Mr Roy Teale
Biota Environmental Sciences Pty Ltd
First Floor Suite 2
186 Scarborough Beach Rd
MT HAWTHORN WA 6016

Dear Mr Teale

REQUEST FOR THREATENED FAUNA INFORMATION

I refer to your request of 5 December for information on threatened fauna occurring in the vicinity of Kundip (15 km north of Hopetoun).

A search was undertaken for this area of the Department's Threatened Fauna database, which includes species which are declared as '*Rare or likely to become extinct* (Schedule 1)', '*Birds protected under an international agreement* (Schedule 3)', and '*Other specially protected fauna* (Schedule 4)'. Attached are print outs from these databases where records were found.

Attached also are the conditions under which this information has been supplied. Your attention is specifically drawn to the sixth point that refers to the requirement to undertake field investigations for the accurate determination of threatened fauna occurrence at a site. The information supplied should be regarded as an indication only of the threatened fauna that may be present.

An invoice for \$110.00 (includes GST), being the set charge for the supply of this information, will be forwarded.

It would be appreciated if any populations of threatened fauna encountered by you in the area could be reported to this Department to ensure their ongoing management.

If you require any further details, or wish to discuss threatened fauna management, please contact my Senior Zoologist, Dr Peter Mawson on 08 93340421.

Yours sincerely

freegard

for Keiran McNamara

DEPARTMENT OF CONSERVATION AND LAND MANAGEMENT

THREATENED FAUNA INFORMATION

Conditions In Respect Of Supply Of Information

- * All requests for data to be made in writing to the Executive Director, Department of Conservation and Land Management, Attention: Senior Zoologist, Wildlife Branch.
- * The data supplied may not be supplied to other organisations, nor be used for any purpose other than for the project for which they have been provided without the prior consent of the Executive Director, Department of Conservation and Land Management.
- * Specific locality information for Threatened Fauna is regarded as confidential, and should be treated as such by receiving organisations. Specific locality information for Threatened Fauna may not be used in reports without the written permission of the Executive Director, Department of Conservation and Land Management. Reports may only show generalised locations or, where necessary, show specific locations without identifying species. The Senior Zoologist is to be contacted for guidance on the presentation of Threatened Fauna information.
- * Receiving organisations should note that while every effort has been made to prevent errors and omissions in the data, they may be present. The Department of Conservation and Land Management accepts no responsibility for this.
- * Receiving organisations must also recognise that the database is subject to continual updating and amendment, and such considerations should be taken into account by the user.
- * It should be noted that the supplied data do not necessarily represent a comprehensive listing of the Threatened Fauna of the area in question. Its comprehensiveness is dependent of the amount of survey carried out within a specified area. The receiving organisation should employ a biologist/zoologist, if required, to undertake a survey of the area under consideration.
- * Acknowledgment of the Department of Conservation and Land Management as the source of data is to be made in any published material. Copies of all such publications are to be forwarded to the Department of Conservation and Land Management, Attention: Senior Zoologist, Wildlife Branch.

Threatened and Priority Fauna Database				Page 1 of 2

* Date	Certainty	Seen	Location Name	Method
Schedule 1 - Fauna that is rare or is likely to become extinct				
			<i>Dasyurus geoffroii</i>	Chuditch <i>1 records</i>
			This carnivorous marsupial occupies large home ranges, is highly mobile and appears able to utilise bush remnants and corridors.	
1992	1	1	KUNDIP	Day sighting
			<i>Parantechinus apicalis</i>	Dibbler <i>0 records</i>
			This small carnivorous marsupial inhabits dense, long unburnt coastal heath and populations appear to be very ephemeral. It was recorded in Kundip in 1986. It could possibly occur in the area in question.	
			<i>Pseudomys shortridgei</i>	Heath Mouse (Dayang) <i>0 records</i>
			This species inhabits long unburnt heath and mallee scrub on sandy soils. It has a very limited distribution in the southeastern wheatbelt through to the south coast. It could possibly occur in the area in question.	
			<i>Leipoa ocellata</i>	Malleefowl <i>0 records</i>
			This species was once widely distributed across southern Australia. It prefers woodland or shrubland with an abundant litter layer that provides essential material for the construction of its nest mound. Records in surrounding areas suggest that this species may occur in the area in question.	
			<i>Calyptorhynchus latirostris</i>	Carnaby's Black-Cockatoo <i>0 records</i>
			This species moves around seasonally in flocks to feeding areas in proteaceous scrubs and heaths and eucalypt woodlands as well as pine plantations. Breeding occurs in winter/spring, mainly in the eastern forests and wheatbelt where they can find mature hollow-bearing trees to nest in. It may occur in the area in question.	
Schedule 4 - Other specially protected fauna				
			<i>Falco peregrinus</i>	Peregrine Falcon <i>0 records</i>
			This species is uncommon and prefers areas with rocky ledges, cliffs, watercourses, open woodland or margins with cleared land. It may occur in the area in question.	
Priority One				
			<i>Lerista viduata</i>	<i>Lerista viduata</i> <i>1 records</i>
			A small skink known only from the Ravensthorpe Range.

Priority Four

						<i>0 records</i>
<i>Macropus eugenii derbianus</i>			Tammar Wallaby			<i>3 records</i>
This species prefers thickets of Melaleuca, Shooak or other large shrubs associated with grassland.						
1990	1	1	Kundip			
1994	1	1	Kundip			
1994	2	1	Kundip			
<i>Macropus irma</i>			Western Brush Wallaby			<i>0 records</i>
This species occurs in areas of forest and woodland supporting a dense shrub layer. Records in surrounding areas suggest that this species may occur in the area in question. It is known to occur in Kundip Nature Reserve.						
<i>Pseudomys occidentalis</i>			Western Mouse			<i>0 records</i>
This species occurs most frequently in areas of long-umbell vegetation on sandy clay or loam with a matrix of gravel. It is known to feed on the seeds of quandong (<i>Santalum acuminatum</i>) and various sedge species. Records in surrounding areas suggest that this species may occur in the area in question.						
<i>Psophodes nigrogularis oberoni</i>			Western Whistler (sturn WA subsp)			<i>0 records</i>
This subspecies occurs from the Stirling Range east to Monglimup and north to Lake Grace and inhabits areas of mallee and heath, nesting in dense vegetation. It may occur in the area in question.						

* Information relating to any records provided for listed species:
 Date: date of recorded observation
 Certainty (of correct species identification): 1=Very certain; 2=Moderately certain; and 3=Not sure.
 Seen: Number of individuals observed.
 Location Name: Name of reserve or nearest locality where observation was made
 Method: Method or type of observation

APPENDIX 3: 2005 BIOTA BIOLOGICAL SURVEY REPORT

13 January 2005

Ms. Kim Bennett
Environmental Manager
Tectonic Resources NL
Suite 4, 100 Hay Street
Subiaco WA 6008

Dear Kim

Kundip Phase II Fauna Survey - Summary of Findings

Introduction

Tectonic Resources NL, as owners of the Phillips River Gold Project, aim to develop the gold/copper resource at the Kundip site and the polymetallic resource at the Trilogy site, located 17 and 27 kilometres southeast of Ravensthorpe respectively. An open cut pit is planned for the Trilogy deposit, whilst underground mining and an open cut pits are planned for the deposits at Kundip.

This letter summarises the findings of Phase I of the fauna survey, documented in greater detail in Biota (2004), and provides an overview of Phase II highlighting the key findings, particularly in respect of small mammal captures.

Fauna Survey Phase I

A field survey was conducted over a 10-day period between the 5/1/2004 and 14/1/2004, following a 12-month period of slightly above average rainfall, though this was preceded by an extended dry period.

The methodology utilised during the survey is described in Biota (2004).

The field survey recorded a combined total of 99 vertebrate species, including 62 species of bird, 11 native mammals, two introduced mammals, 21 reptiles and three frogs.

Over 30 invertebrate taxa were recorded from the Kundip study site, many of which were not identified beyond family level. Two species of mygalomorph spiders from the family Nemesiidae were recorded from the Kundip project area; *Aname mainae* and *Chenistonia tepperi*. Both species (as they are currently recognised) have broad distributions through the South-west of WA. A single *Bothriembryon* that was not known to Ms Shirley Slack-Smith (WA Museum) was collected during the survey from leaf litter at KU8. The conservation status of this taxon is unknown.

A search of the CALM Schedule and Priority Fauna database for species potentially occurring in the area yielded five Schedule 1 species, one Schedule 4 species and five Priority species. An additional Schedule 1, Schedule 4 and Priority taxon may occur in the area based on other information.

Schedule 1 Fauna

- *Carnaby's Cockatoo *Calyptorhynchus latirostris* (Endangered under EPBC Act 1999)

- Western Ground Parrot *Pezoporus wallicus flaviventris* (Endangered under EPBC Act 1999)
- *Malleefowl *Leipoa ocellata* (Vulnerable under EPBC Act 1999)
- Chuditch *Dasyurus geoffroyii* (Vulnerable under EPBC Act 1999)
- Dibbler *Parantechinus apicalis* (Endangered under EPBC Act 1999)
- Heath Rat *Pseudomys shortridgei* (Vulnerable under EPBC Act 1999)

Schedule 4 Fauna

- Peregrine Falcon *Falco peregrinus*
- Carpet Python *Morethia spilota imbricata*

Priority Taxa

- **Lerista viduata* (Priority 1)
- Quenda *Isodon obesulus fusciventer* (Conservation Dependent, Priority 4)
- Tammar *Macropus eugenii derbianus* (Conservation Dependent, Priority 4)
- *Western Whiibird (southern WA subspecies) *Psophodes nigrogularis oberon* (Priority 4) (Vulnerable under EPBC Act 1999)
- Western Mouse *Pseudomys occidentalis* (Priority 4)
- *Western Brush Wallaby *Macropus irma* (Priority 4)

Species noted with an "*" were recorded during the Phase I survey.

Given the number of fauna of Conservation Significance that may occur in the project area it was recommended that:

1. The proponent should undertake an additional seasonal survey of the project area to more fully document the faunal assemblage and identify any additional constraints. This study could usefully target threatened fauna taxa not well represented during the current survey including Schedule listed rodent and bird species.

