

Checklist of the Caesalpinoideae (Leguminosae) of Equatorial Guinea (Annobón, Bioko and Río Muni)

MANUEL DE LA ESTRELLA*, FRANCISCO J. CABEZAS, CARLOS AEDO and MAURICIO VELAYOS

Real Jardín Botánico de Madrid, Pl. Murillo 2, 28014-Madrid, Spain

Received May 2005; accepted for publication January 2006

This study provides a checklist of the Caesalpinoideae (Leguminosae) present in Equatorial Guinea, comprising 52 genera and 124 taxa. Seven species are known from Annobón, 33 from Bioko and 109 from Río Muni. The best represented genus is *Senna* with eight species. In addition, bibliographic references for Caesalpinoideae (Leguminosae) from Equatorial Guinea have been gathered and checked. Fourteen species are included based on literature records, because their distribution ranges suggest they may occur in Equatorial Guinea, 11 introduced species could be naturalized, and 45 taxa are recorded for the first time from the country. This represents an increase of over 35% in the floristic knowledge of Caesalpinoideae from Equatorial Guinea. A statistical summary is presented at the end of the checklist. © 2006 The Linnean Society of London, *Botanical Journal of the Linnean Society*, 2006, **151**, 541–562.

ADDITIONAL KEYWORDS: biodiversity – floristic – Legumes – rain forest – tropical Africa.

INTRODUCTION

Leguminosae is the third largest plant family in the world, comprising about 730 genera and c. 19 300 species. Considering the number of species, the Caesalpinoideae with c. 2250–3000 species in c. 170 genera is the second largest of the three subfamilies in which the legume family is usually subdivided. The Caesalpinoideae are especially abundant in South America, tropical Africa and South-east Asia (Heywood, 1978; Polhill & Raven, 1981). Many of the tree species in the African forests belong to this subfamily and it is the most important group in the lowland evergreen rain forest (Wieringa, 1999).

Important works on Caesalpinoideae of tropical West Africa include those of Oliver (1871) and Keay (1958). The most recent works on Caesalpinoideae from the region are those by Aubréville (1968, 1970). Other works that include this region are restricted to just a few Caesalpinoideae genera (Breteler, 1999; Wieringa, 1999).

Equatorial Guinea is located in western Central Africa. The insular region includes two islands in the Gulf of Guinea: Bioko (2017 km²), c. 32 km from the Cameroon coast, and Annobón (17 km²), c. 400 km from Gabon. The continental mainland, Río Muni (26 000 km²), is located between 1°N and 2°N latitude (Fig. 1). A compilation of data on location, phytogeography, climate and hydrogeography can be found in Guinea (1946), De Castro & De la Calle (1985), Pérez del Val (1993) or Heras *et al.* (2002). General information is also available over the internet at <http://www.floradeguinea.com/guinea.php>.

A complete account of the Caesalpinoideae (Leguminosae) of Equatorial Guinea has never been published. Although the subfamily was included in the general vascular plant catalogue of Guinea (1946), he added plants that he presumed to be present in Equatorial Guinea.

Over the last 23 years the Real Jardín Botánico has carried out intensive fieldwork in both Bioko and Río Muni. Studies of these new collections and the available historical specimens have permitted the description of new taxa and the preparation of checklists for several groups (Herrero *et al.*, 2001; Velayos, Aedo & Pérez Viso, 2001; Fero *et al.*, 2003; Parmentier &

*Corresponding author. E-mail: mestrella@ma-rjb.csic.es

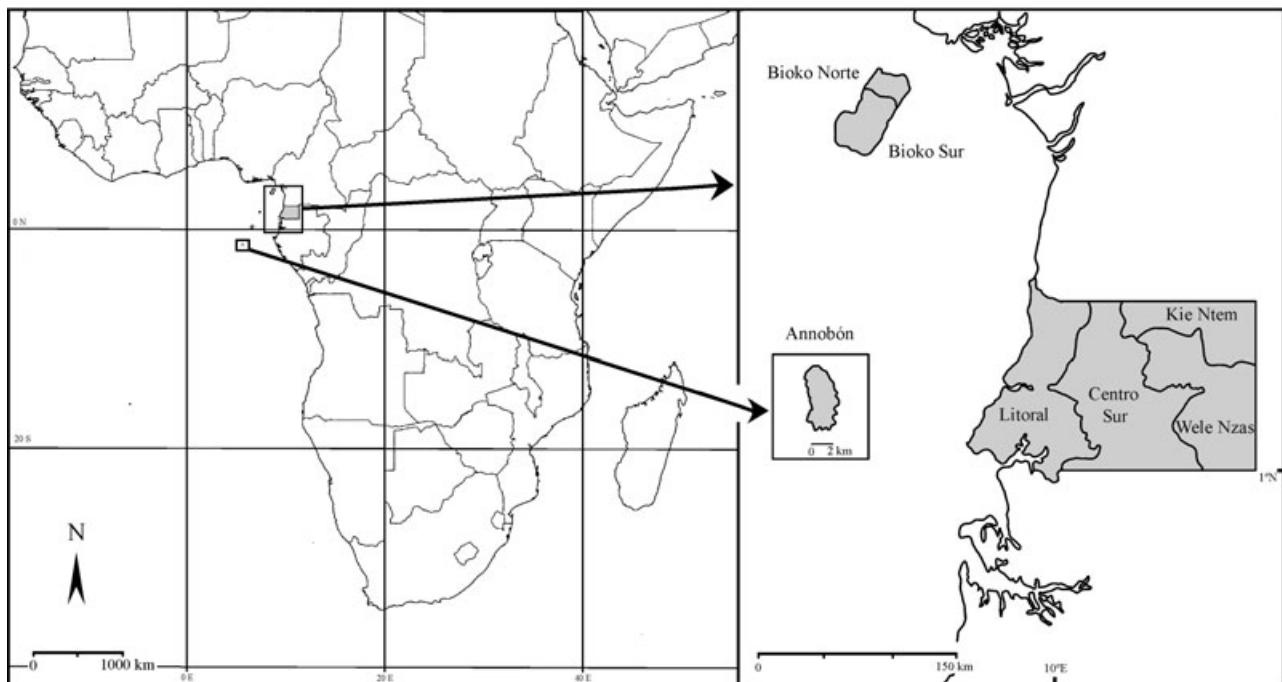

Figure 1. Location of Equatorial Guinea in Africa and administrative provinces.

Geerinck, 2003; Cabezas, Aedo & Velayos, 2004; Cabezas *et al.*, 2005; Estrella *et al.*, 2005). This work has been complemented with studies on the inselbergs vegetation carried out by botanists from the Université Libre de Bruxelles (Lejoly & Lisowski, 1999; Parmentier, 2001, 2003; Parmentier, Lejoly & Nguema, 2001).

The aim of this work is to update the catalogue of Caesalpinoideae for the whole of Equatorial Guinea including both bibliographic records and herbarium material. This checklist is a first step towards a modern Flora of Equatorial Guinea.

MATERIAL AND METHODS

The checklist is based primarily on herbarium specimens. We have studied more than 300 specimens from BM, BRLU, K, LISC, LISU, MA and WAG including both the historic collections made during British expeditions by Barter, Mann, Tessmann and Vogel, and modern collections obtained by both Belgian and Spanish expeditions. For comparative purposes some specimens from neighbouring countries were also studied.

Bibliographic references for the legumes of Equatorial Guinea have also been checked (Aedo, Velayos & Tellería, 1999). Fourteen species are included based purely on literature records, because their distribution areas make their presence in Equatorial Guinea probable. They are quoted with the number between

brackets. Eleven introduced species are presented in the checklist; they are marked with an asterisk (*) before the accepted name.

The locality names used in this checklist have been brought up-to-date following Velayos *et al.* (2001: 147–149); this source also contains a gazetteer including geographical coordinates.

The checklist is ordered alphabetically by genera and species, with accepted names given in bold. Generic circumscription is in accordance with Lock (1989). We used monographs or regional works such as those by Breteler (1999) or Wieringa (1999), when they were available.

Under each accepted name a list of synonyms found in the literature and used in previous reports is included; these are given in italics. Specimens are ordered alphabetically by the different regions and provinces: Annobón, Bioko (provinces of Bioko Norte and Bioko Sur) and Río Muni (provinces of Centro Sur, Kie Ntem, Litoral and Wele Nzas). A description of geographical distribution follows each species, including worldwide circumscription (e.g. palaeotropical) and its distribution in Africa in accordance with Polhill (1982: 2), including a list of those African countries where the species has been previously reported.

Previous bibliographical records of each taxon are grouped under the three regions mentioned above. When the taxon was reported under a different name (synonym), it is indicated as, e.g. Guinea (1946): 294,

sub *Macrolobium palisoti*. In the case of a misidentification, the author's name is included following the cited species (Oliver, 1871: 312, sub *Crudia senegalensis* Planch. ex Benth.). Doubtful records are placed at the end of the checklist, followed by an Appendix which includes an index to scientific names and a list of collections.

THE CHECKLIST

AFZELIA SM.

1. *Afzelia africana* Sm. ex Pers.

Litoral: Corisco, camino hacia el N a 100 m de la casa de Yniestrosa, *Cabezas, Tellería & Velayos* 9929 (MA); Ayamiken, *Lisowski* M-928 (BRLU).

Previously reported from Río Muni (Guinea, 1946: 141, 144, 154 and 293). Distributed in tropical Africa, this species has been reported from Benin, Burkina Faso, Cameroon, Central African Republic, Chad, D.R. Congo, Ghana, Guinea, Guinea Bissau, Ivory Coast, Mali, Niger, Nigeria, Senegal, Sierra Leone, Sudan, Togo and Uganda (Lock, 1989: 45).

2. *Afzelia bella* Harms

Bioko Sur: Luba–Malabo, km 2, *Carvalho* 2991 (BM, MA). Litoral: Bata–Asonga–Ngoló, km 2, *Carvalho* 5157 (MA, WAG), 5167 (MA, WAG), Bata–Niefang, km 46–47, *Carvalho* 5602 (MA, WAG).

Not previously reported from Equatorial Guinea. This species is distributed in West and Central Africa, and has been reported from Angola, Cameroon, D.R. Congo, Gabon, Ghana, Guinea, Ivory Coast, Liberia and Nigeria (Lock, 1989: 45).

3. *Afzelia bipindensis* Harms

Litoral: Mitora, Mbini, *Obama* 846 (WAG). Wele Nzas: Nkolentangan, *Tessmann* 376 (K).

Not previously reported from Equatorial Guinea. This species is distributed in tropical Africa, reported from Angola, Cameroon, Central African Republic, D.R. Congo, Gabon, Nigeria and Uganda (Lock, 1989: 45).

4. *Afzelia pachyloba* Harms

Bioko Sur: finca Puente, *Guinea* 1740 (MA). Centro Sur: P.N. Monte Alén, transect de Monte Chocolate, *Lejoly* 95T/162 (BRLU).

Previously reported from Río Muni (Guinea, 1946: 145, 154). This species is distributed in West, Central and South-Central Africa, it has been reported from Angola, Cameroon, D.R. Congo, Gabon and Nigeria (Lock, 1989: 45).

ANTHONOTHA P. BEAUV.

5. *Anthoноtha acuminata* (De Wild.) J. Léonard Río Muni: *Tessmann* 815 (K).

