46th

Bull Sale

March 2, 2024
12:00 Noon
Judd Ranch, Inc.
Pomona, Kansas

FREE TRUCKING — When your purchases total \$20,000 or more, JRI will truck your bulls FREE within the continental United States and JRI delivers directly to your door, not to some central location miles away from you. \$20,000 or more going out of the 48 states will be trucked free of charge to the border. On purchases of less than \$20,000 trucking is usually very affordable because Judd Ranch bulls annually sell into 20 plus states.

QUALITY ACCEPTANCE GUARANTEE — JRI wants you to check out the bulls and see them for yourself. Thus, you will be reimbursed for your travel expenses if you arrive at the sale and don't find the sale bulls as described to you by our phone conversation. This is the only such money-back guarantee in the industry!

CUSTOMER APPRECIATION HAMBURGER FRY March 1 — To express our appreciation for your interest in our bull sale, we'd like you to join us for a complimentary pre-sale hamburger fry at the Ranch. We invite you to come early on Friday afternoon to view the bulls, then join us for a grab-and-go meal. Tables will be setup to enjoy the meal and hamburgers will start coming off the grill around 5 p.m. and will continue to be served until 7:30 p.m.

SALE DAY LUNCH — Be our guests at the Judd Ranch. Complimentary lunch will be served at 11:00.

TRAVEL — Judd Ranch is located 1 1/2 to 2 hours from Kansas City MCI Airport. Private landing at Ottawa Municipal Airport located three miles south of Ottawa and 15 minutes from Judd Ranch, Ottawa Municipal Airport phone (785) 242-5310.

RANCH LOCATION — 2 miles west of Pomona, Ks. on Hwy. K-68, or 12 miles west of Ottawa, KS on Hwy. K-68.

ACCOMODATIONS — Please call by February 23 and ask for reserved Judd Ranch Bull Sale rooms.

All motels are located at the south end of Ottawa. From interstate 35 take Exit 183B north to the first stop light. turn right. **From Judd Ranch:** Go east to Ottawa on K-68 highway. At the west edge of Ottawa K-68 goes north...at that point turn south (right) on Eisenhower Rd. 2 miles to 23rd St. Go east (left) on 23rd St. one mile through traffic light and all four motel accomodations are located immediately to your right.

Sale Motel Headquarters

Comfort Inn-Ottawa (785) 242-6150 or (785) 242-9898
2335 Oak Street, Ottawa, KS

The Comfort Inn is a nice clean facility with an indoor pool and offers a complimentary breakfast including eggs, sausage and biscuits, waffles, coffee and fruit juice.

Applebee's Restaurant is within walking distance. We highly recommend this new facility and please ask for the Judd Ranch Bull Sale special reserved rooms when calling for reservations before February 23.

Alternative Accommodations

Holiday Inn - Ottawa (785) 521-7009
Best Western - Ottawa (785) 242-2224
Econolodge - Ottawa (785) 242-3400
Super 8 - Ottawa (785) 242-5551

INSURANCE — Buyers, to protect your buying interest, shipping insurance is offered at settlement time. On our Free Delivery on purchases of \$20,000 or more we encourage you to purchase insurance. Our haulers have insurance but this insurance only covers the commercial value of your animals. Shipping insurance only covers death of the animal but given the minimal cost of such insurance we'd encourage all buyers to purchase it.

SIGHT UNSEEN PURCHASES — If you can't attend the sale and you want to buy, call: Judd Ranch Sale Consultant Roger Gatz (800) 743-0026 about our "Guaranteed to Please" Purchasing Agreement. Annually 25% of our gross sales are purchased through this time and money saving program. All bulls are guaranteed to meet your approval or you don't own them.

DNA Testing-Any animal DNA tested for homozygous black that are known red carriers will be designated with (RC). Any animal DNA tested for homozygous polled that are known to be heterozygous polled will be designated with (HP) at the end of the animal footnotes. Judd Ranch is retaining a 1/2 semen interest on all bulls selling. You are buying full possession and have the right to sell your bull at any time. If you decide to collect and sell semen Judd Ranch would receive 1/2 of the semen royalties. If Judd Ranch sells semen on said bull you would receive a 1/2 semen royalty.

On behalf of our dedicated family; welcome to the 46th Judd Ranch Herd Bull Sale. This year we will be selling 334 head and feel the 2024 offering to be the most uniform, extremely sound, highly functional, very fertile set of herd bulls with the most genetic potential ever at Judd Ranch. As in the past, all the top bulls have been saved for sale day, including our 2024 National Gelbvieh & Balancer Pen Show National Champion Pen of Five Gelbvieh, National Champion Pen of Three Gelbvieh and National Champion Pen of Five Balancer Bulls.

As a family operation, Judd Ranch strives to produce and provide our highly valued customers with powerful genetics that have built-in basic fundamentals which defy the odds on antagonistic traits of which are geared for crossbreeding programs and act as a catalyst to produce progeny that are optimal and highly profitable for all sectors of the industry. We are proud of the genetic uniformity and balance of traits the Judd Ranch herd has achieved by stacking generations of like phenotypes and genotypes. We feel bulls that have stacked like pedigrees are the key to a predictable balanced gene pool that possess the prepotency to sire predictable uniformity in multiple traits. Therefore, we are confident the Judd Ranch bulls of today are a complete package of superior genetics that should breed true. Every bull has passed a breeding soundness exam and is guaranteed to breed cows and, as always, we stand behind each and every bull.

Facts and Statistics of 2024 Sale Offering

BSE Every bull in the sale has passed a breeding soundness exam (BSE) performed by Dr. Mages in February. However, we recommend a BSE just prior to turn out with cows. Especially if you are relying on a single bull per group of cows.

IMF SCORES 3.9 IMF Average for the Spring Bulls with 0.30 back fat and 3.2 IMF Average for the Fall Bulls with 0.21 back fat.

Frame Size Average 365 day adjusted frame score for Fall Sale Bulls, 5.5 and, 5.6 for all Spring Bulls. There should be bulls within most people's parameters for frame size.

Birth Weight And Calving ease Status 79 lbs. average on Fall Bulls, 81 lbs. average on Spring Bulls, gestation length has also shortened a lot over the years which also helps to reduce birth weight.

205 Day Weight Fall Sale Bulls average 769 pounds 205 adjusted weight and an average actual weaning weight of 899 pounds off the cow. Spring Sale Bulls average 714 pounds 205 adjusted weight and average actual weaning weight of 878 pounds off the cow.

Cows Actual % of Body Weight Weaned Fall Gelbvieh Cows with Bull Calves average 57%. Fall First calf Gelbvieh averaged 62%. Spring Gelbvieh Cows with Bull calves average 64%. Spring first calf cows with bull calves average 76%. We do not use any adjustments for the calf's age as we feel the cows that calve earlier in the season should get an advantage for fertility.

365 Day Weight Average for Fall Sale Bulls 1,196 pounds and Spring Sale Bulls 1,278 pounds.

Average Daily Gain on Test 4.90 ADG for all Fall Sale Bulls. 4.39 ADG for all Spring Sale Bulls. The bulls are weighed in right off the cow at weaning (no shrink applied, no warm up) and fed a high roughage ration which includes prairie hay, corn silage, alfalfa haylage and corn.

Adjusted 365 Day Ribeye Area 14.8 square inch average for Spring Sale Bulls and 14.7 square inch average for Fall Sale Bulls. 1.1 square inch of ribeye per 100 pounds of body weight off test, which is right on track.

365 Day Average Scrotal Circumference 37.6 cm Fall Bulls. 37.3 cm Spring Bulls. We feel large scrotals provide added fertility to females and males, along with early puberty on heifers.