Of particular consideration was the possible presence of the Heath Rat *Pseudomys shortridgei* and the population size of the Western Whiibird *Psophodes nigrogularis oberon*.

Overall captures of rodents (even potentially abundant species such as *Rattus fuscipes*) was low, possibly reflecting a poor season. It was felt that if rodent numbers were generally low as was suggested by the trapping data (and comparisons to other studies (Chapman and Craig 1998, Chapman 2000)) then the chance of detecting rarer species such as the Heath Rat was greatly diminished.

It was agreed that the results of the seasonal survey could be written as a brief letter style report to be appended to the original report.

Fauna Survey Phase II

Methodology

The Phase II survey was completed between 16/11/04 – 23/11/04 and involved Dr. Michael Craig (Biota), Mr. Greg Harold (Consultant) and Mr. Andy Chapman (Consultant). The aim of the Phase II survey was to target threatened fauna taxa not well represented during the Phase 1 survey, including Scheduled rodent and bird species (see Biota 2004).

Minimum temperatures during the survey ranged from 4.0°C to 19.2°C and maximum temperatures ranged from 18.0°C to 37.4°C (Table 1). No rainfall was recorded during the survey but 27.9 mm had fallen in November 2004 prior to the survey.

Table 1: The minimum and maximum daily temperatures recorded in Ravensthorpe for the duration of the Phase II survey (compared to the November average minimum of 10.9 and average maximum of 24.8).

Date	16/11	17/11	18/11	19/11	20/11	21/11	22/11	23/11	Mean
Minimum	14.3	12.1	4.0	5.2	8.7	10.4	14.4	19.2	11.0
Maximum	31.2	20.5	18.0	21.8	26.8	29.3	33.4	37.4	27.3

The survey re-opened the seven systematic trapping grids (KU1 – KU7) and the cage transect (KU11) established during Phase I, and established an additional seven Elliott transects comprising 20 Elliott traps spaced approximately 10 m apart (KU14 – KU20) (Figure 1).

All grids were open for between five and seven nights giving a total trap effort of 1780 Elliott trap nights, 588 pit-trap nights and 224 cage trap nights (Table 2). An additional cage trap was added to each of the systematic trapping sites (i.e. KU1 – KU7).

Systematic avifauna censusing was not undertaken as part of this current survey, rather effort focussed on recording the distribution of the Western Whipbird *Psophodes nigrogularis oberon* and other Threatened or Rare taxa. However, notes were made of species additional to those recorded during Phase I (see Results and Discussion below). A total of 23 hours was spent conducting transects through all of the proposed pit and overburden areas to record the presence of threatened bird species (Figure 2).

Opportunistic collecting was also undertaken at locations likely to support fauna of conservation significance including Short Range Endemics.

Table 2: Trapping grid location and trap effort (WGS84 datum, Zone 51).

Site #	Location (AMG)	Trap Type	Date Opened	Date Closed	Nights Open	# of traps	Total effort (trap nights)

The new Elliott transects were placed in the following vegetation communities:

KU14 & 15 – *Melaleuca acuminata* Open woodland and thicket (dense to mid-dense shrubs <2m) along drainage lines.

KU16 – *Melaleuca stramentosa* Mallee and dense heath (shrubs <2m).

KU17 – From a mixture of *Eucalyptus clivicola* Low Forest and *Eucalyptus cernua* Dense Low Forest (mallee regrowth) into *Melaleuca rigidifolia* Open Mallee and Dense Heath (shrubs <1m).

KU18 – *Melaleuca rigidifolia* Open Mallee and Dense Heath (shrubs <1m).

KU19 – *Banksia lehmanniana* Open Mallee and Thicket/Scrub Heath (dense to open shrubs 0.5-5m).

KU20 – From *Banksia lehmanniana* Open Mallee and Thicket/Scrub Heath (dense to open shrubs 0.5-5m) into *Melaleuca hamata* Mallee.

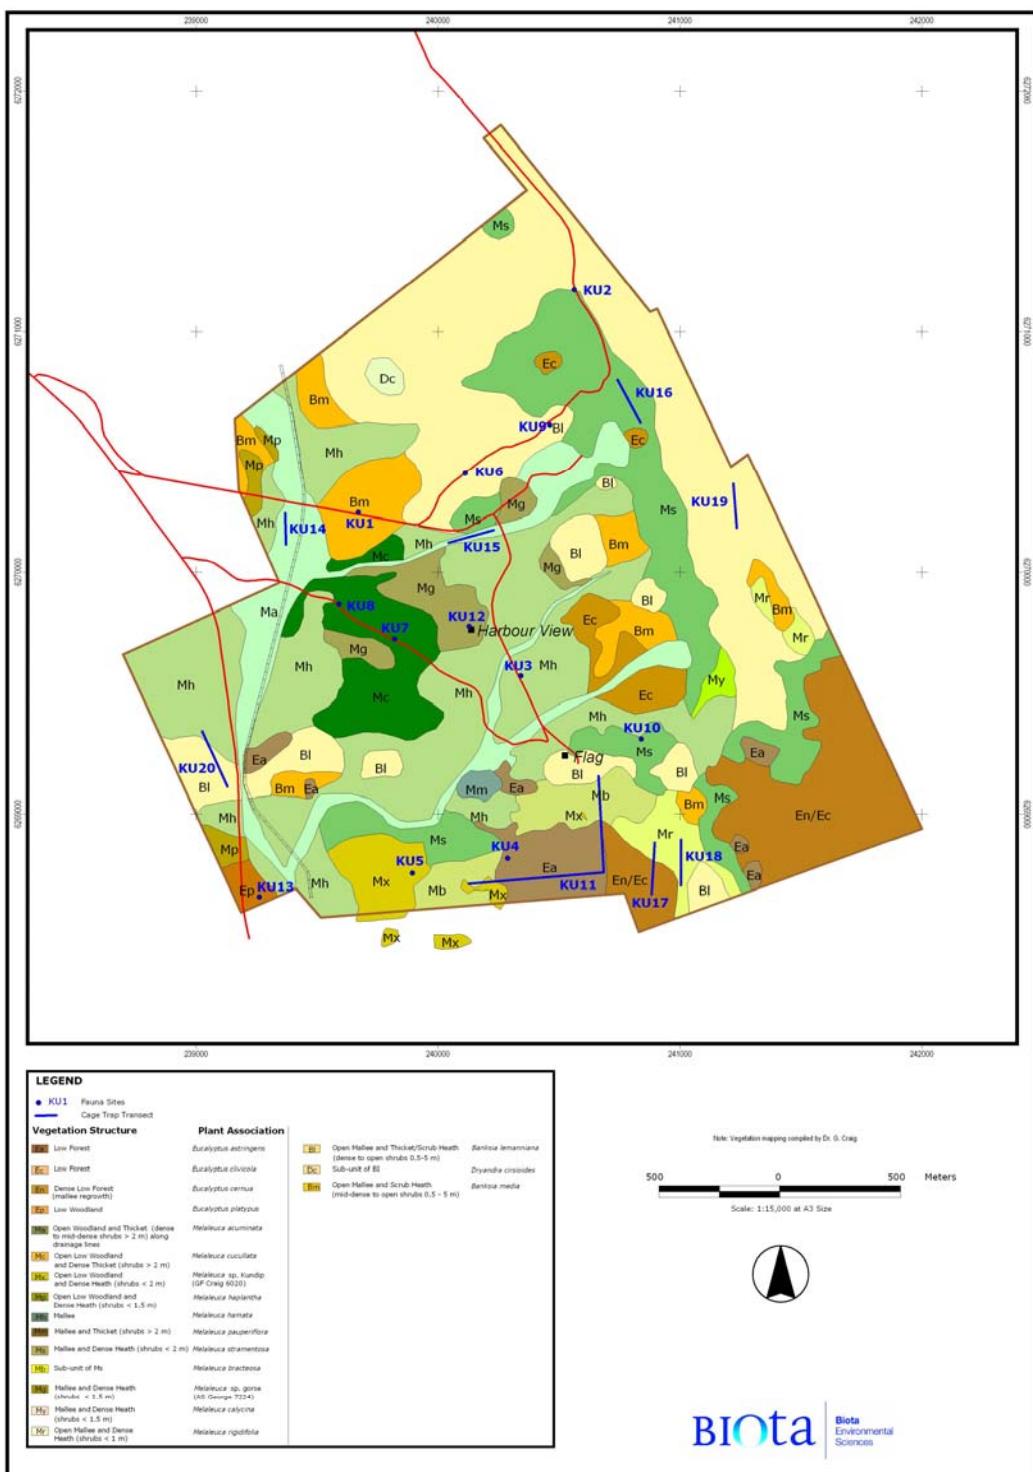

Figure 1. A map showing the location of the trapping sites and trapping transects overlaid on vegetation communities. KU14 – KU20 represent an additional seven Elliot transect lines established for the phase II survey.

