## SISTEMA DE FILTROS PARA AUTOMOTORES

### FUNCIONES DEL FILTRO DE AIRE

Purifica el aire aspirado por el motor reteniendo polvo y partículas.  
 Reduce el ruido del motor y optimiza su rendimiento.  
 Mantiene un consumo normal de combustible.  
 Regula la tasa de contaminación.

Frecuencia de cambio : \*ver gráfico

### FUNCIONES DEL FILTRO DE COMBUSTIBLE

Retiene y elimina los diferentes contaminantes (agua e impurezas) contenidos en el combustible.  
 Evita las disfunciones del motor.  
 Protege el sistema de inyección y la bomba de combustible.  
 Reduce la tasa de contaminación.

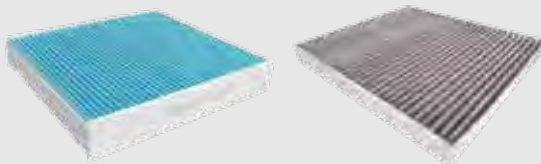

Frecuencia de cambio : Cada 15.000 km

### FUNCIONES DEL FILTRO DE ACEITE

Conserva la calidad del lubricante del motor depurando las diversas partículas nocivas que pueden deteriorar las piezas en movimiento.  
 Evita que el motor se ensucie.  
 Evita un desgaste prematuro del motor.  
 Evita una contaminación creciente emanada por el vehículo.

Frecuencia de cambio : Cada 5.000 km

### FUNCIONES DEL FILTRO DE HABITÁCULO

Mejora de la calidad del aire en el interior del vehículo.  
 Retiene más del 90% de las partículas de talla superior al micrón.  
 Elimina la totalidad de bacterias. Es anti-bacteriano.  
 Permite disminuir la concentración de los contaminantes en el habitáculo.  
 Asegura la limpieza del tablero de abordo.  
 Protege los elementos de climatización.  
 Reduce la capa grasa del parabrisas.

Frecuencia de cambio : Cada 20.000 km

## CALIDAD DE LOS FILTROS

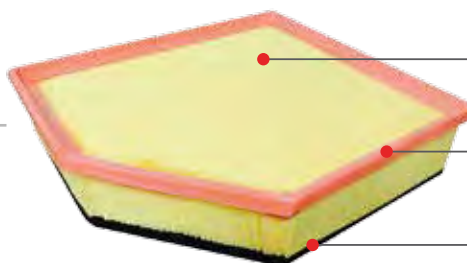

### FILTROS PARA AIRE

Medio filtrante:  
Felpa de filtración progresiva para alto nivel de higrometría.

Estructura solida en polipropileno.

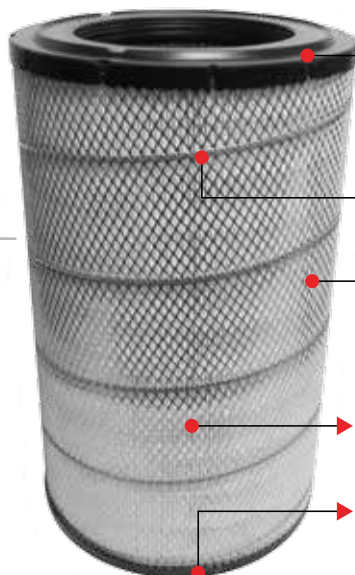

Empaque en poliuretano.

Medio filtrante:  
Papel en celulosa.

Estructura flexible en poliuretano para mayor ajuste.

Prefiltro en espuma.

Aro en poliuretano de alta resistencia para mayor ajuste, garantizando la fijación y el total hermetismo entre el elemento filtrante y la carcasa; soportando altos niveles de temperatura.

Refuerzo de grafado helicoidal para maximizar la rigidez y robusticidad del filtro.

Medio filtrante con microporosidad de alta eficiencia y resistencia para alto nivel de higrometría. Tratado químicamente y plegado homogéneamente, proporcionando un área de filtrado uniforme.

Facetado separador de plises que reparte de manera uniforme el flujo de aire a través del medio filtrante.

Tapa Metálica en lámina que garantiza mayor resistencia y durabilidad del filtro.