Adjusted 365 Day Pelvis 175 cm Average on Fall Sale Bulls. 181 cm Average on Spring Sale Bulls.

Dam of Merit/ Dam of Distinction Status 100% of the Gelbvieh and Balancer sale bulls feature Judd Ranch honored DOM and or DOD cow family genetics.

Structural Soundness Freedom of movement and hoof size and correctness are traits we check closely and breed for. Also we run the Fall Bulls in large pastures after gain test, August – November, with no supplement feed. We feel this helps soundness and teaches the boys to get out and cover the country and learn to hunt for a living.

Polled/Homozygous Polled Status 100% of the sale bulls are polled. There are 318 head of homozygous polled bulls in the offering and 209 head of black polled bulls.

Disposition Status We also watch temperament closely at Judd Ranch and don't believe you will find a more docile set of bulls anywhere. However, there are usually a few bulls in the offering that we feel are not as docile as we prefer and will be announced as group bulls from the auction block.

PI BVD Judd Ranch has tested almost every calf (bulls and heifers) for the past 13 years and have all been negative. And all sale bulls are tested negative for PI BVD.

Johnes Judd Ranch is currently an Accredited Level 4 Johnes Free Status. Herd # 860580124

Brucellosis Judd Ranch is an Accredited Brucellosis Free Herd Certification #271. All cows and herd bulls are tested annually.

Trichomonas Testing We realize there are some states requiring a negative trich test on most bulls entering their state. **We recommend those of you from out of state please check your state's requirements before bringing your trailer as it takes a few days to complete the testing if required.**

One of Gelbvieh's biggest strengths is the cow power of the female. Yes, the Gelbvieh cow has the ability to raise scale smashing calves and be pregnant on schedule with another calf. Lee Leachman's data on over 200,000 cow records, of all breeds, puts Gelbvieh influence females number one for pounds of calf weaned per cow exposed every time. Also, Gelbvieh and Balancers cross extremely well with other breeds, as Gelbvieh and Balancer bring fertility, milk, reduced cow size, pounds of calf, good disposition, and optimum birth weight to the equation.

Cindy and I would extend a huge thank you to all our friends, neighbors, and crew who help with the sale and throughout the year! Especially, Roger and Peggy Gatz of Cattlemen's Connection for all their expertise, hard work and dedication to the Judd Ranch program, for 38 years. I would also like to extend a huge thank you to my family for their hard work and dedication to producing high quality seedstock. It takes all of us including Cindy, Nick, Ginger, Brent and Ashley putting in long hours and hard days doing all of the extra jobs that it takes to make a seedstock operation run smoothly. Just some of dotting the i's and crossing the t's include weighing and tattooing every calf, artificially inseminating every cow, running our embryo transfer program, preparing pen bulls and sale cattle, extra herd testing for health and fertility, accurate record keeping, feed production and storage, building fence and water systems and equipment and truck repair. Cindy and I are very proud of our family and appreciate all their hard work toward making Judd Ranch a success.

We are extremely grateful for our customers who are both great folks and some of the best cow people from across the country. Through the years many of you have become both our customers and very good friends. It is truly an honor and privilege to be your genetic supplier. It is always a pleasure to work with people who have a true appreciation for the land, the lifestyle and the almighty COW. You folks are to be commended for the tremendous job you do with your outfits and cowherds. You deserve the best and we wish you all the best. We hope you can make plans to come Friday, view the bulls and then join us for our annual customer appreciation hamburger fry. Tables will be set up to enjoy the meal and hamburgers will start coming off the grill around 5 p.m. and will continue to be served until 7:30 p.m.

Sincerely,

*Dave & Cindy
& Crew*

**CATTELMEN'S
CONNECTION**

Dear Cattle Producers:

It has been my pleasure to work with the Judd Ranch crew for over thirty-five years. Just a couple of reasons I like working for Dave, Cindy and their family are their honesty, dedication and just how hard they work every day. I've mentioned this before but a handshake from Dave Judd is better than a legal contract with many others.

Producers, without a doubt one of the most important decisions you will make all year is centered around buying quality bulls for your program. I want you to consider some of the following when selecting your next seedstock supplier. When you combine Dave Judd's honesty, accurate record keeping, practical approach to breeding functional purebred cattle, his overall knowledge of all phases of the livestock industry, you have a superior seedstock supplier. One of the main reasons so many Judd Ranch customers return to purchase their bulls every year is because they trust the honesty and integrity that are the foundation to the Judd Ranch program. Another important reason to choose Judd Ranch as your genetic supplier is the strength of the cowherd or true Cow Power featured at Judd Ranch. As you look through this catalog, you will find several photos of Judd Ranch females and please notice they are easy fleshing, deep-ribbed, calf raising machines with incredible teat and udder quality. Also note, all females photographed in this catalog are Judd Ranch bred.

Judd Ranch has been honored as the #1 Dam of Merit program in the Gelbvieh breed for 21 of the past 26 years ('98-'23). Dam of Merit females are honored for their unsurpassed fertility and performance levels. As always, AI continues to be an integral part of the Judd Ranch program and you will note 99% of the bulls in this offering, are sired by breed leading proven AI sires. This combination of Judd Ranch's honored Dam of Merit females and proven breed leading AI sires offers you tremendous financial rewards in your next calf crop, and you will reap even more substantial benefits when you incorporate Judd Ranch Gelbvieh genetics into your base cowherd.

If you have questions about any bull listed in this sale catalog or would like assistance in selecting bulls for your program; please give me a call toll-free 1-800/743-0026. Prior to the sale I personally go through and grade each sale bull and write detailed physical notes on each. This process usually takes five to six days. If you are unable to attend the sale, I will be happy to purchase a bull or several bulls for you, within your price range, and we will guarantee your satisfaction with the animal(s). Through the years, approximately 25% of the gross sales are purchased through this free and time saving program, and you pay only the bid price, just as if you were bidding yourself.

You can reach me at 1-800-743-0026 or 785/547-6262 until February 26th, after then you can call me on my cell phone at 785/547-6262 during the day. In the evenings please call either my cell phone 785/547-6262 or the sale motel headquarters, Comfort Inn in Ottawa, Kansas 785/242-6150.

Respectfully,

Roger

PHONE: (785) 242-7822
FAX: (785) 242-0216

This is the 36th year I have had the opportunity to work with the health and medical treatment of the Judd Ranch herd. All bulls have been tested for BVD-PI and are negative. This is also the 20th year that all calves at the Ranch have been negative for persistently-infected BVD. The herd is in the Johne's Disease Control Program (paratuberculosis) and is negative to date. The herd is tested annually for Brucellosis and is designated a brucellosis-free herd.

Trichomoniasis foetus, commonly known as "trich" has become a major problem in a few midwestern and western states. Trich is a reproductive disease that is spread from infected bulls to cows, causing abortions. All bulls in the sale are virgin bulls and considered trich-free, so they will not be tested prior to the sale. If your state requires trich testing the bulls will be tested after the sale and will be delivered or picked up once testing is complete, and results are finalized. To date, the following states are requiring bulls over 12 months-of-age to be tested: Arizona, Idaho, Utah, Nevada, New Mexico, and Texas. States requiring bulls 18 months and over to be tested are as follows: Alabama, California, Colorado, Florida, Georgia, Mississippi, Oklahoma, Virginia, Washington, Oregon, Tennessee, West Virginia, and Wyoming.

All bulls offered for sale have had a BSE (breeding-soundness examination), based on the following criteria: scrotal circumference, sperm morphology, motility, and concentration. Pelvic palpations are performed to check for any abnormalities or medical problems in the reproductive glands. Testicles are measured and examined for any medical disorders or abnormalities. Electro ejaculation is used to collect semen and examine the penis for breeding soundness. I strongly recommend that, although these bulls passed a BSE in January and February, they be re-examined prior to turnout this spring.

