

JUNG SEEDS & PLANTS

SPRING 2023

FAMILY OWNED & OPERATED FOR 116 YEARS

DRAGONFLY HYBRID

Dragonfly Hybrid Pepper

02840—(75 Day)—Sweet, flavorful, pretty purple peppers. This 2022 AAS Winner boasts juicy, thick walls, helping the fruits hold longer after harvest, unlike the papery thin walls of its competition. The 4-lobed bell peppers average 3½ inches and are just as delicious when picked green as they are at the mature purple stage. Highly prolific plants are resistant to Tobacco Mosaic Virus. Fruits will turn red if left to fully mature on the plant.

(A) 1 Pkt. (10 seeds) \$4.75; 3+ \$4.35 ea

RISE UP AMBERNESS™

Rise Up Amberness™ Rose

25590—Zones 4-9—(PPAF)—A gorgeous climber that can survive tough Midwestern winters. Labeled as a mini-climber because it can be trained to a support structure or grown as a shrub, this versatile rose displays a profusion of amber-yellow, ruffled blooms throughout the summer. Disease-resistant plants require very little maintenance - not even deadheading. Blooms on new wood. Plant in full sun.

Ht: 3-5'. OWN ROOT PP
1 plant \$22.95; 2+ \$21.95 ea

SWEET CHERRY TEA™

Sweet Cherry Tea™ Ninebark

21691—(*Physocarpus opulifolius* 'ZLEBic5')—Zones 3-7—(P.P. 31235)—A reblooming, colorful North American native shrub. In spring, the foliage begins reddish-orange before turning rich purple and clusters of delicate pink flowers appear at the tips of branches, giving way to rose-red fruits. In midsummer, plants bloom again, making them a valuable, easy-care addition to the landscape. Requires very little pruning to maintain its shape. Plant in full sun. Ht: 3-4'. PP

1 plant \$24.95; 2+ \$22.95 ea

RASPBERRY BERET

Raspberry Beret Echinacea

11526—(*E. hybrida*)—Zones 4-8—(PPAF)—A vibrant pink, double coneflower for the front of the border. Beginning in midsummer, well-branched plants produce oodles of tufted blooms that measure 4 inches across with their ray petals extended. The flowers sit atop dense rosettes of rich green foliage, creating a wonderful display that lasts until frost. Part of the Double Coded™ series. Plant in full sun to part shade. Ht: 18-20". PP

1 plant \$16.95; 3+ \$15.95 ea

GOLDEN RAY HYBRID

Golden Ray Hybrid Sunflower

06120—Create a living floral arrangement in your garden. Instead of flowering at the top or tips of the branches, this unique sunflower produces blooms up and down the central stalk in a gladiolus-like arrangement. The 2-4 inch yellow flowers shade to golden yellow around the central cone. Performs best when the top flower is removed. Plant in full sun. Ht: 4½-5½'.

(A) 1 Pkt. (25 seeds) \$4.45; 3+ \$4.05 ea

STONEHENGE DARK DRUID®

Stonehenge Dark Druid® Yew

22988—(*Taxus x media* 'SMNTHDB')—Zones 4-7—(P.P. 32419)—A great alternative to boxwood that can be grown in either full shade or full sun. This evergreen forms a compact mound of soft, fern-like foliage, providing beautiful year-round color to landscapes. Naturally endowed with a rounded, dwarf habit, these shrubs rarely require regular pruning. Great for low hedges and containers. Ht: 3-4'. PP

1 plant \$27.95; 3+ \$25.95 ea

Jungseed.com
From Our Garden to Yours

Dear Gardening Friends,

Welcome to the 2023 gardening season! We're excited to get started and hope you are too. There are new additions sprinkled throughout the catalog, and we've highlighted some of our favorites on page 3. In addition, take a look at big and bold Megatron Hybrid Jalapeño on page 63, reblooming New Vintage™ Rose Yarrow on page 94, and dramatic Nightrider Asiatic Hybrid Lily on page 95.

As costs continue to soar, please know that we tried to limit price increases as much as possible. We recognize the important role summer vegetable gardens play in household budgets. As we enter our 116th year of serving gardeners, we look forward to taking care of your gardening needs. We value each order we receive, big or small, and truly appreciate your business.

Wishing you a successful year in your garden,
The Staff of J. W. Jung Seed Co.

Helpful Symbols

About Our Plants

An easy way to spot our "new" catalog listings. Although not always new to the market, they are new to our catalog.

Indicates varieties we feel are best in their category. They offer outstanding quality.

Our "J Exclusive" symbol indicates a variety only available from Jung.

Identifies past and present All-America Selections winners. Winners have been tested at trial sites around North America and have proven themselves superior.

Identifies varieties that are popular with many customers. These are "tried and true" favorites that you can count on.

Denotes vegetable varieties in commerce for over 50 years. These open-pollinated selections are ideal for seed saving.

Indicates varieties that are returning to our catalog after a brief absence.

Some of our more popular vegetables are now available as Certified Organic Seed and have an additional price line noted in **Red**. J. W. Jung Seed Co. (Randolph, Wisconsin) is certified by MOSA (Midwest Organic Services Association).

FREE STANDARD SHIPPING
on orders of \$100 or more
through February 28, 2023
See page 2 for details.

To qualify for FREE SHIPPING, your merchandise total must be **\$100 or more** before taxes or any other fees are added. The entire order must be sent to one address. All in-stock seeds and sidelines are shipped when the order is received. All in-stock nursery items are sent at their proper planting time. Offer applies to standard shipping only.

AMISH GOLD SLICER

CANDYSTRIPE

Free Trial Seeds

Amish Gold Slicer Tomato and Candy Stripe Cosmos

Trial packets are yours **FREE** with a \$10.00 order received by **MAY 1, 2023, or while supplies last.** (Order must be \$10 without shipping charges or tax)

Amish Gold Slicer Tomato

00034—(80-85 Day)—*Great for both canning and slicing on sandwiches and salads.* Bursting with excellent, full tomato flavor, the attractive 3-4 inch golden orange fruits are blemish-free and average 4-6 ounces each. Indeterminate.

PRICE OF ADDITIONAL SEED:

(A) 1 Pkt. (20 seeds) \$3.25; 3+ \$2.95 ea

Candy Stripe Cosmos

05519—(*Cosmos bipinnatus*)—*No two blooms look exactly alike.* Single, 3-4 inch blooms are white with variable markings in shades of rose to crimson. Airy plants are ideal for the back of the border and flower from summer to frost. Ht: 3-6'. Annual. ☉ ♂ ♀

PRICE OF ADDITIONAL SEED:

(A) 1 Pkt. (75 seeds) \$3.25; 3+ \$2.95 ea

MARGARET'S

Margaret's Pepper

03184—(62 Day)—*One of the sweetest peppers you'll ever grow.* The fruits are huge, about 7 inches long, with color that transitions from green to orange to deep red. Plants bear early, yielding large amounts of fruits with thick walls and mild, sweet flavor. Originally brought from Hungary by a family member of Margaret Gubin from Cambria, WI, who carefully maintained the stock seed for over 50 years.

(A) 1 Pkt. (20 seeds) \$3.75; 3+ \$3.45 ea
BUY A PACKET OF MARGARET'S PEPPER FOR JUST 99¢, ENTER ITEM NO. EB03184

(MERCHANDISE TOTAL MUST BE \$25 OR MORE TO QUALIFY. OFFER EXPIRES MARCH 1, 2023)

AMERICAN GOLD RUSH

Perennial of the Year

American Gold Rush Rudbeckia

13971—(*R. hybrida*)—(P.P. 28498)—Zones 4-9 *More compact and disease-resistant compared to classic 'Goldsturm'.* Plants have built-in resistance to Septoria leaf spot, making them great for wet, humid climates. Golden yellow, 2-inch blooms appear in abundance from July to September. Drought tolerant once established. Ht: 22-26". ☉ ♂ ♀ PP

1 plant \$15.95; 3+ \$14.95 ea

Bumper Crop Sale!

R&R RED ALERT

R&R Red Alert Daylily

15716—Zone 3-9—*Velvety red blooms are a highlight in the summer landscape.* Five-inch blooms are bright, pure red with chartreuse-green throats. Blooms in mid to late summer. Developed by our sister company Roots & Rhizomes. Tetraploid. Ht: 28-34". ☉ ♂ BR

STELLA DE ORO

Stella de Oro Daylily

15358—Zone 3-9—*The most popular landscape daylily of all time!* Stella is prized for its all-summer display of golden-yellow, 2-3 inch flowers that are gently ruffled with lightly recurved petals. Plants grow vigorously and are trouble-free. Diploid. Ht: 15-20". ☉ ♂ BR

REGAL AIR

Regal Air Daylily

15288—Zone 3-9—*Great for naturalizing, this daylily quickly fills spaces.* Raspberry-red, 6-inch blooms have small, yellow-green throats and are produced in abundance. Blooms early to midseason and reblooms reliably. Diploid. Ht: 32-36". ☉ ♂ BR

Price of above 3 daylilies (mix or match): 1 plant \$7.25; 3+ \$6.50 ea; 6+ \$5.75 ea

Grafted Tomato & Vegetable Plants

Grafting joins the top of one plant – the scion – to the root system of a separate variety – the rootstock. As the tissues fuse, the vigor and disease resistance of the rootstock combines with the exceptional fruit qualities of the original variety. The result is a 'Super-Powered' plant.

TOMATO PLANTS

Grafted tomato plants provide a good soil-borne disease resistance package that includes: Corky Root Rot, Fusarium Wilt Races 1 & 2, Fusarium Crown Rot & Root Rot, Verticillium Wilt, Nematodes, and Tomato Mosaic Virus.

Ketchup 'n' Fries™

39580—Harvest tomatoes and potatoes from the same plant! We know it sounds a little like science-fiction, but because tomatoes and potatoes come from the same family, it works! There are no GMOs involved, it's simply a tomato plant hand-grafted to the rootstock of a potato. Plant in a container, at least 15 gallons, or in-ground. Either way, it's a great way to maximize your garden space. The tomato is a red cherry-type, producing up to 500 sweet fruits through the growing season. Once the top stops bearing, cut the plant back to ground level. Wait about 2 weeks and then harvest up to 4 1/2 pounds of delicious, white potatoes. Special growing instructions will be included. **PP**

1 plant \$16.95; 3+ \$14.95 ea; 6+ \$12.95 ea

GREEN

RED

Jung's Jumbo Tomato Cages

Measure a whopping 18"x18" wide and 58 1/4" high with 8 support legs. Extenders add 24" more to the height.

These JUMBO folding cages provide more growing space and support for raising big tomato plants. Constructed of heavy-duty galvanized steel with a powder-coated finish of green or red.

Tomato Cage Extenders

Extenders measure 18"x18" wide by 24" high. When clipped to the cages, the cages will measure over 6 feet tall.

54269—GREEN EXTENDERS

54272—RED EXTENDERS

1 set of 2 extenders \$47.95

OPTIONAL EXTENDER

Purple Cow Organics® Tomato Gro

51020—Addresses the specific needs of tomato plants that need food early and often. It's specially prepared to encourage microbial life in the soil, plus has added natural organic ingredients (no manure) to create a bio-catalytic effect that makes nutrients more available for plant uptake. Just a few handfuls of this compost added to garden soil or other planting mediums at planting time will feed the plant and take care of its growing needs all season.

12 qt. bag (approx. 7 lbs.) \$16.95

MADE IN WISCONSIN

Garden Vegetable Plants

These plants are garden ready, large and sturdy 6-8 inch plants grown in individual 2 1/4 inch pots in our special growing mix. As long as the danger of frost is past, they are ready to be hardened off and planted into the garden.

ABOUT OUR STRAWBERRY PLANTS
 Our virus-free plants are propagated under rigid supervision of state inspection to ensure you receive top-quality plants. Choose from:
June Bearing—Pick big crops during late spring and early summer.
Everbearing and Day-Neutral—Harvest big crops in June, followed by lighter crops through summer until frost.

Everbearing & Day-Neutral

EVIE-2

Evie-2

30023—Zones 4-8—*One of the highest yielding day-neutral varieties available.* Disease-resistant plants are less sensitive to warm summer temperatures that can shut down fruit production. Berries have excellent color and flavor, and maintain a good size through the season. Day-neutral. **BR**
25 for \$20.95; 50 for \$36.95; 100 for \$64.95; 250 for \$116.95; 500 for \$209.95

SEASCOPE

Seascope

30034—Zones 4-7—*Ideal for growing in containers as well as the garden.* Seascope produces fruit repeatedly throughout the growing season. Enjoy fresh strawberries in June, midsummer and fall. The large, conical-shaped berries are bright red inside and out with exquisite flavor that keeps you wanting more. Widely adapted and ideal for hydroponic production. Day-neutral. ○ **BR**
25 for \$20.95; 50 for \$36.95; 100 for \$64.95; 250 for \$116.95; 500 for \$209.95

ALBION

Albion

30015—Zones 4-7—(P.P. 16228) *Highly regarded for its high yields of large berries.* Berries are very firm and red throughout. A high sugar content gives them wonderfully sweet flavor that is excellent for preserves and fresh eating. Vigorous plants can be grown both in the garden and in hanging baskets. Everbearing. ○ **BR**
25 for \$20.95; 50 for \$36.95; 100 for \$64.95; 250 for \$116.95; 500 for \$209.95

FORT LARAMIE

Fort Laramie

30020—Zones 3-7—*The best variety for hanging baskets and containers as it has the ability to fruit on its runner plants.* The large berries are bright red throughout with outstanding flavor that is sweet and aromatic. Highly productive all season with later berries maintaining good size. Very hardy. Everbearing. ○ **BR**
25 for \$17.95; 50 for \$31.95; 100 for \$56.95; 250 for \$99.95; 500 for \$179.95

OZARK BEAUTY

Ozark Beauty

30030—Zones 4-8—*Our most popular everbearer.* Strong, vigorous plants bear large, uniform berries with rich red coloring throughout and distinct honey-sweet flavor. Use for freezing, canning or fresh eating. Everbearing. Please note: Plants may be smaller than other varieties ordered. With proper care, they will quickly catch up. ○ **BR**
25 for \$17.95; 50 for \$31.95; 100 for \$56.95; 250 for \$99.95; 500 for \$179.95

ZONES: Hardiness Zones

STRAWBERRY MANAGEMENT: In Zone 5 and colder, replace day-neutral varieties every year and everbearing varieties every 1 to 2 years. Plants should be set 12-15 inches apart; cut off all runners as they form. Removing runners encourages multiple crown formation; the more crowns the more fruit. On spring-planted June-bearing types, remove all blossoms for 1 year. For everbearing types, remove all blossoms for 6-8 weeks the first spring, then allow plants to set fruit. Fertilize after harvest.

NOVA

KILLARNEY

LATHAM

DOUBLE GOLD

PRUNING TECHNIQUES FOR SUMMER-BEARING RASPBERRIES
After plants are established, cut out all 2-year canes immediately after harvest and also thin out the weaker canes. In spring, before new growth starts, thin out remaining canes, leaving 3 to 4 of the largest canes per 1 foot of row. The tips may be cut back, but not too much or you will reduce your crop.

Tissue culture plugs are the most disease-free stock available. They are nursery matured and have well-developed root systems with a canes about 1 foot tall. They pop into growth very quickly with little transplant shock and will give you plantings that last for years.

Summer Bearing

Nova

30355—Zones 3-8—*Don't worry about sub-zero temperatures with this raspberry.* Nova takes harsh winters in stride, dependably producing large crops of firm, bright red, medium-to-large berries in midsummer. The fruits have superb flavor and keep remarkably well. Nearly thornless canes have an upright habit. Resistant to most common cane diseases. ○ **BR**
5 for \$20.95; 10 for \$37.95; 25 for \$84.95; 50 for \$152.95; 100 for \$269.95

Boyne

30345—Zones 3-8—*Hardy and dependable!* Developed in Canada, Boyne has vigorous, heavy canes that produce large, high-quality fruits that freeze well. Bears a little earlier than Latham. A long-time favorite. (Not pictured). ○ **BR**
5 for \$20.95; 10 for \$37.95; 25 for \$84.95; 50 for \$152.95; 100 for \$269.95

Killarney

30349—Zones 3-8—*Superior hardiness and top quality fruit.* Plants yield well and are medium size with very sturdy canes. The red fruit has excellent sweet flavor and sizes up slightly larger than Boyne. An excellent choice for home garden, fresh market, U-pick and freezing. Ripens about a week after Boyne. ○ **BR**
5 for \$20.95; 10 for \$37.95; 25 for \$84.95; 50 for \$152.95; 100 for \$269.95

Latham

30350—Zones 3-8—*OUR TOP SELLER SINCE 1922!* After many years, Latham remains the most widely planted summer-bearing red raspberry and sets the standards for all others. Fruits are sweet and excellent for jams, jellies, fresh use and freezing. Outstanding yields and high quality berries make it unquestionably one of the most profitable varieties for either the home or market garden. Hardy even as far north as Canada. ○ **BR**
5 for \$20.95; 10 for \$37.95; 25 for \$84.95; 50 for \$152.95; 100 for \$269.95

Double Gold

30328—Zones 4-7—(canes hardy to Zone 5)—(P.P. 24811)—*Named 'Double Gold' because warmer zones can get two crops of berries.* In Zones 5 and warmer where the canes may overwinter, this variety will fruit on the previous year's growth, giving you berries in summer and again in fall. In Zone 4, treat as a fall bearing variety. The sweetly flavored, medium-size berries have a firm texture, their color golden champagne flushed with pink. Recommended for home gardens and U-pick farms. Freezes well. ○ **BR**
5 for \$26.95; 10 for \$46.95; 25 for \$102.95; 50 for \$179.95; 100 for \$314.95

30360 (X)—5 each of Joan J, Anne and Latham, a \$66.85 value for **\$56.95**

RASPBERRY SHORTCAKE—See page 10.

BLACK RASPBERRIES

Bristol

30306—Zones 5-8—*Intense black raspberry flavor.* Large, firm, glossy, jet-black berries have flavor that is very rich, yet mild and sweet. Delicious for fresh eating, desserts, freezing, canning, and jelly. Shows some tolerance to powdery mildew. Widely adapted to most climates and soils. Ripens midseason. (Not pictured). Tissue culture plugs. ○ **Plugs**
3 for \$23.95; 6 for \$42.95; 12 for \$77.50

JEWEL

Jewel

30310—Zones 5-8—*The largest fruited black raspberry.* Jewel combines hardiness with high yields, vigor and disease resistance. A cross of Bristol and Dundee, the glossy black fruit is extra large and firm with rich, black raspberry flavor. Ripens midseason. Tissue culture plugs. ○ **Plugs**
3 for \$23.95; 6 for \$42.95; 12 for \$77.50

Jung Jump-Start Raspberry Food

STRENGTHENS ROOTS AND STIMULATES INCREASED FRUIT SET. USE ON NEW OR ESTABLISHED PLANTINGS.

ANNE

CAROLINE

Raspberries

HERITAGE

JOAN J

Fall Bearing

RASPBERRY SAMPLER #1
30365 (X)—5 each of Caroline, Anne and Killarney plus 3 Bristol, a \$88.80 value for **\$74.95**

Anne

30323—Zones 3-8—*The largest, best-tasting, highest quality yellow raspberry.* Light yellow fruits have extra-sweet flavor and do not crumble. Ripens from late August through October. Can also be grown as a summer bearer in Zones 4 and 5 (see pruning techniques below). ○ **BR**
5 for \$22.95; 10 for \$39.95; 25 for \$87.95; 50 for \$154.95; 100 for \$272.95

Heritage

30335—Zones 4-8—*Our top-selling fall-bearing variety.* This time-tested cultivar has vigorous upright canes that require little staking. Easy to pick fruits are large, bright red and firm. Plants set out in spring often produce a light crop of fruit the first fall. Ripens from late August until frost. ○ **BR**
5 for \$20.95; 10 for \$37.95; 25 for \$84.95; 50 for \$152.95; 100 for \$269.95

Caroline

30324—Zones 4-8—*High in vitamins and antioxidants.* Research at Ohio State University found Caroline produced more cancer-fighting antioxidants, beta carotene, and vitamins A, E, and C than other raspberries. The fruits are very large, firm and cohesive with an exquisite flavor. Plants ripen at least 2 to 3 weeks earlier than Heritage, resulting in a longer harvest period. Plants have good tolerance to root rot and yellow rust. Very vigorous, highly productive canes grow up to 6 feet tall and require sturdy support. Widely adapted, performing well all across the country. ○ **BR**
5 for \$20.95; 10 for \$37.95; 25 for \$84.95; 50 for \$152.95; 100 for \$269.95

Joan J Thornless

30333—Zones 4-8—(P.P. 18954)—*Early, large yields on thornless canes.* Hardy, thornless canes produce an abundance of fruits with mouth-watering sweet flavor. An excellent variety for U-pick, market growers and home gardeners alike. The large, red berries release easily and are relatively firm so they keep well. Ideal for both fresh use and freezing. ○ **BR**
5 for \$22.95; 10 for \$39.95; 25 for \$87.95; 50 for \$154.95; 100 for \$272.95

PRUNING FALL-BEARING (EVERBEARING) RASPBERRIES
The preferred and most popular method is to cut back canes at ground level in the fall after a killing frost. This will eliminate a summer crop, but will produce an earlier and larger fall crop. If a more continuous supply of berries is preferred, cut canes to 2½ feet while dormant. Remove these canes the next summer after fruiting.

Our hardy raspberry plants are nursery matured, well-rooted, bare root plants. Black raspberries are sent as tissue culture plugs (see note at left). By planting both summer-bearing and fall-bearing types, you can enjoy fresh raspberries nearly all summer.

PLANTING TIP: Space plants 2 feet apart in rows 6-8 feet apart. Plant roots only as deep as they were grown in the nursery or just covered. If planted too deep, only half of the plant will grow. After plants are set, cut canes back to 3-4 inches above the soil. Keep soil moist with 1 inch of water per week (2½-3 gallons every other day).

Asparagus

JERSEY SUPREME HYBRID

Jersey Supreme Hybrid

04505 (PL)—Reigns supreme in quality, earliness and productiveness. The large, green spears are tender and flavorful from top to bottom. This predominantly all-male hybrid can be harvested a full year earlier than open-pollinated strains. Has very good rust resistance and tolerance to fusarium. Adapts to most climates and soil types. ○ BR

10 for \$16.95; 20 for \$29.95; 50 for \$67.95; 100 for \$121.95

JERSEY KNIGHT HYBRID

Jersey Knight Hybrid

01013 (PL)—One of the best asparagus varieties for the home garden. This predominantly all-male hybrid is widely adapted, hardy in cold winter climates and tolerant to hot summers of the South. It does well in all soils, including heavy clay types, and is highly resistant to rust, fusarium and other diseases. Best of all, the spear quality and flavor is fantastic. ○ BR

10 for \$16.95; 20 for \$29.95; 50 for \$67.95; 100 for \$121.95

MILLENNIUM HYBRID

Millennium Hybrid

04502 (PL)—Widely adapted, outstanding quality. This predominantly male hybrid developed by the University of Guelph in Ontario, Canada, produces tender, high-quality spears with excellent flavor. It has quickly become a favorite for gardeners and foodies alike. Grows well in all soil types, even heavier clay soils. It has good rust resistance and produces outstanding yields. ○ BR

10 for \$16.95; 20 for \$29.95; 50 for \$67.95; 100 for \$121.95

SWEET PURPLE

Sweet Purple

04498 (PL)—Gourmet quality. Deep purple spears are very thick with no fibrous strings so the entire spear can be used. Flavor is unique, sweeter than green asparagus with a mild, nutty taste. A delicacy when cooked and so tender it's often eaten raw. Very productive. Turns green when cooked. ○ BR

10 for \$16.95; 20 for \$29.95; 50 for \$67.95; 100 for \$121.95

MARY WASHINGTON

Mary Washington

Widely planted and very dependable. Produces long, green, tender spears with tight tips. Rust tolerant. ○ BR

ASPARAGUS OFFER #2
04499 (X)—10 each of Jersey Knight Hybrid and Millennium Hybrid, a \$33.90 value for **\$28.95**

ASPARAGUS CULTURE: Zones 3-10—When properly planted, a bed of asparagus can provide many years of eating pleasure. Follow all planting instructions sent with new crowns. Asparagus plants prefer full sun and organically rich soil that is slightly alkaline. Do not harvest spears for the first year or two. An asparagus-loving family should plant 10-15 crowns per person to yield enough asparagus. Plant crowns 12-15 inches apart with 3-4 feet between rows. We ship heavy 1 year roots.

Jung Jump-Start Asparagus Food

BOOST YIELDS IN NEW AND ESTABLISHED PLANTINGS. PROMOTES BIGGER SPEARS.

51025—This water soluble, 17-16-28 slow-release fertilizer is easy to use. Just mix with water. Apply in spring and repeat after harvest.

1 lb. \$10.95

Grass Beater®

52330—Kills weedy grasses without injuring desirable plants. This systemic post-emergent herbicide replaces Poast and can be sprayed over vegetable plants, flower beds, trees, shrubs and ground covers to eliminate quackgrass and other weedy annual and perennial grasses. Stops growth of weed grasses within 2 days. Follow label instructions for mixing rates.

8 oz. concentrate \$29.95

Rhubarb

CANADA RED

Canada Red

04582 (PL)—Zones 3-8—Very sweet and productive. This variety produces long, thick stalks that have a dark red color with a lighter red interior. Cooks up to a nice strawberry-red color. Naturally sweet so it requires less sugar than most. ○ BR

1 plant \$14.95; 3+ \$12.95 ea; 6+ \$10.95 ea

CRIMSON RED

Crimson Red

04485 (PL)—Zones 3-8—The perfect balance between sweet and tart. Each plant produces loads of bright red, 24-inch plump stalks that are tender but not stringy. Tangy, sweet-tart taste many consider the best in rhubarb. A very winter-hardy and disease-resistant variety that will produce for years. ○ BR

1 plant \$14.95; 3+ \$12.95 ea; 6+ \$10.95 ea

Victoria

03400 (PL)—Zones 3-8—The rhubarb Granny grew. Has an old-fashioned tart punch flavor. Thick, meaty, tender stalks have a reddish exterior and green interior. (Not pictured). ○ BR

RHUBARB OFFERS
04487 (X)—1 each of Canada Red and Crimson Red, a \$29.90 value for **\$24.95**

04488 (X)—1 each of Canada Red, Crimson Red and Victoria, a \$42.85 value for **\$35.95**

RHUBARB CULTURE: Rhubarb, often called pieplant, is some of the earliest produce in the spring. It's delicious for sauces, pies and baked goods. Plant roots shallow, only 1-2 inches below natural grade in loose, well-drained, organically rich soil. Water consistently to establish, but do not over-water as roots are sensitive to rot. Note: Organic material on roots can mold during transit. Wipe or wash off with warm soapy water, air dry, and plant roots as soon as possible. We ship #1 size bare root divisions.

BIRD X NETTING—Protect your valuable fruit crops from foraging birds. Available in multiple sizes. See page 35.

Blackberries

PRIME-JIM®

Prime-Jim®

30377—Zones 5-8—(P.P. 16989)—First-year canes bear big crops, even in cold climates. Grow Prime-Jim® the same as everbearing raspberries. Allow the canes to grow for a season, then cut them back just above the ground after harvest. Allow the thorned canes to grow for a second year and they will produce a crop beginning mid to late June. Even if the canes are damaged by severe winter temperatures, the new growth will bear a crop of fruit. First-year canes begin ripening in late summer and continue to bear large, firm, delicious berries until frost. ○ Plugs

1 plant \$15.95; 3+ \$14.95 ea; 6+ \$12.95 ea

Triple Crown Thornless

30385—Zones 5-9—Ripens a week to 10 days earlier than Chester Thornless. Vigorous plants produce loads of large, glossy black berries with excellent flavor. Easy to pick. A USDA release. (Not pictured). ○ Plugs

1 plant \$13.95; 3+ \$12.95 ea; 6+ \$11.95 ea

THORNLESS OFFER

CHESTER

PRIME-ARK® FREEDOM

Chester Thornless

30380—Zones 5-9—Highly productive. Large, glossy berries have sweet, rich flavor. Excellent for fresh use, freezing, and mouth-watering jams, jellies and baked goods. Hardier than most and has resistance to cane blight. Ripens midsummer. ○ Plugs

1 plant \$13.95; 3+ \$12.95 ea; 6+ \$11.95 ea

Prime-Ark® Freedom Thornless

30373—Zones 6-9—(P.P. 26990)—Produces huge, sweet berries with excellent flavor, an extended harvest and painless picking. This special blackberry produces an early crop of berries on second-year canes, plus another crop on new canes in the fall. With adequate protection, plants may be grown in Zone 5, but will perform best when grown in Zones 6 and above. ○ Plugs

1 plant \$15.95; 3+ \$14.95 ea; 6+ \$12.95 ea

BLACKBERRY CULTURE: Thornless (semi-erect) blackberry canes tend to trail on the ground like vines for the first season. After 2 years, canes grow more upright and naturally branched to tie to supports.

BABY CAKES® BLACKBERRY—See page 10.

DWARF NORTHCOUNTRY

Dwarf Northcountry

30132—Zones 3-7—*One of the best blueberries for the edible landscape.* Slightly earlier and larger than Dwarf Northsky, the compact, bushy plants spread up to 3 feet wide. One of the most adaptable blueberries for less-than-optimal soil types. Mature plants yield 2-7 pounds of medium-size, sky-blue fruits with scrumptious, mild blueberry flavor. Dark green summer foliage turns bright scarlet in fall. Hardy to -35°F. Ht: 1½-2'. ○ PP

1 plant \$18.95; 3+ \$17.45 ea

DWARF TOP HAT

Dwarf Top Hat

30146—Zones 3-7—*The perfect blueberry for containers, borders or even bonsai.* Abundant white blooms in spring are followed by small, light blue berries that have distinctive wild blueberry flavor. Imagine enjoying fresh blueberries right off the bush while sitting on your patio! Attractive, dark blue-green foliage turns bright red and orange in fall. Ht: 18". ○ PP

1 plant \$18.95; 3+ \$17.45 ea

DWARF NORTHSKY

Dwarf Northsky

30137—Zones 3-7—*Space-saving plants bred for hardiness.* An outstanding variety for areas with severely cold winters and abundant snow cover, surviving to -40°F. Plants are covered with dense, dark green, glossy foliage that turns dark red in the fall. The medium size sky-blue fruits have rich, wild blueberry flavor. Each bush yields up to 2 pounds of fruit. Developed at the University of Minnesota. Ht: 18-24". ○ PP

1 plant \$18.95; 3+ \$17.45 ea

SPACE-SAVER BLUEBERRY OFFER
30120 (X)—1 each of Dwarf Northcountry, Dwarf Northsky, Dwarf Northblue and Dwarf Top Hat, a \$75.80 value for **\$63.95**

DWARF NORTHBLUE

Dwarf Northblue

30125—Zones 3-7—*This blueberry has it all—beauty, hardiness and top-quality fruit.* Hardy to -35°F, the "half-high" plants are covered with large, glossy, dark green foliage that turns dark red in the fall. Large, dark blue fruit is easy to pick with average yields of 3-7 pounds per mature bush. Fruit production is maximized by winter snow cover. Introduced by the University of Minnesota. Ht: 20-30". ○ PP

1 plant \$18.95; 3+ \$17.45 ea

REKA

Reka

30136—Zones 4-7—*Fast growing and highly adaptable.* Hailing from New Zealand, this blueberry is said to be the fastest growing and most adaptable variety currently available. Vigorous plants perform well in a wide variety of soil types, from light and sandy to heavier clay, and even wetter ground than many other varieties tolerate. The medium to large, dark blue fruits ripen in abundance early in the season and have an exceptional rich flavor that is ideal for fresh eating. Lush green foliage turns burgundy-red in fall. Ht: 4-6'. ○ PP

1 plant \$18.95; 3+ \$17.45 ea

SWEETHEART

Sweetheart

30144—Zones 4-8—*Early and large yields of delicious berries, plus the possibility of a second crop!* The result of a cross between Southern and Northern highbush varieties. Sweetheart bears a large crop of light, powdery-blue berries early in the blueberry season and when conditions are favorable, a second crop in late summer. The fruits are delightfully sweet and firm—ideal for both fresh eating and baking. Vigorous bushes yield up to 15 pounds of fruit per plant. Ht: 5-6'. ○ BR

1 plant \$16.95; 3+ \$15.45 ea

Blueberry Special Fertilizer

51125—*Formulated to give blueberry plants the boost they need for maximum yields.* Contains 12-12-12 fertilizer with added magnesium and sulfur. Use on established plants and apply annually for best results.

4 lb. bag \$13.95

PATRIOT

Patriot

30145—Zones 3-7—*Giant-size berries and super-hardy plants.* Patriot originated in Maine where hardiness is a must. Slightly spreading plants with an upright, open habit are highly productive, yielding an average 10-20 pounds of fruit. The berries are very large and firm with good flavor for fresh use, preserves or freezing. Has fiery orange fall foliage. Adapts to many soil types. Ht: 4-5'. ○ BR

1 plant \$16.95; 3+ \$15.45 ea

NORTHERN BLUEBERRY OFFER #1
30117 (X)—1 each of Bluejay, Northland, Reka and Patriot, a \$68.80 value for **\$57.95**

NORTHLAND

Northland

30135—Zones 3-7—*Outstanding hardiness. Grow blueberries, even in northern Wisconsin and upper Michigan.* Developed at Michigan State University, Northland is a cross between selected native lowbush and highbush blueberries. Highly productive, yielding up to 12 pounds or more of fruit per plant. Dark blue, small to medium fruits have rich, wild berry flavor. Matures early. Blossoms will tolerate a light frost. Ht: 3-4'. ○ BR

1 plant \$16.95; 3+ \$15.45 ea

DUKE

Duke

30122—Zones 4-7—*Consistently high yielding.* One of the more popular varieties in the mid-Atlantic region, this early-ripening blueberry produces heavy crops of medium-to-large sized, firm, light blue berries. The flavor is mild, a bit more tart than sweet, and improves with cold storage. A great fresh market variety. Developed by the USDA. Ht: 4-6'. ○ PP

1 plant \$18.95; 3+ \$17.45 ea

PERPETUA BLUEBERRY—See page 10.

Blueberries

CHANDLER

Chandler

30112—Zones 4-7—*The biggest fruits of any blueberry.* This outstanding selection produces sweet, flavorful fruits the size of cherries. The vigorous, upright bushes provide consistently high yields for up to 6 weeks in midsummer. Slightly more tender than other blueberries we offer, so in colder regions give it a sunny, sheltered location or extra winter protection. Ht: 5-6'. ○ BR

1 plant \$16.95; 3+ \$15.45 ea

Rubel

30142—Zones 4-7—*An heirloom blueberry with twice the disease-fighting antioxidant levels of other varieties.* A wild selection from the 1900s, Rubel has the delectable full flavor of wild blueberries. The small berries are perfect for pies, pancakes and muffins. Strong plants are cold hardy and consistent producers. Foliage turns fire red in fall. Ripens late midseason. (Not pictured). Ht: 6'. ○ BR

1 plant \$15.95; 3+ \$14.95 ea

Bluejay

30105—Zones 4-7—*Big crops of big berries!* One of the best known midseason varieties. Produces big clusters of large, high quality, powder-blue fruits with truly delicious flavor. Beautiful burgundy fall color. (Not pictured). Ht: 4-6'. ○ BR

1 plant \$15.95; 3+ \$14.95 ea

NORTHERN BLUEBERRY OFFER #2
30118 (X)—1 each of Rubel, Duke, Friendship and Sweetheart, a \$70.80 value for **\$59.95**

Friendship

30115—Zones 3-7—*Superb wild blueberry flavor.* A true wild blueberry selected by the University of Wisconsin that is well-adapted to colder areas. The deep blue, medium-sized fruits are borne in loose clusters for easy picking. Fruit flavor is superb, comparable to wild blueberries. Ripens in early July. Green summer foliage turns brilliant orange-red in the fall. (Not pictured). Ht: 2-4'. ○ PP

1 plant \$18.95; 3+ \$17.45 ea

BLUEBERRY CULTURE: Blueberry plants last for many years and increase in size and productivity as the bushes become older. They are somewhat self-fruitful, but fruit set will be greater by planting more than one variety. Blueberries require a loose, acid soil (pH of 5.0 or less) well-supplied with organic matter. When planting, we suggest working ¼-½ lb. of Aluminum Sulfate (page 36) per plant into the soil. To maintain proper soil pH, apply Blueberry Special Fertilizer (see left) each year and a top dressing of Soil Sulfur (page 36) every 3-4 years.
Cannot ship to: AK, GA, HI, MI, WA.

Small Fruits

ELDERBERRIES

Cultivated Elderberries

Zones 4-8—*Delicious fruit on carefree, attractive plants.* Cultivated elderberries are vigorous and productive with fruit much larger and sweeter than wild elderberries. Excellent for pies, wine and jelly. Large, creamy-white flower heads in early summer make it a showy ornamental. Plants should be spaced 7-8 feet apart. Two varieties are required for pollination. A single plant is almost entirely unfruitful. Our elderberry offers include cultivars Adams #1 and York. Ht: 6-8'. ○ BR

ELDERBERRY PRICING:

- 30162 (X)—1 of each (2 plants) for **\$23.95**
- 30163 (X)—2 of each (4 plants) for **\$37.95**

JOSTABERRY

Jostaberry

30255—(*Ribes x nidigrolaria*)—Zones 3-8—*These large, black berries are a delicious sweet-tart cross of Gooseberry and Black Currant.* Loaded with vitamin C, the plump yet firm berries are excellent for fresh eating, jams and jellies. The easy-to-grow, self-fruitful shrubs are resistant to many diseases and pests that typically plague currants and gooseberries. Easily adaptable to moist soils with little or no use of fertilizers or pesticides. Hardy to -40°. Ht: 3-5'. ○ BR

1 plant \$15.95; 3+ \$14.50 ea; 6+ \$11.95 ea

SHIPPING RESTRICTIONS FOR JOSTABERRY, CURRANTS AND GOOSEBERRIES. *Cannot ship to: AK, DE, HI, ME, MA, NC, NH, NJ, RI, WV.*

RED LAKE

Red Lake Currant

30155—Zones 2-7—*The most widely grown red currant.* Vigorous bushes produce clusters of big, delicious, bright red berries that ripen in July. Makes a sparkling red jelly. Easy to pick. Ht: 3-5'. ○ BR

1 plant \$13.95; 3+ \$12.95 ea; 6+ \$11.95 ea

PINK CHAMPAGNE

CONSORT

Pink Champagne Currant

30153—Zones 3-7—*Amazing yields!* Long trusses of pink-blushed, translucent berries are produced in abundance, causing the branches to bend under their weight. Flavor is more delicate than that of black currants and less tart than red currants. Plants have a vigorous, upright growth habit and excellent resistance to leaf diseases. Ht: 3-5'. ○ BR

1 plant \$19.95; 3+ \$17.95 ea; 6+ \$15.95 ea

Consort Currant

30150—Zones 4-7—*Outstanding flavor!* The small, 1/4-inch berries are high in vitamin C and have a unique, sweet flavor reminiscent of blackberries. The self-fruitful shrubs set large amounts of fruit, even during cooler summers. Resistant to white pine blister rust, though somewhat susceptible to mildew. Begins ripening in July. Ht: 4-6'. ○ BR

1 plant \$14.95; 3+ \$13.95 ea; 6+ \$12.95 ea

ROVADA

Rovada Currant

30156—Zones 3-7—*Fruits taste as good as they look.* Rovada bears heavy crops of very large, translucent red berries borne in long clusters. The fruits are delicious eaten fresh or made into jams and jellies. Plants have good vigor and disease resistance, plus they are late to flower, thus escaping late-season frosts. Fruit ripens in late July. Ht: 3-5'. ○ BR

1 plant \$19.95; 3+ \$17.95 ea; 6+ \$15.95 ea

CURRANT OFFER
30166 (X)—1 each of Red Lake, Consort, Pink Champagne and Rovada, a \$68.80 value for **\$57.95**

PIXWELL

Pixwell Gooseberry

30185—Zones 4-7—*Prolific yields of large, delicious berries.* Usually bears the year after planting. Fruits hang on slender stems an inch below the branches, making them easy to pick. Plants are nearly thornless. Green berries turn pink when ripe and are soft, juicy and sweet. Makes delicious pies, jams and jellies. Self-fruitful. Ht: 3-4'. ○ PP

1 plant \$14.95; 3+ \$13.95 ea; 6+ \$12.95 ea

TIXIA™

Tixia™ Gooseberry

30187—(var. Rafzivicta)—Zones 3-7—*Jumbo fruits on nearly thornless canes.* Developed in Switzerland where gooseberries are favorites, Tixia™ allows for painless picking as its one-year canes have few thorns, and those that remain are relatively soft. Large, elongated, smooth red fruits with succulent 'sweet-tart' flavor are delicious fresh and also make mouth-watering pies, jams and jellies. Fruit ripens in July. High-yielding plants are mildew resistant. Ht: 3-5'. ○ PP

1 plant \$16.95; 3+ \$15.95 ea; 6+ \$14.95 ea

INVICTA

Invicta Gooseberry

30184—Zones 3-7—*JUMBO-size fruits.* Originating in England, this prized culinary gooseberry bears huge, sweet, greenish-yellow berries that are delicious for fresh eating, pies, preserves and freezing. Vigorous, spiny, spreading bushes yield a prolific quantity of fruit. Has excellent resistance to mildew and other diseases, as well as late spring frosts. Fruits ripen in July. Self-fruitful. Ht: 3-5'. ○ PP

1 plant \$15.95; 3+ \$14.50 ea; 6+ \$12.95 ea

GOOSEBERRY OFFER
30191 (X)—1 each of Tixia™, Pixwell, Invicta and Hinnomaki Red™, a \$62.80 value for **\$52.95**

HINNOMAKI RED™

Hinnomaki Red™ Gooseberry

30183—Zones 3-7—*Big berries with unique flavor.* An outstanding variety from Finland combining superb flavor; high yields of beautiful, dark red fruit; and good mildew resistance. Fruits have tangey outer skin and succulent, sweet flesh for a unique 'sweet-tart' flavor. They're great fresh and make some of the best pies you've ever tasted. Very adaptable and self-fruitful. Ht: 3-5'. ○ PP

1 plant \$14.95; 3+ \$13.50 ea; 6+ \$11.95 ea

BABY CAKES®

Bushel and Berry® Fruits

Baby Cakes® Blackberry

30371—(*Rubus* 'APF-236T')—Zones 4-8 (P.P. 27032)—*The only thornless, dwarf blackberry currently available.* Designed to be compact and easy to grow. The rounded, upright plants require no staking. Bright white flowers appear in spring and summer, followed by sprays of large berries that are sweet and not bitter. Both old and new canes may fruit in some locations. Ht: 3-4'. ○ PP

1 plant \$17.95; 3+ \$16.25 ea

PERPETUA

Perpetua Blueberry

30107—Zones 4-8—(P.P. 24209)—*This fruiting shrub can give two crops of fruit a season!* Bushy, vase-shaped plants set the first small, sweet berries in mid summer, then flower and bear a second crop in fall. Glossy, dark green foliage takes on reddish hues in the fall, making it highly ornamental. Can be planted either in-ground or grown in containers on the patio. Requires acidic soil (see page 36 for soil amendments). Ht: 4-5'. ○ PP *Cannot ship to: AK, GA, HI, MI, WA.*

1 plant \$17.95; 3+ \$16.25 ea

RASPBERRY SHORTCAKE®

Raspberry Shortcake® Raspberry

30326—(*Rubus idaeus* 'NR7')—Zones 4-9 (P.P. 22141)—*It is thornless and compact!* Dense plants grow much shorter than traditional raspberries, making them ideal for containers. Beginning in midsummer, you'll harvest red, deliciously sweet berries on both new and old canes. Expect a few berries the first year with larger crops the following years. Plants will spread moderately if planted in the ground. Self-pollinating. Ht: 2-3'. ○ PP

1 plant \$17.95; 3+ \$16.25 ea

BRIANNA

FRONTENAC™

ITASCA

SOMERSET

Hardy Grapes

CONCORD

Wine Grapes

Brianna

30203—Zones 3-9—*A wine grape loaded with tropical fruit flavors.* This white grape bred by Elmer Swenson makes a palate-pleasing, semi-sweet white wine with aromas of pineapple, banana and mango. Also makes a nice grape juice and blends well into other wines, adding a fruity taste without being overbearing. The 6-8 foot vines have good resistance to the most common grape diseases and produce medium-sized clusters of grapes that begin ripening in August. ○ BR
1 plant \$14.95; 3+ \$13.95 ea; 6+ \$12.95 ea

Frontenac™

30216—Zones 4-8—*One of the hardiest wine grapes.* Vigorous vines consistently produce abundant large clusters of small, blue-black berries. Makes a full-bodied, high-quality red wine with a cherry bouquet that also hints of berry and plum. Exhibits good resistance to downy and powdery mildew. Ripens midseason. From the University of Minnesota breeding program. ○ BR
1 plant \$15.95; 3+ \$14.45 ea; 6+ \$12.95 ea

FRONTENAC™ GRIS

Frontenac™ Gris

30217—Zones 4-8—*Coppery-peach-colored grapes have the aroma of apricot, peach, tropical fruit and citrus.* Developed by the University of Minnesota, this mutation of Frontenac™ makes wonderful white table, dessert and ice wines, and is also good for fresh eating and desserts. Plants have excellent resistance to downy and powdery mildew. ○ BR
1 plant \$15.95; 3+ \$14.45 ea; 6+ \$12.95 ea

ST. CROIX™

St. Croix™

30229—Zones 4-8—*Sweet, red-juiced grape for wine-making and dessert.* Makes a good quality wine. Medium to large berries ripen in late August on highly productive vines. A University of Minnesota introduction. ○ BR
1 plant \$14.95; 3+ \$13.45 ea; 6+ \$11.95 ea

Itasca

30213—Zones 4-8—(P.P. 29847)—*A release from the University of Minnesota.* These grapes have a lower acidity and high sugar levels, producing a dry white wine containing aromas of pear, quince, violet, melon, minerals and subtle honey notes. Vines are extremely cold hardy and exhibit excellent resistance to both downy and powdery mildew, as well as the insect phylloxera. Fantastic for growers looking to reduce spraying or just make a good white wine. Ripens midseason. ○ BR
1 plant \$16.95; 3+ \$15.45 ea; 6+ \$13.95 ea

KING OF THE NORTH

King Of The North

30220—Zones 4-8—*Vigorous, productive vines are resistant to common grape diseases and insects.* Fruit is medium size, juicy, tart and borne in tight clusters. Ripens early September. A very hardy labrusca riparia hybrid originally found in an old neighborhood in Madison, Wisconsin. ○ BR
1 plant \$14.95; 3+ \$13.45 ea; 6+ \$11.95 ea

MARQUETTE

Marquette

30224—Zones 4-8—(P.P. 19579)—*Hardy and highly disease-resistant.* This University of Minnesota release has superb parentage that includes Frontenac™ and Pinot Noir. The berries have a high sugar content and moderate acidity, producing wines with ruby-red color and a bouquet with notes of cherry, berry, black pepper and spice. Resists downy mildew, powdery mildew and black rot. Plants have an open growth habit. Good candidate for making ice wine. Ripens mid-September. ○ BR
1 plant \$16.95; 3+ \$15.45 ea; 6+ \$13.95 ea

Table Grapes

Somerset Seedless

30227—Zones 4-8—*Wisconsin bred, northern hardy.* The earliest, sweetest, hardiest and highest quality red seedless grape available. Bred by Elmer Swenson from Osceola, Wisconsin, this table grape bears clusters of medium-sized, seedless berries with sweet, strawberry-like flavor. While edible at the pink stage in August, flavor will be even sweeter if left to ripen to full red. Superb for fresh eating, juice, and jelly. Quite disease-resistant. ○ BR
1 plant \$16.95; 3+ \$15.45 ea; 6+ \$13.95 ea

RELIANCE

Reliance Seedless

30225—Zones 5-8—*Harvest big clusters of sugar-sweet, seedless red grapes.* The high quality fruits are superb for fresh eating, wine and juice. Plants have resistance to common grape diseases. Keeps in storage up to 3 months. Ripens late August to early September. ○ BR
1 plant \$14.95; 3+ \$13.45 ea; 6+ \$11.95 ea

SEEDLESS GRAPE OFFER
30241 (X)—1 each of Somerset, Mars, Reliance and Marquis, a \$61.80 value for **\$52.95**

ST. THERESA

St. Theresa Seedless

30228—Zones 4-8—*Hardy and highly adaptable.* Large clusters of sweetly succulent, purple slipskin fruits ripen in September on healthy, vigorous vines that adapt well to different soil conditions, even alkaline soils. Contains Concord in its lineage. Developed by Elmer Swenson. ○ BR
1 plant \$16.95; 3+ \$15.45 ea; 6+ \$13.95 ea

Concord

30205—Zones 4-8—*America's favorite all-purpose grape.* Concord is very adaptable, productive and bears annually. The large, tightly-filled bunches hold big berries of bluish-black. Flavor is rich and sweet. Best quality is attained in areas with growing seasons of 150-155 days. Ripens late September. ○ BR
1 plant \$12.95; 3+ \$11.95 ea; 6+ \$10.95 ea

Edelweiss

30210—Zones 4-8—*Beautiful greenish-white grapes with sweet and mild Niagara-type flavor.* Vines are hardy, vigorous, productive and disease-resistant, producing heavy clusters of medium-size, slipskin fruits with high sugar content. Primarily a table grape, it also makes a nice semi-sweet to dry wine. Introduced by the University of Minnesota. Fruit ripens mid to late August. (Not pictured). ○ BR
1 plant \$14.95; 3+ \$13.45 ea; 6+ \$11.95 ea

MARS

MARQUIS

Mars Seedless

30222—Zones 5-8—*A favorite for snacking, juice, jellies and wine.* Blue fruits are slipskin, medium to large, sweet and juicy with flavor similar to Concord. Vigorous vines are productive and dependable with very good disease and mildew resistance. Ripens late August to early September. One of the hardiest seedless dark blue grapes. ○ BR
1 plant \$14.95; 3+ \$13.45 ea; 6+ \$11.95 ea

Marquis Seedless

30221—Zones 5-8—*A premium quality white seedless grape.* Large clusters of high-quality berries have exquisite rich flavor, and if allowed to ripen an extra 5-10 days, the flavor gets even better and the berries get juicier. Eat them fresh off the vine or use them for jams, jellies, desserts and wine-making. Ripens in mid to late September. Developed by the New York State Agricultural Experiment Station. ○ BR
1 plant \$14.95; 3+ \$13.45 ea; 6+ \$11.95 ea

GRAPE CULTURE: Once established, vigorous, self-pollinating grapevines often yield excellent crops for 25 years or more. Plant them in a warm, sunny location, spacing 8-10 feet apart. They will need a sturdy fence or arbor for support. Proper pruning ensures a good crop each year. Additional information on grape culture will be included with your grape order. Our grapes are 1-year heavily rooted bare root plants.

Apples

HONEYCRISP™

Premium Apples

Honeycrisp™

Zones 4-7—*The most popular apple in the last decade, best described as explosively crisp!* The cream-colored flesh is a juicy combination of sweet and tart flavors. You can pick it in September, but it develops its full aromatic flavor if left on the tree until mid-October. The attractive apples have yellow skin heavily mottled with red. Fruits keep up to 7 months in cold storage. Among the most winter hardy apples, showing little damage at -40°F. Has rapidly become a favorite commercial and home orchard variety. Pollination partners: Haralson or Sweet Sixteen. ○ BR

30715—DWARF

1 tree \$36.95; 2+ \$34.95 ea

30540—SEMI-DWARF: 1 tree \$36.95;

INFORMATION ABOUT APPLES

Rootstocks and Tree Sizes

Jung apple trees are budded on hardy rootstocks that will withstand hot, humid summers and below zero winters. Rootstocks control mature tree size. We have selections for both large and small spaces.

DWARF apple trees grow a space-saving 6-10 feet tall and will produce a crop of full-size apples in just 2-3 years. A mature tree will average 2-6 bushels of fruit each year. Staking is recommended. These trees are ideal for the smaller yard and are easy to maintain – no ladders required for spraying or picking.

SEMI-DWARF rootstocks produce a tree 50-60% the size of a standard tree with an average mature height of 12-15 feet. They normally bear 3-5 years after planting with an average yearly yield of 8-12 bushels. Fruit size and quality are equal to any standard variety. The semi-dwarf trees are our most popular as they provide superior anchorage, hardiness, disease resistance and wide adaptability.

STANDARD apple trees are propagated on a full-size rootstock. They reach full size in 10-12 years with a height and spread of 20-25 feet; however, pruning can control size. Standard trees usually begin to bear in 5-6 years and will yield an average of 10-15 bushels of fruit per year.

BONNIE-BEST®

Heirloom Apples

Bonnie-Best®

H Zones 4-7—*Our top pick for pies, canning and fresh use!* The late Bonnie Keehn discovered this tree on her property in historic Cooksville, Wisconsin. She introduced it to Jung's in the late 1980s by bringing samples of the fruit and one of her prize-winning pies. The striped apples grow very large and have cream-colored flesh that's crunchy, tender, juicy and slightly tart. The fruit ripens in early October and keeps well. Sturdy, resistant to fire blight, and produces annually. Pollination partners: Honeygold or Freedom.

- BR
30504—SEMI-DWARF: 1 tree \$34.95;

RED GRAVENSTEIN

Red Gravenstein

H Zones 2-7—*A world renowned heritage apple.* Arriving in America in the 1700's, this is a terrific sauce and pie apple that ripens late August to early September. The color varies, but is usually greenish-yellow covered with broad red stripes. The creamy-white flesh is crisp, juicy, very aromatic, and dense with old-fashioned tart-sweet flavor. The vigorous, highly productive trees usually need the fruit to be thinned for a good annual crop. Pollination partners (requires at least 2): Royal Court®, RubyMac®, or Buckeye®.

- BR

Bonide Fruit Tree Spray Ideal For the Home Orchardist

50310—*Controls most insect pests and diseases common to home fruit plantings.* The liquid concentrate contains Captan, Malathion and Carbaryl, plus a spreader sticker for better adherence. Mixes with water and won't clog sprayers. A pint makes over 20 gallons. Also for use on evergreens, ornamentals and flowers. *Cannot ship to: AK, CA, HI.*

- (A) pt. \$28.95; (B) qt. \$39.95

COLUMNAR APPLE TREES—Apple trees you can grow in pots. See page 14.

REDLOVE® ODYSSEO®—Red-fleshed apple with a sweet flavor that hints of berries. See page 17.

WOLF RIVER

Wolf River

H Zones 3-7—*Apples so big just two or three make a pie!* This famous "old timer" originated as a seedling on the banks of the Wolf River near Fremont, Wisconsin, in 1875. The tree is very hardy and productive. Fruit is extremely large, a pound or more, with skin blushed bright red over yellow and flesh a creamy-white. Excellent for baking, sauce and drying. Has resistance to scab, mildew, fire blight and cedar-apple rust. Ripens in mid-September to early October. Pollination partners: Royal Court® or Sweet Sixteen.

- BR
30724—DWARF: 1 tree \$34.95; 2+ \$32.95 ea

Space-Saving Apples

Columnar Apples

Zones 4-8—*Unique apple trees have no branches!* They're perfect for planting in confined areas, in pots or as conversation pieces in your yard. Apples are produced in clusters along the trunk on short spurs. Growth of the tree is vertical with almost no branching. Our varieties are disease-resistant and bear large, delicious fruit, often the year after planting. These selections were discovered in Canada. Ht: 8-12'. ○ *Cannot ship to: AK, CA, HI.*

30495—SCARLET SENTINEL™—Very large, greenish-yellow fruit blushed with red. Crisp and sweet with pure white flesh. Ripens early September. Pollination partners: Any other apple, other than itself. Not self-pollinating.
1 tree \$39.95; 2+ \$37.95 ea

30498—WHITE ICICLE™—Very large and attractive, light green apples have bright white flesh and are sweet, juicy and delicious. Ripens late September. Pollination partners: Any other apple, other than itself. Not self-pollinating.
1 tree \$39.95; 2+ \$37.95 ea

30490—NORTHPOLE™—Large, bright red, McIntosh-type apples are crisp, juicy and highly aromatic. Ripens early September. Pollination partners: Any other apple, other than itself. Not self-pollinating.
1 tree \$39.95; 2+ \$37.95 ea

Pears

DWARF PEARS FOR THE NORTH #1
30836 (X)—1 each of Ubileen and dwarf Bartlett, a \$74.90 value for **\$63.95**

Jung's Hardy Wisconsin

H Zones 4-7—*Crisp, sugary-sweet fruit on super-hardy trees.* This pear was found by J. W. Jung on one of our farms in the early 1940s. The fruit was unlike any he had experienced. Pears are medium in size with thin, golden russet skin. When picked prior to frost, they store well under cool conditions. The crispy flesh softens for eating pleasure when kept at room temperature for a few days. Ideal for fresh eating or canning. Pollination partners: Harrow Sweet or Flemish Beauty. ○ **BR**
30820—DWARF: 1 tree \$37.95; 2+ \$34.95 ea

Potomac

Zones 5-8—*Delicious and disease-resistant.* This USDA release is a cross of Moonglow and Buerre D'Anjou. Trees exhibit good resistance to fire blight and bear light green, aromatic fruits that have a pleasant sub-acid flavor and buttery, juicy texture. A very high quality pear excellent for fresh eating, desserts and canning. Ripens early to mid-September. Pollination partner: Bartlett. ○ **BR**
30833—DWARF: 1 tree \$37.95; 2+ \$34.95 ea

DWARF PEARS FOR THE NORTH #2
30835 (X)—1 each of Jung's Hardy Wisconsin, Karl's Favorite and Flemish Beauty, a \$113.85 value for **\$96.95**

Bonide® Liquid Copper Fungicide

73744—Great for organic gardeners. Prevents and controls mildews, rusts, black spot, leaf and fruit spot, downy mildew, fruit rot, late blight, peach leaf curl and more. Full description on page 38. *Cannot ship to: AK, DC, HI.*
pt. concentrate \$20.95

Ubileen

Zones 4-7—*Harvest the first pears of the season.* A prized variety originating from Bulgaria, this European-type pear produces large, attractive fruits that ripen in mid to late July, a full month ahead of Bartlett. The pears are yellow with a nice red blush and have a delicious sweet flavor with buttery-textured flesh. They exhibit a high degree of disease resistance and are very vigorous and productive. Pollination partner: Bartlett. Ht: 12'. ○ **PP**
30832—DWARF: 1 tree \$36.95; 2+ \$33.95 ea

Bartlett

H Zones 5-7—*The most widely planted pear world-wide.* Introduced over 200 years ago, Bartlett is used commercially and is a home garden favorite for fresh eating and canning. Golden-yellow fruits blushed with red have juicy, fine-grained flesh and sweet, rich flavor. Vigorous, productive trees bear at a young age. Fruit ripens in late August. Pollination partner: Ubileen. ○ **BR**
30805—DWARF: 1 tree \$37.95; 2+ \$34.95 ea
30845—STANDARD: 1 tree \$35.95; 2+ \$32.95 ea

Karl's Favorite

Zones 4-7—(cv. Ewart)—*Big fruits, some over one pound each!* This excellent-quality pear originated near Akron, Ohio in 1928. Yellow fruits have slightly russeted skin and are quite large. Flesh is fine-grained, melting and juicy, superb for fresh eating and canning. The hardy, vigorous trees are very productive, bear annually and have moderate resistance to fire blight. Fruit ripens in September. Pollination partners: Jung's Hardy Wisconsin or Seckel. ○ **BR**
30825—DWARF: 1 tree \$37.95; 2+ \$34.95 ea

Harrow Sweet

Zones 4-8—(cv. HW609)—*Similar to classic favorite 'Bartlett,' but ripens 2-3 weeks later.* In taste tests, the sweet, creamy flesh of Harrow Sweet was rated as highly as Bartlett. The elongated fruits also have the same golden-yellow skin as Bartlett, but blushed with red when touched by the sun. Ripens in mid-September, making it an excellent pear for extending the season. Heavy-bearing trees show resistance to fire blight and benefit from thinning. Fruits are excellent for fresh eating and baking, plus they store for 10 weeks or longer under the proper conditions. Pollination partners: Karl's Favorite or Flemish Beauty. ○ **BR**
30858—STANDARD: 1 tree \$36.95; 2+ \$33.95 ea

Flemish Beauty

H Zones 4-7—*Originally known as Fondante de Boise or 'Sweetmeat of the Woods.'* This pear was introduced to this country in the early 1800s. The large, rounded fruits have creamy-yellow skin blushed red along with firm, creamy-white flesh that becomes meltingly tender, sweet and aromatic. Hardy and highly productive. Ripens from mid-September to early October. Pollination partners: Seckel or Jung's Hardy Wisconsin. ○ **BR**
30815—DWARF: 1 tree \$37.95; 2+ \$34.95 ea
30855—STANDARD: 1 tree \$35.95; 2+ \$32.95 ea

Seckel

H Zones 5-8—*Distinctive, super-sweet, spicy flavor. Commonly called 'Sugar Pear.'* An heirloom variety brought from Europe in 1790. The brownish-yellow fruits with a russet-red blush are a small size perfect for snacking, pickling, and canning whole. The flesh is fine-grained, juicy and extremely sweet with a rich, aromatic flavor unlike any other pear. The trees are slow-growing, but widely adaptable and productive. Has moderate resistance to fire blight. Begins ripening in September. Pollination partners: Harrow Sweet or Karl's Favorite. (Not pictured). ○ **BR**
30831—DWARF: 1 tree \$36.95; 2+ \$33.95 ea

PEARS: Standard pear trees, at maturity, will be approximately 16-18 feet tall and will normally bear in 5-6 years. Dwarf pear trees, at maturity, will be about 12 feet tall and bear in 3-4 years. Cross pollination with another variety is recommended (see the end of each description). 3-5 foot bare root whips.

KOREAN GIANT

Asian Pears

Korean Giant or Olympic

30867—Pears as big as grapefruit. Also called Dan Bae, these golden-brown pears often weigh up to a pound. They have wonderful sweet flavor and crisp, juicy texture. Fruit ripens in early to mid-October and keeps extremely well in cold storage. Vigorous, upright trees bear annually. Pollination partners: Chojuro or Bartlett. Ht: 10-15'. ○ PP

Chojuro

30849—Known as the “Rum Pear.” Medium-to-large golden-russet fruit has rich butterscotch or rum-like flavor. Ripens in early to mid-September and keeps until January if refrigerated. Trees are very productive, so be sure to thin fruit early in the season. (Not pictured). Pollination partners: Korean Giant or Bartlett. Ht: 10-15'. ○ PP

PRICE OF ASIAN PEARS (mix or match):
1 tree \$36.95; 2+ \$33.95 ea

ASIAN PEARS: Zones 5-7—Asian pears. Asian pears should be allowed to ripen on the tree for best quality. They're also attractive landscape trees with their abundant white flowers in spring and large foliage. Trees bear fruit 2-3 years after planting. Our Asian pears are budded on hardy rootstocks. Asian pears are not self-fruitful, so plant two varieties for pollination. We ship 3-5 foot bare root whips.