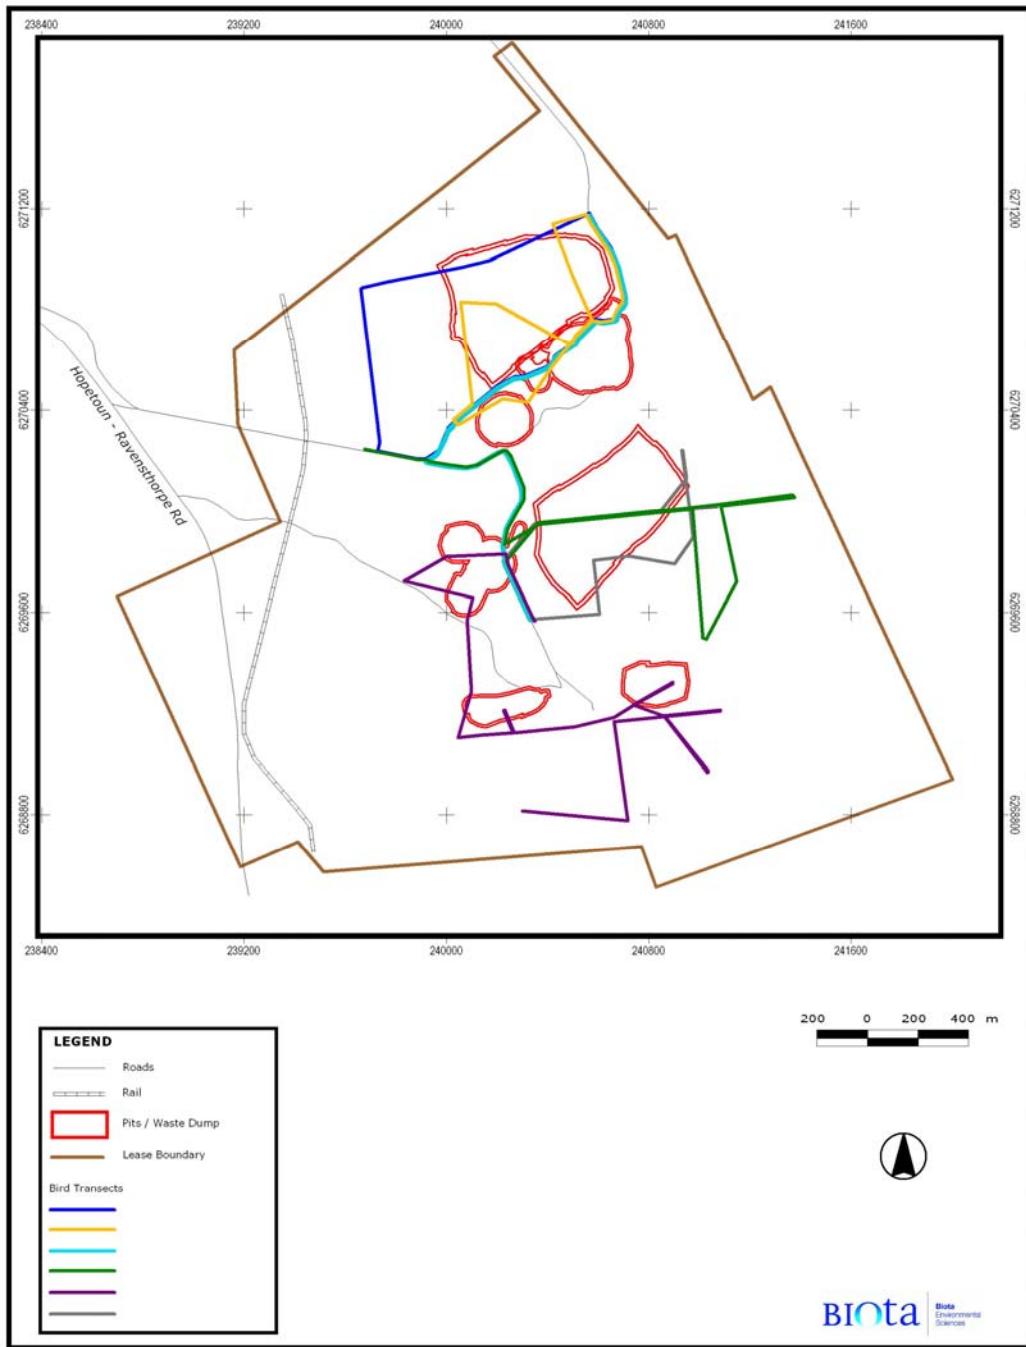

Figure 2. A map shown the location of transects conducted for threatened bird species in relation to the proposed pit and overburden areas. Each colour represents a different day.

Results and Discussion

The phase II survey recorded 37 vertebrate species including five mammals, nine birds (Tables 4, 5 and 6). Note that for the avifauna, only threatened taxa and species additional to those recorded during Phase I (Biota 2004) were recorded.

The tally included 11 species not recorded during the Phase I survey, highlighting the value of seasonal work. The additional species comprised *Amphibolurus norrisi*, *Elapognathus coronatus*, *Ramphotyphlops australis*, *Tiliqua occipitalis*, the Little Eagle *Aquila morphnoides*, Brown Falcon *Falco berigora*, Horsfield's Bronze Cuckoo *Chrysococcyx basalis*, Rufous Fieldwren *Calamanthus campestris*, Western Spinebill *Acanthorhynchus superciliosus*, White-cheeked Honeyeater *Phylidonyris nigra* and White-winged Triller *Lalage tricolor*. None of the additional species recorded are of special conservation significance, however the record of *Amphibolurus norrisi* extends further westward (by approximately 30 km) the known distribution of this species.

Of particular note was the increase in captures of rodent species (Table 5), though this can be explained, for the most part, by the inclusion of additional Elliott transects. During Phase I, six *Mus musculus* (House Mouse) and 12 *Rattus fuscipes* (Bush Rat) were recorded from the seven trapping grids (KU1 – KU7), with an additional four *R. fuscipes* recorded from cage traps (KU11). During Phase II, nine *M. musculus* and 18 *R. fuscipes* were recorded from the seven trapping grids (KU1 – KU7), with an additional 13 *M. musculus* and 130 *R. fuscipes* recorded from the Elliott transects (KU14 – KU20).

In comparison, Chapman (2000) documented 211 records of *Mus musculus* and 147 records of *Rattus fuscipes* using 480 pit-trap nights, 1000 Elliott trap nights and 200 cage trap nights across spring 1999 and autumn 2000 at Bandalup Hill. With respect to the rarer species, Chapman (2000) documented 17 records of the Western Mouse *Pseudomys occidentalis* (Southern Mouse) and five records of the Heath Rat *Pseudomys shortridgei* (Heath Rat).

At the same study site in spring 2000, Biota (2000) recorded six *M. musculus* and 39 *R. fuscipes* using 534 pit-nights, 1100 Elliott trap nights and 60 cage trap nights. They also recorded one *Pseudomys albocinereus* (Ash-grey Mouse), two *P. occidentalis* and one *P. shortridgei* (Table 5).

The capture success of other small ground mammals during the current Phase II was comparable to Phase I of the trapping program at Kundip: three captures of *Sminthopsis griseoventer* (Grey-bellied Dunnart) versus nine during phase 1; 59 captures of *Cercartetus concinnus* (Western Pygmy Possum) versus 56 during Phase I; and 71 captures of *Tarsipes rostratus* (Honey Possum) versus 84 during Phase 1.

Despite being recorded in Phase I, neither the Malleefowl *Leipoa ocellata* (Schedule 1), Western Brush Wallaby *Macropus irma* (Priority 4) nor *Lerista viduata* (Priority 1) were recorded during Phase II. Vehicle transects were conducted for the former two of these species and raking of leaf litter and debris was undertaken for *L. viduata*.

As noted above, additional effort was directed towards documenting the occurrence of Western Whistlers and other rare birds in the project area.

- Western Whistler *Psophodes nigrogularis oberon* (Priority 4 under *Wildlife Conservation Act 1998* (WA); Vulnerable under the *EPBC Act 1999* (Cth))

We recorded this species on 12 occasions from four different vegetation types (Figure 3). Most records (eight) were from *Banksia lemanniana* (B1) open mallee and thicket scrub/heath. There were two records from *Melaleuca rigidifolia* open mallee and dense heath with single records from each of *Melaleuca stramentosa*

(Ms) mallee and dense heath and *Banksia media* open mallee and scrub heath (Figure 3). This compares to six records across sites KU1 (*Banksia media* open mallee and scrub heath) KU2 (*Banksia lemanniana* open mallee and thicket/scrub heath) and KU3 (*Melaleuca hamata* mallee-heath).

Table 3. Home range estimates for the subspecies of the Western Whipbird.

Subspecies	Home range estimate (ha)	Reference
<i>oberon</i>	6.45*	Cody 1991
<i>oberon</i>	10.53*	Cody 1991
<i>nigrogularis</i>	12.6	Smith 1991
?	2.8 to 5.6	Serenty & Whittell 1976
<i>leucogaster</i>	<20	Woinarski et al. 1988

* estimated from densities

None of the Western Whipbird records fell within the proposed impact areas (i.e. pit and overburden stockpiles). However, the impact area does intersect two (Bl and Ms) of the four vegetation types from which this species was recorded, with an overall loss of 47ha of the total 235.42ha mapped for these two vegetation types within the project area (Table 7). Given a typical territory size of between 7ha and 10ha (see Table 3), the worst case scenario would be that either (1) between 5 and 7 pairs may be lost assuming only vegetation types in which they were recorded were suitable, or (2) between 8 and 12 pairs if all vegetation types are suitable. However, there are several reasons to believe that the actual number is likely to be lower than this. Firstly, no Western Whipbirds were recorded from any of the proposed pit or overburden areas during the Phase II survey. While a short survey of that kind does not indicate that whipbirds are not present in those areas, it does suggest that they are likely to be present at lower than average densities. Secondly, a large proportion of the northern and central pit areas are already heavily disturbed or cleared of their natural vegetation. Therefore, we would expect whipbirds to occur only marginally in both of these areas. Lastly, most of the records during Phase II are from *Banksia lemanniana* (Bl) open mallee and thicket scrub/heath which will not be heavily disturbed (Table 7) and densities are likely to be lower than average in most of the other habitats.

The call from this species is conspicuous and may carry up to 200m (Johnstone and Storr 2004). The diet comprises invertebrates, mainly insects (Higgins and Peter 2002), but also snails (Johnstone and Storr 2004). The species is considered to be sedentary remaining in its home range from year to year (Higgins and Peter 2002).

The taxonomy surrounding the geographical variation in this species is not fully understood (Higgins and Peter 2002; cf. Johnstone and Storr 2004; see also Schodde and Mason 1999). Higgins and Peter (2002) recognise four subspecies of *P. nigrogularis* with two of these, *P. n. nigrogularis* and *P. n. oberon*, occurring in Western Australia. In contrast, Johnstone and Storr (2004) do not recognise *P. n. oberon*, rather treat all WA specimens as *P. n. nigrogularis*. Schodde and Mason (1999) elevate *P. n. nigrogularis* to full species and treats *oberon* as a sub-species of the newly recognised *P. leucogaster*. Both the State and Commonwealth listings recognise the taxonomy presented by Higgins and Peter (2002) as does this document. *P. n. nigrogularis* has the same conservation significance under both State and Federal listings. It is listed as Endangered under the EPBC Act 1999 and as Schedule 1 (Vulnerable) under the Wildlife Conservation Notice 2003. The State and Federal listings do not, however,

recognise the same level of conservation significance for *P. n. oberon*. According to State listings *P. n. oberon* is listed as Priority 4 i.e.