Cattlemen, when you purchase a bull from this herd, you are adding a tremendous genetic asset to your beef program. You are also working with a family that has built their herd from hard work, honesty and a reputation that puts them at the top of the cattle industry. If you have questions regarding the health of this herd, please feel free to contact me prior to the sale at 785-242-7822. I look forward to seeing you at the sale, and good luck this coming season.

Sincerely,

Larry E. Mages, DVM

Ultra Sound Technologies

Ultrasound Technologies
Chad Gordon

chadgordon8g@gmail.com
580.678.1918

To Whom it may concern:

Traveling the country over the past 20 years Ultrasounding Cattle I have seen many different types and breeds of cattle that vary greatly in carcass traits and phenotypic quality. I have Ultrasounded the bulls for the last several years and have seen that Judd Ranch Bulls possess exceptional carcass traits in a very functional package. It has always been exciting for me to evaluate cattle of any breed and what they offer to the Beef Industry.

On March 2 cattlemen will have the opportunity to purchase genetics that will improve any herd, whether you are a seedstock producer or a commercial producer that retains ownership of your calves through finishing you will find bulls that will fit your program. It has been proven that 1 square inch of Ribeye area per hundred pounds of body weight to be average for muscling. The Judd Ranch Bulls will greatly exceed that while maintaining high %IMF values. Translation, these bulls will add muscle in their offspring lowering numerical yield grades while still maintaining optimal quality grades. As we move to more challenging market conditions it is critical that producers find genetics that are efficient and have the ability to produce pounds of product in a timely fashion. Cattlemen will certainly find these genetics at Judd Ranch on March 2.

It is always my pleasure to go to Judd Ranch to ultrasound bulls that are very quiet in disposition while working with an outstanding family. As you make your selections for purchase buy with confidence, you are not only buying quality bulls, you are buying from a program that will work in any operation that has been time tested to produce superior cattle and the Judd's will stand behind them.

Best Wishes,

Chad Gordon

HOW TO PARTICIPATE ON

LiveAuctions.TV

1

CREATE AN ACCOUNT

Click "Register to Bid" on the top right corner of LiveAuctions.tv. Fill out the required information to bid online. Agree to the terms of service and finish with the "register" button.

2

REGISTER FOR A BUYER NUMBER

From the home page or the "all auctions" page, choose the sale you're interested in. Once selected, click the "request a buyer number" button. Verify your email address with the email verification link. To verify your mobile number, click "send token". Follow the steps to authorize your mobile device and click "submit".

3

BID SUCCESSFULLY

You will only have to complete the two-step verification process one time. After that, you will be able to immediately request a buyer number on any auction without verification. If you're a winning bidder, your lots will appear in your cart on the bottom of your screen. You will be contacted by the ranch or sale manager for your payment and shipping plans.

IF YOU NEED HELP REGISTERING TO BID OR TO VIEW
THE AUCTION PLEASE CONTACT TECHNICAL SUPPORT

(682) 816-4900

OR

TECHSUPPORT@LIVEAUCTIONS.TV.

Another Option...Use Our Sale Day Conference Line

Of course, our preference is to have you join us in Pomona on March 2, but we understand traveling is not an option for all of our customers. Along with being able to watch and bid on LiveAuctions.tv, we will also have a Sale Day Conference line that customers can call in on and bid.

1. If you wish to bid by phone, please call Ashley Judd at 785-248-6005 or Ginger Judd 785-229-9266, so we can assign you a bidder number and give you the sale day conference line number. We recommend you call at least by Friday, March 1 to get your bidder number. In case of an emergency, Saturday morning requests can be accommodated.
2. On sale day, call the conference line number. Sale starts at 12:00 (noon) Central Time. We will have a representative standing by to assist you on the conference line, starting approximately 15 minutes before the sale starts.
3. Once you are on the line, state your name and bidder number to the Judd Ranch representative so that we know you are on the line.
4. When you are ready to bid, say "yes" and your bidder number. For example, if your bidder number is 230, you will say "yes, bidder 230" when you are wanting to bid.
5. If you are the winning bidder, our representative will tell you that you bought the animal, and you will be contacted by Judd Ranch after the sale regarding payment, animal pick up or delivery.
6. If you would like to mute your line, dial *6. To unmute your line, dial *6 again.

JUDD RANCH REFERENCE SIRES/AI REFERENCE SIRES

- JRI Ms Pld Frontier 253J60
- JRI Ms Pld Shaker 253E51 ET (JRI Ms 253W4)

■ Producers, no sire has ever made the impact at Judd Ranch like Top Secret (deceased) and you will find this one-of-a-kind producer in basically every Judd Ranch herdsire's pedigree. Top Secret produced some awesome sons and daughters for Judd Ranch and Top Secret was honored numerous times as a breed trait leader for calving ease, (low) birth weight and pregnancy @ 30 months. Top Secret's calving ease/ meat machine sons were always crowd favorites in the annual Judd Ranch bull sale. Today Top Secret's calving ease/meat machine grandsons, sired by Secret Instinct and Pop A Top and great grandsons, sired by General Patton, Prescribed Remedy, Bandito, and Painted Black just to name a few, are also crowd favorites. This comes as no surprise with the unbelievable beef, butt, guts and nuts they possess.

JRI Prescribed Remedy 253E38
JRI Herdsire **Homozygous Polled (75%) Balancer**
JRI Prescribed Remedy 253E38

1386931 Tattoo: 253E38 BD: 2/9/17 BW: 82 WW: 738 YW: 1,146

- Mytty In Focus (Countess 906)
- JRI Ms Special Blend 253W28
- JRI Ms Strawberry 253T8 (JRI Ms 253L71)

■ Wow, you talk about a calving ease/meatwagon Judd Ranch herdsire who's producing phenomenal progeny. Prescribed Remedy's incredible dam JRI Ms Special Blend 253W28 was honored three consecutive years as a Dam of Merit female and wowsa. Special Blend has been a one-of-a-kind producer. Special Blend's first calf JRI Ms Lucy 253Y38 is one of Judd Ranch's elite donor females and Ms Lucy's first calf was JRI Ms Victoria Secret 253A48 who happens to be the incredible dam of the herdsire JRI Overachiever 253E39. Special Blend daughters and granddaughters are phenomenal producers, now pencil-in Special Blend's ability to produce calving ease/powerhouse sons as Special Blend's first son JRI Secret Password 253Z38 sold in the 2013 bull sale and the super stud reigned as the 2014 Canadian National Champion Bull.

JRI Alan 68G3
JRI Herdsire **Black, Homozygous Polled (75%) Balancer**
JRI Alan 68G3

1447758 Tattoo: 68G3 BD: 1/19/19 BW: 82 WW: 836 YW: 1,382

- JRI Pop A Top 197T83 (JRI Ms 197R72)

- Basin Payweight 1682 (Lass 7017)
- JRI Ms My Payday 68E2
- JRI McClintock 68Y8 (JRI Ms 68M7)

■ JRI Alan 68G3 was the super stud lead bull in Judd Ranch's 2020 National Champion Pen of 3 Bulls and Runner Up in the 2020 Balancer Futurity. Alan nursed a first calf heifer with an awesome teat and udder system and note Alan's phenomenal stats: 82# birthweight, 836# 205 day weight, 1,065# actual weaning weight, and 1,382# yearling weight. Alan's first-calf dam JRI Ms My Payday 68E2's unbelievable producing ability definitely comes as no surprise as Alan's granddam's 68Y8, 68G6, and 68B5 were all honored numerous times as fertility-plus/calf raising machine Dam of Merit females. Alan features "The Complete Package" of calving ease, growth, fertility, carcass, and his progeny should really excel in carcass merit as Alan posted a carcass-plus 115 intramuscular fat ratio.