Apricots & Nectarines

APRICOTS & NECTARINES: We ship sturdy, 3-5 foot bare root whips.
Cannot ship to: AK, CO, HI, SC.

GOLDCOT

Goldcot Apricot

Zones 4-7—Developed for Northern growers. Buds have above average cold tolerance so trees set fruits more reliably than many other apricots. The medium-to-large, golden-skinned, freestone fruits have juicy, orange flesh with tangy flavor. Good for fresh eating, freezing and canning. Ripens mid-July to early August. Self-fruitful. Ht: 15-20'. ○ BR

30785—STANDARD: 1 tree \$36.95;
2+ \$33.95 ea

APRICOT OFFER
30952 (X)—1 each of Goldcot and Chinese, a \$73.90 value for **\$62.95**

Chinese Apricot

Zones 4-7—A late-spring bloomer with frost-resistant buds. Golden-orange fruits have clingstone flesh with good flavor, texture and quality. Consistently bears heavy crops that ripen in late July. Called a ‘sweet-pit’ apricot as its pit is edible and tastes of almond. Self-fruitful, but plant with Goldcot for highest yields. (Not pictured). Ht: 15-20'. ○ BR

30786—STANDARD: 1 tree \$36.95;
2+ \$33.95 ea

HARDIRED

Hardired Nectarine

Zones 5-7—The ‘fuzz-less’ peach! This nectarine from Canada has hardness comparable to Reliance peach, making it more reliable in colder areas than other nectarines on the market. The freestone, 2¼-inch fruits have red skin color and yellow flesh that’s sinfully sweet and juicy, ideal for fresh eating, canning and freezing. Vigorous, productive trees have good tolerance to bacterial spot and brown rot. Fruit ripens mid-August. Ht: 12-15'. ○ BR

30890—STANDARD: 1 tree \$39.95;
2+ \$36.95 ea

Cherries

METEOR

Pie Cherries

TART PIE CHERRIES: Our pie cherries are budded on Mahaleb rootstocks which are cold hardy, drought tolerant and highly productive with excellent anchorage. These self-fertile trees do not require another variety to set fruit, but all fruit trees benefit from cross-pollination. Tart cherry trees begin bearing 3-5 years from planting. 3-5 foot bare root whips. *Cannot ship to: AK, CO, HI, SC.*

Meteor

Zones 4-7—Our top choice for gardeners and small orchards. Every year Meteor reliably produces big crops of large, bright red, tart and juicy fruits that are completely freestone. Hardy, vigorous trees are resistant to leaf spot, the most common disease of cherry foliage. Ripens in late July. Ht: 10-12'. ○ BR

30735—SEMI-DWARF: 1 tree \$39.95;
2+ \$36.95 ea

SPECIAL PIE CHERRY OFFER
30748 (X)—1 each of Meteor, Montmorency and North Star, a \$133.85 value for **\$113.95**

NORTH STAR

North Star

Zones 4-7—Naturally dwarf and super hardy! Developed in Minnesota, the trees are self-fruitful and never fail to produce huge crops of bright red cherries that are juicy, tender and pleasantly tart. Perfect for pies, canning and freezing. Dense foliage has resistance to leaf spot. Ripens in mid-July. Ht: 6-8'. ○ BR

30745—DWARF: 1 tree \$49.95; 2+ \$44.95 ea

Montmorency

Zones 5-7—America’s most widely planted pie cherry. The large, bright red fruit is juicy, firm and flavorful, making it ideal for canning and freezing. Also delicious for fresh eating. The trees bear a heavy crop of fruit year after year. Ripens in mid-July. (Not pictured). Ht: 10-15'. ○ BR

30740—DWARF: 1 tree \$43.95; 2+ \$39.95 ea

DANUBE™

Danube™

(cv. Erdi Botermo)—Zones 5-7—Makes outstanding wine! This pie cherry combines the best qualities of both pie and sweet cherries. The very large, firm, burgundy-red fruits have thick, red flesh and red juice. Their unique sweet flavor and high sugar content makes them exceptionally delicious for fresh eating, desserts and home wine-making. Ripening early to mid-July, the cherries store well, keeping for days at room temperature. Trees are self-fertile. Ht: 10-15'. ○ BR

30760—DWARF: 1 tree \$39.95; 2+ \$36.95 ea

SWEET & TART CHERRY OFFER
30753 (X)—1 each of Lapins, Meteor and Danube, a \$126.85 value for **\$107.95**

BLACKGOLD™/WHITEGOLD™ SWEET CHERRY OFFER
30752 (X)—1 each of BlackGold™ and WhiteGold®, a \$79.90 value for **\$67.95**

Deluxe Cherry Pitter

54079—Remove cherry pits quickly - no bruised or crushed fruit. With just a push of the spring-loaded plunger, the pits drop into the plastic receptacle and cherries fall into the bowl. A high vacuum suction-style base holds the unit firmly in place during use. Easy-to-clean molded polystyrene.

Each \$26.95

BENTON®

BLACKGOLD™

Sweet Cherries

Benton®

Zones 5-7—(cv. PC 7146-8)—(P.P. 15847) Excellent flavor that rivals Bing. Large, dark red fruits are firm and crack-resistant with an excellent taste that strikes a perfect balance between sweet and acidic. Self-fruitful trees bloom a little later than many cherry varieties and are quite productive. Fruit ripens early to midseason. Becoming a popular variety for Michigan growers. Ht: 10-15'. ○ BR

30737—DWARF: 1 tree \$41.95; 2+ \$37.95 ea

BlackGold™

Zones 5-7—(cv. Ridgewood)—(P.P. 17301)—One of the best black sweet cherries for cold areas. Late-season bloom, frost-tolerant blossoms and above average tree hardiness combine to make this self-fertile black sweet cherry one of the most dependable for colder areas. Trees yield big crops of large, firm, black-red, flavorful fruits that resist cracking. Fruit ripens in late July. A Cornell University introduction. Ht: 25'+. ○ BR

30757—STANDARD: 1 tree \$39.95;
2+ \$36.95 ea

WHITEGOLD®

LAPINS

WhiteGold®

Zones 5-7—(cv. Newfane)—(P.P. 18892)—The only self-fertile, white sweet cherry on the market. Large, firm, crack-resistant fruits are light yellow with a red blush, delicious for fresh eating or canning. Trees are high yielding with resistance to bacterial canker. Good bud hardiness helps to ensure a good crop. Pollinates most other sweet cherry varieties. Ripens in mid-July. Introduced by Cornell University. Ht: 25'+. ○ BR

30774—STANDARD: 1 tree \$39.95;
2+ \$36.95 ea

Lapins

Zones 5-7—Known as the self-fertile Bing! This Canadian variety produces very large, meaty, dark red fruits without the need of a pollinizer. Cherries have rich flavor and good crack resistance. Trees require no staking and produce large crops of sweet cherries. Fruits ripen in early to mid-July. Good resistance to late frosts and handles temperatures down to -20°F. Ht: 12-15'. ○ BR

30768—STANDARD: 1 tree \$46.95;
2+ \$42.95 ea

SWEET CHERRIES: We offer most of our sweet cherries on either standard (Mazzard) or dwarf (Gisela®) rootstocks. Mazzard rootstocks produce a vigorous tree with excellent anchorage and will begin bearing in 4-6 years from planting. Mature trees will be 25 feet tall or more. Gisela® rootstocks, developed in Germany, produce a tree about 50-60% the size of standard trees without losing yield or fruit size and usually bear by the third year. Staking is recommended to help support the load of fruit. We ship 3-5 feet bare root whips. *Cannot ship to: AK, CO, HI, SC.*

Plums

BLACK ICE

Black Ice Plum

30903—Zones 3-7—(cv. Lydecker)—(P.P. 16621) *A big-fruited dessert plum with superior winter hardiness.* Prof. Brian Smith of the University of Wisconsin—River Falls spent years developing this cross between cherry plums and conventional Japanese dessert plums. The end result is these 2-inch round, blue-black plums with very sweet, juicy, yellow flesh. The fruit ripens in early August, about 2-4 weeks earlier than other plums grown in the Midwest. A great choice for Northern gardeners who want to grow fruit. Pollination partner: Waneta. Ht: 10-15'. ○ **BR**

DWARF: 1 tree \$41.95; 2+ \$37.95 ea

WANETA

Waneta Plum

30930—Zones 3-7—*Considered one of the best plums for the Midwest.* Naturally dwarf trees adapt well to adverse conditions and produce fruits after the first year planted. Bears so many fruits that they should be thinned to maintain good size and flavor. The red-skinned fruits have yellow flesh that is juicy and sweet. Ripens in late July to early August. Pollination partner: Black Ice. Ht: 10-15'. ○ **BR**

DWARF: 1 tree \$46.95; 2+ \$41.95 ea

PLUM OFFER #1
30937 (X)—1 each of Black Ice and Waneta, an \$88.90 value for **\$75.95**

Toka Plum

30910—Zones 3-7—*Large-fruited and richly flavored.* The fruits of this hybrid plum are reddish-bronze with a blue bloom and freestone with yellow, aromatic flesh and rich, spicy-sweet flavor. Ripens late August. (Not pictured) Pollination partner: Pipestone. Ht: 10-15'. ○ **BR**

DWARF: 1 tree \$44.95; 2+ \$39.95 ea

PLUMS: Most plums require cross-pollination to produce fruit. Please see the end of each description for recommended pollination partners. We ship 3-5 foot bare root whips. *Cannot ship to: AK, CO, HI, SC.*

PIPESTONE

Pipestone Plum

30905—Zones 3-7—*A "jumbo" hybrid plum.* Immense fruit has red skin blushed with gold. The flesh is golden-yellow, sweet, juicy, clingstone and of excellent quality. Ripens in August and is a heavy yielder. Introduced by the Minnesota Fruit Breeding Farm. Pollination partner: Toka. Ht: 10-15'. ○ **BR**

DWARF: 1 tree \$44.95; 2+ \$39.95 ea

PLUM OFFER #2
30935 (X)—1 each of Pipestone and Toka, an \$89.90 value for **\$75.95**

MOUNT ROYAL

Mount Royal Plum

30915—Zones 4-7—*If you can only plant one plum tree, make it this easy-to-grow European plum.* The large, deep blue, freestone fruits are very sweet and juicy. Quality is outstanding whether used fresh or for preserves, jam, canning or freezing. Bears heavy crops each year and doesn't require cross pollination. Fruit ripens mid-to-late August. Ht: 10-15'. ○ **BR**

DWARF: 1 tree \$44.95; 2+ \$39.95 ea

Jung's Tree Planting Kit

53309—*Everything you need to get your new tree off to the best start possible.* This convenient kit contains a Spiral Tree Guard to protect the trunk, an 18" fiber weed suppressing mat (porous to let water through), a 12 oz. bag of soil optimizer and 5 Roots® Healthy Start Tabs to place in the ground at the time of planting. Each kit services one tree (not included).

Kit \$25.95

Roots® Healthy Start Macro Tabs 12-8-8

51169—*Slow-release tablets feed plants for two full growing seasons.* Ideal for both trees and shrubs. Evenly place tabs around the root ball when planting, using 2 per foot of diameter of the root ball. Completely safe and includes both slow-release and soluble fertilizers, plus humates and beneficial bacteria to improve soil fertility. Full instructions included. Replaces Gromax Fertilizer Tablets. 21-gram tablets, 5 per package.

1 pkg. \$7.95; 3+ \$7.75 ea; 6+ \$7.50 ea; 10+ \$7.25 ea

Peaches

CONTENDER

Contender Peach

30792—Zones 4-7—*This bud-hardy peach escapes late spring frosts.* Compares to Reliance peach in that it reliably sets fruit in cold climate areas. Large, freestone fruit is bright red over yellow with sweet, juicy, melting flesh that resists browning when cut. Great for fresh eating, freezing or canning. Ripens mid-August. Ht: 12-18'. ○ **PP**

STANDARD: 1 tree \$36.95; 2+ \$33.95 ea

RELiance

Reliance Peach

30795—Zones 5-7—*Hardy and high-yielding.* Reliance withstands below zero temperatures and also has excellent bud hardiness. Fruits are medium in size, their yellow skin blushed with red. The flesh comes free from the small pit and is bright yellow, soft and juicy with honey-sweet flavor. Vigorous and fast-growing. Ripens late July. Ht: 12-18'. ○ **BR**

STANDARD: 1 tree \$36.95; 2+ \$33.95 ea

Madison Peach

30790—Zones 5-7—*Hardy, vigorous and frost resistant.* Fruit is freestone and medium sized with bright red skin and deep yellow, firm flesh. The flavor is mild and rich. Excellent for fresh use, freezing or canning. Ripens late August. (Not pictured). Ht: 12-18'. ○ **BR**

STANDARD: 1 tree \$36.95; 2+ \$33.95 ea

HARDY PEACH TREE OFFER
30793 (X)—1 each of Contender, Reliance and Madison, a \$110.85 value for **\$93.95**

PEACHES: Jung's peach trees are grown on hardy rootstock that will withstand below zero winters. Peaches are self-pollinating and do not require another variety to produce fruit. We ship 3-5 foot bare root whips. *Cannot ship to: AK, CO, HI, SC.*

Nut Trees

ALMONDS

Ukrainian Almonds

(*Prunus dulcis*)—Zones 5-8—*Grow nutritious almonds in cold areas with these hardy varieties from Ukraine.* These selections bloom late, about the same time as peaches, helping them avoid damage from late, hard frosts. Originating at the Nikita Botanic Garden, the attractive trees bear profuse, pinkish-white fragrant flowers in spring. Harvest nuts in September and use them for fresh eating, roasting and baking. While somewhat self-fertile, we recommend planting two varieties for best nut production in a location with at least ½ day of sun. Our 3-4 foot grafted whips begin bearing about 3 years after planting. Ht: 15-20'. ○ **PP** *Cannot ship to: AK, CO, HI, SC.*

22455—BOUNTY™—(cv. Nikitsky 2240)—A very late blooming variety that bears abundant crops of large, high-quality, soft-shell almonds.

22456—ORACLE™—Very late blooming and early ripening. Bears big crops of sweet, soft-shelled nuts.

PRICE OF UKRAINIAN ALMONDS (mix or match):
1 tree \$37.95; 2+ \$34.95 ea

CHINESE

Chinese Chestnut

22149—(*Castanea mollissima*)—Zones 4-8 *Grow your own chestnuts for roasting.* Hardy trees set large crops of easy-to-peel, sweet nuts. Also a fine landscape and timber tree. Our 2-3 foot seedlings bear in 5-7 years. Plant two trees for pollination. Ht: 25-30'. ○ **BR (2-3')** *Cannot ship to: AK, CA, HI, WA.*

1 tree \$16.95; 2+ \$15.95 ea

CHESTNUT OFFER
22151 (X)—1 each of Chinese and Colossal, a \$38.90 value for **\$32.95**

Colossal Chestnut

22150—(*Castanea hybrida*)—Zones 4-8—*Harvest abundant crops of large, sweet and nutritious nuts.* Yields very large, high-quality nuts. Our 1-2 foot seedlings begin bearing about 3-5 years after planting. Requires a pollinizer, so plant 2 or more trees or use Chinese Chestnut as a pollinizer. (Not pictured). Ht: 25'. ○ **BR (1-2')** *Cannot ship to: AK, CA, HI, WA.*

1 tree \$21.95; 2+ \$19.95 ea

FILBERTS (HAZELNUTS)

European Filberts (Hazelnuts)

(*Corylus avellana*)—Zones 5-8—*Small trees are ornamental as well as productive.* They tend to grow as a shrub-like tree and feature attractive yellow catkins in late winter. Their tasty, nutritious nuts are ready to harvest in early fall. Filberts like one-half day of sun and are bud hardy to -15°F. Our varieties are immune to Eastern Filbert Blight. Plant two varieties for cross-pollination. Our 1-2 foot seedlings will begin bearing 5-8 years after planting. Ht: 10-12'. ○ **BR (1-2')** *Cannot ship to: AK, HI, WA.*

22196—GAMMA—Good yields of medium-sized nuts. Pollination partner: Jefferson.

22187—JEFFERSON—Bears abundant crops of large, sweet, delicious nuts. Pollination partner: Gamma.

PRICE OF EUROPEAN FILBERTS (HAZELNUTS) (mix or match):
1 tree \$32.95; 2+ \$29.95 ea

SHAGBARK

Shagbark Hickory

22142—(*Carya ovata*)—Zones 4-8—*Sweet nutmeats are favorites in culinary treats.* Also valuable for shade and timber. Adapts to a wide range of soil types and locations. Trees are slow growing in early years while developing a large, deep taproot. Patience will be rewarded with yearly crops of delicious hickory nuts and a long-lived, attractive tree. Ht: 50-80'. ○ **BR (18-24")** *Cannot ship to: AK, AZ, CA, HI, TX.*
1 tree \$14.95; 3+ \$13.95 ea

Mesh Tree Bark Protector

56992 (A)—*Flexible mesh expands as your tree grows.* Open mesh netting protects against damage from animals and lawn equipment, but allows more air circulation to prevent the build-up of moisture and mildew. The 4 inch by 36 inch tubes install quickly with no tools.
Each \$15.95; 2+ \$13.95 ea

PECANS

Pecans

(*Carya illinoensis*)—Zones 5-8—Pecans are beautiful trees that produce some of our favorite, sweet-flavored nutmeats. Although self-pollinating, planting two varieties will yield bigger crops. Ht: 50'. ○ *Cannot ship to: AK, AZ, CA, HI, TX.*

22146—STUART—*One of the hardiest pecans.* Produces generous crops of thin-shelled, buttery-tasting nuts. **BR (2-3' whip)**

1 tree \$45.95; 2+ \$41.95 ea

22147—HARDY PECAN—*Ideal pollinizer for grafted varieties.* Vigorous trees bear good crops of large, tasty nuts. **BR (2-3' seedling)**

1 tree \$16.95; 2+ \$15.95 ea

HARDY PECAN OFFER
22148 (X)—1 each of Stuart and Hardy Pecan, a \$62.90 value for **\$52.95**

CARPATHIAN

Carpathian English Walnut

22312—(*Juglans regia*)—Zones 5-8—*One of the most cold-hardy English walnuts.* Walnuts are stately trees with large, compound leaves and handsome branching that makes them attractive yard trees. They prefer slightly acid to neutral soils and a steady supply of moisture. The trees bear delicious walnuts that are thin-shelled and easy to crack. Although self-fertile, yield increases when two trees are planted. Our 2-3 foot seedlings begin bearing in 8-10 years. Ht: 40-60'. ○ **BR (2-3')** *Cannot ship to: AK, AZ, CA, HI, TX.*

1 tree \$31.95; 2+ \$28.95 ea

DeWitt® Stake Straight Kit

56570—*Guide your new trees off to a straight start.* Gentle on tree trunks. Kit includes a non-girdling, woven strap with brass eyelets; 3 pointed, 15-inch anchor stakes made with recycled plastic; and 30 feet of cobra rope. Works with trees up to 4 inches in diameter. Use 1 kit per tree.
Each \$17.95

MYKE TREE & SHRUB INOCULANT—Reduces transplant shock, promotes better flowering, and reduces the need for water. See page 36.

Fruiting Ground Covers

PILGRIM

Pilgrim Cranberry

30280—(*Vaccinium macrocarpon*)—Zones 4-9 *You don't need a bog to grow American cranberries.* A sunny, well-drained bed with acidic soil and good moisture content will do. Cranberries have dainty evergreen foliage and small, pink flowers in spring, followed by abundant crops of large, tasty, nutritious, red berries that ripen in fall. Pilgrim is self-fertile and hardy to -30°F. Plants begin bearing 1-2 years after planting. Ht: 6". ○ **PP**

1 plant \$18.95; 3+ \$17.45 ea

GROUND COVER RASPBERRIES

Ground Cover Raspberries

(*Rubus arcticus x stellarcticus*)—Zones 2-7 *Highly ornamental, thornless vines produce attractive flowers and delicious fruits.* Developed in Sweden, these weed-smothering, hardy plants spread by underground rhizomes creating a thick mat of bright green foliage. In spring, plants bear 1-inch pink flowers followed by small, sweet, aromatic berries that ripen in midsummer. In fall, the foliage turns attractive shades of red and burgundy. Ground cover raspberries will begin bearing the year after planting. Each plant bears up to 1 pound of fruit. Our ground cover raspberry offers include cultivars Anna and Sophia, as both are required for fruit set. Ht: 5-6". ○ **PP**

GROUND COVER RASPBERRY PRICING:

30295 (X)—1 of each (2 plants) for **\$22.95**

30296 (X)—2 of each (4 plants) for **\$36.95**

30297 (X)—3 of each (6 plants) for **\$47.95**

Swedish Berry Picker

53086—*Helps harvest small berries quickly and efficiently.* This well-made plastic rake is designed with an easy-to-handle handle and wire combs. Simply rake the combs through the branches and berries fall into the container. Ideal for lingonberries, currants and other small fruits. 8½" high x 5½" wide.
Each \$22.95

Specialty Fruits

REDLOVE® ODYSO®

Redlove® Odysso® Red Fleshed Apple

30483—Zones 3-7—(PPAF)—*Unique dark-pink-to-red-fleshed fruit with a phenomenal taste.* The bright red fruits have firm, red flesh with a crisp and refreshingly sweet taste that hints of berries and fully develops after 3-4 weeks in storage. Fruits are ready to harvest in early October and store well for several months. Resistant to scab. Pollination partners: Any other apple or crab apple, other than itself. Ht: 6-10'. ○ **PP** *Cannot ship to: AK, CA, HI.*

1 tree \$37.95; 2+ \$35.95 ea

SEA BERRY

Sea Berry

(*Hippophae rhamnoides*)—Zones 3-8—*One of the most hardy fruiting plants in the world.* These ornamental shrubs have narrow, silver-green leaves and produce abundant clusters of ⅓ inch yellow-orange fruits in late summer and fall. The fruit has a wonderful flavor, like a blend of orange and passion fruit, is very high in vitamins A, C and E, and can be made into sauces, jellies, juice and a base for liqueurs. Very tough and disease-resistant plants can even tolerate salt spray. Bears in 2-3 years. Ht: 6-10'. NOTE: 1 male plant pollinates 6-8 female plants. ○ **BR (1-2')**

30439—LEIKORA—(Female)

30440—MALE—(Sets no fruit, but is needed for fruit to set on Leikora)

PRICE OF SEA BERRIES (mix or match):
1 plant \$26.95; 2+ \$24.95 ea

Red Candy Lingonberry

30284—(*Vaccinium vitis-idaea*)—Zones 3-7 *A nutritious and delicious fruiting shrub.* Compact, highly productive plants have shiny, dark green, evergreen foliage that grows up to 10 inches across. White, spring flowers are followed by berries that ripen in late summer and will hold on the plant for a long time. The vitamin-rich, red, tart and lemony berries are prized for preserves, sauces and pastries. Grow like blueberries in moist, acid peat soil. Can be grown in containers. Ht: 8". ○ **PP**

1 plant \$19.95; 3+ \$17.95 ea

HOPS

Hops

(*Humulus lupulus*)—Zones 5-8—A very effective ornamental screen. Use the flowers to make your own beer! Vining plants are easily trained on a fence or trellis. In late summer, the vines bear cone-like flowers that have a fresh, pine-like fragrance and are used in beer-making. Dark green, deeply lobed foliage is very attractive. Plants die back to the crown in winter. Ht: 20'.
 ○ PP Cannot ship to: AK, HI, ID, OR, WA.

30425-NUGGET—A high-alpha-acid-type hop used for adding body and flavor. Disease-resistant, vigorous and high-yielding.

30424-CASCADE—A disease-resistant, aroma-type hop known for its high yields and large flowers. Adds flavor and aroma to light lagers.

30427-WILLAMETTE—An aroma-type hop with lower alpha acids used to add a spicy aroma to traditional English ales.

30426-MT. HOOD—An aroma-type hop prized for its high yield of flowers and excellent disease resistance.

PRICE OF HOPS PLANTS (mix or match):

1 plant \$16.95; 3+ \$14.95 ea

SOIL AMENDMENTS—See page 36.

COLANDER TRUG—A handy helper to speed up your harvest process. See page 60.

MICHIGAN STATE

Hardy Kiwi

(*Actinidia kolomikta*)—Zones 3-7—No peeling required to enjoy these grape-sized, delicious fruits. The female kiwi, 'Michigan State' produces 1 inch, lime-green fruits, rich in vitamin C, with sweet kiwi flavor and smooth skin. Fruits ripen in September and October. Vines usually begin bearing 3-4 years after planting. Requires a fence, wall, or trellis for support. Ht: 15-20'. NOTE: 1 male plant pollinates up to 8 female plants.

1 tree \$35.95; 2+ \$32.95 ea

MOUNTAIN ASH OFFER
 22566 (X)—1 each of Rabina and Shipova, a \$71.90 value for \$60.95

SHIPOVA

Shipova Mountain Ash

22561—(*Sorbus x Pyrus*)—Zones 3-9—Large, delectable fruits! A hybrid of mountain ash and pear, attractive trees produce round, yellow-orange fruits the size of large apricots. The mouth-watering, seedless fruits are aromatic with a slight rose-like scent. The trees have attractive, dark silvery green foliage and nice pyramidal shape. Hardy and scab resistant. Partially self-fruitful, but more fruit will set with cross-pollination. Plant with other mountain ash varieties or an early-blooming European pear like Ubileen (see page 14). Ht: 15-20'.
 ○ PP

1 tree \$35.95; 2+ \$32.95 ea

CRIMSON STAR™

Crimson Star™ Goji Berry

12297—(*Lycium barbarum* 'Ningxia #1')—Zones 5-9—Goji are packed with healthful benefits. This Chinese native is a vining shrub bearing purple, bell-shaped flowers beginning in late spring, followed by small fruits that quickly turn red. Plants continue to bear until frost. The berries will be juicy with a sweet, rich flavor when ripe and will come off the plant easily without the aid of a pruner or knife. Considered a super-fruit by nutritionists, the fruits can be eaten fresh, juiced, dried like raisins or frozen for future use in recipes. The plants are self-fertile, disease-resistant, drought-tolerant and can be grown in large containers if you wish. Staking is suggested to keep the fruit off the ground. Ht: 6-10'.

1 plant \$28.95; 3+ \$26.95 ea

KUGANSKAYA

Kuganskaya Russian Quince

30946—(*Cydonia oblonga* 'Kuganskaya')—Zones 4-9—An attractive tree that bears delectable fruits. Russian quince are unique in that their fruits are so tender and sweet that they can be eaten fresh. The ornamental trees display pink flowers in late spring, followed by large, bright yellow, highly fragrant rounded fruits. Pick in October and allow to soften. High in vitamin C and pectin, they are used for jams, jellies, baked goods, flavoring and canning. Disease-resistant. Budded on quince rootstock. Ht: 10-12'.

1 plant \$42.95; 2+ \$38.95 ea

IMPROVED MEYER

Improved Meyer Lemon

30970—(*Citrus meyer*)—Zones 9-10—One of the easiest citrus for Northern gardeners to grow. Well-suited to pot culture, it has the ability to bloom and set fruit all year. Fragrant white flowers are followed by large, orange-yellow fruits perfect for juicing, cooking and baking. The small trees are easy to bring inside in cold locations. The heavy-yielding trees are self-pollinating and will bear fruit in 1-2 years. We recommend planting in a 5-10 gallon pot. Ht: 5'.
 ○ PP Cannot ship to: AK, AL, AZ, CA, FL, HI, TX.

1 plant \$42.95; 2+ \$38.95 ea

BEARSS

Bearss Lime

30969—(*Citrus latifolia*)—Zones 9-10—Now almost anyone can grow their own tasty limes. These attractive self-fertile plants produce an abundance of greenish-yellow, seedless fruits that grow almost as big as lemons. The fruits are very juicy and excellent for your favorite drinks and recipes. These small trees are perfect for growing in large pots. Begin producing fruit in 1-2 years. Ht: 5'.
 ○ PP Cannot ship to: AK, AL, AZ, CA, FL, HI, TX.

1 plant \$42.95; 2+ \$38.95 ea

CITRUS CULTURE: In cold climates, grow outside when temperatures are above freezing in a location with at least ½ day of sun. When temperatures approach freezing, move indoors to a well-lit room.

Fruit & Citrus Fertilizer

51077—Increases yields. This fast-acting, 100% organic 3-5-5 formula contains Jobe's® Biozome®, a unique combination of bacteria, mycorrhizal fungi and Archaea. When combined, they quickly break down complex minerals into basic nutrients that plants can more readily absorb. You'll see the results in healthier foliage, more abundant blossoms and increased harvests. Easy to apply. 4 lb. bag \$15.95

Pawpaws

(*Asimina triloba*)—Zones 5-9—*Fruits with flavor and texture like banana or vanilla custard.* Also called the “Hoosier Banana.” This interesting and ornamental U.S. native is slow growing with large, 12-inch, tropical-looking leaves. Fruits are odd-shaped, 3-6 inches long and some up to 1 pound, with a creamy custard-like texture and delicious sweet banana flavor. They are unusually high in protein and vitamins A and C. Harvest when fruit color turns from green to yellow, about late September. Pawpaws are naturally disease and pest resistant. They prefer moist, slightly acid soil and partial shade in hot, dry areas. For best performance, provide some shade for the first few years. Plant two different trees for proper cross-pollination. We offer both grafted varieties and seedling pawpaws. Ht: 12-15'+. ○ ▸ PP

30769—PROLIFIC—A high-yielding variety that often bears a crop of fruit the second year after planting. Large, sweet fruits ripen early.

1 tree \$39.95; 2+ \$36.95 ea

30788—SHENANDOAH™—(Wansewan cultivar)—(P.P. 14452)—One of the largest and most flavorful Pawpaws available. Sweet, creamy-yellow fruits weigh up to 1 pound each.

1 tree \$39.95; 2+ \$36.95 ea

30782—PAWPAW SEEDLINGS—Grown from seed of superior, large-fruited varieties, these seedlings bear good quality fruit and also serve as a pollination partner for grafted varieties.

1 tree \$29.95; 2+ \$27.95 ea

PAWPAW OFFERS

- 30956 (X)**— 1 each of Prolific and Pawpaw seedling, a \$69.90 value for **\$58.95**
- 30963 (X)**— 1 each of Shenandoah™ and Pawpaw seedling, a \$69.90 value for **\$58.95**

1/2 Peck Wooden Basket

56676 (C)—*Both handy and attractive.* Use these charming, rustic baskets to both pick your produce and display it at your roadside stand. A sturdy wooden handle makes carrying a breeze and when the season is over, they easily nest for storage. Each basket measures 6 1/2" tall with a 9" diameter. **Each \$13.95**

Honeyberries or Haskaps

(*Lonicera caerulea*)—Zones 3-8—*Similar in flavor to blueberries, these fruits ripen before strawberries.* Withstanding temperatures to -40°F, the bushes display small, white, slightly fragrant flowers in March, followed by large, blue berries. Easy to grow with no pest or disease problems. Prefer partial shade where summers are hot. Not self-fertile, so plant 2 varieties if fruit is desired. Begin bearing 2-3 years after planting. Ht: 3-5'. ○ ▸

30416—BLUE VELVET™—A high-yielding selection that bears very large berries.

Pollination partner: Boreal Beauty. **BR (1-2')**

30418—BLUE MOON™—Tasty, dark blue fruits.

Pollination partner: Boreal Beauty. **BR (1-2')**

**PRICE OF ABOVE 2 VARIETIES:
Each \$23.95; 2+ (your choice) \$21.95 ea**

30437—AURORA—An early blooming, early ripening selection that is highly rated for both flavor and production. Berries are less acidic than many haskap. Pollination partners: Honey Bee, Tundra and Berry Blue™. **PP**

30403—BERRY BLUE™—Bears abundant high-quality fruit. Pollination partners: Aurora, Borealis, Honey Bee or Tundra. **PP**

30435—BLIZZARD—Bears the largest fruit of any variety to date. Fruits ripen around the same time as strawberries and have a nice, sweet flavor. Pollination partners: Boreal Beast or Boreal Beauty. **PP**

30433—BOREAL BEAUTY—A later-blooming variety that ripens near the end of July. Fruits have excellent flavor and a firm texture. Pollination partners: Boreal Beast or Blizzard. **PP**

30434—BOREAL BEAST—The dark blue, firm berries ripen in mid to late July. Upright, sturdy bushes grow 3-5 feet tall and have excellent mildew resistance. Pollination partners: Boreal Beauty or Blizzard. **PP**

30401—BOREALIS—One of the sweetest varieties. Tender fruits are perfect for home gardens and U-Pick. Pollination partners: Aurora, Berry Blue™, Honey Bee or Tundra. **PP**

30436—HONEY BEE—The berries are a little more tart than most haskap, but they hold well on the branches and yield is excellent. Pollination partners: Aurora, Borealis, Tundra or Berry Blue™. **PP**

30402—TUNDRA—Selected for its excellent flavor, shape and size with enough firmness to make it a good keeper. Suitable for commercial machine harvest. Pollination partners: Aurora, Borealis, Honey Bee or Berry Blue™. **PP**

**PRICE OF ABOVE 8 VARIETIES:
1 plant \$18.95; 2+ (your choice) \$16.95 ea**

PLEASE NOTE: If you are interested in purchasing larger quantities of haskaps, please contact us.

Sweet Scarlet™ Goumi

30410—(*Eleagnus multiflora*)—Zones 5-8 *Unique sweet-tart flavor hints of cherries, apples and black currants.* Native to the Far East, this attractive shrub bears fragrant creamy-white flowers in May, followed in late June by red fruits the size of small pie cherries. Delicious fresh, dried or made into preserves. Self-fertile, not bothered by pests or diseases, and begins bearing 2-3 years after planting. Ht: 4-6'. ○ ▸ **BR (1-2')**

1 plant \$23.95; 3+ \$21.95 ea

Nanking Bush Cherry

20772—(*Prunus tomentosa*)—Zones 2-6—*A beautiful ornamental with edible fruit.* Early in spring, the bushes are a mass of white blooms, followed by soft green foliage and a fine crop of tasty cherries that are great fresh and make excellent jams and jellies. Provides habitat for birds that love the fruit. Easily grown, resists drought and is widely adaptable. Ht: 8-10'. ○ **BR Cannot ship to: AK, CO, HI, SC.**

Illinois Mulberry

30940—(*Morus alba* x 'rubra')—Zones 4-9 *Imagine giant, sweet berries growing on a tree!* Juicy, delicious fruits are 1 1/2 inches long, ripening from red to bluish-black. They have distinctive flavor and are tasty eaten both fresh and dried. The trees bear abundantly for 6-8 weeks, beginning in early July. This self-fertile selection has beautiful ornamental foliage and usually begins bearing 2-3 years after planting. Fallen fruit will stain, so avoid planting next to a patio or sidewalk. Grafted to seedling rootstock. Ht: 12-15'. ○ **PP**

1 plant \$35.95; 2+ \$32.95 ea

Evergreens & Trees

FULL SPEED A HEDGE®

The evergreens offered here are not seedlings, but are select plants that have been transplanted 2 or 3 times and are supplied with an abundance of roots.

Full Speed A Hedge® Arborvitae

23003—(*Thuja occidentalis* 'American Pillar') Zones 3-8—(P.P. 20209)—Forms an attractive privacy screen or hedge in as little as 2½ years. These trees have a rapid growth rate, dense branching structure and a narrow, columnar habit that rarely needs pruning. Foliage stays a rich shade of green all year round and does not yellow during winter. For a dense hedge, allow 2½ feet between plants. Native to North America. Ht: 15-20'. ○ ▶ PP

1 tree \$24.95; 3+ \$22.95

TECHNY

PYRAMIDAL

Techny or Mission Arborvitae

23044—(*Thuja occidentalis* 'Techny')—Zones 3-8 Maintains its dark green color throughout the winter. Foliage is soft and shears beautifully. Although its growth is more open than the pyramidal arborvitae, trimming each year will make it a beautiful specimen. Can be held to 6 feet with light trimming, but will grow to 15 feet or more if left untrimmed. Space 2-4 feet apart for a tall hedge. Ht: 6-15'+. ○ ▶ BR (8-12")

1 tree \$10.50; 3+ \$9.50 ea; 10+ \$8.25 ea

Pyramidal Arborvitae

23024—(*Thuja occidentalis* 'Pyramidalis') Zones 3-8—Popular for its rich green color and cone-shaped form. With light pruning, trees can easily be kept more compact than the listed height. Ht: 15-20'. ○ ▶ BR (8-12")

1 tree \$10.95; 3+ \$9.75 ea; 10+ \$8.50 ea

Emerald Arborvitae

23040—(*Thuja occidentalis* 'Smaragd') Zones 3-8—Prized for its feathery, bright, emerald-green foliage. The narrow form is very similar to Pyramidal arborvitae and it retains its lovely color throughout the winter. Grows 4-5 feet wide. Height can easily be controlled with light trimming. (Not pictured). Ht: 10-15'. ○ ▶ PP

1 tree \$13.95; 3+ \$12.50 ea; 10+ \$10.95 ea

NORTH POLE®

North Pole® Arborvitae

23023—(*Thuja occidentalis* 'Art Boe')—Zones 3-8 (P.P. 22174)—This super-narrow arborvitae adds year-round interest to the landscape. More narrow than the popular Pyramidal arborvitae, North Pole® maintains its narrow, columnar form without the need for heavy trimming and shaping. The trees are extremely hardy with dark green foliage that resists winter burn, even in the coldest temperatures. Can be kept shorter with light trimming. Ht: 10-15'. ○ ▶ PP

1 tree \$21.95; 3+ \$19.95 ea; 6+ \$17.95 ea

SOFT SERVE®

Soft Serve® False Cypress

22656—(*Chamaecyparis pisifera* 'Dow Whiting') Zones 4-8—(P.P. 20883)—Gorgeous, soft texture. A welcome change from the prickly foliage typical of evergreens, Soft Serve® sports soft, fern-like foliage that adds beautiful texture to the landscape. The bright green branches are accented with silver-blue flecks on the undersides. Tolerates salt and resists deer, making this a must-have for rural landscapes. Requires very little pruning. Ht: 6-10'. ○ ▶ PP

1 tree \$22.95; 3+ \$20.95 ea; 6+ \$18.95 ea

SPRUCE WINDBREAK

Spruce Windbreak

23092—Zones 3-7—Each year we have spruce trees that do not meet our rigid specifications, but with a little pruning are excellent, inexpensive trees for windbreak use. Sizes will range from 9-18 inches. These are not seedlings, but are 4-5-year-old bare root transplants. Available while supplies last. ○ BR (9-18")

10 for \$44.95; 20 for \$79.95; 50 for \$174.95; 100 for \$299.95

Find PANCAKE™ and TATER TOT®, our shrub arborvitae, on page 22.

Bargain Trees For Windbreaks, Screens, Firewood & Shade

Evergreen Seedlings

Help prevent erosion. Provide wildlife habitat.

22832—NORWAY SPRUCE—(*Picea abies*) Zones 2-7—Fastest growing spruce. Pyramidal shape with pendulous branches. Large cones. Dark green color. Grows 25-30 feet wide. Ht: 40-80'. ○ BR (6-10" seedlings)

WINTER KING

Winter King Hawthorn

22214—(*Crataegus viridis* 'Winter King')—Zones 4-7—*Nearly thornless branches and abundant spring flowers.* In spring, expect an abundance of white blooms which give way to small, bright red fruits that are popular with birds. Angular branches have shiny green, disease-resistant foliage. Offers 4 seasons of interest as the bare branches are highly attractive in the winter landscape. Ht: 25-35'. ○ ✂ BR (4' whip)

1 tree \$44.95; 2+ \$41.95 ea

AUTUMN BLAZE

Autumn Blaze Maple

22004—(*Acer freemannii* 'Jeffersred')—Zones 3-7—*A rapid grower with beautiful fall color.* This hybrid exhibits the drought tolerance and rapid growth of Silver Maple and the brilliant orange-red fall color of Red Maple. The well-shaped branches and rich green, deeply lobed leaves form a dense oval canopy making it a superb shade tree. Great replacement for Red Maples. Ht: 50-60'. ○ BR (4' whip)

1 tree \$54.95; 2+ \$49.95 ea

FLAME THROWER®

Flame Thrower® Redbud

22166—(*Cercis canadensis* 'NC2016-2')—Zones 5-9—(P.P. 31260)—*Phenomenal coloration all summer long.* In spring, the branches are covered with tiny pink flowers, and then the real color show begins. New leaves emerge burgundy-red and fade to yellow and green with this pattern continuing throughout the summer. Small trees have a delightful, pendulous habit. Ht: 15-20'. ○ BR (3-4' whip)

1 plant \$59.95; 2+ \$54.95 ea

NIOBE

Niobe Weeping Willow

22526—(*Salix alba* 'Tristis')—Zones 3-8—*Bright gold bark on arching branches is striking, even when not in leaf.* This graceful tree is very hardy and adapts easily to moist, well-drained and wet soils. Slender, drooping branches are well-supplied with narrow green leaves that turn yellow in fall. Ht: 35-50'. ○ BR (3-4' whip)

1 tree \$18.95; 3+ \$17.25 ea; 6+ \$16.25 ea

CHINA ROSE

China Rose Tree

20776—(*Prunus triloba*)—Zones 2-6—*One of the first shrubs to blossom in spring.* In April and May, its stems are covered with double, delicate pink flowers that resemble small roses. Prune the lower branches to use as a small tree or leave unpruned to form a bushy shrub. Also known as Double Flowering Plum. Ht: 6-10'. ○ ▶ ✂ BR (1-2') *Cannot ship to: AK, CO, HI, SC.*

1 plant \$22.95; 3+ \$20.95 ea

CRIMSON SUNSET®

Crimson Sunset® Maple

22087—(*Acer truncatum* x *A. platanoides* 'JFS-KW202')—Zones 4-7—(P.P. 21838)—*A gorgeous, purple-leaved selection.* Great for street use and smaller yards, trees have an upright, oval habit, growing only 25-foot wide. They handle heat and humidity well and the foliage turns vibrant red in fall. Ht: 35'. ○ BR (4' whip)

1 tree \$50.95; 2+ \$45.95 ea

AUTUMN BRILLIANCE

Autumn Brilliance Serviceberry

20040—(*Amelanchier* x *grandiflora* 'Autumn Brilliance')—Zones 3-8—*Highly ornamental trees offer three seasons of interest.* In spring, the trees are filled with snowy white blooms and the newly emerging foliage has a bronze tint. Dark, edible berries with blueberry-like flavor follow and the lanceolate foliage deepens to dark green. In fall, the leaves turn a brilliant orange. Ht: 20-25'. ○ ▶ PP

1 tree \$20.95; 3+ \$19.75 ea

Our bare-root trees and shrubs have been grown in state-inspected fields for 2-3 years, resulting in hefty plants with strong root systems. Sizes noted are approximate. For best results, soak the roots of bare-root plants 12 to 24 hours prior to planting.

Find our FRUIT and NUT TREES on pages 12-17 and our LILAC TREES on page 25.

Spiral Tree Guards

53382—*Protect your trees from girdling, abrasion, winter winds and sunscald.* These tough, pliable, plastic tree guards expand as the tree grows. Small holes admit air and light. We highly recommend these tree protectors be installed at planting time, before chances of injury occur. Height is 24 inches.

Shrubs

Sweet Emotion® Abelia

20002—(*A. mosanensis* 'SMNAMDS') Zones 4-8—(P.P. 27370)—**Rockin' spring blooms and fragrance.** This shrub puts on a fantastic show in spring, summer and fall. In spring, reddish-pink buds open to creamy florets and perfume the air with a jasmine-like fragrance. Glossy, rich green summer foliage stays attractive all season and turns eye-catching shades of orange-red in fall. A deer-resistant landscape star. Ht: 5-6'. ○ D ♀ PP
1 plant \$22.95; 3+ \$20.95 ea

Pancake™ Arborvitae

23005—(*Thuja occidentalis* 'Concesarini')—Zones 3-8—(P.P. 24013)—**A low-maintenance evergreen for the front of the border.** Low-growing, dense plants require very little pruning to maintain their delightful, flattened form. The bluish-green foliage becomes more blue during the fall and resists winter burn. Grows up to 24-36 inches wide. Ideal for low borders and rock gardens. Ht: 12". ○ PP
1 plant \$21.95; 3+ \$19.95 ea

Tater Tot® Arborvitae

23026—(*Thuja occidentalis* 'SMNTOBAB')—Zones 3-8—(P.P. 30761)—**A cute name for a cute little shrub.** These neat evergreens add wonderful structure to borders and foundation plantings. Easy-care plants have rich green foliage and naturally keep their globe-shaped form with very little pruning needed. Ht: 12-24". ○ D ♀ PP
1 plant \$22.95; 3+ \$20.95 ea

ARBORVITAE TREES—See page 20.

Weston's Innocence Azalea

20124—(*Rhododendron hybridum*)—Zones 4-8—**A gorgeous, late-blooming azalea to decorate the summer landscape.** Blooming later than most azaleas, these mounded plants bear pristine white, star-shaped fragrant blooms in summer. The glossy green foliage takes on burgundy hues in the fall, giving this plant multi-season interest. Ht: 3-5'. ○ D ♀ PP
1 plant \$18.95; 3+ \$17.45 ea

Pearl Glam® Beautyberry

20222—(*Callicarpa x 'NCCX2'*)—Zones 5-9 (P.P. 28312)—**Dress up your landscape with this glamorous beauty.** The foliage of these shrubs is dark purple, from the moment it emerges in spring all the way until frost. In summer, white flowers adorn the branches and are followed by gorgeous, orchid purple, inedible berries in fall. The deer-resistant plants have an upright, compact habit. Blooming on new wood, these easy-care shrubs are a simple way to add wonderful fall interest. Ht: 4-5'. ○ PP
1 plant \$22.95; 3+ \$20.95 ea

Sapphire Surf™ Bluebeard

20247—(*Caryopteris x clandonensis* 'Blauer Splat')—Zones 5-9—**Stunning late summer color.** At a time when many other plants are winding down, this shrub rolls out rich blue, fragrant flowers, covering itself from top to bottom. Aromatic, dark green foliage spreads up to 3 feet, adding nice texture to the landscape, even when the plant is not in bloom. Drought tolerance and deer resistance help make it very low maintenance. Ht: 1½-3'. ○ ♀ PP
1 plant \$24.95; 3+ \$22.45 ea

Little Missy Boxwood

21428—(*Buxus microphylla* 'Little Missy')—Zones 5-9—(P.P. 24703)—**This cute little evergreen adds wonderful structure and year-round color to landscapes.** A non-flowering selection, rounded plants have small, glossy, dark green foliage and a dense, compact habit that works great for foundation plantings along the house and short hedges. A recent USDA analysis ranked Little Missy as highly resistant to Boxwood Blight. Ht: 2-3'. ○ PP
1 plant \$23.95; 3+ \$21.95 ea

Fire Ball® Burning Bush

20439—(*Euonymus alatus* 'Select')—Zones 4-8—**Brilliant red fall color.** This improved selection is much less prone to winter damage than older cultivars. The rounded plants can create an interesting focal point in your yard, both individually or when used as a hedge. The attractive foliage is glossy green in summer, before taking on its brilliant hues in fall. Can be kept shorter with pruning. Drought tolerant once established. Ht: 5-7'. ○ PP **Cannot ship to: AK, HI, MA, ME, NH, VT.**
1 plant \$21.95; 3+ \$19.95 ea

Lo & Behold Ruby Chip® Butterfly Bush

21447—(*Buddleia x 'SMNBDD'*)—Zones 5-9 (P.P. 32399)—**Don't plan a huge space for this butterfly bush because it doesn't need it.** Mounded, compact plants produce an incredible amount of magenta-ruby flower spikes all summer long. Heat and drought tolerant, this butterfly bush is so easy-care, you almost forget it's there. Ht: 30-32". ○ ∞ ♀ PP **Cannot ship to: AK, HI, OR, WA.**
1 plant \$23.95; 3+ \$21.95 ea

Pugster® Amethyst Butterfly Bush

21443—(*Buddleia* 'SMNBDL')—Zones 5-9 (P.P. 30236)—**Compact plants with full-size flowers.** Thicker flower plumes give a greater presence in landscapes and they're held on thick stems which resist winter dieback better than older varieties. The clear purple, fragrant plumes will appear throughout the summer. Ht: 24". ○ ♀ PP **Cannot ship to: AK, HI, OR, WA.**
1 plant \$24.95; 3+ \$22.45 ea

Grand Cascade Butterfly Bush

21442—(*Buddleia x 'Grand Cascade'*)—Zones 5-9—(P.P. 30868)—**This butterfly bush has major flower power!** The blooms of many butterfly bushes point upward, but these gently curve downward, giving it a totally different look. The light lavender-purple, honey-scented flower panicles are 12-14 inches long and 4 inches thick, making them highly visible to both humans and pollinators alike. Ideal for borders and creating focal points. Ht: 5½-6'. ○ ♀ PP **Cannot ship to: AK, HI, OR, WA.**
1 plant \$18.95; 3+ \$17.45 ea

Butterfly Bushes

(*Buddleia*)—Zones 5-9—**This shrub attracts butterflies by the score.** Abundant 12-18 inch fragrant flower spikes are produced all summer. Plants die back in colder areas, but grow back strongly from their roots. Ht: 4-8'. ○ ∞ ♀ PP **Cannot ship to: AK, HI, OR, WA.**

20173-BICOLOR—Yellow and rose-lavender
20172-BLACK KNIGHT—Dark purple

PRICE OF BUTTERFLY BUSHES (per variety):
1 plant \$14.95; 3+ \$13.45 ea

Sugar Shack® Buttonbush
20259—(*Cephalanthus occidentalis* 'SMCOSS')
 Zones 4-9—(P.P. 26543)—*A native plant with three seasons of interest!* Compact bushes are filled with glossy, red-tipped foliage. Interesting white blossoms are fragrant and attract bees, butterflies and hummingbirds all summer. In fall, the blossoms give way to burgundy, non-edible fruits. Fantastic for low, wet spots in the landscape. Ht: 4'. ○ ▶ ♀ PP
1 plant \$22.95; 3+ \$20.95 ea

Kodiak® Orange Diervilla
20409—(*D. x 'G2X88544'*)—Zones 4-7
 (P.P. 27548)—*A Bush Honeysuckle displaying magnificent fall foliage.* In summer, the rounded shrubs are covered with lush green foliage and bear light yellow flowers adored by bees and butterflies alike. In fall, the foliage takes on brilliant orange and red hues that light up the landscape as well as any Burning Bush. Adapts well to a wide variety of growing conditions, including drought. Deer-resistant. Ht: 3-4'. ○ ▶ ● ♀ PP
1 plant \$21.95; 3+ \$19.95 ea

Winterberry Holly
 (*Ilex verticillata*)—Zones 3-9—*Feed the birds... these super colorful berries!* Ideal for adding a bit of cheer to a blustery landscape, winterberry holly loses its green leaves in autumn and replaces them with bright berries that birds adore. Berry Poppins® and Mr. Poppins® grow much smaller than the native species, a size that can fit into both large and small yards, while Berry Heavy® Gold gets a bit larger. These easy-care plants hardly ever require pruning. Whole, cut branches make a great addition to winter arrangements. ○ ▶ ✂ PP

BERRY POPPINS®—('FARROWBPOP')—(P.P. 25835)—Heavy-fruiting female. Pollination partner: Mr. Poppins®. Ht: 3-4'.
MR. POPPINS®—('FARROWMRP')
 (P.P. 25834)—Male. Does not set fruit, but can provide pollen for up to 5 females, planted within 50 feet. (Not pictured). Ht: 3-4'.
BERRY HEAVY® GOLD—('Roberta Case')—Big, bright gold fruits are a treasure in the winter landscape. Female. Pollination partner: Mr. Poppins®. Ht: 6-8'.

WINTERBERRY PRICING:
21613 (X)—1 each of Berry Poppins® and Mr. Poppins® for **\$44.95**
21612 (X)—1 each of Berry Heavy® Gold and Mr. Poppins® for **\$44.95**

Stand By Me Bush Clematis
20297—Zones 3-7—(P.P. 30556)—*Not your typical clematis.* Plants behave more like bushes, needing minimal support from stakes or other plants. In late May to early June, they bear an abundance of blue, bell-shaped flowers, followed by attractive, thread-like seed heads. Expect some rebloom later in the summer. Ht: 34-38". ○ ▶ BR
1 plant \$19.95; 3+ \$17.95 ea

Meadowlark Forsythia
20478—(*F. x 'Meadowlark'*)—Zones 3-8—*Superior flower bud hardiness to -35°F.* Even colder regions can enjoy a gorgeous display of these golden blooms in spring. The dense, semi-arching plants tolerate heat, drought and pollution. This landscape classic is a standout as a hedge or accent. Ht: 8-10'. ○ ✂ BR (9-12")
1 plant \$11.95; 3+ \$10.95 ea

Versatile Hedges

SCREEN YOUR PROPERTY WITH THESE BEAUTIFUL, EASY-CARE LIVING FENCES.

Hedge Cotoneaster
20374—(*C. lucidus*)—Zones 2-6—*This plant thrives in sun or shade and tolerates severe trimming.* Well-supplied with dense, glossy green foliage that turns to beautiful red in the fall. Small, pink flowers in spring are followed by decorative black berries that attract birds. Insect and disease free. Keep height in check through pruning. Ht: 3-6'. ○ ▶ ● BR (12-15")
1 plant \$15.95; 3+ \$13.95 ea; 10+ \$11.95 ea; 20+ \$9.95 ea

Candy™ Coralberry
20965—(*Symphoricarpos x doorenbosii* 'Kolmcan')
 Zones 4-9—(P.P. 20931)—*Delightful in every season.* In early fall, as the leaves drop, pearl-like berries line the arching stems of these compact plants, becoming plump and turning candy-pink. Lovely in floral arrangements, they remain showy all winter and are a gorgeous sight dusted with snow. In summer, the bushes are clothed with dark green foliage and small pink flowers. Ht: 24-30". ○ ✂ BR (12-18")
1 plant \$24.95; 3+ \$22.45 ea

Blue Chiffon® Hibiscus
21459—(*H. syriacus* 'Notwoodthree')—Zones 5-9—(P.P. 20574)—*A long blooming variety that sets very few seeds.* Beginning in late summer, these tall shrubs bear an amazing number of large, delicate, blue flowers. They continue to bloom until frost, adding elegant color to the landscape. Not favored by deer, the floriferous plants are drought and heat tolerant once established. Ht: 8-12'. ○ ✂ ♀ PP
1 plant \$23.95; 3+ \$21.95 ea

Hardy Privet

Zones 4-8—*Thickly branched and very adaptable.* Glossy green foliage retains its color and remains on the plant well into fall. Well-suited for hedges or foundation plantings as privets tolerate rigorous shearing. They rarely require spraying for insects or plant diseases.

20582—AMUR RIVER—(*Ligustrum amurense*)—Shear this plant any height from 3 feet or more. The more you prune, the denser it will grow. Will be 10 to 15 feet if left unpruned. Foliage is dark green. Ht: 3-15'. ○ ▶ BR (12-15")
5 for \$19.95; 10 for \$35.95; 25 for \$79.95
20586—CHEYENNE—(*Ligustrum vulgare* 'Cheyenne') Trim this densely branched shrub filled with medium green foliage to any desired height. Tolerates poor soils and is fast-growing. Ht: 1½-6'. ○ ▶ BR (18")
3 for \$16.95; 6 for \$31.50; 12 for \$55.95
20590—STRAIGHT TALK®—(*Ligustrum vulgare* 'Swift') A fresh new look for privets - the branches grow more vertical! Drought tolerant, versatile plants can be used for both accents in tight spaces and for hedging. Grows 2 to 3 feet wide. Ht: 8-12'. ○ ▶ PP
1 plant \$27.95; 3+ \$25.45 ea

INCREDIBALL®

Hydrangeas

INCREDIBALL® BLUSH

Incrediball® Hydrangeas

Zones 3-9—*Like old-time favorite Annabelle hydrangea...only bigger and better!* The breeding goal for these hydrangeas was stronger stems to eliminate blooms that flop. Not only was this achieved, but an added bonus was incredibly large flowers up to a foot wide packed with nearly 4 times the florets as compared to Annabelle hydrangea. The blooms are superb for fresh and dried floral arrangements. Bushy, compact, mounded plants fit well into landscapes as flowering accents. A North American native cultivar. Blooms on new wood. Ht: 4-5'. ○ ≍ PP

20531—INCREDIBALL®—(*H. arborescens* 'Abetwo')—(P.P. 20571)—Lime-green flowerheads mature to elegant, creamy white. Gorgeous all summer long.

1 plant \$24.95; 3+ \$22.45 ea

20515—INCREDIBALL® BLUSH

(*H. arborescens* 'NCHA4')—(P.P. 28280) Beautiful blush pink blooms age to an attractive green. Phenomenal planted alone or *en masse*.

1 plant \$25.95; 3+ \$23.45 ea

HYDRANGEA PRUNING TIPS

Blooms on old wood: Plants form next year's buds on late summer and fall stems. Prune only the spent blooms. Do not prune to the ground.

Blooms on new wood: Plants only flower on growth from the current growing season. Prune to 1-2 ft. above the ground in early spring.

Blooms on both old and new wood: Prune the spent blooms during the growing season. The following spring, cut dead stems off or prune to 1-2' above the ground.

