## *Encelia farinosa* Desert Sunflower

This deciduous mounding shrub typically has gray leaves that can reach 3' tall and wide. However, the leaves will turn white in drought conditions. Bright yellow 1" wide daisies appear in spring and summer. There is rapid growth following rain but this shrub is short-lived. Individual plants will reseed to repopulate. It does well in hot areas but cannot tolerate clay soils due to root rot. It will become overgrown and fragile if over watered.

### ANATOMY

**PLANT TYPE**

Shrub

**FLOWER COLOR**

Yellow

**BARK COLOR**

n/a

**HEIGHT RANGE**

3-6'

**FLOWER SEASON**

Spring, Summer

**FRUIT COLOR**