Not previously reported from Equatorial Guinea. Distributed in Central Africa, this species has been reported from D.R. Congo and Gabon (Lock, 1989: 1).

6. *Anthoноtha fragrans* (Baker f.) Exell & Hillc.

Centro Sur: P.N. Monte Alén, *Lisowski* M-1428 (BRLU).

Not previously reported from Equatorial Guinea. This species is distributed in West, Central and South-Central Africa, and has been reported from Angola, Cameroon, D.R. Congo, Gabon, Ghana, Ivory Coast, Liberia, Nigeria and Sierra Leone (Lock, 1989: 2).

7. *Anthoноtha lamprophylla* (Harms) J. Léonard

Centro Sur: P.N. Monte Alén, 2 km au NE du site de traversée du río Uolo, Senterre, *Obiang & Ngomo* 1847 (BRLU).

Not previously reported from Equatorial Guinea. Distributed in West and Central Africa, this species has been reported from Cameroon, Gabon and Nigeria (Lock, 1989: 2).

8. *Anthoноtha macrophylla* P. Beauv.

Macrolobium macrophyllum (P. Beauv.) Macbride
Macrolobium palisoti Benth.

Bioko: *Barter* s.n. (K); *Mann* s.n. (K), *Mann* 259 (K). Bioko Norte: Malabo–aeroporto, estrada km 6, *Carvalho* 2086 (MA). Bioko Sur: Moka–Luba–Malabo, cerca do río Tiburones, *Carvalho* 2490 (BM, K, LISC, MA, WAG); entre Luba y Malabo, a unos 15 km de Luba, *Carvalho, Fernández Casas* 10278, *Regueiro & Tellería* (K, MA); Ureca, *Guinea* 2490 (MA), playa de Ureca, *Guinea* 2506 (MA); Boloko, *Lope del Val* s.n. (MA-710759). Centro Sur: Bata–Niefang, km 40, *Pérez Viso* 2719 (MA), P.N. Monte Alén, Esamalang, *Pérez Viso* 3306 (MA); P.N. Monte Alén, Enkumekiem, *Velayos & Pérez Viso* 9313 (MA). Litoral: Bata–Pembe–Entuba, km 27–28, área de población de Entuba a San Joaquin de Ndyjacón, *Carvalho* 5237 (MA, WAG); Bata, Miboman, km 27 carretera Bata–Movo, *Castelo, Cabeza & Juste* s.n. (MA-319774). Wele Nzas: Bata–Niefang, Eviam, *Pérez Viso* 2585 (MA); Nkoletangan, *Tessmann* 4 (K). Unknown locality: *Guinea* 1176 (MA), 1177 (MA); *Lope del Val* s.n. (MA-710760, MA-710761, MA-710762).

Previously reported from Bioko (Oliver, 1871: 297–298; Hutchinson, 1928: 347, sub *Macrolobium macrophyllum*; Guinea, 1946: 294, sub *M. palisoti*; Keay, 1958: 473; Exell, 1973a: 356) and from Río Muni (Guinea, 1946: 144, 157, sub *M. palisoti*; Parmentier et al., 2001: 363, Senterre, 2001: 1093). This species is distributed in West, Central and South-Central Africa, and has been reported from Angola, Cameroon, D.R. Congo, Gabon, Ghana, Guinea, Ivory Coast, Liberia, Mali, Nigeria and Sierra Leone (Lock, 1989: 2).

9. *Anthoноtha pynaertii* (De Wild.) Exell & Hillc.

Litoral: Miwala, a 5 km de Cogo, *Pérez Viso* 3937 (MA).

Not previously reported from Equatorial Guinea. This species is distributed in Central and South-Central Africa and has been reported from Angola, Burundi, Cameroon, D.R. Congo and Gabon (Lock, 1989: 3).

10. *Anthonotha stipulacea* (Benth.) J. Léonard
Litoral: Bata–Sendje, estrada km 27, *Carvalho* 6078
(MA), 6394 (MA).

Not previously reported from Equatorial Guinea. This Central African species has been reported from neighbouring Gabon (Aubréville, 1968: 201).

APHANOCALYX OLIV.

(11). *Aphanocalyx cynometroides* Oliv.
Litoral: Mount John, river Konqui, *Mann* 1810 (K and BR: not seen).

Previously reported from Río Muni (Wieringa, 1999: 123), this species is distributed in Central Africa and also reported from neighbouring Cameroon, Congo and Gabon (Wieringa, 1999: 123).

12. *Aphanocalyx heitzii* (Pellegr.) Wieringa
Centro Sur: P.N. Monte Alén, cerca de Misergue, alrededores del río Laña, *Pérez Viso* 191 (MA).

Previously reported from Río Muni (Wieringa, 1999: 183). This species has also been reported from Gabon (Wieringa, 1999: 183).

13. *Aphanocalyx ledermannii* (Harms) Wieringa
Litoral: Ndote Sud, près du village Etembue, *Lisowski* M-511 (BRLU).

Not previously reported from Equatorial Guinea. Distributed in Central Africa, this species has been reported from Cameroon, Congo and Gabon (Wieringa, 1999: 135).

14. *Aphanocalyx margininervatus* J. Léonard
Centro Sur: P.N. Monte Alén, transect de Monte Chocolate, *Lejoly* 95T/L3.A24 (BRLU).

Previously reported from Río Muni (Wieringa, 1999: 138–139). This Central African species has also been reported from neighbouring Cameroon and Gabon (Wieringa, 1999: 138–139).

15. *Aphanocalyx microphyllus* (Harms) Wieringa
ssp. *microphyllus*
Centro Sur: P.N. Monte Alén, alrededores del lago Atok, *Pérez Viso* 21 (MA). Litoral: Bata–Sendje, km 24, *Carvalho* 6405 (MA), 6526 (MA).

Previously reported from Río Muni (Wieringa, 1999: 146; Parmentier *et al.*, 2001: 344). This species is distributed in Central and South-Central Africa and has been reported from Angola, Cameroon, Congo and Gabon (Wieringa, 1999: 145–148).

BAIKIAEA BENTH.

16. *Baikiaea insignis* Benth.
Bioko: *Mann* 2342 (K). Bioko Norte: Malabo–Riaba, estrada km 13, *Carvalho* 2879 (MA), Malabo–Baney, km 12, *Carvalho* 3783 (K, MA).

Previously reported from Bioko (Oliver, 1871: 308–309; Hutchinson, 1928: 336; Guinea, 1946: 293; Keay, 1958: 456; Exell, 1973a: 356), Río Muni (Guinea, 1946:

144) and from Equatorial Guinea (Guinea, 1946: 293). This species is distributed in tropical Africa and has been introduced in Asia; it has been reported from Angola, Cameroon, Congo, D.R. Congo, Gabon, Nigeria, Tanzania and Uganda (Lock, 1989: 46).

17. *Baikiaea robynsii* Ghesq. ex Laing
Litoral: río Uele, *Guinea* 46–207 (MA), 47 (MA); district Mbini, près du village de Sendje, *Lisowski* M-584 (BRLU).

Previously reported from Equatorial Guinea (Aubréville, 1968: 178). Distributed in Central Africa, this species has also been reported from D.R. Congo and Gabon (Lock, 1989: 46).

BAUHINIA L.

18. (*)*Bauhinia monandra* Kurz
Centro Sur: Evinayong, *Guinea* 289 (MA).

Not previously reported from Equatorial Guinea. This species is originally from Asia (Vidigal, 2002: 40), and it has been frequently introduced throughout the tropical countries for ornamental purposes. In Africa it has been reported from Angola, Burundi, D.R. Congo, Ghana, Ivory Coast, Liberia, Mali, Nigeria, Sierra Leone, Somalia, Tanzania and Zambia (Lock, 1989: 42).

BERLINIA SOL. EX HOOK.F.

19. *Berlinia auriculata* Benth.
Litoral: Corisco, *Pérez Viso* 1874 (MA), des embocadura de Río Campo, *Pérez Viso* 2172 (MA).

Not previously reported from Equatorial Guinea. Distributed in West and Central Africa, this species has been reported from Cameroon, Gabon and Nigeria (Lock, 1989: 4).

20. *Berlinia bracteosa* Benth.
Bioko: *Mann* 1434 (K). Bioko Norte: Malabo–Rebola, km 8, *Carvalho* 2939 (K, MA), Malabo–Cupapa, km 15–16, *Carvalho* 3379 (K, MA); finca de Bonyoma, *Nosti* 923 (MA). Bioko Sur: Luba–Malabo km 2, *Carvalho* 2851 (BM, K, MA, WAG). Centro Sur: Evinayong, *Guinea* 409 (MA), 412 (MA). Litoral: Bata–Cogo, km 54, Binguro, *Pérez Viso* 2889 (MA); près de la frontière gabonaise, chantier forestier à l'est de Cogo, *McPherson* 14021 (WAG).

Previously reported from Bioko (Oliver, 1871: 294–295; Hutchinson, 1928: 343; Guinea, 1946: 294; Keay, 1958: 470; Exell, 1973a: 356; Fernández Casas, 1992: 60) and from Río Muni (Guinea, 1946: 141, 144 and 294; Senterre, 2001: 1091). This species is distributed in West, Central and South-Central Africa, and has been reported from Angola, Cameroon, D.R. Congo, Gabon and Nigeria (Lock, 1989: 4).

21. *Berlinia bruneelii* (De Wild.) Torre & Hillc.
Wele Nzas: Nkolentangan, *Tessmann* 333 (K). Río Muni: *Tessmann* 950 (K).

Not previously reported from Equatorial Guinea. This species has been reported previously from Angola (Lock, 1989: 4).

22. *Berlinia confusa* Hoyle

Berlinia acuminata Sol. ex Hook.f. pro parte
Litoral: Bata–Utonde, estrada km 21–22, area de poblaçao de Ebéevang, *Carvalho* 4731 (MA).

Previously reported from Río Muni (Guinea, 1946: 144 and 157, sub *Berlinia acuminata*) and from Equatorial Guinea (Guinea, 1946: 294, sub *B. acuminata*). Distributed in West and Central Africa, this species has been reported from Cameroon, Gabon, Ivory Coast, Liberia, Nigeria and Sierra Leone (Lock, 1989: 4).

23. *Berlinia congolensis* (Baker f.) Keay

Litoral: Bata–Sendje, estrada km 24, *Carvalho* 6317 (MA).

Not previously reported from Equatorial Guinea. Distributed in West and Central Africa, this species has been reported from Angola, Cameroon, D.R. Congo, Gabon and Nigeria (Lock, 1989: 4).

24. *Berlinia grandiflora* (J. Vahl) Hutch. & Dalziel
Centro Sur: Bata–Mongo–Nosok, entre Mongo y Nosok, *Carvalho* 5065 (MA). Litoral: Bata–Sendje, estrada km 18, *Carvalho* 6336 (MA).

Not previously reported from Equatorial Guinea. This species is distributed in West, Central and South-Central Africa, and has been reported from Angola, Benin, Burkina Faso, Cameroon, Central African Republic, D.R. Congo, Ghana, Guinea, Ivory Coast, Mali, Nigeria, Sierra Leone and Togo (Lock, 1989: 5).

BIKINIA WIERINGA

25. *Bikinia grisea* Wieringa

Wele Nzas: P.N. Nsork, Obamicu, Nguema, Esono & Lejoly 239 (BRLU).

Previously reported from Río Muni. This Central African species has also been reported from neighbouring Gabon (Wieringa, 1999: 222).