JRI Marshall 214X2
JRI Reference Sire **Black, Homozygous Polled (50%) Balancer**
JRI Marshall 214X2

1152366 Tattoo: 214X2 BD: 1/20/10 BW: 79 WW: 657 YW: 1,273

- JRI Top Secret 253M75 ET (JRI Ms 253J60)
- JRI Ms Black Secret 214U88
- JRI Ms Lucky Star 214R78 ET (JRI Ms 214G6)

■ This breed leading powerhouse homozygous polled AI sire has worked fabulously at Judd Ranch in producing extreme calving ease coupled with performance plus growth. JRI Marshall 214X2 nursed a fertility-plus first calf heifer and I'd call his mama a calf raising machine as Marshall weaned off at 82% of her body weight and that's flat called Judd Ranch Cow Power. Marshall posted an awesome low birth to yearling growth spread with his calving ease deluxe 79 pound birth weight coupled with a scalebusting 1,273 pound yearling weight. Marshall's a breed trait leader for Calving Ease, (low) Birth Weight, Calving Ease Maternal, Docility, and Marbling. Marshall's calf raising machine dam was honored as a Dam of Merit female in her first year of eligibility and as an Elite Dam of Distinction honored female in her first year of eligibility.

■ This calving ease/powerhouse General Patton son was Judd Ranch's pick of the spring 2020 bull calf crop. Bandito swept 2021 National Champion Bull honors for Judd Ranch, and oh man, the Bandito progeny are mighty impressive. Bandito's stats: calving ease 86# birth weight, whopping 955# actual weaning weight off his 8-year-old dam, scalebusting 1,377# 365-day weight, huge 43.2 centimeter yearling scrotal circumference. Now pencil-in Bandito's phenomenal yearling scan data where the calving ease/powerhouse scanned a humongous 17.8 square inch yearling ribeye with a carcass-plus 5.1 IMF. Rest assured, the all-important fertility factor is bred-in Bandito as his incredible 8-year-old dam produced 21 natural & ET born calves with a remarkable 368-day annual calving interval.

Now pencil-in this calving ease/meat machine's big ol' 16.3 square inch yearling ribeye coupled with a carcass-plus 4.1 IMF (120 IMF ratio). Painted Black's incredible 10-year-old honored Dam of Merit dam JRI Ms Copy Cat 254R64 was one of Judd Ranch's all-time great donor females with a carcass-plus 109 ribeye area/110 IMF ratio on her babies. Fertility, longevity, producing ability and carcass merit run mighty deep in Painted Black's pedigree as his honored Dam of Merit/Dam of Distinction granddam 254L53 featured a 103 ribeye area/110 IMF ratio on her 13 babies.

Quotes from Judd Ranch Bull Buyers

-Judd Ranch genetics hit the mark in performance, frame score, and docility. "Holy cow, it is night and day difference," Justy says about his calves sired by Judd Ranch bulls. In one year we've improved weights by 100-lb. It's just amazing. - Justy Burleson, Ohio Commercial cow-calf producer

- With 100 to 150-pound increases in average weaning weights, Kansas cattle producer John Rose is a believer in the increased performance Judd Ranch bulls bring to a cow herd. Along with increased weaning weights, John says the calves are noticeably thicker and deeper-bodied. - John Rose, Kansas Commercial cow-calf producer

- Twenty years ago, Brent Bettels, Amoret, Missouri, made the decision to transition his Angus bull battery to Gelbvieh bulls, particularly Judd Ranch bulls. "Through the years, we have slowly switched all bulls from Angus to Gelbvieh - Judd Ranch Gelbvieh," Bettels says. "I keep buying Judd Ranch bulls because of the work that the Judd family puts into combining genetics to create bulls with off-spring that consistently perform." Bettels says using Judd Ranch bulls added at least 100 pounds to his weaning weights. "The Judd Ranch genetics continue to show up after weaning when I am backgrounding my calves." he explains. "I am able to add pounds efficiently with the Judd Ranch sired calves." When you buy Judd genetics you get both outstanding genetics and amazing service. "Working with the Judd family and Roger is easy," he explains. "My choices of who I do business with are deliberate. I do business with those who are honest, easy to work with and have a history of integrity. They check all the boxes." - Brent Bettels, Missouri Commercial cow-calf producer.

-Judd Genetics Make an Impact: Improve Weaning Weights, Docility. Judd Ranch bull customer Mike Jenkins purchased his first Judd Ranch bull in 2011. Mike's cow herd includes 250 mostly Angus and Brangus females. Mike's decision to buy a Gelbvieh bull was because of the value of heterosis and how the hybrid vigor of a Gelbvieh cross would benefit his operation. The Judd Ranch Gelbvieh bulls have added approximately 85 lbs. to all his weaning weights; they have added muscle, depth of body and all the replacement females are usually the first to breed in his herd. Mike Jenkins is sold on Judd Ranch bulls. Increased weaning weights, improved docility and daughters that are easy keepers, good uddered, good legged and raise good calves keep him coming back. "I'm very pleased with the Gelbvieh influence on my cow herd."-Mike Jenkins, Commercial cow-calf producer, Texas

- Judd Bulls Increase Average Weaning Weights 250 Pounds. Susan Gladstone Tucker from Gladcrest Farms recalls fondly March 3, 2012 – the day she bought her first Judd Ranch bull after years of evaluating Judd catalogs and looking for the perfect herd bull candidate. Since the initial purchase in 2012, to 100% Judd Ranch bulls in 2018, average weaning weights has increased from 426 lbs. to 679 lbs. in 2018. Along with the steer calves Susan says the Judd Ranch-sired females are excellent. "We retain about 15 to 20 per year," she says. "When we started using Judd Ranch bulls you could easily tell which ones were sired by them."-Susan Gladstone Tucker, Missouri Commercial cow-calf producer

- "I can't say enough good things about Judd Ranch. I bought my first bull in 1990 and now my whole herd is based on Judd genetics. Last year, because of those genetics, I weaned off bull calves that weighed more than 1,000 lb. My herd is proof that you can start with a group of bad cows and after years of buying Judd Ranch bulls you can have a herd you are proud of." - Joe Peine, Commercial cow-calf producer, Kansas

Oh man, if you like big ol' juicy ribeye steaks the progeny out of JRI Royal T 254K398 should keep your deep freezer well stocked with the homungous 18.3 square inch yearling ribeye this meatwagon scanned. Royal T did weigh 92 pounds at birth, and I can tell you that his 9-year-old Dam of Merit honored dam JRI Ms Sweetie 254A97 has been a birth weight moderator as her first seven babies only averaged 78 pounds at birth. With Royal T's dam's modest birth weight track record, Royal T should produce plenty of calving ease and oh man, you should be well rewarded with scalebusting progeny at weaning time as this meatwagon pounded the 365-day weight scales at 1,316 pounds.

JRI Seminole Wind 140K420 weighed 101 pounds at birth and we know it as Judd Ranch honestly weighs every calf at birth. I can tell you that bigger birth weights do not run in this cow family. Seminole Wind nursed a second-calf heifer and her first baby only weighed 75 pounds at birth. Seminole Wind's grandam JRI Ms Margaret Thatcher 140E32 features an 81# birth weigh average on her babies. Seminole Wind's great grandam JRI Ms Sugar And Spice 140C32 has only averaged a 77# birth weigh average on her natural born babies. Ms Sugar And Spice is one of Judd Ranch's elite Dam of Merit honored donor females and she's photographed on page 15 with her powerhouse bull calf.

