January 2020

2019 was a great year for Intrinsic Introductions. Our Rudbeckia x 'American Gold Rush' won the All American Selection award just in time to meet the growing supply chain including, four tissue culture labs and URC availability from Darwin Perennials. In 2020 we will begin to trial another Rudbeckia with yellow flowers and begin to license Rudbeckia x 'Glitters like Gold' in July and at the same time our 2008 intro Polemonium x 'Heaven Scent' will become our fifth Proven Winners perennial.

Our top selling introductions were Rudbeckia x 'American Gold Rush', Allium x 'Windy City', Andropogon gerardii 'Blackhawks' and 'Red October', and Penstemon digitalis 'Pocahontas' which sold out for the first time since we introduced it in 2012 and will be featured on QVC along with Rudbeckia x 'American Gold Rush', which is really exciting.

As far as new Introductions, 2020 will be a reserved year as we focus on supply chain for already current intros. Amsonia x 'Bases Loaded' is our most refined halfway type foliage yet. Extra dark green foliage shows off the heavy clusters of light blue on 18-24" stems. Reserved growth keeps these 30" plus plants wider than tall. And we have lot more Amsonia hits on deck where that came from. Bouteloua gracilis 'Honey Blonde' PPAF is a larger Grama grass selected for uniform growth, good vigor and upright stems standing up to winter. Dianthus x 'Fuchsia Fire' PPAF is the first plant introduction from breeder Jake Letmanski who I've been lucky enough to mentor since he joined our team in 2017 at 15 years old. This has all the great attributes of 'Firewitch' but is half the size and has Kahori in its background which helps its sporadic rebloom. Matting silver plants spread instead of opening up in the middle. A portion of the royalty will go to Jake as he pursues horticulture in college fall of 2020. Eupatorium x 'Polished Brass' is an absolute pollinator and butterfly magnet. The 4' tall hybrid plants emerge with glossy bronze red foliage and bloom like a cloud in August with creamy white flowers. For the future we have Joe pye weed with purple foliage.

After 19 years breeding Pennisetum 'Love and Rockets' is a dwarf red flowering fountain grass close in size and stature to 'Hameln'. It combines nicely with the dark green foliage with red tips. 'Yellow Ribbons' our 2019 intro looked great at every trial site I saw it in. Next year we will introduce a broad leaved form with yellow foliage. Think 'All Gold' for full sun. Salvia nemorosa 'Sixteen Candles' PPAF has less branched upright flowers. The pink color flowers gets backed up by purple and violet calyxes and stems adding depth and contrast. Sedum album 'Nerds' is a great groundcover and has interesting orange to russet red color in winter into spring. Sedum sexangulare 'Yellowstone' PPAF is a more robust and bright improvement on 'Golddigger'. I'm pleased Sedum x 'Pride and Joy' PPAF will become our fourth Proven Winners perennial. It's a deeper pink sport of 'Pure Joy' and has the same great dome shaped habit, 1' tall by 15-20" wide. Finally, Veronicastrum virginicum 'Queen of Diamonds' was selected for extra clean, dark green foliage. After the soft pink flowers in late summer, the upright 4' plants stand chocolate brown all winter long.

Our 6th annual ornamental Grasses day, Friday September 18th, 2020. Come see our ornamental grasses at their peak.

Brent Horvath- Breeder

Our Breeding Philosophy

Our plants are bred and selected in the tough conditions of the Midwest with hot humid summers and cold wet winters. We strive to breed plants not as a means, but with an end in mind.

Our goals are simple- improved, durable, ornamental garden plants for our own climate and the rest of the world! Our plants are bred to stand the test of time, if they don't survive or thrive in the garden why bother.

GOT SEDUMS?

Brent Horvath's first book, *The Plant Lover's Guide to Sedums*, is available from Timber Press. It includes everything you need to know about these beautiful gems. Plant profiles highlight 150 of the best varieties to grow, with information on zones, plant size, soil and light needs, origin, and how they are used in the landscape. Additional information includes designing with sedums, growing and propagating them, where to buy them, and where to see them in public gardens.

Gold Award
GWA! 2015

Agastache x **Anise Hyssop**

Velvet Crush PP#29,394 — Originally selected for its deeper green crinkled foliage. The backs are even more interesting with rich velvet purpled underside. Large, long blooming plants bloom pink on 3' + stems beginning in mid summer. The rose colored seedheads are as showy held on deep green to chocolate brown stems. Full sun, average soil.

1 Gal. 6.00

Introduced	Royalty	Status	Liner Availability	Sources other than IPG
2017	\$0.10	patented	custom	Vitro Westland

Allium *cernuum* **Nodding Onion**

Falling Stars - white — This white form of nodding onion has thicker gray green foliage on 18 – 24" tall stems, a bit taller than the species. Full sun to light shade, average well drained to dry soil.

1 Gal. 5.50

Introduced	Royalty	Status	Liner Availability	Sources other than IPG
2017			custom	

Wine Drop — This vegetative form of Nodding Onion was selected for its darker pink color. At cool times the pedicels are wine colored too giving an added hint of pink to the flower head. The foliage is on the thin side. Stems grow 15-18" tall. Full sun, well drained soil.

1 Gal. 5.50

Introduced	Royalty	Status	Liner Availability	Sources other than IPG
2013			custom	

Allium *schoenoprasum* **Dwarf Pink Chive**

Rising Star — Extra dwarf pink chives reaching only 10-12" tall and wide, bloom in May. Fine grey, green, grassy foliage looks nice all season long. Easy to grow. Plants prefer full sun and average to well drained soil.

