Originally selected for it's deeper green crinkled foliage. The backs are even more interesting with rich velvet purpled underside. Large, long blooming plants bloom pink on 3' + stems beginning in mid summer. The rose colored seedheads are as showy held on deep green to chocolate brown stems. Full sun, average soil.

1 Gal. 6.00

2017	\$0.10	patented	plugs	

Allium

cernuum

Nodding Onion

Falling Stars - white – This white form of nodding onion has thicker gray green foliage on 18 – 24" tall stems, a bit taller than the species. Full sun to light shade, average well drained to dry soil.

1 Gal. 5.50

Introduced	Royalty	Status	Liner Availability	Sources other than IPG
2017			custom	

Allium

cernuum

Nodding Onion

Wine Drop – This vegetative form of Nodding Onion was selected for its darker pink color. At cool times the pedicels are wine colored too giving an added hint of pink to the flower head. The foliage is on the thin side. Stems grow 15-18" tall. Full sun, well drained soil.

1 Gal. 5.50

Introduced	Royalty	Status	Liner Availability	Sources other than IPG
2013			custom	

Allium

schenoprasum

Dwarf Pink Chive

Rising Star – Extra dwarf pink chives reaching only 10-12" tall and wide, bloom in May. Fine grey, green, grassy foliage looks nice all season long. Easy to grow. Plants prefer full sun and average to well drained soil.

2016			plugs	

Chivette PPAF – A mostly sterile chive with edible kelly green foliage all season long. Initially upright but then more relaxed reaching 12-15" + long. This vigorous plant is easy to grow. Lavender purple flowers with a purple stripe down the middle of the pedal are also edible and held on 12" + stems. Beginning as round buds the flower open to 1" wide. Full sun preferred. Average to dry soil.

INTRODUCTIONS

Amsonia tabernaemontana **Bluestar**

Fontana – This red stem selection has slightly darker blue flower clusters at the end of May into June on 36" + plants. In August the red seedheads are showy too. Zone 4-9. Full sun to light shade. Well drained to dry soil. 1 Gal. 5.00

Introduced	Royalty	Status	Liner Availability	Sources other than IPG
2015			custom	

Amsonia x **Baseball™ Bluestar**

Short Stop – Compact 2'+ plants bloom the end of May early June with light blue cone shaped flower clusters. While most Amsonias have a growth spurt after flowering this one is stopped short. Yellow fall color too. Full sun is best. Average to well drained soils. 1 Gal. 5.50

Introduced	Royalty	Status	Liner Availability	Sources other than IPG
2016			custom	

First Hit – Our second plant in the Baseball™ Series, This intermediate foliage is exceptionally dark and glossy, held on red-purple stems in spring, quickly followed by clusters of light blue flowers. The habit is also more compact growing around 2'+. Nice yellow fall color too. Full sun, average soil. 1 Gal. 5.50

Introduced	Royalty	Status	Liner Availability	Sources other than IPG
2017			custom	

Seventh Inning Stretch – Initially glossy foliage emerges green but smaller than a typical illustris. The habit on this hybrid is also upright but more reserved and is bushier. Light blue flower clusters bloom at the top of the thin stems in late May, early June eventually reaching 3' . Full sun to light shade. 1 Gal. 6.00

Midway to Montana – Technically this is probably *Amsonia tabernaemontana salicifolia* as is our *Halfway to Arkansas*. This form is practically half the size too. Mature plants have intermediate foliage around 3/8 - 1/2" wide with clumps maturing to 3' tall and wide. Light blue flower clusters bloom at around 12-18" + with a bolt of foliage after that. These adaptable plants will grow in full sun to part shade and most any soil except wet. Fall color is a striking golden yellow. These plants can make a nice informal herbaceous hedge too.

1 Gal. 5.50

Red October PP#26,283 – Our second vegetative form of Big Bluestem and for its fall color its hard to beat. Initially it was selected for its finer foliage, and has a nice upright habit to 6'. Foliage emerges deep green usually having some red tips from spring on. Starting in August the red highlights increase and deepen to a rich burgundy red. After the first frost usually in October, the foliage turns a more scarlet red taking on a striking appearance. Red flowers begin in August. Full sun is best for the red foliage color. Well drained soil. John Greenlee called this "the New Rubrum."

INTRODUCTIONS

Echinacea	<i>purpurea</i>	Purple Coneflower		
White Showoff – After years of observing the pink form and pulling out the best whites we are able to offer a white strain of Showoff. Bright honey colored cones and hanging white petals on vigorous 3'+ plants. Great for a naturalistic planting. Full sun, well drained soil. Long blooming.				
			1 Gal.	5.00
Introduced	Royalty	Status	Liner Availability	Sources other than IPG
2016			custom	

Echinacea	x	Dwarf White Coneflower		
Snow Cone – Bushy plants skirted with foliage reaching 18-24" tall and wide. Pure white flowers open with green cones that fade to a chartreuse yellow, making a pleasing combination. This hybrid has tennesensis in it giving it longevity over straight <i>purpurea</i> types. Full sun, well drained soil.				
			70 plug 1 Gal.	2.00 7.00
Introduced	Royalty	Status	Liner Availability	Sources other than IPG
2011			stage III	Emerald Coast Growers, Hortech, Microplant

Eryngium	<i>yuccifolium</i>	Rattlesnake Master		
Prairie Moon – This uniformly short seed strain was selected for its shorter statured 3'+ stems compared to the species which grows to 5' and tends to flop. The foliage is also thinner and bluer. White flowers begin in June or July. In fall the seedheads turn brown and hold on into winter. Plant in full sun, dry to well drained soil.				
			1 Gal.	6.00
Introduced	Royalty	Status	Liner Availability	Sources other than IPG
2013			custom	

Eupatorium	<i>perfoliatum</i>	Boneset		
Milk and Cookies – This native wetland species tolerates average soil. This selection has chocolate red foliage with milky white flowers in July on 3' stems. Full sun, moist to average soil. Easy to combine with.

Festuca x **Cool Blue Fescue**

Cool as Ice PP#27,651 – This one was selected for its lighter green spring emergence giving the plant a slight bi-color look and better heat tolerance in summer. Vigorous plants turn blue in summer. Flower stems reach 18" with foliage reaching 24" wide. Zone 4-8. Full sun to light shade, well drained soil is best.

Geranium *soboliferum* **Cranesbill**

Butterfly Kisses – A unique geranium since it begins to flower in September. Large clumps of pale green foliage reach 2'+ wide and 18"+ tall. Nice en masse or planted where it can weave between other plants. Perfect with *Eragrostis spectabilis*. Magenta and pink bicolor flowers dance along the foliage, which can have nice red highlights in October adding to its seasonal interest. Full sun to light shade, well drained soil.

2015			custom	

Lurie garden strain – This seed strain is a wonderful mix of amethyst to pink to light purples with some violets too. This blend was selected out of a light pink seedling of Amethyst found in Lurie by Piet Oudolf and Roy Diblik. It has a similar tall 24-30”+ habit with long thinner lightly branched flowers 8-12” in length. Full sun, well drained to average soil.

Sedum x **Autumn Delight™ Showy Stonecrop**

Beka PP#18,398 – A reverse sport that came from Sedum *Lajos* PP#14,421 *Autumn Charm™*. This one has foliage with a thin, green edge and chartreuse yellow centers. Flowers just like *Autumn Joy*, the parent. Due to the variegation the height seems to be shorter. So far we've only seen it grow to 18". *Beka* means *frog* in Hungarian and was my dad's affectionate name for my mom. The foliage is showiest in May and June. Licensing is available, please call Brent.