JRI Rocky 270K470 weighed 96 pounds at birth and we know it as Judd Ranch honestly weighs every calf at birth. Why Rocky weighed 96 pounds at birth is a mystery as it is not the norm for his third-calf dam as her first two babies only averaged 77 pounds at birth. Birth weight moderation runs in Rocky's pedigree as his Dam of Merit grandam JRI Ms Bells N Whistles 270D37 features a very modest 75# birth weight average on her babies. With the modest birth weight track record behind Rocky, added birth weight should not be a problem and oh man, you should be well rewarded with scalebusting weaning weight progeny. You might also note Rocky posted a feed conversion-plus 7.72# ADG and feed conversion comes in mighty handy on the ranch.

"Heifer bull" buyers, add JRI Black Jack 178K46 to your search list as Black Jack should be a "heifer bull" deluxe calving ease machine. Black Jack nursed a second-calf heifer JRI Ms Josephine 178G36 who has really been a birth weight moderator as her first baby only weighed 55 pounds at birth. Ms Josephine excels in producing modest birth weight babies and wow, this beauty is mighty fertile with a 354-day annual calving interval. Fertility and longevity run mighty deep in Ms Josephine's pedigree as her Dam of Merit honored grandam JRI Ms Topsy 178W61 produced scalebusting progeny for 13 years and Ms Topsy was also one of Judd Ranch's elite donor females. "Heifer bull" genetics featuring a mighty fertile cow family.

Producers, if you are searching for a sleep-all-night "heifer bull," JRI Bogart 254K420 features breed leading top 1% calving ease direct EPD strength. Bogart's third-calf dam JRI Ms Private Eye 254F827 ET excels in the calving ease department as her 3 babies to date have only averaged 57 pounds at birth. Rest assured, unmatched fertility is bred-in Bogart as he features these 4 incredible fertility-plus/ calf raising machine grandams' 254T72, 254P62, 254E52, and 254C4, who were 4 of the all-time great donor females at Judd Ranch with the foursome producing 122 natural and ET born calves and that 122 figure in not a type. Longevity also runs mighty deep in Bogart's pedigree as his 4 Dam of Merit/ Dam of Distinction honored grandams all produced scalebusting progeny for 13-plus years.

JRI U. S. Grant 270K395 ET is an ET son out of JRI Ms Blk Pearl 270F292, Judd Ranch's phenomenal Dam of Merit third-calf donor female. Ms Blk Pearl's Dam of Merit honors come as no surprise as her 3 natural born calves (all heifer calves) have posted the following incredible stat averages: 78# birth weight, whopping 785# 205-day weight with a scalebusting 927# actual weaning weight average on the trio. Producing widespread birth to growth is a common occurrence for Ms Blk Pearl as U. S. Grant hammered the actual weaning weight scales at 1,105 pounds and U. S. Grant's three ET full brothers averaged 84 pounds at birth with a scalebusting 1,027 pounds on actual weaning weight.

JRI Alan 132K39K nursed a 6-year-old fertile machine (363-day annual calving interval) mama JRI Ms 132D9K who sports a beautiful teat/udder system and wow, Ms 132D9K flat knows how to produce powerhouse sons. Alan's powerhouse full brother JRI All American 132J49K sold in last year's sale as Lot 111 with a whopping 935# actual weaning weight, performance-plus 1,265# 365-day weight with a mighty impressive 4.9 IMF scan. The year before Ms 132D9K's powerhouse son sold as Lot 122 with an 84# birth weight, performance-plus 1,225# 365-day weight with a mighty impressive carcass-plus 4.6 IMF. Ms 132D9K flat knows how to produce powerhouse sons and take special note of the added carcass value she injects into her sons.

Oh my, note the calving ease 76# birth weight, whopping 804# 205-day weight growth spread on this beef machine Secret Sensation son. JRI Will Rogers 254K322 nursed a first-calf Resource daughter JRI Ms Raphael 254H221 who possesses an unmatched (99 teat/udder score) teat/udder system. Ms Raphael is one fertile machine as her fall '23 baby was born on August 16th so she shortened her gestation by 10 days. Ms Raphael's unmatched fertility and producing ability comes as no surprise as she features 3 DOM/DOD honored grandams. I might add, Ms Raphael's 3 DOM/DOD honored grandams were 3 of the all-time great donor females at Judd Ranch with the trio producing 93 natural & ET born calves and that 93 figure is not a typo. If you are searching for a "heifer bull" well equipped in the all-important fertility and cow efficiency departments, add JRI One Track Mind 253K382 to your search list. One Track Mind's calving ease deluxe 48# birth weight indicates sleep-all-night genetics and note One Track Mind features breed leading top 1% calving ease EPD strength. One Track Mind's second-calf dam JRI Ms Sundance 253G488 excels in producing calving ease genetics and Ms Sundance really excels in the cow efficiency department as One Track Mind weaned off at 86% of Ms Sundance's 950# body weight. Rest assured, the fertility is bred-in as One Track Mind features 4 DOM honored grandams.

Check out the awesome 79# birth weight, whopping 755# 205-day weight growth spread on this beefpacking machine General Patton son. JRI Law N Order 254K3220 nursed a 6-year-old Basin Payweight daughter JRI Ms Good N Plenty 254E220 who flat knows how to raise babies and she's mighty efficient. Ms Good N Plenty's first baby JRI At Ur Service 254G320 sold in the '20 bull sale with a calving ease 73# birth weight and the beefpacker weaned off at 83% of Ms Good N Plenty's 1,035# body weight. Spreading birth to growth and weaning off scalebusters is a normal occurrence for Ms Good N Plenty as her son JRI Sawyer 254J320 sold in last spring bull sale with a scalebusting 985# actual weaning weight.

Increase Calf Crop Profit Using Homozygous Polled Bulls

Judd Ranch is always striving to add more value to your next calf crop. Homozygous polled bulls can reduce management issues and increase the value of your calves in the marketplace.

Tom Troxel, Arkansas extension beef specialist, says research shows that horned calves marketed at weaning age were discounted \$8/ cwt. On a 500-weight calf, that's \$40 removed from your pocket when you sell a horned calf. Turn the scenario around. That means if you sold polled calves, no discount would have occurred and you would benefit with getting that \$40 per head in your pocket. On a group of 50 calves, that's an additional \$2,000.

Data collected from nine Texas livestock auctions on 1,420 lots with 7,073 head shows that polled calves sold, on average, for \$22.87/cwt. more than their horned counterparts. That's \$114.35/head. On a group of 50 calves averaging 500 pounds/year, we're talking an additional \$5,717.50 just for selling polled or dehorned calves.

318 of the 334 Judd Ranch bulls selling on March 2 are Homozygous Polled.

