

TARZANEGROUP

MICRO, MINIATURE AND SMALL ORCHIDS

BARBOSELLA PROREPENS

Origin: Central & South America

Temperatures: Warm to cold growing miniature orchid species

Light: Bright shade

Watering & Fertilizing: Regular watering and fertilizing year-round, high humidity, good quality water

General care: Great beginner plant and easy growing Barbosella. Grows best under warm to cool conditions, in shade / bright shade, good air movement and high humidity, good quality water. This Barbosella will scramble all over the place! Can be grown potted or mounted. Great plant for terrariums, vivariums, glass orbs, vases, indoor growing on windowsills or greenhouses and outdoors.
