# CONSERVATION CODES

## for Western Australian Flora

---

### **T Threatened flora**

Published as Specially Protected under the *Wildlife Conservation Act 1950*, and listed under Schedules 1 to 4 of the Wildlife Conservation (Rare Flora) Notice for Threatened Flora (which may also be referred to as Declared Rare Flora).

Threatened flora is flora that has been declared to be 'likely to become extinct or is rare, or otherwise in need of special protection', pursuant to section 23F(2) of the Wildlife Conservation Act.

The assessment of the conservation status of these species is based on their national extent and ranked according to their level of threat using IUCN Red List categories and criteria as detailed below.

### **CR Critically endangered species**

Threatened species considered to be facing an extremely high risk of extinction in the wild. Published as Specially Protected under the *Wildlife Conservation Act 1950*, in Schedule 1 of the Wildlife Conservation (Rare Flora) Notice.

### **EN Endangered species**

Threatened species considered to be facing a very high risk of extinction in the wild. Published as Specially Protected under the *Wildlife Conservation Act 1950*, in Schedule 2 of Wildlife Conservation (Rare Flora) Notice.

### **VU Vulnerable species**

Threatened species considered to be facing a high risk of extinction in the wild. Published as Specially Protected under the *Wildlife Conservation Act 1950*, in Schedule 3 of Wildlife Conservation (Rare Flora) Notice.

### **EX Presumed extinct species**

Species which have been adequately searched for and there is no reasonable doubt that the last individual has died. Published as Specially Protected under the *Wildlife Conservation Act 1950*, in Schedule 4 of the Wildlife Conservation (Rare Flora) Notice for Presumed Extinct Flora.

A list of the current rankings can be downloaded from the Department of Biodiversity, Conservation and Attractions Threatened Species and Communities webpage at <http://dpaw.wa.gov.au/plants-and-animals/threatened-species-and-communities/>.

---

### **Priority flora**

Possibly threatened species that do not meet survey criteria, or are otherwise data deficient, are added to the Priority Flora Lists under Priorities 1, 2 or 3. These three categories are ranked in order of priority for survey and evaluation of conservation status so that consideration can be given to their declaration as threatened flora.

Species that are adequately known, are rare but not threatened, or meet criteria for near threatened, or that have been recently removed from the threatened species list for other than taxonomic reasons, are placed in Priority 4. These species require regular monitoring.

Assessment of Priority codes is based on the Western Australian distribution of the species, unless the distribution in WA is part of a contiguous population extending into adjacent States, as defined by the known spread of locations.

**1: Priority 1: Poorly-known species**

Species that are known from one or a few locations (generally five or less) which are potentially at risk. All occurrences are either: very small; or on lands not managed for conservation, e.g. agricultural or pastoral lands, urban areas, road and rail reserves, gravel reserves and active mineral leases; or otherwise under threat of habitat destruction or degradation. Species may be included if they are comparatively well known from one or more locations but do not meet adequacy of survey requirements and appear to be under immediate threat from known threatening processes. Such species are in urgent need of further survey.

**2: Priority 2: Poorly-known species**

Species that are known from one or a few locations (generally five or less), some of which are on lands managed primarily for nature conservation, e.g. national parks, conservation parks, nature reserves and other lands with secure tenure being managed for conservation. Species may be included if they are comparatively well known from one or more locations but do not meet adequacy of survey requirements and appear to be under threat from known threatening processes. Such species are in urgent need of further survey.

**3: Priority 3: Poorly-known species**

Species that are known from several locations, and the species does not appear to be under imminent threat, or from few but widespread locations with either large population size or significant remaining areas of apparently suitable habitat, much of it not under imminent threat. Species may be included if they are comparatively well known from several locations but do not meet adequacy of survey requirements and known threatening processes exist that could affect them. Such species are in need of further survey.

**4: Priority 4: Rare, Near Threatened and other species in need of monitoring**

(a) Rare. Species that are considered to have been adequately surveyed, or for which sufficient knowledge is available, and that are considered not currently threatened or in need of special protection, but could be if present circumstances change. These species are usually represented on conservation lands.

(b) Near Threatened. Species that are considered to have been adequately surveyed and that are close to qualifying for Vulnerable, but are not listed as Conservation Dependent.

(c) Species that have been removed from the list of threatened species during the past five years for reasons other than taxonomy.

The conservation codes for Western Australian flora can be downloaded from the Department's website at: <http://www.dpaw.wa.gov.au/plants-and-animals/threatened-species-and-communities>.