INVINCIBELLE® RUBY

Invincibelle® Ruby Hydrangea

20543—(*H. arborescens* 'NCHA3')—Zones 3-9 (P.P. 28317)—*A tough hydrangea with uniquely colored blooms.* Dark burgundy-red buds open into two-toned blooms of bright ruby red and silvery pink. Dark green foliage provides a perfect backdrop for the enchanting blooms and strong stems hold them upright. Blooms reliably in cold climates. A North American native cultivar. Blooms on new wood. Ht: 3-4'. ○ ≍ PP

1 plant \$25.95; 3+ \$23.45 ea

INVINCIBELLE WEE WHITE®

Invincibelle Wee White® Hydrangea

21598—(*H. arborescens* 'NCHA5')—Zones 3-9 (P.P. 30296)—*So small it's perfect for the front of the border.* Blooms age from white to shades of pink and green and appear in profusion from summer until fall. Compact plants have very sturdy stems. A North American native cultivar that blooms on new wood. Ht: 1-2½'. ○ ≍ PP

1 plant \$24.95; 3+ \$22.45 ea

STRAWBERRY SUNDAE®

Strawberry Sundae® Hydrangea

20529—(*H. paniculata* 'Rensun')—Zones 4-7 (P.P. 25438)—*A compact version of Vanilla Strawberry™, ideal for smaller yards.* The abundant flowers emerge creamy-white in midsummer, blushing to pink and finishing strawberry red. The fantastic flower color lasts well into fall. Blooms on new wood. Ht: 4-5'. ○ ≍ PP

1 plant \$23.95; 3+ \$21.45 ea

QUICK FIRE FAB®

Quick Fire Fab® Hydrangea

21525—(*H. paniculata* 'SMNHMPM')—Zones 3-8 (P.P. 32513)—*Similar to Vanilla Strawberry™, but earlier blooming!* Beginning in early summer, white, cone-shaped flower panicles appear. As summer progresses, the blooms transition to blush pink, then bright pink, and finally red, from the bottom up. Strong, sturdy stems hold the blooms upright for an impressive display. Blooms on new wood. Ht: 6-8'. ○ ≍ PP

1 plant \$24.95; 3+ \$22.45 ea

FIRE LIGHT TIDBIT™

Fire Light Tidbit™ Hydrangea

21524—(*H. paniculata* 'SMNHPK')—Zones 3-8 (P.P. 32512)—*A petite panicle hydrangea for the front of the border.* Tidy, low-growing, mounded plants begin flowering in early to midsummer, their blooms emerging bright lime green before transitioning to white and finishing in tones of pink and red. The blooms practically hide the rich green foliage which turns eye-catching shades of orange-red in fall. Blooms on new wood. Ht: 2-3'. ○ ≍ PP

1 plant \$24.95; 3+ \$22.45 ea

LITTLE LIME®

Little Lime® Hydrangea

20540—(*H. paniculata* 'Jane')—Zones 3-9 (P.P. 22330)—*Color-changing blooms on a hardy, easy-care plant.* Cone-shaped blooms transition from refreshing lime green in summer to pink and burgundy tones in fall, without you having to lift a finger. Strong stems hold the blooms upright to increase their visual impact in the landscape. Ideal for foundation and border plantings. Blooms on new wood. Ht: 3-5'. ○ ≍ PP

1 plant \$23.95; 3+ \$21.95 ea

L.A. DREAMIN'®

L.A. Dreamin'® Hydrangea

20530—(*H. macrophylla* 'Lindsey Ann')—Zones 5-9—(P.P. 26249)—*This plant redefines the old conceptions about mophead hydrangeas.* L.A. Dreamin'® is a veritable artist's palette of pink, blue and lavender hues under all soil pH conditions. The huge blooms are set off against shiny, bright green foliage. Unlike typical mophead hydrangeas, this beauty blooms on both old and new wood. As a result, every summer it reliably unveils another technicolor show. Ht: 4'. ○ ≍ PP

1 plant \$24.95; 3+ \$22.45 ea

SUMMER CRUSH®

Summer Crush® Hydrangea

21580—(*H. macrophylla* 'Bailmactive')—Zones 4-9—(P.P. 30359)—*A hardy hydrangea with eye-popping color.* Mophead blooms are either rich raspberry red or bright neon purple, depending on your soil acidity, and they appear continuously all summer. Dark green foliage makes a wonderful backdrop for the jewel-toned blooms and the plants are the most wilt resistant in the Endless Summer® lineup. Blooms on both old and new wood. Ht: 18-36". ○ ≍ PP

1 plant \$24.95; 3+ \$23.50 ea

BLOOMSTRUCK®

BloomStruck® Hydrangea

20510—(*H. macrophylla* 'PIIHM-II')—Zones 4-9 (P.P. 25566)—*BloomStruck® promises a nearly endless supply of colorful blooms.* Depending on soil pH, the 3½ to 5 inch flowers will be intense shades of pink, purple or blue. Glossy dark green leaves with red petioles, red veins and striking red-purple stems add to this plant's allure. Good heat tolerance and great disease resistance. Blooms on both old and new wood. Ht: 3-4'. ○ ≍ PP

1 plant \$25.95; 3+ \$23.45 ea

SNOW DWARF

Snow Dwarf Mock Orange

20710—(*Philadelphus* 'Snow Dwarf')—Zones 4-7—*A Canadian selection known for hardiness and heavy flowering.* This compact bush is well-branched with dark green, deer-resistant foliage. A prolific bloomer bearing 1½ inch, double white blossoms with exquisite sweet fragrance. Flowers in June. Very low maintenance – just trim to shape after flowering. Ht: 2-3'. ○ PP
1 plant \$17.95; 3+ \$16.95 ea

LEMON MERINGUE™

Lemon Meringue™ Potentilla

20747—(*P. fruticosa* 'Bailmeringue')—Zones 2-6—*This has major flower power!* Throughout the summer, compact shrubs set an abundance of light yellow, double blooms reminiscent of small roses. Easy-care plants require very little pruning to maintain their tidy habit. Expect this tough, drought tolerant plant to survive harsh winters with ease as it was developed in Canada. A native plant useful for foundation plantings and low hedges. Ht: 2-3'. ○ ♀ BR (12")
1 plant \$22.95; 3+ \$20.95 ea

BLACK LACE®

Black Lace® Sambucus

20891—(*S. nigra* 'Eva')—Zones 4-7—(P.P. 15575) *A hardy substitute for Japanese maple.* Thick and lacy, purple-black foliage has the texture of Japanese maple. It bears massive pink flowers in late spring that reach six inches or more in diameter. The bushy plants add an airy feel to perennial gardens, patios and landscape borders. Very adaptable and easy to grow. Ht: 6-8'. ♀ PP
1 plant \$23.95; 3+ \$21.45 ea

DOUBLE PLAY DOOZIE®

Double Play Doozie® Spirea

20915—(*S. japonica* 'NCSX2')—Zones 3-8 (P.P. 30953)—*A seedless spirea that blooms non-stop, all summer long.* The show begins in spring with flashy, deep red foliage. By late spring the foliage transitions to deep green and brilliant purple-red flowers start to appear, continuing all the way until frost. Mounded plants make excellent additions to foundation plantings, mixed landscapes and borders. Deer resistant. Ht: 24-36". ○ ♀ PP
1 plant \$22.95; 3+ \$20.95 ea

AMBER JUBILEE™

Amber Jubilee™ Ninebark

20719—(*Physocarpus opulifolius* 'Jefam')—Zones 2-7—(P.P. 23177)—*Unique color provides landscape interest.* The glowing orange, yellow and gold tones stand out in a garden border or as an eye-catching hedge. In spring, the plant is covered with delicate white flowers, and in fall the foliage is highlighted with red and purple hues. Ht: 5-6'. ○ ♀ PP
1 plant \$24.95; 3+ \$22.95 ea

HAPPY FACE® PINK PARADISE

Happy Face® Pink Paradise Potentilla

20743—(*P. fruticosa* 'Kupinpa')—Zones 2-7 (P.P. 22732)—*Holds its pink color longer than other pink potentillas.* Well-rounded shrubs bear clear pink, semi-double blooms from early summer through late summer. The flower color may fade under intense heat, but the incredible amount of blooms makes up for it. An easy-care plant that requires very little attention. Great for borders, foundations and mass plantings. Ht: 24-36". ○ ♀ PP
1 plant \$22.95; 3+ \$20.95 ea

LEMONY LACE®

Lemony Lace® Sambucus

20889—(*S. racemosa* 'SMNSRD4')—Zones 3-7 (P.P. 26613)—*Vibrant, thread-leaf foliage adds texture.* Compact mounds of deeply-cut leaves look like lace dripping from branches. New growth is reddish in color, maturing to a golden lemon green. White spring blooms give rise to inedible, red fruits in the fall. Mixes well in landscapes, and provides nice color in shady spots. Ht: 3-5'. ♀ PP
1 plant \$23.95; 3+ \$21.45 ea

DOUBLE PLAY® CANDY CORN®

Double Play® Candy Corn® Spirea

20917—(*S. japonica* 'NCSX1')—Zones 4-7 (P.P. 28313)—*Colorful foliage all season long.* Leaves emerge red in spring, orange in summer, and quickly change to golden yellow. Combine the foliage with dark purple spring flowers and this low-maintenance shrub is destined to become as classic as the candy it's named after. Mounded, deer-resistant plants. Ht: 18-24". ○ ♀ PP
1 plant \$22.95; 3+ \$20.95 ea

SUNNY BOULEVARD®

Sunny Boulevard® St. John's Wort

20504—(*Hypericum x* 'Deppe')—Zones 4-8 (P.P. 20045)—*Vibrant yellow blossoms are present from July until September!* Leaves of this mounding shrub are dark green and willow-like, adding a delicate, airy texture to the landscape. This easy-to-grow, deciduous shrub has small, bright yellow flowers that bloom profusely for months. Deer resistant, drought tolerant, and a North American native cultivar. Ht: 2-3'. ○ ♀ PP
1 plant \$21.95; 3+ \$19.95 ea

BLACK HAT®

Black Hat® Rhododendron

20804—(*R. x* 'NCRX2')—Zones 4-8 (P.P. 31898)—*Longer blooming than many common varieties.* The lush, rose-purple blooms of this beauty deliver a knock-out punch of color in the early spring landscape, lasting longer than many early blooming selections. Thick, evergreen foliage turns purple-black in cool weather, adding a touch of drama to this high-class plant. Blooms on old wood and is quite easy to maintain. Requires acidic soil (see page 36 for amendments). Ht: 3'. ♀ ○ PP
1 plant \$24.95; 3+ \$22.95 ea

WINECRAFT BLACK®

Winecraft Black® Smokebush

20366—(*Cotinus coggygria* 'NCC01')—Zones 4-8—(P.P. 30216)—*A semi-dwarf Smokebush in a more manageable size.* Dark purple, almost black foliage darkens as the season progresses and turns vibrant orange in fall. Red, smoke-like blooms appear in early to midsummer adding extra appeal. Deer resistant plants require very little maintenance. Ht: 4-6'. ○ PP
1 plant \$24.95; 3+ \$22.45 ea

DOUBLE PLAY® GOLD

Double Play® Gold Spirea

20911—(*S. japonica* 'Yan')—Zones 4-9 (P.P. 21615)—*Brilliant foliage keeps this shrub interesting and beautiful long after the blooms have faded.* Pure hot-pink flowers cover this mounding shrub all summer, contrasting nicely with the golden-green foliage. It's so easy to maintain, you can almost plant it and forget it. Deer resistant. Ht: 18-24". ○ ♀ PP
1 plant \$22.95; 3+ \$20.95 ea

Pink Sparkler™ Spirea
20907—(*S. betulifolia* 'COURISPI01')—Zones 3-8 (P.P. 27933)—*Not only does this spirea rebloom, but it has colorful fall foliage too!* Mounded plants display bright pink flowers on the branch tips in early summer. In late summer to early fall they bloom again, but up and down the branches instead. The foliage, bright green in spring and summer, turns beautiful shades of burgundy-red in autumn. Deer resistant and low maintenance, the shrubs require very little pruning to maintain their tidy shape. Ht: 3-4'. ○ ♣ BR (9-12")
1 plant \$22.95; 3+ \$20.95 ea

Simply Scentsational® Sweetshrub
20231—(*Calycanthus floridus* 'SMNCAF') Zones 4-9—(P.P. 33550)—*This North American native cultivar fills your yard with wonderful, fruity fragrance.* Magnolia-like blooms of deep maroon-red begin blooming in late spring and continue into midsummer. Large, rounded shrubs have tough, rich green foliage and can adapt to most well-drained soils. Blooms on both old and new wood, requiring very little maintenance. Ht: 6'. ○ ♣ PP
1 plant \$27.95; 3+ \$25.45 ea

American Highbush Viburnum or Cranberry
21172—(*V. opulus* var. *americanum*)—Zones 2-7 *The berries have flavor much like the marsh cranberry.* This large shrub has a commanding presence in the landscape. Lobed, dark green leaves turn deep red in the fall. Flattened clusters of showy white flowers appear in May, followed by scarlet berries that make excellent jellies and preserves. Ht: 10-12'. ○ ♣ BR (12-18")
1 plant \$14.95; 3+ \$12.95 ea

Czechmark Trilogy® Weigela
21195—(*W. florida* 'VUKOZGemini')—Zones 4-8 (P.P. 28969)—*Blooms in 3 different colors on one shrub!* Selected for its hardiness, extra large flowers and vivid coloration. Compact, rounded plants with glossy, medium-green foliage display vibrant blooms in tones of white, pink and red in spring. These easy-care shrubs adapt easily to most soils and require little to no pruning. Excellent for borders, hedges and foundation plantings. Ht: 3-3½'. ○ ♣ PP
1 plant \$22.95; 3+ \$20.95 ea

Bridal Wreath Spirea
20958—(*S. x vanhouttei* 'Renaissance')—Zones 3-7—*Beautiful 'Bridal Wreath' is one of the best known and most useful shrubs.* It forms a round and graceful plant with drooping or arched branches. Use it as a single specimen, plant it among other shrubs or create a privacy hedge around your property. In June it becomes a fountain of snow white blossoms. Ht: 6-8'. ○ ♣ BR (12-15")
1 plant \$14.95; 3+ \$12.95 ea

Ruby Spice Summersweet
20307—(*Clethra alnifolia* 'Ruby Spice')—Zones 4-9—*Deep rose flower spires can perfume an entire garden.* They emerge above dense, serrated, dark green leaves that become a blaze of yellow in the fall. The compact, rounded plants perform best in soil that's somewhat acidic. Plants tolerate heat, drought, damp soils and fairly heavy shade. Ht: 3-6'. ○ ♣ PP
1 plant \$16.95; 3+ \$15.25 ea

Hakuro Nishiki Dappled Willow
20894—(*Salix integra* 'Hakuro Nishiki')—Zones 4-7 *Slender branches add movement and texture to the landscape.* The unique white, green and pink foliage is held on narrow branches that swish and sway, even in gentle breezes. The bushes bear small, pussy willow-like catkins in spring and adapt well to a wide range of planting conditions, even wet soil. Requires shearing in early summer to maintain the colorful variegation. Ht: 4-6'. ○ ♣ PP
1 plant \$17.95; 3+ \$15.95 ea

Spilled Wine® Weigela
21213—(*W. florida* 'Bokraspiwi')—Zones 4-8 (P.P. 23781)—*Intoxicating color for small spaces.* The combination of wavy, dark purple-red foliage, magenta-pink flowers, and compact, spreading habit makes this a good 'all-purpose' plant for borders, foundation plantings, and even spilling out of large containers. The heaviest bloom occurs in late spring, but you'll enjoy some rebloom all summer. Grows about 3 feet wide. Ht: 24-36". ○ PP
1 plant \$22.95; 3+ \$20.95 ea

Little Henry® Sweetpire
20587—(*Itea virginica* 'Sprich')—Zones 5-9 *Compact plants with fall color like wildfire.* In spring, loads of sweetly scented, long, pure white flowers cover these low, mounding plants. In fall, the plants become a bright red that's more brilliant than a Burning Bush. Perfectly suited for mass plantings on banks or in beds and borders. Ht: 24-36". ○ ♣ PP
1 plant \$21.95; 3+ \$19.95 ea

Sugartina® Crystalina Summersweet
20309—(*Clethra alnifolia* 'Crystalina')—Zones 4-9—(P.P. 21561)—*Easy-care plants with super fragrant flowers.* In midsummer, you'll be delighted by the abundance of pure white florets that perfume the air. In fall, the dark green foliage turns an attractive yellow color that adds a punch to the landscape. Mounded, dense plants rarely require pruning. Ht: 30-36". ○ ♣ PP
1 plant \$22.95; 3+ \$20.95 ea

Giant Flowered Pussy Willow
20892—(*Salix caprea*)—Zones 3-7—*Pick spring bouquets of pussy willow branches.* In early spring, cut off the ends of the branches, place them indoors in a vase of water and soon the large, silvery catkins unfold. Easily grown in any sunny location. Works well for screening. Ht: 15-20'. ○ ♣ BR (2-3")
1 plant \$12.95; 3+ \$11.95 ea

Sonic Bloom® Red Weigela
21215—(*W. florida* 'Verweig6')—Zones 4-8—(P.P. 25132)—*One of the best reblooming weigelas available.* Rounded shrubs explode with lipstick-red blooms in May and then continue to send out bursts of blooms throughout the summer until frost — no deadheading needed. Rich green foliage provides a perfect backdrop for the showy blooms adored by hummingbirds. Perfect for foundation plantings and shrub borders. Ht: 4-5'. ○ ♣ PP
1 plant \$23.95; 3+ \$21.95 ea

Ornamental Vines

SCARLET

Trumpet Vine

(*Campsis radicans*)—A hummingbird favorite! Vigorous vines bear clusters of trumpet-shaped flowers at the tips of their branches from June until frost. Vines have heavy, dark green, toothed foliage and cling readily to any support. Ht: 25-40'. ○ BR (2 yr. root cuttings)

20226—SCARLET—Zones 4-9—Flowers are orange-scarlet.

20228—YELLOW—Zones 5-9—Trumpets of bright yellow, with some shading to apricot. (Not pictured).

PRICE OF TRUMPET VINES (per variety):

1 plant \$11.95; 3+ \$10.95 ea

AUTUMN REVOLUTION™

Autumn Revolution™ Bittersweet

20256—(*Celastrus scandens* 'Bailumn')—Zones 2-8—(P.P. 19811)—Ornamental fruit without a pollinizer. Unlike common American bittersweet, this variety has perfect flowers that include both male and female parts so you need only one plant for fruiting. The fruit is abundant and the berries are twice as large as the species. Bright orange to red berries are displayed against glossy green foliage. Berries are used for ornamental purposes only. Ht: 15-25'. ○ ▶ BR

1 plant \$25.95; 3+ \$23.45 ea

FRUITING VINES—Looking for a vine with both ornamental and edible value? Find HOPS and KIWI on page 18.

MAYPOP

Maypop Passionflower

13597—(*Passiflora incarnata*)—Zones 5-9—The hardest of all Passionflowers. Lacy foliage covers stems that bear large flowers in a blend of pink, purple and blue all summer. Flowers are followed by egg-size, yellow fruits with a flavor similar to passion fruit. Vines freeze to the ground each winter, but regrow in spring. Root hardy to -20°F. Ht: 6-8'. ○ ▶ PP

1 plant \$20.95; 3+ \$18.95 ea

PEACHES AND CREAM

Peaches and Cream Honeysuckle

20605—(*Lonicera periclymenum* 'Inov86')—Zones 4-9—(P.P. 21839)—A compact honeysuckle! All summer long, hummingbirds and humans alike will enjoy these fragrant pink and white bicolor blooms. Compact vines are ideal for smaller trellises, fences, or even as a ground cover. Tolerates heat, drought and humidity, plus the deep green foliage exhibits excellent mildew resistance. Ht: 5-6'. ○ ▶ PP

1 plant \$17.95; 3+ \$16.75 ea

GOLDFLAME

Goldflame Honeysuckle

20604—(*Lonicera heckrottii*)—Zones 4-9—One of our most attractive vines. In June, clusters of fragrant, rosy-red and yellow multi-hued flowers cover the vines with rebloom continuing until late in the fall. The twining vines are covered with nice blue-green foliage and purplish-red stems. Not bothered by insects or disease. Attracts hummingbirds and butterflies. Ht: 10-15'. ○ ▶ BR

1 plant \$21.95; 3+ \$19.95 ea

SCENTSACTION

Scentsation Honeysuckle

20607—(*Lonicera periclymenum* 'Scentsation')—Zones 4-9—(P.P. 16240)—Blooms have outstanding fragrance! This floriferous honeysuckle bears lemon-yellow, intensely fragrant flowers beginning mid-spring and continuing all summer. The flowers are followed by bright red berries. A wonderful landscape addition, especially when trained up a trellis or across a fence. Ht: 8-10'. ○ ▶ PP

1 plant \$22.95; 3+ \$20.95 ea

DROPMORE SCARLET

Dropmore Scarlet Honeysuckle

20602—(*Lonicera x Brownii* 'Dropmore Scarlet')—Zones 3-8—Extremely hardy and loved by butterflies. A heavy display of brilliant, red-orange trumpet-shaped flowers are borne in June. Lighter rebloom continues until frost. Attractive, rounded, green foliage. Useful as a specimen as well as a fine screen. Ht: 10-20' ○ ▶ BR

1 plant \$21.95; 3+ \$19.95 ea

CLIMBING ROSES—A beautiful option for adding vertical accents to your yard and garden. Find them on page 30.

BLUE MOON

Blue Moon Wisteria

21236—(*W. macrostachya*)—Zones 3-9—Reliably hardy to -40°F. Fast-growing vines bloom up to 3 times a year in a full-sun location. Produces lavender-blue, sweetly scented, 12 inch racemes. Ht: 15'. ○ PP

1 plant \$19.95; 3+ \$17.95 ea

Clematis

CLEMATIS CULTURE: Superb for summer color, grow clematis for bright accents on a trellis or fence. For best success they require a rich, alkaline (sweet) soil and a site with good drainage. To maintain soil alkalinity, mix our Clematis & Lilac Starter (see page 29) into the soil each spring. Choose a location with sun at least half the day, and keep the roots cool with a thick mulch, or plant annuals or perennials in front to shade them. Clematis vines are fast growing, hardy, and increase in size and beauty every year. Plant several varieties to extend the blooming period. Flower color may vary from catalog photos. For proper pruning of clematis, see the information box on the next page.

BERNADINE™

Bernadine™

21306—(C. x 'Evipo061')—Zones 4-9—Exquisite, light blue color. Large, abundant blooms are luminous, light blue with contrasting reddish stamens. A compact variety that easily fits most standard trellises. Great for lighting up semi-shady areas of the garden. Blooms from late spring to early fall. Ht: 3-4'. **Group 3** ○ ▶ PP

1 plant \$21.95; 3+ \$19.95 ea

Ornamental Obelisks STURDY PLANT SUPPORTS

These free-standing towers provide sturdy support for climbing plants and vines, even vegetables such as tomatoes and pole beans. Easy to assemble and install. Simply push the leg poles into the ground. Sturdy construction ensures years of use.

53780—7½ FOOT OBELISK
Constructed of sturdy ¾" black powder coated steel tubing and 1¾" diameter metal bands that are attractively embossed. **Each \$67.95**

53781—5 FOOT OBELISK—Made of 7/16" black powder coated steel tubing and 1¼" diameter embossed metal bands. Works well as a plant support in a large pot. **Each \$51.95**

NEW!

Rapiclip® Soft Wire Ties

52829—Reusable wire ties are great for attaching vines and other plants to trellises and supports. Simply cut to the length you need and twist to secure. The strong, wire core is cushioned with soft, green rubber that protects the plant or object you're securing. Ideal for use on clematis and other vines, as well as climbing roses and tomatoes. Made in the USA. Each card contains 32' of soft-coated wire.

Each \$13.95

CARDINAL WYSZYNSKI

Cardinal Wyszynski

21314—Zones 4-9—*Fantastic, eye-catching color.* Vines display huge, showy, deep magenta-red, 6-8 inch blooms accented with darker burgundy anthers. Flowers from midsummer through early fall on new growth. Ht: 9-12'. **Group 3** ○ ▶ PP

1 plant \$19.95; 3+ \$17.95 ea

DUCHESS OF EDINBURGH

Duchess of Edinburgh

20278—Zones 4-9—*Elegant, double blooms.* These fluffy, 4-6 inch rosettes of creamy white bring a point of style and grace to the garden. Some blooms may display a hint of fresh green upon opening, but it only enhances their beauty. Blooms in late spring to early summer with lighter rebloom in the fall. Ht: 10-12'. **Group 2** ○ ▶ PP

1 plant \$21.95; 3+ \$19.95 ea

JOSEPHINE™

Josephine™

20287—(C. x 'Evijohil')—Zones 3-8—(P.P. 12912) *Unique color and form.* Double 4½-5 inch pompon-like blooms are mauve-pink with cream and green tints in the center. The plants flower from late June to September. Ht: 8-9'. **Group 2** ○ ▶ PP

1 plant \$23.95; 3+ \$21.95 ea

MIDNIGHT SHOWERS

Midnight Showers

20291—Zones 4-8—*Burgundy, velvety blooms.* Golden stamens accent the 5-6 inch flowers. The vines bloom from late May to September. Tolerates shady sites. Blooms on old and new wood. Also known as Warsaw Nike. Ht: 8-10'. **Group 2** ○ ▶ PP

1 plant \$18.95; 3+ \$17.75 ea

DIAMANTINA™

Diamantina™

21316—(C. x 'Evipo039')—Zones 4-9—(P.P. 20638)—*Each flower lasts up to 4 weeks.* In spring, this exceptionally free-flowering clematis bears many 4-6 inch double flowers of blue-purple with lighter rebloom occurring throughout the summer. It outperforms any other double clematis currently available. Ht: 7'. **Group 2** ○ ▶ PP

1 plant \$21.95; 3+ \$19.95 ea

HENRYI

Henry

20284—Zones 4-8—*This splendid cultivar has been grown for over a century.* Glistening white blooms are often up to 8 inches across. Blooms from June through September on old and new wood. Ht: 10-15'. **Group 2** ○ ▶ PP

1 plant \$18.95; 3+ \$17.45 ea

KILIAN DONAHUE

Kilian Donahue

21342—Zones 3-8—*Outstanding repeat bloom.* Big, 5-inch flowers open ruby-red at the center, then change to fuchsia with orchid petal edges, and finish lavender with a pink bar. White anthers are tipped with burgundy. Vigorous vines bloom on old and new wood. Ht: 8-10'. **Group 2** ○ ▶ PP

1 plant \$21.95; 3+ \$19.95 ea

PANICULATA

Paniculata

20294—(C. ternifolia)—Zones 4-8—*Also known as Sweet Autumn Clematis.* A very free-flowering clematis with clusters of 1-2 inch fragrant white blooms covering the vines from midsummer until fall. Hardier than the similar Silver Lace vine. Blooms on new growth. Ht: 15-25'. **Group 3** ○ ▶ PP

1 plant \$18.95; 3+ \$17.75 ea

PROPER PRUNING OF CLEMATIS
 (Note: The corresponding group number is located at the end of each variety description.)

Group 1—These varieties flower in the spring on growth produced the previous season. They generally do not need to be pruned, but if some pruning is necessary, do so within one month after flowering is finished.

Group 2—These cultivars bloom in early summer on previous year's growth, followed by a rebloom in summer or fall on new growth. In late winter or early spring, cut back stems to a strong pair of well-developed buds and fasten the stems onto their support.

Group 3—These later flowering varieties bloom on new growth during summer and fall. In late winter or early spring, cut back to 12 to 18 inches from the ground.

JACKMANII

Jackmanii

20286—Zones 3-8—*The most widely grown clematis.* Very winter hardy, flowering freely every year. Deep velvet purple flowers are 4-5 inches in diameter. Blooms June to September. The vines can be pruned hard each spring as they flower on new growth. Ht: 12-15'. **Group 3** ○ ▶ PP

1 plant \$23.95; 3+ \$21.95 ea

STAND BY ME CLEMATIS—See page 23.

Jung Seed Clematis & Lilac Starter

51031—*Helps get your clematis and lilacs off to a fast start. Encourages growth and blooming.*

This 1-5-1 soil conditioner helps make sweeter, richer, more alkaline soil which clematis and lilacs prefer. Unless your soil is excessively acidic, we recommend mixing about ¼ pound per plant in the soil when planting and each spring once established.

1 lb. bag \$10.95

SWEET SUMMER LOVE

Sweet Summer Love

21386—Zones 4-9—(P.P. 24044)—*Do you ever wish Sweet Autumn clematis came in other colors?* Now it does! It has the cherry-vanilla fragrance and abundant flowers of the original white variety, but bears starry, cranberry-violet blooms beginning in July, over a month earlier. Disease-resistant, fast-growing plants. Ht: 12'. **Group 3** ○ ▶ PP

1 plant \$21.95; 3+ \$19.95 ea

Roses

ABOUT OUR ROSES: Roses marked as **OWN ROOT** are great options for growing in colder zones as they will come back 'true to name' after dying back to the ground in winter. Roses marked as **GRAFTED** are grafted onto Dr. Huey rootstock and will not come back true to name if they die back below the grafting point. Grafted roses can be grown in colder zones, but will need to be protected in winter or replaced more frequently.

Fragrant

ZÉPHIRINE DROUHIN

Climbing Roses

Zéphirine Drouhin

25690—Zones 5-9—*One of the most famous of the romantic Bourbon roses.* This lovely old-timer was first introduced in 1868. A vigorous climber, it produces masses of semi-double, sweetly fragrant, carmine-pink blooms throughout the season, peaking in spring and fall. One of the few climbing roses with good shade tolerance. Dark green foliage, coppery-purple when young, is very mildew resistant, covering long canes that are nearly thornless. Ht: 15'. **OWN ROOT** ○ ♀ BR

1 plant \$23.95; 2+ \$22.25 ea

ABOVE ALL™

Above All™

25300—Zones 4-9—(P.P. 29435)—*If you love hardy Westerland, then step up to Above All.* They took Westerland, added even more salmon-orange petals and increased the flower power to get a tremendous show that lasts all summer long. The color of the lightly scented, 3½-4 inch blossoms remains vibrant right to the very end. The hardy canes are covered by rich green, disease-resistant foliage, making this rose not only beautiful, but easy-care too. Ht: 10-14'. **GRAFTED** ○ ♀ BR

Safer® Critter Ridder® Deer & Rabbit Repellent

Approved for use in organic gardening. This weather-resistant formula provides 3 months of protection with one application. This all natural, fast-acting, patented formula works by targeting two senses – both scent and taste. Repels deer, rabbits and tree squirrels. It's safe to use around children and pets and won't harm plants or the environment. Dries odorless to humans. Use on flowers, grass, bulbs, shrubs, seedlings and trees. Not for use on plants intended for human consumption.

52055–32 oz. ready-to-use spray (covers 320 sq. ft.) **\$24.95**
52056–qt. concentrate (makes 2 gallons of spray) **\$64.95**

Deer-X® Fencing

Protect gardens and landscapes from deer damage. This easy-to-use temporary fencing offers protection for ornamentals and vegetable crops in areas where deer destruction is a problem. The strong black poly mesh netting provides deer deterrence at a price far more affordable than metal fencing. Nearly invisible, it is also ideal for wrapping trees and shrubs to prevent snow and animal damage. (Posts not included).

52107–7 ft. high x 100 ft. long \$32.95
52112–heavy duty 7 ft. high x 100 ft. long \$89.95

Deer Fence Kit

52113–A convenient do-it-yourself kit. Protect your plants and property from deer and other critters with this handy all-inclusive kit. It has all the components you need to set up a fence quickly and easily. Included are:

- (1)–7' x 100' Heavy Duty Deer Fence Netting
- (10)–Adjustable Poles • (20)–Sod Staples
- (50)–Small Green Ties

Kit Price \$189.95

Nature's Mace Deer and Rabbit Repellent

Backed by several university studies and proven to be effective.

This all natural, chemical-free formula contains more active ingredients than comparable products, making it a highly effective method of controlling deer and rabbits for up to 1 month. Repels by both sense of taste and smell, causing a fear reaction that encourages browsing animals to move on. Safe to use around children, pets and vegetation. Long-lasting and weather-resistant, it has a fresh, minty scent not offensive to humans.

52057–40 oz. concentrate (treats 28,000 sq. ft.) **\$50.95**
52058–2.5 lb. granular bag (treats 2,500 sq. ft.) **\$30.95**

Garden Supplies

Read and follow all manufacturer's recommendations. Supplies cannot ship to: AK, HI. Other state restrictions may apply.

Bonide® Molemax® Granules

52005–Repels moles and other burrowing animals. These ready-to-use castor-oil-based repellent granules effectively rid lawns and gardens of moles, voles, gophers, ground squirrels, armadillos, skunks and other burrowing animals. Safe to use around children and pets. Biodegradable and will not harm plants. Apply in spring, summer and fall. *Cannot ship to: AK, HI, IN.*

5 lb. granular shaker (covers 2,500 sq. ft.) **\$19.95**

Shake Away® Natural Predator Scents

Let the scent of natural predators patrol your yard and garden. These 100% organic repellents are very effective and safe for animals and plants. The powerful scent makes pests flee in terror, yet it's undetectable to humans. Just sprinkle around the

perimeter to be protected and animals won't cross. Nothing to mix. One 28.5 ounce can covers over 800 feet of perimeter.

52075–FOX URINE GRANULES–Repels small critters such as rabbits, groundhogs, opossums and woodchucks. **\$20.95**

52076–RODENT REPELLENT GRANULES–Repels mice, rats, voles, shrews, squirrels and chipmunks. **\$20.95**

52077–COYOTE URINE GRANULES–Repels deer, elk and javelinas. **\$20.95**

52079–COYOTE URINE ANIMAL REPELLENT PACKS–Each pack protects for up to 90 days. Easy to use and nontoxic. Simply tie the pack to a stake or branch. Ideal for winter applications above snow cover. 100% organic.

Contains 4 packs per box \$24.95

St. Gabriel Organics® Holy Moley

74474–Twice the active ingredients of other mole controls. This all-natural product made from castor oil and Fuller's Earth (a natural clay substance) effectively repels moles through both scent and taste. The granules are easy to apply with broadcast spreaders, are harmless to pets and humans, and are safe for use in gardens and around crops. *Cannot ship to: AL, AK, AZ, AR, CO, DC, FL, HI, ID, KS, LA, MS, MT, NV, NM, ND, OK, OR, SD, UT, WA, WY.*

10 lb. bag (treats 5,000 sq. ft.) **\$27.95**

Victor® Quick-Strike™ Mole & Gopher Gasser

56007–Kills moles, gophers, woodchucks, rats, skunks and ground squirrels. Safe and easy to use. The smoke penetrates deeply into burrows and tunnels and a long burn time ensures successful pest control. Self-igniting, waterproof, windproof design. **4-pack \$16.95**

Scram™ Animal Repellent Granules

All natural and environmentally safe.

Easy-to-apply, granular formulas require no mixing or spraying, and will not dissolve in water or wash off. Simply sprinkle around the plants you want animals to avoid. Not harmful to people or animals. One application lasts up to 45 days.

70327–DEER SCRAM™–Repels both deer and rabbits. Does not have an unpleasant odor to humans, but creates a strong fear response in the

foraging animals. *Cannot ship to: AK, DC, HI, ME, MT, NE, NV, NM, WV, WY.*

2½ lbs. Shaker (covers 1,500 sq. ft.) **\$24.95**

70326–RABBIT SCRAM™–Smells like a mild fertilizer, so it's not offensive to humans, but convinces foraging rabbits that harm is nearby. *Cannot ship to: AK, DC, ME, NE, NM, WY.*

2½ lbs. Shaker (covers 1,350 sq. ft.) **\$25.95**

Fend Off™ Animal Repellent Odor Tubes

Easy-to-use repellents that last for months and provide constant protection!

Each 100% organic formulation uses a unique combination of plant oils to repel animals for a whole season, even through wind, rain and snow. Simply break the seal to activate the product and then clip the biodegradable container to the plant, attach to a nearby fence or support, or lay it on the ground. *Cannot ship to: AK, CA, HI.*

52030–DEER & RABBIT–Uses highly concentrated garlic oil. Lasts 6 to 8 months. **pkg. of 25 \$27.95**

52032–GOPHER & MOLE–Uses highly concentrated garlic oil. Lasts 10 to 12 months. Locate tunnel, remove stopper and drop into tunnel. **pkg. of 12 \$17.95**

Liquid Fence® Deer and Rabbit Repellents

Stops rabbits and deer from eating garden and landscape plants. Works on scent, so animals don't even have to take a bite to be repelled. Easy-to-use, rain-resistant, environmentally safe, biodegradable, and will not harm plants or animals.

52074–40 oz. liquid concentrate (makes 5 gallons of spray, covers 6,000 sq. ft.) **\$45.95**

52070–32 oz. liquid ready-to-use trigger spray (refillable, covers 500 sq. ft.) **\$17.95**

52072 (A)–2 lbs. granular (covers 1,000 sq. ft.) **\$21.95**

52072 (B)–5 lbs. granular (covers 2,500 sq. ft.) **\$32.95**

Holographic Scare Tape™

52102–Protect gardens from thieving birds. The holographic images printed on this reflective ribbon flash dramatically in sunlight as the tape vibrates in the wind. Ideal for fruit trees, berry patches and grapevines. Stretch between stakes or posts (not included). Made in the USA.

¾" wide x 100' roll \$13.95

I Must Garden® Mole & Vole Repellent

52009–Treated areas become highly unpleasant to pests causing them to relocate. This all natural, super strong formula of 20% castor oil and a mix of botanical oils coats their food source (grubs, worms, roots, etc.) with an unpleasant taste and smell. Can be used in any season to rid your lawn, garden, and flower beds from burrowing animals such as moles, voles, armadillos, gophers, skunks and ground squirrels. Safe to use around children and pets. Completely biodegradable. *Cannot ship to: AK, AZ, AR, CA, HI, IN, MT, NE, NV, NM, ND, OK, OR, PA, SD, UT, WA, WY.*

4 lbs. granular shaker (treats up to 4,000 sq. ft) **\$21.95**

Bird-X® Netting

Protect your valuable fruit and garden crops.

This tough polypropylene 5/8 inch mesh is rotproof, non-burning and not affected by spray chemicals. Provides protection from birds and small animals without harming them.

52104–7 x 20 ft. \$14.95
52105–14 x 14 ft. \$15.95
52106–28 x 28 ft. \$40.95

GreenScreen® Deer & Rabbit Repellent Bags

52092–Convenient, no-mess bags deter deer and rabbits through their sense of smell. A mix of bone meal, blood meal, and a pepper blend, these organic, non-toxic bags are ready to use right out of the box. Simply hang from stakes, fencing, branches, etc - whatever is nearby the plants you want to protect. Ten bags will protect 10 trees or a 24' x 72' row. Made in the USA. 10 bags per package. **Each \$18.95; 2+ \$17.45 ea**

Spiral Tree Guards

53382–Protect your trees from girdling, abrasion, winter winds and sunscald. These tough, pliable plastic tree guards expand as the tree grows. Small holes admit air and light. We highly recommend these tree protectors be installed at planting time, before chances of injury occur. Height is 24 inches.

5 for \$9.95; 10 for \$17.95; 25 for \$32.95; 50 for \$59.95; 100 for \$107.95

Sonic Molechaser®

52170–Free your lawn and garden from moles, voles and other burrowing rodents! With no obtrusive control head, this sonic chaser, when inserted underground, blasts a penetrating pulse at 25 second intervals. Inaudible to humans and pets, it sends rodents scurrying away from the vibrations. Covers an area up to 10,000 sq. ft. or ¼ acre.

The aluminum tube has 100% watertight ends. 17 inches long overall. Requires 4 D-cell batteries (not included) which will operate the unit up to 6 months. Lasts for years. **Each \$25.95**

Fertilizers & Soil Helpers

Coco Coir Mix Brick

52862—100% Peat-Free Renewable Coir. Organic and Biodegradable! Natural water retention and drainage capabilities make this premium grade, peat-free coconut coir mix ideal for seed germination or soil amendment. Specially formulated to allow soil to stay cool in hot weather, warmer in cold months and moist all year round. Just add warm water directly over the block and allow to soak. Each block expands to create 2 to 2½ gallons of wetted coir. **Pkg. (3 bricks) \$12.95**

Black Gold® Earthworm Castings

54307—One of the purest forms of sustained-release plant food. Castings won't burn even the most delicate plants, are naturally odor-free and improve soil structure, aeration and drainage. They are rich in beneficial bacteria and microbes to help plants absorb nutrients. Mix in soil when potting or topdress on garden beds. Can also be added to water to make 'compost tea' fertilizer.

8 qt. bag (approx. 7 lbs.) \$17.95

Myke® Tree & Shrub Inoculant

Reduce transplant shock, promote better flowering, and reduce the need for water.

This unique growth enhancer contains both endomycorrhizae and ectomycorrhiza delivered in a fine granular mix. Works in both containers and ground plantings. Simply sprinkle

it around the root ball at the time of planting. Useful for most types of broad-leaf trees, shrubs and evergreens. Please note: The mycorrhizae contained in this mix will not colonize rhododendrons, blueberries or azaleas.

51256—1.4 dry qt. (treats up to 12 plants) \$24.95

51257—3.6 dry qt. (treats up to 32 plants) \$39.95

Nutri-Cal Liquid Calcium

50409—Calcium is a gardener's best-kept secret. This product provides the calcium your plants need in an easily absorbed form. Calcium prevents blossom-end rot on tomatoes and squash, stops bitter pit on apples, and improves overall plant health. Great for lawns, too! Apply as a foliar spray every 2 weeks. Nontoxic and safe. Makes 8 gallons of spray.

16 oz. concentrate \$23.95

Aluminum Sulfate

51142—Fast-acting soil acidifier. Azaleas, rhododendrons and blueberries are plants that need acidic soils to grow properly. Aluminum sulphate can acidify your soil by mixing ¼ to ½ pound with the soil when planted.

4 lb. bag \$17.95

Soil Sulfur

51154—Long-lasting soil acidifier. An excellent soil conditioner for maintaining acidity. Its slow action, long-lasting formula requires repeat applications only every three to four years. A top dressing of 1 cup per established plant is usually sufficient. Ideal for lawns, blueberries, and acid-loving plants.

4 lb. bag \$18.95

Coop Poop™ Garden Food

51004 (A)—All of the benefits – none of the smell! Safe for kids and pets. Derived from aerobically composted chicken manure, this 2-4-3 slow-release, non-burning plant food is rich in calcium, humates, carbohydrates and trace minerals that naturally promote soil and plant health. Perfect for lawns, vegetable and flower gardens, containers and more. Mix in soil when potting or topdress and water in. **Cannot ship to: AK, CA, DC, HI.**

6 lb. bag \$13.95

John and Bob's Soil Optimizer

Rejuvenates poor, tired soil. Avoid heavy digging and lugging cumbersome bags of humus to try to repair poor soil. This 100% organic blend of concentrated, fully decomposed humus and other essential soil additives is simply spread over existing lawns or gardens and watered in. It's completely safe with no risk of burning plants or over-applying. Spreading 3 lbs. over 1,000 sq. ft. gives the same result as working in hundreds of pounds of compost humus. Starts improving soil the season it's applied.

51106—3 lb. bag \$28.95

51107—6 lb. bag \$41.95

Espoma® 10-10-10 Garden Food

86568 (B)—A perfectly balanced, all-purpose fertilizer. This agricultural grade fertilizer contains all 3 major nutrients in perfect balance, making it the complete way to quickly feed plants. Promotes bigger, faster growth in flowers, vegetables, trees and shrubs. Works great for both new and established plants.

6.75 lb. bag (covers 450 sq. ft.) \$14.95

Espoma® Bulb-tone®

86564—Feed your dahlias, glads, lilies and fall bulbs too. This organic 3-5-3 slow release natural plant food promotes vigorous roots and larger blooms for both spring- and fall-planted bulbs. Apply at planting time as well as on established beds.

4 lb. bag (covers 60 sq. ft.) \$13.95

Espoma® Berry-tone® 4-3-4

57860—A slow-release, organic fertilizer that promotes larger fruits and better growth on blueberries, raspberries and strawberries. Contains a complex blend of natural and organic ingredients, plus Bio-tone beneficial microbes to help plants establish quickly and develop deeper roots. Can be applied to both new plants and established beds.

4 lb. bag (covers 12 plants) \$14.95

Espoma® Holly-tone® 4-3-4

81107-4—Use this long-lasting, organic fertilizer for better blooms and foliage on acid loving plants. Ideal for hollies, azaleas, evergreens, dogwoods, rhododendrons and more. Contains a blend of natural ingredients for complete and balanced feeding, plus Bio-tone microbes.

4 lb. bag \$11.95

Jobe's® Organics®

All-Purpose Fertilizer Spikes

51065—This 4-4-4 balanced formula is ideal for flowers, vegetables, fruits, trees and shrubs. These pre-measured spikes take the hassle out of fertilizing. Just push a spike into the ground to feed plants for 6-8 weeks. They're fast, easy and mess-free.

Bag of 50 spikes \$13.95

Jobe's® Tomato Spikes

59450—Boost the size of your tomatoes and harvest more with these easy-to-use spikes. This 6-18-6 analysis fertilizer helps produce big, red, luscious tomatoes. One application will feed plants for up to 8 weeks.

Bag of 18 spikes \$7.95; 3+ \$6.95 ea

Jung's Jump-Start Fertilizers

GET THE MOST OUT OF YOUR CROPS WITH JUNG'S SPECIAL FERTILIZER BLENDS

51025—ASPARGUS FOOD—This water soluble, 17-16-28 slow-release fertilizer promotes production of big, healthy spears. Apply in spring and repeat after harvest ends. **1 lb. \$10.95**

51026—ONION FOOD—Our water soluble, 15-30-15 formula slowly releases nitrogen into the soil to help you grow big, healthy onions. **1 lb. \$10.95**

51030—POTATO FOOD—This 15-15-15 water soluble plant food boosts potato production and tuber quality. **1 lb. \$10.95**

51029—RASPBERRY FOOD—Use this water soluble 20-21-20 plant food to strengthen roots and boost yields. For use on new or established beds. **1 lb. \$10.95**

51027—STRAWBERRY FOOD—A high phosphorus, water-soluble, 10-52-17 blend that has everything needed to keep plants flourishing for maximum strawberry production. **1 lb. \$10.95**

51028—SWEET CORN FOOD—Grow the best corn ever using this water soluble, high energy, 22-34-11 fertilizer. **1 lb. \$10.95**

Jung Seed

Clematis & Lilac Starter

51031—Helps get your clematis and lilacs off to a fast start. Encourages growth and blooming. This 1-5-1 soil conditioner helps make sweeter, richer, more alkaline soil which clematis and lilacs prefer. Unless your soil is excessively acidic, we recommend mixing about ¼ pound per plant in the soil when planting and each spring once established. **1 lb. bag \$10.95**

Neptune's Harvest® Organic Fertilizers

100% organic. Contains ingredients derived from the North Atlantic Ocean. Unique processing keeps vitamins and minerals intact and readily available for plants. Does not deplete natural soil elements and has little to no odor.

FISH & SEAWEED FORMULA 2-3-1

Increases the natural sugars in plants which results in increased yields, improved shelf life on fruits and vegetables, and stronger, more colorful foliage and flowers. Dilute with water at a rate of 1 ounce per gallon and apply every 2-3 weeks.

51221—18 oz. \$17.95 51222—36 oz. \$23.95

TOMATO & VEG FORMULA 2-4-2

Made from fresh fish, seaweed, molasses, yucca extract and humic acid and designed to feed plants that produce fruits or vegetables. Plants grow more vigorous with strong root systems and rich foliage. When using the Tomato & Veg Formula, growers have observed higher yields plus increased tolerance to diseases, temperature fluctuations and drought. Dilute with water at a rate of 1 ounce per gallon and apply every 2-3 weeks.

51266—36 oz. \$26.95 51267—gallon \$52.95

55438—CRAB & LOBSTER SHELL 5-3-0

A natural source for magnesium and calcium to prevent blossom-end rot. It helps retain moisture in your soil and encourages the growth of bacteria that control ants, grubs, fungus and root nematodes. When placed around plants it repels slugs and snails and discourages moles and mice from digging up bulbs and root vegetables. Ideal for flowers, vegetables and lawns. Kid and pet safe.

4 lb. bag (covers 130 sq. ft.) \$18.95

Jack's Classic® Tomato Feed 12-15-30

51236—Use for tomatoes and all fruiting vegetables. Promotes vigorous root and plant growth, flowering, and fruit set. Contains a micronutrient package, magnesium for improved nutrient uptake, and calcium to prevent blossom-end rot. Includes a measuring spoon for convenience and accuracy. **Cannot ship to: AK, AZ, HI, ND, TN.**

1½ lbs. \$16.95

87738—ORGANIC KELP MEAL 1-0-2

This dried and ground rockweed is full of trace minerals, carbohydrates and amino acids. Helps create strong root systems which make for healthy plants. Can be tilled into the soil or topdressed, used with potting mixes and compost. Adds organic matter to the soil helping it retain moisture. Fantastic for vegetables, flowers and even lawns. Great for mixing with Crab & Lobster Shell.

4 lb. bag (covers 130 sq. ft.) \$25.95

ALGOplus Liquid Fertilizer

Pure minerals – tremendous results. This all-natural fertilizer increases size, flowering and yields at rates that are nearly unbelievable. It's 100% mineral based so it contains no chlorides, carbonates or sodium – plus it's odorless, colorless and environmentally safe. It encourages rapid cell reproduction using 3 major elements along with micro-nutrients. Non-burning and completely soluble in water. Use one capful per gallon of water as a regular feed or ½ capful per gallon to spray directly on the foliage.

The one-liter bottle makes more than 100 gallons of fertilizer.

Bonide® Bontone® Rooting Powder

55898–For faster, healthier rooted cuttings. This IBA hormone is ideal for fast rooting of ornamental plant cuttings, hardwood cuttings of shrubs, and houseplants. A 1.25 ounce bottle should treat over 2,000 average cuttings.

1.25 oz. container \$9.95

Soil Testing Supplies

Soil Test Kit

Professional accuracy. Easy to use. This soil test kit is ideal for the homeowner desiring accurate, detailed soil analysis for a reasonable cost. Includes 10 tests each of soil pH, nitrogen, phosphorus and potash, 40 tests total, along with complete instructions for amending soils based on test results. Packed in a sturdy plastic carrying case.

51345–40-TEST KIT \$24.95
51346–SUPERSIZE 80-TEST KIT \$37.95

Digital Soil Test Kit

51330–Digital readout accurately displays soil sample results. This ready-to-use kit includes all the components and instructions needed to test levels of pH, nitrogen, phosphorus and potash in the soil sample. The kit reads the soil solution color and displays results, eliminating the need to visually compare the solution against a color chart. Provides 10 tests for pH and 5 each for nitrogen, phosphorus and potash. Batteries are included.

Each \$40.95

4-Way Soil Analyzer

51307–Measures light, moisture, soil pH and soil fertility quickly and accurately. Directions include pH range requirements for over 350 plants and easy-to-follow guidelines for soil correction based on USDA standards. The light reading determines the light level where the plant is located. Moisture is measured at root level, where it counts. No battery is required. One-year manufacturer's warranty. **Each \$37.95**

3-Way Digital Soil Analyzer

51303–One compact unit measures soil pH, soil fertility and soil temperature. Provides easy-to-read digital results that are calibrated scientifically for accuracy. Guides and instructions are included for all 3 functions to help you obtain perfect growing conditions for your plants. Batteries are included. **Each \$38.95**

Soil Analyzer

51309–This dual-purpose meter tests soil pH and fertilizer levels in a quick, one-minute test. Directions include ideal pH range for 350 plants and easy-to-follow guidelines for soil correction. Has a convenient slide switch. Requires 1 AA battery (not included). **Each \$34.95**

Digital Meters

51296–DIGITAL SOIL THERMOMETER–The easy-to-read digital display gives accurate results in seconds. This meter is scientifically scaled specifically for measuring soil temperature. The probe is stainless steel. Includes guidelines of optimal temperatures for germination and transplant. Batteries are included. **Each \$20.95**

51323–DIGITAL MOISTURE METER Checks moisture where it counts – at root level, giving instant results on the easy-to-read digital display. Helps prevent over- and under-watering. Great for houseplants. Batteries are included. **Each \$19.95**

51326–DIGITAL pH METER–Tests soil pH, giving instant acidity/alkalinity results of garden and container soil on the easy-to-read LCD display. Batteries included. **Each \$20.95**

Dial Soil Thermometer

51294–Correct soil temperature is critical for success in starting seeds and transplanting seedlings outdoors. This accurate and durable soil thermometer is cased in corrosion-free aluminum. Scaled from 30°F to 90°F. The dial is 2½ inches in diameter with a 6-inch soil probe. Includes a basic chart for commonly grown garden plants. **Each \$15.95**

Plant Supports & Raised Bed Gardens

Bamboo Poles

Strong, yet lightweight, bamboo is the perfect material for use in the garden. Combine these inexpensive poles with string and you can create almost any support structure imaginable. Offered in 2 sizes.

53695–5' tall x ½" (approx.) diameter: 20 poles for \$18.95
53697–6' tall x ½" (approx.) diameter: 20 poles for \$29.95

Bean & Pea String

52835–A must-have for bean and pea gardeners. Create trellises and climbing supports for bean and pea plants. A spool contains 4,200 feet of 12-ply, flexible cotton string. Forms tight, strong knots. Has 30 lb. tensile strength. **Each \$24.95**

Grow-Through Plant Supports

53483–Keeps plants upright. Great for peonies, sedums and other tall plants. Place over the plant in early spring and let it grow through the grid. Each support consists of one circular 20" diameter grid with three 30" legs. Green, vinyl-coated, heavy-duty steel wire lasts for years. **Set of 3 for \$42.95; 2+ sets \$37.95 ea**

Jung Family Garden Raised Bed Mix

51008–Not just for raised beds. Our special soilless blend is comprised of compost, sphagnum peat moss, perlite and vermiculite in just the right proportions to ensure ideal drainage and moisture retention in raised beds, Smart Pots and other containers. Completely free of weed seeds. **2 cu. ft. \$32.95**

BIG BAG BED JUNIOR

Smart Pots® Big Bag Bed Junior

53467–Make a raised bed – no construction needed. Made of soft-sided, non-woven, lightweight black fabric that air prunes plants' roots, resulting in healthier roots and increased yields. Just unfold the bed, fill with soil and plant. Discourages ground pests such as gophers and moles. Circular shape allows you to reach the center from any position. Holds 5.9 cu. ft. of soil and gives just over 7 sq. ft. of growing space. Can be reused many times. (36" base x 12" high). **Each \$26.95**

EarthBOX® Garden Kit

89845–Increase your yields and use less fertilizer with this high-tech growing system. Compact enough for small areas, but big enough to tackle whatever you want to grow. Simply fill with soil, fertilizer and water, add the mulch cover, insert plants, then sit back and let the EarthBOX® do the rest. The self-watering reservoir holds 3 gallons of water and automatically gives your plants the proper amount of fertilizer and water so there is no guesswork for you. The kit comes with the EarthBOX®, fertilizer, dolomite to mix with the soil, 4 casters, 1 mulch cover and instructions – everything you need except for soil, water, and seedlings! The UV-stabilized plastic contains no BPA's and won't fade or become brittle. Durable and reusable. Measures 29" long, 14" wide and 11" high. Holds 2 cu. ft. of growing media. Ideal for growing tomatoes, eggplants, peppers, zucchini, cucumbers, squash, melons, beans and more. Made in the U.S.A. **Each \$82.95**
89846–5' ALUMINUM STAKING SYSTEM: \$74.95

Fungicides

Bonide® Revitalize® Biofungicide

A high-potency formula that can be used right up to the day you harvest. Revitalize® provides total plant protection when used as both a foliar spray and a drench for soil, where it will colonize on root hairs and prevent disease-causing bacteria and fungi from establishing. Controls blight, mold, rot, spots and mildew on vegetables, fruits, nuts, ornamentals, lawns, house plants and tropicals, grown inside or outside. Great for organic gardening. Active ingredient is *Bacillus amyloliquefaciens* strain D747.

50048-32 oz. ready to use \$21.95

Bonide® Fung-onil® Fungicide

50232 (B)—Very effective multi-purpose fungicide. *Ideal for tomatoes.* Controls black spot on roses, numerous diseases on flowers, ornamentals and lawns, anthracnose, blight, downy mildew, and rust. Also controls numerous other diseases on beans, carrots, cole crops, potatoes, tomatoes and vine crops. Mixes readily with water. Spray early to prevent infection before it sets in. Contains Chlorothalonil 29.6%.

pt. concentrate \$22.95

Bonide® Captan® 50% WP Fruit and Ornamental Fungicide

50220 (A)—One of the best all-purpose fungicides. For disease control on fruit trees, flowers and berries, including gray mold on strawberries. Controls damping off, powdery mildew, brown rots, early and late blights, anthracnose and more. *Cannot ship to: AK, DC, FL, HI.*

8 oz. can \$22.95

Bonide® Liquid Copper Fungicide

73744—Safe for organic production. Controls a wide range of plant diseases. *Great for blight!* Protects a range of plants from turf grasses to veggies, fruits and flowers. Can be used when plants are dormant to help prevent diseases or during the growing season to keep diseases under control. Prevents and controls powdery mildew, rusts, black spot, leaf and fruit spot, downy mildew, fruit rot, late blight, peach leaf curl and more. Can be used up to the day of harvest. *Cannot ship to: AK, DC, HI.*

pt. concentrate \$20.95

Bonide® Copper Fungicide Dust or Spray

50412—The best choice for stopping downy mildew on grapes. This copper-based organic formula also controls leaf spot, anthracnose and other fungal diseases on vegetables, flowers and other fruits. Does not contain an insecticide and won't burn plants. Contains 7% Copper Sulfate. One pound makes 32 gallons of spray. *Cannot ship to: AK, DC, HI.*

(A) lb. container \$11.95; (B) 4 lb. bag \$17.95

Bonide® Sulfur Plant Fungicide

Fine particle size allows for better coverage and adhesion to plant surfaces. This ready-to-use formula can be applied as either a spray or a dust and can be used on fruits, vegetables and ornamentals to control a wide variety of diseases including rust, leaf spot and powdery mildew. Also controls mites, thrips, scale and other listed insects. Approved for organic gardening. *Cannot ship to: AK, DC, HI.*

55869-lb. shaker \$11.95

55870-4 lb. bag \$18.95

Monterey® Garden Phos™ Systemic Fungicide

Works as both a curative and preventative spray. Fights plant diseases from the inside out and can be used to treat and prevent root rot, phytophthora, pythium, Sudden Oak Death, apple scab, fire blight, downy mildew, anthracnose and more. Use on fruits, vegetables, ornamentals, and trees. Can be applied as a foliar spray, soil drench, basal bark spray or root dip.

55731-pt. concentrate \$20.95

55733-qt. concentrate \$36.95

Zonix™ Biofungicide

50270—Prevents and protects against downy mildew, late blight, root rot and more. Zonix™ works by killing the spores that spread disease and helping plants absorb nutrients more easily, giving them better protection against disease. Apply as a foliar spray before the first signs of disease or as a pre-planting soil drench to kill disease spores. Can be used to treat seeds, transplants, roots, cuttings and both ornamental and edible plants. Great for organic gardeners. Mixes with water. Use ½ to ¾ ounces of Zonix™ per gallon of water. **8 oz. concentrate \$49.95**

Monterey® Organic Complete Disease Control

55755—Prevents both fungal and bacterial plant diseases. This broad-spectrum formula treats a wide range of plant diseases including powdery mildew, botrytis, early and late blight, fire blight, fusarium and pythium. The active ingredient is *Bacillus amyloliquefaciens* strain D747, which colonizes the roots to prevent diseases. Apply as both a foliar spray and soil drench, indoors and outdoors, on vegetables and ornamentals. Mix with water, approximately 1 teaspoon per gallon. *Cannot ship to: AK, HI, ND.*

16 oz. concentrate \$24.95

Insecticides

Bonide® Pyrethrin Garden Insect Spray

50434—An all-natural, organic approach to protecting your entire garden from insects. Pyrethrins are safe, botanical insecticides that can be used on vegetables, fruits, roses, flowers and delicate ornamentals right up until day of harvest. Controls aphids, leafhoppers, cucumber beetles, cabbage loopers, flea beetles, Colorado potato beetles and many more. A pint makes about 8 gallons of spray. *Cannot ship to: AK, CA, DC, HI.*

(A) 8 oz. \$21.95; (B) pt. \$24.95

Bonide® Eight® Garden Granules

50446—Kills insects above and below the soil surface. One application gives season-long control! Don't be bothered by nasty wireworms, seed maggots, weevils, cutworms, armyworms, mole crickets and many more that feast on your veggies. These granules control a multitude of insects for up to 3 months. Fast acting and easy to apply. Use 1 pound per 500 sq. ft. Contains Bifenthrin .115%.

3 lb. shaker jug \$14.95

Bonide® Eight® Liquid Concentrate

50025—Provides insect control for 3 weeks or more. Effective on over 100 different kinds of flying, crawling and hopping insect pests. Safe to use on vegetables, fruits, roses, flowers, ornamentals, lawns, trees and shrubs. Also kills Japanese beetles. Environmentally conscientious. Mixes well with water. A pint makes about 8 gallons of spray.

(A) pt. \$13.95; (B) qt. \$19.95

Bonide® Thuricide (Bt)

55889—A natural microbial insecticide liked by organic gardeners. The bacterium is non-toxic to birds, bees, pets and humans. When leaf-chewing worms eat the treated leaves, it paralyzes their digestive system. May be used on garden vegetables and tomatoes right up to harvest time. Controls gypsy moths, inchworms, cankerworms, tent caterpillars, cabbage looper, tomato hornworms and more. Active ingredient is *Bacillus thuringiensis*. Eight ounces makes 12-48 gallons of finished spray.

(A) 8 oz. \$13.95; (B) pt. \$18.95

Bonide® All Seasons® Spray Oil

50002—Kills overwintering eggs of many insects. Use this fine paraffinic oil any time of the year. Highly recommended for use on fruit trees, shade trees, shrubs, ornamentals, roses and vegetables. Safe, pleasant to use and non-staining. Readily mixes with water. One quart makes over 6 gallons of spray. (A) pt. \$16.95; (B) qt. \$21.95

Bonide® Colorado Potato Beetle Beater

50416—One of the best biological controls for the Colorado potato beetle. Apply when larvae are first observed or about ¼ inch long. Concentrate mixes readily with water and is very effective in controlling this pest on potatoes, tomatoes and eggplant. Also controls many other insect pests that affect fruits, fruit trees, nut trees and other vegetables. Odorless and leaves no oily residue. Active ingredient is spinosad. One pint makes up to 8 gallons of spray. *Cannot ship to: AK, AZ, CA, CO, DC, HI, ID, MT, NV, NM, OR, SD, UT, WA, WY.*

pt. \$26.95

Bonide® Captain Jack's Deadbug Brew®

The secret weapon for organic gardeners! This brew contains spinosad, a naturally occurring, soil-dwelling bacterium that kills bagworms, borers, beetles, caterpillars, codling moths, gypsy moths, loopers, leaf miners, spider mites, thrips and more. Safe to use on fruits, vegetables, nuts and ornamentals.

50050-pt. concentrate \$20.95

50051-qt. concentrate \$30.95

Bonide® Annual® Grub Beater

73739—One application controls grubs all season long, even Japanese Beetles. Apply to lawns and landscape beds anytime during the growing season. Kills grubs or larvae of Japanese Beetles, European Crane Fly, Mole Crickets and other turf-destroying insects. *Cannot ship to: AK, CT, DC, HI, MD, VT.*

6 lb. granular bag \$22.95

Bonide® Systemic Insecticide

50071—Controls insects through the plant's root system. Just sprinkle around the plant, cover with soil and water in. The root system absorbs the material in 1-4 days. Sucking insects are killed when they feed on the plant. Especially useful on birch trees, roses and shrubs. Effective control of aphids or plant lice, birch leaf miner, lace bugs, leafhoppers, webworm, thrips and whiteflies. One application lasts 6 to 8 weeks. *Cannot ship to: AK, CT, HI, MD, MA, VT.*

(A) lb. can \$14.95; (B) 4 lb. shaker \$26.95

Diatomaceous Earth Insect Dust

50092—Safe and effective control of crawling insects. Completely organic. Dehydrates pests such as roaches, ants, earwigs, fleas, silverfish, carpet beetles, millipedes, centipedes and crickets. Harmless to earthworms. Apply dust lightly to areas where crawling pests may cross. Can be used indoors or outdoors. Great for sprinkling on pet beds. *Cannot ship to: AK, AZ, DC, HI, ID, LA, MS, MT, NV, NM, ND, OK, OR, SD, UT, WY.*

4.4 lb. bag \$17.95

Safer® Insect Killing Soap

50424—Eliminates insects safely and effectively. This pure soap made from fatty substances and plant oils can be used indoors or outdoors on foliage plants, flowers, shrubs and trees. Apply up to the day of harvest on fruits, nuts and vegetables. Kills soft-bodied insects such as aphids, plant bugs and mites on contact. Safe for use around people and pets.

16 oz. concentrate \$19.95

Milky Spore Powder

Natural bacteria controls Japanese beetles permanently. Apply this powder to your lawn where white grubs (beetle larvae) feed on grass roots. The number of beetles will drop dramatically the next season. Only one application is necessary and after killing the initial grubs, the spores actually multiply in the soil and remain viable for many years. Compatible with lawn chemicals and harmless to people, pets, earthworms and insects, other than white grubs. *Cannot ship to: AK, AZ, CA, FL, DC, HI, ID, LA, MS, MT, NV, NM, ND, OK, OR, SD, TX, UT, WA, WY.*

50140- 10 oz. box (treats 2,500 sq. ft.) \$44.95

50141- 2.5 lb. box \$119.95

MILKY SPORE POWDER DISPENSER TUBE

87112—Helps disperse the Milky Spore Powder in your lawn. Each \$13.95

Insect & Disease Control

Bonide® Fruit Tree Spray Ideal For the Home Orchardist

50310—Controls most insect pests and diseases common to home fruit plantings. The liquid concentrate contains Captan, Malathion and Carbaryl, plus a spreader sticker for better adherence. Mixes with water and won't clog sprayers. A pint makes over 20 gallons. Also for use on evergreens, ornamentals and flowers. *Cannot ship to: AK, CA, HI.*

(A) pt. \$28.95; (B) qt. \$39.95

Organocide™

Bee-Safe 3-in-1 Garden Spray

88626—An effective insecticide and fungicide combination with no harmful chemicals. This patented blend of sesame and fish oils are so safe you can enter your yard or garden immediately after application. Controls a wide variety of insects including spider mites, mealy bugs, whiteflies, aphids and thrips. Effective on fungal diseases including powdery mildew and black spot. Safe to use on fruits, vegetables, ornamentals, flowers and more. Makes 10 gallons of spray. *Cannot ship to AK, DC, HI, NM.*

qt. concentrate \$29.95

Monterey® 70% Neem Oil

This organic 3-in-1 product is a fungicide, insecticide and miticide.

Designed for indoor and outdoor use to control diseases such as blackspot and powdery mildew, plus insects and mites. Use on vegetables, fruit trees, ornamentals, etc. Can be used up to the day of harvest. A pint of concentrate makes 15 gallons of spray.

50340—pt. concentrate \$27.95 *Cannot ship to: AK, HI, OR.*

50342—qt. ready-to-use \$18.95 *Cannot ship to: AK, HI, ND, WY.*

Trap & Lures

RESCUE!® Japanese & Oriental Beetle Traps

52180—Traps not one, but two nuisance pests! This durable, double layer nylon, all-in-one trap lures both Japanese and Oriental beetles with the dispersion of a powerful, nontoxic pheromone. The attractant lasts the entire 6-8 week beetle season and the bag can be emptied and reused throughout that time. Hang the trap from a tree or pole and your yard and garden are protected from destructive Japanese and Oriental beetles for weeks.

Each \$13.95

Stiky™ Strips

52133—Ready-to-use insect traps. Bright yellow 3"x5" plastic sheets are coated with a specially formulated sticky substance. Hang or fasten them (stakes listed below) in place, peel off the protective covering and they'll catch a wide range of insects. Inexpensive and disposable.