26. *Bikinia le-testui* (Pellegr.) Wieringa ssp. *le-testui*

Monopetalanthus le-testui Pellegr.

Centro Sur: P.N. Monte Alén, 8.5 km à l'Est de la cabaña de Mosumo, Senterre & Obiang 4017 (BRLU). Litoral: Bata–Bolondo, km 22–23, *Carvalho* 5265 (MA).

Previously reported from Río Muni (Wieringa, 1999: 227–229; Senterre, 2001: 1091, sub *Monopetalanthus le-testui*; Senterre, Lejoly & Sonké, 2004: 503, sub *M. le-testui*). This Central African species has also been reported from neighbouring Cameroon and Gabon (Wieringa, 1999: 227–229).

27. *Bikinia pellegrinii* (A. Chev.) Wieringa

Centro Sur: Monte Alén, Moka, Wilks 3523 (BRLU).

Previously reported from Río Muni (Wieringa, 1999: 239–240). Distributed in Central Africa, this species

has also been reported from Cameroon, Congo and Gabon (Wieringa, 1999: 239–240).

BRACHYSTEGIA BENTH.

(28). *Brachystegia cynometroides* Harms

Previously reported from Río Muni (Guinea, 1946: 145). We have not found any herbarium material of *B. cynometroides* from Equatorial Guinea in BM, BRLU, K, LISC, LISU, MA and WAG. This species has only been reported from Cameroon (Aubréville, 1970: 262, Lock, 1989: 6), but searching through the W3Tropicos database by the Missouri Botanical Garden (<http://mobot.mobot.org/W3T/Search/vast.html>), we also found one specimen from Gabon. We conclude that the distribution range of this species suggests it may occur also in Equatorial Guinea.

29. *Brachystegia mildbraedii* Harms

Litoral: Okorobikó, mountains near river Uele, Sabater Pí s.n. (K).

Not previously reported from Equatorial Guinea. This species has only been reported from neighbouring Cameroon and Gabon (Lock, 1989: 7).

CAESALPINIA L.

30. *Caesalpinia bonduc* (L.) Roxb.

Caesalpinia bonducella (L.) Fleming

Caesalpinia crista auct., non L.

Annobón: entre Palè y el aeropuerto, *Carvalho* 3080 (BM, K, LISC, MA, WAG); Newton s.n. (LISU-165622); Ambo, Wrigley 39 (MA). Bioko: Mann 398 (K). Bioko Norte: Malabo–Bahía Venus, Mongola, *Carvalho* 3428 (BM, K, MA); Bahía Venus, *Guinea* 300 (MA), 303 (MA), 304 (MA). Litoral: rio Uele, cabo San Juan, *Guinea* 226 (MA), cabo San Juan, *Guinea* 878 (MA), 881–428 (MA), 882–427 (MA), 883–425 (MA), 884–426 (MA); Corisco, Pérez Viso 1919 (MA).

Previously reported from Annobón (Sobrinho, 1953: 183; Exell, 1956: 17; Exell, 1973a: 356; Fernández Casas, 1992: 60), Bioko (Oliver, 1871: 263, sub *C. bonducella*; Mildbraed, 1922: 184, sub *C. bonducella*; Exell, 1944: 165; Cufodontis, 1955: 223; Keay, 1958: 481; *Guinea*, 1968: 130, sub *C. crista*; Exell, 1973a: 356), Río Muni (Guinea, 1946: 295, sub *C. crista*) and from Equatorial Guinea (Guinea, 1946: 295, sub *C. crista*). Oliver (1871: 263) attributed this species to 'Roxb.', probably by misprint. This species is distributed worldwide and its status (natural or introduced) is uncertain. In Africa this species has been reported from Angola, Benin, Cameroon, D.R. Congo, Egypt, Ethiopia, Ghana, Guinea Bissau, Ivory Coast, Kenya, Liberia, Mozambique, Nigeria, Senegal, Sierra Leone, Somalia, South Africa, Tanzania and Togo (Lock, 1989: 20).

31. (*)*Caesalpinia pulcherrima* (L.) Sw.

Annobón: Ambo, Mission, *Melville* 233 (K). Bioko Norte: Malabo, *Guinea* 12 (MA), 15 (MA), 25 (MA), 27 (MA).

Previously reported from Annobón (Exell, 1963: 99; Exell, 1973a: 356), Bioko (Guinea, 1946: 296; Exell, 1973a: 356) and from Equatorial Guinea (Guinea, 1946: 296). This American species (Vidigal, 2002: 10) has been introduced in many African countries; it is reported from Angola, Central African Republic, D.R. Congo, Egypt, Ethiopia, Ghana, Ivory Coast, Kenya, Liberia, Malawi, Mali, Niger, Nigeria, Sierra Leone, Somalia, South Africa, Tanzania, Uganda and Zambia (Lock, 1989: 22).

CASSIA L.32. *Cassia mannii* Oliv.

Previously reported from Río Muni (Guinea, 1946: 154). We have not found any herbarium material of *C. mannii* from Equatorial Guinea in BM, BRLU, K, LISC, LISU, MA or WAG. This species is distributed in tropical Africa, and has also been reported from Cameroon, D.R. Congo, Gabon, Ivory Coast, Nigeria, São Tomé & Príncipe, Sudan and Uganda (Lock, 1989: 29). The distribution range of this species suggests it may occur in Equatorial Guinea.

CHAMAECRISTA MOENCH33. *Chamaecrista kirkii* (Oliv.) Standl.

Cassia kirkii Oliv.

Bioko Sur: Moka, plateau area, *Boughey* 83 (K); Moka, *Carvalho* 2403 (MA), *Carvalho* 2620 (MA). Centro Sur: Bata-Mitom, km 52, *Carvalho* 6398 (MA); P.N. Monte Alén, alrededores del lago Atok, *Pérez Viso* 14 (MA), P.N. Monte Alén, Moka-Engong, *Pérez Viso* 298 (MA), P.N. Monte Alén, Misergue, senda hacia el río Laña, *Pérez Viso* 1151 (MA), Niefang, Bindeng, pista hacia el río Uoro, *Pérez Viso* 2409 (MA), P.N. Monte Alén, *Pérez Viso* 3296 (MA), Mosumu, *Pérez Viso* 3476 (MA). Kie Ntem: Engokua, Ebebiyin, *Pérez Viso* 4352 (MA). Litoral: Bata-Bome, *Carvalho* 5103 (MA); río Uele, *Lope del Val* s.n. (MA-712032). Wele Nzás: Nsoc, Esumn, *Lope del Val* s.n. (MA-696925, MA-696926), Acurenam, *Lope del Val* s.n. (MA-712030). Unknown locality: *Lope del Val* s.n. (MA-712031).

Previously reported from Bioko (Keay, 1958: 452, sub *Cassia kirkii*; Exell, 1973a: 356, sub *C. kirkii*) and Río Muni (Parmentier et al., 2001: 346, sub *C. kirkii*). This species is distributed in tropical and subtropical Africa, it has been reported from Angola, Cameroon, D.R. Congo, Ethiopia, Gabon, Ghana, Guinea, Ivory Coast, Kenya, Liberia, Malawi, Nigeria, Sierra Leone, Tanzania, Togo, Uganda, Zambia and Zimbabwe (Lock, 1989: 31).

34. *Chamaecrista mimosoides* (L.) Greene

Cassia mimosoides L.

Litoral: Bata, Asonga, *Castelo & Juste* s.n. (MA-712105); Diádive, *Guinea* 196–748 (MA), Bata, *Guinea* 1056 (MA), 1058 (MA); río Uele, camino de Nkogosi, *Lope del Val* s.n. (MA-712052, MA-712053, MA-712054, MA-712055); Bome, *Pérez Viso* 1728 (MA); Ayamiken, Río Campo, *Pérez Viso* 2832 bis (MA). Río Muni: Neu-Kamerun, Alto Tuar, *Tessmann* 2688 (K).

Previously reported from Bioko (Mildbraed, 1922: 184, sub *Cassia mimosoides*; Exell, 1944: 166, sub *C. mimosoides*; Exell, 1973a: 356, sub *C. mimosoides*), Río Muni (Guinea, 1946: 295, sub *C. mimosoides*; Parmentier et al., 2001: 346, sub *C. mimosoides*) and Equatorial Guinea (Guinea, 1946: 295, sub *C. mimosoides*). This is a palaeotropical species (Vidigal, 2002: 39) and it has been reported from many African countries including Angola, Benin, Botswana, Burkina Faso, Burundi, Cameroon, Chad, D.R. Congo, Ethiopia, Gabon, Ghana, Guinea, Guinea Bissau, Ivory Coast, Kenya, Liberia, Malawi, Mali, Mauritania, Mozambique, Namibia, Niger, Nigeria, São Tomé & Príncipe, Senegal, Sierra Leone, Somalia, South Africa, Sudan, Swaziland, Tanzania, Gambia, Togo, Uganda, Zambia and Zimbabwe (Lock, 1989: 32).

COPAIFERA L.35. *Copaifera religiosa* J. Léonard

Centro Sur: P.N. Nsork, Obamicu, *Nguema*, *Esono* & *Lejoly* 243 (BRLU).

Not previously reported from Equatorial Guinea, although there is a report of the genus without a specific name from Río Muni (Guinea, 1946: 144). This Central African species has been reported from Cameroon and D.R. Congo (Lock, 1989: 47).

CRUDIA SCHREB.36. *Crudia gabonensis* Pierre ex Harms

Litoral: Bata-Niefang, km 35, en la zona de Adjape y Comaya, *Carvalho* 5829 (MA). Río Muni: *Tessmann* 248 (K).

Not previously reported from Equatorial Guinea. Distributed in West and Central Africa, this species has been reported from Cameroon, Gabon, Ghana and Ivory Coast (Lock, 1989: 47).

37. *Crudia klainei* Pierre ex De Wild.

Bioko: *Mann* 14 (K).

Previously reported from Bioko (Oliver, 1871: 312, sub *Crudia senegalensis* Planch. ex Benth.; Hutchinson, 1928: 337; Guinea, 1946: 293; Keay, 1958: 467; Exell, 1973a: 357). The specimen *Mann* 14 kept at K seems to be the voucher supporting Oliver's (1871: 312) record, because he explained that the *Flora of Tropical Africa* was based on the material deposited at

Kew. Distributed in West and Central Africa, this species has been reported from Cameroon, Gabon, Nigeria and Sierra Leone (Lock, 1989: 47).

(38). *Crudia senegalensis* Planch. ex Benth.

Previously reported from Bioko (Guinea, 1946: 294). We have not found any herbarium material of *C. senegalensis* from Equatorial Guinea in BM, BRLU, K, LISC, LISU, MA and WAG. This species is distributed in West and Central Africa, and it has been also reported from Cameroon, Gabon, Ghana, Guinea, Guinea Bissau, Ivory Coast, Liberia, Nigeria, Senegal and Sierra Leone (Lock, 1989: 48). The distribution range of this species suggests that it may occur in Equatorial Guinea.

CRYPTOSEPALUM BENTH.

39. *Cryptosepalum staudtii* Harms

Wele Nzas: Nkolentagan, *Tessmann* 307 (K).

Previously reported from Equatorial Guinea (Guinea, 1946: 295; Keay, 1958: 480). Distributed in West and Central Africa, this species has also been reported from Cameroon, Gabon and Nigeria (Lock, 1989: 10).