Taxa which are considered to have been adequately surveyed, or for which sufficient knowledge is available, and which are considered not currently threatened or in need of special protection, but could be if present circumstances change. These taxa are usually represented on conservation lands.

whilst the Commonwealth listing recognises *P. n. oberon* as Vulnerable.

Johnstone and Storr (2004) consider the western whipbird in WA to be uncommon to moderately common in the east of its range (i.e. about Ravensthorpe). There are no estimates of population size in WA though Teale et al. (in prep.) have compiled 165 records from 76 sites across the Fitzgerald Biosphere Reserve.

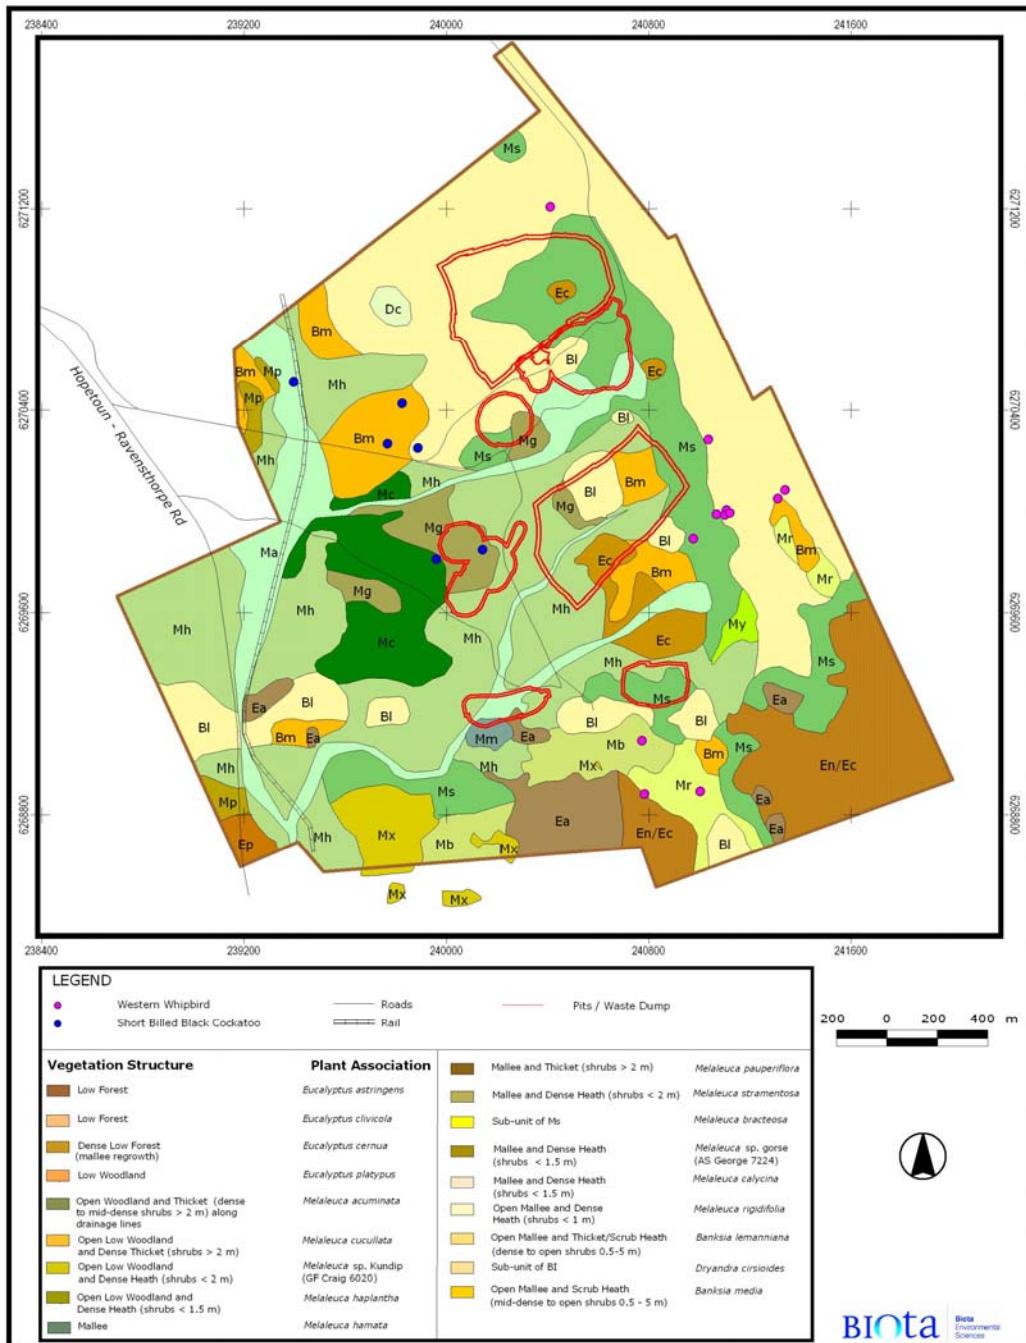

Figure 3. A map showing the location of all Western Whipbird and perched Carnaby's Black-Cockatoos during the Phase II survey in relation to vegetation communities and the proposed pit and overburden sites.

- Carnaby's (Short-billed) Black-Cockatoo *Calyptorhynchus latirostris* (Endangered under *Wildlife Conservation Act 1998* (WA); Endangered under the *EPBC Act 1999* (Cth))

This species was frequently observed flying through the study area but was only observed perching on six occasions. On each of the latter occasions birds were also seen foraging, so food species were recorded. Of the six observations, two were in *Banksia media* open mallee and scrub heath with single records in each of *Melaleuca acuminata* open woodland and thicket, *Melaleuca cucullata* open low woodland and dense thicket, *Melaleuca* sp. Gorse (AS George 7724) mallee and dense heath and *Banksia lemanniana* open mallee and thicket scrub/heath (Figure 3). In these habitats, there were three observations of birds feeding in *Eucalyptus pleurocarpa*, two observations of birds feeding in *Hakea laurina* and one observation of birds feeding in *Eucalyptus astringens*. There was also an additional record of signs of Carnaby's Black-Cockatoo feeding in *Eucalyptus platypus* low woodland in the south-west corner of the study area. There were no records of breeding during the survey. During Phase I this species was recorded flying over the project area on three occasions.

Table 7: Total area of each vegetation type mapped within the project area and expected area of disturbance associated with mine development
(Vegetation codes are given in Figure 2).

* Vegetation units from which the Western Whipbird *Psophodes nigrogularis oberon* was recorded.

† Vegetation units from which the Carnaby's (Short-billed) Black-Cockatoo *Calyptorhynchus latirostris* was recorded.

-
- Malleefowl *Leipoa ocellata* (Vulnerable under *Wildlife Conservation Act 1998*; Vulnerable under the *EPBC Act 1999*)

This species is associated with mallee, particularly floristically rich dense mallee associations. Mounds are typically constructed where there is deep litter and soil allowing construction (Marchant and Higgins 1993; Johnstone and Storr 1998). Soils are typically sands or sandy-loams allowing drainage; heavier soils such as clays and clay-loams are often avoided.

Birds show long-term monogamy (Marchant and Higgins 1993), probably for the adult life. Home range estimates during breeding season (in South Australia) vary from 1.7 to 4.6km² (Marchant and Higgins 1993); they have been reported as smaller (0.49 – 0.75km²) during the non-breeding season in Victoria (Marchant and Higgins 1993).

There were no sightings of Malleefowl during the current survey though a single individual was reported during Phase I (Biota 2004). According to Angela Sanders, there were regular sightings around the Kundip townsite several years ago. In view of this it is suggested that a sweep of the impact areas using the "human chain" technique be undertaken prior to clearing. It is recommended that the Malleefowl Preservation Group be contacted in respect of methodology and subsequent management.

- Invertebrate Taxa

The survey recorded a number of invertebrate taxa that are awaiting identification. Amongst the specimens collected were three mygalomorph spiders of the family Nemesiidae. Previously at Kundip we recorded the widespread *Aname mainae* and *Chenistonia tepperi* (Family Nemesiidae) (Biota 2004).

No additional *Bothriembryon* (land snails) were collected from the study area despite targeted searches for these and other short range endemic taxa. These would be more readily collected during rainfall events in winter or following heavy summer rainfall.

Conclusion

The Phase II survey added an additional 11 species to those recorded during Phase I. Significantly, no additional species of conservation significance were recorded over and above those recorded during Phase I.

The baseline survey work at Kundip has now utilised 4184 trap nights comprising 1104 pit-fall trap nights, 2780 Elliott trap nights and 300 cage trap nights to assess the ground fauna. The persons undertaking the field-work have experience with small ground mammals in the region (eg. Andy Chapman re-discovered *Pseudomys shortridgei* in his survey work of the Ravensthorpe Range). However, no ground mammals of conservation significance have been recorded from the Kundip project area.

Survey work at Bandalup Hill using the same field personnel and comparable survey effort has recorded two rodent species of conservation significance (see Table 5). It would seem that if *P. shortridgei* or other small ground mammals do occur in the study area, then they are either at numbers not readily detectable by the trapping effort deployed to date and/or occur in adjacent areas not sampled. Given that the pit traps are still in the ground, the opportunity presents itself to undertake further trapping in the future.