Pkg. of 25 Stiky™ Strips \$13.95

52134—STIKY™ STRIP STAKES—Reusable, 12-inch galvanized wire stakes with a special holder on one end. Can be used in greenhouses, potted plants or in the garden.

Pkg. of 10 stakes \$9.95

INSECT TRAP OFFER

52135 (X)—1 pkg. of 25 Stiky™ Strips and 10 stakes, a \$23.90 value for **\$19.95**

Stiky Stuff Insect Trap Coating

52132—For re-coating the BioCare® Apple Maggot Traps (discontinued), or making your own sticky traps to catch and hold insects. No harmful chemicals.

8 oz. brush-top can \$15.95

Weed Control

WeedComb™

53093—Effortlessly combs out weeds! This tool grabs weeds and grass by the crown and pulls them out. Aerates the soil at the same time to promote root growth and water penetration. The comfortable, ergonomic handle has a screw end so a handle extension can be added. Made of steel and plated with rust-resistant zinc for a lifetime of use. **Each \$19.95**

Grampa's Weeder

53096—The most effective effortless weed puller invented. Since 1913, gardeners young and old have used this weeder to extract weeds and their roots easily, with just a step of their foot and tilt of the handle. Senior gardeners especially love the way it allows them to weed without bending, pulling or kneeling. With its simple lever design and durable construction, it's made to last. The metal head is hand-casted, attached to a solid hardwood handle. Overall length is 44 inches. **Each \$34.95**

Garden Bandit™ Precise Weeder

53080—Severs weed roots underground without disturbing roots of good plants. The comfortable poly power grip handle is great for arthritic hands. Its sharp, looped, stainless steel blade cuts through compacted soil easily, aerating the soil without displacing it. Great for weeding tight spaces. Overall length is 12 inches.

Each \$20.95

Mini Dragon™ Propane Torch Kit

53188—Kills weeds with heat. No digging. No chemicals. The pinpoint flame is perfect for precise spot weeding and other small jobs like lighting charcoal, chimineas, campfires and more. Uses disposable propane cylinders (not included) and is fuel efficient. Lightweight, easy to maneuver and durable steel construction. Comes fully assembled. **Each \$82.95**

Weed Control Porous Fabric Mulch

Allows water and nutrients through to plants, keeps weeds out! This effective fabric is designed with microscopic holes to allow easy passage of water and air to your plants' root systems, yet it aids in moisture retention, eliminates weeding and warms the soil to get your plants off to a fast start. Simply cut slits in the mulch and plant through it. Intended for one season of use.

53304—3' x 50' roll: \$22.95

53305—3' x 100' roll: \$36.95

WeedGuard Plus™

Enriched with 3-3-3 time-release fertilizer for bigger, healthier plants. Made from all-natural, earth-friendly cellulose fibers, this fertilized mulch promotes early growth, prevents weeds and helps reduce soil erosion. Holds up to wind and rain, but is porous enough to allow water to penetrate. The mulch gradually decomposes through the growing season. (Garden Fabric Staples sold on page 40).

53391—24" x 50' roll: \$17.95

Chemical Weed Control

Bonide® BurnOut®

All-natural organic weed and grass killer. Faster and safer than harsh chemicals, BurnOut® is made from plant-based, pet-safe ingredients. Kills weeds completely within 24 hours. Breaks down within 2 days of application so you can replant. Safe to use around ponds or streams and vegetable plants. Non-selective — eradicates even the toughest plants. One gallon mixed spray treats 1,500 square feet.

52333—qt. ready-to-use spray \$14.95

52334—qt. concentrate \$24.95

Bonide® Grass Beater®

52330—Kills weedy grasses without injuring desirable plants. This systemic post-emergent herbicide replaces Poast and can be sprayed over flower beds, trees, shrubs, groundcovers and vegetable plants to eliminate quackgrass and other weedy annual and perennial grasses. Stops growth of weed grasses within 2 days. Follow label instructions for mixing rates. **8 oz. concentrate \$29.95**

Bonide® Weed Beater® Ultra

89259—Targets and kills weeds in lawns without harming your grass. Rain-fast as soon as it dries. This post-emergent herbicide kills weeds right down to the roots with visible results in just 24 hours. Controls over 200 broadleaf weeds including chickweed, clover, creeping Jenny (Charlie), dandelion, pigweed and more. Can be used on both northern and southern grasses. *Cannot ship to: AK, HI, VT.*

(A)—16 oz. concentrate \$27.95;

(B)—qt. concentrate \$43.95

Bonide® Sedge Ender®

75559—Kills nutsedge, crabgrass and other grassy weeds, but not your lawn. Works as both a pre-emergent and post-emergent control of not only broadleaf weeds such as nutsedge, chickweed and crabgrass, but many other tough lawn weeds as well, right down to the roots. Begins working on contact and can be sprayed right over both cool season and warm season grasses. Apply at recommended rates. *Cannot ship to: AK, AZ, CA, DC, HI, NY.*

pt. concentrate \$27.95

Bonide® Stump & Vine Killer

52327—Kills vines, stumps, broadleaf weeds and brush — even Kudzu vines. Does not harm grass! Prevents resprouting of stumps. Formulated for complete control. Comes with a convenient applicator cap. Can also be mixed with water and used as a foliar spray. Contains Triclopyr 8.8% selective systemic herbicide. *Cannot ship to: AK, HI, VT.*

8 oz. \$13.95

Monterey® Vegetable & Ornamental Weeder

50375—This pre-emergence herbicide kills weeds before they germinate. Controls grasses and broadleaf weeds for up to 5 months. Can be used around vegetables, trees, shrubs, roses and many other ornamentals. Three ounces mixed in 2 gallons of water treats 1,000 square feet. The active ingredient is Trifluralin. *Cannot ship to: AK, DC, HI, WA.*

pt. \$29.95

Preen® Natural Vegetable Garden Weed Preventer

89854 (A)—Prevent weed seeds from germinating with this easy-to-use granular formula. Apply to vegetable gardens once seedlings are 2-3 inches tall and in established gardens to keep weeds from sprouting for up to 1 month. Does not kill established weeds or prevent spread by underground runners. If applied early in the season, it can almost eliminate hand weeding. Contains corn gluten meal and is safe to use around people and pets. *Cannot ship to: AK, DC, HI, SD.*

5 lb. shaker \$25.95

Mulches & Garden Helpers

Hotkaps™ Plant Protectors

These strong little waxed paper hothouses protect young plants from early frost, storms and insects. Ideal for vine crops, tomatoes and all early crops. Early starts can increase yields 18-40 percent. Easy to use. Includes a paper setter.

REGULAR SIZE (6½" high x 11" diameter)

53359—PACKAGE OF 20: \$21.95

53360—PACKAGE OF 100: \$57.95

KING SIZE (9½" high x 11" diameter)

53362—PACKAGE OF 20: \$29.95

The Original Planters Paper®

Revolutionary biodegradable paper mulch. Made from recycled fiber material that's creped to give it strength and flexibility to hug the ground. A natural additive prevents decomposition for 6-10 weeks in most soils. It absorbs heat to give crops a boost early in the season. The paper is porous, allowing water to penetrate the soil. At the same time it aids in water retention and suppresses weeds. Completely decomposes at the end of the season for no messy cleanup.

53332—24" x 50' ROLL: \$17.95

53333—48" x 100' ROLL: \$49.95

Garden Fabric Staples

53264—Durable steel pins secure landscape fabrics and plastic films as well as floating row covers, bird netting and burlap. Package of 12 staples.

Pkg. \$6.95; 3+ pkgs. \$5.95 ea

Kozy-Coat

Pick the biggest, earliest tomatoes ever! These reusable plastic, water-filled tube "teepees" are red-tinted to stimulate plant growth. Protects plants to 22°F. Also great for cucumbers, melons and other heat-loving plants.

53725—Pkg. of 3 for \$18.95

53726—REPAIR SLEEVES

(10 per package): pkg. \$8.95

IDEAL FOR ORGANIC GARDENERS!

Grow Tunnels

Sturdy wire hoops are sewn into the fabric.

Easy to install. Simply extend the tunnel and insert the hoop ends into the ground. Lift-up sides allow easy access to plants.

53738—EASY FLEECE TUNNEL—Provides protection for early and late crops from frost, wind, hard rains and sun scorch. Also guards against insect, bird and animal damage. Made from UV-stabilized, heavy-weight polypropylene fleece that allows air, moisture and sunlight to filter through. Measures 9'10" long, 24" wide and 17" high and is able to cover large plants or a double row.

53737—NET GROW TUNNEL—This airy tunnel

provides some shade against strong sunlight to prevent sunscald, conserve moisture, and protect from insects, birds and animals. When extended, it measures 9'8" long, 20" wide and 15" high.

GREAT FOR STRAWBERRIES & BRASSICAS

Price of Grow Tunnels (mix or match): Each \$34.95; 2+ \$31.95 ea

Floating Row Covers

The earlier you can plant, the sooner you will harvest! Floating row covers promote better growing conditions in early spring, resulting in higher yields. They're easy to apply and "float" gently on top of crops, no supports needed. The spun-bonded polypropylene covers conserve moisture and offer protection from heavy rains, harsh drying winds, insects, birds and other pests. The porous fabric allows water and fertilizer to penetrate, allows light transmission, and ventilates excess heat on sunny days. Covers should be removed when temperatures are consistently warm. Also ideal for covering new lawn plantings—more effective than straw.

53266—5' x 25': \$21.95 53267—5' x 50': \$41.95

Red Mulch Film

Boost tomato crops 10 to 20% with this bright red, thin plastic film. Like a black mulch, it warms the soil, retains moisture, deters pests and controls weeds, but the red film also reflects far-red wavelengths up into the plant, stimulating development. Results are earlier and increased yields. Studies also show significant increases in strawberry yields with the use of red mulch film. Not recommended for use in warmer southern states.

53321—4' X 30' ROLL: \$21.95

53322—4' X 100' ROLL: \$37.95

53317—3' X 3' SHEETS (8 per package): \$11.95

Earthway® Precision Garden Seeder

Saves time, money and labor! A long-time favorite of large home gardeners and small-scale commercial growers, this seeder opens soil, correctly spaces seed at proper depth, covers seed and marks the row with precision. Saves seed and reduces thinning. Includes 6 quick-change seed plates that will plant up to 28 different vegetable, herb and flower seeds including peas, corn, beans, carrots, beets and radishes. Lightweight, easy to use, and sturdily constructed to provide years of trouble-free operation.

53010—Each \$184.95

53011—FERTILIZER ATTACHMENT—Allows the seeder to apply a side-dressing of granulated fertilizer. **Each \$87.95**

53014—OPTIONAL SEED PLATES—Five additional plates to plant cabbage and other brassicas, cucumbers, lettuce, lima beans and popcorn. **Set \$42.95**

FIND A NICE SELECTION OF HANDY AND HELPFUL HAND-SEEDERS OFFERED ON OUR ORDER FORM INSERT.

53026 (X)—1 each of the seeder and 6 plates, fertilizer attachment and set of optional seed plates, a \$315.85 value for \$267.95

Garden Rocker Rolling Seat

53745—Designed for comfort! Reduces strain on lower back and knees. Wheels allow you to roll along while you work. The base tilts forwards and sideways so you can reach in any direction. Comfort is further enhanced with a contoured seat that adjusts in height and rolling wheels. Has a 250 pound weight capacity.

Each \$54.95

SEAT HEIGHT ADJUSTS

TILTS ALL DIRECTIONS

Radius® Root Slayer Soil Knife with Holster

59095—Takes the place of almost every tool you need in the garden: a trowel, transplanter, cultivator and weeder. This versatile tool can cut through even tough root-filled, clay soil with ease. Made of enamel powder-coated, high-carbon steel and comes with a lifetime guarantee from the manufacturer. The blade measures 7¾" long by 2" wide with a 3¼" handle and it can be re-sharpened. **Each \$33.95**

Dustin-Mizer Garden Dust Applicator

53092—Get dust in, around and under plants. A simple-to-use, yet powerful dust applicator that disperses dust in, around and under plants. Its unique blower uses a high volume of air to propel dust without building speed. An optional deflector ensures thorough dusting under leaves. Constructed of corrosion-resistant plastic and stainless steel parts to ensure years of trouble-free service. Holds up to 1 pound of dust. Includes applicator and deflector. **Each \$53.95**

High Wheel Cultivator

An updated version of an old-fashioned favorite. Ideal for a multitude of garden jobs, from light plowing and hilling to furrowing and cultivating. It's intended for use in soil that is already tilled, not as a groundbreaking tool.

The handles and framing are constructed of heavy-duty, powder-coated tubular steel for long life. The 24-inch steel wheel makes pushing the cultivator through rough or soft soil nearly effortless. The 3-position, adjustable-height handle has comfortable vinyl handgrips. The easy-change toolbar lets you adapt the cultivator quickly to the job at hand. Accessories included are a 5-tine cultivator, twin-end furrow plow for deep cultivating or making a single furrow and a moldboard plow for hilling and plowing. An optional weed slicing hoe can be purchased separately below.

Find articles, forecasts and guides on gardening, life-planning and day-to-day living. Includes lunar timing tips on planting and harvesting, plus a guide to companion plants. 320 pages. Paperback. **Each \$12.95**

Carrots Love Tomatoes

55469—Unlock your garden's potential by learning the secrets of companion gardening. Identify good and bad plant companions to create plant relationships that result in natural insect control, weed control and increased yields. This illustrated, alphabetized guide contains hundreds of interesting facts. 224 pages. Paperback. **Each \$15.95**

The New Seed Starter's Handbook

53428—By veteran gardener Nancy Bubel. This illustrated guide is an excellent resource on how to start all types of seeds with details on how deep to plant, how to water, light requirements, non-chemical fertilization and seed saving. Over 400 pages. Paperback. **Each \$23.95**

The Beginner's Guide to Growing Great Vegetables

58544—Simple, straightforward advice to help you get growing. This book contains everything you need to know to create a thriving garden, no matter whether you grow in containers or in the ground. Also includes a month-by-month planner to guide you. 224 pages. Paperback. **Each \$19.95**

Q-Plug Starter Kit

Never overwater again! Everything you need to start seeds and cuttings. This unique float system gives plants constant access to the ideal air-to-water ratio they need for optimum growth. The kit comes complete with a heavy duty 20.5" x 10.5" x 2.5" seed tray, a 7" high dome fitted with 3 vents for air circulation, a 55-cell reusable floating styrofoam insert with large 1½" cells that encourage deep root growth, plus 55 aerated Q-Plugs. The sponge-like Q-Plugs, composed of organic growing media, drain yet retain water and remove from the insert easily without damage to plants.

53826 (X)—Q-PLUG STARTER KIT \$39.95

85245—EXTRA DOME \$10.95

53823—Q-PLUG 55-PACK REFILL \$29.95

84555—EXTRA TRAY \$16.95

53824—EXTRA 55-CELL INSERT \$9.95

Jump Start™ Tabletop Grow Light System

Ideal for seed starting, cutting and houseplants. Now with a built-in timer. Sturdy anodized aluminum tubing supports the light fixture which is easily height adjustable with a simple toggle clamp. A new built-in timer allows you to choose whether the light stays on for 12 or 18 hours. The light fixture has a highly reflective interior finish that directs more light to the plants. Included is a T5 energy-saving, full daylight spectrum grow light that puts out 15-20% more light than the older style T12 tubes. Has an integrated on/off switch, and 6-foot grounded power cord. Easy to assemble. Two sizes available.

52960—4' JUMP START™
Measures 31¼" high x 18¼" wide x 50" long. **\$134.95**

52959—2' JUMP START™
Measures 24½" high x 18¼" wide x 26" long. **\$103.95**

74671—T5 REPLACEMENT 4' GROW LIGHT TUBES
(4 tubes per pack) **PRICE PER PACK \$52.95**

52962—T5 REPLACEMENT 2' GROW LIGHT TUBES
(4 tubes per pack) **PRICE PER PACK \$39.95**

SunBlaster™ Nanodome Mini Greenhouse

52942—Ideal for starting seedlings, propagating cuttings, and growing herbs and greens right on your kitchen counter all year long. The high dome contains vents to maintain optimal conditions for your plants and has 2 different light tracks. Either place the T5 light across the top of a single dome or crosswise across multiple kits to increase light distribution. Plant right into the sturdy, long-lasting tray or use it to hold individual containers. Includes the 7" Nanodome, 1020 double-thick tray and an 18" T5 light. **Each \$64.95**

TRAYS & INSERTS—See page 42.

HOT HOUSE MINI-GREENHOUSE—See page 54.

JIFFY-7® SELF-WATERING GREENHOUSE—See page 74.

Jung's Basic Seed-Starting Kit

53216—We've assembled the basic flats, inserts and domes needed to start 144 plants.

Included are:
 2—11" x 21¼" x 2½" reusable plastic flats
 2—72-cell plastic inserts
 2—Clear plastic dome covers

Price per kit **\$13.95**

BASIC SEED-STARTING KIT OFFER

EB53216—Purchase the seed-starting kit for **\$11.95**
IF YOUR ORDER IS RECEIVED BY 03/01/2023.

Flats, Inserts & Dome Covers

Covers all of your seed-starting needs.

- (A)** 53208—11" x 21¼" x 2½" **Black Flats** (no holes): **5 for \$12.95; 10 for \$23.95; 20 for \$45.95; 40 for \$84.95**
- (B)** 53201—11" x 21¼" x 1" **black germination flats** (no holes). Lower depth is ideal for bottom watering. **5 for \$17.95**
- (C)** 52977—**Perma-Nest Heavy-Duty Plant Trays** (no holes). Rigid plastic seed-starting trays 'nest' for easy handling and storage. Tan colored. 11" x 22" x 2½". **Pack of 6 trays for \$65.95**
- (D)** 80550—**128-Cell Plug Tray** 11" x 21½" (each cell is 2" deep with a drainhole): **5 for \$17.95; 10 for \$33.95**
- (E)** 59429—**10" x 20" Web flat** (can be used alone or fits inside flats so you can lift out inserts for watering): **5 for \$9.95; 10 for \$17.95**
- (F)** 53203—**Standard Clear Dome Humidity Covers**, 3" high (fits A & B): **5 for \$19.75**
- (G)** 85245—**Super-Dome™ Humidity Covers**, 7" high, (3 adjustable vents, fits A & B): **Each \$10.95; 5 for \$34.95**
- (H)** 83656—**36-Cell Inserts** (each insert has 6 packs with 6 cells per pack), cell size is 2¼" x 2" x 2¾" deep: **5 for \$9.95; 10 for \$17.95**
- (I)** 84573—**36-Deep-Cell Inserts** (each insert has 6 packs with 6 cells per pack), cell size is 2¼" x 2" x 3¼" deep: **5 for \$9.95; 10 for \$17.95**
- (J)** 56060—**48-Cell Inserts** (each insert has 12 packs with 4 cells per pack), cell size is 1½" x 2¾" x 2¾" deep: **5 for \$9.95; 10 for \$17.95**
- (K)** 74734—**48-Deep-Cell Inserts** (each insert has 8 packs with 6 cells per pack), cell size is 1½" x 2¾" x 3½" deep: **5 for \$10.95; 10 for \$19.95**
- (L)** 53206—**72-Cell Inserts** (each insert has 12 packs of 6 cells, per pack) cell size is 1½" x 1½" x 2¾" deep: **5 for \$8.95; 10 for \$15.95**
- (M)** 84593—**18-Cell Liner Tray** (each insert has 18 cells), cell size is 3¼" x 3¼" x 3½" deep: **5 for \$10.95; 10 for \$19.95**
- (N)** 53213—**50-Cell Star Liner** (each insert has 50 cells), promotes optimal root growth, cell size is 4½" deep. **Each \$11.95**

Jung Family Garden Seed Starting Mix

Help your seedlings get a healthy start.

Ideal for starting vegetable, flower and herb seeds, as well as stem, leaf and root cuttings in trays, soil blocks or small containers. This light, fine-textured, soilless mix is weed seed free and contains compost, sphagnum peat moss, perlite and vermiculite. Great for organic gardening.

51007—10 qt. bag \$14.95

51009—1 cu. ft. bag \$21.95

SEED STARTING KIT PLUS MIX OFFER

53888 (X)—1 each of Basic Seed Starting Kit and a 10 qt. bag of Jung Seed Starting Mix (fills two trays), a \$28.90 value for **\$23.95**

Jiffy-Mix® Seed Starter

The ultimate planting medium. Roots grow and develop faster in this light, porous mixture composed of vermiculite and pulverized peat moss. Ideal for seed germination, cutting propagation, and transplanting. Weed free. Needs no sterilization.

54335—(A) 10 qt. bag \$17.95

54335—(B) 16 qt. bag \$21.95

54335—2.8 cu. ft. bag Not OMRI listed. (Not pictured) \$37.95

Milled Sphagnum Moss

54324 (A)—*Seeds started in 100% organic milled sphagnum moss will germinate better, faster and safer.* Sterilization is not necessary.

Danger from overwatering is reduced, and transplanting is easy and safe. Protects seedlings from getting Damping Off disease and promotes healthier, sturdier plants. One package is sufficient for approximately 2 flats or about 8 pots. **Package (222 cu. in.) \$10.95**

Jiffy®-Strips

No transplant shock.

Convenient to use. Each strip is made of 12 Jiffy® Pots molded together as a single unit. After plants are established, the pots can be easily torn apart and transplanted directly into the garden. The pots decompose naturally. Order in multiples listed.

84545—1¼" SQUARE POTS (12 pots per strip): **6 strips (72 pots) \$8.95; 12 strips \$13.95; 24 strips \$23.95**

82741—2¼" SQUARE (12 pots per strip): **6 strips (72 pots) \$9.95; 12 strips \$17.95; 24 strips \$32.95; 48 strips \$54.95**

Seedling Heat Mat

Seeds germinate quickly. Seedlings grow bigger and stronger with warm feet! Simply roll the heavy-gauge vinyl mat out on any flat surface and place your seed tray directly on top of the mat. The direct contact means no heat loss. Built-in thermostat holds temperature 10-20 degrees above room temperature to a maximum 85°F. Plugs into a standard outlet. UL approved. Three sizes are available for warming 1, 2 or 4 standard flats. Includes growing tips printed directly on the mat.

53252—9" x 19½" (for 1 flat) \$35.95

53253—20" x 20" (for 2 flats) \$59.95

53254—48" x 20" (for 4 flats) \$94.95

Heat Mat Thermostat

53255—This simple and efficient digital controller helps the heat mat provide a constant optimum temperature for crops to grow well. Plugs into your heat mat and wall outlet. Has illuminated indicator lights and a 3-prong grounded plug that's compatible with all heat mats. **Each \$50.95**

Jiffy® Peat Pots

Eliminates the need for transplanting. Plants develop faster. Seeds, seedlings or cuttings started in Jiffy® peat pots develop roots so strong and plants so healthy the roots actually grow through the walls. When weather permits, plant pot and all in the garden. No wilt setback or transplant shock.

Jiffy® Square Peat Pot Handling Sheets

Convenient insert trays are pre-filled with peat pots. The lightweight plastic insert sheets hold individual square peat pots securely. Simply add soil mix and water. The sheets fit into standard 11" x 21" flats.

53220—2" wide x 3" deep pots (50 pots per sheet):

1 sheet \$8.95; 3+ sheets \$7.95 ea

53219—3" wide x 3" deep pots (18 pots per sheet):

1 sheet \$7.95; 3+ sheets \$6.95 ea

53221—3½" wide x 4" deep pots (18 pots per sheet):

1 sheet \$9.95; 3+ sheets \$8.95 ea

Jiffy-7® Plant Starters

53232—*An easy way to start plants.* Simply wet the wafers and in a short time they expand to 7 times their ¼" compressed thickness. Drop a few seeds on top and place in a warm room; you'll be surprised how quickly the seeds sprout. Continue to give them light, heat and moisture until it's time to set the plugs out in the garden. No setback from transplanting. The 36mm pellets measure 1½" x 1½" when expanded.

25 for \$10.95; 50 for \$18.95;

100 for \$33.95; 200 for \$60.95

Extra-Depth Jiffy-7® Plant Starters

53234—*Extra capacity for longer root development.* The same width as regular Jiffy-7s®, but the ½" thick compressed pellets expand to a taller 2¾" depth.

25 for \$11.95; 50 for \$20.95; 100 for \$37.95; 200 for \$67.95

Super-Size Jiffy-7® Plant Starters

53233—*Ideal for larger transplants.* Each compressed peat pellet is ¾" thick and will expand to a hefty 2" wide x 2¼" tall cylinder. Gives roots of larger plants plenty of space for root development.

16 for \$16.95; 32 for \$29.95; 64 for \$52.95; 128 for \$84.95

Jiffy-7® Prefilled Handling Sheets

53235—*Preloaded and ready to use.* These lightweight plastic sheets hold 50 of our Extra-Depth Jiffy-7® Plant Starters. The specially sized cavities lock the starters in place so they won't float when water is added. Inserts fit in our seed-starting flats.

Price per sheet:

Each \$15.95; 3+ \$13.50 ea;

6+ \$11.50 ea

Jung's Premium Vegetable Seeds

A note about Jung Quality Seeds—Our seeds are routinely tested to ensure they meet Federal standards and packets are labeled to indicate seed lots. **Unless otherwise noted, our seeds are untreated.** On occasion, we are only able to supply treated seeds of a variety. If you want only untreated seeds, please specify when placing your order.

PLEASE READ THIS SEED LIABILITY WARRANTY

Seeds are living products that depend on many factors such as proper planting time and technique, depth of sowing, soils, proper germination environment, fertility, disease control, insect control, and reasonable weather for direct-sown seeds. If any of these factors are not right, it may cause the seed to not perform. Because most, if not all, of these factors are out of our control, most of the success of the seeds is in the hands of the grower. If they have been properly cared for and still fail to grow, we will issue a credit voucher, one time. We guarantee that the seeds we sell conform to the label; however, our liability is limited to the purchase price of the seed.

Jung's Philosophy on Genetically Modified Seed

GMOfree Our company does not agree with the use of genetic engineering solely for economic gain, but we are concerned about the overuse of pesticides in the battle to feed the ever increasing populations of the world. Though we are not certain any genetically engineered products pose a health risk, we believe that more testing needs to be done, especially where food allergies could be a concern. To our knowledge, none of our products have been developed through the mechanical transfer of genetic material between genera, families or kingdoms. We will continue to look at each potential new item on a case-by-case basis and can assure you that we would not add any product to our catalog which we did not consider safe. As always, we will strive to supply what we consider the best varieties, and we will encourage our customers to be good stewards of the soil.

H Our "Heritage" symbol denotes "old-time" vegetables in commerce for over 50 years that still maintain their excellent quality and a loyal following. These open-pollinated selections are ideal choices for seed saving.

USDA Certified Organic Seed—Organic seed is available for select varieties. Look for red text below the conventional seed offerings. See page 2 for additional information.

SEED TAPES

EASY TO SOW – EASY TO GROW
TAKE THE GUESSWORK OUT OF PLANTING.

- Saves time • No wasted seed
- No need to worry about correct seed spacing or thinning

Seed tapes are especially great for vegetables we tend to plant too thickly such as carrots, lettuce, radishes and beets. Look for our seed tapes highlighted in blue below the price line of the variety description. The tapes are sent as three 5-foot sections and will plant a total of 15 feet of row. They can be cut to any length, so they're great for raised beds and containers, as well as the garden. The tapes are completely biodegradable and organic, made with a special tissue paper that contains no adhesives or other artificial products. Once moistened, the paper starts to break down to optimize the natural germination process.

Artichokes

Jerusalem Artichoke

04524—High in potassium, low in calories. An easy-to-grow root vegetable with a unique nut-like flavor. Delicious when sliced raw in salads and tastes like water chestnuts when added to Asian foods at the last minute of cooking. Starch-free and low in calories, they are excellent for diets. Although a member of the sunflower family, grow and store just like potatoes.

JERUSALEM ARTICHOKE

TUBERS: lb. \$15.95; 3 lbs. \$37.95

BLUE LAKE 274

DERBY

ANNIHILATOR

JADE

Bush Beans

Beans thrive in warm soils. Plant seeds no deeper than 2 inches in hills about 3-5 feet apart, or evenly space seeds about 2 inches apart in a row. Inoculation of the bean seeds is **very important** as the bacteria fix nitrogen from the air to feed the plant. (Inoculant sold below). Sow every two weeks for a continuous supply. A packet will plant approximately 20-30 feet of row. Use about 1 pound per 150 feet of row.

GREEN POD BUSH BEANS

Blue Lake 274

(52 Day)—*This home garden classic sets the standard for flavor and dependability.* Sturdy 15-18 inch bushes bear a heavy crop of round pods 6-7 inches long that are very meaty and free of strings and fiber. The flavor is outstanding! If beans are kept picked, the bushes will bear over a long period of time. White seeded. *Please note: Approximately 10% of this seed may not grow true to name, so we have discounted the price, rather than deprive you of this longtime favorite. Due to the discounted price and disclosure of the issue, we will not be issuing further credit or refunds for seed that does not grow true to name.*

01020—(A) 1 Pkt. (150 seeds) \$3.25; 3+ \$2.95 ea;

(U) 750 seeds \$9.55; 2+ \$8.65 ea

04905—ORGANIC—(A) 1 Pkt. (150 seeds) \$4.25; 3+ \$3.85 ea

Derby

01030—(55 Day)—Remarkably tender and absolutely delicious. High-quality, round, straight pods are medium dark green and can reach a surprising 7 inches in length. Easy-to-pick, 18-inch bushes set big crops over a long period. Resistant to common bean mosaic.

(A) 1 Pkt. (200 seeds) \$4.25; 3+ \$3.85 ea;

(C) 1,000 seeds \$11.95; 2+ \$10.95 ea

CONTENDER

ACCELERATE

Contender

01028—(40-50 Day)—Our earliest green bean. Round to oval pods 6-8 inches long are tender and stringless. Very tolerant of both hot temperatures and mildew. The crop matures over a short period of time, so you can complete your canning or freezing quickly. Resistant to bean mosaic. Buff mottled seeds.

(A) 1 Pkt. (150 seeds) \$3.95; 3+ \$3.65 ea;

(U) 750 seeds \$10.25; 2+ \$9.25 ea

Accelerate

01017—(54 Day)—Begins bearing early and stays productive throughout the season. Developed at the University of Wisconsin and selected for its high yield potential and exceptional disease resistance to bean mosaic and rust. The light green, 6-7 inch pods are tender and excellent no matter how you prepare them. Performs well in cool climates. White seeded.

(A) 1 Pkt. (200 seeds) \$3.75; 3+ \$3.45 ea;

(C) 1,000 seeds \$10.95; 2+ \$9.95 ea

Top Crop

H **01090—(50 Day)—Considered one of the best for canning, freezing and table use.** Vigorous, 15-18 inch bushes set a heavy crop of pods 6-7 inches long that are round, straight, meaty and free from strings and fiber. Resistant to bean mosaic. 1950 AAS Winner. Brown seeded. (Not pictured).

(A) 1 Pkt. (200 seeds) \$3.65; 3+ \$3.35 ea

Annihilator

01066—(53 Day)—(PVP)—The bean that beats the competition every time in comparison trials. It bears incredible yields of dark green and glossy, 6-inch pods that are low fiber, making them very tender and tasty. Pods are set high on the plant for easy picking and hold quality for a long time without developing seeds. The plants have a strong disease resistance package, plus a unique low-nitrogen requirement so they perform well in below-average soils.

(A) 1 Pkt. (200 seeds) \$3.95; 3+ \$3.65 ea;

(C) 1,000 seeds \$11.15; 2+ \$10.20 ea

Jade

01045—(56 Day)—(PVP)—Exceptionally good in every way. Produces high yields of tender, 6-7 inch, stringless, round pods with dark green color and outstanding sweet flavor. You'll love it for fresh use, canning and freezing. Large, upright plants hold beans well above the ground, reducing curling and tip rot. Yields prolifically, even when stressed by heat and cold. Resistant to bean mosaic, brown spot and curly top. Tolerates rust well. Pale green seeds.

(A) 1 Pkt. (200 seeds) \$3.95; 3+ \$3.65 ea;

(C) 1,000 seeds \$11.75; 2+ \$10.80 ea

Provider

01059—(48-54 Day)—One of the best for freezing and canning. Early, reliable and high yielding. Long, straight, round pods 5-6 inches long have delicious buttery flavor that holds up well for preserving. The pods are concentrated in the lower part of the plant for easy picking. Tolerance to powdery mildew and high resistance to other plant diseases keep Provider yielding lots of beans over a long period. Purple seeded. (Not pictured).

(A) 1 Pkt. (200 seeds) \$3.65; 3+ \$3.35 ea;

(C) 1,000 seeds \$10.25; 2+ \$9.25 ea

ROYAL BURGUNDY

PURPLE BUSH BEANS

Royal Burgundy Purple Pod

01070—(55 Day)—Pods turn from purple to green after a few minutes in boiling water. Full, rich bean flavor makes this one of the best for freezing. Sturdy, vigorous, 15-18 inch plants bear an abundant crop of round, stringless, 5-5½ inch meaty pods.

(A) 1 Pkt. (150 seeds) \$3.65; 3+ \$3.35 ea;

(U) 750 seeds \$9.95 ea; 2+ \$9.05 ea

Nature's Aid Inoculant

Increase bean and pea crops by 20-50% with Inoculant. Gardeners have realized the benefits of inoculating their legume plants for many years. Inoculant contains nitrogen-fixing rhizobia to promote stronger, healthier plants; increase yields; and improve quality and richness of the soil.

51274 (A)—GARDEN SIZE (treats up to 8 lbs. of seed) \$11.95

51274 (B)—BUSHEL SIZE (treats up to 50 lbs. of seed) \$16.95

GRANULAR INOCULANT—An easy-to-use granular formula you put directly into the row as you plant.

51277—8.7 oz. can (treats 150 ft. of row) \$20.95

51278—2.3 oz. bag (treats 40 ft. of row) \$10.95

YELLOW WAX BUSH BEANS

Golden Rod

01120—(55 Day)—*Brightest yellow of any wax bean!* Vigorous, upright plants produce a bumper crop of round, straight, 5-6 inch pods with delicious rich, buttery flavor. Since seeds in pods develop slowly, high quality is maintained for a long period on the bush. Excellent for canning, freezing or fresh use. Resistant to common bean mosaic. White seeded.

(A) 1 Pkt. (200 seeds) \$4.95; 3+ \$4.55 ea;
(C) 1,000 seeds \$13.95; 2+ \$12.95 ea

ROMANO BUSH BEANS

Roma II

01060—(55 Day)—*Flat Italian-type with distinctive rich bean flavor.* Well-known for its high yields of uniform 4-6 inch long by 3/4 inch wide flat green pods. Pod set is concentrated and held well off the ground for easy picking. The true bush form produces sturdy 18-20 inch plants which need no support. Delicious fresh and superb for canning and freezing. White or buff seeded.

(A) 1 Pkt. (100 seeds) \$3.75; 3+ \$3.45 ea;
(W) 500 seeds \$10.25; 2+ \$9.25 ea

Capitano

01182—(62 Day)—*All the characteristic flavor of a Romano bean, but in an easy-to-spot color.* Stringless, golden yellow pods average 4 1/2-5 inches long and have a robust, full flavor and a smooth, tender texture. Upright, bushy plants are extremely productive through the season. Freezes well. White seeded.

(A) 1 Pkt. (150 seeds) \$4.75; 3+ \$4.35 ea;
(U) 750 seeds \$11.95; 2+ \$10.95 ea

Bean Slicer

83031—*Slices beans French style in a snap!* This heavy duty cast aluminum slicer has sharp stainless steel cutting blades that slice beans lengthwise. Feed 2 or 3 beans at a time into the hopper for delicate French-style slices. Clamps to a counter or table edge up to 1 1/4" thick. Lasts for years.

Each \$29.95

Bean and Pea Tower

53328—*Easy support for climbing vegetables and flowers.* This sturdy 6 foot galvanized tower assembles in minutes and folds up just as fast. Supports up to 12 pole bean plants or 36 snap pea vines, keeping them clean and off the ground. Can also be used for cucumbers and other vining plants. Some string included. Additional string can be purchased on page 37. Each \$32.95; 2+ \$29.95 ea

FILET BUSH BEANS

Maxibel

01057—(55-60 Day)—*The first full-size filet bean that is completely stringless.* Dark green, 7-7 1/2 inch pencil-slim pods are crisp and full of flavor. Unbelievably productive. Pods are produced in a concentrated set for easy picking. Combines pole bean quality and flavor on a bush plant.

(A) 1 Pkt. (200 seeds) \$4.95; 3+ \$4.55 ea;
(C) 1,000 seeds \$12.95; 2+ \$11.95 ea

Rocdor

(53 Day)—*Rich and buttery gourmet flavor.* Slim, 6-inch yellow pods are tender and stringless. Pick them young to enjoy as a yellow filet type. Pods are slow to develop seeds so the high quality holds over a long period. Highly productive, disease-resistant plants tolerate cool, wet conditions. Black seeded.

01135—(A) 1 Pkt. (200 seeds) \$5.75; 3+ \$5.25 ea;
(C) 1,000 seeds \$16.95; 2+ \$15.50 ea
04906—ORGANIC—(A) 1 Pkt. (200 seeds) \$5.95; 3+ \$5.45 ea

Masai

01056—(55 Day)—(PVP)—*A standard in Europe where the baby French style is popular.* The small-leaf bushes yield huge quantities of slim, dark green, 4-inch pods concentrated in the upper half of the bush for easy picking. The flavor of the tender stringless pods is exceptionally good. Has excellent disease resistance. White seeded. About 180 seeds per ounce.

(A) 1 Pkt. (200 seeds) \$3.95; 3+ \$3.65 ea;
(C) 1,000 seeds \$9.95; 2+ \$9.05 ea

Velour

01094—(55 Day)—*It tastes as good as it looks!* The slender, stringless, 5-6 inch round pods have a rich, succulent flavor excellent for fresh eating and freezing. Compact, disease-resistant plants bear over a long season. Beans turn bright green when cooked. Beige seeded. About 190 seeds per ounce.

(A) 1 Pkt. (200 seeds) \$4.95; 3+ \$4.55 ea;
(C) 1,000 seeds \$11.75; 2+ \$10.80 ea

Filet Pole Bean

Fortex

01157—(60 Day)—*Rich, sweet flavor makes this French filet-type pole bean a gourmet treat.* Productive vines yield loads of slim, dark green pods that can be harvested at any length from 7-11 inches. They remain firm, stringless and delicious, even after the seeds enlarge. Superb fresh or frozen. Brown seeded. About 75 seeds per ounce.

(A) 1 Pkt. (100 seeds) \$6.95;
3+ \$6.35 ea; (W) 500 seeds \$21.95; 2+ \$19.95 ea

Monte Gusto

01166—(60-63 Day)—*Flavorful, tender, high-quality beans.* This climbing French bean produces good crops of thin, golden-yellow beans that grow up to 10 inches long. Highly resistant to bean common mosaic virus. Brown seeded.

(A) 1 Pkt. (150 seeds) \$5.15; 3+ \$4.65 ea;
(U) 750 seeds \$12.95; 2+ \$11.95 ea

Hilda

01193—(60 Day)—*Yields go on and on!* Good resistance to heat and plant diseases results in a summer-long harvest of these flat-podded, 10-12 inch deep green, stringless beans. Nothing beats their flavor when cooked or frozen. (Aka: Helda).

(A) 1 Pkt. (100 seeds) \$4.95; 3+ \$4.55 ea;
(W) 500 seeds \$11.95; 2+ \$10.95 ea

Seychelles

01186—(55 Day)—*A 2017 AAS National Winner.* Vigorous vines produce an abundance of flavorful, straight and stringless, 5-6 inch pods allowing you to enjoy high yields and multiple crops over the season. Vines require support, but can be grown either in-ground or in a container. Plants show tolerance against bean common mosaic virus.

(A) 1 Pkt. (200 seeds) \$4.75;
3+ \$4.35 ea;
(C) 1,000 seeds \$11.95; 2+ \$10.95 ea

Lima Beans

Delicious and nutritious, Lima beans can be used fresh, frozen, canned, or dried for winter use.

F 01225-FORDHOOK 242—(75 Day)—*The best large-seeded lima.* Each 3-4 inch pod contains 3-5 plump, delicious beans. Bushes grow 16-20 inches tall. 1945 AAS Winner.

(A) 1 Pkt. (50 seeds) \$3.75; 3+ \$3.45 ea;
(S) 200 seeds \$10.75; 2+ \$9.75 ea

F 01215-EARLY THOROGREEN—(72 Day)—*The earliest of all limas.* Enjoy tasty, pale green baby limas by midsummer in the North. The 18-inch bushes require no staking. Bears until frost. (Not pictured).

(A) 1 Pkt. (150 seeds) \$3.65; 3+ \$3.35 ea;
(U) 750 seeds \$9.95; 2+ \$9.05 ea

01235-KING OF THE GARDEN—(85 Day)—*A popular pole lima.* Large clusters of plump, 6-inch pods contain 3-5 large, cream-colored seeds. A vigorous, reliable grower bearing right up until frost. Easy to shell.

(A) 1 Pkt. (50 seeds) \$3.75; 3+ \$3.45 ea;
(S) 200 seeds \$9.85; 2+ \$8.95 ea

Edible Soybeans

Nutritious edamame soybeans can be substituted for green peas or Lima beans in any recipe. They're rich in protein, fiber, calcium, and vitamins A and B. Grow like other bush beans. Plant 6 seeds per foot. Approximately 75 seeds per ounce.

BeSweet 292

01266—(87 Day)—*A good choice for Northern climates.* This early vegetable soybean is used primarily as a green shelled bean and has superior eating quality and more protein than lima beans. High-yielding, 24-inch plants produce medium-size pods that hold 2-3 large beans. Also used as a dry yellow bean.

(A) 1 Pkt. (150 seeds) \$5.25; 3+ \$4.75 ea;
(U) 750 seeds \$12.95; 2+ \$11.95 ea

BESWEET 292

Nature's Aid Inoculant

Increase bean and pea crops by 20-50% with Inoculant. Gardeners have realized the benefits of inoculating their legume plants for many years. Inoculant contains nitrogen-fixing rhizobia to promote stronger, healthier plants; increase yields; and improve quality and richness of the soil.

51274 (A)-GARDEN SIZE (treats up to 8 lbs. of seed) **\$11.95**

51274 (B)-BUSHEL SIZE (treats up to 50 lbs. of seed) **\$16.95**

GRANULAR INOCULANT—An easy-to-use granular formula you put directly into the row as you plant.

51277-8.7 oz. can (treats 150 ft. of row) **\$20.95**

51278-2.3 oz. bag (treats 40 ft. of row) **\$10.95**

LIGHT RED KIDNEY

CALYPSO

PINTO

Dry Shelling Beans

Full of nutrition and soluble fiber, beans are virtually fat-free, have no cholesterol and are a good source of vitamins. For shell beans, harvest when seeds are fully formed in the pod, but still soft and green. For dried beans, allow pods and plants to dry before harvesting. The seeds we sell are not intended for direct human consumption, but for planting.

01287-LIGHT RED KIDNEY—(109 Day)—*Perfect for your favorite chili recipe.* Richly flavored, light red kidney-shaped beans are widely used for cooking. Bushy plants are well-adapted to northern climates.

(A) 1 Pkt. (100 seeds) \$4.15; 3+ \$3.75 ea;
(W) 500 seeds \$10.45; 2+ \$9.45 ea

01256-CALYPSO—(90 Day)—*Also known as Yin Yang.* Ideal for baking and soups. The pods each contain 4-5 round, black and white beans that have a contrasting eye. Disease-resistant, bush plants.

(A) 1 Pkt. (100 seeds) \$5.75; 3+ \$5.25 ea;
(W) 500 seeds \$12.95; 2+ \$11.95 ea

F 01290-PINTO—(90 Day)—*A staple in Mexican cuisine.*

Broad, 4-6 inch pods, borne near the crown of half-runner-type plants, each hold 5-6 speckled brown beans.

(A) 1 Pkt. (150 seeds) \$3.75; 3+ \$3.45 ea;
(U) 750 seeds \$9.95; 2+ \$9.05 ea

Beets

Beets are high in vitamins A and C, and both tops and roots are edible and delicious. Make a first planting early and repeat every 2-3 weeks until August for a steady supply. Beets are ready to eat as soon as they reach golf ball size. Keep well-watered as drought will result in tough or woody roots. A packet will plant approximately a 20-30 foot row. Use 1 oz. for a 100-foot row.

BOLDOR

BORO HYBRID

Boldor

01313—(55-60 Day)—*Bold color holds strong through cooking.* Globe-shaped, orange roots have bright yellow flesh with a sweet flavor that is second to none. The light green, compact tops are delicious when boiled for greens. Quality is superior over other golden beets with better germination and holding ability.

(A) 1 Pkt. (250 seeds) \$4.35; 3+ \$3.95 ea;
(C) 1,000 seeds \$10.95; 2+ \$9.95 ea

Boro Hybrid

(51 Day)—*The best choice for baby beets.* Sow repeat plantings throughout the summer and harvest sweet, smooth, round baby beets, or let grow to uniform 3-inch globes. They are deep wine-red throughout with exceptional sweet flavor at any stage. The robust 12-inch tops can be used for tender, tasty greens. A very disease-resistant variety.

01316-(A) 1 Pkt. (300 seeds) \$4.45; 3+ \$4.05 ea;
(K) ½ oz. \$8.75; 2+ \$7.95 ea

04911-ORGANIC-(A) 1 Pkt. (300 seeds) \$4.95; 3+ \$4.55 ea

DETROIT SUPREME

Detroit Supreme

(60 Day)—*An improved selection of the popular Detroit Dark Red beet.* Smooth, uniform, globe-shaped roots have sweet, tender, fine-grained flesh that's deep red throughout with indistinct zoning. Excellent for large dicing beets as they do not get woody, or use them small for canning and pickling. The glossy green tops make tangy boiling greens. High yielding.

01340-(A) 1 Pkt. (9 grams) \$3.75; 3+ \$3.45 ea;
(K) ½ oz. \$6.20; 2+ \$5.65 ea; (M) ¼ lb. \$12.95
01340-(ST) 15' Seed Tape \$4.75; 3+ \$4.35 ea

RED ACE HYBRID

RED CLOUD HYBRID

Red Ace Hybrid

01355—(53 Day)—*A top pick for slicing dicing and whole baby beets.* Hybrid vigor results in fast, uniform, high yields. Roots are tender and sweet with up to 50% higher red pigment than standard beets and no interior zoning. Glossy green 12-inch tops have superb disease resistance.

(A) 1 Pkt. (300 seeds) \$3.95; 3+ \$3.65 ea;
(K) ½ oz. \$5.95; 2+ \$5.45 ea

Red Cloud Hybrid

(55 Day)—*Our sweetest, highest quality beet.* High sugar content, superior top strength, smooth shape and intense red color with no zoning make this beet exceptional for dicing, slicing and whole baby beets. Has long holding ability.

01356-(A) 1 Pkt. (300 seeds) \$3.95; 3+ \$3.65 ea;
(C) 1,000 seeds \$7.45; 2+ \$6.75 ea
01356-(ST) 15' Seed Tape \$4.75; 3+ \$4.35 ea

TAUNUS HYBRID

RUBY QUEEN

Taunus Hybrid

01366—(65 Day)—*Improved cylindrical beet with tremendous yields.* Very uniform beets, 6-7 inches long, have deep red interiors with little to no zoning and very sweet flavor. Smooth-skinned for easy cleaning and uniform slicing. The 14-inch tops are also great for beet greens.

(A) 1 Pkt. (300 seeds) \$3.95; 3+ \$3.65 ea;
(K) ½ oz. \$8.35; 2+ \$7.55 ea

Ruby Queen

F 01360—(55 Day)—*A time-tested favorite that will please the most critical gardener.* Globe-shaped roots are smooth, deep red with no white rings or zones, very tender and sweet. Superb for pickling, bunching or canning. 1957 AAS Winner.

(A) 1 Pkt. (9 grams) \$3.55; 3+ \$3.25 ea;
(K) ½ oz. \$6.95; 2+ \$6.35 ea

MONFLOR HYBRID

PACKMAN HYBRID

Broccoli

Nutritional value and delicious flavor combine to make broccoli one of the most popular vegetables. Easy to grow, broccoli is a cool weather crop that can be sown in early spring for summer harvest or sown in summer for fall harvest. For spring planting, start seeds indoors about 6 weeks before last frost. There are, 7,000 to 9,000 seeds in an ounce. Days to maturity are from transplant.

Monflor Hybrid

01428—(70 Day)—*Cut down on your kitchen prep time with this broccoli.* With one cut above the main stem, these 7½-8 inch, blue-green heads separate into perfect florets. In our trial garden, we found this variety was easy to grow and had excellent flavor, both fresh and cooked. Plants mature uniformly, but with the one-cut nature, it won't take long to freeze the tasty spears for use during the winter.

(A) 1 Pkt. (50 seeds) \$3.85; 3+ \$3.55 ea

GREEN MAGIC HYBRID

Green Magic Hybrid

01424—(57 Day)—(U.S. patent 5,945,582)—*Widely adaptable with excellent heat tolerance.* Sturdy plants produce semi-domed heads with small to medium, tightly packed, blue-green beads. Superior flavor is ideal for both fresh eating and freezing for winter use. Matures uniformly for ease of harvest.

(A) Pkt. (150 seeds) \$4.95; 3+ \$4.55 ea

Aspabroc Hybrid

01460—(50-60 Day)—*A great way to extend the broccoli season.* These tender, mild-tasting spears require very little room to grow. Harvest the central shoot first to encourage the growth of side shoots, which continue to develop for about 4 weeks. Great for steaming, sautéing, fresh eating and freezing.

(A) 1 Pkt. (20 seeds) \$4.75; 3+ \$4.35 ea

BELSTAR HYBRID

Belstar Hybrid

(66 Day)—*If you have trouble growing broccoli, try Belstar.* This variety has proven to be a dependable performer wherever it's grown, even when conditions aren't always favorable. It produces beautifully domed and tightly packed 6-8 inch blue-green heads, plus good side shoots for second cuttings. Plant in spring or fall.

01411—(A) 1 Pkt. (150 seeds) \$4.95;

3+ \$4.55 ea; (C) 1,000 seeds \$20.25

04914—ORGANIC—(A) 1 Pkt. (150 seeds) \$5.95

ASPABROC HYBRID

Brussels Sprouts

FRANKLIN HYBRID

Brussels sprouts are most dependably grown when started indoors 4-6 weeks before last frost. Provide plenty of water and fertilize regularly throughout the summer. Harvest in fall and winter, removing sprouts from the bottom of the stem first. Frost improves quality and flavor. Try them tossed with olive oil and roasted in the oven.

Franklin Hybrid

01496—(80-100 Day)—*Very early maturity and premium quality too.* Harvest big yields of 1-1½ inch, high quality sprouts that are firm and tightly wrapped with good, mild flavor. Vigorous plants grow 24-36 inches tall, so give them plenty of room. A high level of disease resistance and good holding ability ensures a successful extended harvest. Stalks are less woody so whole stem harvests are possible.

(A) 1 Pkt. (75 seeds) \$5.95; 3+ \$5.45 ea

THURICIDE (BT)—Controls leaf-eating worms that tend to feed on Brassica's like broccoli, Brussels sprouts and cabbage. See page 38.

DANISH BALLHEAD

MEGATON HYBRID

STONEHEAD HYBRID

JUNG'S CABBAGE BABIES

Cabbage

Cabbage can be used fresh, as coleslaw, cooked and for sauerkraut. It thrives in cool weather. For early harvest, sow seed indoors 6-8 weeks before last expected frost. An oz. contains about 8,000 seeds.

Danish Ballhead

H **01520**—(100 Day)—*A popular heirloom with unequalled keeping qualities.* The round, 7-10 inch solid heads have sweet, mild flavor. Ideal for boiling, slaw and kraut. Withstands hot, dry weather and does not rot in wet seasons.

(A) 1 Pkt. (3 grams) \$3.45; 3+ \$3.15 ea;

(K) ½ oz. \$7.25; 2+ \$6.55 ea

Stonehead Hybrid

01590—(65 Day)—*Our most popular early cabbage.* Round, rock-solid heads average 4 lbs. in weight and 6 inches across with a small interior core, good texture and fine flavor. Holds for a long time without bursting. Has yellow wilt and black rot tolerance. 1969 AAS Winner.

(A) 1 Pkt. (100 seeds) \$3.95; 3+ \$3.65 ea;

(C) 1,000 seeds \$12.95; 2+ \$11.95 ea

Megaton Hybrid

01550—(90 Day)—*Ideal for anyone who likes to grow the biggest produce.* The heads can grow up to 25 pounds each, and hold well without cracking. Widely adaptable, it even grows well in clay-type soils. The solid white interior has a mild, sweet flavor. Resistance to Fusarium yellows, tip burn, ring spot and split.

(A) 1 Pkt. (50 seeds) \$4.55; 3+ \$4.15 ea;

(C) 1,000 seeds \$31.95; 2+ \$28.95 ea

09520—ORGANIC—(A) 1 Pkt. (50 seeds) \$5.55

(C) 1,000 seeds \$44.95

Jung's Cabbage Babies Triplet Hybrid Blend

01514—(60-70 Day)—*A blend of 'personal size' cabbages that take up less space in your fridge.* Plus, they take up less space in the garden as they can be spaced just 10-12 inches apart. We've included green, red and savoy varieties that form softball-size heads and weigh up to 1½ lbs. They have sweet, mild flavor and hold well.

(A) 1 Pkt. (100 seeds) \$5.05; 3+ \$4.55 ea

Pak Choi & Chinese Cabbage

Pak Choi (also spelled Pac Choi and Bok Choy) is a vegetable with thick, crispy, celery-like stalks popular for Asian cooking, stir-fry, and also for eating raw. Culture is similar to cabbage. If started indoors, sow seeds 2 weeks prior to the last frost date.

BOPAK HYBRID

Bopak Hybrid Pak Choi

02804—(60 Day)—*A sweet addition to containers and small gardens.* In AAS trials, these compact plants matured about 5 days earlier than comparison varieties. An upright habit allows for close garden spacing and the attractive plants can be harvested at baby size or grown to full size. Leaves are tender and delicious. Enjoy them raw or add to soups, stews and stir-fry. 2015 AAS Regional Winner.

(A) 1 Pkt. (200 seeds) \$4.75; 3+ \$4.35 ea

China Express Hybrid Chinese Cabbage

01517—(65-80 Day)—*Popular for Asian cooking, stir-fry and raw in salads.* Medium green, stocky, barrel-shaped 4-5 lb. heads have the texture of lettuce with mild cabbage flavor. Good bolt resistance.

(A) 1 Pkt. (100 seeds) \$3.75; 3+ \$3.45 ea

CHINA EXPRESS HYBRID

INGOT HYBRID

Ingot Hybrid

01633—(67 Day)—*One of our best tasting carrots.* The deep orange roots are full-flavored with a rich aroma and smooth texture. High carotene content means deep orange color right through the core and high vitamin A potential. This long Nantes-type adapts to a wide range of soil types and produces uniform roots 7-8 inches long.

(A) 1 Pkt. (1,000 seeds) \$4.45; 3+ \$4.05 ea

SUGARSNAX 54 HYBRID

Sugarsnax 54 Hybrid

01685—(68 Day)—*Flavor that holds.* This early Emperor-type carrot has an exceptionally sweet, mild taste that holds after processing. The slim, 10-12 inch roots are very high in beta-carotene, an important antioxidant and source of vitamin A, and have a strong level of resistance to a wide range of diseases.

(A) 1 Pkt. (500 seeds) \$4.15; 3+ \$3.75 ea;
(J) ¼ oz. \$11.75; 2+ \$10.80 ea

YAYA HYBRID

Yaya Hybrid

(60 Day)—*Sets a new standard for quality and flavor.* The 6-inch long, Nantes-type, cylindrical carrots are smooth and bright orange throughout with extra sweet, mild flavor and a delicious crunch. Harvest at baby stage or let them mature until cool temps sweeten them even more.

Limited supply for 2023.

04922—ORGANIC—(A) 1 Pkt. (750 seeds) \$4.75; 3+ \$4.35 ea;
(J) ¼ oz. \$14.95; 2+ \$13.50 ea

NAPOLI HYBRID

Carrots

Carrots adapt to a variety of soils, but do best in loose, fertile soil with plenty of sun. Plant early and use successive sowings for a continuing fresh supply. Seed is slow to germinate. Keep tops of roots covered so light does not turn them green, and keep evenly watered to prevent splitting. Carrot seed varies in size and usually averages between 15,000 and 22,000 seeds per ounce. A packet plants a 20-25 foot row - ¼ oz. about 100 feet.

PURPLE SUN HYBRID

Purple Sun Hybrid

01673—(80 Day)—*A deep purple carrot with delectable flavor.* Long, smooth Nantes-type carrots are a rich shade of dark purple all the way to the core. Loaded with anthocyanins and sweet flavor, the 12-14 inch roots are ideal for juicing, but also retain their color when cooked. Strong tops allow for quick pulling.

(A) 1 Pkt. (500 seeds) \$4.75; 3+ \$4.35 ea

ADELAIDE HYBRID

Adelaide Hybrid

01611—(55 Day)—*A true 'baby' carrot with exceptionally sweet flavor.* The bright orange, Nantes-type, cylindrical roots grow just 3-4 inches long and are well adapted to planting in small spaces. Seeds should be sown slightly closer than standard carrots to maximize the harvest. Crispy, sweet and outstanding for snacking, salads and cooking. Holds well in the ground for extended harvest.

(A) 1 Pkt. (500 seeds) \$3.95; 3+ \$3.65 ea

BALTIMORE HYBRID

Baltimore Hybrid

01617—(65 Day)—*Grow GIANT carrots with great flavor and quality.* Harvest Baltimore as normal-sized, 8-9 inch, Nantes-type carrots or let them grow to 12-14 inches long and 2 inches in diameter. The deep orange roots are rich in vitamin A and stay mild and sweet with a juicy crunch. Ideal for soup, stews, roasting and juicing.

(A) 1 Pkt. (750 seeds) \$4.45; 3+ \$4.05 ea;
(E) 5,000 seeds \$14.75; 2+ \$13.30 ea

Napoli Hybrid

(45-60 Day)—*A 3 season carrot.* Harvest at 45 days for bright orange baby carrots or let grow to 7-8 inch full-size. One of the best carrots for overwintering, becoming very sweet. Sometimes referred to as the "sugar carrot."

01656—(A) 1 Pkt. (500 seeds) \$4.25;
3+ \$3.85 ea; (E) 5,000 seeds \$12.95

01656—(ST) 15' Seed Tape \$4.75; 3+ \$4.35 ea

04921—ORGANIC—(A) 1 Pkt. (500 seeds) \$5.25; 3+ \$4.75 ea;

(E) 5,000 seeds \$18.95

ATOMIC RED

RAINBOW HYBRID

Atomic Red

01614—(76 Day)—*A high lycopene carrot.* Studies suggest eating lycopene-rich foods helps prevent prostate and other types of cancers. Lycopenes are better absorbed by the body when foods are cooked. Atomic Red is at flavor peak when cooked, turning deep red with smooth texture and sweet, mild flavor. Tapered roots are 9 inches long.

(A) 1 Pkt. (500 seeds) \$3.95; 3+ \$3.65 ea

Rainbow Hybrid

01671—(70 Day)—*Not a blend, but one unique variety.* Each color has its own distinctive flavor, but all are very sweet with high sugar content. Harvest smooth, 7-9 inch tapered roots of yellow, white, light orange, dark orange and coral. The 12-14 inch tops are strongly attached for easy pulling. Fully mature after 70 days, but can be harvested earlier for delicious baby carrots.

(A) 1 Pkt. (500 seeds) \$4.95; 3+ \$4.55 ea;
(J) ¼ oz. \$16.95; 2+ \$15.50 ea

DRAGON

Dragon

01672—(75-80 Day)—*One of the most refined purple carrots available.* The exterior is a deep red-purple and contrasts beautifully with a bright orange interior. The elongated roots come to a tapered point and have a wonderful true carrot flavor that is sweet with just a hint of spice.

(A) 1 Pkt. (200 seeds) \$3.55; 3+ \$3.25 ea

Red-Cored Chantenay

H **01670**—(72 Day)—*A garden favorite for more than 150 years.* These large, wide-shouldered, stump-rooted carrots are 5½-6 inches long and 2½ inches thick at the crown. The red-orange roots are fine-grained throughout and tender with sweet, delicate flavor. Produces heavy yields of well-shaped carrots, even in heavier soil. (Not pictured).

(A) 1 Pkt. (2,000 seeds) \$3.35; 3+ \$3.05 ea;
(K) ½ oz. \$5.95; 2+ \$5.45 ea

CARROT SAMPLER
01646 (X)—1 each of Baltimore Hybrid, Bolero Hybrid and Yaya Hybrid, a \$13.45 value for **\$11.50**

BARRACUDA HYBRID

Barracuda Hybrid

(65-70 Day)—*Juicy and flavorful. Our recommended replacement for Sweetness III Hybrid.* The 7½-8½ inch roots resist greening and are smooth with a nice orange color throughout. Even sweeter than Sweetness III with true carrot flavor and a crunchy, juicy texture. Less susceptible to fungal attacks as the foliage grows very upright. An overall great carrot ideal for both home and market gardens.

01616—(A) 1 Pkt. (750 seeds) \$3.95;
3+ \$3.65 ea; (E) 5,000 seeds \$12.25
01616—(ST) 15' Seed Tape \$4.75; 3+ \$4.35 ea

NANTES

Nantes or Coreless

H **(70 Day)**—*A long-time favorite for canning, fresh market and home gardens.* This popular half-long carrot averages 6 inches in length by ½ inches in diameter. Smooth roots have rich orange color throughout with a small core completely free of any woody fiber. Matures quickly for early use.

01675—(A) 1 Pkt. (2,000 seeds) \$3.25;
3+ \$2.95 ea; (K) ½ oz. \$5.95; 2+ \$5.45 ea

01675—(ST) 15' Seed Tape \$4.75; 3+ \$4.35 ea

BOLERO HYBRID

Bolero Hybrid

01668—(75 Day)—*One of the best carrots for long-term storage.* The 7-inch long, slightly tapered, Nantes-type roots have crunchy texture, bright orange color and sweet flavor that holds well in storage. A heavy yielder with strong, thick, 10-inch tall tops. Has a high level of resistance to alternaria blights and powdery mildew.

(A) 1 Pkt. (500 seeds) \$4.25; 3+ \$3.85 ea;
(K) ½ oz. \$11.75; 2+ \$10.80 ea

AMAZING

Cauliflower

Cauliflower is a cool weather plant and will not head properly in hot weather. For early crops, start seed indoors and transplant out as early as possible. For a late crop, start seed in place in midsummer. Days to maturity are from transplant.