## POLÍTICA DE GARANTÍA

Nuestra compañía ofrece garantía de los productos de acuerdo con los siguientes parámetros y condiciones:

1.) El producto ofrece hasta 12 meses de garantía después de la fecha de venta. El almacenaje debe ser en condiciones apropiadas, en un lugar sin humedad y como mínimo a 10 cm del piso.

2.) En los filtros para aire se deben verificar las condiciones de contaminación ambientales y de conducción para determinar el tiempo de uso, como sigue a continuación:

### FILTRO PARA AIRE SERVICIO LIVIANO

- Condiciones Mínimas de contaminación : 10.000 Km
- Condiciones Normales de contaminación : 8.000 Km
- Condiciones Extremas de contaminación : 4.000 Km o menos.

### FILTRO PARA AIRE SERVICIO PESADO

- Condiciones Mínimas de contaminación : 15.000 Km
- Condiciones Normales de contaminación : 10.000 Km
- Condiciones Extremas de contaminación : 6.000 Km o menos.

Para el correcto funcionamiento del filtro para aire es importante verificar que todo el sistema de admisión este en óptimas condiciones y que no permita el paso de humedad o ingreso de otros elementos luego del proceso de filtración.

3.) En los filtros para combustible motores a gasolina, se garantiza que en condiciones normales estos pueden funcionar de 15.000 a 20.000 Km, sin embargo es importante que la calidad del combustible cumpla con los estándares mínimos de uso y limpieza.

En los filtros para combustible motores a Diésel, en condiciones normales estos pueden funcionar entre 10.000 y 15.000 Km, sin embargo es importante que el combustible diésel cumpla con los estándares mínimos de limpieza, pureza y almacenamiento.

4.) En los filtros para aceite o lubricante, en condiciones normales de uso deben funcionar entre 5.000 y 6.000 Km, sin embargo es importante revisar las horas de uso del motor ya que son diferentes a los kilómetros recorridos.

5.) En los filtros para aceite o lubricante LINEA XT se garantiza una vida útil de 10.000 a 12.000 Km en condiciones normales de uso en vehículos con lubricantes sintéticos.

6.) En los filtros para aire acondicionado o cabina, estos tienen un funcionamiento en condiciones normales de 15.000 Km, sin embargo dependen de las condiciones ambientales y la contaminación de la cabina, lo que disminuye el tiempo de uso.

7.) En todas las aplicaciones de filtros para aire, aceite y combustible es muy importante seguir las instrucciones de correcta instalación, las cuales están en el catálogo de nuestra compañía e indica paso a paso cada uno de los procedimientos. En caso que alguno de estos procedimientos no se cumpla, no aplicará la garantía de los filtros.

Los filtros fabricados y comercializados por nuestra compañía son manufacturados con los más altos estándares y controles de calidad, sin embargo en caso que algún filtro presente un defecto por la fabricación o las especificaciones técnicas del producto, nuestra compañía será responsable por el reemplazo del producto sin ningún tipo de costo para el cliente.

