January 2019

2019 will once again be a year of focus on future introductions and the growing potential of our breeding program. While the number of selections continues to increase, the number of introductions stays close to 100. This catalog focuses on our introductions possessing potential for market share and plants that already have a share with building demand.

2018 saw more demand for our top selling introduction *Rudbeckia x 'American Gold Rush'*. It is on its way to popularity and availability with 3 labs producing it in tissue culture and urc availability in 2019-2020 from Darwin Perennials. *Andropogon gerardii* 'Blackhawks' and 'Red October' are still hot and our next Big Bluestem adds silvered foliage to the purple-red fall color. The two newest Geums 'Cherry Bomb' PPAF and 'Top Shelf Margarita' PPAF both sold well in their first year. *Sedum x 'Pillow Talk'* sales held steady and is now available as urc from Quality Cuttings along with 3 other sedum varieties *Sedum ellacombianum* 'Cutting Edge', 'Rock Star' and 'Thundercloud' and *Penstemon digitalis* 'Pocahontas'. Both of the *Stachys x 'Summer Crush'* PPAF and 'Summer Romance' PPAF will also be available from Quality Cuttings in the future. As I look at our future introductions many are grasses including more Pennisetums. This year we are introducing a small *Pennisetum alopecuroides* with golden yellow foliage called 'Yellow Ribbons' PPAF. It's size and habit are close to 'Hameln' but the thin foliage goes from a bright gold to chartreuse yellow by late summer. *Panicum virgatum* 'Prairie Dog' PPAF is our first Switch grass introduction and was selected for its clean upright gray foliage on relatively short 4-5' plants. Large inflorescence covers the top third of the plant.

Additional new perennials this year include a bright yellow sport of *Delosperma* 'Orange Crush' PPAF called 'Mountain Dew' PPAF with the same great ground covering habit and vigor as 'Firespinner'. *Orostachys x 'Octopus Garden'* is our newest seed strain, a vigorous blend of gray-green, silvered, and plum succulent foliage in overlapping rosettes topped with pointed creamy spikes in fall. It is super attractive to pollinators too. This year for the first time we will sell seed of our seed strains including: *Echinacea purpurea* 'Showoff', *Eryngium yuccifolium* 'Prairie Moon', *Liatris spicata* 'Trailblazer', and *Salvia nemerosa* 'Lurie Strain'. I look forward to sharing more seed strains in the future including Lobelias. *Prunella vulgaris* 'Magdalena' PPAF has both a larger habit and foliage than the species it also has regular rebloom after the initial heavy bloom in mid-June. The fingered foliage always looks nice. These plants are very adaptable and native to 48 states. Even the dark

purple seed heads are showy. I'm pleased *Sedum x 'Bundle of Joy'* PPAF is our fourth Proven Winners plant. It is a white sport of 'Pure Joy' and has the same great dome shaped habit, 1' tall by 15-20" wide. *Sedum x 'Lime Joy'* PPAF has exceptional vigor yielding 200 plants within a year. In July the lime green buds resemble Hydrangea and could make a nice cut flower. By September strong stems hold 6-8" flower heads of deep pink. *Sedum x 'Sunset Boulevard'* PPAF is a sister seedling to 'Pillow Talk' with both darker flower and wine colored seed heads above rose and green colored foliage. The foliage adds yellow and orange fall color as the season ends putting on an extra show for October. *Veronica x 'Kiss the Sky'* PPAF has extra long sky blue flowers above gray-green clean foliage all on 24" + plants.

In 2019 we will work hard to grow our own stock and find suppliers to feed our propagators. I plan on sowing more seed than ever this year which will yield many great new plants. I look forward to showing these and many other plants this year and encourage you to visit. IPG will be on the Sunday, July 28th PPA tour before the Chicago symposium. If you can't make it during PPA consider attending our 5th Annual Ornamental Grasses day, Friday, September 13th, 2019. This is a perfect time to see most of our ornamental grasses at their peak.

Brent Horvath

Brent Horvath- Breeder

— Our Breeding Philosophy —

Our plants are bred and selected in the tough conditions of the Midwest with hot humid summers and cold wet winters. We strive to breed plants not as a means, but with an end in mind.

Our goals are simple- improved, durable, ornamental garden plants for our own climate and the rest of the world! Our plants are bred to stand the test of time, if they don't survive or thrive in the garden why bother.

GOT SEDUMS?

Brent Horvath's first book, *The Plant Lover's Guide to Sedums*, is available from Timber Press. It includes everything you need to know about these beautiful gems. Plant profiles highlight 150 of the best varieties to grow, with information on zones, plant size, soil and light needs, origin, and how they are used in the landscape. Additional information includes designing with sedums, growing and propagating them, where to buy them, and where to see them in public gardens.

Order online at www.timberpress.com

Gold Award
GWA! 2015

Agastache x **Anise Hyssop**

Velvet Crush PP#29,394 — Originally selected for its deeper green crinkled foliage. The backs are even more interesting with rich velvet purple underside. Large, long blooming plants bloom pink on 3' + stems beginning in mid summer. The rose colored seedheads are as showy held on deep green to chocolate brown stems. Full sun, average soil.

1 Gal. 6.00

Introduced	Royalty	Status	Liner Availability	Sources other than IPG
2017	\$0.10	patented	plugs	Vitro Westland

Allium *cernuum* **Nodding Onion**

Falling Stars - white — This white form of nodding onion has thicker gray green foliage on 18 – 24" tall stems, a bit taller than the species. Full sun to light shade, average well drained to dry soil.

1 Gal. 5.50

Introduced	Royalty	Status	Liner Availability	Sources other than IPG
2017			custom	

Wine Drop — This vegetative form of Nodding Onion was selected for its darker pink color. At cool times the pedicels are wine colored too giving an added hint of pink to the flower head. The foliage is on the thin side. Stems grow 15-18" tall. Full sun, well drained soil.

