## THE INDEX

THE reader may find the following information useful in consulting the index. All entries are arranged alphabetically by topic. Each entry ends with two sets of figures representing respectively the year, date and number of the Order. The year date will help the reader locate the exact Order he wants. With the number, the reader may refer to the List entry for that Order and there obtain such information as he wants, or from the citation or citations learn where the text of the Order itself may be found in published compilations. This system provides more useful, specific and exact reference than a mere page citation to the List would offer.

The Index is an index to the Executive Orders, rather than an index to the List. This makes it possible to include in the Index information which could not be entered in the List. An example is E. O. 5874, which exempts 1,810 government employees from compulsory retirement at the retirement age. It is obviously impossible to name that many people in the List, but in the Index all 1,810 are listed under their respective names.

*See* references are liberally used in order to make it as easy as possible for the reader to locate the information he is seeking. Governmental bureaus, offices and agencies are indexed generally under that form of the name of the agency that best lent itself to a functional or topic listing, as: Budget, Bureau of the; Mines, Bureau of; Education, Office of. Agencies that have "Federal" or "U. S." as a *principal* part of their name are indexed under Federal or U. S., with *see* references from all other conceivable forms of that title. Orders applying to Cabinet officers are listed by name of the office under the name of the Department. All federal courts are under "U. S. COURTS," the Army under "U. S. ARMY," the Navy under "U. S. NAVY," the Marine Corps under "U. S. MARINE CORPS," the Coast Guard under "U. S. COAST GUARD." All Executive Departments are listed under "U. S. DEPARTMENTS." The Secretary of each Department is listed under his Department.

*See* references are used to refer the reader to the keyhead under which the material he wants is listed, as "STATE DEPARTMENT—*see* U. S. DEPARTMENTS—State." *See also* references are used to suggest allied topics or headings as "SHIPPING BOARD, U. S.—*see also* MARITIME COMMISSION, U. S." *See under* references are used to refer to a subhead, identical with that keyhead from which the reader is referred under another indicated keyhead, as "FORT BERTHOLD INDIAN RESERVATION—*see under* INDIANS—Reservations."

Entries under "PUBLIC DOMAIN" are arranged by type of withdrawal, with subhead by the names of the States. Those same entries, except for withdrawals for classification, mineral leases, and similar administrative Orders, are duplicated under the keyhead of the type of with-

[ v ]

drawal. Thus an Order creating the Cocopah Indian Reservation in Arizona, is listed both under "PUBLIC DOMAIN—Indian Reservations—Arizona—Cocopah" and under "INDIAN RESERVATIONS—Cocopah, Ariz." This type of serviceable duplication exists for "FORESTS, NATIONAL," "GAME, BIRD AND FISH PRESERVES," "PARKS, NATIONAL," and "MONUMENTS, NATIONAL."

All entries to material pertaining to the Territories and possessions should be consulted under the name of the Territory or possession.

Individual Government employees are listed by their names, not under the Department or office in which they are employed.