<sup>1</sup>The definition of flora includes algae, fungi and lichens.

<sup>2</sup>Species includes all taxa (plural of taxon - a classificatory group of any taxonomic rank, e.g. a family, genus, species or any infraspecific category i.e. subspecies or variety, or a distinct population).

## KEY TO FIELDS IN LIST REPORT

**WA Status:** Conservation status of taxon. Either listed under the *Wildlife Conservation Act 1950* as Threatened (T) or Presumed Extinct (X) or Priority listed (1, 2, 3 or 4). See conservation codes for definitions.

### WA Rank

**Category:** The threat category the taxon is recognised as in Western Australia (see conservation codes above for definitions).

**Criteria:** The criteria that the taxon meets to be listed under the category of threat. Categories and criteria follow IUCN guidelines <http://www.iucnredlist.org/technical-documents/categories-and-criteria>

**EPBC Act:** The category that the taxon is listed under the Commonwealth's *Environment Protection and Biodiversity Conservation Act 1999*. Note this list is maintained by the Commonwealth and the official list should be sourced at the Commonwealth's website <http://www.environment.gov.au/cgi-bin/sprat/public/publicthreatenedlist.pl?wanted=flora>

### Regions:

GOLD=Goldfields; KIMB= Kimberley; MWST=Midwest; PILB=Pilbara; SCST=South Coast; SWST=South West; SWAN=Swan; WARR=Warren ; WHTB=Wheatbelt.

**Distribution:** Listed according to the nearest town/place name. Includes historical records. NP=National Park, NR=Nature Reserve, Stn=Station, Mt=Mount, Is=Island, Rg=Range

**Recovery Plan:** Identifies if the taxon has a Recovery Plan (RP), Interim Recovery Plan (IRP) or is included in a Multiple Species Plan (MSP).

## KEY TO FILEDS IN CHANGES REPORT

**Current Nameid:** a number assigned to the taxon in the WA plant census

**Current name:** name of taxon that is currently listed

**Change code:** type of change that has occurred:

**ADDITION:** Added to list – new entry to State (Wildlife Conservation Act or Priority) or Commonwealth list (EPBC). See also upgraded or downgraded.

**UPGRADED:** A species that is on the Priority list has been upgraded to Threatened or Presumed Extinct under the *Wildlife Conservation Act 1950*.

**DOWNGRADE:** A species has been downgraded from Threatened or Presumed Extinct under the *Wildlife Conservation Act* to the Priority list.

**CAT CHG:** The category under which a species is listed has been changed (e.g. changed from Priority 1 to Priority 3).

**NAME CHG:** Species has had a name change.

**RANK CHG:** Species has had a change in its ranking (either category or criteria)

**OTHER:** Records a change to other details not related to Conservation status (i.e. Location or Recovery Plan details).

**DELISTED:** species removed from the particular list it was on. Note a species may be delisted but still have a conservation status if upgraded or downgraded to a new list.

**RELISTED:** Species has been added to the list which it was once previously listed on.

**List code:** List the taxon is listed under; Priority= Priority flora list, WCA\_1991= *Wildlife Conservation Act 1950* (note the 1991 in the list codes refers to the year the two schedules of flora were first recognised).

