

STRATFORD TREES

Advanced Wholesale Nursery

Eucalyptus mannifera maculosa

Common Name: *'Red Spotted Gum'*

Landscape value:

A medium sized native tree ideal for open spaces. It naturally forms one trunk that develops a wide spreading canopy.

Smooth powdery white or grey trunk with red flecks through it.

Well suited to parks and gardens with wide open space or for wide streetscapes.

In summer months it has a display of white flowers that attracts birds and insects

Typical size: 10m x 12m

Growth rate: Moderate to fast

Habit: Naturally forms one trunk with a wide spreading canopy

Foliage: Narrow thin green leaves

Flowers: White flowers

Position: Full sun

Season of Interest: Summer

Soil Type: Can tolerate poor soil conditions. Ideal in areas high in clay shallow, rocky soils.

Tolerances/cultivation Drought tolerant