CYNOMETRA L.

40. *Cynometra mannii* Oliv.

Annobón: *Newton* s.n. (LISU-165620). Litoral: Bata-Bolondo, nas margens del río Boara, *Carvalho* 4759 (MA, WAG), Bata-Bolondo, km 16–17, *Carvalho* 5936 (MA); prairies du Baga, *Eneme* 338 (WAG); río Uele, *Guinea* 231–1012 (MA).

Previously reported from Annobón (Sobrinho, 1953: 183; Exell, 1956: 18) and from Río Muni (Guinea, 1946: 144). This species is distributed in West, Central and South-Central Africa, and has been reported from Angola, Cameroon, D.R. Congo, Nigeria and São Tomé & Príncipe (Lock, 1989: 49).

DANIELLIA BENN.

41. *Daniellia klainei* Pierre ex A.Chev.

Centro Sur: P.N. Monte Alén, transect du Monte Chocolate, *Lejoly* 95T/L3.14 (BRLU), 95T/160 (BRLU).

Previously reported from Río Muni (Guinea, 1946: 293; Senterre *et al.*, 2004: 503). Distributed in Central and South-Central Africa, this species has also been reported from Angola, Cameroon, D.R. Congo and Gabon (Lock, 1989: 51).

42. *Daniellia oblonga* Oliv.

Bioko: *Barter* 2074 (K).

Previously reported from Bioko (Oliver, 1871: 300–301; Hutchinson, 1928: 341, sub *Daniellia thurifera* Benn.; Guinea, 1946: 293; Keay, 1958: 463; Exell,

1973a: 357). Distributed in West and Central Africa, this species has also been reported from Cameroon and Nigeria (Lock, 1989: 51).

43. *Daniellia ogea* (Harms) Rolfe ex Holland Bioko: *Mann* 166 (K).

Previously reported from Bioko (Oliver, 1871: 300, sub *Daniellia thurifera* Benn.; Hutchinson, 1928: 341, sub *D. thurifera* Benn.; Keay, 1958: 463; Exell, 1973a: 357). Oliver (1871: 300–301) explained that the *Flora of Tropical Africa* was based on the material deposited at Kew; hence, this record is most probably based on *Mann* 166. This species is distributed in West and Central Africa, and it has been reported from Gabon, Ghana, Guinea Bissau, Ivory Coast, Liberia, Nigeria, Senegal and Sierra Leone (Lock, 1989: 51).

44. *Daniellia oliveri* (Rolfe) Hutch. & Dalziel Bioko Norte: Malabo–Sampaca, km 4–5, *Carvalho* 3789 (BM, K, MA, WAG).

Previously reported from Bioko (Fernández Casas, 1992: 60; Fernández Casas & Morales, 1995: 236). This tropical African species has been reported from Angola, Benin, Burkina Faso, Cameroon, Central African Republic, Chad, D.R. Congo, Ghana, Guinea, Guinea Bissau, Ivory Coast, Mali, Niger, Nigeria, Senegal, Sierra Leone, Sudan, Gambia, Togo and Uganda (Lock, 1989: 51).

DELONIX RAF.

45. (*)*Delonix regia* (Bojer ex Hook.) Raf.

Poinciana regia Bojer ex Hook.

Bioko Sur: cerca de Luba, en dirección a Batete, *Carvalho* & Fernández Casas 10269, *Regueiro* & Tellería (MA, WAG).

Previously reported from Bioko (Guinea, 1946: 295, sub *Poinciana regia*; Exell, 1973a: 357). Originally from Madagascar, this species has been introduced throughout the tropics. In Africa it has been reported from Angola, Burundi, Cameroon, Chad, Djibouti, D.R. Congo, Egypt, Ethiopia, Ghana, Guinea, Kenya, Libya, Mali, Mozambique, Niger, Somalia, South Africa, Tanzania, Togo, Uganda, Zambia and Zimbabwe (Lock, 1989: 23).

DETARIUM JUSS.

(46). *Detarium macrocarpum* Harms

Previously reported from Río Muni (Guinea, 1946: 144) and from Equatorial Guinea (Guinea, 1946: 293). We have not found any herbarium material of *D. macrocarpum* from Equatorial Guinea in BM, BRLU, K, LISC, LISU, MA and WAG. This species is distributed in West and Central Africa, and has been reported from Cameroon, Gabon and Nigeria (Lock, 1989: 52). The distribution range of this species suggests it may occur in Equatorial Guinea.

47. *Detarium microcarpum* Guill. & Perr.

Río Muni: Neu-Kamerun, Basuma Uham, *Tessmann 2501* (K).

Not previously reported from Equatorial Guinea. Distributed in tropical Africa, this species has been reported from Cameroon, Central African Republic, Chad, Ghana, Guinea, Guinea Bissau, Ivory Coast, Mali, Niger, Nigeria, Senegal, Sudan, Gambia and Togo (Lock, 1989: 52).

DIALIUM* L.*48. *Dialium bipindense* Harms**

Centro Sur: sud est du P.N. Monte Alén, au nord du rio Laña, près de la cabaña de Ecofac de Misergue, *Senterre & Obiang 3163* (BRLU).

Not previously reported from Equatorial Guinea. Distributed in West and Central Africa, this species has been reported from neighbouring Cameroon and Gabon (Lock, 1989: 33).

49. *Dialium dinklagei* Harms

Centro Sur: P.N. Monte Alén, près du village Monte Alén, *Senterre, Obiang & Esono 2841* (BRLU).

Not previously reported from Equatorial Guinea. This species is distributed in West and Central Africa and has been reported from Angola, Cameroon, D.R. Congo, Gabon, Ghana, Guinea, Ivory Coast, Liberia, Nigeria and Sierra Leone (Lock, 1989: 34).

50. *Dialium gossweileri* Baker f.

Río Muni: *Sabater Pi s.n.* (K).

Not previously reported from Equatorial Guinea. Distributed in Central and South-Central Africa, this species has also been reported from Angola, D.R. Congo and Gabon (Lock, 1989: 34).

51. *Dialium pachyphyllum* Harms

Wele Nzas: Nkolentangan, *Tessmann 43* (K).

Previously reported from Equatorial Guinea (Rojo, 1982: 199; Senterre, 2001: 1091; Senterre & Lejoly, 2001: 231). This species is distributed in West, Central and South-Central Africa, and has been also reported from Angola, Cameroon, D.R. Congo, Gabon and Nigeria (Lock, 1989: 35).

52. *Dialium tessmannii* Harms

Litoral: Campo region, *Tessmann 730* (K).

Previously reported from Equatorial Guinea (Guinea, 1946: 295). Distributed in West, Central and South-Central Africa, this species has also been reported from Angola, Cameroon, D.R. Congo and Gabon (Lock, 1989: 36). Aubréville (1970: 36) included *Tessmann 730* as collected in Cameroon. We ascribe this record to Equatorial Guinea because Río Campo territory belongs to Río Muni, near the Cameroon border.

53. *Dialium zenkeri* Harms

Centro Sur: nord du P.N. Monte Alén, transect Ecofac de Monte Chocolate, *Senterre & Ngomo 3451* (BRLU). Wele Nzas: Nkolentangan, *Tessmann 355* (K).

Previously reported from Equatorial Guinea (Rojo, 1982: 209). This species is distributed in West and Central Africa, and has been reported from Cameroon and D.R. Congo (Lock, 1989: 36).

DIDELOTIA* BAILL.*54. *Didelotia africana* Baill.**

Centro Sur: P.N. Monte Alén, Mosumo, du rio Laña et du Uele, *Lejoly 95T/181* (BRLU). Litoral: Elong–Long (près de Mbini), *Wilks 3511a* (BRLU).

Previously reported from Equatorial Guinea (Guinea, 1946: 294). This species is distributed in West and Central Africa, and has been reported from Cameroon, Gabon and Nigeria (Lock, 1989: 10).

55. *Didelotia brevipaniculata* J. Léonard

Centro Sur: P.N. Monte Alén, transect de Monte Chocolate, *Lejoly 95T/L3.1108* (BRLU).

Not previously reported from Equatorial Guinea. Distributed in West and Central Africa, this species has been reported from Cameroon, Gabon, Ivory Coast and Liberia (Lock, 1989: 10).

56. *Didelotia letouzeyi* Pellegr.

Litoral: sur Sofoge-Mbini, *Obama 882* (BRLU).

Not previously reported from Equatorial Guinea. This species has only been reported from neighbouring Cameroon and Gabon (Lock, 1989: 11).

57. *Didelotia unifoliolata* J. Léonard

Litoral: Nco, 5 km vers ENE, *Lejoly 165* (BRLU).

Not previously reported from Equatorial Guinea. Distributed in West and Central Africa, this species has been reported from Cameroon, D.R. Congo, Gabon, Ghana and Nigeria (Lock, 1989: 11).

DISTEMONANTHUS* BENTH.*58. *Distemonanthus benthamianus* Baill.**

Distemonanthus laxus Oliv.

Litoral: Corisco Bay, 1°N, *Mann 1844* (K).

Previously reported from Bioko (Guinea, 1946: 295; Exell, 1973a: 358), Río Muni (Oliver, 1871: 282, sub *Distemonanthus laxus*; Guinea, 1946: 141 and 144; Parmentier *et al.*, 2001: 363; Senterre & Lejoly, 2001: 231) and from Equatorial Guinea (Hutchinson, 1928: 336; Guinea, 1946: 295; Keay, 1958: 449). Distributed in West and Central Africa, this species has also been reported from Cameroon, Gabon, Ghana, Ivory Coast, Liberia, Nigeria, Sierra Leone and Togo (Lock, 1989: 36).

DUPARQUETIA* BAILL.*59. *Duparquetia orchidacea* Baill.**

Centro Sur: carretera Monte Bata–Río Campo, antigua trocha forestal, *Pérez Viso 2425* (MA), Bata–Niefang, carretera forestal km 40, *Pérez Viso 2718 bis*

(MA). Litoral: Bata–Ayamiken, estrada km 18–19, *Carvalho 4804* (MA, WAG); près de la frontière gabonaise, chantier forestier à l'est de Cogo, *McPherson 14028* (WAG). Wele Nzas: Alum, Mikomeseng–Nkue, *Pérez Viso 3044* (MA).

Not previously reported from Equatorial Guinea. Distributed in West, Central and South-Central Africa, this species has been reported from Angola, Cameroon, D.R. Congo, Gabon, Ghana, Ivory Coast, Liberia and Nigeria (Lock, 1989: 36).

ERYTHROPHLEUM AFZEL. EX R. BR.

60. *Erythrophleum ivorense* A. Chev.

Centro Sur: Evinayong, *Guinea* 68, 70, 210 (MA). Wele Nzas: Nkolentagan, *Tessmann 217a* (K). Río Muni: *Tessmann 1095* (K).

Previously reported from Río Muni (Senterre, 2001: 1093) and Equatorial Guinea (Keay, 1958: 484). Distributed in West and Central Africa, this species has also been reported from Cameroon, Gabon, Ghana, Guinea Bissau, Ivory Coast, Liberia, Nigeria and Sierra Leone (Lock, 1989: 24).

61. *Erythrophleum suaveolens* (Guill. & Perr.) Brenan

Erythrophleum guineense G. Don

Kie Ntem: Adyap, *Guinea* 837–191 (MA). Litoral: Bata–Pembe, km 133, margens do rio Otong Eyang, *Carvalho 4851* (MA, WAG).