**Old name:** displays the name it was previously listed under before the change.

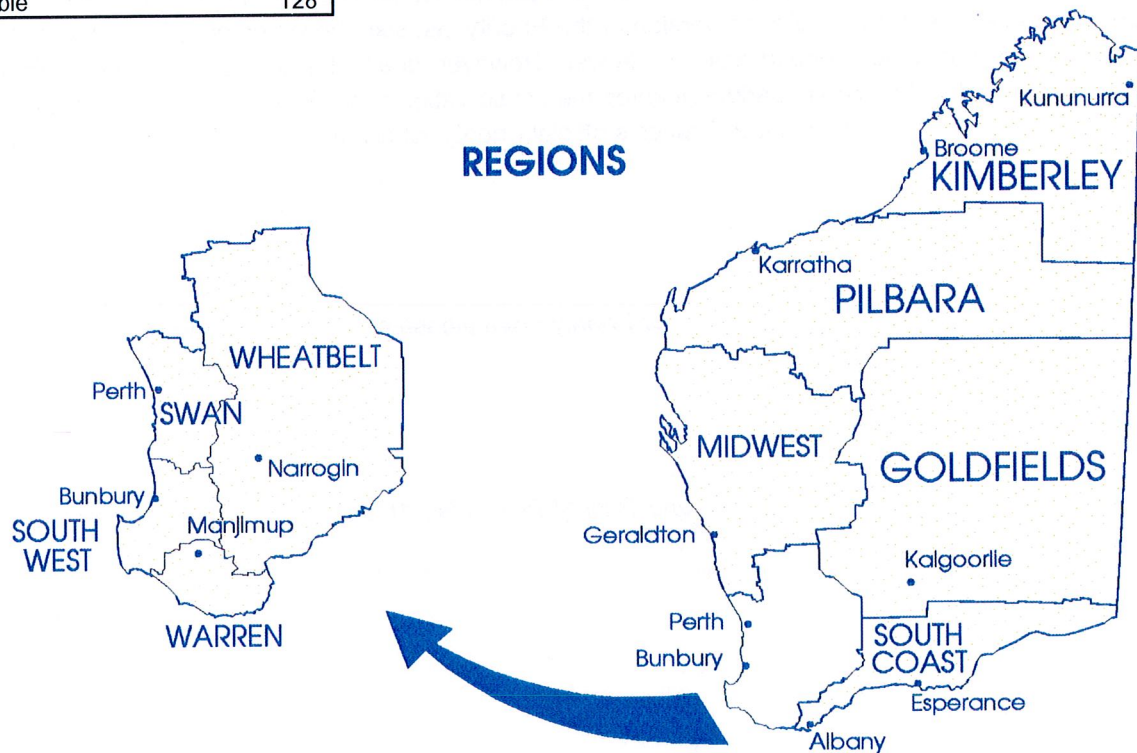

## SUMMARY OF PLANT TAXA WITH PRIORITY FOR CONSERVATION BY ADMINISTRATIVE REGIONS

16 January 2018

REGION	THREATENED	PRESUMED EXTINCT	PRIORITY 1	PRIORITY 2	PRIORITY 3	PRIORITY 4	TOTAL TAXA

Critically Endangered	161
Endangered	139
Vulnerable	128

# RECOMMENDING CHANGES TO THE LIST

## Threatened Flora

Threatened flora listings are reviewed annually and changes are recommended by the Threatened Species Scientific Committee (TSSC). Nomination forms to add species to, or delete species from the current Threatened (Declared Rare Flora) lists or recommend a change in category can be downloaded from the Department's Website on the '*Call for public nominations for listing (and delisting) of threatened plants and animals*' page <http://www.dpaw.wa.gov.au/plants-and-animals/threatened-species-and-communities/listing/118-call-for-public-nominations-for-listing-and-delisting-of-threatened-plants-and-animals> . Further information on the listing process and nomination guidelines can also be downloaded from this page.

TSSC meetings are usually held near the end of the first quarter of the calendar year. The closing date for nominations for TSSC meetings is the last Friday of January that year.

Species will remain listed under their current status until the recommendations are approved by the Minister for Environment and are listed in the next *Wildlife Conservation (Rare Flora) Notice* which is published in the government gazette.

## Priority Flora

You do not have to fill out a nomination form to nominate a species for the Priority list.

To nominate a species for priority listing, contact the Department's Senior Botanist, Species and Communities Branch with your recommendation or email [flora.data@dbca.wa.gov.au](mailto:flora.data@dbca.wa.gov.au) . Your email should contain the information required to demonstrate how the species meets the Priority category you recommend. Nominations for Priority species may be sent at any time of year, and changes may be made to the Priority Flora list at any time of year.

Changes to Priority Flora are done frequently as new information is received and reviewed. A combined Threatened and Priority Flora List is "published" after changes to the Threatened Flora list are made as a way of disseminating information and providing a reference point for such a dynamic list. As changes to the Threatened Flora list only occur once or twice a year, the published version of the Priority List soon becomes out of date due to the changes since publication and is hence not available on the web. However, due to the need to have this information readily accessible to the public, the WA Herbarium updates the conservation status of species on its FloraBase website to be aligned with Species and Communities Branch's official Priority list and hence can be referred to for the currency of conservation codes.

<http://florabase.dpaw.wa.gov.au/>

For further information on listing of Threatened or Priority Flora please contact Species and Communities Branch on 9219 9526.

**WILDLIFE CONSERVATION (RARE FLORA) NOTICE 2017**

# — PART 1 —

---

---

## CONSERVATION

---

---

CO301

Wildlife Conservation Act 1950

### Wildlife Conservation (Rare Flora) Notice 2017

Made by the Minister for Environment under section 23F(2) of the Act.