Amazing

01703—(70 Day)—*A high-performance, extremely vigorous, open-pollinated variety.* Produces bright white, 7-10 inch, densely curded, domed heads that are well-protected by upright wrapper leaves. Tolerates both heat and cold stress well. Has excellent holding ability so the harvest can be enjoyed longer.

(A) 1 Pkt. (100 seeds) \$4.95; 3+ \$4.55 ea

CHEDDAR HYBRID

Cheddar Hybrid

01706—(68 Day)—*This cauliflower really is the color of cheddar cheese!* The orange color is beta-carotene, and unlike white cauliflower, Cheddar is a good source of vitamin A. Flavor is excellent, both fresh and cooked. Color deepens slightly when cooked. Heads are large, smooth and dome-shaped. No need to go through the chore of tying up wrapper leaves as heads should be left open for maximum color.

(A) 1 Pkt. (20 seeds) \$5.75; 3+ \$5.25 ea

SNOW CROWN HYBRID

Snow Crown Hybrid

01730—(60-70 Day)—*An early and highly dependable variety.* The advantages of hybrid vigor are apparent in the yields of uniform 2-pound heads which are pure white, solid, well-rounded, smooth and of delicious flavor and texture. Matures early and produces heads even under adverse conditions. 1975 AAS Winner.

(A) 1 Pkt. (100 seeds) \$5.05; 3+ \$4.55 ea

DEPURPLE HYBRID

DePurple Hybrid

01715—(68 Day)—*A lovely lavender-pink cauliflower.* When cut, the 7½-8 inch heads reveal contrasting white stems, adding to their appeal on a plate. The flavor is excellent no matter how it's prepared and the purple color holds when cooked. Plants are able to adapt to a wide range of growing conditions and are ideal for both spring and fall plantings.

(A) 1 Pkt. (20 seeds) \$5.95; 3+ \$5.45 ea

FIORETTO 60 HYBRID

VERONICA ROMANESCO HYBRID

Fioretto 60 Hybrid

01712—(60 Day)—*It's sweeter than head cauliflower and easier to prepare too!* Instead of a head, this cauliflower produces small florets on long, tender stems that can quickly be clipped for enjoying fresh, grilled, roasted, or sautéed. It has a sweet, nutty flavor that will keep you coming back for more.

(A) 1 Pkt. (20 seeds) \$4.75; 3+ \$4.35 ea

Veronica Romanesco Hybrid

01733—(77 Day)—*Delicious, nutritious and pretty too!* Sweet, nutty flavor is milder than traditional cauliflower, so it is excellent for eating fresh with dips. Remains lime green when cooked. Use when heads are small. Heat tolerant. Recommended for fall harvest.

(A) 1 Pkt. (20 seeds) \$4.95; 3+ \$4.55 ea

Celery

Start seed indoors February to April. Transplant outdoors when weather is warm and night temperatures no longer fall below 55°F, as cool temperatures will cause bolting. Fertilize heavily during and after planting and keep soil moist to produce the tastiest stalks. Approximately 50,000 seeds per ounce.

Tango

(80 Day)—*Early maturing and heavy-yielding celery.* The stalks are very smooth and high quality with excellent flavor. Tender, sweet and not stringy. Tolerates fusariums and performs well even when stressed by excess heat or moisture.

SILVER QUEEN

Sweet Corn

Over the years, sweet corn varieties have been developed to improve flavor, seed germination, flexibility of the harvest period and many other desirable characteristics. Plant early, midseason and late varieties to extend the corn season. Our (A) packets will plant 50-75 feet of row. Our (AC) packets will plant approximately ½ an acre. We recommend planting 20,000 to 25,000 seeds per acre. Watch for abbreviations (su) for normal varieties, (se) for sugary enhanced and (sh2) for supersweets to the right of each variety name. All sweet corn requires warm soil temperatures of at least 55°F or more for good germination and 65°F for supersweets.

SWEET CORN TYPES

Normal sweet corn varieties (designated **su**) offer traditional old-fashioned corn flavor and require isolation from **sh2** and **synergistic** sweet corns. The sugars in the kernels will convert to starch more rapidly than other types, so normal corns must be used quickly once mature.

Sugary Enhanced varieties (designated **se**) have a gene that increases tenderness and sweetness. The result is a sweet, creamy and tender kernel with a longer harvest period. Varieties designated **se** are hybrids that have **se** and **su** parents (a term called heterozygous). Some varieties are designated **se+** (or homozygous) which means they have two **se** parents for an increased degree of sweetness. Sugary enhanced varieties do not require isolation from normal (**su**) sweet corn, but should be isolated from (**sh2**) supersweets.

Super Sweet, Xtra Sweet or Shrunken varieties (designated **sh2**) have a 'shrunken' gene that enhances sweetness and produces kernels that are crisp and juicy. Holding qualities are excellent, up to 10 days longer than normal hybrids. Cross pollination between supersweets and other corns (including field corn) will result in a starchy, undesirable kernel in both. We recommend supersweets be planted at least 25 feet from other corns in the garden and 200 feet from varieties in acreage plantings.

Synergistics (designated **se/sh2**) are sweet corn hybrids with amazing quality and flavor. They are a combination of 75% **se** kernels and 25% **sh2** kernels. The result blends the natural corn flavor and tenderness of sugary enhanced (**se**) sweet corns with the higher sugar levels and better keeping qualities of the supersweet (**sh2**) types. Synergistic and **se** varieties can be grown together, but isolate synergistics from **su** and supersweet (**sh2**) varieties or the result will be tough, starchy kernels for both.

Quad Sweets are the latest generation of sweet corn hybrids, offering heirloom flavor with modern sweetness. Quad Sweets need to be isolated from **sh2** types by a minimum of 660 feet.

All sweet corn requires isolation from popcorn, ornamental types and field corn.

OPEN POLLINATED

Early Golden Bantam Yellow (su)

03914—(76 Day)—*Popular since the early 1900s.* Plants yield two or more 5-7 inch ears on 5-6 foot stalks. The 8-12 rows of golden-yellow kernels have old-fashioned sweet corn taste. Widely adaptable. (Not pictured).

UNTREATED SEED.

NORMAL (su) HYBRIDS

Jubilee Yellow (su)

01925—(85 Day)—*Natural corn flavor.* Jubilee's popularity with commercial canners makes it one of the most widely used hybrids in the world. It produces 8½-inch ears filled with deep, narrow, sweet and tender kernels. The 7 foot stalks often bear two ears. Quality holds over a long period. Excellent for freezing.

(A) 1 Pkt. (150 seeds) \$4.45; 3+ \$4.05 ea;

(C) 1,000 seeds \$18.95; 5+ \$16.95 ea;

(AC) 10,000 seeds \$114.95

Silver Queen White (su)

01870—(88 Day)—*The 'queen' of white sweet corns, popular for over 30 years.* Uniform 8-inch ears hold 14-16 rows of snow-white, sweet, tender kernels. Its superb quality holds for several days on the plant. Hefty 8-foot stalks are tolerant to Stewart's wilt and most leaf blights.

(A) 1 Pkt. (150 seeds) \$4.55; 3+ \$4.15 ea;

(C) 1,000 seeds \$19.45; 5+ \$17.45 ea;

(AC) 10,000 seeds \$117.95

NK199 Yellow (su)

01945—(84 Day)—*Big, blocky ears.* This main crop variety has a loyal following. It's well-suited for fresh use, canning or freezing. The 7½-8 inch ears are filled with 18-20 rows of sweet, tender, golden kernels. Sturdy 7½-8 foot stalks. (Not pictured).

(A) 1 Pkt. (150 seeds) \$3.95; 3+ \$3.65 ea;

(C) 1,000 seeds \$15.95; 5+ \$13.95 ea;

(AC) 10,000 seeds \$95.95

BUTTER & SUGAR

Butter & Sugar Bicolor (su)

01805—(75 Day)—*The standard of excellence in bicolor sweet corn.* Sturdy, vigorous, 5-6 foot stalks bear ears 7-8 inches long filled with white and gold kernels. Outstanding flavor, tenderness and sweetness.

(A) 1 Pkt. (150 seeds) \$4.55; 3+ \$4.15 ea;

(C) 1,000 seeds \$19.45; 5+ \$17.45 ea;

(AC) 10,000 seeds \$117.95

INFORMATION ON SWEET CORN SEED TREATMENT

Unless noted, our sweet corn is treated with a fungicide to improve germination in cold, wet soils. Wherever possible, other seed sold in our catalog is untreated.

BODACIOUS R/M

SUGARY ENHANCED (SE) HYBRIDS

Bodacious R/M Yellow (se+)

(75 Day)—*An unusual name widely recognized for outstanding eating quality.* Deep golden kernels are exceptionally tender with superior sweet flavor that holds well after harvest. The large 8-inch ears are filled tip to tip with 16-18 rows of deep, juicy kernels. Sturdy 7-7½ foot stalks. Highly resistant to common rust and maize dwarf mosaic virus

01904—TREATED—(A) 1 Pkt. (150 seeds) \$4.25; 3+ \$3.85 ea;

(C) 1,000 seeds \$17.95; 5+ \$15.95 ea; (AC) 10,000 seeds \$109.95

SUGAR BUNS

Sugar Buns Yellow (se+)

01966—(72 Day)—*Has a longer harvest period than any other early maturing sweet corn on the market.* The sweet kernels maintain their creamy, tender quality for up to 2 weeks in the field. The 7½ inch ears are filled with 14 rows of the narrow yet deep, delectable kernels that taste as good as the name sounds. Has intermediate resistance to Stewart's Wilt and Northern Corn Leaf Blight.

(A) 1 Pkt. (150 seeds) \$4.75; 3+ \$4.35 ea;

(C) 1,000 seeds \$20.25; 5+ \$17.75 ea; (AC) 10,000 seeds \$121.95

KANDY KORN EH

Kandy Korn EH Yellow (se)

01930—(85 Day)—*So delicious it's often requested by name.* Big 8-inch ears are filled with 14-16 rows of tender, creamy kernels that hold quality for a week or more after picking. Easy to identify by the 7-8 foot burgundy colored stalks and green husks flushed with red. Has good seedling vigor.

(A) 1 Pkt. (150 seeds) \$4.75; 3+ \$4.35 ea;

(C) 1,000 seeds \$18.95; 5+ \$16.95 ea; (AC) 10,000 seeds \$114.95

INCREDIBLE R/M

Incredible R/M Yellow (se+)

01926—(85 Day)—*Gourmet eating quality.* Perfect for both freezing and fresh eating, extra-large 9½-inch ears hold 18 rows of high quality, sweet and crisp kernels. Adaptable to a wide range of conditions, tall plants boast a high level of resistance to common rust and maize dwarf mosaic as well as intermediate resistance to Stewart's Wilt.

(A) 1 Pkt. (150 seeds) \$4.05; 3+ \$3.65 ea;

(C) 1,000 seeds \$17.25; 5+ \$15.25 ea;

(AC) 10,000 seeds \$104.95

SILVER KING

Silver King White (se+)

01866—(82 Day)—*Sweet, creamy, flavorful white kernels.* This top-notch white variety bears 8-inch ears lined with 16-18 rows of gourmet eating. Has all-around adaptability and disease resistance. The 6-7 foot plants are tolerant to Northern Corn Leaf Blight, Stewart's Wilt and common rust.

(A) 1 Pkt. (150 seeds) \$4.65; 3+ \$4.25 ea;

(C) 1,000 seeds \$19.75; 5+ \$17.75 ea;

(AC) 10,000 seeds \$119.95

TRINITY

Trinity Bicolor (se+)

01829—(70 Day)—*Superb sugary enhanced flavor and creamy, tender-crisp kernels.* Ears average 8 inches long and almost 2 inches in diameter, and are filled to the tips with 14 rows of bright yellow and pearly-white kernels. Good husk protection ensures ear quality. Suitable for mechanical harvest as well as home garden and roadside markets. Resistant to Stewart's Wilt and Northern Corn Leaf Blight.

(A) 1 Pkt. (150 seeds) \$4.95; 3+ \$4.55 ea;

(C) 1,000 seeds \$21.45; 5+ \$18.95 ea

Jung Jump-Start Sweet Corn Food

Strengthens roots for better water and nutrient absorption. Keeps plants green!

51028—Grow the best sweet corn ever using this water-soluble, high energy, 22-34-11 fertilizer. Apply at planting time or immediately after germination of the seed.

1 lb. bag \$10.95

PEACHES & CREAM MID EH

Peaches & Cream Mid EH Bicolor (se)

01813—(83 Day)—*Even the name sounds delicious!* This outstanding full-season bicolor produces perfect 8-8½ inch ears filled tip to tip with 18-20 rows of tender, buttery kernels that have great corn flavor and tenderness. Quality holds well after harvest. Long flags provide good cover for the ears. Roadside customers often request this well-known variety by name.

(C) 1,000 seeds \$20.65; 5+ \$18.15 ea;
(AC) 10,000 seeds \$124.95

NORTHERN XTRA SWEET

**SUPERSWEET (sh2)
HYBRIDS**

Northern Xtra Sweet Yellow (sh2)

01950—(67 Day)—One of the earliest Xtra Sweet varieties. Produces 9-inch ears filled end to end with 12-16 rows of sweet, crisp and juicy kernels. High quality holds for a long time after picking. Yields are excellent for an early variety. Sturdy 6-foot stalks.

(A) 1 Pkt. (150 seeds) \$5.15; 3+ \$4.65 ea;

(C) 1,000 seeds \$21.95; 5+ \$19.45 ea;
(AC) 10,000 seeds \$132.95

KRISPY KING

Krispy King Yellow (sh2)

01940—(78 Day)—Explosively crisp, sweet flavor. This is one of the most delicious sweet corns you'll ever eat! The 8-inch ears are filled to the tip with 18-20 rows of extra deep, extra sweet yellow kernels that hold their quality for a long time. Ears have a tight protective husk. Roadside markets report it's a customer favorite.

(A) 1 Pkt. (150 seeds) \$5.15; 3+ \$4.65 ea;

(C) 1,000 seeds \$21.95; 5+ \$19.45 ea;
(AC) 10,000 seeds \$132.95

SWEETIE 82

Sweetie 82 Yellow (sh2)

01975—(82 Day)—Sweetest of all and easiest to pick. Sweetie is two and one-half times sweeter than ordinary yellow corn. Ears are 6½-7 inches long with 14-18 rows of crisp, tender kernels that retain their flavor long after picking. The stalks have few suckers and are tolerant to rust.

(A) 1 Pkt. (150 seeds) \$4.25; 3+ \$3.85 ea;

(C) 1,000 seeds \$16.45; 5+ \$14.45 ea;
(AC) 10,000 seeds \$99.95

ILLINI XTRA SWEET

Illini Xtra Sweet Yellow (sh2)

01922—(85 Day)—Holds its 'supersweet' qualities for 48 hours or more after picking. This ensures plenty of time to process the crisp, delectable kernels for freezing. Sturdy plants often produce 2 or more 8-inch ears filled with 14-18 rows. Excellent choice for roadside stands.

(A) 1 Pkt. (150 seeds) \$4.75; 3+ \$4.35 ea;

(C) 1,000 seeds \$20.25; 5+ \$17.75 ea;
(AC) 10,000 seeds \$121.95

SUPER SWEET JUBILEE PLUS

**Super Sweet Jubilee
Plus Yellow (sh2)**

01970—(87 Day)—A 'supersweet' version of popular Jubilee. Sturdy stalks grow 7-9 feet tall bearing 8½-9 inch ears filled with 16-18 rows of tender, sugar sweet, crispy kernels.

(A) 1 Pkt. (150 seeds) \$5.65; 3+ \$5.15 ea;

(C) 1,000 seeds \$23.95; 5+ \$21.45 ea;
(AC) 10,000 seeds \$144.95

CATALYST XR

Catalyst XR Bicolor (sh2)

01803—(66 Day)—The earliest supersweet currently available. Doesn't sacrifice flavor for early maturity. Ears are fairly large for an early - 7½-8 inches - with 14-18 rows filled end to end with delectably sweet, flavorful kernels. Ideal for home gardeners and roadside stand marketers looking to get a jump on the sweet corn season. Resistant to common rust.

(A) 1 Pkt. (150 seeds) \$6.15; 3+ \$5.55 ea;

(C) 1,000 seeds \$26.25; 5+ \$23.25 ea;
(AC) 10,000 seeds \$157.95

Natural Sweet XR Bicolor (sh2)

(74 Day)—An organic sweet corn with exceptional eating qualities. Ears offer good husk protection, average at least 7½ inches long and are filled with 16-18 rows of very sweet, very tender kernels. (Not pictured).

04929—ORGANIC: (A) 1 Pkt. (150 seeds)

\$8.55; 3+ \$7.75 ea;
(C) 1,000 seeds \$38.95; 5+ \$34.95 ea;
(AC) 10,000 seeds \$274.95

NIRVANA

Nirvana Bicolor (sh2)

01844—(76 Day)—Exceptionally sweet with outstanding tenderness. Sturdy 7-foot stalks are high-yielding, producing loads of corn great for home gardeners and market growers. The 8-inch ears have 16-18 rows and are filled to the tip with sweet, juicy, yellow and white kernels. Very uniform and vigorous.

(A) 1 Pkt. (150 seeds) \$5.75; 3+ \$5.25 ea;

(C) 1,000 seeds \$24.45; 5+ \$21.95 ea;
(AC) 10,000 seeds \$147.95

AMERICAN DREAM

American Dream Bicolor (sh2)

(77 Day)—AAS judges selected this as a 'top pick' in summer trials. Ears average 7 inches and are filled to the tip with sweet, tender kernels. Strong, vigorous plants stand well and exhibit moderate resistance to Northern Corn Leaf Blight. Widely adaptable. A 2018 AAS National Winner.

01800—TREATED—(A) 1 Pkt. (150 seeds)

\$5.85; 3+ \$5.35 ea;
(C) 1,000 seeds \$24.95; 5+ \$21.95 ea;
(AC) 10,000 seeds \$149.95

03800—UNTREATED—(A) 1 Pkt. (150 seeds)

(C) 1,000 seeds \$26.95; 5+ \$23.95 ea;
(AC) 10,000 seeds \$159.95

ACes Bicolor (sh2)

01801—(78 Day)—Outstanding eating quality. Hefty, 8 inch ears hold 16 to 18 rows of juicy, tender kernels with a superior sweet 'corn' flavor. Dark husks offer excellent protection for the high quality ears and the sturdy plants have a great disease resistance package. Very popular for roadside stands.

(A) 1 Pkt. (150 seeds) \$5.75; 3+ \$5.25 ea;

(C) 1,000 seeds \$21.95; 5+ \$19.45 ea;
(AC) 10,000 seeds \$132.95

ACES

GLACIAL

Glacial White (sh2)

01860—(76 Day)—Superior flavor and texture. Dark green husks provide excellent coverage for the long, hefty 8-inch ears. Each ear holds 16-18 rows filled to the tip with delectable, creamy white kernels that possess a superior sweet flavor and wonderful crisp, yet tender, texture. Highly recommended.

(A) 1 Pkt. (150 seeds) \$5.45; 3+ \$4.95 ea;

(C) 1,000 seeds \$23.95; 5+ \$21.45 ea;
(AC) 10,000 seeds \$144.95

ROBUST WHITE HYBRID

PUFFY POP HYBRID

MONTANA MORADO™

GLASS GEM

Popcorn

Get delicious, healthy popcorn fresh from your garden. Some varieties can even be used for colorful decorations. Sow popcorn around the middle of May, about ½-inch deep in hills of 3-4 seeds. Harvest when the kernels on the ears are dry and glossy and the stalks and leaves have dried completely. Let dry in an airy place. When dry, husk, strip, pop and enjoy. 1½ ounces plants about 100 feet of row.

Robust White Hybrid

01783—(104 Day)—*Expect big yields of large, well-developed ears.* Has good stalk strength. Enjoy delicious, tender white popcorn free from hulls and unpopped kernels.

(A) 1 Pkt. (1½ oz.) \$5.25; 3+ \$4.75 ea;
(N) ½ lb. \$13.95; 2+ \$12.95 ea

Robust Yellow Hybrid

01782—(103 Day)—*Crisp and tender, fluffy, white popcorn.* Strong stalks tend to produce double ears, resulting in high yield potential. Well-adapted to northern growing areas. (Not pictured).

(A) 1 Pkt. (1½ oz.) \$4.95; 3+ \$4.55 ea;
(N) ½ lb. \$12.15; 2+ \$11.20 ea

MINIATURE RAINBOW

Miniature Rainbow

01772—(110 Day)—*Tiny, 3-5 inch ears are filled with shiny kernels in a wide range of colors.* A small percentage of the husks are colored. Averages 400 seeds per ounce.

(A) 1 Pkt. (1 oz.) \$4.25; 3+ \$3.85 ea;
(M) ¼ lb. \$9.75; 2+ \$8.85 ea

Japanese White Hulless

01771—(85-105 Day)—*A popular favorite.* Medium-size kernels pop pure white and are very tender with no hard centers. Vigorous stalks produce 6-7 inch ears. (Not pictured).

(A) 1 Pkt. (1½ oz.) \$3.95; 3+ \$3.65 ea;
(M) ¼ lb. \$9.95; 2+ \$9.05 ea

STRAWBERRY

Strawberry

H **01795**—(105 Day)—*Great for crafting!* Cute little 2 inch, dark red, strawberry-shaped ears. About 340 seeds per ounce.

(A) 1 Pkt. (1 oz.) \$4.45; 3+ \$4.05 ea;
(M) ¼ lb. \$9.95; 2+ \$9.05 ea

Puffy Pop Hybrid

01776—(103 Day)—(Var. R400MR)—*A superior mushroom-type popcorn yielding large, golden-orange ears.* Popped kernels have a round, dense form perfect for caramel corn and candy. Tolerant to common rust, Northern Corn Leaf Blight, Grey Leaf Spot and Goss's Wilt.

(A) 1 Pkt. (1½ oz.) \$5.05; 3+ \$4.55 ea;
(N) ½ lb. \$12.75; 2+ \$11.80 ea

CALICO

Calico

01764—(100-105 Day)—*Colorful popcorn!* Larger than our Miniature Rainbow popcorn, these colorful 5-8 inch ears can be popped into delicious popcorn after they've decorated your house for the fall season. Expect a wide range of gorgeous colors and combinations.

(A) 1 Pkt. (1 oz.) \$4.95; 3+ \$4.55 ea;
(M) ¼ lb. \$9.55; 2+ \$8.65 ea

EARLY PINK

Early Pink

01790—(85-95 Day)—*A great choice for Northern growers.* Pink and mauve-blend ears average 5-7 inches long. Use for decorations in the fall and then popcorn later. Stalks grow 5-7 feet tall and produce 1-2 ears each.

(A) 1 Pkt. (1 oz.) \$4.95; 3+ \$4.55 ea;
(M) ¼ lb. \$10.95; 2+ \$9.95 ea

Little Stripper Popcorn Sheller

54048—This small, light-weight, cast aluminum tool shells every kernel off the cob with an easy twisting motion.
Each \$11.95; 2+ \$10.95 ea

Ornamental & Grain Corn

Montana Morado™ Maize

01761—(80-110 Day)—*Dark purple, almost black kernels are loaded with antioxidants.* Developed to mature quickly and thrive in short-season areas, this highly pigmented corn grinds easily and is delicious almost any way it's used, especially in corn bread. Attractive ears are long and cylindrical. Hand-selected by Dave Christensen out of his Painted Mountain corn.

(A) 1 Pkt. (100 seeds) \$6.15; 3+ \$5.55 ea;
(W) 500 seeds \$17.25

COLORED BROOM

Colored Broom Corn

01765—(110 Day)—*Not a true corn, but it grows like corn without ears.* The "tassel" is a tall spray of seed heads 24-36 inches long that can be cut and dried for craft creations and bird food. Shades of red, brown, purple and black. Grows 6-8 feet tall. About 1,400 seeds per ounce.

(A) 1 Pkt. (400 seeds) \$3.55; 3+ \$3.25 ea;
(L) oz. \$7.95; 2+ \$7.30 ea

FIESTA HYBRID

Fiesta Hybrid Ornamental Corn

01773—(95-100 Day)—*Produces shorter stalks that are less susceptible to wind damage.* Eight-inch ears are packed with brightly colored kernels of yellow, red, white, blue and purple.

(A) 1 Pkt. (1 oz.) \$3.65; 3+ \$3.35 ea;
(M) ¼ lb. \$9.25; 2+ \$8.35 ea

BLOODY BUTCHER

Bloody Butcher Dent Corn

H **01762**—(100-110 Day)—*A dent corn grown since the mid-1800s.* Large 8-12 inch ears are deep red with darker accents of reddish-black. Produces 2 or more ears per stalk.

(A) 1 Pkt. (1 oz.) \$4.35; 3+ \$3.95 ea;
(M) ¼ lb. \$9.45; 2+ \$8.55 ea

EARTH TONES

Earth Tones Dent Corn

01767—(90 Day)—*Pretty, pastel colors.* A unique ornamental dent corn with earth tones that include pinks, blues and greens. Large 8-10 inch ears.

(A) 1 Pkt. (1 oz.) \$4.45; 3+ \$4.05 ea;
(M) ¼ lb. \$9.95; 2+ \$9.05 ea

Glass Gem Corn

(100 Day)—*Shiny, brightly colored kernels are irresistible.* Originally selected from crosses made between several Pawnee and Osage corn varieties. Sturdy plants grow 6-8 feet tall and are extremely productive with ears averaging 7-8 inches in length. Dry and use as decorations or popcorn, or grind for flour.

01766—(A) 1 Pkt. (1 oz.) \$5.55; 3+ \$5.05 ea;
(M) ¼ lb. \$12.95; 2+ \$11.95 ea

04930-ORGANIC—(A) 1 Pkt. (1 oz.) \$7.35;
3+ \$6.65 ea; **(M)** ¼ lb. \$22.95

AUTUMN EXPLOSION HYBRID

PAINTED MOUNTAIN

Autumn Explosion Hybrid Corn

01768—(100 Day)—*Highly ornamental.* This special strain produces large, calico ears in a wide range of beautiful colors and patterns. About 15% have decorative purple husks. Easy to grow.

(A) 1 Pkt. (1 oz.) \$4.35; 3+ \$3.95 ea;
(M) ¼ lb. \$9.95; 2+ \$9.05 ea

Painted Mountain Corn

(80-100 Day)—*A fantastic composite of heirloom corns, hand-selected and maintained by Dave Christensen of Big Timber, MT.* Super-hardy, frost- and drought-tolerant plants grow only 4-6 feet tall and produce ears up to 12 inches long filled with bright, colorful kernels. Grown worldwide as a nutritious grain with a protein content up to 14%. Great for grinding, but also excellent fresh in soup, chowders and hominy.

04931-ORGANIC—(A) 1 Pkt. (50 seeds) \$4.45; 3+ \$4.05 ea;
(W) 500 seeds \$13.95; 2+ \$12.95 ea

JAPANESE STRIPED

BLUE DENT

Japanese Striped Maize

01777—(85 Day)—*This beautiful ornamental can also be used as a dent corn suitable for grinding.* The leaves are striped with green, white, yellow and pink. Tassels are dark purple and the kernels are burgundy. The 5-6 foot plants develop best color when spaced 12-18 inches apart.

(A) 1 Pkt. (25 seeds) \$3.45; 3+ \$3.15 ea

Blue Dent Corn

H **01763**—(110 Day)—*Intense royal blue kernels.* Ears 8-0 inches long have 8 rows of smooth kernels. This ancient flint corn has delicious, unique flavor unmatched by other corns, and is excellent for flour.

(A) 1 Pkt. (1 oz.) \$4.95; 3+ \$4.55 ea;
(M) ¼ lb. \$11.75; 2+ \$10.80 ea

Cucumbers

For an early crop, start seeds in Jiffy® peat pots 3-4 weeks prior to outdoor planting. Set plants out after danger of frost is past. Seeds sown directly in the soil should be planted when the soil warms to 60°F. Plant 5-6 seeds in hills 4-5 feet apart, thinning to 3 plants. To save space and get straight cucumbers, grow on a trellis (page 53) or netting. Approximately 1,000 seeds per ounce.

BUSH CUCUMBERS

Pick A Bushel Hybrid

(50 Day)—*Plant your own pickle factory.* Be prepared to pick a lot of cukes from these compact plants. The medium green, white-spined fruits are sweet, firm and crisp. Pick around 50 days for 3 inch, gherkin size, or leave until 6 inches in length for slicers. The semi-bush vines grow only 24 inches long, so they are well-suited for growing in patio containers as well as the garden. Plants have excellent heat tolerance and disease resistances to CMV, scab and MMV. 2014 AAS Regional Winner.

02039—(A) 1 Pkt. (30 seeds) \$3.75; 3+ \$3.45 ea;

(G) 250 seeds \$7.95; 2+ \$7.25 ea

04938—ORGANIC—(A) 1 Pkt. (30 seeds) \$4.25; 3+ \$3.85 ea;

(G) 250 seeds \$8.15; 2+ \$7.35 ea

IZNIK HYBRID

SPACEMASTER 80

Iznik Hybrid

02019—(60 Day)—A gourmet mini cuke from Germany. Thin-skinned, smooth, crisp cucumbers are prime when harvested at 3-4 inches. All-female, short-vined plants have small leaves and because they are parthenocarpic (do not require pollination to set fruit), they are extremely high-yielding, even under adverse conditions or without bee activity. Grows well in containers, trellis gardens, greenhouses and regular gardens. Great used fresh or for pickles.

(A) 1 Pkt. (10 seeds) \$6.65; 3+ \$6.05 ea

Spacemaster 80

02152—(60 Day)—An easy-to-grow cuke for containers and small gardens. Compact vines grow only 36 inches long, yet produce an abundance of slender, 7-8 inch, dark green fruits with a crisp, never-bitter taste. Adapts to a wide range of climates and carries resistance to mildew, cucumber mosaic virus and scab.

(A) 1 Pkt. (40 seeds) \$3.15; 3+ \$2.85 ea;

(G) 250 seeds \$6.95; 2+ \$6.35 ea

EVERSWEET HYBRID

Eversweet Hybrid

02114—(55 Day)—Great tasting cukes on a nice, semi-bush plant. Restricted vines grow only 2-3 feet long and produce both male and female flowers ensuring an excellent harvest over a long period. Fruits are sweet and crisp with smooth, dark green skin and very few white spines. Harvest at any length from 4-8 inches. Great for slicing and snacking.

(A) 1 Pkt. (30 seeds) \$3.75; 3+ \$3.45 ea

Salad Bush Hybrid

02230—(57 Day)—Needs only 2 square feet of garden space. Also does well for container gardening and hanging baskets. Attractive dark green, 8-inch fruits are tender and crisp. The compact plants have improved disease tolerance. 1988 AAS Winner. (Not pictured).

(A) Pkt. (20 seeds) \$6.25; 3+ \$5.65 ea

MINI CUCUMBER

EASY SNACK HYBRID

Easy Snack Hybrid

02112—(50 Day)—(Brand of Patron)—Plant this cucumber for tender, sweet snacks. Parthenocarpic plants produce small fruits that can be harvested starting at 3½ inches in length, a perfect size for snacking. There's no need to peel the thin skin, and the flesh is wonderfully flavored and never bitter, no matter what size you harvest. Expect excellent yields.

(A) 1 Pkt. (20 seeds) \$6.15; 3+ \$5.55 ea

PICKLING CUCUMBERS

Alibi Hybrid

02002—(50 Day)—These plants are baby pickle factories. If you keep picking, they'll keep producing. Harvest the smooth fruits at 2 inches for baby gherkins or full-grown at 3-4 inches. In addition to being excellent for pickling, they're also delicious for fresh eating. Plants have a very high level of disease resistance.

(A) 1 Pkt. (30 seeds) \$3.95; 3+ \$3.65 ea;

(G) 250 seeds \$7.95; 2+ \$7.25 ea

ARTIST HYBRID

Artist Hybrid

02006—(45 Day)—Yields are better than popular favorite Alibi. These fine-spined cukes have an excellent non-bitter flavor and can be enjoyed fresh or made into pickles. Parthenocarpic plants are highly resistant to cucumber mosaic virus with additional resistance to other common cucumber ailments.

(A) 1 Pkt. (30 seeds) \$4.65; 3+ \$4.25 ea;

(G) 250 seeds \$16.95; 2+ \$15.50 ea

DIAMANT HYBRID

CHICAGO PICKLING

Diamant Hybrid

(47 Day)—A disease-resistant pickler with great taste. This early ripening cuke has crisp texture and mild flavor that's a delight for both fresh eating and pickling. The dark green 4-5 inch fruits are referred to as smooth cucumbers, but do have tiny white spines. Space-saving, compact plants do not require pollination to set fruit. Resistance to downy and powdery mildew, cucumber mosaic virus and cucumber scab keeps them bearing all summer.

02014—(A) 1 Pkt. (15 seeds) \$4.55;

3+ \$4.15 ea;

(V) 100 seeds \$17.05; 2+ \$15.35 ea

04934—ORGANIC—(A) 1 Pkt. (15 seeds) \$5.05

Chicago Pickling

02012—(55-60 Day)—Most widely used pickler since its introduction in 1888. Blocky, cylindrical, medium-green fruits are well-warted and thin-skinned with fine flavor and quality. Fruits grow 6-7 inches long and 2½ inches across, but can be picked smaller. Good for all types of pickles. Prolific yields. Disease-resistant. Black spined.

(A) 1 Pkt. (200 seeds) \$3.75; 3+ \$3.45 ea;

(C) 1,000 seeds \$9.95; 2+ \$9.05 ea

County Fair Imp. Hybrid

02015—(52 Day)—One of the only cucumbers resistant to bacterial wilt. Has nearly 100% female flowers and sets fruit without a pollinator (parthenocarpic). The 6-8 inch cukes are almost seedless if kept isolated from other cucumbers. Sweet, non-bitter flavor and crunchy texture make it a good slicer too. Very productive with resistance to multiple diseases.

(A) 1 Pkt. (20 seeds) \$3.45; 3+ \$3.15 ea

Gherking Hybrid

02026—(50-55 Day)—Get perfect pickling cukes with this variety. Vining plants produce loads of 3-5 inch fruits that won't turn bitter if left on the vine too long. The ability to set fruit without pollination and high resistance to scab and cucumber mosaic virus should allow almost anyone to grow this cucumber.

(A) 1 Pkt. (20 seeds) \$4.75; 3+ \$4.35 ea

CUCUMBER SAMPLER

02194 (X)—1 each of Spacemaster 80, Summer Dance Hybrid (page 53), and Gherking Hybrid, a \$12.45 value for \$10.60

HOMEMADE PICKLES

Homemade Pickles

(55 Day)—Ideal for all your favorite pickle recipes. Disease-resistant, vigorous, high-yielding plants bear uniform, medium green fruits with small white spines. Harvest when small for tiny sweets, at 5-6 inches for robust dills and spears, or any size in between. The interior flesh is solid, crisp and delicious.

02020—(A) 1 Pkt. (100 seeds) \$3.55;

3+ \$3.25 ea;

(C) 1,000 seeds \$7.95; 2+ \$7.25 ea

04936—ORGANIC—(A) 1 Pkt. (100 seeds) \$4.25

H-19 LITTLE LEAF

H-19 Little Leaf

02005—(62 Day)—Small leaves make it easy to find the fruit. Prolific yields. Compact vines set 20-30 bright green, blocky fruits per plant at one time. Produces 3-5 weeks longer than most varieties. Tolerates heat, drought and cool temperatures; has resistance to many cucumber diseases including bacterial wilt; and it has the ability to set fruit without pollination (parthenocarpic).

(A) 1 Pkt. (30 seeds) \$3.45; 3+ \$3.15 ea;

(U) 750 seeds \$11.95; 2+ \$10.95 ea

SLICING CUCUMBERS

Summer Dance Hybrid

02159—(70 Day)—*A cucumber that's near perfection!* Skin is so thin on these Japanese burpless cucumbers there's no need to peel them. Fruits grow 10-12 inches long, 1-inch wide and are very straight for such a long cucumber. They're incredibly crisp with sweet, mild, refreshing flavor. The vigorous plants set many lateral vines for high yields. Resistant to both downy and powdery mildew.

(A) 1 Pkt. (20 seeds) \$4.55; 3+ \$4.15 ea;
(G) 250 seeds \$19.95; 2+ \$17.95 ea

Sweet Success Hybrid

02170—(58 Day)—*The ultimate burpless cucumber for growing inside or outdoors.* Produces loads of long, straight, spineless fruits 12-14 inches long with a 2½-inch diameter. Sweet, mild flesh is seedless if grown away from other cucumbers, as it sets quality fruit without pollen. Good disease resistance. 1983 AAS Winner.

(A) 1 Pkt. (15 seeds) \$6.95; 3+ \$6.35 ea;
(V) 100 seeds \$26.95; 2+ \$24.50 ea

Armenian Pale Green

02101—(50-75 Day)—*Attractive when cut into slices, with a thin skin that is easily digested.* The pale green, ribbed fruits have a mild, sweet flavor and are at their prime when picked at 12-18 inches long. Vines are quite productive. Actually a melon, but due to its looks, we find it far less confusing to list it as a cucumber.

(A) 1 Pkt. (30 seeds) \$2.95; 3+ \$2.75 ea

Sweet Slice Hybrid

02160—(62 Day)—*One of our most popular burpless cucumbers.* This productive hybrid has mild flavor and no trace of bitterness – you won't find a burp in a bushel. Vigorous vines produce a heavy crop of slim, medium-dark green fruits 10-12 inches long. Flesh is pure white, crisp and tender with thin skin. Has excellent overall disease resistance.

(A) 1 Pkt. (30 seeds) \$6.75; 3+ \$6.15 ea;
(G) 250 seeds \$29.95; 2+ \$27.95 ea

Muncher

02133—(60-65 Day)—*Delicious burpless cukes for pickling and munching.* Nearly spineless fruits are crisp and tender with mild, non-bitter flavor. Harvest when 4-6 inches long for pickling or grow to 6-8 inches for salads and slicing. High yielding vines.

(A) 1 Pkt. (30 seeds) \$3.25; 3+ \$2.95 ea;
(W) 500 seeds \$5.95; 2+ \$5.45 ea

Straight Eight

H (58 Day)—*One of the best-known home garden slicers.* Since its introduction as an AAS winner in 1935, this variety has been a standard for slicing, pickling, and salads. The dark green, white spined, 6-8 inch blocky fruits are excellent quality with a small seed cavity and mild flavor. Yields well. (Not pictured).

02154—**(A) 1 Pkt. (100 seeds) \$3.45; 3+ \$3.15 ea;**
(C) 1,000 seeds \$7.95; 2+ \$7.25 ea
04935—ORGANIC—(A) 1 Pkt. (100 seeds) \$3.95; 3+ \$3.65 ea
(C) 1,000 seeds \$8.45; 2+ \$7.65 ea

Tanja

02178—(58 Day)—*The ultimate burpless cucumber – completely bitter-free.* Slim fruits up to 14 inches long have dark green skin and tender, crisp flesh that has outstanding flavor. Plants yield prolifically and continue to bear over a long harvest period. It's widely adapted for successful growing almost anywhere. Also suitable for growing in greenhouses.

(A) 1 Pkt. (30 seeds) \$3.35; 3+ \$3.05 ea

Diva

02108—(58 Day)—*High yields of sweet, thin-skinned fruits.* Bright green skins are spineless, bitter-free and very tender when harvested at 4-6 inches. The all-female flowers don't require pollen to set fruit, so yields are higher and fruits are nearly seedless. The 5-6 foot vines have resistance to scab and tolerance to powdery and downy mildew. 2002 AAS Winner.

(A) 1 Pkt. (20 seeds) \$3.95; 3+ \$3.65 ea;
(G) 250 seeds \$9.25; 2+ \$7.75 ea

Tasty Green Hybrid

02180—(62 Day)—*One of the first burpless cucumbers and still tops for flavor and yield.* The crisp, juicy, tender fruits are slender, dark green and smooth skinned with small white spines. Plants have good disease resistance. A trellis is recommended to yield maximum crops of 9-10 inch straight, clean fruits.

(A) 1 Pkt. (30 seeds) \$4.75; 3+ \$4.35 ea;
(S) 200 seeds \$12.95; 2+ \$11.95 ea

Eureka Hybrid

02018—(57 Day)—*One of the most disease-resistant cukes on the market.* It's great for salads when picked up to 7 inches long and a marvelous pickler at 1½-5 inches. The disease-resistant vines produce both male and female flowers so they set loads of the dark green, flavorful fruits. Bears early and prolifically.

(A) 1 Pkt. (30 seeds) \$4.25; 3+ \$3.85 ea;
(G) 250 seeds \$13.95; 2+ \$12.50 ea

Marketmore 76

02129—(68 Day)—*A popular main crop slicer well adapted to northern gardens.* High quality, glossy, dark green, 8-9 inch fruits are slender and uniform with sweet, mild flavor. Plants are highly disease-resistant and bear over a long period. White spined.

(A) 1 Pkt. (100 seeds) \$3.25; 3+ \$2.95 ea;
(C) 1,000 seeds \$5.95; 2+ \$5.45 ea

Dill

This tangy herb provides seeds and greens that are widely used in making dill pickles and for flavoring salad dressings, vinegar and other foods. Direct sow outdoors or start indoors for earlier harvesting. About 22,000 seeds per ounce.

Dukat

02252—(70 Day)—*Produces more foliage before forming seed than most dills.* Flower heads are up to 10 inches across. Highly flavored. Uniform height makes harvesting easier.

(A) 1 Pkt. (1,000 seeds) \$3.75; 3+ \$3.45 ea;
(K) ½ oz. \$7.95; 2+ \$7.25 ea

Long Island Mammoth

H (70 Day)—*Grown by generations of gardeners.* Vigorous 2-3 foot plants produce large umbels covered with masses of seed. Matures quickly. (Not pictured).

02260—**(A) 1 Pkt. (1,000 seeds) \$3.45; 3+ \$3.15 ea;**
(K) ½ oz. \$4.95; 2+ \$4.55 ea

04941—ORGANIC—(A) 1 Pkt. (1,000 seeds) \$3.45; 3+ \$3.15 ea

Diana

02256—(70 Day)—*Our longest-lasting dill.* This variety imported from Germany has an upright, compact growth habit and a very dense leaf mass. The dark blue-green ferny foliage is highly aromatic and flavorful. Very late to bolt. Ornamental yellow flowers are also pretty fillers in bouquets.

(A) 1 Pkt. (1,000 seeds) \$3.85; 3+ \$3.55 ea;
(K) ½ oz. \$6.95; 2+ \$6.35 ea

A-Frame Trellis

GREAT FOR CUCUMBERS AND SQUASH
54274—This pyramid trellis gets plants off the ground, promoting healthier growth with better fruits and reducing pests and disease. The green metal frame measures 58" tall by 52" long and quickly folds and unfolds for easy setup and storage.

Each \$54.95; 2+ \$49.95 ea

NADIA HYBRID

Eggplant

Eggplant thrives at high temperatures and matures in midsummer. Start seeds 8-9 weeks before setting out plants. Be sure the ground is warm as they are very susceptible to cold damage.

Nadia Hybrid

02285—(65-70 Day)—*Our recommended replacement for 'Epic.'* Consistently productive, upright plants bear dark purple, 7-8 inch teardrop-shaped fruits that are firm at harvest, providing a good shelf life. Perfect for slicing and grilling or your favorite Italian recipes.

(A) 1 Pkt. (25 seeds) \$3.95; 3+ \$3.65 ea

ASIAN DELITE HYBRID

MILLIONAIRE HYBRID

Asian Delite Hybrid

02269—(50-55 Day)—*Our earliest maturing eggplant.* These bright purple, elongated fruits can be harvested anywhere from 5-12 inches long, and they stay tender and non-bitter no matter the size. Tender skin that does not require peeling makes them great for dicing into a stir-fry or slicing lengthwise for grilling. Upright, semi-spineless plants are quite prolific.

(A) 1 Pkt. (25 seeds) \$4.95; 3+ \$4.55 ea

Millionaire Hybrid

02288—(63 Day)—*One of the most popular Asian-type eggplants.* Long, slender fruits grow up to 12 inches long with a 1½ inch diameter and have smooth, tender skin of glossy, dark purplish-black. The creamy flesh is nearly seedless and has delicious flavor that makes it great for stir-fry and other dishes. Upright plants grow 24-30 inches tall and are very productive.

(A) 1 Pkt. (25 seeds) \$3.55; 3+ 3.25 ea

Sprouting Seeds

Whole, natural, untreated and high germinating. Sprout mix includes all five sprouting seeds offered.

½ lb.

04405—ALFALFA (N) \$12.45; 2+ \$11.45 ea

04407—BROCCOLI (N) \$8.25; 2+ \$7.45 ea

04410—CHINESE CABBAGE (N) \$8.15; 2+ \$7.35 ea

04430—RADISH (N) \$6.15; 2+ \$5.55 ea

04445—SPROUT MIX (N) \$9.45; 2+ \$8.55 ea

WILDFIRE®

Greens & Garnishes

Arugula

01010—WILDFIRE®—(35-49 Day)—*Very slow to bolt.* Selected for its distinct, hot and peppery flavor, Wildfire® will add a special zing to your salads, sandwiches and pasta dishes. The serration on the leaves is not uniform, lending the upright, vigorous plants a rather wild appearance.

(A) 1 Pkt. (2,000 seeds) \$3.55; 3+ \$3.25 ea

FLASH HYBRID

Collards

01746—FLASH HYBRID—(75 Day)—*Highly bolt resistant.* Upright, vigorous plants produce smooth leaves in a rich, dark green. Harvest entire plants or cut individual leaves and enjoy fast regrowth for an extended harvest period. Excellent for bunching, fresh use and preserving so you can enjoy it all winter long.

(A) 1 Pkt. (300 seeds) \$5.75; 3+ \$5.25 ea

Hot House Mini-Greenhouse

86495—*Specially designed to increase germination success.* It provides gentle warmth to the planting bed and controls humidity. The exceptionally tall 6½" dome is excellent for taller starts and cuttings. Two ventilation points in the dome's top help control humidity to foster optimum growth. The kit includes a UL-listed waterproof heat mat that maintains an ideal temperature range for seed germination, a clear dome lid with dual vent points, an 11" x 22" watertight base tray and a 72-cell seeding insert. Instructions included.

Each \$52.95

Kitchen Crop Sprouter

54115—*Grow fresh, nutritious sprouts anytime of the year!* Germinate up to 4 kinds of sprouts at one time. Fill the top tray with water twice a day and built-in siphons keep the sprouts moist automatically. Harvest fresh sprouts in just 3-10 days, depending on the variety. Dishwasher safe.

Each \$25.95

DARK GREEN ITALIAN

MOSS CURLED

Parsley

DARK GREEN ITALIAN—(*Petroselinum crispum neapolitanum*)—(78 Day)—*Flavor is more distinctive than curled types.* An improved plain leaf parsley with flat, glossy, dark green leaves. Grows 12-15 inches tall.

02815—(A) 1 Pkt. (1,000 seeds) \$3.25; 3+ \$2.95 ea

04966—ORGANIC—(A) 1 Pkt. (1,000 seeds) \$4.75; 3+ \$4.35 ea

02830—MOSS CURLED—(*Petroselinum crispum*)—(75 Day)—*Decorative, curled leaves.* Finely cut, curly leaves hold their fresh appearance. Excellent for flavoring and garnish. Use fresh or dried. 10-12 inches tall.

(A) 1 Pkt. (1,000 seeds) \$3.15; 3+ \$2.85 ea

FIERO HYBRID

BABY LEAF ZESTY MIX

Radicchio

03301—FIERO HYBRID—(66 Day)—*Elongated Treviso type.* Purple heads have beautiful contrasting white ribs. Dependable and early.

(A) 1 Pkt. (50 seeds) \$5.95; 3+ \$5.45 ea

Mesclun Mixes

02569—BABY LEAF ZESTY MIX—(20-35 Day) *A tangy mix of greens suited to baby leaf harvest.* Includes many flavors, colors and textures, including tangy arugula, mustard, chard, spinach and lettuces. Growth rates vary so your salads will always be a little different. *Cannot ship to: FL, HI.*

(A) 1 Pkt. (1,000 seeds) \$3.35; 3+ \$3.05 ea; (K) ½ oz. \$6.75; 2+ \$6.15 ea

ALFRESCO MIX

CITY GARDEN BLEND

SimplySalad® Mixes

(28 Day)—*New technology packs several species of greens into one easy-to-sow pellet.* Plant only 2 or 3 pellets in a 6 inch or larger container and in about 5-6 weeks you can begin harvesting fresh greens. Cut back to 2 inches and allow to regrow, then cut again. *Cannot ship to: FL, HI.*

02542—ALFRESCO MIX—Red and green leaf lettuces combined with arugula, endive and radicchio for added zest give a Mediterranean flavor and feel.

02543—CITY GARDEN BLEND—A traditional blend of lettuces in a variety of colors and textures. Makes tasty, attractive salads sure to impress.

PRICE OF SimplySalad® MIXES (mix or match):

(A) 1 Pkt. (10 multi-pellets) \$4.55; 3+ \$4.15 ea

MICROGREENS

Microgreens

Grow fresh greens indoors, all year around. Unlike sprouts, microgreens are allowed to develop 1-2 sets of true leaves before harvest, and you eat the stem and the leaves, not the seed and stem. They offer a fresh, nutritious burst of flavor to salads, sandwiches and cooked dishes. We recommend using a soilless growing medium like Terrafibre™ mats (below) or our Jung Family Garden Seed Starting Mix (page 42) to decrease the risk of soilborne disease. *Detailed growing instructions can be downloaded from our website in the Microgreens category.*

FAST GROWING

Begin to harvest in 10-15 days

04403—ARUGULA—Purple stems offer a spicy, nutty flavor. An ounce of seed will sow approximately 3 flats.

(L) oz. \$5.95; 3+ \$4.45 ea

04408—BROCCOLI—Dark green leaves and long stems have a mild flavor. An ounce of seed will sow approximately 2 flats.

(L) oz. \$4.95; 3+ \$4.45 ea

04432—RADISH, DAIKON—Spicy flavored white stems and green leaves. An ounce of seed will sow approximately 1 flat.

(Y) 2 oz. \$5.95; 3+ \$4.45 ea

SLOW GROWING

Begin to harvest in 16-25 days

04406—BASIL, ITALIAN LARGE LEAF—Shiny green leaves add a sweet and spicy flavor. An ounce of seed will sow approximately 5 flats.

(L) oz. \$5.25; 3+ \$4.75 ea

04412—CILANTRO, MONOGERM—Germinates faster and sheds its seed coat more easily than standard cilantro. Green leaves and stems are cilantro flavored. An ounce of seed will sow approximately 1 flat.

(Y) 2 oz. \$7.15; 3+ \$6.45 ea

04415—DILL—Green, feathery leaves have a mild dill flavor. An ounce of seed will sow approximately 5 flats.

(L) oz. \$5.25; 3+ \$4.75 ea

TERRAFIBRE™ GROW MATS

MICROGREENS STARTER KIT

Terrafibre™ Grow Mats

53249—*Ideal for growing microgreens.* These grow mats are made with the fibrous byproduct of industrial hemp plants. They are 100% biodegradable and compostable once you harvest your microgreens. Simply sprinkle your seeds on the mat, press down and water. Has excellent water absorption capability.

Pkg. of 10 mats \$31.95

Microgreens Starter Kit

51425—*Just add seed!* This kit includes a 10-count package of Terrafibre™ grow mats, one 11" x 21¼" black flat and one clear humidity dome.

Price per kit \$35.95

ITALIAN LATE

ELEPHANT

Garlic

Garlic can be planted in spring or fall, but the largest bulbs are produced from fall planting. If overwintering, mulch heavily in colder areas. Harvest fall-planted bulbs the following summer. Spring planting should be done as early as possible to harvest the largest bulbs in fall. Add a generous amount of compost to the soil before planting. Three bulbs separated into cloves will plant about 5-10 feet of row. Space Elephant Garlic cloves about 8-10 inches apart in the row. *Cannot ship to: AK, HI, ID, WA.*

Italian Late

04510—A softneck artichoke garlic that stores for 6-9 months. Tight, light-colored wrappers surround 8-12 fat, round outer cloves. Has pleasing rich garlic flavor. Very productive.
(N) ½ lb. \$18.95; 2+ \$16.95 ea

Elephant

04516—Very mild flavor is ideal for soups, salads and sauce. Leaves no garlic aftertaste. Actually a member of the leek family. Huge bulbs weigh up to one pound or more, each with 5-7 cloves. We send extra-large cloves.
(N) ½ lb. \$18.95; 2+ \$16.95 ea

CALIFORNIA WHITE

SILVER ROSE

California White

04512—An easy-to-grow garlic that stores well. The large bulbs can be separated into 10-20 cloves. Nice zesty flavor.
(N) ½ lb. \$18.95; 2+ \$16.95 ea

Silver Rose

04523—Stores up to 8 months. This softneck silverskin garlic makes beautiful braids with its 10-12 rose-colored cloves encased in bright white wrappers. Widely used by gourmet cooks who know and use garlic.
(N) ½ lb. \$18.95; 2+ \$16.95 ea

Ginger

04473—PERUVIAN—(*Zingiber officinale*)—Zones 8-11—Grow fresh ginger right in your home. This high-yielding variety has a bright flavor that adds just the right amount of heat and spice to sauces, soups, marinades, baked goods and more. Grow in pots – outside in filtered sunlight in summer and bring inside for the winter. Begin to harvest roots in 2 years – just reach into the pot and break off what you need. Ht: 3-4'. PP
1 plant \$12.95; 3+ \$10.95 ea

PERUVIAN

DAISY MIX

Fancy Gourds

Gourds are a vine crop that bears an abundance of ornamental, curious-shaped fruits which are prized for fall decorating. They are easy to grow, requiring the same culture as winter squash. Seed size varies from 125-500 seeds per ounce.

Daisy Mix

02322—(95 Day)—There is nothing else like them. The gourds in the picture were not waxed or painted, but are naturally shiny with the majority displaying a unique daisy pattern on the stem end. The colorful mix includes shades of orange, green, yellow and white with contrasting 'daisies.' The high-yielding plants produce best when not over-crowded.
(A) 1 Pkt. (30 seeds) \$5.75; 3+ \$5.25 ea;
(G) 250 seeds \$24.95; 2+ \$22.95 ea

AUTUMN WINGS BLEND

Autumn Wings Blend

02324—(100 Day)—Sure attention getters! These gourds are produced in many vibrant colors and unusual shapes. All display wings, and many are warty. Some are in the shape of 12-inch swans, others may be small spoons, pears and small to large bottles.
(A) 1 Pkt. (30 seeds) \$4.55; 3+ \$4.15 ea;
(K) ½ oz. \$13.25; 2+ \$12.25 ea

CUSTOMER FAVORITES GOURD SAMPLER

02319 (X)—1 each of Autumn Wings and Daisy, a \$10.30 value for **\$8.75**

HOARGARTH

Hoargarth

02317—(90 Day)—Delightfully bumped and warty, orange and green bicolor gourds will be a wonderful addition to Halloween displays. Semi-bush plants produce fruits 7 inches wide by 5 inches high. Dark green handles add to their spooky nature.
(A) 1 Pkt. (15 seeds) \$5.95; 3+ \$5.45 ea

GIZMO

Gizmo

02332—(90-100 Day)—Unique gourds for smaller gardens. Instead of vigorous vines, Gizmo produces its fruit on bush-type plants that take up much less room in the garden. The winged, hard-shelled gourds, 3-5 inches tall and 6-8 inches wide come in a variety of colors and combinations including dark green, orange, yellow, light green and white.
(A) 1 Pkt. (15 seeds) \$5.25; 3+ \$4.75 ea

LUNCH LADY

Lunch Lady

02333—(120 Day)—Don't let these giant warted gourds freak you out! They come in a variety of sizes that range from 5-20 pounds and the colors are just as variable. All have very hard shells and lots of warts to make them interesting.
(A) 1 Pkt. (25 seeds) \$5.05; 3+ \$4.55 ea;
(K) ½ oz. \$11.95; 2+ \$10.95 ea

SPECKLED SWAN

Speckled Swan

02347—(90-100 Day)—Great for crafts! A unique gourd 14-18 inches long and 6-8 inches across with a crookneck that widens near the tip creating the 'swans head'. Greenish skin has pale blotches.
(A) 1 Pkt. (25 seeds) \$3.85; 3+ \$3.55 ea;
(L) oz. \$11.75; 2+ \$10.75 ea

SUPER FREAK™ GREMLINS

Super Freak™ Gremlins

02331—(95-100 Day)—Unique and strangely beautiful. These 'freaks of nature' are bright, bold and crazy warty gourds 5-7 inches or more in size. They come in a variety of solid, striped and speckled patterns and a multitude of shapes – stars, wings, acorns, mushrooms, necks and more.
(A) 1 Pkt. (25 seeds) \$7.45; 3+ \$6.75 ea

BIRD HOUSE

Bird House

02325—(125 Day)—Now you can grow bird-houses in your garden. Fruits are just the right size for bluebirds, wrens and many others. Harvest when the smooth, greenish rind starts to turn tan. Allow to dry for crafts, birdhouses, etc.
(A) 1 Pkt. (25 seeds) \$4.75; 3+ \$4.35 ea

SUPER FREAK™ GOONIES

Super Freak™ Goonies

02336—(100 Day)—Just like 'Gremlins' gourd, only bigger! Bumped and warted gourds grow 8-12 inches or more in size and come in a crazy kaleidoscope of colors and shapes.
(A) 1 Pkt. (20 seeds) \$7.45; 3+ \$6.75 ea

GOBLIN EGGS

Goblin Eggs

02337—(80 Day)—Create fall displays and unique Easter eggs with these colorful egg-shaped gourds. The multi-stemmed bush plants are 3-4 feet across at maturity, each plant bearing a prolific supply of 2½ by 3 inch fruits that are strung like pearls along the stems. Fruits mature earlier than other gourds.
(A) 1 Pkt. (30 seeds) \$8.85; 3+ \$8.05 ea

WARTY MIX

Warty Mix

02339—(95-110 Day)—A colorful mix of heavily warted small and medium gourds in pear, spoon, and other shapes.
(A) 1 Pkt. (30 seeds) \$4.55; 3+ \$4.15 ea

SHENOT CROWN OF THORNS

GOURD MIXES AND BLENDS

02345—SHENOT CROWN OF THORNS—(95 Day)—Unusual gourds with unique, thorn-like projections in colors of white, yellow, orange and green, with and without stripes.

02340—MIXED GOURDS ALL TYPES—(95-125 Day)—A spectacular assortment of sizes, shapes and colors. (Not pictured).

PRICE OF ABOVE, 2 MIXES AND BLENDS (approximately 25 to 50 seeds per packet):

(A) 1 Pkt. \$4.15; 3+ \$3.75 ea;
(K) ½ oz. \$8.95; 2+ \$8.15 ea

Culinary Herb Seeds

All herb seeds are designated (A) for Annual or (P) for Perennial. For perennials, hardiness zones are noted.

UNLESS NOTED, PRICE OF HERB SEEDS ON PAGE 56 (mix or match):
(A) 1 pkt. \$3.70; 5+ \$3.30 ea; 10+ \$3.05 ea

02387-BASIL AROMA 2 HYBRID—(70 Day)—(*Ocimum basilicum*)—A true Genovese-type basil. Smooth leaves have a delicate taste and pleasant aroma. Slow-bolting plants are wonderful in the garden, but great for containers too. Good resistance to Fusarium Wilt. Ht: 22". **A**

(A) 1 Pkt. (100 seeds) \$4.25; 3+ \$3.85 ea

02354-BASIL DOLCE FRESCA—(60-80 Day)—(*O. basilicum*) Compact plants recover quickly from harvest and maintain an attractive shape that is perfect for patio containers. A Genovese-type, the sweet, tender leaves make outstanding pesto. A 2015 AAS Winner. Ht: 14". **A** (100 seeds)

02371-BASIL ITALIAN LARGE LEAF (SWEET)—(70-75 Day) (*O. basilicum*)—Large, dark green leaves have mild, sweet flavor. The most widely used for flavoring Italian dishes. Slow-bolting and high yielding. Ht: 24-30". **A** (100 seeds)

04901-ORGANIC BASIL LARGE LEAF
(A) 1 pkt. (100 seeds) \$4.75; 3+ \$4.35 ea

02368-BASIL SWEET DANI LEMON—(70 Day)—(PVP) (*O. basilicum*)—Leaves pack up to 75% more essential oils than other lemon basil and burst with lemon fragrance. Use to flavor vinegars, fish dishes, salads and tea. A wonderful addition to patios where its fragrance can be enjoyed. 1998 AAS Winner. Ht: 26-30". **A** (100 seeds)

02367-BASIL EVERLEAF™ EMERALD TOWERS (55-75 Day)—(*O. basilicum*)—Grows into an attractive column of foliage. Flowers 10-12 weeks later than other basil, giving you more time to enjoy the sweet, traditional Genovese flavor. Great for your favorite pestos and chopped fresh on Caprese salads. Ht: 24-36". **A**

(A) 1 Pkt. (50 seeds) \$4.95; 3+ \$4.55 ea

02400-CHIVES—(*Allium schoenoprasum*)—Zones 3-9—This member of the onion family has mild onion-flavored foliage. Widely used for seasoning. Bears pretty lavender-pink flowers. Makes an excellent addition to flowerbeds near the house where you can quickly clip what you need. Ht: 12". **P** (350 seeds)

02411-CILANTRO CALYPSO—(50-55 Day)—(*Coriandrum sativum*)—Chinese or Mexican parsley. Highly aromatic, leaves can be sprinkled on top of Mexican and Asian dishes for a burst of fresh flavor. Seeds make curry powder. Very slow bolting. Ht: 12-18". **A** (200 seeds)

BROADLEAF SAGE

STEVIA

02442-FENNEL ANTARES HYBRID—(58-68 Day) (*Foeniculum vulgare*)—An improvement over older varieties, 5-inch bulbous stems add a lightly sweet, licorice-like flavor when sliced in salads and stir-fry. Use leaves to flavor fish and vegetables, and dry seeds in soups and sausages. Attracts pollinators. 2017 AAS National Winner. Ht: 24". **A**

(A) 1 pkt. (100 seeds) \$5.45; 3+ \$4.95 ea

02429-OREGANO GREEK—(*Origanum vulgare hirtum*)—Zones 4-9—Thick green leaves are strongly aromatic. Widely used fresh and dried for flavoring tomato sauce, meat, fish, salads and Italian dishes. White flowers. Ht: 12-14". **P** (350 seeds)

04964-ORGANIC OREGANO GREEK
(A) 1 pkt. (350 seeds) \$3.55; 3+ \$3.25 ea

02435-ROSEMARY—(*Rosmarinus officinalis*)—Zones 8-10—One of the most fragrant herbs, the herb of remembrance. Pine-scented needle-like evergreen leaves are used to flavor meats, poultry, fish and potatoes. Good for potpourri. Ht: 18-36". **P** (100 seeds)

02460-THYME COMMON (WINTER)—(*Thymus vulgaris*) Zones 5-8—Aromatic leaves have a tangy flavor and are used fresh or dried, often as a salt and pepper substitute. Attracts bees. Ht: 8-12". **P** (500 seeds)

02432-PEPPERMINT—(*Mentha x piperita*)—Zones 4-9—Cool, fresh taste and aroma popular for flavoring desserts, candies and drinks. Plant near cabbage to deter cabbage worms. Ht: 24". **P** (200 seeds)

02440-SAGE BROADLEAF—(*Salvia officinalis*)—Zones 4-8 Ornamental, dusty green leaves are used for floral or herbal wreaths. Fresh or dried leaves flavor sausage, poultry and many other dishes. Ht: 12-24". **P** (100 seeds)

04984-ORGANIC SAGE BROADLEAF (A) 1 pkt. (100 seeds) \$3.85; 3+ \$3.55 ea

02449-STEVIA OR SWEETLEAF—(*Stevia rebaudiana*) (57 Day)—Zones 9-10—Calorie-free and safe for diabetics, stevia is a natural, low-glycemic alternative to sugar and artificial sweeteners. It can be used fresh, dried, powdered or in liquid form to sweeten food and beverages. Harvest leaves and make your own green powder or liquid stevia extract. Plants grow fast in hot weather, bearing clusters of small white flowers in summer. Ht: 18-36". **A**

(A) 1 Pkt. (10 seeds) \$4.95; 3+ \$4.55 ea

Horseradish

BOHEMIAN—Zones 4-8—*The top variety for condiment use.* This hardy horseradish produces large, white roots for making gourmet sauces. Grows vigorously and is ready to harvest in one year. Prefers rich soil and plenty of moisture. **BR**

04479—(Crowns) 3 for \$10.95; 6 for \$18.95

04480—(Roots) 5 for \$11.95; 10 for \$20.95

Specialty Herb Plants

Our specialty perennial herb plants are perfect for adding something extra special to your culinary creations.