Previously reported from Bioko (Exell, 1973a: 358, sub *Erythrophleum guineense*; Guinea, 1946: 291, sub *E. guineense*), from Río Muni (Guinea, 1946: 141, 144, sub *E. guineense*) and from Equatorial Guinea (Guinea, 1946: 291, sub *E. guineense*). This Palaeotropical species has also been reported from Cameroon, Central African Republic, Chad, D.R. Congo, Ghana, Guinea, Guinea Bissau, Ivory Coast, Kenya, Malawi, Mali, Mozambique, Nigeria, Senegal, Sierra Leone, Sudan, Tanzania, Gambia, Togo, Uganda, Zambia and Zimbabwe (Lock, 1989: 24).

EURYPETALUM HARMS

62. *Eurypetalum tessmannii* Harms

Litoral: Ndote Sud, *Lisowski M-570* (BRLU), Ndote Sud, environs de Etembue, *Lisowski M-1071* (BRLU).

Previously reported from Equatorial Guinea (Guinea, 1946: 293). This Central African species has been also reported from Gabon (Aubréville, 1968: 110).

GILBERTIODENDRON J. LÉONARD

(63). *Gilbertiodendron brachystegioides* (Harms)

J. Léonard

Macrolobium brachystegioides Harms

Previously reported from Equatorial Guinea (Guinea, 1946: 294, sub *Macrolobium brachystegioides*). We have not found any herbarium material of *G. brachystegioides* from Equatorial Guinea in BM, BRLU, K, LISC, LISU, MA and WAG. This species is distributed in West and Central Africa and has been also reported from Cameroon and Gabon (Lock, 1989: 12). The distribution range of this species suggests it may occur in Equatorial Guinea.

64. *Gilbertiodendron demonstrans* (Baill.) J. Léonard

Litoral: Río Campo, cerca de Bongoro, *Pérez Viso 2227* (MA).

Not previously reported from Equatorial Guinea. Distributed in West and Central Africa, this species has been reported from Cameroon, Gabon and Nigeria (Lock, 1989: 12).

65. *Gilbertiodendron dewevrei* (De Wild.) J. Léonard

Macrolobium dewevrei De Wild.

Litoral: Sendje pa Ogamnsok, *Lejoly 01/64* (BRLU); village Mayang, bord de la rivière du Mitong, *Lisowski M-812* (BRLU).

Previously reported from Equatorial Guinea (Guinea, 1946: 294, sub *Macrolobium dewevrei*). Distributed in West, Central and South-Central Africa, this species has also been reported from Angola, Cameroon, Central African Republic, Congo, D.R. Congo, Gabon and Nigeria (Lock, 1989: 12).

66. *Gilbertiodendron klainei* (Pierre ex Pellegr.) J. Léonard

Litoral: Bicubini, *Wilks 3565* (BRLU).

Not previously reported from Equatorial Guinea. This West and Central Africa species has been reported from neighbouring Cameroon and Gabon (Lock, 1989: 12).

67. *Gilbertiodendron ogoouense* (Pellegr.) J. Léonard

Centro Sur: Handje Engong, *Lejoly & Elad 98/209* (BRLU). Litoral: Sofoge (Ndote), *Wilks 3582* (BRLU).

Not previously reported from Equatorial Guinea. Distributed in West, Central and South-Central Africa, this species has been reported from Angola, Cameroon, Congo, D.R. Congo and Gabon (Lock, 1989: 13).

68. *Gilbertiodendron stipulaceum* (Benth.) J. Léonard

Berlinia stipulacea Benth.

Río Muni: Lat. 1°N, *Mann 1827* (K).

Previously reported from Río Muni (Guinea, 1946: 294, sub *Berlinia stipulacea*) and from Equatorial Guinea (Oliver, 1871: 296, sub *Berlinia stipulacea*). This species is distributed in Central Africa and has been also reported from D.R. Congo and Gabon (Lock, 1989: 13).

(69). *Gilbertiodendron straussianum* (Harms) J. Léonard

Macrolobium straussianum Harms

Previously reported from Equatorial Guinea (Guinea, 1946: 294, sub *Macrolobium straussianum*). We have not found any herbarium material of *G. straussianum* from Equatorial Guinea in BM, BRLU, K, LISC, LISU, MA and WAG. Record based on *Tessmann B 32*, possibly destroyed in B. We have studied an illustration deposited in BM.

GILLETIODENDRON VERMOESEN

(70). *Gilletiodendron escherichii* (Harms) J. Léonard

Macrolobium escherichii Harms

Previously reported from Río Muni (Harms, 1915: 458, sub *Macrolobium escherichii*). We have not found any herbarium material of *G. escherichii* from Equatorial Guinea in BM, BRLU, K, LISC, LISU, MA & WAG. According to Léonard (1951: 408), record supported only by *Escherich 3003*, possibly destroyed in B. We have studied an illustration deposited in BM.

(71). *Gilletiodendron pierreanum* (Harms) J. Léonard

Previously reported from Río Muni without any precise voucher (Senterre, 2001: 1091). We have not found any herbarium material of *G. pierreanum* from Equatorial Guinea in BM, BRLU, K, LISC, LISU, MA and WAG. This species from West and Central Africa has been reported from neighbouring Cameroon and Gabon (Lock, 1989: 53). The distribution range of this species suggests it may occur in Equatorial Guinea.

GRIFFONIA BAILL.

72. *Griffonia physocarpa* Baill.

Bandeiraea tenuiflora Benth.

Centro Sur: Bata–Niefang–Mogom, km 6, *Carvalho 5670* (MA). Litoral: Bata–Pembe, km 25–26, *Carvalho 4831* (MA, WAG), Bata–Niefang, km 35, Adjape, *Carvalho 5691* (MA).

Previously reported from Bioko (Oliver, 1871: 285, sub *Bandeiraea tenuiflora*; Hutchinson, 1928: 328, sub *B. tenuiflora*; Guinea, 1946: 295; Keay, 1958: 446; Exell, 1973a: 358) and from Río Muni (Guinea, 1946: 149). Distributed in West and Central Africa, this species has also been reported from Cameroon, D.R. Congo, Gabon and Nigeria (Lock, 1989: 43).

73. *Griffonia tessmannii* (De Wild.) Compère
Centro Sur: SO du P.N. Monte Alén, sur le transect Ecofac de Mosumo, Senterre & Ngomo 176 (BRLU).

Previously reported from Equatorial Guinea (Guinea, 1946: 295; Aubréville, 1968: 22). Distributed in Central Africa, this species has also been reported from D.R. Congo and Gabon (Lock, 1989: 44).

GUIBOURTIA BENN.

74. *Guibourtia demeusei* (Harms) J. Léonard
Copaifera demeusei Harms

Litoral: Monte Bata, 1 km du N de la route Bata–Niefang route au niveau de Santa Marta, Senterre & Obiang 4306 (BRLU).

Previously reported from Río Muni (Guinea, 1946: 144, sub *Copaifera demeusei*). Distributed in West and Central Africa, this species has also been reported from Cameroon, Central African Republic, Congo, D.R. Congo and Gabon (Lock, 1989: 53).

75. *Guibourtia ehie* (A. Chev.) J. Léonard

Litoral: Bata–Pembe, km 26–27, en margens de río Ué, *Carvalho 5183* (MA).

Not previously reported from Equatorial Guinea. This species is distributed in West and Central Africa, and has been reported from Cameroon, Gabon, Ghana, Ivory Coast, Liberia and Nigeria (Lock, 1989: 54).

76. *Guibourtia tessmannii* (Harms) J. Léonard
Copaifera tessmannii Harms

Centro Sur: Monte Alén, *Ngomo 955* (BRLU); P.N. Monte Alén, près de la cabaña Ecofac de Esamalan, Senterre, *Obiang & Ngomo 2122* (BRLU).

Previously reported from Equatorial Guinea (Guinea, 1946: 293, sub *Copaifera tessmannii*; Keay, 1958: 466). This West and Central African species has also been reported from neighbouring Cameroon and Gabon (Lock, 1989: 54).

HYLODENDRON TAUB.

77. *Hylodendron gabunense* Taub.

Centro Sur: P.N. Monte Alén, *Ngomo 257* (BRLU).

Previously reported from Río Muni (Guinea, 1946: 141 and 154; Senterre, 2001: 1091) and from Equatorial Guinea (Guinea, 1946: 294). Distributed in West and Central Africa, this species has also been reported from Cameroon, D.R. Congo, Gabon and Nigeria (Lock, 1989: 54).

HYMENOSTEGIA (BENTH.) HARMS

78. *Hymenostegia afzelii* (Oliv.) Harms

Hymenostegia dinklagei Harms

Bioko Norte: Malabo–Punta Hermosa, km 14–15, *Carvalho 4338* (MA). Litoral: Bata–zona de Bomodi, *Carvalho 5473* (MA, WAG).

Previously reported from Río Muni (Guinea, 1946: 292, sub *Hymenostegia dinklagei*). This species is distributed in West and Central Africa, and has been reported from Cameroon, Ghana, Guinea, Ivory Coast, Liberia, Nigeria, Sierra Leone and Togo (Lock, 1989: 55).

79. *Hymenostegia felicis* (A. Chev.) J. Léonard

Centro Sur: P.N. Monte Alén, transect de Nkumenkie, *Lejoly 95T/L4.44* (BRLU); SE du P.N. Monte Alén,

près du transect Ecofac de Nkumekie, Senterre & Obiang 3579 (BRLU).

Not previously reported from Equatorial Guinea. This species has also been reported from neighbouring Cameroon (Lock, 1989: 55).

80. *Hymenostegia floribunda* (Benth.) Harms
Cynometra floribunda Benth.

Centro Sur: transect de Nkumekie, Desmet, R. Nguema & N. Nguema 118 (BRLU). Monts de Cristal, 15 km NE d'Okuamkas, Wilks 1820 (WAG). Río Muni: Lat. 1°N, Mann 1719 (K).

Previously reported from Río Muni (Oliver, 1871: 318, sub *Cynometra floribunda*; Guinea, 1946: 292; Léonard, 1951: 441). This Central African species has also been reported from D.R. Congo and Gabon (Lock, 1989: 55).

81. *Hymenostegia normandii* Pellegr.

Centro Sur: transect Monte Alén, Desmet, R. Nguema & N. Nguema 207 (BRLU); Mbini, P.N. Monte Alén, Lejoly 93/380 (BRLU), P.N. Monte Alén, Lejoly 95T/L2.75 (BRLU).

Not previously reported from Equatorial Guinea. This Central African species has been reported from neighbouring Gabon (Lock, 1989: 56).

82. *Hymenostegia pellegrinii* (A. Chev.) J. Léonard

Centro Sur: inselberg de Akoak Ebanga, village de Ngong Mocomo, à 10 km de Nsork, Parmentier & Esono 3523 (BRLU).

Not previously reported from Equatorial Guinea. Distributed in Central Africa, this species has been reported from neighbouring Gabon (Lock, 1989: 56).

ISOMACROLOBIUM AUBRÉV. & PELLEGR.

83. *Isomacrolobium conchyliophorum* (Pellegr.)
Aubrév. & Pellegr.

Litoral: Bata–Bome, Carvalho 6046 (MA).

Not previously reported from Equatorial Guinea. This Central African species has been also reported from Gabon (Aubréville, 1968: 190).

