BATTERIES

WHY DO BATTERIES FAIL?

Operator Habits – frequent stops and starts

- Battery does not have time to fully recharge.

Sulfation

- When a battery is discharged, sulfate from the electrolyte combines with lead to create lead sulfate. This chemical reaction is the source of the battery's power. This process is reversed when the battery is recharged.
- When a battery, for more than a few weeks, is not recharged, the lead sulfate hardens on the battery plates, shortening the life of the battery.

Vibration

- Repeated and extended periods of vibration can crack a battery's welds and plates, potentially causing an electrical short.

Temperature Changes

- In colder temperatures, the chemical process slows within a battery, producing less power when you need it most.
- In hot conditions, a battery discharges more and sulfation is more likely to occur.

Vehicle starting and charging system performance

- A battery will prematurely fail if it does not match the starting and charging system of a vehicle.

MAINTAINING YOUR BATTERY

The best way to keep your battery fresh is to disconnect the negative cable and use a quality charger/maintainer.

- Keep your batteries at a full state of charge during dormant periods to fight sulfation. Starting your equipment and letting it run for 30 minutes does not adequately recharge a discharged battery.
- Over time, a battery using hybrid alloys will lose water from gassing. Adding water back into your battery will extend its life.
- A maintenance-free battery will lose water over time, although not as much, and water cannot be added.

FIELDSTART PRODUCT LINE

FieldStart Heavy Duty

- 20-month free replacement
- Built for the long-haul, short-haul and everything in between
- Superior vibration resistance
- Reinforced base reduces acid washing and case distortion
- Suitcase handle available on select part numbers

FieldStart Automotive

- 20-month free replacement
- Maintenance free under normal operating conditions
- Reliable power
- Built to exceed OE specifications

FieldStart Lawn & Garden/Utility

- 6-month free replacement
- Consistent, maintenance-free starting power
- Perfect for light duty, garden tractor, utility, snow blower and snowmobile applications
- L-type terminals fit most cable assemblies for quick and easy installation
- Maintenance-free calcium/calcium construction
- Polypropylene container reduces breakage and creates more room for power-producing plates
- Heat-sealed case-to-cover resists damage from vibration and abuse

FieldStart Golf Cart/Utility

- 20-month free replacement
- Vent caps release with one quick twist for easy maintenance
- Stainless-steel terminals resist corrosion and allow for easy installation
- Check water level easily with split-ring indicator
- Thicker, 5% antimony plates ensure slower discharge and recharge cycles, withstand high internal heat and improve cycle life
- Rubber sheet separators enhance the battery's ability to take and maintain a charge throughout its life
- Heat-sealed container eliminates leaks

BATTERY SALES/ORDERING

- Dealer sells battery. At the time of sale the dealer punches out the date with the month and year sold.
- Dealers can either order online through the AGCO dealer portal (EDI) or call the Exide branch. All initial orders must be placed via EDI using AGCO promo 240-1. All non-initial stocking orders will use AGCO promo 228-1. It is encouraged that battery orders be placed through EDI because discounts can be earned when placed with other qualifying parts orders.
- Orders must be placed by assigned order day deadline to ensure delivery on scheduled delivery day.
- Emergency orders must be called into the Exide branch and communicated that the order is an emergency order so that it can be routed appropriately.

BATTERY DELIVERY

- The Exide driver delivers batteries on scheduled delivery day.
- The paperwork that Exide uses is called a BDD (Battery Delivery Document).
- The front of the BDD will show the items being billed. (Batteries and Core charges).
- The back of the BDD will show the items being credited. (Warranty/Returns/Cores)
- Dealer signs BDD and driver leaves a copy with the dealer.
- The emergency orders are delivered via LTL and will be delivered on a BOL (Bill of Lading). When LTL services are used, no returns will be processed or handled.

WARRANTY PROCESS

- Dealer determines if the battery is truly a manufacturer's defect warranty by testing the battery and checking for any obvious signs of abuse i.e. frozen, cracks or holes in case, damaged or loose terminals.
- Dealer attaches original invoice with the battery and segregates it from battery cores.
- Exide driver at the time of delivery picks up warranty and writes down the part number and age under the warranty section on the back of the BDD. If the original invoice is missing from the battery the Exide driver will use the punch out date and if the punch out date is missing then the driver will use the ship date code located on the side of the battery to determine the age.
- Exide sends credit to AGCO and AGCO sends credit to the dealer. Dealer will see credit on monthly statement.

CORE PROCESS

- The core for batteries is billed up front along with the cost of the battery.
- The core charge for batteries is \$15.00 per unit value. Unit value differs from group size. (Please reference the Battery Reference Guide for unit values by part.)
- The Exide driver at the time of delivery, will pick up any cores you have and write them down under the SPENT BATTERIES section on the back of the BDD. You are not limited to one for one and can return any core from any manufacturer for full core credit.
- Exide sends credit to AGCO and AGCO sends credit to the dealer. Dealer will see credit on monthly statement.

NEW RETURNS?

- Dealer identifies what batteries they would like to return and notifies Exide branch. The batteries must be less than 6 months old and in NEW condition in order to qualify for a return. Dealers are limited to a 10% return rate per unit based on previous 12 months sales.
- The Exide driver at the time of delivery will verify return batteries meet the requirement listed above and will write them down under the ROTATE section on the back of the BDD.
- Exide sends credit to AGCO and AGCO sends credit to dealer. Dealer will see credit on monthly statement.