There were at least several pairs of Western Whistlers recorded in the study area. It is difficult to predict how many pairs are likely to be affected by the proposed development, but it will depend on the habitat preference of the species in the study

and the home range of the species. The home range of the species in the study area is unknown but there are several estimates from the literature (see above). A typical home range for *Psophodes nigrogularis oberon* appears to be around 7 to 10 ha for a pair. This would correlate to a maximum of between 7 (only BI, BM, MA, MC, MG vegetation types and 10ha home range) and 8 (all vegetation types and 7ha home range) pairs being lost depending on habitat preference and actual home range size. The above estimates compare to a maximum of between 54 and 77 pairs potentially remaining outside of the impact area, again dependent on habitat preference and home range size. Naturally, home ranges may not neatly coincide with boundaries of impact areas, rather it is more likely that some home ranges will straddle to a greater or lesser degree the edge of the impact areas resulting in a greater loss than predicted by area calculations alone. On the other hand, there are several reasons to expect that the number of pairs lost is likely to be lower than the maximum given above although the exact number cannot be accurately predicted based on current knowledge.

Given that the status of the *Bothriembryon sp.* remains unclarified it is suggested that a collection be made following significant rainfall events and that the specimens be forwarded to Ms. Shirley Slack-Smith of the Museum of Western Australia and Dr Mike Johnson from the University of Western Australia.

APPENDIX 4: EPBC ACT PROTECTED MATTERS SEARCH

EPBC Act Protected Matters Report

This report provides general guidance on matters of national environmental significance and other matters protected by the EPBC Act in the area you have selected.

Information on the coverage of this report and qualifications on data supporting this report are contained in the caveat at the end of the report.

Information is available about [Environment Assessments](#) and the EPBC Act including significance guidelines, forms and application process details.

Report created: 13/06/16 13:55:00

[Summary](#)

[Details](#)

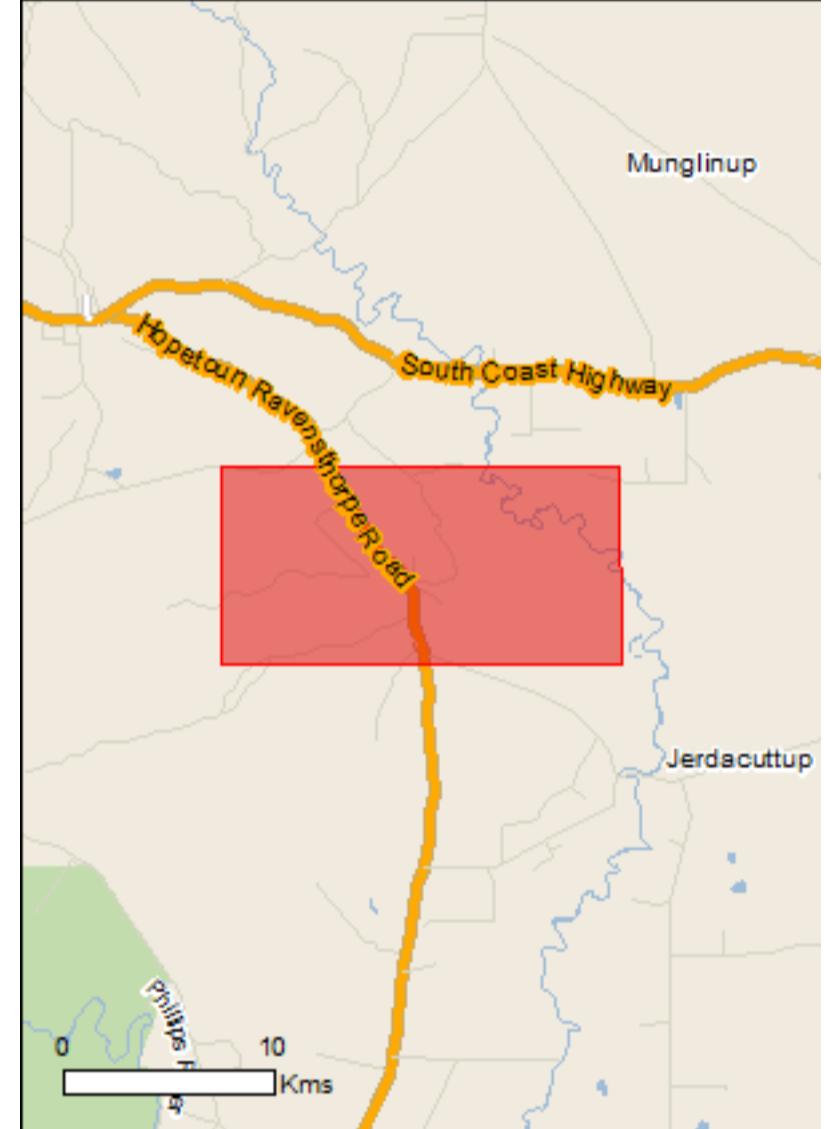

[Matters of NES](#)

[Other Matters Protected by the EPBC Act](#)

[Extra Information](#)

[Buffer: 5.0Km](#)

Summary

Matters of National Environmental Significance

This part of the report summarises the matters of national environmental significance that may occur in, or may relate to, the area you nominated. Further information is available in the detail part of the report, which can be accessed by scrolling or following the links below. If you are proposing to undertake an activity that may have a significant impact on one or more matters of national environmental significance then you should consider the [Administrative Guidelines on Significance](#).

World Heritage Properties:	None
National Heritage Places:	None
Wetlands of International Importance:	None
Great Barrier Reef Marine Park:	None
Commonwealth Marine Area:	None
Listed Threatened Ecological Communities:	1
Listed Threatened Species:	20
Listed Migratory Species:	6

Other Matters Protected by the EPBC Act

This part of the report summarises other matters protected under the Act that may relate to the area you nominated. Approval may be required for a proposed activity that significantly affects the environment on Commonwealth land, when the action is outside the Commonwealth land, or the environment anywhere when the action is taken on Commonwealth land. Approval may also be required for the Commonwealth or Commonwealth agencies proposing to take an action that is likely to have a significant impact on the environment anywhere.

The EPBC Act protects the environment on Commonwealth land, the environment from the actions taken on Commonwealth land, and the environment from actions taken by Commonwealth agencies. As heritage values of a place are part of the 'environment', these aspects of the EPBC Act protect the Commonwealth Heritage values of a Commonwealth Heritage place. Information on the new heritage laws can be found at <http://www.environment.gov.au/heritage>

A [permit](#) may be required for activities in or on a Commonwealth area that may affect a member of a listed threatened species or ecological community, a member of a listed migratory species, whales and other cetaceans, or a member of a listed marine species.

Commonwealth Land:	None
Commonwealth Heritage Places:	None
Listed Marine Species:	8
Whales and Other Cetaceans:	None
Critical Habitats:	None
Commonwealth Reserves Terrestrial:	None
Commonwealth Reserves Marine:	None

Extra Information

This part of the report provides information that may also be relevant to the area you have nominated.

State and Territory Reserves:	2
Regional Forest Agreements:	None
Invasive Species:	10
Nationally Important Wetlands:	None
Key Ecological Features (Marine)	None

Details

Matters of National Environmental Significance

Listed Threatened Ecological Communities

[Resource Information]

For threatened ecological communities where the distribution is well known, maps are derived from recovery plans, State vegetation maps, remote sensing imagery and other sources. Where threatened ecological community distributions are less well known, existing vegetation maps and point location data are used to produce indicative distribution maps.

Name	Status	Type of Presence
Proteaceae Dominated Kwongan Shrublands of the Southeast Coastal Floristic Province of Western Australia	Endangered	Community likely to occur within area

Lycium ferocissimum African Boxthorn, Boxthorn [19235]		Species or species habitat likely to occur within area
Tamarix aphylla Athel Pine, Athel Tree, Tamarisk, Athel Tamarisk, Athel Tamarix, Desert Tamarisk, Flowering Cypress, Salt Cedar [16018]		Species or species habitat likely to occur within area

Caveat

The information presented in this report has been provided by a range of data sources as acknowledged at the end of the report.

This report is designed to assist in identifying the locations of places which may be relevant in determining obligations under the Environment Protection and Biodiversity Conservation Act 1999. It holds mapped locations of World and National Heritage properties, Wetlands of International and National Importance, Commonwealth and State/Territory reserves, listed threatened, migratory and marine species and listed threatened ecological communities. Mapping of Commonwealth land is not complete at this stage. Maps have been collated from a range of sources at various resolutions.

Not all species listed under the EPBC Act have been mapped (see below) and therefore a report is a general guide only. Where available data supports mapping, the type of presence that can be determined from the data is indicated in general terms. People using this information in making a referral may need to consider the qualifications below and may need to seek and consider other information sources.

For threatened ecological communities where the distribution is well known, maps are derived from recovery plans, State vegetation maps, remote sensing imagery and other sources. Where threatened ecological community distributions are less well known, existing vegetation maps and point location data are used to produce indicative distribution maps.

For species where the distributions are well known, maps are digitised from sources such as recovery plans and detailed habitat studies. Where appropriate, core breeding, foraging and roosting areas are indicated under 'type of presence'. For species whose distributions are less well known, point locations are collated from government wildlife authorities, museums, and non-government organisations; bioclimatic distribution models are generated and these validated by experts. In some cases, the distribution maps are based solely on expert knowledge.

Only selected species covered by the following provisions of the EPBC Act have been mapped:

- migratory and
- marine

The following species and ecological communities have not been mapped and do not appear in reports produced from this database:

- threatened species listed as extinct or considered as vagrants
- some species and ecological communities that have only recently been listed
- some terrestrial species that overfly the Commonwealth marine area
- migratory species that are very widespread, vagrant, or only occur in small numbers

The following groups have been mapped, but may not cover the complete distribution of the species:

- non-threatened seabirds which have only been mapped for recorded breeding sites
- seals which have only been mapped for breeding sites near the Australian continent

Such breeding sites may be important for the protection of the Commonwealth Marine environment.