(84). *Isomacrolobium graciliflorum* (Harms)
Aubrév. & Pellegr.

Macrolobium graciliflorum Harms

This species has been reported previously from Equatorial Guinea (Guinea, 1946: 294, sub *Macrolobium graciliflorum*; Aubréville, 1970: 181). We have not found any herbarium material of *I. graciliflorum* from Equatorial Guinea in BM, BRLU, K, LISC, LISU, MA and WAG. The type specimen of this name is Tessmann B. 57, from Equatorial Guinea. This species is distributed in West and Central Africa, and has also been reported from Cameroon and D.R. Congo (Lock, 1989: 2).

85. *Isomacrolobium isopetalum* (Harms) Aubrév. & Pellegr.

Wele Nzás: Ebo–Ngoo Nsomo, Añisok–Mongola–

Niefang, Pérez Viso 3197 (MA).

Not previously reported from Equatorial Guinea. This West and Central African species has been reported from neighbouring Cameroon and Gabon (Aubréville, 1970: 184).

JULBERNARDIA PELLEGR.

86. *Julbernardia letouzeyi* Villiers

Centro Sur: Bicurga, Lejoly 99/503 (BRLU); inselberg de Bicurga, Parmentier 1674 (BRLU); inselberg de Akoak Ebonga, 1 h du village de Ngong Mocomo, Parmentier & Esono 3499 (BRLU).

Not previously reported from Equatorial Guinea. This West and Central African species has been reported from neighbouring Cameroon (Lock, 1989: 15).

87. *Julbernardia pellegriniana* Troupin

Litoral: Río Campo region, 5 km west of Anguma, chantier forestière ABM, Issembe 16 (WAG).

Not previously reported from Equatorial Guinea. Distributed in West and Central Africa, this species has been reported from Cameroon, D.R. Congo and Gabon (Lock, 1989: 15).

88. *Julbernardia seretii* (De Wild.) Troupin

Centro Sur: Monte Alén, Moka, Wilks 3525 (WAG). Wele Nzás: inselberg de Piedra Nzás, 9 km from Aconibe, Parmentier & Nguema 19 (BRLU).

Not previously reported from Equatorial Guinea. This species is distributed in West and Central Africa, and has been reported from Angola, Cameroon, D.R. Congo, Gabon and Nigeria (Lock, 1989: 16).

LEONARDOXA AUBRÉV.

89. *Leonardoza africana* ssp. *gracilicaulis* McKey
Schotia africana (Baill.) Keay
Schotia humboldtioides Oliv.

Centro Sur: P.N. Monte Alén, senda hacia lago Atok, Pérez Viso 1311 (MA). Litoral: Corisco, playa al SW de la isla, Pérez Viso 1983 (MA). Wele Nzás: Nkolentagan, Tessmann 284 (K).

Previously reported from Río Muni (Guinea, 1946: 144, sub *Schotia humboldtioides*; McKey, 2000: 103) and from Equatorial Guinea [Guinea, 1946: 293, sub *S. humboldtioides*; Keay (1958: 459) reported *S. africana* without any precise voucher. McKey (2000: 100) recorded the subspecies '*africana*' on the Cameroon coast near Río Muni border]. This West and Central African taxa has also been reported from Cameroon, Congo and Gabon (McKey, 2000: 103).

LIBREVILLEA HOYLE

90. *Librevillea klainei* (Pierre ex Harms) Hoyle

Brachystegia klainei Pierre ex Harms

Litoral: Bata–Mbini, estrada km 24 en el poblado de Anguok, en dirección a la antigua explotación forestal

de Exfosa, *Carvalho* 6366 (MA); distrito de Mbini, de 5 a 7 km al W del patio Sofoge, *Nguema & Obiang* 11 (WAG), 12 (WAG); Etembue, espigón (réserve de Ndote), *Obama & Lejoly* 606 (MA).

Previously reported from Equatorial Guinea (Guinea, 1946: 294, sub *Brachystegia klainei*). Distributed in West, Central and South-Central Africa, this species has also been reported from Angola, Cameroon and Gabon (Lock, 1989: 57).

NEOCHEVALIERODENDRON J. LÉONARD

91. *Neochevalierodendron stephani* (A. Chev.) J. Léonard

Litoral: Bata–Bome, entre río Boara, km 10 de estrada madeireira con Mbini, *Carvalho* 4869 (MA, WAG).

Not previously reported from Equatorial Guinea. This Central African species has been reported from Gabon (Lock, 1989: 57).

ODDONIODENDRON DE WILD.

(92). *Odoniodendron micranthum* (Harms) Baker f.

Centro Sur: Monte Alén, *Senterre & Ngomo* 3545 (BRLU: not seen).

Previously reported from Río Muni (Ngok Banak & Breteler, 2004: 248). This Central African species has been also reported from Cameroon and Gabon (Ngok Banak & Breteler, 2004: 247–248).

PACHYELASMA HARMS

(93). *Pachyelasma tessmannii* (Harms) Harms

Previously reported from Equatorial Guinea (Guinea, 1946: 295; Keay, 1958: 484). We have not found any herbarium material of *P. tessmannii* from Equatorial Guinea in BM, BRLU, K, LISC, LISU, MA and WAG. According to Aubréville (1970: 322) the type specimen of this species is *Tessmann* 819, from Equatorial Guinea. This West and Central Africa species has also been reported from Cameroon, D.R. Congo, Gabon and Nigeria (Lock, 1989: 25).

PELLEGRINIODENDRON J. LÉONARD

94. *Pellegriniodendron diphylum* (Harms) J. Léonard

Centro Sur: P.N. Monte Alén, Mosumo, confluence du río Laña et Uele, *Lejoly* 95/178 (BRLU); P.N. Monte Alén, cataratas río Laña, Mosumo, *Pérez Viso* 1612 (MA). Litoral: Bata–Bicomo, sobre el río Ecucu, *Carvalho* 4985 (MA, WAG); Ndote Sud, près du village de Etembue, *Lisowski* M-519 (BRLU); 2 km north-east of Elendé, Cocoloondo riverside, *Wieringa & Haegens* 2265 (WAG).

Not previously reported from Equatorial Guinea. Distributed in West and Central Africa, this species has been reported from Cameroon, Gabon, Ghana and Ivory Coast (Lock, 1989: 19).

PELTOPHORUM (VOGEL) WALP.

95. (*) *Peltophorum pterocarpum* (DC.) K. Heyne *Peltophorum ferrugineum* (Decne.) Benth.

Bioko Norte: Malabo–Luba, km 11, *Carvalho* 2041 (MA); Malabo–Cupapa, km 10–11, *Carvalho* 3409 (BM, MA); cerca de Sampaca, finca Magdalena Mora, *Carvalho, Fernández Casas* 10445, *Regueiro & Tellería* (BM, LISC, MA, WAG).

Previously reported from Bioko (Guinea, 1946: 296, sub *Peltophorum ferrugineum*; Exell, 1973a: 359). Originally from Asia this species has been introduced in several African countries, reported from Burundi, D.R. Congo, Ghana, Guinea, Kenya, Liberia, Mozambique, Nigeria, Sierra Leone, South Africa, Sudan, Tanzania, Gambia, Togo and Uganda (Lock, 1989: 26).

PILOSTIGMA HOCHST.

(96). *Piliostigma reticulatum* (DC.) Hochst.

Bauhinia reticulata DC.

Previously reported from Bioko (Guinea, 1946: 295, sub *Bauhinia reticulata*; Exell, 1973a: 359) and from Equatorial Guinea (Guinea, 1946: 295, sub *B. reticulata*). We have not found any herbarium material of *P. reticulatum* from Equatorial Guinea in BM, BRLU, K, LISC, LISU, MA and WAG. This tropical Africa species has been reported from Burkina Faso, Cameroon, Central African Republic, Chad, Ethiopia, Ghana, Ivory Coast, Mali, Niger, Nigeria, Senegal and Sudan (Lock, 1989: 46). The distribution range of this species suggests it may occur in Equatorial Guinea.

97. *Piliostigma thonningii* (Schumach.) Milne-Redh.

Bioko Norte: servicio agronómico de Malabo, *Guinea* 10 (MA), 8–10 (MA).

Not previously reported from Equatorial Guinea. This Palaeotropical species has been reported from many African countries, including Angola, Benin, Botswana, Burkina Faso, Cameroon, Chad, D.R. Congo, Ethiopia, Gabon, Ghana, Guinea, Guinea Bissau, Ivory Coast, Kenya, Malawi, Mali, Mozambique, Namibia, Niger, Nigeria, Senegal, Sierra Leone, South Africa, Sudan, Tanzania, The Gambia, Togo, Uganda, Zambia and Zimbabwe (Lock, 1989: 44).

PLAGIOSIPHON HARMS

98. *Plagiosiphon emarginatus* (Hutch. & Dalziel) J. Léonard

Litoral: Bata–Bicomo, margens del río Ecucu, *Carvalho* 5208 (MA), *Carvalho* 5457 (MA), Bata–Sendje, antigua explotación forestal de Exfosa, *Carvalho* 6094 (MA).

Not previously reported from Equatorial Guinea. This species is distributed in West and Central Africa, and has been reported from Cameroon, Gabon, Ivory Coast, Liberia and Sierra Leone (Lock, 1989: 58).

99. ***Plagiosiphon gabonensis*** (A. Chev.) J. Léonard
Centro Sur: SO du P.N. Monte Alén, 2 km du site de traversé du rio Uele, *Senterre & Nguema* 3031 (BRLU); P.N. Monte Alén, entre le transect dit Monte Alén et la cabaña Bang, *Senterre & Obiang* 2560 (BRLU).

Not previously reported from Equatorial Guinea. This West and Central African species has been reported from neighbouring Cameroon and Gabon (Lock, 1989: 58).

100. ***Plagiosiphon longitubus*** (Harms) J. Léonard
Centro Sur: Monts du Cristal, 10 km NE d'Okuamkas, *Wilks* 1802 (WAG).

Not previously reported from Equatorial Guinea. This West and Central African species has also been reported from Cameroon (Lock, 1989: 58).

101. ***Plagiosiphon multijugus*** (Harms) J. Léonard
Centro Sur: P.N. Monte Alén, confluence Laña et Uele, *Lejoly* 95/179 (BRLU).

Not previously reported from Equatorial Guinea. Distributed in West and Central Africa, this species has been reported from neighbouring Cameroon and Gabon (Lock, 1989: 58).

PRIORIA GRISEB.

102. ***Prioria buchholzii*** (Harms) Breteler
Wele Nzas: Nkoletangan, *Tessmann* 105 (K).

Previously reported from Río Muni (Breteler, 1999: 26–28). Distributed in West, Central and South-Central Africa, this species has also been reported from Angola, Cameroon, Congo and Gabon (Breteler, 1999: 26–28).

103. ***Prioria joveri*** (Normand ex Aubrév.) Breteler
Gossweilerodendron joveri Normand ex Aubrév.

Centro Sur: P.N. Monte Alén, transect de Monte Chocolate, *Lejoly* 95/170bis (BRLU); Monte Alén, *Lisowski* M-347 (BRLU); SO du P.N. Monte Alén, transect Ecofach de Mosumo, *Senterre & Ngomo* 911 (BRLU).