JRI All Spice 254L427 knows all about the big city lights as All Spice was a member of Judd Ranch's 2024 National Champion Pen of 3 Gelbvieh Bulls in Oklahoma City in early January. All Spice's National Champion honors come as no surprise as All Spice's fifth-calf dam would be a full sister to a record ten National Champion Pen Bulls. All Spice's fifth-calf dam JRI Ms Sweet Thing 254E827 ET is one fertile machine with a 365-day annual calving interval. Ms Sweet Thing's unmatched fertility and producing ability comes as no surprise as she features a Dam of Distinction honored donor dam and two Dam of Distinction honored grandams. Ms Sweet Thing's Dam of Distinction honored donor dam and Dam of Distinction honored grandams were three of the all-time great donor females at Judd Ranch with the trio producing 106 natural and ET born calves. Rest assured, the cow efficiency is bred-in as All Spice weaned off at 80% of his dam's 1,325# body weight. (RC)

Producers, profitability in the beef industry all starts in the fertility department and it has been documented that fertility is 12 times more economically important than growth, carcass, etc. JRI Identified 254L48 offers you a tremendous opportunity to flat boost your all-important fertility and longevity levels. Identified's second-calf dam JRI Ms Patsy Cline 254H38 sports a remarkable 343-day annual calving interval. Ms Patsy Cline's remarkable 343-day annual calving interval comes as no surprise as she features two phenomenal Dam of Distinction honored grandams who have produced scalebusting progeny for 15-plus years. Ms Patsy Cline's two Dam of Distinction honored grandams JRI Ms Pd Blackhills 254E52 and JRI Ms Pd Blk Power 254C4 were two of the all-time great donor females at Judd Ranch with the duo producing 65 natural and ET born calves. Calving ease/beef machine genetics well equipped in the all-important fertility and longevity departments. (HP)

What a super stud to lead off the red homozygous polled purebred spring yearling offering. JRI Bosco 254L91 ET would be an ET son out of JRI Clementine 254Z8, Judd Ranch's phenomenal 10-year-old donor female who has been honored as a Dam of Merit/ Dam of Distinction female in every year of eligibility (2016 thru 2023). Clementine's a truly unmatched female in the fertility department to maintain Dam of Merit/Dam of Distinction honors for 8 consecutive years and at the same time, Clementine produced 44 natural and ET born calves. Clementine produces incredible Dam of Merit daughters, and her sons are beefpacking machines. On page 53, above Lot 209, you can check out a photo of Clementine's 2018 super stud natural born son. Judd Ranch retained Clementine's '22 son JRI Precision 254K94 ET as a herd sire and you can view that 1,406# 365-day weight super stud on page 81 above Lot 321. Bosco's ET black homozygous polled purebred ET brother JRI Dutton 254L98 ET sells as Lot 209 with a 72# birth weight, whopping 975# actual weaning weight.

The meat machine hammered the 365-day weight scales at 1,298 pounds with posting a feeder delite 4.74# ADG. Picasso progeny should really excel on the rail with the mighty impressive 16.8 square inch yearling ribeye and carcass-plus 3.9 IMF the meat machine scanned. Now pencil-in the all-important fertility factor as Picasso features 5 Dam of Merit honored grandams. Picasso did weigh 94 pounds at birth, but genetically Picasso should produce plenty of calving ease as he features top 15% calving ease EPD strength, and any geneticist will tell you that calving ease EPD strength is three times more accurate in predicting a bull's calving ease than actual birth weight.

Wow, you talk about a meat machine Growth Fund son fully equipped with all the profitable traits. JRI Go Getter 148L244 posted a whopping 1,010# actual weaning weight off his calf raising machine 6-year-old dam and the 1,010# actual weaning weight represented 74% of his dam's 1,370# body weight. On 365-day weight the meat machine pegged the scales at 1,371 pounds and note Go Getter's feed efficiency-plus 4.66# ADG. Producers, if you're retaining your feeders, carcass premiums should be forthcoming as Go Getter scanned a mighty impressive 15 square inch yearling ribeye with a carcass-plus 4.2 IMF. Rest assured; the all-important fertility factor is bred-in Go Getter as he features 5 fertility-plus/calf raising machine Dam of Merit honored grandams.

Wow, if you want to flat boost your performance, feed efficiency, carcass values and cow efficiency JRI Pinnacle 293L248 is fully loaded and he comes equipped with a calving ease 71# birth weight. Let's touch on performance and cow efficiency first as Pinnacle's whopping 890# actual weaning weight figures to be an amazing 94% of his first-calf dam's 955# body weight. Feed efficiency and added carcass merit comes in mighty handy if you're retaining your feeders and progeny out of Pinnacle should excel in feed efficiency and added carcass premiums should be forthcoming with the carcass-plus 4.8 IMF Pinnacle scanned. Rest assured; the fertility is bred-in as Pinnacle features 3 Dam of Merit honored grandams. Flip to pages 30 & 31 and you can view two first-calf 293 cow family daughters and note their scalebusting bull calves at side.

JRI Relentless 254L370 was a member of Judd Ranch's 2024 National Champion Pen of 5 Balancer Bulls and oh man, Relentless is flat loaded with beef, butt, guts & nuts. Relentless' fourth-calf dam JRI Ms Caroline 254F37 has been honored as a Dam of Merit female in every year of eligibility. Ms Caroline's Dam of Merit honors comes as no surprise as she features 2 breed elite Dam of Distinction honored grandams. Relentless should flat boost your performance levels as the meatwagon posted an actual 1,010# weaning weight and flat hammered the 365-day weight scales at 1,405 pounds. You might also note, if you're retaining your feeders, progeny out of Relentless should produce plenty of carcass premiums with the big ol' 16.9 square inch yearling ribeye and carcass-plus 4.3 IMF the meatwagon scanned.

JRI Paddington 253L325 ET would be an ET son out of JRI Miss Me 253Z22, Judd Ranch's phenomenal 11-year-old donor female who flat produces incredible beefpacking machine sons and fertility-plus/calf raising machine daughters. Miss Me has already produced three National Champion Pen Bulls and no doubt, her most famous son would be her natural born 2020 son, JRI Bandito 253H32. Bandito swept 2021 National Champion Bull honors and the meatwagon features a whopping 955# actual weaning weight with a scalebusting 1,377# 365-day weight. Flip to page 7 as you can view Bandito's photo and the beef, butt, guts & nuts specialist has 18 calving ease/powerhouse sons selling in the offering. Paddington has 4 flushmate ET full brothers selling as Lots 250, 276, 290 & 302 and wowsa, these boys are flat packed with beef, butt, guts & nuts just like their full brother Bandito.

JRI Raindance 254L280 was an alternate member of Judd Ranch's 2024 National Champion Pen of Balancer Bulls and wowsa, Raindance features a cow efficiency-plus mama. Raindance's calf raising machine mama JRI Ms Savannah 254J480 flat knows all about cow efficiency as Raindance posted a whopping 965# actual weaning weight which figures to be 81% of Ms Savannah's 1,190# body weight. Ms Savannah's big-time cow efficiency and calf raising machine skills come as no surprise as she features three Dam of Merit/Dam of Distinction honored grandams. I might add, Ms Savannah's three DOM/DOD honored grandams were three of the all-time great Judd Ranch donor females with the trio producing 109 natural & ET born calves. (RC)

JRI Pawnee 254L33's stats are way off the norm for his fertility-plus/calf raising machine mama JRI Ms Pride N Joy 254E23 as she was honored as a Dam of Merit female in her first two years of eligibility. I can tell you Ms Pride N Joy flat knows how to produce beef machine sons as the beefpacker photographed above Lot 283 was Ms Pride N Joy's '20 son JRI Patrick 254H330 (full brother to Pawnee). Patrick was a member of Judd Ranch's 2021 Reserve National Champion Pen of 5 Balancer Bulls and the beefpacker featured a 75# birth weight, whopping 965# actual weaning weight, scalebusting 1,285# 365-day weight. Personally, I'd call Pawnee a Diamond in the Rough, as genetically Pawnee is fully equipped with profitable traits.