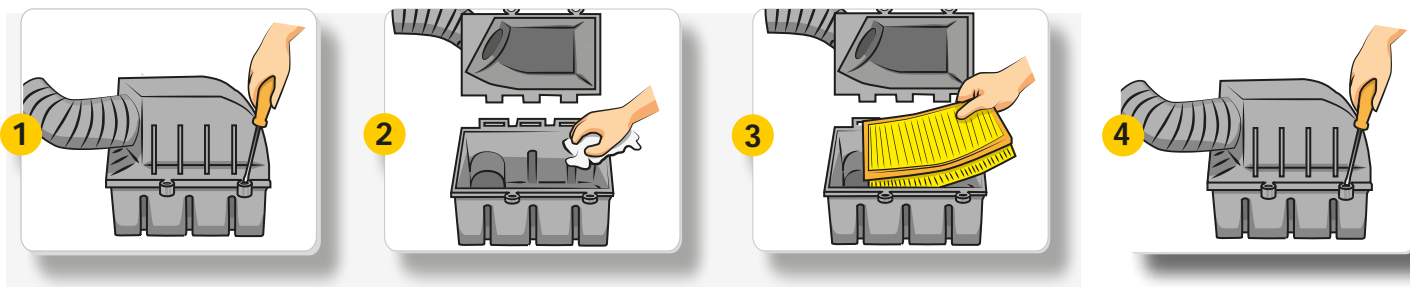

En caso de que alguno de los filtros presente fallas y este cause algún tipo de daño al motor o algún elemento deba ser reparado, PREMIUM FILTERS asumirá en forma de reembolso, los costos razonables para la reparación del motor o los elementos involucrados; para lo anterior se debe tener en cuenta el tiempo de uso del motor, y las condiciones tecnomecánicas del mismo o de los demás elementos. Para la determinación y cumplimiento de esta garantía, nuestra compañía debe ser informada de forma inmediata al hecho, el cliente debe recolectar las pruebas físicas (documentos, registro fotográfico, filtros, muestra de lubricante y elementos afectados) y verificar la magnitud del daño. A la par, se debe iniciar el proceso de reclamación formal por escrito establecido por la compañía para el respectivo análisis y valoración.

PREMIUM FILTERS solicita que se cumplan cada uno de los pasos anteriores para la validación de la Garantía, de lo contrario no es viable y no es aceptable.

## MANUAL DE INSTRUCCIONES DE MONTAJE

### FILTRO PARA AIRE

- Con el motor apagado retire la tapa del filtro, puede estar apretada con tuercas mariposa, abrazaderas, tornillos, etc..
- Remueva el filtro de aire usado. Limpie la carcasa de la tapa cuidadosamente con un trapo húmedo para evitar la entrada de contaminantes.
- Instale el filtro de aire nuevo, verificando que el lado correcto este bien situado en la carcasa.
- Verifique que los empaques del filtro y de la carcasa estén en posición adecuada.
- Reinstale la tapa del filtro.

### FILTRO PARA ACEITE

- Ecurrir el aceite del carter y retirar el filtro utilizado desajustándolo; en esta operación puede ser necesario el uso de herramientas como: llaves, extractor, etc..
- Limpie la base del filtro.
- Verifique que el empaque del filtro a instalar este en posición correcta.
- Aplique una película de aceite de motor en el empaque del filtro a instalar.
- Cuando el filtro a instalar tenga una posición vertical, se debe llenar de aceite antes de instalarlo.
- Sin utilizar herramientas, enrosque el nuevo filtro hasta que el empaque se adhiera a la base.
- Enrosquese apretando más de 3/4 de vuelta.
- Añadir nuevo aceite y poner el motor en marcha durante unos minutos, observando que no se presenten fugas.
- Si es necesario, reapréte manualmente.

## MANUAL DE INSTRUCCIONES DE MONTAJE

### FILTRO PARA GASOLINA

- El cambio de filtro debe hacerse con el motor frío
- Libere los gases del tanque de combustible aflojando la tapa de llenado.
- Remueva los tornillos de las abrazaderas con herramientas apropiadas y desconecte el filtro usado.
- Asegúrese de que el diámetro de la boquilla del filtro nuevo es idéntico al filtro retirado.
- Conecte el nuevo filtro a las mangueras, observando la dirección del flujo que se indica en la pieza.
- Compruebe si las mangueras están en buenas condiciones. Si están gastadas y / o con fisuras, sustituir las para evitar fugas.
- Las boquillas del filtro deben penetrar 15 mm en las mangueras.
- Coloque nuevamente los tornillos de las abrazaderas. Prenda el motor observando que no presenten fugas.

### FILTRO DE ELEMENTO

- Remover la tapa de la carcasa.
- Retirar el filtro usado, girando y halando suavemente.
- Revisar que el empaque "O'ring" haya sido removido con el filtro usado.
- Lubricar el empaque "O'ring" y el centro del ojal del filtro nuevo.
- Limpiar y verificar la carcasa del filtro.
- Cerrar completamente la carcasa de acuerdo a las instrucciones y las marcas que indican el torque y el cierre.

## MANUAL DE INSTRUCCIONES DE MONTAJE

### FILTRO PARA COMBUSTIBLE

- Limpie el área alrededor del filtro.
- Retire el filtro utilizado, desajustándolo; en esta operación puede ser necesario el uso de herramientas.
- Limpie la base del filtro en el motor.
- Llene de combustible el filtro a instalar, hasta su parte superior.
- Sin utilizar herramientas, enrosque el nuevo filtro hasta que el empaque se adhiera a la base.
- Enrosque apretando más de 3/4 de vuelta.
- Para sacar el aire del sistema de inyección, siga las instrucciones como lo indica el fabricante del motor.
- Poner el motor en marcha durante unos minutos para comprobar que no se presenten fugas.