Previously reported from Río Muni (Aubréville, 1968: 150, sub *Gossweilerodendron joveri*; Breteler, 1999: 32–33; Senterre *et al.*, 2004: 503, sub *G. joveri*). Distributed in Central Africa, this species has also been reported from Cameroon and Gabon (Breteler, 1999: 32–33).

104. ***Prioria mannii*** (Baill.) Breteler
Eriander engleri H. Winkler
Oxystigma mannii (Baill.) Harms

Litoral: Kongui river, *Mann* 1822 (K).

Previously reported from Río Muni (Guinea, 1946: 148, 156, sub *Eriander engleri*, 154, sub *Oxystigma mannii*; (Breteler, 1999: 35) and from Equatorial Guinea (Hutchinson, 1928: 336, sub *O. mannii*; Keay, 1958: 466, sub *O. mannii*; Guinea, 1946: 293, sub *O. mannii*). Distributed in West and Central Africa, this species has also been reported from Cameroon, Gabon and Nigeria (Breteler, 1999: 34–35).

SCORODOPHLOEUS HARMS

105. ***Scorodophloeus zenkeri*** Harms

Centro Sur: P.N. Monte Alén, transect de Monte Chocolate, *Lejoly* 95/173T19 (BRLU). Río Muni: Eman-Ngos, *Obama* 814 (BRLU).

Previously reported from Bioko (Guinea, 1946: 292; Exell, 1973a: 360) and from Río Muni (Guinea, 1946: 142, 144, 292). This West, Central and South-Central African species has also been reported from Angola, Cameroon, D.R. Congo and Gabon (Lock, 1989: 59).

SENNA MILL.

106. (*)***Senna alata*** (L.) Roxb.

Cassia alata L.

Bioko Norte: Malabo, *Guinea* 128 (MA), servicio agronómico de Malabo, *Guinea* 124 (MA), 126 (MA). Kie Ntem: Engokua, Ebebiyin, *Pérez Viso* 4350 (MA).

Previously reported from Bioko (Guinea, 1946: 295, sub *Cassia alata*; Exell, 1973a: 356, sub *C. alata*) and from Equatorial Guinea (Guinea, 1946: 295, sub *C. alata*). Originally from America this species has been introduced throughout the tropics. It has been also reported from Burundi, Cameroon, Chad, D.R. Congo, Gabon, Ghana, Guinea, Ivory Coast, Kenya, Liberia, Malawi, Mali, Nigeria, Senegal, Sierra Leone and Tanzania (Lock, 1989: 36).

107. (*)***Senna hirsuta*** (L.) H.S. Irwin & Barneby
Centro Sur: Niefang, Bindeng, *Pérez Viso* 2367 (MA), Bindung, km 17 de la carretera de Niefang, *Pérez Viso* 3790 (MA). Litoral: Bata–Niefang km 61, zona de Abang, *Carvalho* 5705 (MA, WAG).

Not previously reported from Equatorial Guinea. Originally from America, this species has been introduced throughout the tropics. It has also been reported from Burundi, Cameroon, Central African Republic, D.R. Congo, Gabon, Chana, Guinea, Ivory Coast, Kenya, Liberia, Malawi, Mali, Nigeria, South Africa, Tanzania, Togo, Uganda and Zimbabwe (Lock, 1989: 37).

108. (*)***Senna obtusifolia*** (L.) H.S. Irwin & Barneby
Cassia obtusifolia L.

Annobón: path between St. Juan Cappelle and San Pedro, *Wrigley* 230A (BM, MA). Bioko: Punta Fernanda, *Lope del Val* s.n. (MA-710953). Bioko Norte:

Malabo, *Guinea* 56 (MA), servicio agronómico de Malabo, *Guinea* 67, 65, 68b, 70b (MA). Centro Sur: Niefang, Bindeng, alrededores de las instalaciones de Matroguisa, *Pérez Viso* 2368 (MA). Litoral: Río Campo region, *Tessmann* 694 (K). Wele Nzas: Nkoletangan, *Tessmann* 324 (K).

Previously reported from Annobón (Exell, 1973a: 356, sub *Cassia obtusifolia*; Exell 1963: 99, sub *C. obtusifolia*) and from Bioko (Exell, 1973a: 356, sub *C. obtusifolia*). Originally from America, this species has been introduced throughout the tropical and subtropical regions of the world; it has also been reported from Angola, Benin, Burkina Faso, Burundi, Cameroon, Central African Republic, Chad, D.R. Congo, Ethiopia, Gabon, Ghana, Guinea, Guiana Bissau, Ivory Coast, Kenya, Liberia, Libya, Malawi, Mali, Mauritania, Mozambique, Namibia, Niger, Nigeria, São Tomé & Príncipe, Senegal, Sierra Leone, Somalia, South Africa, Sudan, Tanzania, Gambia, Togo, Uganda, Zambia and Zimbabwe (Lock, 1989: 38).

109. (*)***Senna occidentalis*** (L.) Link

Cassia occidentalis L.

Annobón: path between St. Juan Cappelle and San Pedro, *Wrigley* 230 (K, MA). Bioko Norte: Malabo-Baney, estrada km 5–6, *Carvalho* 4335 (MA), Malabo-Bahía Venus, *Carvalho* 4343 (MA); carretera al pico Basilé, *Fernández Casas* 11993 (MA); Sampaca, *Lope del Val* s.n. (MA-696927, MA-389591, MA-712057). Bioko Sur: Riaba-Luba-Malabo, cruzamento para Moka, *Carvalho* 2669 (MA). Litoral: Bata, Asonga, *Castelo, Cabeza & Juste* s.n. (MA-319751), Bata-Movo, Miboman, km 27 *Castelo, Cabeza & Juste* s.n. (MA-319728). Wele Nzas: Akok, carretera Acurenam-Aconibe, *Pérez Viso* 2041 (MA), 2401 (MA); Nkoletangan, *Tessmann* 187 (K).

Previously reported from Annobón (Exell, 1973a: 357, sub *Cassia occidentalis*), Bioko (Guinea, 1946: 128 h, 295, sub *C. occidentalis*; Keay, 1958: 455, sub *C. occidentalis*; Exell, 1973a: 357, sub *C. occidentalis*) and from Equatorial Guinea (Guinea, 1946: 295, sub *C. occidentalis*). Originally from America this species has been introduced throughout the tropical and subtropical regions of the world. It has been also reported from Angola, Burundi, Cameroon, Central African Republic, Chad, Djibouti, D.R. Congo, Ethiopia, Gabon, Ghana, Guinea, Ivory Coast, Kenya, Liberia, Libya, Mali, Mozambique, Namibia, Niger, Nigeria, Rwanda, Senegal, Sierra Leone, South Africa, Sudan, Swaziland, Tanzania, Togo, Uganda and Zambia (Lock, 1989: 38).

110. ***Senna podocarpa*** (Guill. & Perr.) Lock

Cassia podocarpa Guill. & Perr.

Bioko: *Mann* s.n. (K), *Mann* 638 (K).

Previously reported from Bioko (Oliver, 1871: 276, sub *Cassia podocarpa*; Mildbraed, 1922: 184, sub *C. podocarpa*; Hutchinson, 1928: 335, sub

C. podocarpa; Guinea, 1946: 295, sub *C. podocarpa*; Exell, 1944: 166, sub *C. podocarpa*; Keay, 1958: 452–453, sub *C. podocarpa*; Exell, 1973a: 357, sub *C. podocarpa*). Distributed in West and Central Africa, this species has also been reported from Burkina Faso, Ghana, Guinea, Guinea Bissau, Ivory Coast, Liberia, Mali, Nigeria, Senegal, Sierra Leone, Gambia and Togo (Lock, 1989: 39).

111. (*)***Senna septemtrionalis*** (Viv) H.S. Irwin & Barneby

Cassia laevigata Willd.

Bioko: *Mann* 1168 (K); *Vogel* 200 (K). Wele Nzas: Bimvile, *Guinea* 182 (MA), 184 (MA), 185–209 (MA); Acasakira, 3 km au sud de Nsork, *Obama & Lejoly* 560 (BRLU).

Previously reported from Annobón (Exell, 1973a: 356, sub *Cassia laevigata*), Bioko (Oliver, 1871: 275, sub *C. laevigata*; Mildbraed, 1922: 184, sub *C. laevigata*; Hutchinson, 1928: 335, sub *C. laevigata*; Guinea, 1946: 295, sub *C. laevigata*; Keay, 1958: 453, sub *C. laevigata*; Exell, 1973a: 356, sub *C. laevigata*). Originally from America, this species has been introduced throughout the tropical regions of the world. In Africa this species has been reported from Burundi, Cameroon, D.R. Congo, Ethiopia, Ghana, Kenya, Malawi, Mozambique, Nigeria, Rwanda, Sierra Leone, South Africa, Swaziland, Tanzania, Uganda, Zambia and Zimbabwe (Lock, 1989: 39).

112. (*)***Senna sophera*** (L.) Roxb.

Cassia sophera L.

Bioko: *Mann* 69 (K); *Vogel* 211 (K).

Previously reported from Bioko (Oliver, 1871: 274, sub *Cassia sophera*; Mildbraed, 1922: 184, sub *C. sophera*; Hutchinson, 1928: 335, sub *C. sophera*; Guinea, 1946: 295, sub *C. sophera*; Cufodontis, 1955: 220, sub *C. sophera*; Keay, 1958: 455, sub *C. sophera*; Exell, 1973a: 357, sub *C. sophera*). Originally from America (Irwin & Barneby, 1982: 440–443) this species has been introduced in many African countries, including Benin, D.R. Congo, Ethiopia, Ghana, Ivory Coast, Kenya, Liberia, Nigeria, Sierra Leone, Somalia, South Africa and Tanzania (Lock, 1989: 40).

113. (*)***Senna spectabilis*** (DC.) H.S. Irwin & Barneby

Bioko Sur: Luba-Veiga and Avendaño, en el límite entre Batete y Luba, *Fernández Casas* 12032 (MA); entre Luba y Moka, cerca de Musola, *Carvalho, Fernández Casas* 10446, *Regueiro & Tellería* (MA).

Not previously reported from Equatorial Guinea. Originally from America, this species has been introduced throughout the tropics; it has also been reported from Angola, Burundi, Cameroon, Central African Republic, Chad, D.R. Congo, Kenya, Malawi, Nigeria, South Africa, Tanzania, Togo, Uganda, Zambia and Zimbabwe (Lock, 1989: 40).

SINDORA MIQ.

114. ***Sindora klaineana*** Pierr. ex Pellegr.
Litoral: Bata–Bome, *Carvalho* 5197 (MA, WAG).
Not previously reported from Equatorial Guinea.
Distributed in Central Africa, this species has been
reported from Gabon (Lock, 1989: 59).

SINDOROPSIS J. LÉONARD

115. ***Sindoropsis le-testui*** (Pellegr.) J. Léonard
Litoral: distrito de Mbini, de 5 a 7 km aprox. a W del
patio Sofoge, *Nguema & Obiang* 13 (WAG).

Previously reported from Río Muni (Senterre, 2001:
1091; Senterre & Lejoly, 2001: 231; Senterre *et al.*,
2004: 503). This species distributed in Central Africa
has been reported from Gabon (Lock, 1989: 59).

STACHYOTHYRSUS HARMS

116. ***Stachyothrysus staudtii*** Harms
Wele Nzas: P.N. Nsork, Obamicu, *Nguema, Esono & Lejoly* 247 (BRLU); Nkoletangan, *Tessmann* 270 (K).

