

COYOTE® Access Solutions™ Cabinets

The **COYOTE Access Solutions Cabinets** are pre-assembled to your exact specifications to begin splicing right out of the carton, providing a substantial labor savings. Each cabinet is made from rugged 16-gauge steel and has a durable powder-coat finish that comes in almond or black. High-density splicing and patching can be achieved in one cabinet with the craft-friendly COYOTE splice trays and integrated fiber storage. Cabinets can be ordered with adapter modules (UPC or APC) and color coded pigtails to match your application. All multi-mode fiber grades available.

Features and Benefits

Wall Mount Cabinets

- Provides protected fiber splicing and connectivity
- Optional lock for inner door secures the splicing compartment
- Each cabinet may be ordered with adapter modules or pre-terminated with pigtails to an exact specification
- Pre-terminated cabinets are 100% tested for optical insertion loss after assembly
- Installation and mounting hardware included

Rack Mount Cabinets

- Provides protected fiber splicing and connectivity
- Universal mounting bracket to fit 19" (482 mm) or 23" (584 mm) racks
- Each cabinet may be ordered with adapter modules or pre-terminated with pigtails to an exact specification
- Pre-terminated cabinets are 100% tested for optical insertion loss after assembly
- Clear front door and access panels are removable for easy entry
- Lockable rear splicing compartment

Contact PLP for more details on ribbon pigtail assemblies and 3mm jacketed jumper cable assemblies. All multi-mode fiber grades are available.

▶ COYOTE® Legacy Splice Trays

The **COYOTE Legacy Splice Trays** are necessary components within most COYOTE fiber optic closures to manage, store, and protect fibers and splices. COYOTE splice trays are injection molded and have hinged, clear plastic covers to protect and allow for visible inspection of the fibers. They are available in low, standard, and deep profile heights to provide the desired splice count. The splice trays come in short and long versions for either single fusion or mass fusion/ribbon splicing. Short splice trays are used in the COYOTE Access Solutions™ WDC2, WDC4 and RDC2 cabinets. Long splice trays are used in the COYOTE Access Solutions WDC8, WDC12, RDC3, RDC6, RDC12, RDC12X, and RDC24 cabinets.

Features and Benefits

- Routing channels allow fibers to enter the splice tray at the same entrance point, allowing buffer tubes and transportation tubes to easily coil within the closure
- Buffer tubes or transportation tubes are secured to the splice trays with felt and tie wraps
- Available in low profile, standard, and deep profile heights to achieve the desired splice count within the closure