**1. Citation**

This notice may be cited as the *Wildlife Conservation (Rare Flora) Notice 2017*.

**2. Interpretation**

In this notice—

“**extant**” means known to be living in a wild state;

“**protected flora**” means any flora belonging to the classes of flora declared by the Minister under section 6 of the Act to be protected flora by notice published in the *Gazette* 9 October 1987, at p. 3855;

“**taxon**” includes any taxon that is described by a genus name and any other name or description.

Note: The plural form of “taxon” is “taxa”.

**3. Declaration of rare flora**

Subject to clause 4, protected flora—

- (a) specified in Schedule 1, being taxa that are extant and considered likely to become extinct or rare, as critically endangered flora, and therefore in need of special protection;
- (b) specified in Schedule 2, being taxa that are extant and considered likely to become extinct or rare, as endangered flora, and therefore in need of special protection;
- (c) specified in Schedule 3, being taxa that are extant and considered likely to become extinct or rare, as vulnerable flora, and therefore in need of special protection; and
- (d) specified in Schedule 4, being taxa that are presumed to be extinct in the wild and therefore in need of special protection,

are declared to be rare flora for the purposes of section 23F of the Act throughout the State.

**4. Application**

Clause 3 does not apply to those plants of a taxon of protected flora specified in Schedule 1, 2, 3 or 4 that have been planted for any purpose other than such plants that have been planted for the purpose of conservation of that taxon and in accordance with approval given by the Director General.

**5. Revocation**

The *Wildlife Conservation (Rare Flora) Notice 2016* is revoked.

**Schedule 1 — Flora that are considered likely to become extinct or rare, as critically endangered flora**

[cl. 3(a)]

**Division 1 — Spermatophyta (flowering plants, conifers and cycads)**

### Schedule 4 — Flora presumed to be extinct

[cl. 3(d)]

#### Spermatophyta (flowering plants, conifers and cycads)

1. *Acacia kingiana*
2. *Acacia prismifolia*
3. *Coleanthera virgata*
4. *Conospermum caeruleum* subsp. *contortum*
5. *Frankenia decurrens*
6. *Lepidium drummondii*
7. *Leptomeria dielsiana*
8. *Leucopogon cryptanthus*
9. *Myriocephalus nudus*
10. *Picris compacta*
11. *Ptilotus caespitosus*
12. *Scholtzia* sp. Bickley (W.H. Loaring s.n. PERTH 06165184)
13. *Taraxacum cygnorum*
14. *Tetralia fasciculata*
15. *Thomasia gardneri*

STEPHEN DAWSON, Minister for Environment.

CO302

Wildlife Conservation Act 1950

## Wildlife Conservation (Specially Protected Fauna) Notice 2017

Made by the Minister for Environment under section 14(4) of the Act.

### 1. Citation

This notice may be cited as the *Wildlife Conservation (Specially Protected Fauna) Notice 2017*.

**THREATENED AND PRIORITY FLORA REPORT FORM**

# Threatened and Priority Flora Report Form

Please complete as much of the form as possible, with emphasis on those sections bordered in black. For information on how to complete the form please refer to the Threatened & Priority Flora Report Form (TPRF) manual on the DBCA website at <http://dpaw.wa.gov.au/> under Standard Report Forms

<b>TAXON:</b> _____	<b>TPFL Pop. No.:</b> _____
<b>OBSERVATION DATE:</b> ____ / ____ / ____	<b>CONSERVATION STATUS:</b> _____ <span style="float:right;">New population <input type="checkbox"/></span>

**CONDITION OF PLANTS:** Healthy  Moderate  Poor  Senescent

**COMMENT:** \_\_\_\_\_

THREATS - type, agent and supporting information:	Current impact (N-E)	Potential Impact (L-E)	Potential Threat Onset (S-L)
Eg clearing, too frequent fire, weed, disease. Refer to field manual for list of threats & agents. Specify agent where relevant. Rate current and potential threat impact: N=Nil, L=Low, M=Medium, H=High, E=Extreme Estimate time to potential impact: S=Short (<12mths), M=Medium (<5yrs), L=Long (5yrs+)

