STATISTICS OF STATE SCHOOL SYSTEMS, 1925-26

This report includes statistics of elementary and of secondary schools which are supported from public funds. The data are compiled from reports made to the bureau by departments of public instruction in the various States. In most instances the printed bulletins of the superintendent of public instruction were used to verify the figures and to supply additional information. More or less complete reports were received from every State. The financial report for Texas was incomplete, but careful estimates were made by using 1925 costs, and increasing each item by a rate determined from county reports which were complete for 1926.

The principal items included in this report are enrollments, attendance, teachers, administrators, property values, receipts, and expenditures.

Increases in enrollments and attendance over 1925 are very small, being less than one-tenth of 1 per cent for enrollments, and less than one-half of 1 per cent for attendance. These small increases are due partly to the fact that some duplication exists in earlier reports which it has been impossible to eliminate until this year. The average number of pupils in attendance daily had increased 22.95 per cent since 1920. The number of pupils enrolled in what is considered to be the regular four years of high-school work has increased from 2,199,389 in 1920 to 3,650,903 in 1925 and to 3,757,466 in 1926.

CENSUS AND ENROLLMENTS

No recent data exist concerning the number of children of school age. Age limits vary considerably in the States, and there is little uniformity concerning the time and manner of taking a school census. It seems best to use data gathered by the United States Census Bureau. The latest complete census was taken in 1920, and estimates based upon the 1910 and the 1920 returns have been included in Table 4. These estimates have not taken into consideration the declining birth rate, the declining infant mortality rate, nor other changes in death rates since 1920, nor major movements from one locality to another. Applying the 1910-1920 rate of increase, the estimated number of children in the continental United States ought to be 30,064,621 for ages 5 to 17, inclusive, on July 1, 1926.

If the 2,438,725 pupils reported in private elementary and high schools are included with 24,741,468 enrolled in public schools, a total of 27,180,193 children were enrolled in public and private elementary and secondary schools during the school year 1925-26. This total enrollment is more than 90 per cent of the number estimated to be of school age.

If to the number in public high schools—3,757,466—there is added 295,625 in private high schools, 55,632 in preparatory departments of colleges and universities, and 23,402 in secondary courses in normal schools, the total of 4,132,125 represents the number enrolled in all types of secondary schools, both public and private, for the school year 1925-26.

GRADE ENROLLMENTS

A summary of enrollments by grades for the past 12 years is given in Table 2. From 500,000 to 1,000,000 undistributed pupils are omitted for each year, but it is assumed that these omissions do not materially disturb the percentage distributions, since the omissions represent enrollments and summaries of enrollments in school systems that do not report by grades. Estimates are made for those years for which no data have been gathered.

The following tabulation includes kindergarten enrollments as reported and excludes ninth-grade enrollments in those few communities that have an elementary school of nine years, and gives a percentage distribution based upon total enrollments for all grades for the years 1920, 1922, 1924, 1925, and 1926. The table also

Percentage distribution of kindergarten enrollments

Grades	Percentage distributions					Cumulative percentages		
	1920	1922	1924	1925	1926	1920	1924	1926

Total high school.....	10.06	12.03	13.41	13.93	14.60			
Infant mortality per thousand births.....	83.8	76.2	70.8					
Births per thousand persons 6 years previously.....		25.0	24.6	22.3	23.7			

includes the birth rate for the registration area for a year six years previous to the year mentioned in the tabulation. This enables those interested in making a study of percentage distributions to estimate the number of children six years of age that may be available for entrance to the first grade in a specified year, provided due allowances are made for losses by death. Infant mortality rates are included in the table for 1920, 1922, and 1924.

Reference to Table 2 shows that the number enrolled in the first grade has gradually decreased from 4,226,000 in 1920 to 3,923,000 in 1926. Grades 2 and 3 have about held their own since 1922, while the other grades show slight increases from year to year. Total grade enrollments have decreased slightly since 1925, but show increases up to that year. The reduction in the first-grade enrollment during the past six years, in fact since 1918, may be charged partly to better systems of promoting children. Congestion in the first grade is not as great as it was in 1920. Part of the decrease may be charged to a reduction in the birth rate, which has decreased from 25.1 per thousand population to about 22.4 during the interval between 1915 and 1923. This reduction in the birth rate may be offset partly by a reduction in the infant mortality rates, which have been reduced from about 160 per thousand births to near 70 within the past 25 years.

The percentage table included above gives a better idea of the changes in distribution by grades for the years indicated than does Table 2. In 1920 approximately 20 per cent of the whole enrollment were in the first grade, while in 1926 about 16 per cent were in the first grade. Similar conditions exist in grades 2, 3, and 4, although the differences are not so marked. From the fifth grade on, higher percentages are found in later years than were in those grades in 1920 and 1922. In the high school there is a decisive increase from year to year in each grade. In 1920, 4.2 per cent of the whole enrollment were in the first high-school year, in 1926, 5.5 per cent. In the senior year the percentages increased from 1.4 in 1920 to 2.3 in 1926. Certainly the public schools are holding proportionately more pupils until the graduation year than they did formerly.

