CONSERVATION CODES FOR WESTERN AUSTRALIAN FLORA

may also be referred to as Declared Rare Flora).
and have been gazetted as such.

(which may also be referred to as Declared Rare Flora). Species which have been adequately searched for and there is no reasonable doubt that the last individual has died, and have been gazetted as such.

Threatened Flora are further recognised by the Department according to their level of threat using IUCN Red List criteria. For example *Acacia splendens* is specially protected as Declared Rare Flora under the *Wildlife Conservation Act 1950* and is a threatened species with a ranking of Critically Endangered.

Ranking:

CR: Critically Endangered - considered to be facing an extremely high risk of extinction in the wild.

EN: Endangered – considered to be facing a very high risk of extinction in the wild.

VU: Vulnerable - considered to be facing a high risk of extinction in the wild.

The Wildlife Conservation (Rare Flora) Notice and a list of the current rankings can be downloaded from the Listing of species and ecological communities webpage <http://www.dpaw.wa.gov.au/plants-and-animals/threatened-species-and-communities/listing>

categories are ranked in order of priority for survey and evaluation of conservation status so that consideration can be given to their declaration as threatened flora or fauna. Species that are adequately known, are rare but not threatened, or meet criteria for Near Threatened, or that have been recently removed from the threatened list for other than taxonomic reasons, are placed in Priority 4. These species require regular monitoring. Conservation Dependent species are placed in Priority 5.

1: Priority One: Poorly-known species

areas, Shire, Westrail and Main Roads WA road, gravel and soil reserves, and active mineral leases and under threat of habitat destruction or degradation. Species may be included if they are comparatively well known from one or more localities but do not meet adequacy of survey requirements and appear to be under immediate threat from known threatening processes.

2: Priority Two: Poorly-known species

conservation parks, nature reserves, State forest, vacant Crown land, water reserves, etc. Species may be included if they are comparatively well known from one or more localities but do not meet adequacy of survey requirements and appear to be under threat from known threatening processes.

3: Priority Three: Poorly-known species

significant remaining areas of apparently suitable habitat, much of it not under imminent threat. Species may be included if they are comparatively well known from several localities but do not meet adequacy of survey requirements and known threatening processes exist that could affect them.

4: Priority Four: Rare, Near Threatened and other species in need of monitoring

(a) Rare. Species that are considered to have been adequately surveyed, or for which sufficient knowledge is available, and that are considered not currently threatened or in need of special protection, but could be if present circumstances change. These species are usually represented on conservation lands. qualifying for Vulnerable.

(c) Species that have been removed from the list of threatened species during the past five years for reasons other than taxonomy.

5: Priority Five: Conservation Dependent species
years.

The conservation codes for Western Australian flora and fauna can be downloaded from the DPaW website at:
<http://www.dpaw.wa.gov.au/plants-and-animals/threatened-species-and-communities/listing>

KEY TO CODES USED IN LIST

NAMEID	a number assigned to the taxon in the WA plant census
STATUS	Conservation status of taxon - refer to definitions.
T	Threatened Flora (Declared Rare Flora - Extant)
X	Presumed Extinct (Declared Rare Flora - Extinct)
1	Priority One - Poorly known Species
2	Priority Two - Poorly known Species
3	Priority Three - Poorly known Species
4	Priority Four - Rare, Near Threatened and other species in need of monitoring
5	Priority Five - Conservation Dependent
RANK	The threat category the taxon is recognised as in Western Australia (see definitions)
CR	Critically Endangered
EN	Endangered
VU	Vulnerable
EX	Extinct
CRITERIA	The criteria that the taxon meets to be listed under the category of threat. Categories and criteria follow IUCN guidelines. http://www.iucnredlist.org/technical-documents/categories-and-criteria
EPBC	The category that the taxon is listed under the Commonwealths' Environmental Protection and biodiversity conservation Act 1999. Note this list is maintained by the Commonwealth and the official list should be sourced at the Commonwealths' website http://www.environment.gov.au/cgi-bin/sprat/public/publicthreatenedlist.pl?wanted=flora
CR	Critically Endangered
E	Endangered
V	Vulnerable
X	Extinct
DPaW REGION	
GOLD	Goldfields
KIMB	Kimberley
MWST	Midwest
PILB	Pilbara
SCST	South Coast
SWST	South West

SWAN	Swan
WARR	Warren
WHTB	Wheatbelt

Listed according to the nearest town/place name. Includes historical records. NP=National Park, NR=Nature Reserve, Stn=Station, Mt=Mount, Is=Island, Rg=Range

DISTRIBUTION

RECOVERY PLAN Whether the taxon has a Recovery Plan (RP), Interim Recovery Plan (IRP) or Multiple Species Plan (MSP).