Table 3: Threatened and Priority Flora List

Taxon	Status	Distribution	Flowering Period
Acacia argutifolia	4	S of Ravensthorpe	Jul-Jan
Acacia besleyi	1	Ravensthorpe Range	
Acacia bifaria	3	Ravensthorpe, Fitzgerald	Aug-Oct, Dec
Acacia dictyoneura	4	Cape Riche, Pallinup River, Fitzgerald River, Kundip	Jul-Nov
Acacia errabunda	3	Ravensthorpe, Jerramungup, Broomehill	Aug-Sep
Acacia grisea	4	Nyabing, Peringillup, Kukerin, Kojonup, Woodanilling, Wagon, Ravensthorpe	Jun-Aug
Acacia improcera	3	Ravensthorpe, Frank Hann N.P., Lake King, Mount Glasse, Grass Patch, Sheoak Hill	Jul-Aug
Acacia leioderma var. Fitzgerald River N.P. variant (A.S.George 9922)	2	Fitzgerald River NP, Gordon Inlet	
Acacia newbeyi	3	Nyabing, Boxwood Hills, Ravensthorpe, Ongerup, Dragon Rocks	
Acacia papulosa	2	Boxwood Hill, Fitzgerald River	
Acacia rhamphophylla	T	Kundip	Aug-Sep
Acacia simulans	4	Fitzgerald River NP	Jul-Sep
Acacia sp. Ravensthorpe Range (B.R. Maslin 5463)	1	Ravensthorpe Range	Aug-Oct
Acrotriche orbicularis	T	Ravensthorpe	Sep
Adenanthon cacomorphus	2	Fitzgerald River N.P., Gairdner River	
Adenanthon dobagii	T	Fitzgerald River NP	Aug-Nov
Adenanthon ellipticus	T	Fitzgerald River NP	Aug-Nov

Taxon	Status	Distribution	Flowering Period
<i>Allocasuarina hystericosa</i>	4	Bandalup, Ravensthorpe Range, Toompup, Eyre Range, Kundip	
<i>Andersonia echinocephala</i>	4	Stirling Range N.P., Thumb Peak Fitzgerald River N.P.	Sep-Nov
<i>Anigozanthos bicolor</i> subsp. <i>minor</i>	T	Ravensthorpe-Esperance, Newdegate, Mount Baring	Jul-Sep
<i>Anthocercis fasciculata</i>	4	Fitzgerald River National Park	Oct
<i>Anticoryne ovalifolia</i>	2	Fitzgerald River NP.	Aug-Nov
<i>Astartea decemcostata</i>	2	Fitzgerald River N.P.	Nov-Dec
<i>Astartea reticulata</i>	3	Fitzgerald River NP, Hopetoun, Munglinup, Torradup, Esperance	Nov-Dec
<i>Astroloma</i> sp. Dumbleyung (A.J.G. Wilson 146)	3	Dumbleyung, Lake Grace, Lake King, Ravensthorpe	Jun
<i>Austrostipa</i> sp. Carlingup Road (S. Kern & R. Jasper LCH 18459)	1	Ravensthorpe	
<i>Austrostipa</i> sp. Ravensthorpe Range (A. Markey & J. Allen 6261)	1	Ravensthorpe	
<i>Banksia corvijuga</i>	3	Mt Short, Ravensthorpe Range, Mt Desmond	Sep-Oct
<i>Banksia foliosissima</i>	4	Tarin Rock, Ravensthorpe, Harrismith	Jun
<i>Banksia laevigata</i> subsp. <i>laevigata</i>	4	Fitzgerald River N.P., Ravensthorpe	-
<i>Banksia lullfitzii</i>	3	Southern Cross, Frank Hann N.P., Coolgardie, Mt Manning Range, Ravensthorpe	Mar-May
<i>Banksia meganotia</i>	3	Kulin-Pingrup, Yilliminning, Ravensthorpe, Nyabing, Harrismith, Badgebup, Wandering	Oct
<i>Banksia rufa</i> subsp. <i>chelomacarpa</i>	3	Newdegate, Ravensthorpe	Jul-Sep
<i>Banksia rufa</i> subsp. <i>flavescens</i>	3	Ravensthorpe, Lake King, Frank Hann, Forrestania, Hatters Hill, Bodallin, Narembeen	Aug
<i>Beyeria sulcata</i> var. <i>truncata</i>	3	Jerdacuttup, Ravensthorpe, Norseman, Lake King, Frank Hann N.P.	Oct
<i>Beyeria villosa</i>	4	Ravensthorpe Range, Bandalup Hill, Jerdacuttup, Kundip	

Taxon	Status	Distribution	Flowering Period
<i>Boronia oxyantha</i> var. <i>oxyantha</i>	2	Fitzgerald River N.P.	-
<i>Bossiaea oxyclada</i>	2	Fitzgerald River NP	Sep
<i>Calectasia keigheryi</i>	2	Fitzgerald River NP	Jul-Sep
<i>Calectasia obtusa</i>	3	Cape Riche, Gordon Inlet, Quaalup, Newdegate, Fitzgerald River NP, Kwobrup, Gnowangerup	Jul-Aug
<i>Calochilus pruinosus</i>	T	Hopetoun, Eyre	Sep
<i>Calothamnus roseus</i>	1	Kundip	Sept-Oct
<i>Calycopeplus marginatus</i>	3	Fitzgerald River	Jul,Sep-Oct
<i>Cassinia arcuata</i>	2	Lake Magenta N.R., Ravensthorpe	Jan-Apr
<i>Chorizema ulotropis</i>	4	Jerramungup, Ongerup, Ravensthorpe, Young River, Dwellingup, Wandering, North Bannister	
<i>Comesperma lanceolatum</i>	2	Cape Riche, Hopetoun, Mt Maxwell, Mt Merivale	Nov
<i>Commersonia rotundifolia</i>	3	Gibson, Fitzgerald River N.P., Jerramungup, Lake Magenta N.R.	Jul-Sep
<i>Conostephium prolatum</i>	2	Fitzgerald River N.P.	Aug-Oct
<i>Conostylis lepidospermoides</i>	T	Jerdacuttup, Frank Hann N.P., Cascade	Sep-Oct
<i>Conostylis seorsiflora</i> subsp. <i>longissima</i>	2	Cape Le Grand NP, Fitzgerald River NP	Nov-Dec
<i>Cooperookia georgei</i>	T	Fitzgerald River Nat.Pk.	Jul-Nov
<i>Cryptandra craigiae</i>	1	Hopetoun	
<i>Cryptandra exserta</i>	1	Hatter Hill, Near Desmond	Jul-Sep
<i>Cryptandra inconspicua</i>	2	Wishbone, Pingrup, Fitzgerald River	Jul-Oct
<i>Cryptandra polyclada</i> subsp. <i>polyclada</i>	3	Tammin, Lake King, Boorabin, Hyden, Forrestania, Ravensthorpe	Ja-F,M,Au-Oc
<i>Cyathostemon gracilis</i>	2	Fitzgerald River NP, Annie Peak	
<i>Dampiera deltoidea</i>	4	Thumb Pk, Mt Desmond, Fitzgerald River, Ravensthorpe, Bandalup Hill	Sep-Nov
<i>Dampiera fitzgeraldensis</i>	2	Fitzgerald River	Sep
<i>Dampiera orchardii</i>	2	Tone R., Oldfield R., Ravensthorpe, Lake King, Lake Johnston	Oct-Nov
<i>Dampiera</i> sp.	3	Ravensthorpe	Jul/Oct-Nov

Taxon	Status	Distribution	Flowering Period
Ravensthorpe (G.F. Craig 8277)			
Daviesia megacalyx	T	Ravensthorpe Range	Aug-Sep
Daviesia newbeyi	2	near Barker Lake, Fitzgerald River NP, Ravensthorpe, Near Mt Buraminya	
Daviesia obovata	T	Stirling Range NP, Fitzgerald River NP	
Daviesia pauciflora	3	Cascades, Ravensthorpe, Esperance, Scaddan	Oct-Jan
Eremophila denticulata subsp. denticulata	T	W of Ravensthorpe, Cowerup, Fitzgerald River N.P.	Oct-Jan
Eremophila serpens	4	Hyden-Newdegate, Esperance, Lake Magenta, Ravensthorpe, Lake Milarup	Jan-Dec
Eremophila verticillata	T	NW of Ravensthorpe	Oct-Jan
Eucalyptus arborella	3	Fitzgerald River NP, Corackerup	Mar-May
Eucalyptus brandiana	2	Fitzgerald River N.P.	
Eucalyptus burdettiana	T	Fitzgerald River National Park	Jan-Dec
Eucalyptus coronata	T	Fitzgerald River NP	Jul-Aug
Eucalyptus desmondensis	4	Mt Desmond, Ravensthorpe	Mar-Nov
Eucalyptus dielsii x platypus	1	NW of Munglinup, E of Ravensthorpe	-
Eucalyptus mcquoidii	2	Fitzgerald River NP	-
Eucalyptus praetermissa	4	Beaufort Inlet, Fitzgerald River NP	Jan
Eucalyptus purpurata	T	Bandalup Hill, Jerdacuttup	
Eucalyptus quaerenda	3	Lake Chinokup, Ravensthorpe, Hatters Hill, Pallarup, Pingrup, Phillips River, Lake King	
Eucalyptus sinuosa	2	Mt Drummond, Corackerup, Kundip, Gairdner	-
Eucalyptus stoatei	4	Pyramid Lake, Bandalup Hill, Jerdacuttup	Dec-Feb
Eucalyptus x bennettiae	4	Ravensthorpe Range, Fitzgerald River NP	Jun-Sep
Gastrolobium spectabile	3	Lake Grace, Fitzgerald River NP, Muntadgin, Cunderdin, Trayning, Kununoppin, Billyacatting Hill N.R.	
Gastrolobium stenophyllum	3	Narembeen, Fitzgerald River	Oct-Nov
Gonocarpus hispidus	2	East Mt Barren, Fitzgerald River National Park, Whoogarup Range	Sep-Nov