TEACHERS

The number of teachers increased, in the public schools, from 777,915 in 1925 to 814,169 in 1926, or an increase of 4.6 per cent. This is an increase of 4.4 per cent for the women and of 5.8 per cent for the men. Since 1920 the number of men teachers has increased 45.1 per cent, and the number of women teachers 15.7 per cent. Average salaries of teachers have increased \$25 since 1925, to an average of \$1,277 for 1926.

PRIVATE SCHOOLS

Data for private secondary schools were collected from each institution, and for both elementary and secondary schools from State departments of education. Information from these sources was supplemented by data collected by the National Catholic Welfare Conference, and Tables 35 and 36 furnish a compilation of the number of teachers and of pupils by sex and type of school. Enrollments in Table 35 are not comparable with those reported in previous publications, since figures for private-school enrollments were never as complete as they are for 1926. In 1924 the total enrollments in all types of private schools were reported as 1,727,246. In 1926 the total is 2,438,725. This difference of more than 700,000 does not represent the increase, but is due to better reports. It is not possible to give an estimate of the increase over 1924. The total number of teachers in private schools is 76,415 for 1926. The cost of running the private schools is not included in this report.

NIGHT SCHOOLS

A compilation of the material contained in reports for night schools is given in Table 11 for 31 States. Data are not always complete, and in many instances have been included or partially included with the reports for day schools. Where possible, night-school statistics are excluded from the other tabulations.

These 31 States report 825,651 students in night schools, and 21,213 teachers. Costs amounting to \$6,210,333 are reported from 26 States. The amount not included with day-school costs is \$5,495,505. This amount is added to the total in column 7 of Table 23 to obtain the total expenditure in Table 1, thus making this total comparable with the total for previous years.

SCHOOL BUILDINGS AND VALUE OF PROPERTY

The total number of public-school buildings has decreased from 258,859 in 1925 to 256,104 in 1926. Replacement of one-room schools by consolidated schools is responsible for the decrease, since the number of one-room schools has decreased from approximately 166,000 to 161,521 during the year, while 687 consolidated schools have been added.

Value of all public-school property has increased from \$4,252,328,900 to \$4,676,603,539 from 1925 to 1926, the latter value being nearly twice as large as that for 1920. The value per pupil was \$112 in 1920, \$129 in 1922, \$154 in 1924, \$173 in 1925, and \$189 in 1926.

DISTRIBUTION OF EXPENDITURES FOR PUBLIC SCHOOL EDUCATION FOR 1910, 1920, AND 1926.