70 plug 1.00

INTRODUCTIONS

Allium x **Ornamental Onion**

Chivette PP#30,151 — A mostly sterile chive with edible kelly green foliage all season long. Initially upright but then more relaxed reaching 12-15" + long. This vigorous plant is easy to grow. Lavender purple flowers with a purple stripe down the middle of the pedal are also edible and held on 12" + stems.

Beginning as round buds the flower open to 1" wide. Full sun preferred 70 plug 1.25
Average to dry soil. 1 Gal. 6.00

Introduced	Royalty	Status	Liner Availability	Sources other than IPG
2017	\$0.15	patented	plugs, bareroot	Pioneer Gardens

Windy City PP#28,100 — Dark green glossy foliage reaches 15" tall and wide. Dark rose purple flower clusters begin to color in June and open in July on 18-20" stems. Full sun is best. Average well drained to dry soil. Very drought tolerant.

50 plug 1.50

2015	\$0.20	patented	plugs, bareroot	AG 3, Inc., Creek Hill Nursery, Garden World, Greenleaf Nursery, Pioneer Gardens, Twixwood, Van Essen Nursery

Amsonia tabernaemontana **Bluestar**

Fontana — This red stem selection has slightly darker blue flower clusters at the end of May into June on 36" + plants. In August the red seedheads are showy too. Zone 4-9. Full sun to light shade. Well drained to dry soil.

1 Gal. 5.50

Introduced	Royalty	Status	Liner Availability	Sources other than IPG
2015			custom	

Amsonia tabernaemontana **Baseball™ Bluestar**

Short Stop — Compact 2'+ plants bloom the end of May early June with light blue cone shaped flower clusters. While most Amsonias have a growth spurt after flowering this one is stopped short. Yellow fall color too. Full sun is best. Average to well drained soils.

1 Gal. 5.50

Introduced	Royalty	Status	Liner Availability	Sources other than IPG
2016			custom	

Intrinsic

INTRODUCTIONS

Allium x Chivette PP#30,151

Amsonia tabernaemontana Fontana

Amsonia x Short Stop

Allium x Windy City PP#28,100

Amsonia x **Baseball™ Bluestar**

Bases Loaded — Intermediate, halfway type foliage, emerges dark green. These hybrid plants are heavy blooming. The light blue flower clusters are larger top and begin to open at the end of May on 18-24" stems. These plants have a reserved growth spurt to 30 inches plus after the flowers fade keeping the plant wider than tall. Full sun, average soil

NEW for 2020

1 Gal. 5.50

Introduced	Royalty	Status	Liner Availability	Sources other than IPG
2020			custom	

First Hit — Our second plant in the Baseball™ Series, This intermediate foliage is exceptionally dark and glossy, held on red-purple stems in spring, quickly followed by clusters of light blue flowers. The habit is also more compact growing around 2'+. Nice yellow fall color too. Full sun, average soil.

1 Gal. 5.50

Introduced	Royalty	Status	Liner Availability	Sources other than IPG
2017			custom	

Amsonia x **Baseball™ Bluestar**

Seventh Inning Stretch — Initially glossy foliage emerges green but smaller than a typical illustris. The habit on this hybrid is upright but more reserved and is bushier. Light blue flower clusters bloom at the top of the thin stems in late May, early June eventually reaching 3'. Full sun to light shade.

1 Gal. 6.00

Introduced	Royalty	Status	Liner Availability	Sources other than IPG
2018			custom	

Amsonia x **Bluestar**

Halfway to Arkansas — The foliage is a glossy deep green and uniformly needle-like. Pale blue flowers cluster in May. Rounded mounds top out just over 48" tall and wide. Yellow fall color comes a bit later than the other Amsonias. Try it with Pennisetum 'Red Head,' and Penstemon 'Huskers Red' and 'Pocahontas.' Full sun to light shade in well drained to moist soil.

Amsonia x First Hit

Amsonia x **Bluestar**

Midway to Montana — This form is practically half the size too. Mature plants have intermediate foliage around 3/8 - 1/2" wide with clumps maturing to 3' tall and wide. Light blue flower clusters bloom at around 12-18" +with a bolt of foliage after that. These adaptable plants will grow in full sun to part shade and most any soil except wet. Fall color is a striking golden yellow. These plants can make a nice informal herbaceous hedge too.

Red October PP#26,283 – Our second vegetative form of Big Bluestem and for its fall color its hard to beat. Initially it was selected for its finer foliage, and has a nice upright habit to 6'. Foliage emerges deep green usually having some red tips from spring on. Starting in August the red highlights increase and deepen to a rich burgundy red. After the first frost usually in October, the foliage turns a more scarlet red taking on a striking appearance. Red flowers begin in August. Full sun is best for the red foliage color. Well drained soil. John Greenlee called this "the New Rubrum."

2019	\$0.20	patented	plugs	Emerald Coast, Greenleaf Nursery, Poplar Ridge Nursery

Penstemon digitalis Beardtongue

Pocahontas PP#24,804 — Burgundy foliage emerges in spring quickly followed in June by 3-4' burgundy red stems holding loose clusters of purple pink flowers. An irresistible combination judging from the womens reaction when we had it blooming near the office. The hummingbirds also had a taste and find it equally appealing. Plants prefer full sun, and well drained to rich soil.

INTRODUCTIONS

Salvia nemorosa Perennial Salvia/Meadow Sage

Lurie garden strain — This seed strain is a wonderful mix of amethyst to pink to light purples with some violets too. This blend was selected out of a light pink seedling of Amethyst found in Lurie by Piet Oudolf and Roy Diblik. It has a similar tall 24-30"+ habit with long thinner lightly branched flowers 8-12" in length. Full sun, well drained to average soil.
