This report represents a compilation of information in the Wildlife and Heritage Division's Biological and Conservation Data system as of the date on this report. It does not include species considered to be "watch list" or more common species, except in cases where the species is currently State-listed (see State Status column). In these instances, the species is likely to be downgraded or removed from the State list in the near future. Please refer to the attachment for an explanation of the rank and status codes.