Taxon	Status	Distribution	Flowering Period
<i>Gonocarpus trichostachyus</i>	3	Fitzgerald River, Jerramungup, Manypeaks, Mt Lindesay, Porongurup Range	Oct-Nov
<i>Goodenia phillipsiae</i>	4	Ravensthorpe, Bandalup Hill, Kundip	
<i>Goodenia stenophylla</i>	4	Fitzgerald River NP, Mt Desmond, Ajana	Sep-Dec
<i>Grevillea coccinea subsp. lanata</i>	3	Fitzgerald River NP, Thumb Peak	Jul, Oct
<i>Grevillea fastigiata</i>	4	Bandalup, Ravensthorpe, Phillips River, Jerdacuttup	Aug-Oct, Jan
<i>Grevillea fulgens</i>	3	Mt Desmond, Mt Short	Aug-Sep
<i>Grevillea infundibularis</i>	T	Fitzgerald River NP	Jul-Oct
<i>Grevillea prostrata</i>	4	Newdegate-Lake King, Ravensthorpe, Marvel Loch, Forrestania	Aug-Oct
<i>Grevillea punctata</i>	3	Ravensthorpe, Bandalup Hill	Apr-May/Nov
<i>Grevillea sulcata</i>	1	Ravensthorpe Range, Cacanarup	Apr-May, Jul
<i>Guichenotia anota</i>	1	Mt Short, Ravensthorpe Range	Sept-Apr
<i>Guichenotia apetala</i>	1	Mt Desmond area	Oct
<i>Gyrostemon ditrigynus</i>	4	Lake King, Cascades North, Forrestania, Ravensthorpe, Pingaring, Mt Ridley, Bandalup Hill	-
<i>Hakea acuminata</i>	2	Fitzgerald River NP, Hopetoun	
<i>Hakea brachyptera</i>	3	Lake Magenta, Lake Cairlocup, Ravensthorpe, ?Tambellup, ?Ongerup	
<i>Hibbertia abyssa</i>	T		
<i>Hibbertia acrotrichion</i>	2	Bremer Bay, Fitzgerald River NP, Boxwood Hill	Aug-Sep
<i>Hibbertia atrichosepala</i>	1	Ravensthorpe Range	Sep-Nov, Apr
<i>Hibbertia fitzgeraldensis</i>	3	Fitzgerald River NP	April, Sept-Oct
<i>Hibbertia papillata</i>	2	Fitzgerald River NP, East Mt Barren	Sep-Nov
<i>Hydrocotyle sp. Decipiens (G.J. Keighery 463)</i>	2	Fitzgerald River NP, Mt Ridley	Oct-Nov
<i>Hypocalymma melaleucoides</i>	2	Marsh's Beach, Fitzgerald River NP	Sep, Oct
<i>Jacksonia intricata</i>	2	Mt Drummond, Fitzgerald River NP	Jan
<i>Kunzea acicularis</i>	T	Ravensthorpe	
<i>Kunzea eriocalyx</i>	2	Fitzgerald River N.P.	Aug, Oct

Taxon	Status	Distribution	Flowering Period
<i>Kunzea similis</i> subsp. <i>similis</i>	T	Fitzgerald River NP	Sep-Oct
<i>Lasiopetalum adenotrichum</i>	2	Fitzgerald River N.P.	Sep
<i>Lasiopetalum parvuliflorum</i>	3	Fitzgerald River N.P., Point Malcolm	Sep
<i>Lasiopetalum</i> sp. Desmond (N. McQuoid 653)	1	Ravensthorpe	Nov
<i>Lechenaultia acutiloba</i>	3	Jerramungup, Ravensthorpe, Cairlocup, Lake Magenta, Hopetoun, West River	Oct-Dec
<i>Lechenaultia superba</i>	4	W of Hopetoun	Jan-Dec
<i>Lepidosperma</i> sp. Archer Drive (S. Kern & R. Jasper LCH 18300)	1	Ravensthorpe Range	
<i>Lepidosperma</i> sp. Hopetoun Road (S. Kern et al. LCH 16552)	1	Ravensthorpe Range, Bandalup Hill	
<i>Lepidosperma</i> sp. Maydon (S. Kern, R. Jasper, H. Hughes LCH 17844)	1	Ravensthorpe Range	
<i>Lepidosperma</i> sp. Mt Chester (S. Kern et al. LCH 16596)	1	Ravensthorpe Range, Bandalup Hill	
<i>Lepidosperma</i> sp. Mt Short (S. Kern et al. LCH 17510)	1	Ravensthorpe Range, Bandalup Hill, Fitzgerald River N.P.	
<i>Lepidosperma</i> sp. Shoemaker Levy (L. Ang & O. Davies 10815)	3	Ravensthorpe Range, Bandalup Hill, Fitzgerald River N.P., Kundip N.R.	
<i>Leucopogon</i> <i>blepharolepis</i>	4	Fanny Cove, Geekabee Hill, Stokes Inlet, Fitzgerald River NP, Kamballup	Aug
<i>Leucopogon</i> <i>compactus</i>	4	Cape Arid, Fitzgerald River N.P., East Mt Barren	Jun,Jul
<i>Leucopogon</i> sp. Barren Range (A.S. George 10092)	2	Fitzgerald River NP	Jul
<i>Levenhookia</i> <i>pulcherrima</i>	2	Mt Gibbs, Ravensthorpe	Oct-Nov
<i>Marianthus</i> <i>aquilonaris</i>	T		

Taxon	Status	Distribution	Flowering Period
<i>Marianthus mollis</i>	4	Ravensthorpe, Carlingup	Aug-Sep
<i>Melaleuca coccinea</i>	3	Karonie, Boulder, Widgiemooltha, Erayinia Hill, Norseman, Ravensthorpe	Oct-Nov
<i>Melaleuca penicula</i>	4	Fitzgerald River N.P., Ravensthorpe	Nov
<i>Melaleuca pritzelii</i>	3	Ongerup, Pootenup, Tambellup, Fitzgerald River NP, Quaderwardup Lake, Lake Muir, Cordering, Stirling Range National Park, Ewlyamartup	-
<i>Melaleuca sculponeata</i>	3	W of Ravensthorpe, Lake King	-
<i>Melaleuca similis</i>	1	Young River, Ravensthorpe	
<i>Melaleuca sophisma</i>	1	Kundip	
<i>Micromyrtus navicularis</i>	3	Ravensthorpe	Apr,May,Aug,Sep
<i>Monotoca aristata</i>	2	Mt Maxwell, Fitzgerald River NP, N of Bremer Bay	-
<i>Opercularia hirsuta</i>	2	Ravensthorpe, Peak Charles, Esperance	Sep-Oct
<i>Persoonia brevirostris</i>	3	Lake Grace, Ravensthorpe, Newdegate, Burnup	-
<i>Philotheca cymbiformis</i>	2	Fitzgerald River	Oct-Nov
<i>Pimelea longiflora</i> subsp. <i>eyrei</i>	2	Fitzgerald River NP, East Mt Barron	Jul-Nov
<i>Poa billardierei</i>	3	Warren Beach, Albany, Fitzgerald River N.P., Cape Le Grand N.P.	
<i>Pultenaea brachyphylla</i>	2	Fitzgerald River NP	Oct
<i>Pultenaea calycina</i> subsp. <i>calycina</i>	3	Stirling Range, Ravensthorpe, Fitzgerald River NP, Manypeaks. Kojoneerup	Aug-Oct
<i>Pultenaea calycina</i> subsp. <i>proxena</i>	4	Bandalup Hill, Elverdton Range, Kundip	Aug,Nov
<i>Pultenaea craigiana</i>	3	Kundip	Nov
<i>Pultenaea indira</i> subsp. <i>monstrosita</i>	3	Ravensthorpe, Fitzgerald, Lake King, Newdegate, Dragon Rocks, Jackson Rocks	
<i>Pultenaea vestita</i>	3	Mt Lindsay, Ravensthorpe, Esperance, Hopetoun, Lake King	Sept
<i>Pultenaea wudjariensis</i>	1	Ravensthorpe	
<i>Ricinocarpos trichophorus</i>	T	Fitzgerald River, Esperance area	M-M,S-N

Taxon	Status	Distribution	Flowering Period
<i>Rinzia affinis</i>	4	Lake King, Kukerin, Tarin Rock, Ravensthorpe	-
<i>Senecio pinnatifolius</i> var. <i>leucocarpus</i>	2	Fitzgerald River N.P.	
<i>Sphaerolobium validum</i>	3	Bremer Bay, Wellstead, Fitzgerald River NP, Ravensthorpe, Broomehill, Cape Riche, Lake Magenta, Forrestania	Sep-Oct
<i>Spyridium mucronatum</i> subsp. <i>recurvum</i>	3	Borden, Lake Magenta, Ravensthorpe	Sep-Dec
<i>Spyridium oligocephalum</i>	3	Pingrup, Jerramungup, Kalgan River, Fitzgerald River NP, Hopetoun	Mar,Jul-Oct
<i>Stenanthemum cristatum</i>	2	Fitzgerald River N.P., Mid and East Mt Barren	Nov
<i>Stylium galoides</i>	T	W of Hopetoun	Sep-Nov
<i>Stylium pseudohirsutum</i>	3	Fitzgerald River N.P., Boxwood Hill, Kamballup, Needilup, Beaufort River	Nov
<i>Stylium pulviniforme</i>	3	Dulagin Rock, Lake Johnston, Mt Madden, Lake King, Pallarup, Jerdacuttup, Weowanie Rock, Frank Hann NP, Peak Eleanora, Daniell, Pioneer, Lake Cobham, Salmon Gums	Sep-Nov
<i>Synaphea</i> sp. flat <i>canaliculata</i> (M. Bennett 794)	1	Ravensthorpe	Oct
<i>Tetratheca appianata</i>	1	Dardadine, Broomehill, Ravensthorpe	Aug-Sep
<i>Thelymitra psammophila</i>	T	Stirling Range-Ravensthorpe, Kamballup, Nalyerlup	Sep-Oct
<i>Thomasia pygmaea</i>	3	Young River, Hamersley River, Eyre Range, Fitzgerald River NP	Sep
<i>Thomasia</i> sp. Hopetoun (K.R. Newbey 4896)	2	Kundip, Thumb Peak	Oct-Nov, May
<i>Thysanotus brachiatius</i>	2	Munglinup, Ravensthorpe, Hopetoun, Dalyup	
<i>Verticordia crebra</i>	T	Fitzgerald River National Park	Apr-May
<i>Verticordia helichrysantha</i>	T	Cape Riche, Fitzgerald River area	Jul-Oct
<i>Verticordia integra</i>	4	Newdegate - Lake King - Ravensthorpe, Dragon Rocks	Nov
<i>Verticordia longistylis</i>	3	Perkins Rock, Roes Rock (Fitzgerald River N.P.)	Sep-Oct
<i>Westringia fitzgeraldensis</i>	2	Fitzgerald River N.P.	Sep