12286-TARRAGON FRENCH—(*Artemisia dracunculoides* var. *sativa*)—Zones 4-7—*A staple in every kitchen garden.* Long, narrow foliage is used for flavoring vinegars and a wide range of other foods including fish, eggs, vegetables, salads and more. Has a peppery anise flavor that is an essential part of French cooking. Ht: 18-24". **PP**

1 plant \$12.95; 3+ \$11.95 ea

12266-MINT MOJITO—(*Mentha x villosa*)—Zones 5-9—*A mint that traces its origins back to Cuba, used to flavor the cocktail for which it's named.* The aromatic leaves may be used fresh or dried in all kinds of dishes and drinks. Not as overpowering as other mints. Ht: 18-24". **PP**

1 plant \$10.95; 3+ \$9.95 ea

12260-LEMONGRASS—(*Cymbopogon citratus*)—Zones 8-10 *An essential ingredient in Thai and Vietnamese cuisine.* The leaves impart a lemony-citrus tang and form dramatic clumps of lime-green foliage. The oil is used in soaps and perfumes. In cooler areas, grow it in large tubs and move indoors for the winter. Has mosquito-repelling properties. Ht: 3-5'. **PP**

1 plant \$12.95; 3+ \$11.95 ea

12272-ROSEMARY MADELINE HILL—(*Rosmarinus officinalis*) Zones 6-10—*Robust plants show improved hardiness.* Rich green, needle-like foliage is highly aromatic. Bears blue flowers. A must for the herb garden and indoor pots. Ht: 18-24". **PP**

1 plant \$9.95; 3+ \$8.95 ea

12255-BAY LAUREL OR SWEET BAY—(*Laurus nobilis*) Zones 8-10—*A bay leaf adds extra fullness to meats, soups, and stews.* Plants can grow into large trees, but on the kitchen windowsill they'll grow 3-4 inches in a year and can be formed into a delightful topiary specimen. Ht: 4-6'. **PP**

1 plant \$16.95; 3+ \$15.95 ea

LEMONGRASS

MADELINE HILL ROSEMARY

BAY LAUREL

LANCELOT

Leek

Leeks add a European flare to soups, stews and more, with flavor that's milder and sweeter than onions. Leeks are not day-length sensitive so their tops do not fall over. Approximately 10,000 seeds per ounce. *Cannot ship leek plants to: AK, HI, ID, WA.*

Lancelot

(90-110 Day)—*Dependable and high-yielding.* Thick, white shafts 12-14 inches long are topped with dark blue-green flags. Has good virus tolerance. Available as seed and pre-started plants.

02502—SEED: (A) 1 Pkt. (250 seeds) \$5.35; 3+ \$4.85 ea

02502—(PL)—PLANTS: (Minimum 50 plants per bunch): 1 bunch \$14.95; 2+ \$12.95 ea; 5+ \$10.95 ea

LINCOLN

Lincoln

02504—(50-80 Day)—*Grow baby leeks or mild giants with this variety.* Sow seed thickly like scallions and harvest when finger-size for baby leeks, leaving some to mature into full-size giant leeks 2½ inches or more in diameter. Plant from early summer to fall for a steady supply. Hilling your leeks will encourage longer shanks.

(A) 1 Pkt. (250 seeds) \$4.75; 3+ \$4.35 ea;

(J) ¼ oz. \$18.95; 2+ \$17.45 ea

Kohlrabi

Edible, turnip-like stems grow just above the ground. Flavor is a cross between cabbage and turnips, but milder and sweeter. Delicious raw or cooked and high in vitamin C. Sow in spring at 3-week intervals. Harvest when 2-3 inches in diameter.

Konan Hybrid

02487—(50 Day)—*Stays tender and flavorful, even at larger sizes.* Upright plants are compact and ideal for those with smaller garden spaces. The bulbs grow up to 6 inches in diameter and have a sweet, mild flavor. 2016 AAS National Winner.

(A) 1 Pkt. (50 seeds) \$5.15; 3+ \$4.65 ea;

(W) 500 seeds \$26.75; 2+ \$24.25 ea

KONAN HYBRID

KOSSAK HYBRID

Kossak Hybrid

(70 Day)—*Grows incredibly large with no trace of woodiness.* Rounded bulbs up to 10 inches across grow at least twice the size of other kohlrabi and yet the white flesh maintains its sweet, delicate flavor with no trace of fiber. Smaller bulbs can be harvested earlier to allow about 12-inch spacing for the giants. Provides a long season of good eating.

02499—(A) 1 Pkt. (50 seeds) \$5.15; 3+ \$4.65 ea;

(W) 500 seeds \$27.95; 2+ \$25.50 ea

04949—ORGANIC—(A) 1 Pkt. (50 seeds) \$5.95

QUICKSTAR HYBRID

Quickstar Hybrid

02494—(37 Day)—*Exceptionally early and slow to bolt.* Bulbs are light green outside with juicy, white flesh that is crisp, yet tender. The flavor is superb and best when harvested at 2-3 inches in diameter. Eating quality holds for a long time in the garden with no trace of woodiness.

(A) 1 Pkt. (100 seeds) \$4.75; 3+ \$4.35 ea

KOLIBRI HYBRID

Kolibri Hybrid

02498—(60 Day)—*The best purple-skinned kohlrabi.* Nearly fiberless, white flesh remains sweet, juicy and crunchy when other varieties have become woody. Flattened, 4-6 inch bulbs have medium-sized tops allowing for closer planting. Superb flavor both raw and cooked.

(A) 1 Pkt. (100 seeds) \$5.15; 3+ \$4.65 ea

LooseLeaf™ Kale and Greens Stripper

54284—*Quickly and easily strip leaves from stems.* This sturdy, hand-held tool has 8 different sized holes to accommodate everything from collards, kale and swiss chard to rosemary, parsley, cilantro and other herbs. Easy-to-use, simply insert the stem and pull through. Top-rack dishwasher safe. BPA Free.

Each \$12.95

DARKIBOR HYBRID

Kale

Loaded with vitamins, minerals and fiber, this 'Superfood' is almost as easy to grow as it is to purchase in the store. Start seeds indoors 6-8 weeks prior to your last frost. The flavor is enhanced by cold temperatures, so be sure to plant out early. Clip individual leaves to use in salads, stir-fry, soups and more.

Darkibor Hybrid

(75 Day)—*Curly edges grab onto dressings and seasonings. Great for kale chips, salads and any cooked dish you can imagine.* Rich green, ruffled 18-24 inch plants stand upright in the garden and hold well for extended harvest. Ideal for late summer and fall harvest.

01401—(A) 1 Pkt. (100 seeds) \$5.25;

3+ \$4.75 ea

04945—ORGANIC—(A) 1 Pkt. (100 seeds) \$5.95

BLACK MAGIC

Black Magic

(45-60 Day)—*Dinosaur Kale or Black Cabbage.* Popular in Italy where it is used in soups and stews, it's also delicious for salads when picked young. Deep green, heavily crumpled leaves 2-3 inches wide and 10 inches long form an easy-to-harvest rosette. Flavor is rich and mild, becoming even sweeter after a freeze.

01451—(A) 1 Pkt. (100 seeds) \$3.75;

3+ \$3.45 ea

04944—ORGANIC—(A) 1 Pkt. (100 seeds) \$3.95; 3+ \$3.65 ea

BOLSHOI RED RUSSIAN

CASPER HYBRID

Bolshoi Red Russian

01404—(25-30 Day)—*Distinctive serrated leaves and violet veins and stems.* A versatile variety that can be used from the baby leaf stage right through to full size. At just 10-12 inches tall, it's a good size for adding edibles to patio containers. Excellent sweet, mild flavor.

(A) 1 Pkt. (500 seeds) \$4.85; 3+ \$4.45 ea

Casper Hybrid

01452—(60 Day)—*One of the most flavorful kales around.* The frilly leaves have white veins and look very ornamental, but have a sweet flavor and crisp texture that is tops for eating. Plants exhibit good tolerance to bolting and are excellent for cut-and-come again harvest.

(A) 1 Pkt. (100 seeds) \$4.05; 3+ \$3.65 ea

RAINBOW CANDY CRUSH HYBRID

Rainbow Candy Crush Hybrid

01456—(45-50 Day)—*While it may look too pretty to eat, it actually is the best flavored kale we've ever tasted.* Ideal for both containers and traditional gardens, highly attractive plants form frilly bushes with brilliant green edges and vibrant pink and purple centers. The colors intensify with cool nighttime temperatures and a light frost will improve the already sweet flavor. Superb for salads, smoothies and kale chips.

(A) 1 Pkt. (10 seeds) \$6.75; 3+ \$6.15 ea

PRIZM HYBRID

Prizm Hybrid

01457—(50-60 Day)—*A 2016 AAS National Award Winner.* This superfood grows 10-24 inches tall, but requires less garden space, excellent for small gardens and even containers. The extremely curly, deep green leaves are packed with vitamins and minerals and are excellent both cooked and fresh in salads. Plants are quick to re-leaf and quite cold tolerant.

(A) 1 Pkt. (100 seeds) \$4.75; 3+ \$4.35 ea

AUTUMN STAR HYBRID

Kalettes®

01458—AUTUMN STAR HYBRID—(110 Day) *What do you get when you cross Brussels sprouts with kale? Kalettes®!* It started with a desire to have a kale-like vegetable that was easier to prepare, and after many years, using traditional breeding techniques, the goal was accomplished. Open florets develop along a thick stalk and are ready to eat when 2 inches in diameter. Simply clip them from the stem and eat - no tough stems to remove. Great sautéed, roasted, grilled and raw. Culture similar to Brussels sprouts.

(A) 1 Pkt. (15 seeds) \$5.95; 3+ \$5.45 ea

SUPER JERICHO

TABOO

SYLVESTA

GREEN ICE

Lettuce

GROWING LETTUCE—Lettuce grows best in cool weather. Plant as early as possible and successively every two weeks in spring, and again in late summer for a fall crop. Head lettuce may be started indoors for earlier harvest. A packet will sow approximately 50 feet, an ounce 300 feet of row. There are approximately 20,000 to 25,000 seeds in an ounce. Plant more than one variety for a longer harvest season. *Cannot ship lettuce seeds to: FL, HI.*

ROMAINE OR COS LETTUCE

Romaine or Cos lettuces have thick, crisp, juicy leaves with the sweetest flavor of any other type. Space 8-12 inches apart.

Super Jericho

(50-55 Day)—*Resists bolting in warm climates.* This Romaine-type lettuce demonstrates a remarkable amount of heat tolerance. It will remain sweet, crisp and delicious, and will not succumb to tip burn. The 14-16 inch heads hold 2-3 pounds of bright green leaves. Tolerant of powdery and downy mildew.

02532—(A) 1 Pkt. (300 seeds) \$4.65; 3+ \$4.25 ea

04953—ORGANIC—(A) 1 Pkt. (300 seeds) \$5.05; 3+ \$4.55 ea

PARRIS ISLAND

LITTLE GEM

Little Gem

02534—(50-70 Day)—A baby Romaine heirloom favorite. Bright green leaves enclose a creamy blanched heart, forming heads with sweet flavor and crunchy texture. Harvest when heads are 4-6 inches tall for individual servings of gourmet hearts of Romaine.

(A) 1 Pkt. (1,000 seeds) \$3.75; 3+ \$3.45 ea; (K) ½ oz. \$5.25; 2+ \$4.75 ea

Parris Island

02531—(50-70 Day)—Over 50 years old and still one of the most popular Romaines. The 8-12 inch upright heads of thick, meaty, dark green leaves enclose a slightly savoyed, creamy-white heart. Flavor is sweet and mild. Ideal for Caesar salad or tossed with other greens. Very uniform and slow to bolt.

(A) 1 Pkt. (1,000 seeds) \$3.25; 3+ \$2.95 ea; (K) ½ oz. \$5.75; 2+ \$5.25 ea

CHAMISAL

ICEBERG LETTUCE

Chamisal

02509—(75 Day)—(Utility patent #10595489) Heads have a small core so there's less waste. This iceberg lettuce is widely adapted and bolt tolerant, producing medium size, rounded, glossy green heads with tight wrapper leaves and a sweet, mild flavor. Can be picked at the baby stage or allowed to fully mature. Shows strong tolerance to downy mildew.

(A) 1 Pkt. (500 seeds) \$4.35; 3+ \$3.95 ea; (Z) 2,500 seeds \$10.95; 2+ \$9.95 ea

BUTTERCRUNCH

BUTTERHEAD OR BIBB LETTUCE

This easy-to-grow lettuce forms a rosette with large, smooth outer leaves surrounding a tender, blanched heart. Considered one of the finest gourmet lettuces for eating quality.

Buttercrunch

(68 Day)—*Vigorous, easy to grow, dependable, and delicious.* The broad green leaves are very good, but the best part is the succulent heart of loosely folded leaves and thick, crisp, tender ribs. Remains in prime condition much longer than other bibb-types. 1963 AAS Winner.

02515—(A) 1 Pkt. (1,000 seeds) \$3.45; 3+ \$3.15 ea;

(K) ½ oz. \$5.25; 2+ \$4.75 ea

Salad Bowl

02590—(50 Day)—A lettuce of outstanding quality that will not become bitter in hot weather. Leaves are nicely curled and tender. If cut so as to not injure the crown, it will keep on growing for many weeks. 1952 AAS Winner.

(A) 1 Pkt. (1,000 seeds) \$3.35; 3+ \$3.05 ea; (K) ½ oz. \$5.75; 2+ \$5.25 ea

TROPICANA

Tropicana

02582—(PVP)—(52 Day)—One of the best for heat tolerance and bolt resistance. Green leaves form wide rosettes that maintain a sweet flavor and crisp texture, even when the temperatures soar. Enjoy an extended harvest of individual leaves or whole heads for perfect summer salads and sandwiches. Resistant to tip burn, leaf scorch and corky root.

(A) 1 Pkt. (300 seeds) \$4.85; 3+ \$4.45 ea

Lettuce Blends

Jung's Sweet Repeat Blend

02558—(35-45 Day)—*Our exclusive blend of tender, tasty leaf lettuce varieties.* Includes many leaf forms and colors, all adapted to “cut-and-come-again” culture for repeated harvest over several weeks.

(A) 1 Pkt. (1,000 seeds) \$3.15; 3+ \$2.85 ea;
(K) ½ oz. \$6.75; 2+ \$6.15 ea

Jung's Caesar Salad Blend

02557—(45 Day)—*Make gourmet salads!* This mix of Romaine lettuces can be picked at baby size or left to form 8-12 inch dense heads. The crisp, sweet, juicy leaves make gourmet Caesar salads and are a tasty treat tossed with other greens. (Sorry, no red-leaf types for 2023).

(A) 1 Pkt. (1,000 seeds) \$3.15; 3+ \$2.85 ea;
(K) ½ oz. \$5.25; 2+ \$4.75 ea

Butterhead Blend

02511—(33-60 Day)—*Buttery and yet crunchy... a true garden delight.* Quite easy-to-grow, the plants form loose rosettes of smooth, velvety leaves with a mild, sweet taste that adds a gourmet touch to both salads and sandwiches. Harvest baby leaves in just 33 days, or wait to harvest the entire head around 60 days. Our blend includes both red and green varieties.

(A) 1 Pkt. (1,000 seeds) \$3.85; 3+ \$3.55 ea

Jung's Kaleidoscope Blend

02564—(35-45 Day)—*A wide variety of colors and textures.* Includes ruffled and crispy greens and reds, oak-leaf types and more for making fabulous salad bowls.

(A) 1 Pkt. (1,000 seeds) \$3.15; 3+ \$2.85 ea;
(K) ½ oz. \$6.55; 2+ \$5.95 ea

Heirloom Cutting Mix

Heirloom Cutting Mix

02556—(30 Day)—*A delicious, colorful mix you'll want to plant early and often.* Includes romaines, loose-leaf types, batavias and butterheads in shades of green, red and even some speckled. Sow seed as soon as the soil can be worked and harvest the sweet, tender leaves at baby size or allow to grow a little bigger and harvest to create customized salad blends.

(A) 1 Pkt. (1,000 seeds) \$3.30; 3+ \$2.95 ea

Cantaloupe - Muskmelon

There is no better taste treat than a homegrown, vine-ripened melon. They're not only good tasting, but good for you, being rich in vitamins, iron, calcium and phosphorus. Melons do best on warm sandy loam soil in full sun. They are a relatively long-season crop, but Northern gardeners can get a head start by planting seed in Jiffy® Pots 3-4 weeks before outdoor planting. Plant outdoors when the soil reaches 60°F. Sow 6-8 seeds in hills 4-6 feet apart each way.

Infinite Gold Hybrid

02642—(80 Day)—*Selected for its long shelf life and flavor that holds during storage.* In independent taste tests, Infinite Gold, with its top-notch flavor, scored higher than the leading competition. The 5-6 pound, 7-inch diameter melons are very uniform with deliciously sweet, deep orange flesh. Plants exhibit high resistance to races of fusarium wilt and powdery mildew.

(A) 1 Pkt. (20 seeds) \$6.95; 3+ \$6.35 ea

Pride of Wisconsin

H (80-85 Day)—*A melon of outstanding flavor and quality.* Originally grown for the Milwaukee markets, this melon produces large fruits with excellent, sweet muskmelon flavor and bright orange flesh. The hard-shelled, ribbed and netted fruits hold well. Most fruits average between 4-8 pounds, but we've had reports that they occasionally exceed 10 pounds.

04954—ORGANIC—(A) 1 Pkt. (25 seeds) \$3.35

Goddess Hybrid

02636—(68 Day)—*Harvest the first muskmelons of the season!* Unlike many early melons where quality and flavor are sacrificed for earliness, Goddess is one of the highest quality melons on the market, yielding 4-6 pound, Eastern-type fruits that are oval-shaped with fine netting. The golden-orange flesh is thick, juicy and extra-sweet with wonderful flavor and aroma. It comes with a powerful disease resistance package too, so yields are plentiful.

(A) 1 Pkt. (25 seeds) \$6.55; 3+ \$5.95 ea

Solstice Hybrid

02656—(76 Day)—*Massive fruits with amazing sweet flavor.* Weighing 6-9 pounds on average, these deep-sutured muskmelons have netted skin and thick, orange, richly flavored flesh rating 13% Brix on the sweetness scale. High-yielding plants have excellent resistance to powdery mildew and fusarium wilt.

(A) 1 Pkt. (25 seeds) \$5.95; 3+ \$5.45 ea;
(W) 500 seeds \$44.95; 2+ \$40.50 ea

Aphrodite Hybrid

02616—(72 Day)—*The flavor and aroma of this melon is simply divine.* Restricted vines allow gardeners with smaller spaces to still enjoy the unbeatable taste of fresh, garden-ripened flavor. Fruits are large, averaging 6-7 pounds each with a juicy, creamy texture and outstanding flavor that hints of honey. Strong netting ensures the melons will hold well for shipping and storage. Possesses high resistance to both powdery mildew and fusarium wilt. A great variety for the Midwest.

(A) 1 Pkt. (20 seeds) \$5.95; 3+ \$5.45 ea

Melon Cradle

53368—*Get melons off the ground and protect against rot and insect damage.* These green-coated, heavy-gauge-wire cradles will help you harvest blemish-free melons. Each cradle measures 7½ inches in diameter and can hold up to 10 pounds. Great for squash too.

One pack (6 cradles) \$21.95

Athena Hybrid

02620—(75 Day)—*Fruits ripen on the vine without becoming soft.* This feature allows maximum sweetness to develop, a real advantage for both home gardeners and shippers. The large, attractively netted 7-inch oval fruits have a small seed cavity, weigh 5-7 pounds and ripen early. The firm, melon-orange flesh is sweet and juicy. Battles disease and stress resulting in high yields of uniform, high-quality fruit.

(A) 1 Pkt. (25 seeds) \$6.15; 3+ \$5.55 ea;
(W) 500 seeds \$60.95; 2+ \$54.95 ea

Avatar Hybrid

02621—(72-75 Day)—*An early melon ideal for Northern growers.* Fruits average 7-10 pounds each and have delectable, deep orange flesh that is high in sugars. The light green, netted rind turns a yellow-tan when ripe, allowing you to easily pick the hefty fruits at their prime time. Expect great yields from vines that show high resistance to fusarium wilt and powdery mildew.

(A) 1 Pkt. (20 seeds) \$5.35; 3+ \$4.85 ea

Ambrosia Hybrid

02618—(84 Day)—*If flavor is what you're looking for in a melon, give Ambrosia a try.* Just the aroma of the 4-5 pound fruits will make you drool. The thick flesh is a pretty, deep-peach color and is extra sweet and juicy. The nearly round, 6-inch fruits are heavily netted with light sutures and have small seed cavities. Vigorous and productive vines are tolerant of powdery mildew.

(A) 1 Pkt. (25 seeds) \$6.25; 3+ \$5.65 ea

OYSTER

SHIITAKE

Mushrooms

You'll have the freshest, most delicious mushrooms when you grow your own. Our easy-to-use mushroom kits include a growing medium, pre-inoculated with mushroom spawn, and full instructions. Watch them grow from tiny pinheads to fully matured mushrooms. Allow 3 weeks for delivery. Shipped direct from our supplier, from September 1 to April 30.

54108-OYSTER—A delicious delicacy, named for the unique fan-like shape. The ivory to gray caps have a subtly sweet flavor, never musty, and are delectable sliced raw in salads or used in stir-fried dishes. Will produce several pounds over a 2-month period.

Each \$42.95

54109-SHIITAKE—These large, dark, plump mushrooms are highly prized for their delicious, robust flavor and meaty texture, as well as their nutritional value. Use in stir-fried dishes, soups, stews and more. Equipped with its own humidity tent, this table-top farm will produce up to 2 pounds of mushrooms over a 3-month period.

Each \$44.95

Garden Fencing

52109—Protect your valuable plantings and food crops. Temporary fencing keeps small children, pets and all but the most voracious of small varmints away.

Easy to use, durable polypropylene is rot-proof, safer to handle and more economical than chicken wire, and is unaffected by chemicals. Small mesh protects crops without harming birds and small animals. Posts not included. Size: 3' high x 50' long.

Each \$25.95; 2+ \$23.95 ea

BioActive™ All-Purpose 4-6-4 Fertilizer

51245—Help your plants absorb more nutrients from the soil. This organic, granular formulation contains a special blend of aerobically composted turkey litter, feather meal, sulfate of potash, humic acid, plus mycorrhizal fungi. Designed to naturally improve nutrient and water uptake of plants, but also help vegetables and fruits become more flavorful and nutritious while reducing plant stress. For gardeners, all this means healthier soil, increased yields and larger, tastier crops. Ideal for increasing fertility in gardens, raised beds, containers and lawns without having to haul bulky bags of compost. Either topdress or mix with soil at the time of planting. Covers approx. 165 square feet.

5 lb. pouch \$17.95

JAMBALAYA

Okra

After danger of frost, sow seeds 6 inches apart in rows 2-3 feet apart, about ½ inch deep. Thin to 12-18 inches apart. Average of 470 seeds per ounce. Plants have sharp spines. Wear gloves and long sleeves when handling.

Jambalaya

02713—(48-50 Day)—*Compact plants with small leaves.* Very early, bearing dark green, shiny fruit of uniform size. The yields produced by these small plants is amazing.

(A) 1 Pkt. (25 seeds) \$4.25; 3+ \$3.85 ea;

(K) ½ oz. \$13.95; 2+ \$13.00 ea

GREEN FINGERS

CANDLE FIRE HYBRID

Green Fingers

02719—(50-55 Day)—*Produces fruit when only 15 inches high.* Spineless, 3-4 inch fruits point upward for easy harvest. The heavy-bearing, compact plants produce the highest yields in the heat of summer.

(A) 1 Pkt. (25 seeds) \$5.25; 3+ \$4.75 ea

Candle Fire Hybrid

02712—(60 Day)—*Both ornamental and edible.* Long, 4-5 inch fruits are round, not ribbed, and are produced in abundance on 24-inch plants. Scored high for productivity, taste, texture and tenderness. 2017 AAS National Winner.

(A) 1 Pkt. (25 seeds) \$4.75; 3+ \$4.35 ea

OKRA OFFER

02710 (X)—1 each of Green Fingers and Candle Fire Hybrid, a \$10.00 value for **\$8.50**

Safer® Tomato & Vegetable Insect Killer

50325—*Don't let the bugs get the best of your tomatoes and vegetables.* This ready-to-use spray combines pyrethrins and potassium salts of fatty acids to kill listed insects on contact. Controls aphids, beetles, caterpillars, cabbage worms, Tomato hornworms and more. Apply at the first sign of insects directly where they are feeding or nesting. Can be used up to the day of harvest on a wide variety of vegetables. Ideal for organic gardeners. *Cannot ship to: AK, HI, MT.*

32 oz. RTU \$15.95

WALKING ONION

Walking Onion

F04585—*"Tree onions" or "walking onions."* These unique perennial onions form clusters of very small bulbets or sets on the tips of the leafstalks. Harvest sweet, pungent scallions in spring and small pickling onions in summer, leaving a few to reseed for a hardy, permanent scallion bed. **Note: Bulbs typically ship in fall. However, some bulbs may be available to ship in spring, while supplies last. Cannot ship to: AK, HI, ID, WA.**

1 pkg. (10 Sets) \$10.95; 3+ \$9.95 ea

Salad Bunching Onions

WARRIOR

Warrior

02741—(60 Day)—*Easy to grow and quick to mature.* Harvest uniform, slender onion stalks that offer fantastic flavor whether they are eaten raw, grilled or cooked. Plants hold well in the ground, much better than comparative varieties, giving you the option to pick them gradually. Has some resistance to pink root. 2016 AAS Regional Winner (Southeast, Mountain/Southwest).

(A) 1 Pkt. (250 seeds) \$3.65; 3+ \$3.35 ea

GUARDSMAN

Guardsman

02737—(50 Day)—*An innovative variety producing straight stick onions with the mildness of bulb onions.* Can be harvested earlier than other varieties, has stronger root systems and can also be used for a fall crop.

(A) 1 Pkt. (500 seeds) \$3.95; 3+ \$3.65 ea;

(Z) 2,500 seeds \$11.95

Jung's Jump-Start Onion Food

51026—*Grow the biggest and best onions ever!* Our water-soluble 15-30-15 formula slowly releases nitrogen into the soil to help you grow big, healthy onions.

1 lb. bag \$10.95

ONION SETS

Onion Sets

Popular and widely used for both green onions and winter use. Easy to grow. One quart contains approx. 125-150 sets. *Cannot ship to: AK, HI, ID, WA.*

04590—YELLOW SETS—(STUTTGARTER)

Mature into bulbs of deep yellow with creamy-yellow flesh. Very solid and excellent keepers.

04591—RED SETS—Globe-shaped bulbs have bright red skin. Firm white flesh is sweet and mild. Stores fair.

04593—WHITE SETS—Produces large bulbs of pure white throughout. Flesh is crisp and sweet.

PRICE OF ONION SETS (mix or match):
1 Qt. \$13.95; 3+ \$11.95 ea; 6+ \$9.95 ea;
10+ \$7.95 ea

Mesh Potato & Onion Storage Bags

53964—*Easy-to-use bags allow onions and potatoes to breathe.* Strong woven polypropylene bags easily hold up to 10 pounds of produce. Mesh fabric allows for ample air circulation to increase shelf life. A drawstring cord can be tied for easy closure. Red bags measure 11 inches by 19 inches.

1 package (10 bags) for \$11.95;

2+ pkgs. \$9.95 ea

Monterey® Bug Buster-O Insect Control

50012—*This organic insecticide controls over 100 insects.* A natural pyrethrin, it quickly knocks down and kills cucumber beetles, Japanese beetles, stink bugs, tomato hornworms and many more insects. It can be used on fruits, vegetables and ornamentals — even on the day of harvest. Easy to use. One of the few organic treatments for onion maggots. Dilute 1-1.4 fluid ounces in one gallon of water to cover 1,000 square feet. *Cannot ship to: AK, AZ, AR, HI, ID, IA, KY, NE, NV, ND, WV, WY.*

8 oz. concentrate \$39.95

Colander Trug

54654—*Collect, rinse and drain all with this handy helper.* Ideal for harvesting both fruits and vegetables from your yard and garden, this garden trug has drainage holes in the bottom to make washing your produce a breeze. Sturdy handles fold away for storage and make it easy to carry, plus it's lightweight, weighing just a half pound. Generously sized, measuring 22" L x 12" W x 4¾" H.

Each \$24.95;

2+ \$22.95 ea

AILSA CRAIG

Onion Seed and Plants

Onion seed should be sown in the garden after the soil warms up to 45°F. For large onions, start seed 6-8 weeks prior to planting. Long-day onions are best suited to spring planting in northern areas, while short-day onions are adapted to regions with mild winters. Approximately 7,000 seeds per ounce.

Onion plants are a cool-weather crop and should be planted early to attain largest bulb size. With Jung's superior onion plants, you will enjoy green onions in just 3-4 weeks, and large mature bulbs in 3-4 months. The performance and uniformity of Jung's onion plants will more than justify their price. Plants are sold by the bunch with an average of 40-50 plants in a bunch, depending on plant size. Shipment is made at the proper time for your area. **Email or call for special prices on larger quantities. Cannot ship to: AK, HI, ID, WA.**

Ailsa Craig Exhibition

(105 Day)—This popular English heirloom produces huge, mild onions. Even areas with shorter, cooler growing seasons can successfully grow big 2 pounders. The globe-shaped onions have straw-colored yellow skin and sweet, firm, white flesh. A sweet Spanish-type that stores well. **Long-day.**

02721—SEED: (A) 1 Pkt. (250 seeds) \$3.55; 3+ \$3.25 ea

04962—ORGANIC—(A) 1 Pkt. (250 seeds) \$4.75

02721—(PL)—PLANTS: 1 bunch \$14.95; 2+ \$12.95 ea; 5+ \$10.95 ea

TRICOLOR ONION PLANT OFFER
04579 (X)—1 each of Yellow Sweet Spanish, Red Candy Apple and Sierra Blanca Hybrid, a \$44.85 value for **\$37.95**

SIERRA BLANCA HYBRID

Sierra Blanca Hybrid

(105 Day)—Formerly known as Super Star! Earlier, sweeter, larger and more widely adapted than other white onions. You can grow it successfully almost anywhere in the U.S. when spring planted and again in short-day regions in the fall. White-fleshed bulbs can grow to more than two pounds. Good tolerance to pink root. Keeps fairly well, but like other white onions, not recommended for long-term storage. 2001 AAS Winner. **Day-neutral.**

02767—SEED: (A) 1 Pkt. (250 seeds) \$4.75; 3+ \$4.35 ea

02767—(PL)—PLANTS: 1 bunch \$14.95; 2+ \$12.95 ea; 5+ \$10.95 ea

PATTERSON HYBRID

Patterson Hybrid

(105 Day)—Just like Copra, only better! Better uniformity and a higher yield potential, plus it stores up to 12 months. The large, rounded bulbs have flavorful, moderately pungent, ivory flesh and strong, deep yellow skin to protect them. **Long-day.**

02745—SEED: (A) 1 Pkt. (250 seeds) \$4.75; 3+ \$4.35 ea;

WHAT TYPE OF ONIONS SHOULD I PLANT?

Find your state on the map below. Corresponding onion types are found at the end of each description.

Day-neutral Long-day Short-day

RED CANDY APPLE

Red Candy Apple

(85-95 Day)—This 'sweet as candy' red onion compares to Candy Hybrid for adaptability. Produces large and remarkably uniform, firm onions with deep red skins and beautiful ringed flesh inside. Flavor is so mild and sweet that you can eat it like an apple. **Day-neutral.**

04546—(PL)—PLANTS: 1 bunch \$14.95; 2+ \$12.95 ea; 5+ \$10.95 ea

REDWING HYBRID

Redwing Hybrid

(105-120 Day)—The longest-keeping red storage onion. Bulbs store nearly as well as Patterson Hybrid. The glossy, dark red, 3-4 inch, globe-shaped onions are moderately pungent, very firm and have good skin retention. Tops grow upright and strong. Enjoy them cooked or fresh all winter. **Long-day.**

02755—SEED: (A) 1 Pkt. (250 seeds) \$5.95; 3+ \$5.45 ea;

(J) ¼ oz. \$17.95; 2+ \$16.50 ea

WALLA WALLA

Walla Walla

(110-125 Day)—Mild giants famous for size and sweetness. Globe-shaped, golden-skinned bulbs grow up to 4 inches across. A short-keeper so use them first. **Long-day.**

02780—SEED: (A) 1 Pkt. (250 seeds) \$3.15; 3+ \$2.85 ea;

(J) ¼ oz. \$5.95; 2+ \$5.45 ea

02780—(PL)—PLANTS: 1 bunch \$14.95; 2+ \$12.95 ea; 5+ \$10.95 ea

Texas 1015Y Supersweet

(115 Day)—Our mildest onion. Medium-to-softball-size globes have light yellow skin and white flesh. Matures early in northern states, so plant early for the largest size. Comparable to Vidalia, but can be grown more successfully in the Midwest. Stores fairly well. (Not pictured). **Short-day.**

04540—(PL)—PLANTS: 1 bunch \$14.95; 2+ \$12.95 ea; 5+ \$10.95 ea

CANDY HYBRID

Candy Hybrid

(85 Day)—Grow onions bigger than softballs. This breakthrough hybrid can be successfully grown almost anywhere. Its parentage makes it universally adapted, resulting in jumbo-size bulbs with golden-brown skin and sweet, mild, white flesh that will store for months. Highly resistant to pink root. **Day-neutral.**

02722—SEED: (A) 1 Pkt. (250 seeds) \$4.25; 3+ \$3.85 ea;

(J) ¼ oz. \$15.05; 2+ \$13.60 ea

02722—(PL)—PLANTS: 1 bunch \$14.95; 2+ \$12.95 ea; 5+ \$10.95 ea

Parsnips

These root vegetables take up to four months to mature, but because frost enhances their sweet, delicate flavor they're a favorite with gardeners in areas with short growing seasons. If soil is mulched so it doesn't freeze, parsnips can be left in the ground and harvested all winter. If the ground does freeze, they can be dug the following spring. In warm regions, parsnips can be planted in the fall for use as a winter crop. A packet plants 25-30 feet of row. An ounce (average of 5,000 seeds) plants 200 feet.

ALBION HYBRID

Albion Hybrid

02843—(120 Day)—Bright white, smooth roots for winter stews and roasting. The long, tapered roots have excellent creamy texture and slightly spicy-sweet flavor. Grows well in almost any soil type, is heavy-yielding and suitable for early to main season sowing. Has improved canker resistance.

(A) 1 Pkt. (500 seeds) \$5.15; 3+ \$4.65 ea

HOLLOW CROWN

Hollow Crown

(105 Day)—Best-flavored variety. Produces mature roots up to 12 inches long with shoulders 3 inches wide, tapering to the tip. Fine-grained white flesh is mild with a sweet, nutty flavor. Grow in loose, deep soil.

(A) 1 Pkt. (500 seeds) \$3.45; 3+ \$3.15 ea;

(K) ½ oz. \$6.95; 2+ \$6.35 ea

Garden Peas for Shelling

Peas make their best growth during cool weather and can be planted when the soil temperature is 45°F. Successive plantings will produce peas over a longer period. Seeds should be planted 1 inch deep and 2 inches apart. Inoculant (sold on page 63) should be used for maximum yields. Taller varieties should be trained on a trellis or fence to increase crops. A double row can then be planted 6 inches apart with the support between the rows. Our packets will plant a 25-foot row. Average seed count is 125 seeds per ounce.

Green Arrow
02910—(70 Day)—*Our most popular main crop pea.* Green Arrow produces high yields of extra long pods filled with 9 to 11 bright green, tender and delicious peas. It has resistance to downy mildew and fusarium wilt. The peas freeze well and remain sweet for a long time. Vines are 28 inches long.
(A) 1 Pkt. (150 seeds) \$4.25; 3+ \$3.85 ea;
(U) 750 seeds \$8.95; 2+ \$8.15 ea

GARDEN PEA OFFER

Extra Early Little Marvel
02920—(63 Day)—*A favorite for over 60 years!* Space-saving 15-18 inch vines are heavily set with 4-inch pods, often borne in pairs. Pods are filled with 6-9 large, tender peas that hold for a long time and are great for fresh use and freezing. (Not pictured).
(A) 1 Pkt. (150 seeds) \$3.75; 3+ \$3.45 ea;
(U) 750 seeds \$8.95; 2+ \$8.15 ea

Sabre
02957—(65 Day)—*A heat tolerant, midseason pea with superb flavor.* Long, pointed pods hold up to 11 bright green peas with a pleasant "pop" and deliciously sweet flavor. Adapts well to a wide range of soil types and conditions. High-yielding plants are very heat tolerant and resistant to fusarium wilt, powdery mildew and root rot. Grows 20-24 inches tall.
(A) 1 Pkt. (150 seeds) \$3.25; 3+ \$2.95 ea;
(U) 750 seeds \$7.95; 2+ \$7.25 ea

Strike
02964—(56 Day)—(PVP)—*Super-early, great tasting, and exceptionally disease resistant.* We like everything about this pea – its flavor, earliness, high yields and long picking season. It has tolerance to Pythium root rot, an advantage if you plant in cold, wet soils, plus resistance to fusarium wilt. Bush plants grow 22-24 inches tall.
(A) 1 Pkt. (150 seeds) \$3.45; 3+ \$3.15 ea;
(U) 750 seeds \$8.95; 2+ \$8.15 ea

Maestro
02930—(61 Day)—*Extra-early yields of extra-long pods.* This outstanding pea produces 4-inch pods containing 8-10 dark green, sweet-tasting peas. Strong vines are 24-27 inches tall with pods often borne in pairs. Resistant to powdery mildew and several other diseases.
(A) 1 Pkt. (150 seeds) \$3.35; 3+ \$3.05 ea;
(U) 750 seeds \$7.95; 2+ \$7.25 ea

Progress No. 9
02950—(63 Day)—*Early and highly productive.* The dark green vines grow only 14-16 inches tall and are wonderfully productive. Pods measure 4-5 inches long and contain from 8-10 sweet, delicious peas of superb quality. (Not pictured).
(A) 1 Pkt. (150 seeds) \$3.45; 3+ \$3.15 ea;
(U) 750 seeds \$7.95; 2+ \$7.25 ea

Wando
02980—(70 Day)—*Succeeds under heat and drought conditions where other varieties fail.* Well suited for late planting. Vines grow to a medium height and bear an abundant crop of pods 3½-4 inches long, containing 7-9 peas each. Very sweet and excellent for freezing.
(A) 1 Pkt. (150 seeds) \$3.25; 3+ \$2.95 ea;
(U) 750 seeds \$7.45; 2+ \$6.75 ea

Karina
02923—(58-63 Day)—*Produced longer and out-yielded every other pea in our trials.* Developed in Germany where it's a favorite garden variety. Karina continued bearing 5-7 inch pods filled with 8-10 plump, sweet peas even when conditions became dry and hot. Compact 18-24 inch vines are easy to manage. Ideal for fresh use or canning.
(A) 1 Pkt. (150 seeds) \$4.75; 3+ \$4.35 ea;
(U) 750 seeds \$10.95; 2+ \$9.95 ea

Snap Peas
 Pick pods young and eat them whole, pod and all, both fresh and cooked. At full maturity, shell and use like regular garden peas.

Cascadia
02883—(62 Day)—*These crisp, sugary pods are so delicious for fresh eating they may never make it out of the garden.* Also great for cooking and freezing, the short, 32-inch vines yield an abundance of 3-3½ inch stringless pods. Resistant to powdery mildew and pea enation mosaic virus.
(A) 1 Pkt. (150 seeds) \$3.55; 3+ \$3.25 ea;
(U) 750 seeds \$8.75; 2+ \$7.95 ea

Tender Sweet
02897—(67 Day)—*Sweet and crunchy, completely stringless pods.* Thick-walled, 2¾-inch, edible pods are very uniform with irresistible flavor. Heat-tolerant 18-22 inch tall plants are super productive, setting many double pods, and have resistance to fusarium and powdery mildew.
(A) 1 Pkt. (150 seeds) \$3.35; 3+ \$3.05 ea;
(U) 750 seeds \$8.75; 2+ \$7.95 ea

Sugar Ann
02885—(56 Day)—*Our top pick for flavor!* This edible snap pea offers earliness, productivity and a compact growth habit. The crisp, sweet and succulent 3-inch pods are ready to eat 10-14 days ahead of the original Sugar Snap and remain in prime eating condition for days. The 18-24 inch vines are an advantage for smaller gardens. 1984 AAS Winner.
(A) 1 Pkt. (150 seeds) \$3.65; 3+ \$3.35 ea;
(U) 750 seeds \$7.95; 2+ \$7.25 ea

Snak Hero
02896—(65 Day)—*So sweet and tender, they might not make it into the house!* Though they look a little like green beans, these 4-inch long, stringless pods have all the taste and texture of a delicious snap pea. Eat them fresh off the vine, stir-fry or freeze for later use – they're fantastic any and all ways. The vines grow 18-24 inches tall and can be grown with or without support, in both containers and in-ground gardens. A 2020 AAS National Winner.
(A) 1 Pkt. (150 seeds) \$3.65; 3+ \$3.35 ea;
(U) 750 seeds \$8.95; 2+ \$8.15 ea

Sugar Daddy
02887—(72 Day)—*A late maturing, stringless variety.* The 2½-3½ inch pods are similar to Sugar Snap, but are slightly darker and a little more slender. High-yielding vines are 24-30 inches tall. (Not pictured).
(A) 1 Pkt. (150 seeds) \$3.35; 3+ \$3.05 ea;
(U) 750 seeds \$8.25; 2+ \$7.45 ea

Super Sugar
02893—(66 Day)—(PVP)—*Improved Sugar Snap.* Has all the great qualities of the original Sugar Snap with even thicker pods for extra sweet, crisp flavor. Bears several days earlier and has added resistance to powdery mildew and tolerance to pea leaf roll virus, resulting in even higher yields. Vines grow 4-6 feet and require trellising.
(A) 1 Pkt. (150 seeds) \$3.75; 3+ \$3.45 ea;
(U) 750 seeds \$8.75; 2+ \$7.95 ea

AVALANCHE

Snow Peas

Grow these edible-podded peas like shell peas, but harvest the pods when the peas are beginning to form and becoming visible in the pod. When peas fill the pods, plants cease further pod production. 55°-70°F is optimal pea growing temperature. Delicious raw, steamed and stir-fried.

Avalanche

02882—(58-60 Day)—*Pick an avalanche of sweet, crisp, deep green snow peas.* The semi-leafless (afila-type) habit is rare in snow peas, but an advantage as these 30-inch tall plants are self-supporting and pods are easy to see for picking. Double pods are set at every node for exceptional yields. Has fusarium and powdery mildew resistance. Grow in blocks with rows 6 inches apart.

(A) 1 Pkt. (150 seeds) \$3.45; 3+ \$3.15 ea;
(U) 750 seeds \$7.95; 2+ \$7.25 ea

LITTLE SNOWPEA PURPLE HYBRID

Little SnowPea Purple Hybrid

02876—(55-60 Day)—*Lovely purple flowers followed by sweet and crunchy pods.* Petite plants grow just 24 inches tall in the garden, shorter in containers, making this a valued ornamental edible. The delightful flowers give way to bright, shiny green, flat pods that are wonderfully crunchy and sweet.

(A) 1 Pkt. (150 seeds) \$3.95; 3+ \$3.65 ea

Nature's Aid Inoculant

Increase bean and pea crops by 20-50% with Inoculant. Gardeners have realized the benefits of inoculating their legume plants for many years. Inoculant contains nitrogen-fixing rhizobia to promote stronger, healthier plants; increase yields; and improve quality and richness of the soil. Use for legume plants such as beans and peas. Just mix with seeds before sowing.

51274 (A)—GARDEN SIZE (treats up to 8 lbs. of seed) **Each \$11.95**

51274 (B)—BUSHEL SIZE (treats up to 50 lbs. of seed) **Each \$16.95**

GRANULAR INOCULANT—An easy-to-use granular formula you put directly into the row as you plant.

51277—8.7 oz. can (treats 150 ft. of row): **\$20.95**

51278—2.3 oz. bag (treats 40 ft. of row): **\$10.95**

MAMMOTH MELTING SUGAR

Mammoth Melting Sugar

H 02875—(70 Day)—*Sugar-sweet favorites for stir-fry, salads and Chinese dishes.* These highly productive, 3-4 foot wilt-resistant vines require support. Freezes well.

(A) 1 Pkt. (150 seeds) \$3.85; 3+ \$3.55 ea;
(U) 750 seeds \$8.95; 2+ \$8.15 ea

Oregon Giant

(65 Day)—*Sweet, flat and crispy pods.* This high-yielding variety produces a tremendous crop of 5-inch, stringless pods that have a delightfully sweet flavor. Resistant to common wilt, pea enation mosaic virus and powdery mildew. Grows 28 inches tall. (Not pictured).

02878—**(A) 1 Pkt. (150 seeds) \$3.55;**
3+ \$3.25 ea;

(U) 750 seeds \$7.95; 2+ \$7.25 ea

04957—ORGANIC—(A) 1 Pkt. (150 seeds)
\$4.05; 3+ \$3.65 ea

Cucumber & Pea Fence

53366—*Growing vertically allows for closer planting and easier picking.* This long-lasting, 8-inch mesh galvanized wire fence prevents plants from tangling and spreading on the ground. The hinged panels have 6-inch spikes for anchoring and fold flat for easy storage. Each set includes two 82"W x 48"H fence sections.

Price per set \$35.95; 2+ \$32.95 ea

BHUT JOLOKIA "GHOST" CHILE

HUNGARIAN YELLOW HOT WAX

Hot Peppers

Bhut Jolokia

03004—(80-85 Day)—*Also known as Ghost Chile.* Measures over one million Scoville units and was once rated in the Guinness Book of World Records as the world's hottest pepper. The 2½-3½ inch peppers should be handled with extreme caution.

(A) 1 Pkt. (10 seeds) \$4.95; 3+ \$4.55 ea

Hungarian Yellow Hot Wax Banana

03045—(67 Day)—*Called 'Hot Banana' peppers.* Spicy sweet, medium hot, 5-6 inch fruits mature from waxy yellow to red. One of the best hot peppers for cool climates. High yields. 5,000 to 8,000 average Scoville units.

(A) 1 Pkt. (100 seeds) \$3.25; 3+ \$2.95 ea

TRICKED YOU™ HYBRID

Tricked You™ Hybrid

03090—(90 Day)—*Enjoy jalapeño flavor without the heat!* Our recommended replacement for Fooled You™ Hybrid. Tastes like its hot relatives, but without the pain. The bushy plants are resistant to bacterial spot and yield a profuse crop of thick-walled, deep green, 4-inch fruits that mature from green to red. Ideal for mild sauces and salsas. An X3R® variety.

(A) 1 Pkt. (15 seeds) \$7.15; 3+ \$6.45 ea

EARLY JALAPEÑO

Early Jalapeño

(65 Day)—*A sure way to spice up your nachos!* Three-inch sausage-shaped fruits turn from green to red. Prolific yields. Widely adapted. Average Scoville rating of 5,000.

03028—**(A) 1 Pkt. (50 seeds) \$3.15;**
3+ \$2.85 ea

04967—ORGANIC—(A) 1 Pkt. (50 seeds) \$4.45

GARDEN SALSA HYBRID

Garden Salsa Hybrid

03036—(73 Day)—*Ideal for salsa with just the right amount of heat.* Smooth green, 8-9 inch fruits turn to red at full maturity. Medium heat gets hotter in dry weather. Sets heavy loads of fruits. Resistant to TMV. Average Scoville rating of 3,000.

(A) 1 Pkt. (25 seeds) \$5.95; 3+ \$5.45 ea

MARIACHI HYBRID

Mariachi Hybrid

03058—(66 Day)—*Harvest more than a peck of pretty chili peppers from these high-yielding plants.* The 3-4 inch fleshy fruits have fine flavor rated as mildly hot (500-600 Scovilles) with fruity overtones. Early to ripen, pick the fruits when yellow, orange or right up to the mature red stage. Ideal for salsas, sauces, stuffed, and grilled. A 2006 AAS Winner.

(A) 1 Pkt. (20 seeds) \$5.95; 3+ \$5.45 ea

MEGATRON HYBRID

Megatron Hybrid

03052—(65 Day)—(Utility patent #11324190) *Make sure your garden boasts the biggest, earliest jalapeños around. Replaces Mucho Nacho Hybrid.* Bears jumbo fruits 4½ inches long, up to an inch longer than other jalapeños, with an average Scoville rating of 5,000+. Disease-resistant plants yield loads of peppers that show good shelf life after harvest. Fruits mature to red, but are typically used green.

(A) 1 Pkt. (20 seeds) \$5.95; 3+ \$5.45 ea

BIGGIE CHILE™ HYBRID

Biggie Chile™ Hybrid

03009—(68 Day)—(cv. Sahuaro)—*An improved 'Big Chile.'* Strong, vigorous plants have a heavy leaf canopy that protects fruits from sunburn. Fruits have thick-walls and huge size, up to 9 inches long, maturing from light green to red. One of the highest-yielding Anaheim-type chile peppers for the north. Average Scoville rating of 500.

(A) 1 Pkt. (20 seeds) \$5.25; 3+ \$4.75 ea

TRIDENT HYBRID

CAROLINA REAPER

Trident Hybrid

03794—(80-85 Day)—*Harvest loads of extra-large poblano peppers.* These mildly hot (250 to 1,500 Scovilles) peppers can be canned, used fresh for stuffing or dried and ground into the Ancho spice. Dark green, glossy fruits have thick walls and grow up to 7 inches long. Highly resistant to tobacco mosaic virus. Fruits through the season for extended harvest.

(A) 1 Pkt. (15 seeds) \$4.55; 3+ \$4.15 ea

Carolina Reaper

03755—(90 Day)—*The name alone should warn you about the extreme heat of this pepper.* A spicy habanero often registers 100,000 Scoville units, but these chili peppers average 1.5 million units, but these chili peppers average 1.5 million units and peak at 2.2 million units. The 2 inch, evil looking fruits have a unique 'stinger' on the end. One of the hottest edible chili peppers on record.

(A) 1 Pkt. (20 seeds) \$6.45; 3+ \$5.85 ea

KING ARTHUR HYBRID

Sweet Bell Peppers

Start peppers indoors about 8-10 weeks prior to the last frost date to allow time for hardening off then planting outdoors. Do not set plants out until night temperatures stay above 50°F. Early-planted peppers can be protected from frosts with Kozy-Coats or Fleece Grow Tunnels (page 40). To avoid damage to the plant when picking peppers, clip them rather than pulling peppers off.

King Arthur Hybrid
03144—(65-70 Day)—Formerly 'Fat 'N' Sassy.' *Bragging size bells. Grows well almost anywhere.* Big, blocky, 4½-inch bells have thick, meaty walls. Flavor is sweet and crunchy whether harvested green or red. Sturdy 22-inch plants begin bearing early and keep on producing for exceptional yields. Tolerant to TMV and PVY.

(A) 1 Pkt. (25 seeds) \$5.25; 3+ \$4.75 ea

TRAILBLAZER HYBRID

Trailblazer Hybrid
02839—(50-75 Day)—*Super early and super flavorful.* The blocky fruits average 3½ by 3¼ inches, turning from green to bright yellow at full maturity. With thick walls to help them maintain their quality, the peppers have rich, sweet flavor that is excellent for fresh eating, stuffing and sautéing. Productive plants are highly resistant to Bacterial Leaf Spot. Ready to harvest at the green stage in just 50-55 days from transplant.

(A) Pkt. (15 seeds) \$4.65; 3+ \$4.25 ea

½ Bushel Wood Basket
56675—Useful for both large garden harvests and displays, the simple, rustic design of these baskets lends itself to almost endless applications. Has a 14½-inch diameter and measures 9¾ inches high, with two wire handles to help with your load. **Each \$11.95**

BIG BERTHA PS HYBRID

Big Bertha PS Hybrid
03116—(70 Day)—*Prolific yields of huge peppers.* Fruits are 6-7 inches long by 4 inches wide, 3-4 lobed with thick, meaty walls. Harvest when glossy green or after they have turned deep bright red. The productive plants are 25-30 inches tall. Resistant to TMV.

(A) 1 Pkt. (25 seeds) \$5.25; 3+ \$4.75 ea;
(W) 500 seeds \$49.95; 2+ \$44.95 ea

KING OF THE NORTH

King of the North
(68-70 Day)—*Made for northern climates.* Plants bear heavy yields of huge, blocky, 6-inch fruits with juicy, thick walls and fantastic, sweet flavor that only improves as the fruits ripen. Great for stuffing, fresh eating and sautéing. Tolerates cooler growing conditions remarkably well.

03174—(A) 1 Pkt. (25 seeds) \$3.40; 3+ \$3.10 ea
04968—ORGANIC—(A) 1 Pkt. (25 seeds) \$4.55

Pepper Plants Available
GRAFTED & GARDEN-READY PLANTS, SEE PAGES 4 & 5

DRAGONFLY HYBRID—Beautiful purple peppers with thick, sweet walls. Check out this new AAS Winner on our Front Cover.

Pepper and Eggplant Supports
53475—Made of galvanized steel, these plant supports are 30 inches tall, V-shaped, with a 6½ inch opening. The 4 horizontal half-rings hold plants securely.
Set of 3 for \$23.95

LUNCHBOX MIX

Sweet Non-Bell Peppers

Lunchbox Mix
(55-83 Day)—*Perfect little snacking peppers.* These petite fruits grow 2½ inches long and are extra sweet, tender-crisp, nearly seedless and keep for a long time when refrigerated. Slice in half and fill with cheese or dips, grill them on skewers, sauté, or pack them in lunches as a fresh treat. The plants set loads of peppers in either red, yellow or orange.

04948—ORGANIC (A) 1 Pkt. (15 seeds) \$4.85; 3+ \$4.45 ea

Looking for a no-heat jalapeño? Check out new TRICKED YOU™ HYBRID on page 63.

GIANT MARCONI HYBRID

Giant Marconi Hybrid
03151—(70 Day)—*Exceptional at all stages.* Use them green, red or in-between. The sweet, smoky taste of these huge, 8-inch peppers is superb, especially when grilled, roasted or fried. Robust plants yield like crazy. Resistant to TMV and Potato Y virus. 2001 AAS Winner.

(A) 1 Pkt. (25 seeds) \$5.65; 3+ \$5.15 ea

GYPSY HYBRID

Gypsy Hybrid
03163—(62 Day)—*Early and productive.* Sweet and tasty peppers with medium-thick walls are ideal for salads or frying. Elongated 4-5 inch fruits can be used at early yellow-green stage or left to ripen to orange-red. Resistant to TMV. 1981 AAS Winner.
(A) 1 Pkt. (25 seeds) \$4.95; 3+ \$4.55 ea

ITALIAN PEPPERONCINI

Italian Pepperoncini
03049—(62-75 Day)—*Perfect for pickling.* Bushy plants provide good protection for the 3½-inch fruits with thin walls and sweet, mild heat. Pick them at the yellow-green stage for pickling or allow them to ripen on the bush for fresh eating.
(A) 1 Pkt. (30 seeds) \$3.55; 3+ \$3.25 ea

SWEET BANANA

Sweet Banana
03217—(66 Day)—*A delicious pepper perfect for all your needs.* The mild, sweet fruits contain few seeds and can be used fresh in salads and sandwiches, pickled, fried or any way you like. Produces a prolific amount of peppers that mature from green to yellow and then red, but can be enjoyed at any stage.
(A) 1 Pkt. (100 seeds) \$3.25; 3+ \$2.95 ea

JUST SWEET HYBRID

Just Sweet Hybrid
03166—(65-75 Day)—*A perfect snacking pepper with outstanding, sweet flavor.* The sweet, bright yellow, 3-inch fruits have thick walls and are produced on bushy plants that have sturdy stems and won't need staking. In taste tests conducted by AAS trial judges, this pepper won, hands down. A 2019 AAS National Winner.
(A) 1 Pkt. (10 seeds) \$5.45; 3+ \$4.95 ea

CARMEN HYBRID

Carmen Hybrid
(60 Day)—*One of the sweetest peppers, both raw and cooked.* Especially flavorful when eaten at the ripe red stage. Fruits average 6 inches long with wide shoulders and have medium-thick walls. Grows successfully almost anywhere. 2006 AAS Winner.
03127—(A) 1 Pkt. (15 seeds) \$5.15; 3+ \$4.65 ea
04960—ORGANIC—(A) 1 Pkt. (15 seeds) \$5.75; 3+ \$5.25 ea

Potatoes

Our certified, northern-grown potatoes have been grown under a rigorous state inspection program to ensure they are true-to-name and free of disease. Generally, whole potatoes will store a couple weeks prior to planting. They are carefully packed and guaranteed to reach you in good condition. Detailed instructions will be included on how to cut, cure and plant potatoes. Substitutions may be necessary for late shipments. Potatoes begin shipping in late March, depending on weather and availability. These potatoes are intended for planting, not direct consumption. *Cannot ship to: AK, FL, HI.*

Superior

Long-keeping early white potato. Developed by the University of Wisconsin, Superior gives high yields of good size, oval-shaped, smooth potatoes with shallow eyes. Bakes and cooks well. Matures early.

04670-(LB)-3 LB. PKG WHOLE POTATOES:
Each \$17.95; 2+ \$15.95 ea; 5+ \$13.95 ea

Red Norland

Our most popular red potato. Norland produces good yields of round to oval tubers with shallow eyes and smooth red skin. Moist flesh is white and of highest cooking quality. Outstanding for potato salad and frying. Vigorous plants have good resistance to scab. Stores well. Matures midseason.

04630-(LB)-3 LB. PKG WHOLE POTATOES:
Each \$17.95; 2+ \$15.95 ea; 5+ \$13.95 ea

Kennebec

Our most popular potato. This main crop potato produces excellent yields of large, thin-skinned, oval tubers with white flesh that is dry and flavorful. Cooks and bakes wonderfully and is one of the best for winter storage. Good blight resistance. A late midseason variety.

04610-(LB)-3 LB. PKG WHOLE POTATOES:
Each \$17.95; 2+ \$15.95 ea; 5+ \$13.95 ea

CLANCY HYBRID

Clancy Hybrid

04637-(90-110 Day)-Start your potato plants from seed and minimize disease potential. AAS Judges observed that it was easy to start plants from these seeds and they were impressed with the potatoes that were harvested at the end of the season. Plants produce 3-4 ounce spuds in varying shades of red with creamy white to yellow, flavorful flesh that is ideal for mashing and boiling. A 2019 AAS National Winner.

(A) 1 Pkt. (30 seeds) \$5.05; 3+ \$4.55 ea

COLORADO POTATO BEETLE BEATER—One of the best ways to fight this tough bug. See page 38.

GERMAN BUTTERBALL

German Butterball

This superb potato says 'butter' and it's better than excellent. It has yellow, melt-in-your-mouth flesh with butter-rich flavor. One taste and you'll know why it won first place in Rodale's Organic Gardening "Taste-Off" contest. Disease-resistant plants produce high yields of large, round to oblong tubers with golden skin. A good keeper. Late season.

04618-(LB)-3 LB. PKG WHOLE POTATOES:
Each \$17.95; 2+ \$15.95 ea; 5+ \$13.95 ea

SUNRISE GOLD

Sunrise Gold

If you like 'Yukon Gold,' then you have to try this sunny new addition. Shallow-eyed, large, round to oval tubers have golden yellow skin and vibrant yellow, moist flesh that is superb for breakfast potatoes. Yields well for an early-maturing variety. Resistant to black leg and common scab. Early season.

04672-(LB)-3 LB. PKG WHOLE POTATOES:
Each \$17.95; 2+ \$15.95 ea; 5+ \$13.95 ea

POTATO PLANTER BAG

Potato Planter Bag

53730—Grow delicious potatoes from your patio or balcony. These durable polyethylene planters have strong, stitched seams; drainage holes; and carry handles for easy mobility. Comes with a clear plastic flap so you can monitor potato development and harvest at will. Tubs measure 18 inches tall with a 14-inch diameter and hold 36 quarts of planting mix. Planting instructions included. One bag per package. **Each \$18.95**

HUCKLEBERRY GOLD

Huckleberry Gold

Delicious and nutritious – won't cause a big spike in blood sugar. Produced through traditional breeding methods, researchers found this potato ranks lower on the Glycemic Index than almost any other potato (other than sweet potatoes). The spuds have purple skin that is high in antioxidants and golden yellow flesh with a rich, buttery flavor. Good resistance to common scab and Verticillium wilt. Developed at Montana State University. Midseason.

04621-(LB)-3 LB. PKG WHOLE POTATOES:
Each \$17.95; 2+ \$15.95 ea; 5+ \$13.95 ea

ADIRONDACK RED

Adirondack Red

Make pretty pink potato dishes with this tasty new beauty. The color of the pinkish-red flesh lightens some with boiling, but maintains its vibrant color when baked, roasted or fried. The mild flavor and moist texture lends itself well to a variety of dishes and makes an eye-catching potato salad. Yields are impressive for an early variety. Matures early to midseason.