CHANGE CODE Type of change that has occurred:

ADDITION	Added to list – new entry to State (WCA or Priority) or Commonwealth list (EPBC). If already on one state list and needs to be changed to another see either upgrade or downgrade.
UPGRADED	Species that is on the Priority list has been upgraded to Threatened or Presumed Extinct under the <i>Wildlife Conservation Act</i> .
CAT_CHG	The category under which a species is listed (e.g. EPBC Act VU to EN or Priority 1 to P3) has been changed.
DOWNGRAD	A Species has been downgraded from Threatened or Presumed Extinct under the <i>Wildlife Conservation Act</i> to the Priority list.
NAME_CHG	Species has undergone a name change.
OTHER	Records a change to other details not related to Conservation status (e.g. Location and Recovery Plan details).
DELISTED	Species removed from the particular list it was on.
RELISTED	Species has been added to the list which it was once previously listed on.

LIST CODE

Priority	Priority Flora List
WCA_1991	Wildlife Conservation Act 1950 DRF Schedule [1991 ammendments]

RECOMMENDING CHANGES TO THE LIST

Threatened Flora

Threatened flora listings are reviewed annually and changes are recommended by the Threatened Species Scientific Committee (TSSC). Nomination forms to add taxa to, or delete taxa from the current Threatened (Declared Rare Flora) lists or recommend a change can be downloaded from the DPAW website at:

<http://www.dpaw.wa.gov.au/plants-and-animals/threatened-species-and-communities/listing/118-call-for-public-nominations-for-listing-and-delisting-of-threatened-plants-and-animals>

TSSC meetings are usually held near the end of the first quarter of the calendar year. The closing date for nominations for TSSC meetings is the last Friday of January that year.

Taxa will remain listed under their current status until the TSSC recommendations are approved by the Minister for Environment and are listed in the next *Wildlife Conservation (Rare Flora) Notice* which is published in the government gazette and available on the DPAW website at

<http://www.dpaw.wa.gov.au/plants-and-animals/threatened-species-and-communities/listing>

Priority Flora

You do not have to fill out a nomination form to nominate a species for the DPAW Priority list as it is not considered by the TSSC.

To nominate a species for priority listing, contact DPaW's Senior Botanist, Species and Communities Branch with your recommendation or email flora.data@dpaw.wa.gov.au. Your email should contain the information required to demonstrate how the species meets the Priority codes.

For further information on listing of Threatened or Priority Flora please contact DPaW's Species and Communities Branch on 9334 0455.

Changes to Priority Flora are done frequently as new information is received and reviewed. A combined Threatened and Priority Flora List is "published" after changes to the Threatened Flora list is made as a way of disseminating information and providing a reference point for the list.

<http://florabase.dpaw.wa.gov.au/>

Changes to Priority Flora are done frequently as new information is received and reviewed. A combined Threatened and Priority Flora List is "published" after changes to the Threatened Flora list is made as a way of disseminating information and providing a reference point for such a dynamic list. As changes to the Threatened Flora list only occur once or twice a year, the published version of the Priority List soon becomes out of date due to all the changes since publication and is hence not available on the web. However due to the need to have this information readily accessible to the public, the WA Herbarium updates the conservation status of taxa on its FloraBase website to be aligned with Species and Communities Branch's official Priority list and hence can be referred to for the currency of conservation codes.

<http://florabase.dec.wa.gov.au/>

SUMMARY OF PLANT TAXA WITH PRIORITY FOR CONSERVATION BY DPAW ADMINISTRATIVE REGIONS

18 October 2013