Oh my, check out the exceptional stats on this meat machine Rainfall son: calving ease 84# birth weight and performance-plus 1,256# 365-day weight. If you retain your feeders, progeny out of Full Gage should excel in the feed efficiency and carcass merit departments as Full Gage posted a feeder delite 5.35# ADG and note the meatpacker's big ol' 15 square inch yearling ribeye coupled with a carcass-plus 4.0 IMF. Now pencil-in the all-important fertility factor as Full Gage's second-calf dam JRI Ms Victoria 254H99 ET is one fertile machine with a 343-day annual calving interval. Ms Victoria's unmatched fertility and calf raising machine ability come as no surprise as she features a Dam of Merit/Dam of Distinction dam and two Dam of Merit/Dam of Distinction honored grandams. No doubt, one of the most dominate producing females ever at Judd Ranch would be Ace of Spades' 14-year-old dam JRI Ms Special Blend 253W28 who has produced a boatload of meatwagon sons and incredible daughters. Ms Special Blend's most notable son would be JRI Prescribed Remedy 253E38 who has 31 calving ease/powerhouse sons selling in this offering. Producing meatwagon sons is a common occurrence for Ms Special Blend as her first son sold in the 2013 bull sale with a scalebusting 1,351# 365-day weight and the meatwagon reigned as the 2014 Canadian National Champion Bull. Several Ms Special Blend daughters are Judd Ranch leading donor females. One such donor daughter would be JRI Patina 253D38 who has three powerhouse ET sons selling as Lot 231,232 & 262 and producers, the trio sports a whopping 1,025# actual weaning weight with a scalebusting 1,364# 365-day weight average.

JRI Preston 9L45 would be the natural born son out of JRI Ms Nellie 9Z35, Judd Ranch's awesome 11-year-old donor female. Somehow Preston's birth weight did not get recorded but rest assured, Ms Nellie produces plenty of calving ease/moderate birth weights as her babies to date, have only averaged 75 pounds at birth. Ms Nellie usually strolls home at weaning time with a heifer calf at side and that is not a problem at Judd Ranch as Ms Nellie produces incredible daughters. Ms Nellie's last son JRI Passport 9E46 sold in the 2019 bull sale and the meat machine featured a calving ease 79# birth weight with a whopping 930# actual weaning weight. Ms Nellie's awesome producing ability comes as no surprise as she features two fertility-plus/calf raising machine Dam of Merit grandams.

Oh man, if you like big ol' juicy ribeye steaks progeny out of this meatpacking machine General Patton son should keep your freezer well stocked. JRI Prophet 25L22's 9-year-old fertility-plus/calf raising machine mama JRI Ms Judd Tradesman 25B12 flat produces powerhouse/carcass-plus sons. Ms Judd Tradesman's son JRI Judd Takeback 25F22 sold in the '19 bull sale and the meatpacker featured a whopping 960# actual weaning weight, scalebusting 1,354# 365-day weight, big ol' 15.4 square inch yearling ribeye with a carcass premium 6.5 IMF. Profitability in the feeding sector is all centered around performance, feed efficiency and added carcass values and Prophet has these profitable traits well covered...not to mention the unbelievable impact this cow family offers your program.

JRI Red Porche 270L353 ET would be an ET son out of JRI Ms Faithful 270Y25, Judd Ranch's 12-year-old donor female who flat knows how to get pregnant and raise babies. Ms Faithful possesses a 367-day annual calving interval and that 367-day figure is truly remarkable as during that time period she produced 26 natural & ET born calves. Ms Faithful is fully equipped with big-time cow efficiency as her first baby weaned off at 80% of her 1,220# body weight. Ms Faithful sons are packed with beef, butt, guts & nuts and wow, her daughters are fertile/calf raising machines. One such daughter would be her Dam of Merit daughter JRI Ms Radiate 270F35 who has five powerhouse ET sons selling and these boys posted a whopping 985# actual weaning weight average.

Add JRI Ring of Fire 214L34 to the list of "heifer bulls" selling and oh man, Ring of Fire features a beautiful calf raising machine dam and cow family. Ring of Fire's first-calf General Patton dam JRI Ms Princess Judd 214J34 possesses an awesome 98 teat/udder score and she excels in cow efficiency as Ring of Fire weaned off at 71% of Ms Princess Judd's 1,205# body weight. Fertility, calf raising machine and cow efficiency run mighty deep in Ring of Fire's pedigree as he features four Dam of Merit honored grandams. You can view one of Ring of Fire's Dam of Merit honored grandams on page 20 and note her bull calf at side that posted a whopping 1,020# actual weaning weight. "Heifer bull" genetics fully equipped in the all-important fertility and teat/udder departments.

JRI Red Baron 225L22 stems from the fertility-plus /calf raising machine Judd Ranch 225 Red Angus cow family that is fully loaded with beautiful females. Flip to page 82 and you can view Red Baron's grandam and note her exceptional natural fleshing ability and teat/udder excellence. Red Baron should be an excellent "heifer bull" as he features top 10% calving ease EPD strength and his 10-year-old dam JRI Ms Judd Cherokee 225A12 consistently produces modest birth weights as her nine babies have only averaged 71 pounds at birth. Red Baron should be an excellent "heifer bull" and producers, if you retain your feeders, progeny out of Red Baron should excel on the rail with the big ol' 15.8 square inch yearling ribeye and carcass-plus 4.9 IMF Red Baron scanned.

JRI Tranquility 25L210 weighed 91 pounds at birth and we know it because Judd Ranch honestly weighs every baby at birth and records the birth weight as such. Why Tranquility weighed 91 pounds at birth is beyond me as his 10-year-old dam JRI Ms Judd Packer 25A1 consistently produces modest birth weights as her 8 babies prior to Tranquility only averaged 78 pounds at birth. With Ms Judd Packer's modest birth weight track record on her babies, Tranquility should be equipped with plenty of calving ease and note he's sired by Trade Secret who is one of the top calving ease "heifer bulls" in the breed. Ms Judd Packer has produced 5 beef machine sons for Judd Ranch and she flat injects added carcass value into her sons as to date, her sons feature a mighty impressive 5.1 IMF average.

Producers, if you're new to the Judd Ranch program you'll find their record keeping, honesty, and integrity unmatched. If a calf weighs 105 pounds at birth, such as JRI Patton 254L322 ET, that birth weight is recorded at 105 pounds. Patton would be an ET son out of JRI Lil Missy 254W22, Judd Ranch's fabulous 13-year-old Dam of Distinction honored donor female. Patton would be Lil Missy's first ET calf and why he weighed 105 pounds is beyond me, as Lil Missy's natural born calves have only averaged 77 pounds at birth with an all-time high of 87 pounds. Lil Missy has produced four calving ease bulls prior to Patton and matter of fact Lil Missy's 2014 son JRI Profit Producer 254B32 ranks among the breed's all-time great AI sires and proven "heifer bulls".

This will be the first offering of Bieber CL Energize F121 sons and man, are they one awesome sire group. Energize ranks as one of the most widely used AI sires in the Red Angus breed and it comes as no surprise as his sons are widespread birth to growth beefpacking machines. Energize is a breed leader in calving ease, performance-plus growth and he ranks amongst the breed leaders with top 12% Grid Master carcass values. The sad news, Energize semen is really hard to come by, so these might be some of the last Energize sons. JRI El Dorado 054L offers you the excellent calving ease and added carcass values Energize produces as El Dorado features top 9% calving ease EPD strength, top 16% marbling EPD strength and note the beef machine's feed efficiency-plus 5.09# ADG.

JRI Easy Loving 47L31 stems from the calf raising machine 47 cow family and matter of fact, the beauty photographed above Lot 331 would be Easy Loving's grandam and note her exceptional natural fleshing ability and teat/udder excellence. Easy Loving was twin born to a DOA heifer calf and I can tell, Easy Loving's fourth-calf dam JRI Ms Judd Legend 47F21 flat knows how to raise babies. Ms Judd Legend's son JRI Real Deal 47K21 sold in last spring's bull sale and producers, the meat machine featured a 79# birth weight, whopping 1,258# 365-day weight with a boatload of beef, butt, guts & nuts. Easy Loving offers you excellent calving ease genetics and if you retain your feeders, progeny out of Easy Loving should produce a boatload of carcass premiums as Easy Loving is the No. 1 IMF bull in the sale offering with a mighty impressive 5.4 IMF.