Previously reported from Río Muni (Guinea, 1946:
144; Parmentier *et al.*, 2001: 342; Senterre, 2001:
1091; Senterre & Lejoly, 2001: 231; Senterre *et al.*,
2004: 503) and from Equatorial Guinea (Guinea, 1946:
295; Léonard & Voorhoeve, 1964: 422). Distributed in
West and Central Africa, this species has also been
reported from Cameroon, D.R. Congo and Gabon
(Lock, 1989: 26).

STEMONOCOLEUS HARMS

117. ***Stemonocoleus micranthus*** Harms
Bioko Norte: Malabo–Luba, km 21, praia de Abá,
Carvalho 2172 (K, MA).

Previously reported from Río Muni (Guinea, 1946:
144). Monospecific genus which is distributed in West
and Central Africa, and has been reported from Camer-
oon, Central African Republic, Gabon, Ghana, Ivory
Coast and Nigeria (Lock, 1989: 60).

TAMARINDUS L.

118. ***Tamarindus indica*** L.
Annobón: Palé, alrededores de Faro, *Carvalho* 3067
(BM, K, MA); near Ambo, *Wrigley* 255 (K, MA). Bioko
Norte: Malabo, *Guinea* 1170 (MA).

Previously reported from Annobón (Exell, 1973a:
360; Fernández Casas, 1992: 60), Bioko (Guinea, 1946:
293; Exell, 1973a: 360) and from Río Muni (Mildbraed,
1922: 161; Exell, 1944: 168). Pantropical species, intro-
duced throughout the tropics. In Africa it has been
reported from Angola, Benin, Burkina Faso, Burundi,
Cameroon, Cape Verde Islands, Central African
Republic, Chad, Djibouti, D. R. Congo, Egypt, Ethiopia,
Ghana, Guinea, Guinea Bissau, Ivory Coast,

Liberia, Libya, Malawi, Mali, Mozambique, Niger,
Nigeria, Senegal, Sierra Leone, Somalia, South Africa,
Sudan, Tanzania, Togo, Uganda, Zambia and Zimba-
bwe (Lock, 1989: 19).

TESSMANNIA HARMS

119. ***Tessmannia africana*** Harms
Wele Nzas: Nkoletangan, *Tessmann* 377 (K).

Previously reported from Equatorial Guinea
(Guinea, 1946: 293; Keay, 1958: 455). Distributed in
West and Central Africa, this species has also been
reported from Cameroon, Central African Republic,
Congo, D.R. Congo and Gabon (Lock, 1989: 60).

120. ***Tessmannia anomala*** (Micheli) Harms
Centro Sur: P.N. Monte Alén, *Lejoly* 95T/L2.128
(BRLU).

Not previously reported from Equatorial Guinea.
This West and Central African species has been
reported from Cameroon, D.R. Congo and Gabon
(Lock, 1989: 60).

TETRABERLINIA (HARMS) HAUMAN

121. ***Tetraberlinia bifoliolata*** (Harms) Hauman
Julbernardia bifoliolata (Harms) Troupin

Litoral: Bata–Bolondo, km 15, arredores de Macomo,
Carvalho 4750 (MA), Bata–Sendje, km 15, cerca de la
población de Enigayong, *Carvalho* 6316 (MA), Bata–
Sendje, km 27, hacia la zona forestal de IBOGA, *Car-
valho* 6396 (MA); près de la frontière gabonaise, chan-
tier forestier a l'est de Cogo, *McPherson* 14014 (WAG);
Nco, 20 km NE vers la rivière Mitong, *Nguema &
Lejoly* 152 (MA).

Previously reported from Río Muni (Wieringa, 1999:
265; Senterre *et al.*, 2004: 503) and from Equatorial
Guinea (Troupin, 1950: 320, sub *Julbernardia bifoli-
olata*). Distributed in Central and South-Central
Africa, this species has also been reported from
Angola, Cameroon, Congo and Gabon (Wieringa, 1999:
264–267).

122. ***Tetraberlinia longiracemosa*** (A. Chev.)
Wieringa

Litoral: Bata–Sendje, km 22, *Carvalho* 5714 (MA).

Not previously reported from Equatorial Guinea.
This Central African species has been reported from
Gabon (Wieringa, 1999: 276).

123. ***Tetraberlinia moreliana*** Aubrév.

Litoral: Mayang, rivière du Mitong, *Lisowski* M-849
(BRLU). Centro Sur: P.N. Monte Alén, 11 km à l'Est de
la cabaña de Mosumo, *Senterre & Obiang* 4106
(BRLU).

Not previously reported from Equatorial Guinea.
This Central African species has been reported from
Cameroon, Congo and Gabon (Wieringa, 1999: 281–
282).

ZENKERELLA TAUB.(124). ***Zenkerella citrina*** Taub.*Cynometra leptoclada* Harms*Cynometra pauciflora* (Harms) Harms*Zenkerella pauciflora* Harms

Previously reported from Bioko (Mildbraed, 1922: 184, sub *Cynometra leptoclada*; Hutchinson, 1928: 331, sub *C. leptoclada*; Guinea, 1946: 292, sub *C. leptoclada* and sub *C. pauciflora*; Keay, 1958: 458; Exell, 1973a: 361, sub *Zenkerella pauciflora*). We have not found any herbarium material of *Z. citrina* from Equatorial Guinea in BM, BRLU, K, LISC, LISU, MA and WAG. *Mildbraed* 6346, type of *C. leptoclada* and originally kept at B, was collected in Bioko, but unfortunately destroyed during World War II (Léonard, 1951: 412). This species is distributed in West and Central Africa and has been reported from Cameroon, Gabon and Nigeria (Lock, 1989: 61).

DOUBTFUL RECORDS

Bauhinia glauca (Benth.) Benth. ssp. *tenuiflora* (Watt ex C.B. Clarke) K. Larsen & S. S. Larsen

This species has been previously reported from Bioko (Guinea, 1946: 295, sub *Bauhinia tenuiflora*; Exell, 1973a: 356, sub *B. tenuiflora*) and Equatorial Guinea (Guinea, 1946: 295, sub *B. tenuiflora*). We have not found any herbarium material of *B. glauca* ssp. *tenuiflora* from Equatorial Guinea in BM, BRLU, K, LISC, LISU, MA and WAG. This species is originally from Asia, and not previously reported from other African country. Hence, its presence in Equatorial Guinea seems unlikely.

Dialium guineense Willd.

Previously reported from Bioko (Exell, 1973a: 358), Río Muni (Guinea, 1946: 144) and from Equatorial Guinea (Guinea, 1946: 295). Exell's record refers to previous works and Guinea did not report any specimen. We have not found any herbarium material of *D. guineense* from Equatorial Guinea in BM, BRLU, K, LISC, LISU, MA and WAG. This species has been reported from other African countries including neighbouring São Tomé & Príncipe (Lock, 1989: 34), but at least one specimen reported by Exell is from cultivated fields. Aubréville (1970: 34) suggested that the distribution range of this species falls over tropical Africa north of Cameroon. Hence its presence in Equatorial Guinea seems unlikely.

Didelotia engleri Dinkl. & Harms

Previously reported from Equatorial Guinea (Guinea, 1946: 295). We have not found any herbarium material of *D. engleri* from Equatorial Guinea in BM, BRLU, K, LISC, LISU, MA and WAG. This species only has been reported from Liberia (Lock, 1989: 10). The distribution range of the species makes its presence in Equatorial Guinea unlikely.

Griffonia tenuiflora Benth.

This species has been reported from Río Muni (Guinea, 1946: 155) and from Equatorial Guinea (Guinea, 1946: 295, sub *Griffonia tenuiflora* var. *valentina* De Wild.). We have not found any reference to this species in the literature or through the IPNI search web page (http://www.ipni.org/ipni/query_ipni.html). We also have not found any herbarium material of *G. tenuiflora* from Equatorial Guinea in BM, BRLU, K, LISC, LISU, MA and WAG supporting this record. This could be a misprint by Guinea (1946). Until material or references become available, we have to place this report as a doubtful species.

Senna tora (L.) Roxb.

Previously reported from Bioko (Cufodontis, 1955: 221, sub *Cassia tora*; Keay, 1958: 455, sub *C. tora*). We have not found any herbarium material of *S. tora* from Equatorial Guinea in BM, BRLU, K, LISC, LISU, MA and WAG. This species is Asian in origin and it has been reported only from Tanzania in Africa (Lock, 1989: 40), moreover *S. obtusifolia* has been generally confused with *S. tora* (Brenan, 1967: 77). Its occurrence in Equatorial Guinea seems unlikely.

STATISTICAL SUMMARY

The total number of indigenous and introduced taxa listed here for Equatorial Guinea is 124. The species list is based primarily on herbarium material, with the exception of 14 reports from the literature; species-wide distribution ranges suggest they may occur in Equatorial Guinea.

Forty-five species are reported for the first time from the country. These reports are from Río Muni which is the least explored territory (Aedo & Velayos, 2001). Although our work quantitatively increases the floristic knowledge of this country by 35%, many plants reported from Cameroon or Gabon have still not been found, reflecting the necessity of future explorations.

In the checklist, we included 11 species (8%) that may be naturalized in Equatorial Guinea; this total is lower than the 20.5% found in the Mimosoideae (Estrella et al., 2005). The number of introduced species is higher in the islands of the Gulf of Guinea (Table 1), probably because they have been cultivated for a long time.

A continental bridge lasted 30,000–40 000 years in the last ice age between Bioko and Cameroon coast. This explains the high number of species found in Bioko and the low level of endemism (Pérez del Val, 1993: 14).

In spite of this continental influence (Exell, 1973b: 7) many plants reported from the continental mainland have still not been found in Bioko, unlike species of *Aphanocalyx* or *Tetraberlinia*. This group of plants is said to be absent from volcanic territories because

Table 1. Indigenous and introduced species of Caesalpinoideae from Mt. Cameroon and the four islands of the Gulf of Guinea (Sources: ¹Cable & Cheek, 1998; ²Liberato, 1976)

	Mt. Cameroon ¹	Bioko	São Tomé ²	Príncipe ²	Annobón
Indigenous	43	24	6	2	2
Introduced	0	9	15	4	5

they are ectomycorrhizal species (Newbery *et al.*, 1988: 436), which may represent an advantage in non-volcanic soils where phosphorus is a limiting factor (Wieringa, 1999).

The high number of Caesalpinoideae species, the most important group in low evergreen rainforest, found in Río Muni reflects the fact that Equatorial Guinea, together with Gabon, are the best conserved territories in West and Central Africa (Hamilton, 1994; Wieringa, 1999).

ACKNOWLEDGEMENTS

The authors wish to thank the keepers from BM, BRLU, K, LISC, LISU, MA and WAG for their support at these herbaria and loan of selected material. We are grateful to Juan Castillo for his help in the map design, B. Senterre for his revision of several specimens and J. Wieringa for his advice and identifications on his visit to MA. We also are indebted to B. Mackinder for revision of *Berlinia* specimens and her critical and valuable review of the manuscript. We also have to thank the help and highly constructive comments by L. Rico on the first draft of the article. This work was financed by the Spanish Dirección General de Investigación Científica y Técnica (DGICYT) through the research project REN2002-011299. M. de la Estrella was first funded by a C.S.I.C.I3P research grant and afterwards by a Universidad Complutense de Madrid predoctoral grant.
