## **Fragrant Plants at Suncrest Nurseries**

Most gardeners are already accustomed to a long list of fringe benefits offered by the plants they grow, many of them learned only through close acquaintance. Things like blazing fall leaf color, a long flowering season, and attractiveness to butterflies and other wildlife may be barely mentioned on plant labels or in other commercial sources of information. Fragrance, whether of flowers, foliage or even stems and roots, is often a welcome bonus in plants grown for some other purpose, like filling a perennial border or covering a bank.

Fragrance connects a plant to its surroundings in many different ways, often not those we perceive as gardeners. Floral fragrances, above all, attract pollinators and thus promote reproduction. Aromatic fruits invite animals to a meal, giving the seeds they contain a ride to some other location. The smells we find attractive in leaves and stems, however, quite often have the opposite effect on browsing animals, convincing them to look for a meal elsewhere and protecting the main body of the plant.

#### **Types of Fragrances**

We humans have a wonderful ability to discriminate among different smells, and often to remember them long afterward. The problem comes in trying to describe an interesting smell to someone else. Here we may find that our language lacks the richness of our own perception. We have tried, in the plant descriptions that follow, to describe each fragrance using a few simple, key words. "Sweet" is simple enough, but many flowers (and some leaves) have much more complex elements. Those we have described as "heavy" are best typefied by the gardenia–a rich, perhaps slightly musky fragrance that permeates the air. "Bitter" should be familiar to everyone, and plants like the artemisias with this feature also tend to taste even more bitter than they smell. "Spicy" brings in familiar elements like cinnamon, cloves and ginger. For "herbal", think of thyme and oregano. We often use "sagey", with the kitchen sage in mind, but many sages (*Salvia*) also have several other elements, pleasant and otherwise. Sometimes we have simply thrown up our hands and retreated to a catch-all phrase, "complex". Fragrances of all descriptions may be faint or strong, and those described below as "pungent" have a piercing quality that can be almost overwhelming at close range. However we try to describe plant fragrances with words, the actual experience of living with, touching and sniffing fragrant plants in the garden is thoroughly delightful.

#### **Growing Fragrant Plants**

This group encompasses an impossibly broad range of geographical origins and habitats, from the wet tropics to temperate plains and even desert mountains, forest understory to bare rock scree. Thus it is futile to try to offer any general comments on culture for the group as a whole. Simply choose them according to both fragrance and other plant features you want for your garden, and let the climatic tolerances, soil requirements and irrigation needs shown below provide a rough guide to the kinds you can actually grow.

#### **Fragrant Plants at Suncrest**

The Suncrest horticultural staff only occasionally pursues a plant specifically for its fragrance, yet the presence of fragrant plants around the nursery makes life much more enjoyable for all of us who work here. We are pleased to share this experience with gardeners around the state. The entries that follow give a capsule description of the ornamental features of each plant, specify the fragrant plant parts and attempt to describe their particular fragrance. You will also find cultural requirements and tolerances and estimated hardiness for each plant. We hope that you enjoy the special charms of each plant as we have.

# A Palette of Fragrance

Acorus gramineus 'Li	icorice'	Sweet flag	
Evergreen perennial	Size: 6"	Fragrance: Mild Licorice	Fragrant Parts: Leaves
Most soils	Moderate watering	Sun/shade	Hardy to 0 deg. or less
Clumps of green shiny	leaves are sweetly aromatic	e. Makes a great, durable groundcover	for shady spots.
Adenandra fragrans			
Evergreen shrub	Size: 3'	Fragrance: Sweet, Mild	Fragrant Parts: Leaves
Well-drained soil	Moderate watering	Sun or light shade	Hardy to 25-30 deg.F.
Charming South Africa	in carries bright starry pink	flowers in spring and summer, as well	l as scattered bloom at other
times. Protect from har	d frost.		
Agastache aurantiaca	l	Orange hummingbird mint	
Evergreen perennial	Size: 2'	Fragrance: Sim. Pennyroyal, Spicy	Fragrant Parts: Leaves
Well-drained soil	Moderate watering	Full sun	Hardy to 10 deg. or less
Aromatic leaves stay lo	w; spikes of bright soft ora	nge flowers appear in spring and sum	mer. Attracts hummingbirds.
Moderate water brings	repeat bloom.		
Agastache 'Blue Fort	une'	Anise hyssop	
Deciduous perennial	Size: 2'	Fragrance: Anise	Fragrant Parts: Leaves
Well-drained soil	Moderate watering	Sun or light shade	Hardy to 0 deg. or less