JRI Movin On 18L rounds out the Judd Ranch 46th Bull Sale catalog and from start to finish throughout the sale catalog you'll find fertility-plus genetics and remember, fertility has been documented as 12 times more economically important than growth, carcass & etc. JRI Movin On 18L nursed a third-calf Defender daughter JRI Ms Judd Defender 18G who is mighty fertile with a 361-day annual calving interval. Movin On offers you tremendous calving ease with his calving ease 79# birth weight and his third-calf dam has been a birth weight moderator with a 74# birth weight average on her babies. Producers, if you're feeding out your calves and hanging them on the rail, the key profitable traits are feed efficiency and added carcass merit and Movin On should boost your feed efficiency and carcass premiums with the 4.73# ADG/ carcass-plus 4.3 IMF he posted.

Producers when you have Gelbvieh cross females (heifer calves, bred heifers or cows) for sale, give Ashley Judd a call at 785-248-6005. We receive calls throughout the year looking for replacement Gelbvieh cross females and we'd love to help you place them at NO COST on Judd Ranch's Website! www.juddranch.com

Judd Ranch Customers Profit from Selling on the Grid

Judd Ranch bull customers who have been following their Gelbvieh-influenced and Balancer-influenced fat cattle on the rail and selling on the grid have found that their Judd Ranch-influenced Gelbvieh- and Balancer-influenced cattle outperform the U.S. industry average of 7 to 8 percent Prime and 70 percent Choice.

Travis Olson, Triple O Ranch, South Dakota has been purchasing Judd bulls for six years when wanting it all - performance (pounds) and carcass quality - Travis started his search for a new bull supplier for his family's 300 head Angus-based females. This led him to making the 600-mile drive to Pomona to check out the Judd Ranch program. Impressed with what he saw, the Olson's have been a customer ever since. Travis says the Judd bulls increased averaged finished weights 50 to 75 lb. per head. That's more than 15,000 total pounds - money in the bank. As farmer-feeders, the family's goal is to finish calves at 13 months of age. The family is excited about the carcass results of their 2020 calf crop that averaged 86% Choice or higher. Sold on the Judd Ranch program, Travis summarizes, "If you are feeding and finishing straight Angus cattle, I highly recommend you try a Judd Ranch Gelbvieh bull and see how much you will gain."

2021 Triple O Ranch Carcass Data - All sired by Judd Ranch bulls

Avg. Harvest Weight	Avg. ADG	Avg. Yield	Avg. Quality Grade
155 Heifers 1,300 lb.	3.33 lb./day	63%	87% Choice or better
145 Steers 1,425 lb.	3.65 lb./day	63.25%	86% Choice or better

Gerald Merz from Missouri has had a similar "happy camper" experience selling his Gelbvieh- and Balancer-influenced fats on the grid. Every steer in Gerald's first load of 36 head of fats in 2018 graded Choice or better, with 14 of the 36 grading Prime and 11 qualifying for the CAB program. Sired by Judd Ranch purebred Gelbvieh bulls and out of Angus cows, these steers were what Gerald calls "the industry's highly desired Continental X British crosses." In another group of Judd Ranch Gelbvieh- and Balancer-influenced fats, 11 out of 18 went Prime and four or five went CAB. All were Choice or higher. The Missouri cattleman's formula for success: Judd Ranch purebred Gelbvieh and Balancer bulls on Angus and Angus X Judd Ranch-influenced females. "I've been using performance bulls for more years than I can count and have been retaining ownership and selling on the rail for 15 to 20 years. I figure I can either get paid for my better genetics or someone else will," Gerald explains. "With the dryness, I've been weaning the middle of August. The calves go on silage and a little corn. They stay on that ration, and I increase their corn as they get bigger. They're 17 to 18 months old when they are harvested. "As the kill sheets show, Judd Ranch Gelbvieh-sired and Balancer-sired cattle are definitely performing mighty fine on the rail for me."

Bill and Kathy Stoltz, BK Ranch, Wisconsin, are among the cow-calf producers who expect more from their Gelbvieh-influenced cattle and simply wouldn't be happy if only 7 to 8 percent of their fat cattle went Prime. "We're getting right at 50 percent Prime, and it's been a long time since we had any cattle grade less than Choice," Bill explains. The cattle that have been performing so well on the rail for Bill and Kathy are "more Gelbvieh than anything else." The Stoltz's cow herd has a "bit of Angus" in them and a whole lot of Judd Ranch Gelbvieh. Bill adds that, the last five to six years, they have been using purebred Gelbvieh bulls. "If people think Gelbvieh and Balancers won't grade, then they might want to pick different bulls," Bill interjects. "A lot of how cattle grade hinges on picking the right bulls. I am really fussy about buying bulls with good carcass values, and that has been paying off."

Tracy Lake, a cow-calf producer from Idaho, has been using Judd Ranch bulls for close to 20 years. He's also been feeding out cattle and selling them on the grid for the same amount of time. His 1,500 head of mother cows are black crossbreds, primarily Gelbvieh X Simmental or Gelbvieh X Angus. Using Charolais bulls on his Judd Ranch-influenced Gelbvieh cross females, his calves are averaging 61 to 64 percent on yield. Tracy estimates that, on average, his steers hit about 10 percent Prime and 70 percent Choice — or better. "Genetics are important, and feed is equally important," he tells. "We like to turn over the cattle. As soon as we think they will grade, they sell on the grid." Tracy attributes being successful on the grid to two factors: genetics and feed. And he's adamant that it takes a darn good cow to produce a good calf that performs start to finish. "We love our Gelbvieh-influenced cows," he continues. "I can't say enough good about our Gelbvieh crossbred cows. Their calves perform well on the rail."

Mark Wray started feeding cattle when he got out of college. At first, he purchased what he thought were "really good calves" from the auction barn. But, despite the calves being Angus, he said they were missing the boat when they hung on the rail. "Then I heard a guy giving a presentation say that the best animal you can feed is a Continental X British cross, and that got me to thinking," Mark elaborates. "I knew Judd Ranch just down the road had the best Continental cattle out there and I could raise my own cattle and benefit from selling them on the grid. Plus, I could improve my cow herd at the same time. "So, I started buying Judd Ranch bulls — purebred Gelbvieh — and putting them on our 300 Angus mama cows. I knew that with Judd Ranch bulls I would get bulls that excel in maternal traits and growth traits and my calves would be that highly desired Continental X British cross." This commercial cowman from Kansas says his first set of home-raised Judd Ranch-influenced Continental X British cross calves hung on the rail "really well." "But the big benefit to using Judd Ranch bulls was once my Judd Ranch-influenced heifers were in production," he explains. "For the past three years, I've been putting Judd Ranch Balancer bulls on my crossbred (Angus X Gelbvieh) females and 'Wow!'. Our yield on those calves went up a full percent. "That's a \$20 to \$30 a head premium." Mark adds that, year in and year out, 10 to 11 percent of his calves are grading Prime and another 80 percent are grading Choice. That's 90 to 91 percent consistently grading Choice or better. He points out that Judd Ranch genetics are giving him the yield he needs to sell on the grid, without sacrificing quality grade. "We've been using Judd genetics to make better mama cows, and we're picking up some yield at the same time," Mark states. "The myth out there that Gelbvieh or Balancers won't sire calves that will work on the grid is not accurate. It's just that — a myth. It's a false belief. "Our calves and the premium we've been getting are proof that Gelbvieh-cross and Balancer-cross calves work on the grid. Heck, I sure enjoy that extra \$20 to \$30 per head."