APPENDIX 9: NATUREAP SEARCH – 6 KM BUFFER

NATUREMAP SEARCH (6KM)

Species Name	Naturalised	Conservation Code	Endemic To Query Area
Amphibians			
<i>Crinia pseudinsignifera</i> (Bleating Froglet)			
<i>Litoria cyclorhyncha</i> (Spotted-thighed Frog)			
<i>Neobatrachus albipes</i> (White-footed Trilling Frog)			
<i>Neobatrachus kunapalari</i> (Kunapalari Frog)			
<i>Pseudophryne guentheri</i> (Crawling Toadlet)			
Birds			
<i>Acanthiza apicalis</i> (Broad-tailed Thornbill, Inland Thornbill)			
<i>Acanthorhynchus superciliosus</i> (Western Spinebill)			
<i>Anthochaera carunculata</i> (Red Wattlebird)			
<i>Anthochaera lunulata</i> (Western Little Wattlebird)			
<i>Barnardius zonarius</i>			
<i>Cacomantis flabelliformis</i> (Fan-tailed Cuckoo)			
<i>Cacomantis flabelliformis</i> subsp. <i>flabelliformis</i> (Fan-tailed Cuckoo)			
<i>Calyptorhynchus latirostris</i> (Carnaby's Cockatoo (short-billed black-cockatoo))			T
<i>Calyptorhynchus</i> sp.			
<i>Chrysococcyx basalis</i> (Horsfield's Bronze Cuckoo)			
<i>Chrysococcyx lucidus</i> (Shining Bronze Cuckoo)			
<i>Colluricincla harmonica</i> (Grey Shrike-thrush)			
<i>Colluricincla harmonica</i> subsp. <i>rufiventris</i> (Grey Shrike-thrush)			
<i>Coracina novaehollandiae</i> (Black-faced Cuckoo-shrike)			
<i>Corvus coronoides</i> (Australian Raven)			
<i>Cracticus torquatus</i> (Grey Butcherbird)			
<i>Drymodes brunneopygia</i> (Southern Scrub-robin)			
<i>Glossopsitta porphyrocephala</i> (Purple-crowned Lorikeet)			
<i>Hirundo neoxena</i> (Welcome Swallow)			
<i>Hirundo nigricans</i> (Tree Martin)			
<i>Hylacola cauta</i> (Shy Groundwren, Shy Heathwren)			
<i>Hylacola cauta</i> subsp. <i>whitlocki</i> (Shy Heathwren (western))			
<i>Leipoa ocellata</i> (Malleefowl)		T	
<i>Lichmera indistincta</i> (Brown Honeyeater)			
<i>Lophoictinia isura</i>			
<i>Melithreptus brevirostris</i> (Brown-headed Honeyeater)			
<i>Melithreptus brevirostris</i> subsp. <i>leucogenys</i> (Brown-headed Honeyeater)			
<i>Myiagra inquieta</i> (Restless Flycatcher)			
<i>Ocyphaps lophotes</i> (Crested Pigeon)			
<i>Oreocica gutturalis</i> (Crested Bellbird)			
<i>Pachycephala pectoralis</i> (Golden Whistler)			
<i>Pardalotus punctatus</i> (Spotted Pardalote)			
<i>Pardalotus striatus</i> (Striated Pardalote)			

Species Name	Naturalised	Conservation Code	Endemic To Query Area
<i>Phaps chalcoptera</i> (Common Bronzewing)			
<i>Phaps elegans</i> (Brush Bronzewing)			
<i>Phylidonyris melanops</i> (Tawny-crowned Honeyeater)			
<i>Phylidonyris novaehollandiae</i> (New Holland Honeyeater)			
<i>Pomatostomus superciliosus</i> (White-browed Babbler)			
<i>Psophodes nigrogularis</i> (Western Whipbird)			
<i>Psophodes nigrogularis</i> subsp. <i>nigrogularis</i> (Western Whipbird (western heath))		T	
<i>Psophodes nigrogularis</i> subsp. <i>oberon</i> (Western Whipbird (Mallee))		P4	
<i>Purnella albifrons</i> (White-fronted Honeyeater)			
<i>Purpureicephalus spurius</i>			
<i>Rhipidura fuliginosa</i> (Grey Fantail)			
<i>Rhipidura leucophrys</i> (Willie Wagtail)			
<i>Sericornis frontalis</i> (White-browed Scrubwren)			
<i>Sericornis frontalis</i> subsp. <i>maculatus</i> (White-browed Scrubwren)			
<i>Smicrornis brevirostris</i> (Weebill)			
<i>Stipiturus malachurus</i> subsp. <i>westernensis</i> (Southern Emu-wren)			
<i>Strepera versicolor</i> (Grey Currawong)			
<i>Todiramphus sanctus</i> (Sacred Kingfisher)			
<i>Zosterops lateralis</i> (Grey-breasted White-eye, Silveryeye)			
Invertebrates			
<i>Amblyomma limbatum</i>			
<i>Amphirhoe sloanei</i>			Y
<i>Aname mainae</i>			
<i>Aphaenogaster mediterrae</i>			
<i>Atelomastix gibsoni</i>			
<i>Atelomastix psittacina</i>			
<i>Australomimetus aurioculatus</i>			
<i>Backobourkia heroine</i>			
<i>Cormocephalus hartmeyeri</i>			
<i>Cormocephalus turneri</i>			
<i>Geogarypus taylori</i>			
<i>Gonipterus scutellatus</i>			
<i>Hoggicosa storri</i>			
<i>Iridomyrmex omalonotus</i>			
<i>Isopeda leishmanni</i>			
<i>Karaops francesae</i>			
<i>Kawanaphila mirla</i>			
<i>Lagynochthonius australicus</i>			
<i>Lycosa ariadnae</i>			
<i>Nanodectes gladiator</i>			
<i>Notalina sp.</i>			

Species Name	Naturalised	Conservation Code	Endemic To Query Area
Oxyops sp.			
Supunna funerea			
Tamopsis circumvidens			
Tasmanicosa leuckartii			
Triplectides australis			
Mammals			
Cercartetus concinnus (Western Pygmy-possum, Mundarda)			
Chalinolobus gouldii (Gould's Wattled Bat)			
Dasyurus geoffroii (Chuditch, Western Quoll)			T
Isoodon obesulus subsp. fusciventer (Quenda, Southern Brown Bandicoot)			P5
Macropus eugenii subsp. derbianus (Tammar Wallaby (WA subsp))		P5	
Macropus irma (Western Brush Wallaby)		P4	
Mus musculus (House Mouse)	Y		
Parantechinus apicalis (Dibbler)		T	
Rattus fuscipes (Western Bush Rat)			
Tadarida australis (White-striped Freetail-bat)			
Tarsipes rostratus (Honey Possum, Noolbenger)			
Reptiles			
Amphibolurus norrisi (Mallee Tree Dragon)			
Aprasia repens (Sand-plain Worm-lizard)			
Christinus marmoratus (Marbled Gecko)			
Crenadactylus ocellatus (Clawless Gecko)			
Crenadactylus ocellatus subsp. ocellatus (Clawless Gecko)			
Cryptoblepharus pulcher subsp. clarus			
Ctenophorus maculatus subsp. griseus (Spotted Military Dragon)			
Ctenotus impar			
Ctenotus labillardieri			
Delma australis			
Delma fraseri (Fraser's Legless Lizard)			
Diplodactylus calcicolus (South Coast Gecko)			
Diplodactylus granariensis			
Elapognathus coronatus (Crowned Snake)			
Hemiergis initialis			
Hemiergis initialis subsp. initialis			
Hemiergis peronii			
Hemiergis peronii subsp. peronii			
Lerista distinguenda			
Lerista viduata (Ravensthorpe Range Slider, skink)			P1
Menetia greyii			
Morethia obscura			
Notechis scutatus (Tiger Snake)			
Tiliqua rugosa			

Species Name	Naturalised	Conservation Code	Endemic To Query Area
Underwoodisaurus miliaris (Barking Gecko)

Species
Encoptarthria
Eriophora heroine
Geogarypus taylori
Gnaphosidae
Gonipterus scutellatus Gyllenhal, 1833
Habronestes
Hoggicos storreri
Isopeda leishmanni
Karaops
Karaops francesae
Kawanaphila mirla Rentz, 1993
Lagynochthonius australicus
Linyphiidae
Lychas
Lycosa ariadnae
Lycosidae
Masasteron mas
Metallesthes metallescens
Micropholcomma
Miturgidae
Nanodectes gladiator Rentz, 1985
Neostorena
Notalina
Oechalia schellenbergii (Guerin, 1831)
Oxyopidae
Oxyops
Phenasteron
Phycosoma
Poecilometis punctiventris (Stål, 1876)
Pseudapines geminata (Van, 1905)
Pupoides
Salticidae
Spilostethus pacificus (Boisduval, 1835)
Steatoda
Tamopsis circumvidens
Tasmanicosa leuckartii
Tharpyna
Theridiidae
Thomisidae
Thyreus waroonensis
Triplectides australis Navas, 1934
Urodacus
Venator

Species
Venonia
Zillimata
Zodariidae
Zoridae
Mammals
Cercartetus concinnus
Macropus eugenii derbianus
Mus musculus*
Rattus fuscipes
Sminthopsis griseoventer griseoventer
Tarsipes rostratus
Reptiles
Amphibolurus norrisi
Anilius australis
Aprasia repens
Christinus marmoratus
Crenadactylus ocellatus
Crenadactylus ocellatus ocellatus
Cryptoblepharus pulcher clarus
Ctenophorus maculatus griseus
Ctenotus impar
Ctenotus labillardieri
Delma australis
Delma fraseri
Diplodactylus calcicolus
Hemiergis initialis initialis
Hemiergis peronii subsp. peronii
Lerista distinguenda
Lerista vittata
Menetia greyii
Morethia obscura
Underwoodisaurus milii