04600-(LB)-3 LB. PKG WHOLE POTATOES:
Each \$17.95; 2+ \$15.95 ea; 5+ \$13.95 ea

MAGIC MOLLY

Magic Molly

A large fingerling with deep purple skin and purple-blue flesh. Tubers have a rich, earthy flavor that is especially good when roasted. Retains its purple color when boiled, adding a new element to hot and cold potato dishes. Dig early for smaller fingerlings or grow to full maturity for large tubers. Matures midseason.

04622-(LB)-3 LB. PKG WHOLE POTATOES:
Each \$17.95; 2+ \$15.95 ea; 5+ \$13.95 ea

Jung Jump-Start Potato Food

BOOSTS POTATO PRODUCTION AND TUBER QUALITY. EASY TO USE - JUST ADD AT PLANTING TIME

51030—A well-balanced, 15-15-15 blend. Apply at a rate of 1 ounce per hill.
1 Lb. pkg. \$10.95

YUKON GOLD

Yukon Gold

Imagine mounds of buttery yellow mashed potatoes. Yukon Gold yields a good crop of round to oval, golden skinned potatoes with creamy-yellow flesh. Their superior flavor is sure to be a hit no matter how you serve them. An early midseason variety.

04675-(LB)-3 LB. PKG WHOLE POTATOES:
Each \$17.95; 2+ \$15.95 ea; 5+ \$13.95 ea

RED PONTIAC

Red Pontiac

A heavy yielding garden favorite. Large tubers have thin red skin and white flesh. An excellent mid to late season all-purpose potato. Stores well.

04640-(LB)-3 LB. PKG WHOLE POTATOES:
Each \$17.95; 2+ \$15.95 ea; 5+ \$13.95 ea

GOLD RUSH

Gold Rush

High quality russet, great for baking and boiling. Oblong to oval tubers are smooth with golden-russet skin and white flesh. Produces good yields and has tolerance to scab, hollow-heart and early dying complex. Developed by North Dakota State University. Early midseason.

04608-(LB)-3 LB. PKG WHOLE POTATOES:
Each \$17.95; 2+ \$15.95 ea; 5+ \$13.95 ea

FINGERLING

Fingerling Salad Potatoes

HF *Slim tubers with unique flavor.* The finger-like tubers are about 1 inch in diameter and 2-4 inches long with deliciously flavored yellow flesh. Boil with the skins on and cut up to use in salads or fry with the skins on. Originally carried from Europe to Wisconsin in a suitcase, this variety has been produced locally for us for several generations. Matures midseason.

04605-(LB)-3 LB. PKG WHOLE POTATOES:
Each \$17.95; 2+ \$15.95 ea; 5+ \$13.95 ea

BEAUREGARD

CENTENNIAL

Sweet Potatoes

PLEASE NOTE—Sweet potatoes are shipped direct from our grower. The plants are cold sensitive, so shipment usually begins around April 20 in southern states and ends the first week of June in northern states. *Cannot shipped to: AK, HI.*

04705—BEAUREGARD—(90-100 Day)—This early variety produces huge yields of high-quality potatoes with excellent resistance to cracking. The tubers have smooth, light red skin with deep orange, fine-grained flesh.

04710—CENTENNIAL—(100-110 Day) America's leading sweet potato for northern climates. It matures early, before frosts, and has bright copper skin. Deep orange flesh is fine-grained, moist and delicious when baked.

04712—COVINGTON—(100-115 Day)—Reliably produces excellent crops of oblong tubers with rose colored skin and moist, deep orange flesh. The tubers store well and are ideal for mashing, roasting and baking. Great for both northern and southern gardens.

04720—GEORGIA JET—(90-100 Day)—An early maturing variety that's ideal for northern gardens. The deep red skin has moist, orange flesh with exceptional flavor.

04728—MURASAKI—(100-120 Day) (P.P. 19955) Not as moist as most varieties, this Japanese-type sweet potato bakes up fluffy, more like a russet potato, but with a sweet, nutty flavor. The purple-red skin has a high vitamin content as an added bonus. Resistant to southern root-knot nematode and Fusarium root rot.

04735—VARDAMAN—(100-110 Day)—An early and high-yielding bush-type. Potatoes have deep orange flesh and delicious taste.

PRICE OF SWEET POTATO PLANTS:

- 12 (one variety) for \$21.95;
- 25 (one variety) for \$30.95;
- 50 (one variety) for \$51.95;
- 100 (one variety) for \$64.95

NORTHERN COLLECTION

04744 (X)—12 Centennial, 12 Beauregard and 12 Georgia Jet, plus a FREE booklet with growing instructions and prize-winning recipes, a \$65.85 value for **\$55.95**

COVINGTON

GEORGIA JET

MURASAKI

VARDAMAN

CARGO PMR HYBRID

Pumpkins

The versatile pumpkin – a source of pleasure whether used for fall decorating or baked into delicious pies, breads and bars. Easy-to-grow by direct seeding into the garden after danger of frost, or for an early start, sow in peat pots indoors 2-3 weeks earlier.

Cargo PMR Hybrid

03254—(100 Day)—*The perfect pumpkin for patches both big and small.* Deep orange fruits average 20-25 pounds each and are slightly taller than they are wide. Strong, dark green embedded handles make carrying the attractive pumpkins a breeze. Ideal for both u-pick operations and home gardens. Short, space-saving vines produce 2-3 fruits each and exhibit good resistance to powdery mildew.

(A) 1 Pkt. (25 seeds) \$5.05; 3+ \$4.55 ea;
(W) 500 seeds \$44.95; 2+ \$40.45 ea

Howden

(115 Day)—*The model jack-o'-lantern pumpkin by which others are compared.* Fruits average 15-25 pounds and are deeply rounded in shape with classic ribbing, dark orange color and extra-thick flesh that holds in prime condition for a long time. Sturdy handles are strongly attached. Produces excellent yields. (Not pictured).

03271—(A) 1 Pkt. (25 seeds) \$3.75; 3+ \$3.45 ea;
(S) 200 seeds \$7.15; (U) 750 seeds \$12.95
04972—ORGANIC—(A) 1 Pkt. (25 seeds) \$5.35

JACK-O'-LANTERN PUMPKIN OFFER

03332 (X)—1 each of Howden Biggie, Early Giant Hybrid and Magic Lantern Hybrid, a \$21.35 value for **\$18.15**

EARLY GIANT HYBRID

Early Giant Hybrid

03270—(95 Day)—*Give character to your jack-o'-lantern family with this tall pumpkin.* Producing mostly tall types weighing 25-30 pounds each, the large pumpkins are dark orange with smooth skin and strong, dark green carrying handles. The full vines are very productive with tolerance to powdery mildew.

(A) 1 Pkt. (25 seeds) \$6.45; 3+ \$5.85 ea;
(W) 500 seeds \$64.95; 2+ \$58.95 ea

HOWDEN BIGGIE

Howden Biggie

03272—(115 Day)—*Classic Howden quality with extra size.* The pumpkins average 40 pounds and have a rich, dark orange color. Thick flesh helps maintain their uniform, upright shape. Strong, sturdy stem handles and a tough surface keeps them in top condition for a long time.

(A) 1 Pkt. (25 seeds) \$7.95; 3+ \$7.25 ea;
(C) 1000 seeds \$164.95; 2+ \$149.95 ea

MAGIC LANTERN HYBRID

Magic Lantern Hybrid

03309—(100-110 Day)—*When space is premium and powdery mildew is a concern.* Semi-bush plants can be spaced more closely, resulting in higher yields. The globed-shaped, dark orange fruits average 16-24 pounds and are slightly taller than wide, with medium ribs and strongly attached handles. Intermediate resistance to powdery mildew.

(A) 1 Pkt. (25 seeds) \$6.95; 3+ \$6.35 ea;
(S) 200 seeds \$34.95; 2+ \$31.95 ea

DILL'S ATLANTIC GIANT

Dill's Atlantic Giant

03251—(115 Day)—*The granddaddy of giant pumpkins.* The present record for this amazing variety is now over 2,000 pounds. This is the one to grow for giant pumpkin contests. It consistently produces 400-500 pound fruits with proper growing procedures. Perfect for huge jack-o'-lanterns and fall displays. Fruits vary from yellow to orange. Detailed growing tips included.

(A) 1 Pkt. (10 seeds) \$4.20; 3+ \$3.80 ea;
(R) 50 seeds \$7.95; 2+ \$7.25 ea

CONNECTICUT FIELD

Connecticut Field

119 (120 Day)—*The best known jack-o'-lantern pumpkin.* Fruits are large, smooth and bright golden-orange, weigh 15-25 pounds or more, and are slightly flattened at both ends so they don't tip. Can be used for pies or canning as well.

03259—(A) 1 Pkt. (40 seeds) \$3.75; 3+ \$3.45 ea;
(S) 200 seeds \$6.95; (U) 750 seeds \$12.95

04971—ORGANIC—(A) 1 Pkt. (40 seeds) \$4.95

PRIZEWINNER HYBRID

Prizewinner Hybrid

03279—(120 Day)—*One of the largest of the "brag-patch" pumpkins.* Prize-winning pumpkins have reached more than 400 pounds. Fruits with true pumpkin shape are quite round with shallow ribs and intense orange color.

(A) 1 Pkt. (10 seeds) \$12.95; 3+ \$12.00 ea

GIANT PUMPKIN OFFER

03335 (X)—1 each of Dill's Atlantic Giant and Prizewinner Hybrid, a \$17.15 value for **\$14.50**

CORVETTE PMR HYBRID

Corvette PMR Hybrid

03252—(110 Day)—*Great for small gardens.* Semi-bush plants set an abundant crop of bright orange-gold pumpkins. The uniform fruits have well-attached handles and average 12-15 pounds each. Highly resistant to powdery mildew and tolerant of zucchini yellow mosaic virus and watermelon mosaic virus.

(A) 1 Pkt. (25 seeds) \$6.95; 3+ \$6.35 ea;
(W) 500 seeds \$69.95; 2+ \$63.95 ea

RACER PLUS HYBRID

Racer Plus Hybrid

03342—(85 Day)—*A great choice for smaller gardens.* This early-maturing variety has shorter vines than most other pumpkins, yet still yields 2-3 fruits per plant. The blocky, well-ribbed fruits have a rich orange color, weigh 14-18 pounds each, and have dark green handles to support their weight. Ideal for carving and highly recommended for both home gardens and U-pick pumpkin patches.

(A) 1 Pkt. (25 seeds) \$5.15; 3+ \$4.65 ea;
(G) 250 seeds \$22.95; 2+ \$20.95 ea

AUTUMN GOLD BUSH HYBRID

Autumn Gold Bush Hybrid

03250—(70-75 Day)—*An early-maturing pumpkin great for those with a short growing season.* Actually considered a semi-bush, space-saving vines grow up to 5 feet long — much shorter than many pumpkin varieties. The smooth, golden-orange fruits mature early and average 12-18 pounds. Perfect for jack-o'-lanterns and all your fall decorating needs.

(A) 1 Pkt. (25 seeds) \$4.45; 3+ \$4.05 ea

PEPITAS HYBRID

'NAKED SEEDED' PUMPKINS Pepitas Hybrid

03275—(90 Day)—*Both edible and ornamental.* These 9-12 pound fruits are quite attractive for fall decorations. The interior contains hullless seeds which are delicious when roasted, and yellow flesh that is tasty as well. Restricted vines grow only 5-6 feet and have Southern root rot resistance and powdery mildew tolerance. A 2016 AAS National Winner. Note: Fruits need to be fully mature for seeds to be hullless.

(A) 1 Pkt. (25 seeds) \$5.05; 3+ \$4.55 ea

EARLY ABUNDANCE HYBRID

PIE PUMPKINS

Early Abundance Hybrid

03266—(90 Day)—*Tasty for pies and baked goods, but attractive for fall decorations too.* Expect early, abundant yields of high-quality, 4-6 pound rounded pumpkins of a rich, dark orange color. Sturdy, dark green, proportionate handles make carrying them a breeze. Full-size vines have good powdery mildew resistance.

(A) 1 Pkt. (25 seeds) \$6.45; 3+ \$5.85 ea;
(W) 500 seeds \$64.95; 2+ \$58.95 ea

CINDERELLA'S CARRIAGE HYBRID

Cinderella's Carriage Hybrid

03318—(100 Day)—*This All-America Selections Regional Winner is a fairy tale on a vine.*

Vigorous vines bear carriage-shaped fruits that are 25-35 pounds each. Fruits range in color from reddish-orange to pink-red, and sometimes even blue! These medium-sized pumpkins have sweet, yellow flesh with a nutty flavor that makes them well-suited for baking. Powdery mildew resistant.

(A) 1 Pkt. (25 seeds) \$5.95; 3+ \$5.45 ea;
(S) 200 seeds \$12.95; 2+ \$11.95 ea

WINTER LUXURY PIE

Winter Luxury Pie

03290—(85-100 Day)—*Makes the most velvety pumpkin pie you'll ever eat.* Enormously productive vines produce 5-7 pound globe-shaped fruits that ripen relatively early. The golden-russet fruits have flesh that is very thick, sweet and sugary with deep gold color. An excellent keeper for winter use.

(A) 1 Pkt. (25 seeds) \$4.15; 3+ \$3.75 ea;
(G) 250 seeds \$12.95; 2+ \$11.45 ea

Cooking with Winter Squash & Pumpkins

55448—*Forget canned pumpkin! Learn to cook and bake with your home-grown squash and pumpkins.* Includes storing, preserving and cooking tips, plus plenty of recipes to tempt your taste-buds. 32 pages. Paperback. Each \$5.95

GALEUSE D'EYSINES

Galeuse D'Eysines

H (95-100 Day)—*Whether you call it ugly or elegant, we can all agree it's unique.* Extra sugar in the skin causes this pink, cheese wheel-shaped pumpkin to be covered with beige bumps that resemble peanuts. When cooked, the flesh is sweet and very smooth. In France it's traditionally used for soups and sauces, but it's also delicious for baking or fried in butter. The pumpkins weigh 15-25 pounds each.

09650-ORGANIC-(A) 1 Pkt. (25 seeds) \$5.75; 3+ \$5.25 ea

Cinnamon Girl PMR Hybrid

(85 Day)—*Grow more in a smaller amount of space!* Shorter vines require only 24-30 inches between plants, making this a perfect pumpkin for small gardens. Each plant yields 3-4, lightly ribbed fruits that have strongly attached handles and average 3-6 pounds. Great for fall decorations, but also perfect for processing as the wonderfully smooth texture and sweet flavor make for delectable pumpkin pies. Intermediate resistance to powdery mildew.

04970-ORGANIC-(A) 1 Pkt. (10 seeds) \$5.75; 3+ \$5.25 ea

MINI PUMPKINS

BATWING MIX

Batwing Mix

03260—(90 Day)—*Novelty mini pumpkins.* A spooky little Halloween ornamental. Three inch, rounded fruits weighing about ¼ pound each are a unique orange and dark green color when harvested early, becoming fully orange at maturity. Semi-bush vines.

(A) 1 Pkt. (25 seeds) \$4.45; 3+ \$4.05 ea;
(S) 200 seeds \$12.95; 2+ \$11.95 ea

ORANGE CUTIE HYBRID

Orange Cutie Hybrid

03317—(95 Day)—*How can something so cute taste so good?* These bright orange, 2-4 pound, 5 by 6 inch mini pumpkins are very decorative with their bright orange skin accented with creamy-orange streaks. The sweet, fine-grained flesh is superb for culinary use too, so it's a good thing the space-saving bush plants are so productive.

(A) 1 Pkt. (20 seeds) \$6.45; 3+ \$5.85 ea

JACK BE LITTLE

Jack Be Little

(95 Day)—*It's small enough to fit in the palm of your hand!* The deep orange, ribbed fruits are 2 inches tall and 3 inches in diameter. Vines produce an abundance of uniform mini pumpkins that keep well. Ideal for fall decorations.

03274-(A) 1 Pkt. (25 seeds) \$3.55; 3+ \$3.25 ea;
(S) 200 seeds \$7.95; 2+ \$7.25 ea
04973-ORGANIC-(A) 1 Pkt. (25 seeds) \$3.75

BABY BOO

Baby Boo

03256—(95 Day)—*White miniature pumpkins.* The 2-3 inch ribbed fruits make cute fall decorations and are edible too. Harvest before full maturity for best pure white color.

(A) 1 Pkt. (25 seeds) \$3.95; 3+ \$3.65 ea;
(S) 200 seeds \$9.95; 2+ \$8.95 ea

MINIATURE PUMPKIN OFFER
03294 (X)—1 each of Jack Be Little and Baby Boo, a \$7.50 value for **\$6.40**

FLAME HYBRID

HALF PINT HYBRID

Flame Hybrid

03281—(90 Day)—*Use as an ornamental mini-pumpkin or tasty winter squash.* The colorful creamy-yellow-and-orange-striped, 3 by 4½ inch fruits are rounded with deep ribs and sturdy, dark green handles. Flavor is very sweet and flesh is smooth and creamy when baked, perfect for single servings. Expect high yields from semi-bush vines that have excellent powdery mildew tolerance.

(A) 1 Pkt. (20 seeds) \$5.75; 3+ \$5.25 ea;
(V) 100 seeds \$16.95; 2+ \$15.50 ea

Half Pint Hybrid

03280—(70 Day)—*Perfect miniature pumpkins.* The half-pound round fruits look just like their larger counterparts with shallow ribs, bright orange color and dark green handles. They can even be painted or carved for decorating. The vigorous bushes are very high-yielding and have excellent powdery mildew tolerance. A real charmer.

(A) 1 Pkt. (25 seeds) \$4.85; 3+ \$4.45 ea

NOVELTY MINI PUMPKIN OFFER
03339 (X)—1 each of Orange Cutie Hybrid, Flame Hybrid, Batwing Mix and Half Pint Hybrid, a \$21.50 value for **\$17.95**

PORCELAIN DOLL HYBRID

NOVELTY PUMPKINS

Porcelain Doll Hybrid

03343—(100 Day)—*Pretty pink pumpkins are a delight for the eyes and the taste buds.* These blocky, 20-24 pound fruits are naturally pink on the outside, but have sweet, deep orange flesh on the inside that is fantastic for baking and cooking. Vigorous vines have good tolerance to both powdery and downy mildews. A great October fundraiser to support breast cancer research. Visit www.pinkpumpkinpatch.org to learn how your organization can donate funds.

(A) 1 Pkt. (10 seeds) \$5.45; 3+ \$4.95 ea

CRYSTAL STAR HYBRID

Crystal Star Hybrid

03261—(100 Day)—*Holds its bright white color.* Unlike other white pumpkins that take on blue and yellow tones as they age, this pumpkin stays ghostly white. They have a nice round pumpkin shape, averaging 12 inches across and weighing an average of 25-35 pounds. Perfect for painting, jack-o'-lanterns or decorating.

(A) 1 Pkt. (15 seeds) \$8.15; 3+ \$7.35 ea;
(V) 100 seeds \$35.95; 2+ \$32.95 ea

DARK KNIGHT HYBRID

Dark Knight Hybrid

03341—(100 Day)—*Adds a dramatic dimension to fall displays.* Oval 8-10 pound fruits have deep ribs and retain their very dark green coloring if picked early. Allow them to ripen on the vine and they turn a medium green with orange flecks. The fruits have a long shelf life, ensuring they'll last through the fall season. Vines possess good tolerance to powdery mildew.

(A) 1 Pkt. (10 seeds) \$4.75; 3+ \$4.35 ea

WARTY GOBLIN HYBRID

Warty Goblin Hybrid

03291—(105 Day)—*It's frightful and yet delightful.* Heavily warted pumpkins mature to bright orange while the warts retain their green coloration for several weeks post-harvest. The hard shell fruits average 8-20 pounds each. Add a dark green, firmly attached handle to the novel appearance and you have a pumpkin perfect for kids and roadside stands. Good resistance to powdery mildew.

(A) 1 Pkt. (10 seeds) \$7.25; 3+ \$6.55 ea

BLUE PRINCE HYBRID

Blue Prince Hybrid

03285—(110 Day)—*First display and then devour, because this pumpkin tastes almost as good as it looks.* Five foot, trailing vines produce bounteous amounts of silvery-blue, flattened fruits which average 7-9 pounds each. Once your fall display is done, bake them up to enjoy the sweet, smooth and creamy flesh. A 2020 AAS National Winner.

(A) 1 Pkt. (15 seeds) \$4.95; 3+ \$4.55 ea

ONE TOO MANY

One Too Many

03289—(110 Day)—*The pumpkin that looks like a bloodshot eyeball.* These 20-pound round to oblong fruits have a white background accented with midribs and stippled veins of red. The productive vines have good powdery mildew tolerance plus some virus tolerance.

(A) 1 Pkt. (10 seeds) \$5.95; 3+ \$5.45 ea;
(V) 100 seeds \$29.95; 2+ \$26.95 ea

NOVELTY PUMPKIN OFFER
03327 (X)—1 each of Warty Goblin Hybrid and One Too Many, a \$13.20 value for \$11.20

BLUE DOLL HYBRID

Blue Doll Hybrid

03258—(100 Day)—*Interesting color and texture, plus it's delicious too!* Deeply ribbed, slightly flattened fruits are somewhat bumpy and hard-shelled with a cool greenish blue-gray color that is certain to add interest to fall displays. They weigh 20-24 pounds with sweet, deep-orange flesh that is fantastic for both cooking and baking. Full length vines are high-yielding and have intermediate resistance to powdery mildew.

(A) 1 Pkt. (15 seeds) \$5.95; 3+ \$5.45 ea

FULL MOON

Full Moon

03267—(115-125 Day)—(PVP)—*The giant white pumpkin for your outdoor display.* Depending on growing conditions, you can produce pumpkins weighing 60-90 pounds and up to 3 feet tall. The skin is smooth with slight suturing. Harvest the pumpkins when they are porcelain-white. If left in the field too long, they will turn to a creamy-beige. After harvest, store in shade to maintain the white color. Great for carving.

(A) 1 Pkt. (15 seeds) \$7.95; 3+ \$7.25 ea

COTTON CANDY

Cotton Candy

03311—(100-110 Day)—*Novel all-white pumpkin. Even the flesh is white!* The fruits are nearly round, measuring about 9 inches and weighing 5-12 pounds each. They have strong, sturdy handles and their glossy skin makes them excellent for painting and carving into unique jack-o'-lanterns. Harvest when white and store in the dark to maintain the best color. Very productive, full-size vines.

(A) 1 Pkt. (25 seeds) \$5.45; 3+ \$4.95 ea;
(G) 250 seeds \$21.95; 2+ \$19.95 ea

GOOSE BUMPS II HYBRID

BABY BUMPS HYBRID

SUPER FREAK™ HYBRIDS

Creepy, ghoulish, spooky and ghastly! These special-effects pumpkins are perfect for Halloween jack-o'-lanterns, even without scary faces carved into them. As they grow, their skin develops warts and bumps giving them unique personalities. Try one of these on your porch or table for a guaranteed conversation piece.

03303—**BABY BUMPS HYBRID**—(95 Day)
The smallest member of this unique family. High-yielding vines produce uniform 2-3 pound rounded fruits variably covered in warts.

03305—**GOOSE BUMPS II HYBRID**—(95 Day)
Deep orange pumpkins are round to globe-shaped, about 8-12 pounds each with an 8-10 inch diameter.

PRICE OF SUPER FREAK™ HYBRID PUMPKINS (per variety):

(A) 1 Pkt. (25 seeds) \$8.95; 3+ \$8.15 ea

SMALL WORLD OF COLOR BLEND

Small World of Color Blend

03293—(100-110 Day)—*These pumpkins will create a new concept in fall displays.* This blend of medium-size pumpkins includes colors never seen before: white, pink and a mottled and striped pink and blue variety. The pumpkins are round to slightly flattened, weigh about 25-30 pounds and are about 12 inches in diameter, perfect for one-of-a-kind jack-o'-lanterns and fall displays.

(A) 1 Pkt. (15 seeds) \$9.25; 3+ \$8.35 ea

WORLD OF COLOR BLEND

World of Color Blend

03292—(110-120 Day)—*These pumpkins wear coats of many colors.* Going far beyond the typical orange pumpkins, these 50-100 pound fruits include dark and non-fading red-orange, white, gray-blue, plus peach, a pink and blue combo, and other nuances. Includes a wide range of shapes and sizes. Bound to create fun fall displays.

(A) 1 Pkt. (15 seeds) \$11.75; 3+ \$10.80 ea

GERMAN GIANT

Radishes

One of the easiest garden vegetables to grow, and one of the first to be harvested from the garden. Sow successive plantings beginning in early spring for a continuous supply. On average, our packets contain enough seed to plant a 20-foot row. An ounce has about 2,500 seeds.

German Giant

(28-33 Day)—*Grows to astonishing sizes yet remains sweet and crisp, never woody.* Begin pulling these radishes when the size of a quarter, but even if left to grow to baseball-size, they remain sweet and crisp with no cracking or woodiness.

03365—(A) 1 Pkt. (250 seeds) \$3.35;
3+ \$3.05 ea; (L) oz. \$6.95; 2+ \$6.35 ea
03365—(ST) 15' Seed Tape \$4.75; 3+ \$4.35 ea
04981—ORGANIC—(A) 1 Pkt. (250 seeds)
\$3.75; 3+ \$3.45 ea

CHERRY BELLE

Cherry Belle

H (22 Day)—*An extra-early, home garden favorite.* Round red radishes have white flesh that's crisp, firm, mild and slow to become pithy. Tops are small, making them ideal for bunching. Matures quickly. 1949 AAS Winner.

03315—(A) 1 Pkt. (500 seeds) \$3.15;
3+ \$2.85 ea; (L) oz. \$5.95; 2+ \$5.45 ea
03315—(ST) 15' Seed Tape \$4.75; 3+ \$4.35 ea
04980—ORGANIC—(A) 1 Pkt. (500 seeds)
\$3.95; 3+ \$3.65 ea; (L) oz. \$6.95; 2+ \$6.35 ea

RIVOLI

Rivoli

03383—(30 Day)—The first radish to win AAS honors since 1957. It can grow to a large size without becoming hot or woody, allowing for extended harvest. Round, red roots can be left to grow up to 1" in diameter, yet retain their sweet and crisp, smooth white interior, even when grown under stress. 2014 AAS Regional Winner.

(A) 1 Pkt. (250 seeds) \$3.75; 3+ \$3.45 ea

FRENCH BREAKFAST

French Breakfast

H (25 Day)—*Elongated shape and appealing color.* Bicolor radishes of rose-red tipped with white are about 2 inches long by ¾ inches wide. A delicious and attractive addition to the relish tray, crisp and tender with mild flavor.

03350—(A) 1 Pkt. (500 seeds) \$3.35;
3+ \$3.05 ea;
(L) oz. \$6.55; 2+ \$5.95 ea; (M) ¼ Lb. \$11.95
03350—(ST) 15' Seed Tape \$4.75; 3+ \$4.35 ea

03357 (X)—1 each of French Breakfast, German Giant and Cherry Belle, a \$9.85 value for \$8.35

FIESTA BLEND

Fiesta Blend

03348—(27-35 Day)—Create colorful salads, side dishes and veggie trays with this radish blend. Includes a wonderful combination of colors that's only available in this mix: red, pink, yellow, white, and purple. Flavor ranges from mild to spicy, so you'll have something to suit whatever you're in the mood for. A great option for containers if you're short on garden space.

(A) 1 Pkt. (500 seeds) \$3.35; 3+ \$3.05 ea

ROVER HYBRID

SWEET BABY HYBRID

Rover Hybrid

03385—(28 Day)—The radish you can grow and enjoy right through summer's heat! Radishes are usually considered cool season crops as hot temps tend to give them hot, bitter flavor and woody texture. Rover is the exception; the bright red roots remain crisp and juicy with a uniform, round shape. They have rich flavor with a refreshing nip.

(A) 1 Pkt. (250 seeds) \$3.55; 3+ \$3.25 ea;
(L) oz. \$10.75; 2+ \$9.75 ea

Sweet Baby Hybrid

03319—(40-45 Day)—The outstanding flavor, quality and uniformity impressed AAS judges. Crisp, crunchy, and slightly spicy, these 3-inch elongated radishes are tasty and very uniform in size. Interior color ranges from pale purple to white with violet streaks. Enjoy multiple harvests with this quick-maturing variety. A 2016 AAS Regional Winner (Southeast, Great Lakes).

(A) 1 Pkt. (100 seeds) \$4.95; 3+ \$4.55 ea

CHAMPION

Champion

H 03310—(28 Day)—*One of America's most popular radishes.* Brilliant red roots are perfectly round with a small tap root. Radishes remain crisp, juicy and tender without becoming pithy or spongy, even when they have reached golf-ball size. 1957 AAS Winner.

(A) 1 Pkt. (500 seeds) \$3.15; 3+ \$2.85 ea;
(L) oz. \$6.05; 2+ \$5.45 ea

Chinese Winter Radishes

Winter radishes are slower to develop than spring varieties. Most are best sown later than other radishes as they may bolt if sown too early. The roots will store well into winter, making them a great choice for winter salads. They are used fresh, pickled and cooked.

APRIL CROSS HYBRID

April Cross Hybrid Daikon

03330—(60 Day)—A giant Daikon radish. The tapered, white-skinned roots can be harvested when 8 inches long and 3 inches in diameter, or can be left to harvest at sizes up to 15 inches long. The white flesh remains crisp, sweet, mild and never pithy. Delicious in salads, pickled or stir-fried. Widely adapted and slow to bolt.

(A) 1 Pkt. (100 seeds) \$4.65; 3+ \$4.25 ea;
(W) 500 seeds \$13.05; 2+ \$12.10 ea

RED MEAT

DRAGON HYBRID

Red Meat

03382—(50-60 Day)—Unique and delicious, also called 'Watermelon' radishes. The 2-4 inch round roots are mild with a touch of sweetness. Creamy-white skin, is touched with green at the crown. When sliced, they are bright pink inside with a light green outer band. Roots hold a long time without becoming woody.

(A) 1 Pkt. (250 seeds) \$4.15; 3+ \$3.75 ea

Dragon Hybrid

03336—(40-45 Day)—This unique radish is both beautiful and delicious. The skin is bright rose-red and smooth with few root hairs. Inside the flesh is bright white and crisp with a light, almost sweet flavor. Harvest the elongated roots when they are 4-5 inches long.

(A) 1 Pkt. (200 seeds) \$4.95; 3+ \$4.55 ea

GOLDEN SHALLOTS

ZEBRUNE

Shallots

Shallots have a mild onion flavor that will add a gourmet touch to cream soups and sauces, but their flavor really shines in salads and dressings. *Cannot ship to: AK, HI, ID, WA.*

SHALLOT BULBS

04595—GOLDEN SHALLOTS—Attractive bulbs with golden-yellow skin and white flesh. Produces clusters of 7-10 bulbs, each averaging 1-2 inches in diameter. Stores well.

(N) ½ Lb. \$12.95; 3+ \$10.50 ea

04597—HOLLAND RED—Bulbs are round, flat, short and fat. Coppery-red outer skin peels easily. Purple tinged white flesh has a spicy, rich flavor when cooked. Keeps well. (Not pictured).

(N) ½ Lb. \$12.95; 3+ \$10.50 ea

SHALLOT SEED

03424—SHALLOT HYBRID BLEND—(100 Day)—Grow delicious, long-keeping shallots from seed. Includes copper, golden and red-skinned, mid- to long-day types that adapt well to northern growing areas. (Not pictured).

(A) Pkt. (100 seeds) \$4.65; 3+ \$4.25 ea

H 03422—**ZEBRUNE—(100 Day)—**An heirloom Eschalion, or banana shallot. Elongated, pink-brown bulbs have a sweet, delicate flavor preferred by gourmet cooks. Highly productive plants resist bolting. Good for storage.

(A) Pkt. (100 seeds) \$3.70; 3+ \$3.40 ea

Rutabaga

These root crops and leafy tops are loaded with vitamins, minerals and antioxidants. The roots can be stored in a root cellar for use all winter or left in the ground in milder climates. Sow seed directly in the garden when soil temperatures are above 60°F.

AMERICAN PURPLE TOP

HELENOR

American Purple Top

H 03405—(90 Day)—*Sweet and excellent quality.* Round 4-6 inch roots are yellow with a purple crown. Creamy-yellow, fine-grained flesh turns to orange when cooked. Roots store well. Approximately 8,500 seeds per ounce.

(A) 1 Pkt. (500 seeds) \$3.15; 3+ \$2.85 ea;
(E) 5,000 seeds \$5.95; 2+ \$5.45 ea

Helenor

(90 Day)—*Productive and highly uniform.* Firm, round 4-6 inch globes are deep purple on top, cream-yellow on the bottom. Their light orange, high-quality flesh has an excellent, sweet flavor. Great for fall and winter storage.

09670—ORGANIC—(A) 1 Pkt. (250 seeds)
\$5.95; 3+ \$5.45 ea

SPACE HYBRID

Spinach

Spinach can be planted in cold soil for an early crop. There are approximately 2,200 seeds per ounce except New Zealand, which has 425.

Space Hybrid

(40 Day)—*Longest harvest period of any spinach.* It's quick-growing for baby leaf harvest and resists heat and mildew so production isn't halted by early bolting. The dark green, smooth, upright leaves are easy to clean. Unlike most spinach, it can be planted in spring, summer and fall providing three seasons of eating pleasure.

03458—(A) 1 Pkt. (350 seeds) \$3.45;
3+ \$3.15 ea; (L) oz. \$7.55; 2+ \$6.75 ea

04977—ORGANIC—(A) 1 Pkt. (350 seeds)
\$3.75 ea; 3+ \$3.45 ea

REFLECT HYBRID

Reflect Hybrid

03454—(38 Day)—*Easy to clean.* Vigorous dark green, semi-savoyed, oval leaves grow upright and tend not to cup like traditional spinach. Tolerant to downy mildew races 1 through 11.

(A) 1 Pkt. (350 seeds) \$3.55; 3+ \$3.25 ea

SPINACH SAMPLER

03467 (X)—1 each of Space Hybrid, Seaside Hybrid and Reflect Hybrid, a \$10.75 value for \$9.15

SEASIDE HYBRID

Seaside Hybrid

03457—(25-30 Day)—*A superior spinach for harvest from baby leaf to full size.* Seaside has a very smooth texture and grows upright for ease of harvest. The thick, dark green leaves can be harvested at any stage, making this a versatile variety. Shows resistance to many downy mildew races and stands up well to wind and rain.

(A) 1 Pkt. (350 seeds) \$3.75; 3+ \$3.45 ea

Bloomsdale Long Standing

03425—(45 Day) *A slow-bolting, open-pollinated spinach.* Produces thick, glossy, dark green, crinkled and savoyed leaves. A time-tested favorite. (Not pictured).

(A) 1 Pkt. (350 seeds) \$2.95; 3+ \$2.75 ea;
(L) oz. \$7.15; 2+ \$6.45 ea; (M) ¼ Lb. \$14.25

RENEGADE HYBRID

Renegade Hybrid

03452—(40 Day)—*Our most disease-resistant spinach.* Not only is it resistant to multiple races of downy mildew, but it's also highly resistant to cucumber mosaic virus, or spinach blight. The smooth, green leaves have pointed tips when grown to full maturity, but are also delicious at baby stage. Best planted in spring and fall. Widely adaptable and high-yielding.

(A) 1 Pkt. (350 seeds) \$3.65; 3+ \$3.35 ea

New Zealand or Tetragonia

03445—(70 Day)—*Not a true spinach, though similar when cooked.* Thrives during hot weather and yields from spring until fall. Thick leaves have a delightful flavor. (Not pictured).

(A) 1 Pkt. (60 seeds) \$3.95; 3+ \$3.65 ea

Winter Squash

Squash seeds can be sown directly into the garden after danger of frost. For an earlier start, sow in peat pots 3-4 weeks before transplanting to the garden.

ATLAS HYBRID

Atlas Hybrid

03622—(100-110 Day)—*High-yielding vines are shorter than many butternut types.* The fruits grow 12-15 inches long and average 7 pounds or more with smaller ends that make them easier to cut and prep than some squash. The dark orange flesh has exceptional flavor and texture.

(A) 1 Pkt. (20 seeds) \$5.75; 3+ \$5.25 ea

AUTUMN FROST HYBRID

Autumn Frost Hybrid

03627—(100-105 Day)—*Fruits store up to 4 months!* Ribbed, rounded, 5-7 inch fruits average 4 pounds each and ripen to dark tan with a frosty overlay. Inside they have golden orange, high-quality flesh that tastes like butternut squash, but richer. Medium-length vines have intermediate resistance to powdery mildew, allowing for exceptional yields.

(A) 1 Pkt. (20 seeds) \$5.15; 3+ \$4.65 ea;
(G) 250 seeds \$26.95; 2+ \$24.95 ea

WALTHAM

Waltham Butternut

(105 Day)—*Our most popular butternut.* Uniform 8-10 inch fruits have thick, cylindrical necks and a small seed cavity. The rind is creamy-tan and the yellow-orange flesh has delicious, sweet, nutty flavor. Stores well. Heavy yielding. 1970 AAS Winner.

03695—(A) 1 Pkt. (30 seeds) \$3.25;
3+ \$2.95 ea;

(G) 250 seeds \$6.45; (C) 1000 seeds \$12.75

04979—ORGANIC—(A) 1 Pkt. (30 seeds)
\$3.95; 3+ \$3.65 ea;

(G) 250 seeds \$8.95; 2+ \$8.15 ea

EARLY BUTTERNUT HYBRID

Early Butternut Hybrid

03640—(95 Day)—*Compact vines with high quality butternut fruit.* Earlier than Waltham Butternut, it retains all the fine eating and keeping qualities of this time-proven cultivar. 1979 AAS Winner.

(A) 1 Pkt. (30 seeds) \$4.85; 3+ \$4.45 ea;
(S) 200 seeds \$14.95; 2+ \$13.95 ea

DICK'S PICK HYBRID
(The smaller squash pictured is Waltham Butternut)

Dick's Pick Hybrid

03615—(100 Day)—*Big, beefy, blocky and bounteous – the best flavored butternut.* We were looking for a big butternut that tasted great, was productive and had powdery mildew resistance. This one passed the test with flying colors. In northern areas the fruits will be largest, up to 7-8 pounds (about 5 pounds in other areas) and 16-18 inches long. The bulb end is small, resulting in a smaller seed cavity and longer neck holding more usable flesh. The orange flesh is sweet (nearly 7% Brix rating), fine-grained and smooth.

(A) 1 Pkt. (20 seeds) \$4.35; 3+ \$3.95 ea;
(G) 250 seeds \$21.95; 2+ \$19.95 ea

HONEYBABY HYBRID

Honeybaby Hybrid

03654—(90-100 Day)—*Space-saving plants are easy to grow.* Compact 2-3 foot vines are powdery mildew resistant and high-yielding, producing 8-9 fruits per plant. Judges felt that the 6-7 inch fruits were slightly bigger and meatier than comparison varieties. A superb squash with a sweet, nutty flavor that really shines when baked or made into soups. 2017 AAS Regional Winner (Heartland).

(A) 1 Pkt. (30 seeds) \$3.95; 3+ \$3.65 ea

BUTTERSCOTCH HYBRID

Butterscotch Hybrid

03617—(100 Day)—*Just the right size for family dinner without a lot of leftovers.* A small-fruited, 1-2 pound butternut squash with an exceptionally sweet taste. Compact vines are space-saving for smaller gardens and have resistance to powdery mildew. Fruits can be stored up to 3 months. Great for containers. 2015 AAS Winner.

(A) 1 Pkt. (30 seeds) \$5.25; 3+ \$4.75 ea;
(G) 250 seeds \$21.95; 2+ \$19.95 ea

BABY BLUE HUBBARD

Baby Blue Hubbard

03607—(95 Day)—*A 'family-size' hubbard.* Light gray-blue 4-6 pound fruits have thick orange-yellow flesh that's sweet and dry with excellent flavor. Keeps well. Space-saving semi-bush vines.

(A) 1 Pkt. (40 seeds) \$5.05; 3+ \$4.55 ea

Bonbon Hybrid
03606—(81 Day)—*A classic buttercup with sweet-as-candy flavor.* The thick, orange flesh has rich, creamy texture when cooked and ‘bonbon’ sweet flavor. The 4-pound, dark green squash have gray button ends and silver stripes. Fruits ripen a full week earlier than similar buttercup varieties. Plants have a semi-bush habit with 8-foot vines. Wide adaptability and good disease resistance ensures a good crop wherever it’s grown. 2005 AAS Winner.
(A) 1 Pkt. (25 seeds) \$7.85; 3+ \$7.15 ea;
(V) 100 seeds \$18.95; 2+ \$17.45 ea

Burgess Buttercup
H (100 Day)—*A flavor favorite.* The blocky, dark green, 3-5 pound fruits are excellent keepers. Thick, golden-orange flesh is dry, entirely free from fiber, and so sweet it doesn’t even need sugar added.
03605—(A) 1 Pkt. (40 seeds) \$3.45; 3+ \$3.15 ea;
(S) 200 seeds \$5.95; (W) 500 seeds \$9.25
04974—ORGANIC—(A) 1 Pkt. (40 seeds) \$4.95; 3+ \$4.55 ea;
(S) 200 seeds \$10.95; 2+ \$9.95 ea

Sweet Mama Hybrid
03669—(84 Day)—*Highly productive.* This popular Kabocha-type squash bears dark green, drum-shaped, 2-4 pound fruits. Thick, moderately dry flesh has very smooth texture and mild, sweet flavor. Fruits store well, up to 4 months. Vigorous, high-yielding vines concentrate fruit production near their bases for an early harvest. 1979 AAS Winner.
(A) 1 Pkt. (30 seeds) \$6.55; 3+ \$5.95 ea;
(S) 200 seeds \$23.95; 2+ \$21.95 ea

Sunshine Hybrid
(80-95 Day)—*Recognized by its bright red-orange color, but sought-after for its flavor.* The vitamin-rich, orange flesh of this Kabocha-type squash is thick, creamy-smooth and stringless with sweet, nutty flavor. Space-saving 6-8 foot vines yield a good supply of the flattened globe-shaped, 3-4 pound fruits. Matures early and is widely adapted. 2004 AAS Winner.
03664—(A) 1 Pkt. (20 seeds) \$5.55; 3+ \$5.05 ea; (S) 200 seeds \$22.95
04975—ORGANIC—(A) 1 Pkt. (20 seeds) \$5.25 3+ \$4.75 ea

Mooregold
03660—(90 Day)—*Keeps remarkably well.* The thick, smooth textured, bright orange flesh is very dry with rich, sweet, nutty flavor. Fruits are bright orange, 6-7 inches in diameter and 4-5 inches in depth. Vigorous and productive.
(A) 1 Pkt. (30 seeds) \$4.05; 3+ \$3.65 ea;
(S) 200 seeds \$9.95; 2+ \$8.95 ea

Table King
(70-90 Day)—*Space-saving bush plants.* Glossy, dark green, 2-pound squash have thick pale-orange flesh with excellent flavor. Compact, 2-foot tall plants yield 5-8 fruits each. 1974 AAS Winner.
03673—(A) 1 Pkt. (30 seeds) \$3.45; 3+ \$3.15 ea; (G) 250 seeds \$6.95
04976—ORGANIC—(A) 1 Pkt. (30 seeds) \$3.45

Ebony
H **03650**—(90 Day)—*More productive and larger-fruited than Table Queen.* Vigorous vines produce prolific yields of 1½-2 pound, dark green, ribbed fruits with sweet, dry, golden yellow-flesh. Stores well.
(A) 1 Pkt. (30 seeds) \$3.75; 3+ \$3.45 ea;
(G) 250 seeds \$6.95; 2+ \$6.35 ea

Table Ace Hybrid
03670—(80 Day)—*One of our top-selling acorn squash.* This semi-bush winter squash produces very dark, near black, 4½ by 5½ inch fruits filled with smooth, sweet and tasty golden flesh. Matures 5-10 days earlier than common acorn strains. Compact vines produce extremely well. A favorite of both home gardeners and commercial growers.
(A) 1 Pkt. (30 seeds) \$4.95; 3+ \$4.55 ea;
(S) 200 seeds \$14.95; 2+ \$13.95 ea

Honey Bear Hybrid
03658—(85-90 Day)—*Space-saving plants and personal-size acorn fruits.* The 1-pound squash have very smooth, black-green skin and thick, deep yellow flesh that’s dry and sweet as honey. Plants spread only 4-5 feet and yield 3-5 fruits per bush. Mature fruits remain flavorful 3-4 months with proper storage. Widely adapted with powdery mildew resistance. 2009 AAS Winner.
(A) 1 Pkt. (25 seeds) \$4.85; 3+ \$4.45 ea;
(S) 200 seeds \$15.55; 2+ \$14.60 ea

Celebration Hybrid
03626—(80-85 Day)—*If you’re short on space, then this is the acorn squash for you.* Not only will the compact, bushy plants save you garden space, but they have good powdery mildew tolerance too, ensuring a bountiful harvest of squash. Light yellow, striped, 4-inch fruits average 1½ pounds each and have outstanding eating qualities. Plus, it’s pretty too!
(A) 1 Pkt. (30 seeds) \$4.95; 3+ \$4.55 ea

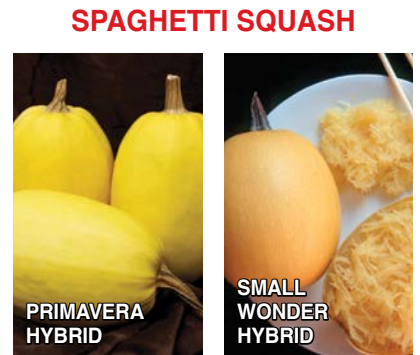

Turk’s Turban
03685—(105 Day)—*An edible ornamental.* Orange-red fruits are 8-10 inches across, with a prominent “button” end. Dense, firm flesh has a mild, sweet, nutty flavor. Great for making stuffed squash. Can also be dried and used like a gourd for crafts.
(A) 1 Pkt. (40 seeds) \$4.75; 3+ \$4.35 ea

Bush Delicata
03632—(80-100 Day)—(PVP)—*Orange flesh has sweet potato-like flavor.* The 1½-2 pound fruits keep well. High-yielding, space-saving, 3-4 foot bush plants have strong powdery mildew tolerance. 2002 AAS Winner.
(A) 1 Pkt. (30 seeds) \$4.35; 3+ \$3.95 ea;
(S) 200 seeds \$12.95; 2+ \$11.95 ea

Thelma Sanders’ Sweet Potato
H (85-95 Day)—*This heirloom from Missouri is described as better than sweet potatoes!* Creamy tan, deeply ribbed, acorn-type squash weigh about 1 pound each and have tender golden flesh that is bursting with sweet, chestnut-like flavor. Extremely productive vines produce an abundance of fruits that store well until about Christmas time.
04978—ORGANIC—(A) 1 Pkt. (30 seeds) \$3.75

Primavera Hybrid
03689—(90 Day)—*Consistently outperforms other spaghetti squash varieties.* Restricted vines dependably yield 2½-4 pound fruits that turn a bright yellow when mature. The tasty yellow flesh is the perfect substitute for pasta. No need to worry about storage; the fruits keep for up to 6 months once the skin hardens.
(A) 1 Pkt. (25 seeds) \$5.95; 3+ \$5.45 ea;
(G) 250 seeds \$26.95; 2+ \$24.95 ea

Small Wonder Hybrid
03692—(75-80 Day)—*A low-calorie substitute for pasta in a single-serving size.* Boil or bake the smaller 6 by 5 inch yellow fruits, fork out the sweet, light yellow flesh and top it with your favorite sauce. The vines of Small Wonder are exceptionally productive and the squash have a very good shelf life. Please note: Seed is treated with Thiram for 2023.
(A) 1 Pkt. (25 seeds) \$5.45; 3+ \$4.95 ea

COMMANDER HYBRID

Summer Squash

Plant in the garden after danger of frost. For an earlier start, sow in peat pots 3-4 weeks before transplanting to the garden. Days indicate average time from direct seeding to first ripe fruits.

Commander Hybrid

03505—(53 Day)—*Harvest loads of delicious zucchini on space-saving vines.* The glossy dark green fruits are smooth, straight and cylindrical with creamy-white, tasty flesh. The upright, open bush habit allows for easy, fast picking. Harvest at 7-8 inches for peak flavor. 1973 AAS Winner.

(A) 1 Pkt. (30 seeds) \$5.75; 3+ \$5.25 ea;
(S) 200 seeds \$19.95; 2+ \$17.95 ea

SMOOTH CRIMINAL HYBRID

Smooth Criminal Hybrid

03576—(55 Day)—*You won't be struck by spines on this plant. It just might be the easiest summer squash ever to pick.* Nearly spineless plants have an upright, open bush habit, producing fruits in abundance along the central stem. The yellow, straight-neck fruits have good neck girth and are best when picked at 6 inches. Plants can be grown in cages to support the upright growth.

(A) 1 Pkt. (25 seeds) \$4.85; 3+ \$4.45 ea;
(G) 250 seeds \$19.95; 2+ \$17.95 ea

SPINELESS BEAUTY HYBRID

Spineless Beauty Hybrid

03580—(43 Day)—*Smooth stems mean less fruit damage and easier harvesting.* Medium-size plants yield uniform, cylindrical, medium green fruits with firm, creamy-white flesh and delicate flavor. Bears over a long period.

(A) 1 Pkt. (30 seeds) \$5.55; 3+ \$5.05 ea;
(S) 200 seeds \$20.95; 2+ \$18.95 ea

BLACK BEAUTY

Black Beauty

03510—(45 Day)—*Early and productive open-pollinated zucchini.* Long, slim fruits are a glossy dark green with firm, creamy-white flesh. Vigorous, open bushes allow for easy harvest. Best picked when 6-8 inches long for top eating quality. 1957 AAS Winner.

(A) 1 Pkt. (30 seeds) \$3.25; 3+ \$2.95 ea;
(S) 200 seeds \$6.95; 2+ \$6.35 ea

GOLDEN GLORY HYBRID

Golden Glory Hybrid

03538—(50 Day)—*An improved 'Golden Delight Hybrid'.* Golden-yellow, straight neck, zucchini-type fruits can be picked small or allowed to mature to full 7-8 inch size. Creamy-white flesh is tender and delicious. Widely adapted with terrific yields. Includes some resistance to powdery mildew, watermelon mosaic virus and zucchini yellow mosaic virus.

(A) 1 Pkt. (20 seeds) \$4.95; 3+ \$4.55 ea

SUPERPIK HYBRID

Superpik Hybrid

03588—(50 Day)—*As long as you keep picking, these plants keep bearing.* The straight-neck fruits are smooth, slender and uniform, averaging 6-7 inches long, but high quality no matter if picked smaller or left to grow. A precocious gene causes the fruits to color up early and stay bright yellow with no green streaking. Vigorous plants have an open bush habit for easy picking. Lots of male blossom buds are a bonus for cooking.

(A) 1 Pkt. (30 seeds) \$5.15; 3+ \$4.65 ea;
(G) 250 seeds \$20.95; 2+ \$18.95 ea

EASY PICK GOLD II HYBRID

Easy Pick Gold II Hybrid

03533—(45-50 Day)—*Easy to grow, easy to pick and an easy choice for your favorite zucchini recipes.* The open bush habit, along with a lack of prickles on the stems, lets you pick without getting pricked. Harvest the fruits with a simple twist and they'll be smooth without scarring. The brightly colored, straight zucchinis have a delicious, mild flavor that makes them perfect for fresh eating, stir-fries, grilling or any other way you choose to use them. Productive parthenocarpic plants provide continuous yields.

(A) 1 Pkt. (15 seeds) \$4.65; 3+ \$4.25 ea;
(V) 100 seeds \$16.95; 2+ \$15.45 ea

Jung's Summer Medley

03598—*A cornucopia of summer squash from one packet.* Our blend includes green and gold zucchini, crooknecks, scallop types and more—all bush or semi-bush types. (Not pictured).

(A) Pkt. (40 seeds) \$5.85; 3+ \$5.35 ea

GREEN GRILLER HYBRID

GREY GRILLER HYBRID

Griller Hybrids

(38 Day)—*Just as the name says, perfect for slicing and grilling.* Low, open bushes with few spines are easy to grow, easy to pick and set fruit early. The 7-inch long fruits are almost rectangular in shape and are ideal for slicing and throwing on the grill, either plain or brushed with a marinade. Plus, the larger diameter makes flipping them a breeze. Shows resistance to zucchini yellow mosaic virus.

03551—GREEN GRILLER—(A) 1 Pkt. (20 seeds) \$4.75; 3+ \$4.35 ea

03553—GREY GRILLER—Also shows intermediate resistance to powdery mildew.
(A) 1 Pkt. (20 seeds) \$4.95; 3+ \$4.55 ea

GREEN MACHINE HYBRID

Green Machine Hybrid

(45 Day)—*A broad disease resistance package makes this the ideal choice for organic gardeners.* Widely adapted plants have an open bush habit with moderate spines, making harvest fairly easy. As the name suggests, this variety cranks out incredible amounts of 7-8 inch, straight, dark green fruits throughout the season. Intermediate resistance to cucumber mosaic virus, powdery mildew, watermelon mosaic virus and zucchini yellow mosaic virus keep plants healthy and productive.

04947—ORGANIC—(A) 1 Pkt. (10 seeds) \$4.95; 3+ \$4.55 ea

DELTA HYBRID

Delta Hybrid

03581—(42 Day)—*Bright, creamy-yellow, uniform fruits are produced early.* Dense, bush-type plants yield copious amounts of crookneck fruits. If the beautiful yellow color of this squash isn't enough, the mild flavor and tender texture are sure to win you over. Plus, it is resistant to powdery mildew.

(A) 1 Pkt. (30 seeds) \$4.25; 3+ \$3.85 ea;
(G) 250 seeds \$14.95; 2+ \$13.45 ea

LATINO HYBRID

Latino Hybrid

03556—(45-55 Day)—*Romanesco summer squash – a flavor favorite.* This Italian-style zucchini has green striped fruits with distinctive ridges that make star-shaped slices when cut. The creamy-green, crisp flesh is very flavorful with a hint of nuttiness. The slender fruits are at their prime when picked at 6-9 inches. The highly productive plants have a compact, open plant habit for easy picking and saving space.

(A) 1 Pkt. (15 seeds) \$5.35; 3+ \$4.85 ea

SANABRIA HYBRID

Sanabria Hybrid

03571—(41 Day)—*Outstanding yields in our trial garden.* This workhorse starts producing early in the season and doesn't stop until fall. Dark green fruits are lightly speckled and consistently straight and uniform, produced on open-bush plants with very few spines. Has intermediate resistance to papaya ringspot virus, watermelon mosaic virus and zucchini yellow mosaic virus.

(A) 1 Pkt. (15 seeds) \$5.15; 3+ \$4.65 ea

POOL BALL HYBRID MIX

Pool Ball Hybrid Mix

03562—(35-40 Day)—*Fun and delicious round zucchini.* These adorable 2-3 inch fruits are perfect for stuffing, shish kabobs, soups or any recipe calling for summer squash. Harvest bright yellow One Ball, pale green Cue Ball and dark green Eight Ball—all from one packet of seed. Exceptionally high yielding 2-3 foot bush plants.

(A) 1 Pkt. (25 seeds) \$4.95; 3+ \$4.55 ea

Sunburst Hybrid
03585—(50 Day)—*Melt-in-your-mouth patty-pan type, butter-yellow scalloped fruits.* Maintains its delicious buttery, nutty flavor whether picked tiny or at 2-5 inch teacup size. Semi-bush plants with an open habit yield prolifically. 1985 AAS Winner.
(A) 1 Pkt. (25 seeds) \$4.95; 3+ \$4.55 ea

Early White Bush Scallop
03532—(46-60 Day)—*An ancient variety that can be traced back to 1591.* Deeply scalloped, pale green pie-shaped fruits measure 7 inches across by 3 inches deep and turn creamy-white. Flesh is white, firm and tender with a mild, sweet flavor. Very productive bush plants. Also called White Patty Pan.
(A) 1 Pkt. (40 seeds) \$3.25; 3+ \$2.95 ea

Swiss Chard
 These nutritious greens are a more heat-resistant alternative to spinach. Delicious fresh, sautéed or steamed. About 1,800 seeds per ounce.

Bright Lights
(60 Day)—*Vibrantly colored!* These stalks have an improved, mild flavor that is excellent when sautéed. Begin harvesting the vitamin-rich greens in 4-5 weeks and let them grow back for repeated enjoyment. 1998 AAS Winner.
03742—**(A) 1 Pkt. (200 seeds) \$4.25; 3+ \$3.85 ea;**
(K) ½ oz. \$8.75; 2+ \$7.95 ea
03742—**(ST) 15' Seed Tape \$4.75; 3+ \$4.35 ea**

Fire Fresh Hybrid
03741—(50-60 Day)—*Delicious any way you use it.* Bright red stems add bold color to salads and stir-fries. Harvest at 25-35 days for baby leaves, or grow to full maturity and sauté for a healthful side dish. Strong stems keep plants clean and upright. Highly resistant to leaf spot and leaf miner damage.
(A) 1 Pkt. (200 seeds) \$3.55; 3+ \$3.25 ea

Lucullus
03740—(60 Day)—*One of the best for greens.* Thick, creamy-white 12-inch stalks and crinkled green leaves. Very productive. (Not pictured).
(A) 1 Pkt. (350 seeds) \$3.35; 3+ \$3.05 ea

Edible Sunflowers
Super Snack Mix
06168—(*Helianthus*)—(80 Day)—*A great snack for you and feathered friends too.* A superior sunflower that produces some of the largest, easiest-to-crack seeds around. Plants grow 5-6 feet tall and their golden yellow 10-inch heads form a striking hedge.
(A) 1 Pkt. (50 seeds) \$4.95; 3+ \$4.55 ea

Large Grey Stripe
03720—(*Helianthus*)—(80 Day)—*Super large heads.* Big heads up to 20 inches across are filled with large, thin-shelled, plump seeds high in protein. A delicious snack, and also valuable bird or chicken feed. Average 200 seeds per ounce. Grows 8-12 feet tall.
(A) 1 Pkt. (½ oz.) \$3.85; 3+ \$3.55 ea;
(M) ¼ Lb. \$7.95; 2+ \$7.25 ea

Sunspot
03732—(*Helianthus*)—(80 Day)—*Compact plants.* Yields full-size, 10-12 inch heads, but on petite 3-4 foot plants. The centers are filled with delicious seeds that are excellent snacks for both people and birds. Ideal for hedges, borders and along fence lines.
(A) 1 Pkt. (½ oz.) \$3.95; 3+ \$3.65 ea

Tea Plant
12262—(*Camellia sinensis*)—Zones 7-9—*One of the most northern-grown teas in the world.* They produce abundant 1-2 inch fragrant white flowers in fall and have leathery, dark green foliage. The leaves, when dried, make a very aromatic and flavorful tea. Plants prefer part shade in hot areas and rich, well-drained, acidic soil. If left unpruned they will grow 8-10 feet tall. **PP**
1 plant \$24.95; 3+ \$22.45 ea

Tomato Specialties
Aunt Molly's Ground Cherry
(70 Day)—*Has delicious strawberry-like flavor.* Husk cherries, also known as ground cherries or Cape Gooseberries, are members of the tomato family. They bear golden-yellow ½-¾ inch fruits encased in a papery husk. The husk turns tan and fruits drop off the plant when ripe. They are excellent for pies, preserves, jams, fruit salads and fresh-eating, or can be dried like raisins. Productive plants 18 inches tall and 24 inches wide begin fruiting in July and continue until frost.
02351—**(A) 1 Pkt. (100 seeds) \$3.95; 3+ \$3.65 ea**
04942—**ORGANIC**—**(A) 1 Pkt. (100 seeds) \$4.45; 3+ \$4.05 ea**

Tamayo R Hybrid Salsa Tomato
00868—(65 Day)—*The size of the fruits will amaze you.* This is one of the largest-fruited tomatillos we have ever seen! The tall, vigorous plants produce big yields of bright green, husk-covered fruits which are widely used in Mexican cooking and salsas. Harvest when the fruit is plump and their papery husk splits. Fruits will store for 2-4 weeks when refrigerated. Grow like tomatoes, starting seed indoors 4-6 weeks before transplanting outdoors. Easily grown and widely adapted to all areas of the U.S.
(A) 1 Pkt. (20 seeds) \$5.95; 3+ \$5.45 ea

ORANGE
TURMERIC (2-YR OLD)
Turmeric
 Zones 8-11—*Loaded with health benefits.* Research suggests that turmeric aids in digestion and is a powerful anti-inflammatory. Turmeric is essential to Asian and Indian dishes, especially curry. Use it to flavor soups, stir-fries, casseroles, marinades and more. Grow in 14-18 inches containers outdoors in filtered sunlight and move indoors before a hard frost. Grows up to 4 feet tall. Harvest by reaching into the soil and breaking off just what you need, or store roots in a cool, dark place in air-tight containers for up to 6 months. **PP**
04474—**ORANGE**—(*Curcuma longa*)—Typically dried and ground into a powder. Imparts a slightly bitter, earthy flavor. Very aromatic. A vital ingredient in curry.
1 plant \$12.95; 3+ \$10.95 ea

Jung Family Garden Raised Bed Mix
51008—*Not just for raised beds.* Our special soilless blend is comprised of compost, sphagnum peat moss, perlite and vermiculite in just the right proportions to ensure ideal drainage and moisture retention in raised beds, Smart Pots and other containers. Completely free of weed seeds. **2 cu. ft. \$32.95**

Smart Pot® Aeration Containers
For gardeners who want containers that will grow the best possible plants. Made of a soft-sided, nonwoven, lightweight black fabric. Smart Pots have the rigidity to hold their shape, but unlike hard-sided pots, when roots reach the fuzzy walls they penetrate the fabric, causing the plant to develop masses of lateral roots. This unique 'air-pruning' capability results in a much larger, more fibrous and healthier root ball. Other advantages are that roots stay cooler in hot weather, excess moisture evaporates easily and they can be reused many times. The larger the pot, the bigger the plant will grow. Weatherproof construction will last for years. Made in the USA.

53841—10 gallon size (16" base x 11.5" height)—Ideal for growing carrots, onions, patio cucumbers, patio tomatoes, peppers, strawberries and more. **Each \$15.95**
53840—15 gallon size (18" base x 13.5" height)—Great for cucumbers, potatoes, summer squash and eggplant. **Each \$18.95**
53842—20 gallon size (20" base x 15.5" height)—Grow tomatoes, muskmelon, watermelon, pumpkins, sweet potatoes and winter squash. **Each \$19.95**

Tomatoes

Days indicate average time from setting out plants to first ripe fruits. Sow indoors 6-8 weeks before setting out. Tomato seed varies in size with an average of 8,000 to 10,000 seeds per ounce. Most cherry types contain about 12,000 seeds per ounce.