# Threatened and Priority Flora Report Form

### HABITAT INFORMATION:

<b>LANDFORM:</b>	<b>ROCK TYPE:</b>	<b>LOOSE ROCK:</b>	<b>SOIL TYPE:</b>	<b>SOIL COLOUR:</b>	<b>DRAINAGE:</b>
Crest <input type="checkbox"/>	Granite <input type="checkbox"/>	(on soil surface; eg gravel, quartz fields)	Sand <input type="checkbox"/>	Red <input type="checkbox"/>	Well drained <input type="checkbox"/>
Hill <input type="checkbox"/>	Dolerite <input type="checkbox"/>		Sandy loam <input type="checkbox"/>	Brown <input type="checkbox"/>	Seasonally inundated <input type="checkbox"/>
Ridge <input type="checkbox"/>	Laterite <input type="checkbox"/>	0-10% <input type="checkbox"/>	Loam <input type="checkbox"/>	Yellow <input type="checkbox"/>	Permanently inundated <input type="checkbox"/>
Outcrop <input type="checkbox"/>	Ironstone <input type="checkbox"/>	10-30% <input type="checkbox"/>	Clay loam <input type="checkbox"/>	White <input type="checkbox"/>	Tidal <input type="checkbox"/>
Slope <input type="checkbox"/>	Limestone <input type="checkbox"/>	30-50% <input type="checkbox"/>	Light clay <input type="checkbox"/>	Grey <input type="checkbox"/>	
Flat <input type="checkbox"/>	Quartz <input type="checkbox"/>	50-100% <input type="checkbox"/>	Peat <input type="checkbox"/>	Black <input type="checkbox"/>	
Open depression <input type="checkbox"/>	Specify other: _____		Specify other: _____	Specify other: _____	
Drainage line <input type="checkbox"/>					
Closed depression <input type="checkbox"/>					
Wetland <input type="checkbox"/>					
	<b>Specific Landform Element:</b>				
	(Refer to field manual for additional values)				
<b>CONDITION OF SOIL:</b>	Dry <input type="checkbox"/>	Moist <input type="checkbox"/>	Waterlogged <input type="checkbox"/>	Inundated <input type="checkbox"/>	

**VEGETATION CLASSIFICATION\*:**

1. \_\_\_\_\_

2. \_\_\_\_\_

3. \_\_\_\_\_

4. \_\_\_\_\_

Eg: 1. Banksia woodland (B. attenuata, B. ilicifolia);  
 2. Open shrubland (Hibbertia sp., Acacia spp.);  
 3. Isolated clumps of sedges (Mesomelaena tetragona)

**ASSOCIATED SPECIES:**

Other (non-dominant) spp \_\_\_\_\_

\* Please record up to four of the most representative vegetation layers (with up to three dominant species in each layer). Structural Formations should follow 2009 Australian Soil and Land Survey Field Handbook guidelines – refer to field manual for further information and structural formation table.

**CONDITION OF HABITAT:** Pristine  Excellent  Very good  Good  Degraded  Completely degraded

**COMMENT:** \_\_\_\_\_

**FIRE HISTORY:** Last Fire: Season/Month: \_\_\_\_\_ Year: \_\_\_\_\_ Fire Intensity: High  Medium  Low  No signs of fire

**FENCING:** Not required  Present  Replace / repair  Required  Length req'd: \_\_\_\_\_

**ROADSIDE MARKERS:** Not required  Present  Replace / reposition  Required  Quantity req'd: \_\_\_\_\_

**OTHER COMMENTS:** (Please include recommended management actions and/or implemented actions - include date. Also include details of additional data available, and how to locate it.)

\_\_\_\_\_

\_\_\_\_\_

\_\_\_\_\_

\_\_\_\_\_

\_\_\_\_\_

\_\_\_\_\_

**DRF PERMIT/ LICENCE No:** Note if only observing plants (i.e. no specimens or plant material is taken) then no permit/licence is required. For further information on permit and licencing requirements see the Threatened Flora and Wildlife Licensing pages on DBCA's website. Any actions carried out under licence/permit should be recorded above in the OTHER COMMENTS section.

**SPECIMEN:** Collectors No: \_\_\_\_\_ WA Herb.  Regional Herb.  District Herb.  Other: \_\_\_\_\_

**ATTACHED:** Map  Mudmap  Photo  GIS data  Field notes  Other: \_\_\_\_\_

**COPY SENT TO:** Regional Office  District Office  Other: \_\_\_\_\_

Submitter of Record: \_\_\_\_\_ Role: \_\_\_\_\_ Signed: \_\_\_\_\_ Date: / /
