

A lush mountain meadow in Sichuan, China, featuring a variety of wildflowers. Large, bright red flowers with dark centers are prominent in the foreground and middle ground. Interspersed among them are clusters of small, delicate purple flowers. The ground is covered in green grasses and broad, heart-shaped leaves. Large, grey rocks are scattered throughout the scene, adding to the rugged, natural setting.

Aquilegia rockii -  
Balangshan -  
2009.0625

A photograph of purple Aquilegia rockii flowers in a natural setting. The image shows several purple flowers with five petals, some fully open and some as buds. The flowers are on thin, reddish-brown stems. The background is a dense thicket of green foliage and brown branches, slightly out of focus. The lighting is natural, highlighting the texture of the petals.
