

Emtree terms added and changed (September 2019)

This is an overview of new terms added and changes made in the third Emtree release in 2019.

Overall, Emtree has grown by 974 preferred terms (149 drug terms and 825 non-drug terms) compared with the previous version released in May 2019. In total Emtree now counts 83,944 preferred terms.

Because the terms added include replacements for existing preferred terms (which become synonyms of the new terms) as well as completely new concepts, the number of terms added exceeds the net growth in Emtree. Other changes could include the merging of two or more existing preferred terms into a single concept.

The terms added and changed are summarized below and specified in detail on the following pages.

Emtree terms added in September 2019

1,049 new terms (including 75 replacement terms and promoted synonyms) have been added to Emtree as preferred terms in version September 2019 (compared to May 2019):

- 177 drug terms (terms assigned to the chemicals and drugs facet).
- 29 medical device terms (terms assigned to the medical device branch of Emtree).
- 843 non-drug, non-device terms (terms not assigned as chemicals and drugs and that are not a medical device).

The new terms (including the replacement terms and the promoted synonyms) are listed as *Terms added* on the following pages. Note that many of these terms will have been indexed prior to 2019 (typically as candidate terms), sometimes for several years, before they were added to Emtree.

Emtree Terms Changed in September 2019

75 terms (28 drug terms and 47 non-drug terms) from Emtree May 2019 have been replaced by 75 different terms in September 2019 (28 drug terms and 47 non-drug terms).

Of these, 62 terms (24 drug terms and 38 non-drug terms) are new (e.g. new generic names for drug chemical names) and have been assigned creation date 2019; the remaining 13 replacement terms (4 drug terms and 9 non-drug terms) were already present in Emtree.

No drug terms were replaced by a non-drug term, no non-drug term were replaced by a drug term. No preferred terms were deleted.

Changes are presented in alphabetical order of the *new* terms.