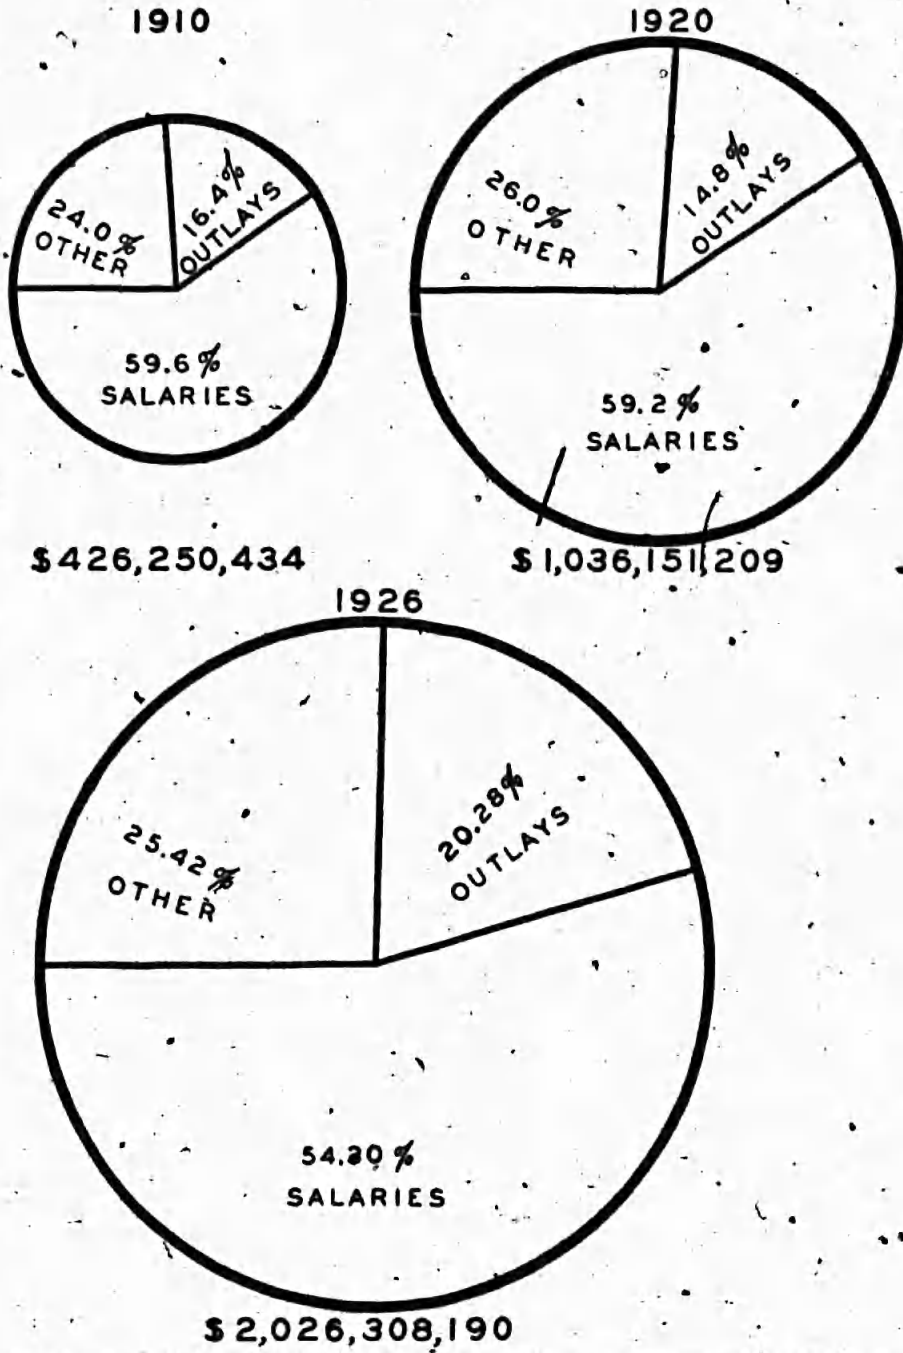

FIG. 1

EXPENDITURES

Expenditures for public schools have almost doubled since 1920, and have increased from \$1,946,096,912 in 1925 to \$2,026,308,190 in 1926, or approximately 4 per cent. Expenditures for grounds, buildings, and contents, which have been increasing rather rapidly since 1920, decreased from \$433,584,559 in 1925 to \$411,032,774 in 1926. These figures indicate that building programs which were held up during the war period, and which were resumed almost immediately afterwards, may have taken care of a large part of the congestion, and that school administrators are finding it possible, in some localities, to reduce building contracts nearly to a point where they will take care of the normal increase in school attendance. Capital outlays were 17 per cent of the total in 1915, 15 per cent in 1920, 22.3 per cent in 1925, and 20.3 per cent in 1926. Substantial increases in expenditures for capital outlays are noted in Alabama, Arkansas, California, Florida, Idaho, Illinois, Nebraska, Nevada, New Hampshire, New Mexico, North Dakota, Ohio, Rhode Island, Tennessee, Vermont, Washington, and Wyoming. Decreases are noted in Iowa, Michigan, Mississippi, New York, North Carolina, Oklahoma, Pennsylvania, and Wisconsin. Expenditures for salaries and for other items both show an increase of about 4 per cent over 1925. Percentage distributions of expenditures for outlays; salaries, and for other items are shown graphically for 1910, 1920, and for 1926 in Figure 1.

PER CAPITA COSTS

Expenditures for public schools have been increasing rapidly for a number of years. Part of these increases may be charged to a reduction in the purchasing power of the dollar, part to increases in school attendance, and part to the efforts of communities to secure better school systems. It is not the intention here to analyze the data to the extent of evaluating each of these factors, but an attempt is made to show the trend of costs based upon the number of children in average daily attendance in the schools. School authorities are not in agreement regarding when a pupil is enrolled in school, but there is less difference of opinion concerning when he is in attendance. In 1913 the per capita cost of public schools, based upon the number in average daily attendance was \$38.31; it was \$39.04 in 1914; \$40.43 in 1915, \$41.72 in 1916, \$49.12 in 1918, \$64.16 in 1920, \$85.76 in 1922, \$95.45 in 1925, and \$102.05 in 1926. These costs are shown graphically in Figure 2.

* Estimated from other years.
 † Excluding kindergarten pupils, and excluding since 1918 junior college, postgraduate high-school, and postgraduate elementary pupils.
 ‡ Not including 529,235 kindergarten pupils and 563,846 undistributed.
 § Not including 609,656 kindergarten pupils and 611,988 undistributed.
 ¶ Not including 596,684 kindergarten pupils and 528,526 undistributed.
 ** Not including 673,231 kindergarten pupils and 487,932 undistributed.
 †† Enrollment since 1918 reported to the Bureau of Education by the departments of education of the several States; enrollment for 1915, 1916, and 1918 computed from enrollment reported to the Bureau by the several high schools.
 ††† Total from Table 26.
 †††† The class beginning in 1914.