1 Gal. 5.50

Introduced	Royalty	Status	Liner Availability	Sources other than IPG
2013			custom	

Allium *schoenoprasum* **Dwarf Pink Chive**

Rising Star — Extra dwarf pink chives reaching only 10-12" tall and wide, bloom in May. Fine grey, green, grassy foliage looks nice all season long. Easy to grow. Plants prefer full sun and average to well drained soil.

Allium x Chivette PP#30,151

Allium x August Asteroids

Amsonia hubrichtii Green Mist

Allium x Windy City PP#28,100

Amsonia tabernaemontana Bluestar

Fontana — This red stem selection has slightly darker blue flower clusters at the end of May into June on 36" + plants. In August the red seedheads are showy too. Zone 4-9. Full sun to light shade. Well drained to dry soil.

1 Gal. 5.50

Introduced	Royalty	Status	Liner Availability	Sources other than IPG
2015			custom	

Amsonia tabernaemontana Baseball™ Bluestar

Short Stop — Compact 2'+ plants bloom the end of May early June with light blue cone shaped flower clusters. While most Amsonias have a growth spurt after flowering this one is stopped short. Yellow fall color too. Full sun is best. Average to well drained soils.

1 Gal. 5.50

Introduced	Royalty	Status	Liner Availability	Sources other than IPG
2016			custom	

Amsonia x Baseball™ Bluestar

First Hit — Our second plant in the Baseball™ Series, This intermediate foliage is exceptionally dark and glossy, held on red-purple stems in spring, quickly followed by clusters of light blue flowers. The habit is also more compact growing around 2'+. Nice yellow fall color too. Full sun, average soil.

1 Gal. 5.50

Introduced	Royalty	Status	Liner Availability	Sources other than IPG
2017			custom	

Amsonia x illustris Baseball™ Bluestar

Seventh Inning Stretch — Initially glossy foliage emerges green but smaller than a typical illustris. The habit on this hybrid is also upright but more reserved and is bushier. Light blue flower clusters bloom at the top of the thin stems in late May, early June eventually reaching 3'. Full sun to light shade.

1 Gal. 6.00

Introduced	Royalty	Status	Liner Availability	Sources other than IPG
2018			custom	

Amsonia x Short Stop

Amsonia tabernaemontana Fontana

Amsonia x Seventh Inning Stretch

Amsonia x First Hit

Amsonia x **Bluestar**

Halfway to Arkansas – The foliage is a glossy deep green and uniformly needle-like. Pale blue flowers cluster in May. Rounded mounds top out just over 48” tall and wide. Yellow fall color comes a bit later than the other Amsonias. Try it with Pennisetum ‘Red Head,’ and Penstemon ‘Huskers Red’ and ‘Pocahontas.’ Full sun to light shade in well drained to moist soil.

70 plug 1.00
1 Gal. 5.50

Introduced	Royalty	Status	Liner Availability	Sources other than IPG
2005			plugs	Blooming Nursery, GET group, Hortech Twixwood

Midway to Montana – This form is practically half the size too. Mature plants have intermediate foliage around 3/8 - 1/2” wide with clumps maturing to 3’ tall and wide. Light blue flower clusters bloom at around 12-18” +with a bolt of foliage after that. These adaptable plants will grow in full sun to part shade and most any soil except wet. Fall color is a striking golden yellow. These plants can make a nice informal herbaceous hedge too.

1 Gal. 5.50

Introduced	Royalty	Status	Liner Availability	Sources other than IPG
2013			plugs	

Andropogon gerardii **Big Bluestem**

Blackhawks PP#27,949, EUPBRAFF – Deeper green foliage takes on a deep purple background in mid-summer deepening to dark purple and near black in some parts of the plant. Upright 5’+ tall plants will stand out in the landscape, especially with other tall grasses. Full sun, average soil.

50 plug 2.75

Red October PP#26,283 — Our second vegetative form of Big Bluestem and for its fall color its hard to beat. Initially it was selected for its finer foliage, and has a nice upright habit to 6'. Foliage emerges deep green usually having some red tips from spring on. Starting in August the red highlights increase and deepen to a rich burgundy red. After the first frost usually in October, the foliage turns a more scarlet red taking on a striking appearance. Red flowers begin in August. Full sun is best for the red foliage color. Well drained soil. John Greenlee called this "the New Rubrum."

Heaven Scent PP#20,214, EUPBR#32,205 — Lacy pinnate foliage emerges red and continues to hold red highlights until summer. Grape scented blue flowers begin in May and can continue into June. Plants top out at 18-24" tall. Drought tolerant clumps can grow in full sun to part shade. Makes a good cut flower, too. Nice with Geum.

INTRODUCTIONS

Salvia nemorosa Perennial Salvia/Meadow Sage

Lurie garden strain – This seed strain is a wonderful mix of amethyst to pink to light purples with some violets too. This blend was selected out of a light pink seedling of Amethyst found in Lurie by Piet Oudolf and Roy Diblik. It has a similar tall 24-30"+ habit with long thinner lightly branched flowers 8-12" in length. Full sun, well drained to average soil.

Sedum x **Autumn Delight™ Showy Stonecrop**

Beka PP#18,398 — A reverse sport that came from Sedum 'Lajos' PP#14,421 'Autumn Charm™.' This one has foliage with a thin, green edge and chartreuse yellow centers. Flowers just like 'Autumn Joy,' the parent. Due to the variegation the height seems to be shorter. So far we've only seen it grow to 18". 'Beka' means *frag* in Hungarian and was my dad's affectionate name for my mom. The foliage is showiest in May and June. Licensing is available, please call Brent.
