

Guide To Symbols

Keys for basic functions are on one side, while keys for advanced functions are on the other.	Resumes operations after the Auto Power-Off function has taken effect.	Displays date and time.
Displays equations as they are written.	Resume Function plus Line Counter and Condition Symbol.	Easy-to-read large digital display reduces eye strain, preventing errors.
Use slide shows to help demonstrate lessons.	An "OK" sign appears when the calculation being checked matches the previous result.	Automatically calculates the total sum of amounts generated.
Durable hard case protects calculator from damage.	Calculates average of inputted data.	Adjustable angle for personal preference.
Features easy key-in for algebraic equations.	Calculates prices with or without taxes.	Fixed angle to ensure optimum readability.
Allows users to check the equation and answer at the same time.	Determines the number of days and a specific date from inputted dates.	Allows answer to be used in following equation.
Lets you backtrack to a previous step in the equation, to the extent that memory capacity allows.	Recalls the last 102 actions performed.	An accounting system that is useful for doing calculations such as those used in bookkeeping. For example, in order to calculate addition and subtraction ($5 + 6 - 3$), do the following operations $5 \square 6 \square 3 \underline{\underline{=}}$ or $5 \square 6 \square 3 \underline{\underline{-}}$.
Eliminates the need to re-enter the constant when doing repeated calculations.	Automatically reviews the entire calculation.	Raises calculator to an ideal operating angle for easier data entry.
Allows the previous answer to be used in the next calculation.	Changes incorrectly inputted data.	Printed report is easy to read with red ink used for negative.
Allows you to easily find the answer to derivative calculations.	Inserts new data.	Characters are illuminated for improved readability.
Allows you to easily find the answer to integral calculations.	Deletes unwanted data.	3 rates can be converted easily with the touch of a button.
Formulas or equations can be stored to simplify calculations.	Enters the same values repeatedly.	Easy conversion of units such as currencies, based on an adjustable rate set by the user.
Enables you to store frequently used functions.	Calculates the amount to be returned from a payment.	Easy conversion into and out of metric measurements with just the touch of a button.
For easier reading of long, multi-digit numbers, "," or "," is inserted for each group of three digits.	Batteries provide back-up to solar power when light source is interrupted.	Fits easily in the palm of your hand.
Enables quick input of a keystroke, even if you still have a finger on the previous key.	Includes handy wallet cover for extra protection and easy storage.	Quick and convenient calculation of cost, selling price and margins; ideal for business transactions.
	Comes with attached hard cover for extra protection and durability.	Long-life plastic buttons.

Scientific Calculator Homepage

<http://sharp-world.com/contents/calculator/index.html>

The newly redesigned Sharp scientific calculator homepage is even more convenient than before. Along with detailed information about each model in our line-up, you'll find Flash-based demonstrations of the calculators' unique features and a variety of handy downloads for educational use.

Brain-Exercising Drills with Brain Fitness Measuring Function

You can measure your brain fitness level, based on the results of 50 simple calculations. Note that brain fitness level is measured by comparison to statistical results based on real performance data. This product is not a medical device.

Simple arithmetic will keep your brain fit

Typical age-related declines in brain functioning can be prevented by regular mental exercise. Research* has shown that use of maths drills like those in this product can enhance brain functioning.