Dicentra 'Adrian Bloom'	Bleeding heart	
Deciduous perennial Size: To 1' high	Fragrance: Sweet, Rich, Mild	Fragrant Parts: Flowers
Well-drained soil Moderate watering	Light shade	Hardy to 0 deg. or less
Lacy blue green leaves; rose pink flowers are prot	fuse in spring. Flowers have spicy scer	nt.
Dicentra 'Bacchanal'	Bleeding heart	
Deciduous perennial Size: 1' high and wide	Fragrance: Sweet, Rich, Mild	Fragrant Parts: Flowers
Well-drained soil Moderate watering	Light shade	Hardy to 0 deg. or less
Dark pinkish red flowers dangle on upright stems		scent.
Dicentra formosa 'Tuolumne Rose'	Western bleeding heart	
Deciduous perennial Size: 1'+ high fl. stem	Fragrance: Sweet, Rich, Mild	Fragrant Parts: Flowers
Well-drained soilModerate wateringExceptionally tall, branched stems of sweet scenter	Sun or light shade	Hardy to 0 deg. or less
		crumps. CA native.
Drimys winterimulti-trunked Evergreen tree Size: To 20' high	Winter's bark Fragrance: Sweet, Honey-like	Fragrant Parts: Flowers
Well-drained soil Moderate watering	Sun or light shade	Hardy to 15-20 deg.F.
Crooked branches with aromatic bark, mahogany		
Drimys winteri var. chilense	Winter's bark	
Evergreen shrub Size: 15'+	Fragrance: Sweet, Honey-like	Fragrant Parts: Flowers
Well-drained soil Moderate watering	Sun or light shade	Hardy to 15-20 deg.F.
Starry white flowers are borne in profusion in spr	ing along the branches of this distincti	ve shrub/small tree.
Edgeworthia chrysantha 'Gold Rush' COPF	Paper Bush	
Deciduous shrub Size: 5-6'	Fragrance: Sweet, Rich	Fragrant Parts: Flowers
Well-drained soil Moderate watering	Light shade	Hardy to 10 deg. or less
Distinctively branched upright shrub. Papery bark	c, long leaves, clusters of yellow flowe	rs in early spring. Best in a
sheltered position.		
Eriophyllum confertiflorum 'Lucia's Gold'	Golden yarrow	Engement Doutes Lagouag
Evergreen shrubSize: 12-18" highWell-drained soilDrought tolerant	Fragrance: Bitter, Mild Full sun	Fragrant Parts: Leaves Hardy to 15 deg. or less
Low subshrub with divided grey leaves and cluster		
from dry slopes.	is of origin years in face spir	ing and early summer. Or matrice,
Erysimum menziesii ssp. concinnum	Pt Reyes wallflower	
Evergreen perennial Size: 1'+h	Fragrance: Sweet, Lemony	Fragrant Parts: Flowers
Well-drained soil Drought tolerant	Full sun	Hardy to 15-20 deg.F.
Large cream flowers on spikes are sweetly fragram	nt in spring on this low CA native pere	nnial.
Fraxinus dipetala	Flowering ash	
Deciduous tree Size: To 15' x 15'	Fragrance: Sweet, Mild	Fragrant Parts: Flowers
Most soils Moderate watering	Full sun	Hardy to 10 deg. or less
Bright divided leaves; fragrant white flowers app	ear in dense clusters in spring. CA nat	ive can be grown as tree or shrub.

Galium odoratum		Sweet woodruff	
Deciduous perennial	Size: Low, spreading	Fragrance: Odd, Sweet	Fragrant Parts: Leaves
Most soils	Moderate watering	Light shade	Hardy to 0 deg. or less
Dense carpeting perent		reen leaves has tiny white flowers in sp	
fragrant.			
<b>Gladiolus liliaceus</b>			
Cormous perennial	Size: to 2' high	Fragrance: Sweet Perfume at Night	Fragrant Parts: Flowers
Well-drained soil	Moderate watering	Sun or light shade	Hardy to 15-20 deg.F.
Night scented flowers of in summer.	on slender stems change col	or from light brick red to purplish mat	ive as night approaches. Dry off
Gladiolus tristis 'Moo	onlight'	Gladiolus	
Cormous perennial	Size: 1-3' high	Fragrance: Intense Perfume/Night	-
Most soils	Drought tolerant	Sun or light shade	Hardy to 15 deg. or less
Prolific clumps. Winter	r-blooming, with night-frag	rant cream-yellow flowers. Dormant ir	n summer.
Hedychium gardneria		Kahili ginger	
Flowering perennial		Fragrance: Sweet, Heavy	Fragrant Parts: Flowers

