

Wednesday Walk in the Piccadilly Circus Area and Drive Down Bendora Dam Road - 27 November 2013

We started the day with a short walk in the Piccadilly Circus area, stopping under the powerlines then walking under them for a while before heading along a track into the wooded area. There were many lovely *Stylidium armeria* flowering, some *Tetratheca bauerifolia*, *Pimelea glauca*, *Olearia erubescens*, *Clematis aristata*, *Epacris breviflora*, *Stackhousia viminea*, *Oxylobium ellipticum*, *Daviesia ulicifolia* and many *Daviesia mimosoides* still flowering and giving off their perfume. There were also carpets of *Goodenia hederaceae* ssp. *alpestris* and a few *Viola hederacea*, *V. betonicifolia*, *Poranthera microphylla*, *Lagenophora gracilis* and *Ranunculus scapiger*. We found a few orchids - *Simpliglottis valida*, *Calochilus montanus*, *Stegostyla moschata*, and *Diuris monticola*. After lunch at Bulls Head for lunch, we drove down the Bendora Dam road and had many stops as we saw things of interest, eg *Euphrasia collina*, *Olearia megalophylla*, *Astrotricha ledifolia*, *Olearia lirata*, *Leptospermum brevipes*, *Bedfordia arborescens*, *Stackhousia monogyna*, *Prostanthera lasianthos*, *Veronica derwentiana*, *V. perfoliata* and *Melaleuca pallida* all flowering well.