HEIRLOOM VARIETIES

Jung's Wayahead

H 00806—(63 Day)—As its name indicates, it is way ahead when it comes to early ripening. First offered in our 1921 catalog, Wayahead remains popular over 100 years later. The tomatoes are medium size, nearly round, bright red and very smooth. The flesh is solid with true tomato flavor. One of the finest for juice. Determinate.

(A) 1 Pkt. (30 seeds) \$3.75; 3+ \$3.45 ea

Martino's Roma

H 00461—(70 Day)—Great for salsa, sauces, paste and more. This Italian heirloom bears incredible numbers of meaty, pear-shaped, 2-3 ounce fruits that are low in seeds and juice, but high in rich tomato flavor. Compact plants have rugose (puckered) foliage. Determinate.

(A) 1 Pkt. (30 seeds) \$2.95; 3+ \$2.75 ea

Tomato Disease Resistance Key

Where disease resistances are known for a variety, we have included disease resistance codes. They are listed behind the estimated days to maturity. Example: (VFF)

- V.....Verticillium Wilt
- F.....Fusarium Wilt
- (FF—Races 1 & 2; FFF—Races 1, 2 & 3)
- N.....Nematodes
- T.....Tobacco Mosaic Virus
- A.....Alternaria Stem Canker
- St.....Stemphylium Gray Leaf Spot
- TSWV...Tomato Spotted Wilt Virus
- EB.....Early Blight
- LB.....Late Blight

Brandywine

H 00111—(80-90 Day)—(Sudduth's strain)—An heirloom beefsteak tomato renowned for its size and rich, spicy flavor. Other tomatoes seem almost bland in comparison. The flattened globes can weigh up to one pound and are somewhat irregular in shape with deep pink skin and red flesh. Indeterminate potato leaf plants.

(A) 1 Pkt. (30 seeds) \$3.75; 3+ \$3.45 ea

Cherokee Purple

H (80-90 Day)—Flavor rivals Brandywine! Medium-size fruits appear brownish in color, averaging 8-12 ounces. Fruits are round to oblate, with no cracking. Tolerant to mild drought and common diseases. Indeterminate.

00188—(A) 1 Pkt. (30 seeds) \$3.30; 3+ \$3.00 ea

04987—ORGANIC—(A) 1 Pkt. (30 seeds) \$3.75

Opalka

H (85 Day)—One of the best tasting sauce tomatoes. Richer and sweeter than other paste tomatoes, sauces using the nearly seedless fruits are something special. The bright red, elongated, 3-5 inch fruits are produced in clusters of 2-5 on vigorous, high-yielding, indeterminate plants. Fruits hold well on the vine.

00526—(A) 1 Pkt. (10 seeds) \$3.35; 3+ \$3.05 ea

04993—ORGANIC—(A) 1 Pkt. (10 seeds) \$3.85

Jiffy-7® Self-Watering Greenhouse

86317—The easiest way yet to start seeds. This kit contains everything you need to start 34 seedlings, except the seed! Comes with:

- 34 Jiffy-7® Peat Pellets
- Tray
- Capillary Mat (holds 4 cups of water)
- Humidity Dome

The Jiffy-7® pellets absorb water from the capillary mat whenever they need it, which means your seedlings stay damp for up to 10 days. Ideal for beginner gardeners. **Each \$17.95**

Amish Paste

H (74-85 Day)—One of the largest, meatiest and best-flavored paste tomatoes. This Amish heirloom dates back to the early 1900s. The oxheart-shaped fruits weigh up to 8 ounces or more and have thick flesh with few seeds. Superb for sauces. Tastes great fresh. Indeterminate vines.

00029—(A) 1 Pkt. (30 seeds) \$3.95; 3+ \$3.65 ea

04986—ORGANIC—(A) 1 Pkt. (30 seeds) \$4.35

Mortgage Lifter

H 00481—(75-85 Day)—Also called Radiator Charlie. An old favorite with good yields of very large, 1-2 pound, pink-skinned, meaty fruits with very few seeds. Delectable sweet, mild flavor. Indeterminate.

(A) 1 Pkt. (30 seeds) \$3.50; 3+ \$3.20 ea

Tomato Maker®

89257—Grow healthier and more delicious

tomatoes. This blend of natural nutrient sources combined with calcium, magnesium and iron helps to stimulate growth and yields. Also corrects deficiencies responsible for blossom-end rot that so often plagues tomatoes. Can also be used on most other, fruits and vegetables. *Cannot, shipped to: AK, HI, MS.*

3 lb. resealable bag \$15.95

Tomato Greenhouse

Protects plants from leaf blight and pests.

These easy-to-use covers are designed to fit over standard tomato cages or to attach to stakes.

Constructed as 1 long sleeve, just cut to your desired length allowing enough extra at the top to gather and close with a twist-tie. Red, perforated plastic film allows for both air circulation and heat retention. The 20-foot roll provides enough to cover 6 or 7 plants. Six twist ties are included.

52988—28" x 20' Each \$13.95

52989—38" x 20' Each \$15.95

Giant Belgium

H 00299—(82-90 Day)—Giant meaty tomatoes with mild, sweet flavor. So sweet that some people use them to make wine. Huge, dark pink fruits average 1½-3 pounds, but can weigh up to 5 pounds. A favorite sliced for burgers and BLTs, as well as used for sauces and canning. Indeterminate.

(A) 1 Pkt. (30 seeds) \$3.20; 3+ \$2.90 ea

Blossom Set Spray

50440—Harvest up to three weeks earlier. This hormone-type spray makes nearly every blossom set fruit, even under adverse conditions. Tomatoes will be larger, meatier and almost seedless. Use on other fruiting vegetables too! *Cannot be shipped to: AK, CA, HI.*

8 oz. pump spray \$10.95

IDEAL SUPPORT FOR MANY VINING VEGETABLES AND FLOWERS

Trellis Netting

Allows for faster ripening and easier harvesting. Made of 100% nylon, this 7-inch "reach-through" mesh is very strong and virtually tangleproof. Guaranteed for 5 years.

53282—5' x 10' Each \$9.95

53284—5' x 30' Each \$17.95

Tomato Patio Planters

53886—Easy-to-use planters for balcony and patio gardens. Ideal for people who want to garden, but don't have the space. These red bags are bright accents for patios and have a reinforced woven handle on each side so they're easy to slide around.

Constructed of tough polyethylene and made to last for several seasons. Equipped with reinforced drainage holes so plants don't become waterlogged. Each bag has a 14 inch diameter, is 18 inches deep and can accommodate 2 or 3 plants depending on variety.

Pkg. of 3 planters \$20.95

ALGOplus Liquid Tomato Fertilizer

51081—Special 4-6-8 formula for tomatoes. This mineral-based fertilizer is odorless, colorless and environmentally safe. It contains a higher percentage of potassium to promote production of large tomatoes. Use one capful per gallon of water as a regular feed or ½ capful to spray directly on the foliage for amazing results. A one-liter bottle makes more than 100 gallons. **Each \$19.95; 2+ \$17.95 ea**

CELEBRITY HYBRID

SLICING VARIETIES

Celebrity Hybrid
 00175—(70 Day)—(VFNTAST)—*Our most widely adapted tomato.* Outstanding disease resistance and hybrid vigor make this tomato a standout everywhere it's grown. Strong plants adapt well to cage or short stake production. Large, deep-red fruit has exceptionally good flavor. 1984 AAS Winner. Semi-determinate.
 (A) 1 Pkt. (30 seeds) \$5.35; 3+ \$4.85 ea;
 (G) 250 seeds \$19.95; 2+ \$17.95 ea

RUBEE PRIZE HYBRID

RuBee Prize Hybrid
 00621—(60-70 Day)—(VFFTA)—*This could be your ticket to a blue ribbon at the next county fair!* Large, 9-10 ounce tomatoes have a deep, luscious color and fantastic flavor that has consistently scored top points in taste test trials. Fruits contain few seeds, an added benefit for those that love tomatoes but can't handle the seeds. Early bearing, compact, indeterminate plants set fruit all season.
 (A) 1 Pkt. (10 seeds) \$5.55; 3+ \$5.05 ea

BIG BEEF HYBRID

Big Beef Hybrid
 00075—(73 Day)—(VFNTAST)—*This beefsteak tomato deserves big bragging rights.* One slice fits a sandwich, and the flavor has just the right balance of sugars and acids. Deep red fruits are smooth-skinned, meaty and juicy, averaging 9 ounces to 1 pound each. Yields are nearly double that of other beefsteak varieties. 1994 AAS Winner. Indeterminate.
 (A) 1 Pkt. (30 seeds) \$5.15; 3+ \$4.65 ea

EARLY GIRL HYBRID

Early Girl Hybrid
 00240—(57 Day)—(VFF)—*One of America's best-known early tomatoes.* Produces a heavy crop of 4-6 ounce smooth, firm, bright red, meaty fruits that don't lack for flavor. Useful as a second planting to extend your harvest later into the season. Indeterminate.
 (A) 1 Pkt. (30 seeds) \$4.95; 3+ \$4.55 ea;
 (G) 250 seeds \$21.95; 2+ \$19.95 ea

BEEFMASTER HYBRID

Beefmaster Hybrid
 00061—(80 Day)—(VFNASt)—*Incredible yields of delicious, prize-winning 'beefsteak' type fruits.* Solid, meaty, bright red tomatoes weigh up to 2 pounds and have good resistance to cracking and splitting. Indeterminate, highly disease-resistant plants yield large crops of the savory tomatoes over a long season.
 (A) 1 Pkt. (30 seeds) \$4.75; 3+ \$4.35 ea

LEMON BOY HYBRID

BIG ZAC® HYBRID

Lemon Boy Hybrid
 00427—(72 Day)—(VFNASt)—*Eye-catching lemon-yellow fruits.* The globe-shaped tomatoes average 6-7 ounces and have nice mild flavor. Disease-resistant plants out-yeild all other yellow tomatoes. Indeterminate.
 (A) 1 Pkt. (30 seeds) \$5.35; 3+ \$4.85 ea

WISCONSIN 55

Wisconsin 55
 00824—(75 Day)—*A Wisconsin and Midwest favorite.* Large, deep red fruits resist shoulder cracks and blossom-end rot, ripen evenly and have strong skin and solid flesh. Vigorous plants are tolerant to defoliation diseases, early blight and leaf spot. Developed at the University of Wisconsin in the 1950s. Semi-determinate.
 (A) 1 Pkt. (30 seeds) \$3.75; 3+ \$3.45 ea;
 (F) 1/16 oz. \$10.95; 2+ \$9.95 ea

BETTER BOY HYBRID

Better Boy Hybrid
 00068—(75 Day)—(VFN)—*A top choice by both professional growers and home gardeners.* Sturdy plants produce a heavy set of large, meaty, deep red, globe-shaped flavorful fruits that weight up to 1 pound each. Indeterminate.
 (A) 1 Pkt. (30 seeds) \$4.25; 3+ \$3.85 ea;
 (G) 250 seeds \$17.95; 2+ \$16.50 ea

CAROLINA GOLD HYBRID

Carolina Gold Hybrid
 00162—(71 Day)—(VFF)—*Colorful, flavorful, healthful.* Extra-large, golden fruits are meaty with a sweet, mild flavor. Testing indicates they may contain more readily absorbable lycopene than red tomatoes. The tomatoes ripen uniformly on vigorous, widely adaptable plants. Stake for optimal performance. Determinate.
 (A) 1 Pkt. (30 seeds) \$6.25; 3+ \$5.65 ea

DELICIOUS

Delicious
 (77 Day)—*This tomato lives up to its name!* It's an excellent slicer with most fruits over 1 pound and many 2-3 pounds in size. Smooth, solid fruits seldom crack and have excellent flavor. Indeterminate.
 00131—(A) 1 Pkt. (30 seeds) \$2.95; 3+ \$2.75 ea
 04992—ORGANIC—(A) 1 Pkt. (30 seeds) \$3.35; 3+ \$3.05 ea

MOUNTAIN MAN HYBRID

MOUNTAIN MERIT HYBRID

Mountain Man Hybrid
 00492—(73 Day)—(FFTSWV)—*These meaty tomatoes are great for topping your best burgers and sandwiches.* A favorite in our trial garden, the 36-42 inch plants produced a bountiful crop of beefsteak tomatoes. The meaty, red fruits average 8½ ounces each, with a wonderful flavor and ideal texture that makes them perfect for slicing. Determinate.
 (A) 1 Pkt. (20 seeds) \$4.95; 3+ \$4.55 ea

Mountain Merit Hybrid
 00497—(75 Day)—(VFFFTSWVEBLB)—*If you like Celebrity Tomato, you'll love Mountain Merit!* The 3-3½ inch round, beefsteak-type fruits are large, weighing 10-12 ounces each with deep red color throughout and smooth, crack-resistant skin. A mild, true tomato flavor along with firm texture makes them perfect for slicing and sandwiches. Determinate. 2014 AAS Regional Winner (Heartland).
 (A) 1 Pkt. (10 seeds) \$4.95; 3+ \$4.55 ea

ULTIMATE OPENER HYBRID

Ultimate Opener Hybrid
 00785—(57 Day)—(VF)—*A new champion among early tomatoes.* The firm, blemish-free fruits average 30% larger than Early Girl and begin ripening at about the same time. The juicy flesh has excellent tomato flavor. Yields are consistently high, ensured by a strong disease resistance package. Developed by the same breeder who gave us popular classics Early Girl and Better Boy Hybrids. Indeterminate.
 (A) 1 Pkt. (20 seeds) \$3.35; 3+ \$3.05 ea

Determinate tomatoes are typically shorter and grow to a fixed mature size. They ripen all their fruit in a short period and do not require staking, unless desired. Indeterminate tomato varieties continue to grow in height after the fruit has formed. They will continue to set and ripen tomatoes until frost. These plants should be both staked and pruned.

MARIANA HYBRID

SUNSUGAR HYBRID

JULIET HYBRID

MOUNTAIN MAGIC HYBRID

PASTE VARIETIES

Mariana Hybrid
00454—(74 Day)—(VFFNAS)—*Extra large Roma-type fruits keep exceptionally well.* The 4-6 ounce fruits are very uniform with deep red, smooth, unblemished skin. The tomatoes have excellent firmness with thick walls and rich red internal color. Plants have excellent vigor, disease resistance and heavy fruit sets. Flavor is top notch, making Mariana an excellent choice for canning, salsas, sauces, juice and fresh eating. Determinate.
(A) 1 Pkt. (30 seeds) \$5.25; 3+ \$4.75 ea

SAN MARZANO

INVINCIBLE HYBRID

San Marzano
00630—(80 Day)—*A classic – considered to be one of the best paste tomatoes available.* Firm, juicy, blocky oval 3½-inch fruits are bright red and hang in clusters. Holds well on the vine and in storage. Fruits have thick flesh and few seeds – ideal for sauces and canning. Indeterminate.
(A) 1 Pkt. (50 seeds) \$3.20; 3+ \$2.90 ea

Invincible Hybrid
00376—(65-70 Day)—(VFFT)—*Disease pressure, heat, too much rain...no problem.* This tomato takes it all in stride and just keeps going. The determinate plants were impressive in our trial garden, setting loads of 3½ ounce, deep red fruits, even under adverse conditions. The tomatoes have a nice, full flavor perfect for salads and a very firm texture that helps them hold well until you're ready to preserve.
(A) 1 Pkt. (10 seeds) \$5.55; 3+ \$5.05 ea

PLUM REGAL HYBRID

Plum Regal Hybrid
00573—(80 Day)—(VFFTSWVEBLB)—*A perfect choice for sauces and salsas.* An exceptional disease-resistant package keeps plants producing, so you'll harvest buckets of these smooth, 3-4 ounce plum tomatoes. The fruits are solid, meaty and bright red throughout with few seeds. Heavy foliage cover protects the abundant fruit set. Determinate.
(A) 1 Pkt. (10 seeds) \$4.75; 3+ \$4.35 ea

CHERRY AND GRAPE VARIETIES

SunSugar Hybrid
00711—(62 Day)—(FT)—*Everything you want in a cherry tomato – sweet and tangy with true tomato flavor.* The deep golden-yellow, ½-ounce fruits are very crack resistant, which is quite remarkable considering their very thin skin. Vigorous plants set fruit early and in huge quantities. Indeterminate.
(A) 1 Pkt. (20 seeds) \$5.15; 3+ \$4.65 ea

SWEET HEARTS HYBRID

Sweet Hearts Hybrid
00745—(60-65 Day)—(FTSt)—*These sweet little grapes live up to their name!* Very uniform, crack resistant, bright red grape tomatoes average ¼ ounce and keep for a long time after picking. The fruits are set in clusters at the top of the plant for easy picking. Indeterminate.
(A) 1 Pkt. (10 seeds) \$7.95; 3+ \$7.25 ea

Juliet Hybrid
00400—(60 Day)—(EB)—*Very good crack resistance and shelf life.* Elongated 1-ounce glossy red fruits are produced in grape-like clusters on high-yielding vines. A favorite for its sweet, rich flavor and high quality. 1999 AAS Winner. Indeterminate.
(A) 1 Pkt. (10 seeds) \$3.95; 3+ \$3.65 ea

SUNGOLD HYBRID

SWEET MILLION HYBRID

Sungold Hybrid
00696—(57 Day)—(FTSWV)—*These golden-orange fruits are oh-so-sweet!* The bite-size, 1-inch globes are thin-skinned with juicy flesh that has unforgettable flavor. You'll crave them like candy! The plants begin bearing very early and are very heavy croppers. The cascading trusses are smothered in fruits that are produced non-stop until frost. Indeterminate.
(A) 1 Pkt. (20 seeds) \$4.85; 3+ \$4.45 ea

Sweet Million Hybrid
00747—(60 Day)—(FT)—*The cherry tomato requested by name.* Plants produce a seemingly endless supply of 1-inch cherry size, bright red fruits that are sugary sweet. Highly resistant to cracking. Indeterminate.
(A) 1 Pkt. (30 seeds) \$4.95; 3+ \$4.55 ea

Candyland Red
00156—(55 Day)—*Sweet, rich flavor in a bite-size package.* Vigorous, yet well-behaved vines produce multitudes of bright cherry-red fruits. The fruits tend to form on the outside of the plant, allowing for easy picking. They are smaller than an average cherry tomato, measuring ½ inch in diameter and weighing ¼ ounce each. 2016 AAS Winner. Indeterminate. (Not pictured).
(A) 1 Pkt. (10 seeds) \$4.25; 3+ \$3.85 ea

Tomato Tower
THE EASIEST AND NEATEST WAY YET TO STAKE TOMATOES!
53375—Simply guide the plant's central stem within the three-prong galvanized wire trough as the plant grows. The "tower" supports the plant upright for maximum yields of large, clean fruit in less space. A pronged base provides a secure anchor to hold the tower in position. Height is 4 feet above ground. Reusable year after year.
Set of 3 towers for \$19.95; 2+ sets \$18.95 ea

Jasper Hybrid
00385—(60 Day)—(FFEBLB)—*You can't stress this tomato!* It has outstanding disease resistance and overcomes weather-related stresses with ease, resulting in extended harvests. The small, round, ¾ inch red fruits weigh less than ½ ounce each, but are big in flavor that's sweet and rich. The fruits are borne on small trusses, hold quality for a long time after picking and resist cracking. Intermediate resistance to Septoria Leaf Spot. A 2013 AAS Winner. Indeterminate.
(A) 1 Pkt. (10 seeds) \$5.15; 3+ \$4.65 ea

JASPER HYBRID

42 DAYS

42 Days
00257—(42 Day)—*One of the world's earliest-maturing tomatoes.* In the past, early ripening tomatoes have tended to lack in flavor, but not this one. Round, 1 ounce, cocktail-type fruits are bright red, have very few seeds and are bursting with excellent flavor. Performs well in both cool and warm locations. Determinate.
(A) 1 Pkt. (20 seeds) \$3.55; 3+ \$3.25 ea

Tomato Crater
53370—*An easy way to get water and plant food to the roots, right where it's needed.* A convenient two-part design allows it to be placed around mature plants, eliminating risk of plant injury. Slots in the base allow for a wire cage to be inserted. The red color warms the soil and reflects red light up into the plant to stimulate plant growth. Helps retain soil moisture, reduces the need for weeding and protects against cutworms.
1 set (3 craters) for \$24.95; 2+ sets \$23.95 per set

Collapsible Tomato Cages
83021—*Simple-to-use cages provide sturdy support.* Set up one cage per determinate plant or two stacked on each other per indeterminate plant. Cages fold to store flat. Made of durable heavy gauge wire. Cages are 14½ inches wide and 40 inches tall.
Sold in sets of 3.
1 set of 3 cages \$39.95; 2+ sets for \$36.95 ea

Tomato Spirals
59064-5—*A simple way to give tomatoes and other vining plants the support they need without tying and retying as they grow.* These sturdy spirals are made from heavy gauge galvanized steel coated with green PVC to blend in with your plants. 59" H.
Each \$17.95

Tomato Plants Available
GRAFTED & GARDEN-READY PLANTS, SEE PAGES 4 & 5

TOKYO CROSS HYBRID

Turnip

Tokyo Cross Hybrid

04015—(40 Day)—*Smooth, white roots.* Semi-globe shaped turnips have pure white flesh that is firm, crisp, fine-grained and mildly flavored. A rapid grower. Seed sown as late as July 15 still produces a fine crop. 1969 AAS Winner.

(A) 1 Pkt. (500 seeds) \$3.95; 3+ \$3.65 ea;
(K) ½ oz. \$14.95; 2+ \$13.45 ea

PURPLE TOP WHITE GLOBE

Purple Top White Globe

(57 Day)—*America's best-known turnip.* Nearly round, smooth roots are purplish-red on top with crisp, sweetly mild white flesh. Bulbs can grow 6 inches or more across, but are best harvested when smaller.

04005—(A) 1 Pkt. (1000 seeds) \$3.15;
3+ \$2.85 ea;

(L) oz. \$4.95; (M) ¼ Lb. \$9.95

04995—ORGANIC—(A) 1 Pkt. (1,000 seeds)
\$3.25; 3+ \$2.95 ea

Watermelons

Watermelons should be planted out after danger of frost is past. Soil temperatures below 60°F inhibit germination. Plant in hills or mounds of organically enriched soil. Space hills 4-6 feet apart. Use Hot Kaps (page 40), Easy Fleece Tunnel (page 40), or Floating Row Covers (page 40) for other plant protection the first few weeks. In short-season areas, start seed indoors in peat pots (page 42) or Super-Size Jiffy-7® Plant Starters (page 42). **Days indicate average time from setting out plants to first ripe fruit.** Do not move the vines when cultivating.

CAL SWEET BUSH

Cal Sweet Bush

04034—(65 Day)—*A short-vined variety great for smaller gardens.* Vines grow only 14-18 inches long, much shorter than most other watermelons, and provide good coverage for the 10-12 pound fruits they produce. Each plant produces 2-3 fruits with deliciously sweet, crisp red flesh. A 2019 AAS Regional Winner (Great Lakes).

(A) 1 Pkt. (25 seeds) \$3.75; 3+ \$3.45 ea

MINI LOVE HYBRID

Mini Love Hybrid

04069—(70 Day)—*A watermelon ideal for smaller garden spaces.* Short, space-saving vines grow only 3-4 feet but still produce up to 6 family-size melons each. Judges loved that the rinds of the 7-9 pound fruits were crack and split resistant, but still thin enough to easily create fruit salad containers. The crisp, deep red, juicy flesh has a sweet, refreshing flavor and very few seeds. A 2017 AAS National Winner. *Cannot ship to: SC.*

(A) 1 Pkt. (10 seeds) \$6.95; 3+ \$6.35 ea

SWEET BEAUTY HYBRID

Sweet Beauty Hybrid

04079—(60 Day)—*Superior taste and easy to grow.* The early-maturing, 6-7 pound icebox-size oblong fruits have a sweet and juicy red flesh and a dark green rind with lighter stripes. Vigorous vines spread up to 9 feet and grow 3 feet tall, forming a semi-upright plant. 2004 AAS Winner.

(A) 1 Pkt. (10 seeds) \$5.15; 3+ \$4.65 ea

SANGRIA HYBRID

Sangria Hybrid

04083—(66-73 Day)—*Grow this one for big fruits!* Oblong fruits average 20-24 pounds and are ideal for sharing at backyard barbecues. Crisp and juicy red flesh is fine-textured with small seeds, high sugar content and exceptional flavor. Vigorous vines are widely adapted and give abundant yields, even in short season areas. Has intermediate resistance to anthracnose and fusarium wilt. *Cannot ship to: SC.*

(A) 1 Pkt. (15 seeds) \$4.95; 3+ \$4.55 ea

MAMBO HYBRID

Mambo Hybrid

04067—(75 Day)—*Produces well, even under cloudy, cool conditions.* Ideal for northern gardens where summer weather can be a bit unpredictable. The oval melons have a small seed cavity containing very few seeds, and crisp, red flesh that is deliciously sweet. Fruits hold well, allowing you to enjoy them over a longer period of time. AAS judges praised the high seed germination and vigorous, healthy vines. A 2019 AAS National Winner.

(A) 1 Pkt. (10 seeds) \$7.95; 3+ \$7.25 ea

YELLOW DOLL HYBRID

Yellow Doll Hybrid

04140—(68 Day)—*Sweet, yellow flesh.* Melons are round, 6-8 pounds, with a thin rind of deep green with lighter stripes. Flesh is bright yellow and unusually sweet and delicious. Can be grown on a trellis where space is limited.

(A) 1 Pkt. (25 seeds) \$8.25; 3+ \$7.45 ea

CRIMSON SWEET

Crimson Sweet

(70 Day)—*This watermelon has it all—exceptional sweetness, high quality and disease resistance.* Large 15-25 pound melons have a blocky-round shape and a thin, tough rind. Fine-textured bright red flesh is free from stringiness and unusually sweet. Has few seeds, and they are very small. Vigorous vines have resistance to anthracnose and fusarium wilt.

04045—(A) 1 Pkt. (50 seeds) \$3.35;
3+ \$3.05 ea; (K) ½ oz. \$5.65

04998—ORGANIC—(Cannot ship to: SC)
(A) 1 Pkt. (50 seeds) \$3.95; 3+ \$3.65 ea

SEEDLESS WATERMELONS

SUPER SWEET AND NO MESSY SEEDS

For good eating, these seedless triploid watermelons are unequalled. Flesh is juicy, firm, crisp and nearly seedless. The few whitish seeds that may be present will be soft and edible. As seedless varieties require a pollinator, each packet includes 5 additional seeds of another cross-pollinating variety, to be planted in an alternating pattern along with the seedless variety. The fruit of these other 5 will sport a contrasting rind color pattern to easily tell them apart.

YELLOW BUTTERCUP HYBRID

Yellow Buttercup Hybrid

04138—(75 Day)—*Regarded as one of the best yellow-fleshed, seedless watermelons available.* Bright lemon-yellow flesh is juicy and dense with a high sugar content, giving it a crisp texture and super-sweet flavor. Rounded fruits weigh 14-16 pounds each. Rind has dark green mottled stripes over a lighter green background. High-yielding vines. *Cannot ship to: SC.*

(A) 1 Pkt. (10 seeds plus pollinator) \$9.45;
3+ \$8.55 ea

WATERMELON SEED LIABILITY NOTICE: We assure that our watermelon seeds meet federal germination standards, but claim no responsibility for losses caused by seedborne organisms.

SUMMER SWEET®
5234 PLUS HYBRID

Summer Sweet® 5234 Plus Hybrid

04132—(73 Day)—*Exceptionally crisp flesh with outstanding flavor.* The flesh is deep red, juicy and seedless. Blocky, slightly oval fruits average 16-20 pounds and have rinds that are striped with green. Overall quality is excellent. Large, strong vines are heavy-yielding. Has resistance to Fusarium race 1 and tolerance to Anthracnose race 1.

(A) 1 Pkt. (10 seeds plus pollinator) \$6.45;
3+ \$5.85 ea

SOLITAIRE HYBRID

Solitaire Hybrid

04077—(70 Day)—*A mini seedless melon perfect for an individual or small family. No leftovers.* Round fruits are larger than a softball but smaller than a soccer ball, weighing 3½-5 pounds each. The deep red flesh is crisp and very sweet and the hard, dark green rind has lighter green stripes. Early maturity makes it a great choice for short-season areas. Due to shorter vines, 15-20 inch spacing is recommended when planting, resulting in high yields from a small space. *Cannot ship to: SC.*

(A) 1 Pkt. (10 seeds plus pollinator) \$8.75;
3+ \$7.95 ea

HARVEST MOON HYBRID

Harvest Moon Hybrid

04121—(80-100 Day)—*Like the treasured heirloom Moon & Stars watermelon—only better!* Harvest Moon features healthy, shorter vines and is earlier to ripen, higher yielding, better tasting and, best of all, seedless. The 18-20 pound rounded-oval fruits retain the familiar dark green rind with yellow dots, while inside the pinkish-red flesh is ultra-sweet and crisp. 2013 AAS Winner.

(A) 1 Pkt. (10 seeds plus pollinator)
\$7.95; 3+ \$7.25 ea

Annual Flowers

WHAT IS AN ANNUAL? Annual flowers bloom the year they are planted. They will tolerate cool weather, but not frost, and generally live for only one season. **STARTING FLOWERS FROM SEED** is a great winter hobby that pays dividends all summer. We include detailed growing instructions on our packets to help ensure your success.

BETTY JUNG MIX

SINGLE MIX

Aster (DS-SI)

05189-BETTY JUNG MIX—Glorious summer color. Enjoy fluffy, double flowers in shades of purple, deep rose, pink, violet and white. Blooms from midsummer through early fall. Ht: 12-36". ○ ▶ ☞

(A) 1 Pkt. (50 seeds) \$3.25; 3+ \$2.95 ea

05192-SINGLE MIX—Cheery blooms are great for late season color. Single flowers appear in shades of purple, deep rose, pink, violet and white. Blooms from midsummer through early fall. Ht: 12-36". ○ ▶ ☞

(A) 1 Pkt. (100 seeds) \$3.95; 3+ \$3.65 ea

CLASSIC MAGIC MIX

Bachelor Buttons (DS-SI)

05431-CLASSIC MAGIC MIX—Enchanting blooms for the summer garden. A single and semi-double mix including dark purple with white tips, white with purple centers and many other combinations. Blooms from June to September. Ht: 40". ○ ☞

(A) 1 Pkt. (100 seeds) \$3.95; 3+ \$3.65 ea

JUNG'S HYBRID MIX

Flowering Cabbage and Kale (DS-SI)

05711-JUNG'S HYBRID MIX—Fall color for beds and containers. Cabbage-like plants, 12 inches or more across, have frilled and lacy leaves that take on vibrant shades of red, pink and white as cool weather sets in. Includes a range of textures and colors. Ht: 8-12". ○

(A) 1 Pkt. (50 seeds) \$6.15; 3+ \$5.55 ea

CHIEF MIX

PACIFIC BEAUTY MIX

Celosia or Cockscomb (DS-SI)

05388-CHIEF MIX—Vibrant, globe-shaped blooms are perfect for bouquets. Large, dense heads appear in shades of red, yellow, orange and pink. Strong stems hold the blooms upright in garden beds and bouquets. Ht: 24-36". ○ ☞

(A) 1 Pkt. (50 seeds) \$5.15; 3+ \$4.65 ea

Calendula (DS)

05350-PACIFIC BEAUTY MIX—Semi-double to double blooms in warm hues of yellow, orange and gold are ideal for beds and borders. Petals are edible as long as plants have not been treated. Begins blooming in midsummer. Ht: 12-24". ○ ▶ ☞

(A) 1 Pkt. (75 seeds) \$3.25; 3+ \$2.95 ea

QUEEN MIX

Cleome or Spider Flower (DS)

05462-QUEEN MIX—A thrifty mix that adds tons of color. Each branch is tipped with large, airy blooms in shades of rose, violet and white. Drought-tolerant plants flower from early summer until frost. Ht: 3-5'. ○ ▶ ☞

(A) 1 Pkt. (100 seeds) \$3.25; 3+ \$2.95 ea

DOUBLE CLICK MIX

COSMIC MIX

RUBENZA

Cosmos (DS-SI)

Easy-to-grow, colorful annuals. Blooms just 8-10 weeks after sowing. Ferny foliage makes a superb filler in bouquets. Tolerates heat, humidity and drought. ○ ☞

05526-DOUBLE CLICK MIX—Double and semi-double blooms in a gorgeous mix of pink, carmine, rose and white. Ht: 36-48".

(A) 1 Pkt. (50 seeds) \$4.65; 3+ \$4.25 ea

05523-COSMIC MIX—Stocky plants produce loads of 2-inch double and semi-double bright, non-fading blooms in shades of orange, red and yellow. Ht: 12-18".

(A) 1 Pkt. (50 seeds) \$3.75; 3+ \$3.45 ea

05540-RUBENZA—Big 2½-3 inch blooms are rich ruby-red, an unusual color for cosmos. Ht: 24-32".

RASPBERRY ICE IMPROVED

Opera Supreme™ Raspberry Ice Improved Petunia (SI)

07438-Gorgeous, season-long color. Vigorous, trailing plants have less day length sensitivity, so they bloom earlier and longer than other varieties. Iridescent light pink blooms with darker centers blanket the plants all season. Ideal for landscapes as well as combo planters and hanging baskets. Ht: 4-8", W: 30-40". (Pelleted seed) ○

(A) 1 Pkt. (10 pellets) \$5.75; 3+ \$5.25 ea

PELLETED SEEDING TIPS: Seeds are pelleted for more accurate sowing, reduced thinning and quicker germination. Do not cover seed. Gently press pelleted seed into pre-moistened, sterile soil media. Water adequately, keeping soil evenly wet in order to dissolve the pellet. Keep bottom heat on seed containers at a range of 72-76°F. Germination takes approximately 1 week. Slightly reduce soil moisture after seeds germinate. Light is optional, however Starfish Mix and Plum Pudding Mix benefit from light during germination.

Tidal Wave® Hybrid Petunias (SI) GROW AS A GROUND COVER OR HEDGE

The ultimate petunias for landscaping. When spaced 12 inches apart, they form a hedge of flowers 16-22 inches tall. Spaced 24 inches apart, they'll spread like a ground cover 8 inches tall and 5 feet wide. With support such as a trellis or bush, Tidal Wave® plants grow almost like a vine. They recover quickly from rain showers, won't fall open in the center and have excellent Botrytis tolerance. Once you've tried them you won't plant any other petunia. (Pelleted seed) ○

BLACK ADDER

Black Adder Agastache

10077—(A. 'Black Adder')—Zones 5-9—*Bee and butterfly magnets!* These smoky-lilac, bottlebrush-like flower spikes have a long-lasting appeal and keep color in the landscape for weeks, beginning in midsummer. Plants have aromatic foliage and are very drought and heat tolerant, making them excellent additions to the perennial border. Ht: 2-3'. ○ ▶ ✂ PP
1 plant \$12.95; 3+ \$11.95 ea

STORM CLOUD

Storm Cloud Amsonia

10162—(*Amsonia tabernaemontana* 'Storm Cloud')—Zones 4-9—*Incredibly low maintenance.* This North American native cultivar is deer resistant, heat tolerant and not picky about the soil it's grown in. In early spring, stems emerge dark purple, almost black, and develop olive green leaves. Bears light blue, starry flowers in later spring. Vase-shaped plants make great alternatives to shrubs. Ht: 36". ○ ▶ BR
1 plant \$15.95; 3+ \$14.95 ea

SPARKLING STARS PINK®

Sparkling Stars Pink® Astrantia

10713—(A. *major* 'Sparkling Stars Pink')—Zones 4-7—*Attracts loads of bees and butterflies.* Sturdy stems bear 2 inch pincushion-like, deep pink blooms from June to August. Combined with deeply divided foliage, these plants add an airy feel to beds and borders. Prefers moist, fertile soil. Ht: 28". ○ ▶ ✂ BR
1 plant \$15.95; 3+ \$14.95 ea

MILLENIMUM

Millenium Allium

60193—(A. 'Millenium')—Zones 5-8—*Bees and butterflies love these blossoms!* Glossy, green foliage gives off a slight smell of onions when crushed and forms compact clumps that are quite drought tolerant. In midsummer, 2-inch balls of bright rosy purple florets appear just above the foliage and last for weeks. Favored by pollinators, but not deer and rabbits. Ht: 15-20". *Cannot ship to: AK, HI, ID, WA.* ○ ▶ ✂ BR
1 plant \$14.95; 3+ \$13.95 ea

SUN KING

Sun King Aralia

10321—(A. *cordata* 'Sun King')—Zones 3-9—*This fast-growing plant adds unique color and texture to landscapes.* In deep shade, the leaves will be chartreuse to lime green in color, and with a little more sun they will glisten golden-yellow. Plants form large, rounded mounds and in late summer, spikes of small, white flowers give way to purple-black inedible berries. Ht: 3'-5'. ▶ ● PP
1 plant \$16.95; 3+ \$14.95 ea

AMERICAN GOLDFINCH

American Goldfinch Baptisia

10720—(B. 'American Goldfinch')—Zones 4-9 (P.P. 30478)—*Light up your late spring landscape with this bold beauty.* One of the most floriferous baptisias that we've seen yet, this native cultivar puts out loads of bright yellow floral spikes week after week beginning in late spring. Plants are perfect for filling in large garden spaces, thriving with very little maintenance once established. Ht: 3-3½'. ○ ▶ ✂ BR
1 plant \$17.95; 3+ \$15.95 ea

DeWit® Perennial Planter

53145—**Just the right size for dividing and planting perennials.** At just 21 inches long, you can easily fit this little spade into tight spaces and use it while kneeling or standing. The T-shaped design of the handle eases stress on the hand and wrist. The heart-shaped head is forged from high-carbon steel and measures 5 inches long by 4½ inches wide. Made in Holland.

Each \$42.95

KARL FOERSTER

Karl Foerster Feather Reed Grass

11971—(*Calamagrostis acutiflora* 'Karl Foerster') Zones 4-8—**Remains upright and attractive through the winter.** This non-invasive grass forms tidy clumps of deep green, lustrous, slightly arching foliage. Purplish, 5-6 foot, feathery inflorescences emerge in early summer, turning wheat-colored and spiky towards fall. Plant in any moist, well-drained soil. Ht: 24-36". ○ PP

1 plant \$13.95; 3+ \$12.95 ea

KOREAN FEATHER

Korean Feather Reed Grass

17111—(*Calamagrostis brachytricha*)—Zones 4-9—**Bears fluffy plumes beginning in late summer, even in partial shade.** This Asian native is well-adapted to partially shaded, woodland areas. Forms an upright clump of green foliage up to 36 inches wide, bearing its 12-inch airy plumes just above the arching blades. In sunny locations the habit will be tighter and the pink-tinted plumes more profuse. Hardy and quite adaptable. Ht: 36". ○ ▶ ✂ PP

1 plant \$13.95; 3+ \$12.95 ea

BLUE WHISKERS

Blue Whiskers Fescue Grass

17119—(*Festuca glauca* 'Bue Whiskers') Zones 4-8—**Displays bright, silvery-blue color all summer.** Mounded clumps grow up to 28 inches across. In early summer, yellow-green inflorescences appear well above the foliage, adding another dynamic to this attractive plant. Quite drought tolerant once established. Ht: 10-12". ○ ▶ PP

1 plant \$15.95; 3+ \$14.95 ea

Hardy grasses add structure and texture to perennial plantings. They are generally easy to maintain, requiring only an annual shearing before spring growth starts. Allow 2-3 years for them to grow to their full potential.

Fire Dragon Maiden Grass

17145—(*Miscanthus sinensis* 'Fire Dragon') Zones 4-9—(P.P. 30374)—**Fiery colors are glorious in the fall landscape.** Arching foliage is a fresh shade of green for spring and summer before turning to vibrant hues of orange and red for fall. Beginning in July, silver flower plumes appear, adding wonderful winter interest if left uncut. Produces virtually no seed, so it will not spread. Ht: 6-7'. ○ ✂ PP

1 plant \$16.95; 3+ \$14.95 ea

FIRE DRAGON

Huron Sunrise Maiden Grass

12124—(*Miscanthus sinensis* 'Huron Sunrise') Zones 4-9—**Masses of flower plumes command attention in the fall garden.** Green leaves with silvery midribs have a graceful, arching habit that is attractive all summer, and even looks great when dry in the winter. The burgundy flower plumes are fantastic for adding winter interest to your landscape. Deer resistant. Spreads up to 3 feet. Ht: 5-6'. ○ ▶ ✂ PP

1 plant \$14.95; 3+ \$13.95 ea

HURON SUNRISE

Praline™ Fountain Grass

12136—(*Pennisetum alopecuroides* 'Tift H18') Zones 5-9—(P.P. 30724)—**Non-invasive and sterile, this long-blooming fountain grass will stay put where you plant it.** Compact mounds of arching, rich green foliage bloom early, sending up brownish plumes all summer long. Great for containers and mixed plantings. Seed heads offer nice winter interest. Ht: 18-24". ○ ▶ ✂ PP

1 plant \$14.95; 3+ \$13.95 ea

PRALINE™

SHENANDOAH

Shenandoah Red Switch Grass

12132—(*Panicum virgatum* 'Shenandoah') Zones 4-9—**Unmatched for burgundy fall color.** Blue-green in early summer, the leaves can take on dark red hues by July and turn wine-colored by September. Reddish-purple flowerheads appear over the foliage in midsummer, maturing to seedheads of silver in fall. Grows up to 36 inches wide. Ht: 3-4½'. ○ ▶ PP

1 plant \$13.95; 3+ \$12.95 ea

Twilight Zone Little Bluestem

12020—(*Schizachyrium scoparium* 'Twilight Zone') Zones 3-9—(P.P. 27432)—**Eerily iridescent foliage shimmers in the landscape.** The silvery-mauve cast of this grass appears in midsummer and lasts into fall when brighter purple tones appear. Holds up well in hot, dry conditions. Plants form 2-foot clumps. A native cultivar. Ht: 3-4'. ○ PP

1 plant \$14.95; 3+ \$13.95 ea

TWILIGHT ZONE

Standing Ovation Little Bluestem

17167—(*Schizachyrium scoparium* 'Standing Ovation')—Zones 3-8—(P.P. 25202)—**The fantastic colors of the fall foliage are definitely worth a round of applause.** Blue-green foliage turns fiery shades of orange, red, yellow and purplish-brown in autumn. But as wonderful as the fall color is, the form is even more impressive. The stems hold their tight, upright form through the entire season, even in rich soils. A native cultivar. Ht: 3-4'. ○ PP

1 plant \$15.95; 3+ \$14.95 ea

STANDING OVATION

Golden Sunset™ Yellow Prairie Grass

17179—(*Sorghastrum nutans* 'MNYG318153') Zones 3-9—(P.P. 33776)—**Stands tall and upright, even through northern winters.** Topped with numerous golden-bronze inflorescences beginning in mid-August, narrow, ½ inch, olive-green blades transition to brilliant shades of golden yellow in fall. Drought tolerant, deer resistant and widely adaptable. A native cultivar. Ht: 4-6'. ○ ▶ PP

OLD FASHIONED SINGLE MIX

Old Fashioned Single Mix Hollyhock

(Alcea rosea)—Zones 3-9—These heirloom favorites provide a wonderful vertical flower display from mid to late summer. Our traditional cottage-type hollyhocks have single flowers in a wide range of bold, beautiful colors. Although biennials, they often grow as perennials if deadheaded after flowers are spent. Plant in well-drained soil. Ht: 6-8'. ○ ✕ ♀ PP

08336 (A)—SEED—Pkt. (50 seeds) \$3.95
08336 (PL)—PLANTS—1 plant \$9.95; 3+ \$8.95 ea

(H. hybrida)—The color range of heucheras is extraordinary. From late spring through much of summer, their low, dense mounds of rounded, scalloped leaves are topped with sprays of dainty bell-shaped flowers that are favorites of hummingbirds. Great for both rock gardens and borders. Plants prefer rich, moist soil with good drainage.

Empress Wu Hosta
 17527—(P.P. 20774)—*Possibly the largest hosta ever!* Massive 18 inch dark green leaves are thick, deeply veined and slug-resistant. Forms an upright clump up to 6 feet wide. In early to midsummer, spikes bearing violet flowers appear just above the foliage. Use it as a shrub for shade or background for other shade plants. Ht: 3-4'. **PP**
 1 plant \$15.95; 3+ \$14.95 ea

Brim Cup Hosta
 12413—*This small hosta gleams like a beacon.* Round to heart-shaped, cupped leaves of mid-green are edged with very wide, irregular, creamy-chartreuse-to-white margins. The foliage becomes stiff and seer-suckered when mature. Plants form nice clumps 12 inches wide. Pale lavender flowers appear in midsummer. Tolerates up to ¾ day sun. Ht: 8-12". **BR**
 1 plant \$13.95; 3+ \$12.95 ea

Dancing Queen Hosta
 17519—*Gleaming yellow color stands out like a full moon in a dark sky.* Foliage emerges bright yellow and transitions to a glowing soft yellow shade that holds all season. Pale lavender flowers on 28-inch stems and lovely piccrust ruffling on the leaf edges complete the look. Plants grow up to 30 inches wide. Ht: 18". **PP**
 1 plant \$15.95; 3+ \$14.95 ea

Jurassic Park Hosta
 17455—*The name alone should give you a clue that this hosta grows to a monstrous size!* The dark green, heavily corrugated leaves grow approximately 17 inches long and 15 inches wide, but it's the overall plant size that is truly impressive. Considered a fast grower, mature plants easily spread up to 9 feet wide, leaving a massive impression on your landscape. Floral scapes hover just above the foliage and bear light lavender flowers beginning in July. Ht: 40". **BR**
 1 plant \$13.95; 3+ \$12.95 ea

Wu-La-La Hosta
 17492—(P.P. 31309)—*Take 'Empress Wu', add a variable margin, and you have 'Wu-La-La'.* Large, blue-green leaves have apple green margins and a corrugated texture that gives them great slug resistance. Purple florets appear just above the foliage in early summer. It will take several years for plants to reach their full size, but once they do they're certain to be show-stoppers. Grows 5-6 feet wide at maturity. Ht: 3-4'. **PP**
 1 plant \$19.95; 3+ \$17.95 ea

Lakeside Paisley Print Hosta
 17550—*Simply stunning!* Cupped and rippled, heart-shaped 7-inch leaves display a lovely green and cream feathered pattern. Grows up to 20 inches wide. Bears light lavender flowers beginning in June. Ht: 10". **BR**
 1 plant \$16.95; 3+ \$14.95 ea

Aphrodite Hosta
 12459—*A double-flowered selection of the 'August Lily.'* The true highlight of this hosta is the elegance and superb fragrance of the large, double white flowers that bloom from August to September. Leaves are shiny light green, 11 inches long, with a smooth texture. Spreads up to 36 inches wide. Ht: 18". **BR**
 1 plant \$16.95; 3+ \$14.95 ea

Island Breeze Hosta
 17454—(P.P. 27151)—*Let this hosta add some fresh island fun to your garden.* Vibrant in the shade, thick, corrugated leaves emerge with bright yellow centers and wide, dark green margins, with the center becoming more chartreuse in summer. Showy red petioles spread up into the leaves, and dark lavender flowers appear midsummer. Ht: 12". **PP**
 1 plant \$16.95; 3+ \$14.95 ea

Drop-Dead Gorgeous Hosta
 17428—(P.P. 33318)—*A hosta you just can't miss, especially if you're a fan of 'Empress Wu'.* Large, pretty as a picture plants stretch over 7 feet wide at maturity giving them a commanding presence in shady landscapes. Green-centered leaves grow up to 17 inches long and 11 inches wide, with an irregular yellow margin and heavily rippled texture that lends an overall wavy appearance. Bears white flowers in midsummer. Ht: 30". **PP**
 1 plant \$16.95; 3+ \$14.95 ea

Zones 3-8—Hardy hostas are ideal for ground covers, low borders, edgings and around the base of trees. They prefer soil with good organic matter content for water retention. In northern locations, the foliage freezes to the ground, but appears early in spring to last all season. Plant the crown 2-2½ inches below ground level. ●●

HOSTA FAVORITES COLLECTION

SANTÉ

Shasta Daisies

(*Leucanthemum x superbum*)—A perennial garden classic. Shasta Daisies are favorites both in the garden and for cutting as they bloom throughout much of the summer and into fall, if kept deadheaded. Give them a well-drained location, good soil and some winter protection, and they'll give years of pleasure. ○ ▶ ♀ PP

11063-BANANA CREAM II—Zones 5-9 (P.P. 33851)—Better than the original, the lemon-yellow color now holds longer before turning to creamy white, and the plants are much more floriferous and earlier to flower. Begins blooming in early summer. Ht: 20-24".

1 plant \$14.95; 3+ \$13.95 ea

MADONNA—Zones 3-9—The semi-double, white blooms most frequently sport a clean, classic look, but occasionally some of the petals have a laced-edge offering unique variety. Compact, mounded plants make a tidy, picture-perfect display. Flowers the first year from seed. Ht: 8-10".

09076 (A)—SEED—Pkt. (30 seeds) \$4.85

09076 (PL)—PLANTS—1 plant \$12.95; 3+ \$11.95

11085-SANTÉ—Zones 4-9—(P.P. 19829)—Pure white, large, fluffy flowers begin blooming in July and August, making an impressive flower display. Stiff, very strong stems with dark green foliage require no staking. Ht: 18-24".

1 plant \$12.95; 3+ \$11.95 ea

NEW VINTAGE™ ROSE

New Vintage™ Rose Yarrow

10042—(*Achillea millefolium* 'Balvinrose')—Zones 4-9—(P.P. 25712)—**Flowers from late spring all the way until frost.** Upright, bushy plants have soft, airy foliage and produce abundant clusters of rose-pink florets. Ideal for hot, dry locations, plants require regular trimming to remain in bloom. Ht: 26-28". ○ ♀ PP

Woodland Wildflowers

Made for shade. We offer a selection of the most popular wildflowers often found in wooded areas of Wisconsin. For the most part, they are shade loving or shade tolerant and prefer a slightly acid soil rich in humus. Our wildflowers are not collected from the wild, but are produced by reputable, licensed growers. ▶ ● BR

14726-WHITE TRILLIUM—(*T. grandiflorum*) Zones 3-8—Single flowers consist of 3 large white petals borne on stems with 3 leaves. Blooms in April to May. Ht: 12-15".

14724-PURPLE TRILLIUM—(*T. erectum*) Zones 4-9—Related to the white trillium with striking reddish-purple blooms. Blooms in spring. Ht: 12-18". (Not pictured).

14727-YELLOW TRILLIUM—(*T. luteum*) Zones 5-8—Scented yellow flowers in spring. Mottled leaves. Ht: 12-18". (Not pictured).

14716-VIRGINIA BLUEBELLS—(*Mertensia virginica*)—Zones 3-8—Pink flower buds open into dainty flowers of porcelain blue borne in nodding clusters. Blooms in April to May. Ht: 18-24".

14720-BLOODROOT—(*Sanguinaria canadensis*)—Zones 3-8—Anemone-like 2-inch white blooms emerge on red stems in April or May. Lobed foliage remains attractive. Ht: 4-6".

14708-DUTCHMAN'S BREECHES—(*Dicentra cucullaria*)—Zones 3-8—Bears racemes of white, yellow-tipped, ¾-inch flowers in early spring. Clump-forming plants. Ht: 8".

14704-JACK-IN-THE-PULPIT—(*Arisaema triphyllum*)—Zones 3-9—The flower of this unique plant is a hooded pitcher with a curved tongue of green, striped and flecked purplish-brown. Blooms April to June. Red fruit clusters follow in late summer. Ht: 12-24".

14712-WILD GERANIUM—(*Geranium maculatum*)—Zones 4-8—Grown from rhizomes, these rosy-purple flowers can be seen from April to June. Ht: 18-24".

14710-SHOOTING STARS—(*Dodecatheon meadia*)—Zones 4-8—Umbels of 10-20 strongly reflexed flowers are purplish-pink and sometimes white, all with pointed anthers. Plants have basal rosettes of long leaves and bloom from April to June. Ht: 8-15".

Dahlias

Giant-sized flowers in beautiful colors. Enjoy an amazing number of blooms beginning in mid to late summer. The tubers are frost-sensitive and should be dug in fall. Ht: 30-40" (unless noted). (Top size field clumps) ○ ✕

- 63106-MYRTLE'S FOLLY**—Giant puff ball, 8-inch blooms of twisted petals in shades of deep pink, pale orange and yellow.
- 63176-ZORRO**—Huge, non-fading dark red blooms consistently measure over 10 inches.
- 63116-OTTO'S THRILL**—Blooms up to 11 inches across that are apricot-pink with lighter edges.
- 63086-LILAC TIME**—Huge 10-inch blooms of deep violet-purple.
- 63158-THOMAS EDISON**—Blooms up to 10 inches across are a deep shade of reddish-purple.
- 62912-AVIGNON**—Creamy white, 8-10 inch blooms are variably splashed with violet.
- 62954-CRÈME DE CASSIS**—Six-inch blooms are lavender with a purple reverse.
- 63004-PINELANDS PRINCESS**—Large 7-inch blooms have twisted petals of soft pink-lavender.
- 62944-CAFÉ AU LAIT**—Grand 9-inch blooms are a frothy blend of cream and peach.
- 63014-EMORY PAUL**—Enormous 12-14 inch blooms are bright rosy purple. Truly magnificent.
- 62921-BELLE OF BARMERA**—Gigantic 10-inch blooms are a blend of hot pink and coral.
- 62995-DAZZLING SUN**—Brilliant, golden yellow, 7-inch flowers with bright red accents toward their centers.
- 63112-OPTIC ILLUSION**—White petaloids are interspersed amid layers of rosy-purple petals. 5-inch blooms.
- 63069-HAPPY SINGLE WINK**—Dramatic dark foliage contrasts beautifully with the 4-inch, lilac pink, red-eyed blooms. Ht: 24".
- 63165-WHITE PERFECTION**—The elegant white, immense blooms are 9-10 inches across.
- 62994-DAZZLING MAGIC**—Dinner-plate size, 7-inch blooms of soft yellow are accented with dark red-orange. No two blooms are alike.
- 62928-BISHOP OF LLANDAFF**—Large blooms of intense red. Dark bronze-purple foliage.
- 63145-SANTA CLAUS**—Red and white, 6-8 inch blooms are like giant pinwheels.
- 62936-BODACIOUS**—Massive 8-10 inch red-orange blooms are tipped with yellow.
- 63080-LAMBADA**—Rose-pink petals encircle a tufted creamy-white anemone center and rose-red heart. 6-inch blooms.
- 62902-AKITA**—Huge 8-10 inch blooms of orange-red with yellow centers and creamy white petal tips.
- 63075-KELVIN FLOODLIGHT**—Gigantic yellow 9-11 inch blooms.
- 62914-BABYLON BRONZE**—An immense size dahlia with 9-10 inch copper-orange blooms.

Order Information

THE JUNG GUARANTEE

Please open and inspect your shipment immediately upon arrival and notify customer service within 72 hours of any perceived issues or problems. We reserve the right to request good representative photos of the plants or products in question, or the possible return of any product deemed unsatisfactory prior to approval of any adjustments. We do not guarantee against loss due to local seasonal weather conditions, neglect, disease, or damage from insect or animal pests, as these conditions are outside of our control. In no case will we be liable for any amount greater than the purchase price.

SPRING SHIPMENTS: A credit voucher will be issued one time for any plant materials which fail to grow, provided they have been properly planted and cared for, according to our instructions, and we are notified within 90 days of shipment receipt. Annual plants (flowers, herbs, and vegetables) are only guaranteed to arrive in good condition. Sale items will only be issued a credit voucher for the purchase price.

SEEDS: We guarantee that the seeds we sell conform to the label description, as required by State and Federal Seed Laws, within recognized tolerances. We make no other guarantees, expressed or implied, of merchantability, fitness for purpose, or otherwise, of the seed or of the crops grown from the seed, other than germination. If seeds have been properly cared for, according to our instructions, and still fail, we will issue a credit voucher one time. Our liability is limited to the purchase price of the seed.

GARDENING SUPPLIES & ACCESSORIES (non-growing items): We guarantee complete satisfaction when used according to manufacturer's instructions. Report any unsatisfactory products within 30 days of shipment receipt for replacement, credit or refund of the purchase price.

Shipping charges are not refundable. Jung Seed Co. mail orders cannot be returned at Jung Garden Center locations.

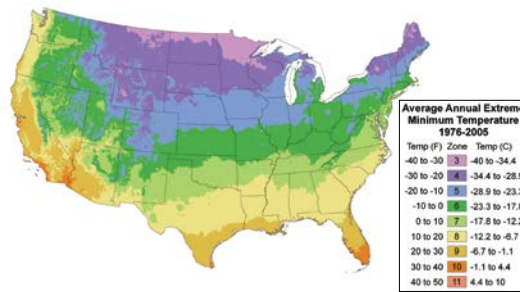

****IF YOU NEED HELP WITH YOUR PRODUCTS...** contact us as soon as a problem is noticed. We aim to provide our customers with the highest level of horticultural support, advice and assistance to help them be successful with their gardens. We can be emailed at info@jungseed.com, called at 1-800-297-3123, or contacted through Facebook Messenger or Instagram Direct Message.

Hardiness Zone Map

This new simplified plant zone map issued in 2012 is available to view in full detail online. There is an interactive online feature that allows you to find your hardiness zone by typing in your zip code. Type this link into your web browser, <http://planthardiness.ars.usda.gov> or follow the Zone Map link on our website at www.jungseed.com to find your hardiness zone.

Hardiness zones are based on the average minimum temperatures for each zone. Lower numbers indicate the most northerly area where plants will survive the winter and higher numbers are the most southern area where they will perform consistently. Recommended plant zones are meant as guidelines only. Other plant growth factors may affect hardiness such as rainfall, wind, humidity, soil type, altitude, sunlight and cultural practices.

It's always best to use your instincts, observe other gardens in the area and be willing to do some experimenting with plant locations and plant protections.

HOW TO ORDER

WEBSITE: www.jungseed.com

(We accept all major credit cards.)

PHONE: (orders only): **1-800-247-5864**

Available 8:00 a.m. - 4:30 p.m. CST Monday-Friday

FAX: **1-800-692-5864**

MAIL:

- Use our order form insert in the middle of this catalog.
- If order is to be delivered to another location, include complete 'Ship To' address with physical address and P.O. Box, if applicable.
- Include a money order, or if paying by check or credit card, provide the necessary information in the space provided. We accept VISA, MASTERCARD, AMERICAN EXPRESS and DISCOVER. Credit cards and electronic checks will be charged at the time the order is placed.

SHIPMENT INFORMATION

- Seeds are usually sent immediately. Live plants, bulbs, shrubs and trees are shipped at the best time for planting in your area. **Due to danger of freezing in transit, perishable plant material will not be shipped before March 1.** Limited nursery stock will be shipped after June 1, until our fall shipping resumes.
- **Upgraded shipping:** This charge covers accelerated processing time and an upgraded shipping method. In-stock seeds and supplies typically ship immediately. Plant material will still ship at the proper planting time for your area. Please include the Upgraded Shipping Charge with your payment if you would like this service.

SHIPPING RESTRICTIONS

AK - No shipments of plant material or supplies.

HI, APO, FPO, PUERTO RICO or other countries - No shipments of any kind.

Additional state restrictions may apply and are listed by individual items, in category descriptions, or in headings. Please check the catalog or visit our website. Please check with your local Cooperative Extension Office or Department of Agriculture for specific restrictions in your area.

SHIPPING CHARGES

Orders of seeds only
Standard: **\$5.95**
Upgraded: **\$35.90**

All other orders
Standard: **\$15.95**
Upgraded: **\$45.90**

*Allow 5 to 7 business days for transit time.

CHECK ACCEPTANCE POLICY

When you provide a check payment, you authorize us to process a one-time ACH debit entry for up to the amount of your check. You also authorize us to process credit adjustments to your bank account if a refund is needed. If you have insufficient funds to cover your payment, you authorize us to collect your payment plus a fee of \$40 from your account. Funds may be withdrawn from your account on the same day we receive your payment. Sending a paper check increases processing time and you may not receive your check back from your financial institution.

MAGENTA BLISS

ORANGE BURST

WHITE SHIMMER

Solarscape™ Hybrid Impatiens

These easy-care summer favorites can now be grown in full sun too! Mounded plants spread up to 20 inches wide and bear oodles of satiny 2½-inch blooms throughout the summer. Ideal for adding just a touch of the tropics to both garden beds and containers. Start seeds indoors 12-14 weeks before your last frost date. Ht: 9-11". Annual. ▶ ○

06402-MAGENTA BLISS

06403-ORANGE BURST

06404-WHITE SHIMMER

(A) 1 Pkt. (10 seeds) \$6.95; 3+ \$6.35 ea

**SCAN HERE TO SHOP
 OUR MOBILE WEBSITE!**

POLARGREEN™

Polargreen™ Colocasia

61660-Zones 5-11-*This exotic-looking plant is no longer just for tropical regions.* Gardeners as far north as zone 5 can now enjoy a touch of the tropics in their landscapes, without having to lug around heavy containers. This non-bulbing *Colocasia* produces pink stems topped with large, rich green leaves which will die back to the ground in winter, but return the following spring. Ht: 3-5'. ○ ▶ PP

1 plant \$14.95; 3+ \$12.95 ea

OCEAN SUNSET™ ORANGE GLOW

Ocean Sunset™ Orange Glow Ice Plant

11216-(*Delosperma hybrida* 'T18-7')-Zones 5-9-(PPAF)-*A low-maintenance plant that offers color from late spring to late summer.* Once established, plants are drought and heat tolerant, plus they can withstand light frosts. Their orange and pink bicolor flowers open mid-morning and are larger than those of many other ice plants. Ideal for rock gardens, borders and embankments where their spreading habit is appreciated. Ht: 4-6". ○ PP

1 plant \$15.95; 3+ \$14.95 ea

BOHAN HYBRID

Bohan Hybrid Beet

01310-(55-65 Day)-*A heat-tolerant variety that adapts to both wet and poor soils with ease.* Bohan has a long taproot, allowing it to pull nutrients from deep within the soil. Strong, vigorous stems top the 3-inch, rounded beets, which have smooth skin, an attractive deep red color and a deliciously sweet flavor. Highly resistant to soilborne diseases.

(A) 1 Pkt. (300 seeds) \$4.25; 3+ \$3.85 ea;

(C) 1000 seeds \$6.95; 2+ \$6.35 ea

KAI KAI HYBRID

Kai Kai Hybrid Winter Squash

03634-(90-95 Day)-*These fruits are so pretty you may want to use them as fall decor before you eat them.* Flattened 6½-7 inch fruits with deep ribbing begin green with lighter speckles and mature to a beautiful mottled tan. The thick, dark orange flesh has a sweet flavor and smooth texture, similar to a butternut squash. Vining plants have excellent resistance to mosaic virus and Papaya ringspot virus.

(A) 1 Pkt. (10 seeds) \$6.45; 3+ \$5.85 ea