		w and cream with a yellow ruffled edge	
rebloom. Fragrant flow	÷	w and cream while a yenow furned edg	e. Early to broom and their can
Hemerocallis 'Hyperi		Daylily	
Deciduous perennial	Size: 2-3' high	Fragrance: Sweet-Perfumey	Fragrant Parts: Flowers
Most soils	Moderate watering	Full sun	Hardy to 0 deg. or less
Stout, vigorous, old-fas	e e	ves, huge, deep yellow flowers.	
Hemerocallis 'Mount	ain Violet'	Daylily	
Evergreen perennial	Size: 2-3' high/ wide	Fragrance: Sweet-Perfumey	Fragrant Parts: Flowers
Most soils	Moderate watering	Full sun	Hardy to 0 deg. or less
Mounds of lush green l	eaves; fragrant red-violet fl	owers held over the leaves in summer.	
Hemerocallis 'White	Zircon'	Daylily	
Deciduous perennial	Size: 2-3' high/ wide	Fragrance: Sweet-Perfumey	Fragrant Parts: Flowers
Most soils	Moderate watering	Full sun	Hardy to 0 deg. or less
Sturdy growth. Attracti	ve dark leaves. Large, fragr	cant cream flowers in summer. Semi-ev	vergreen.
Hermannia verticillat		Honeybells	
Evergreen shrub	Size: 1-2' high	Fragrance: Honey-like	Fragrant Parts: Flowers
Well-drained soil	Moderate watering	Sun or light shade	Hardy to 20-25 deg.F.
		ed, bright green leaves. Carries many s	weetly scented, pendant yellow
bells in spring, summer			
Houttuynia cordata '			
Deciduous perennial	Size: To 15" Koon moist	Fragrance: Spicy	Fragrant Parts: Leaves
Most soils	Keep moist	Light shade rly variegated with red and yellow. Od	Hardy to 0 deg. or less
spring/sum. Spreading.		ny vanegaleu with reu and yenow. Od	a white-bracted hower clusters
spring sum. spreuding.			

Illicium floridanum		Florida anise tree	
Evergreen shrub	Size: 8-10' high	Fragrance: Spicy	Fragrant Parts: Leaves
Most soils	Keep moist	Light shade	Hardy to 10 deg. or less
Sweet smelling leaves	are light green; striking darl	red flowers are held away the branch	es in spring.
Iris pallida 'Variegat	a'	Dalmatian iris	
Deciduous perennial	Size: 2-3'	Fragrance: Rich, Sweet, Fruity	Fragrant Parts: Flowers
Most soils	Ð	Sun or light shade	Hardy to 0 deg. or less
Pretty soft lavender blu	e flowers are carried over u	pright clumps of cream and green leav	ves on this hardy perennial.
Iris unguicularis		Algerian iris	
Evergreen perennial	Size: 1' x 2-3'	Fragrance: Like Violets	Fragrant Parts: Flowers
Most soils	Drought tolerant	Sun or light shade	Hardy to 15 deg. or less
	os send up bright lavender, c	lelicately violet-scented blooms in late	e winter and early spring. Very
drought tolerant.			
Itea virginica 'Merlo		Virginia sweetspire	
Deciduous shrub	Size: 3-4'	Fragrance: Sweet, Honey-like	Fragrant Parts: Flowers
Most soils	Moderate watering	Sun or light shade	Hardy to 0 deg. or less
Rounded shrub can be	grown in wet soil; spires of	white fls. appear in summer. Fall colo	r is generally bright red.
Jasminum angulare		South African jasmine	
Evergreen vine	Size: To 10'+	Fragrance: Sweet	Fragrant Parts: Flowers
Well-drained soil	Moderate watering	Light shade	Hardy to 25-30 deg.F.
-	· · ·	g vine. White, sweetly scented flowers	appear from summer to fall.
Protect from hard frost	•		
Jasminum azoricum		Jasmine	
Evergreen vine	Size: To 10' high	Fragrance: Sweet	Fragrant Parts: Flowers
Well-drained soil	Moderate watering	Light shade	Hardy to 20-25 deg.F.
-	itte flowers appear in summ	er. Dark green leaves have a rich sating	y sneen.
Jasminum officinale	C' T 10	White jasmine	
Deciduous shrub	Size: To 18'	Fragrance: Sweet	Fragrant Parts: Flowers
Most soils	Moderate watering	Sun or light shade	Hardy to 0 deg. or less
cold.	in summer on dencate gree	n stems; can be grown as loose shrub	or with support as vine. Hardy to
