

ultimis erecto-patentibus strictis 1-3 poll. longis. Bracteæ ad basin ramorum 1-1½ lin. longæ. Umbellæ terminales 2-7-floræ, pedicellis 1-1½ lin. longis. Perianthium 3 lin. longum. Stamina et cocci *T simplicis*. *Australia temperata occidentalis et orientalis*.

5. *T. MURICATA*, Baker. Caules pedales copiose dichotome furcati, graciles, primarii $\frac{1}{2}$ lin. crassi, pilis albidis brevibus patentibus ubique vestiti, ramis ultimis strictis ascendentibus 1-2 poll. longis, basi bracteis minutis membranaceis præditis. Umbellæ 3-4-floræ, pedicellis 1-2 lin. longis apice articulatis. Perianthium 4 lin. longum. *Australia boreali-orientalis ad Wide Bay*, Bidwell!
6. *T. ANCEPS*, R. Br. Prod. 278; Schult. fil. Syst. vii. 612; Kunth, Enum. iv. 612.—*Anthericum anceps*, Solander in Herb. Banks. Caulis 1½-2-pedalis erectus vel diffusus copiose dichotome furcatus, ramis rigidis complanatis $\frac{1}{2}$ lin. latis, ultimis 4-6 poll. longis, basi foliis reductis scariosis 6-9 lin. longis bracteatis. Umbellæ 2-4-floræ, bracteis perminutis deltoideo-cuspidatis membranaceis, pedicellis 1 lin. longis. Perianthium 3 lin. longum. Coccum non vidi. *Australis orientalis ad Cape Grafton*, Sir J. Banks!
7. *T. PTEROCAULON*, Baker. Rhizoma gracile late reptans. Caulis 1-2-pedalis erectus copiose dichotome rauosus, basi solum subteres, ramis et ramulis 3-9 poll. longis utrinque ala rigide coriacea integra $\frac{1}{2}$ -2 lin. lata præditis, basi foliis reductis minutis bracteatis. Umbellæ terminales 6-12-floræ, bracteis perminutis, pedicellis 3-4 lin. longis apice articulatis. Perianthium 4-4½ lin. longum, segmentis dorso laxe 7-9-nervatis. Stamina 3 lin. longa, filamentis dimidio superiore stupposis. Coeci 2 lin. longi verticaliter costati. *Australia tropicalis orientalis a Cape York ad Queensland*.

The Fungi of Brazil, including those collected by J. W. H. TRAIL, Esq., M.A., in 1874. By the Rev. M. J. BERKELEY, M.A., F.L.S., and M. C. COOKE, Esq., M.A., LL.D.

[Read January 21, 1876.]

IN the present communication it has been our primary object to enumerate and describe the fungi collected by J. W. H. Trail in 1874 in the forests of Brazil; but in order to render more complete our list of the Fungi of Brazil, we have included also the species previously described, such as the collections of Mr. Spruce, the species recorded by Messrs. Montagne, Leveillé, Fries, and others; so as to present a somewhat complete account of Brazilian Fungi as far as they have been determined.

From comparison of the total number of 437 with the 886 enumerated for Cuba, and 1190 for Ceylon, it will be concluded at once that our knowledge of the Fungi of this vast tract of very favourable country is very limited, and that but a small proportion of the whole mycologic flora is yet known. It may reasonably be assumed that the total number is not in reality less than in the smaller district comprised in the island of Ceylon.

Of the whole number of species here enumerated, three fourths and upwards belong to the *Hymenomycetes*, the numbers being

<i>Hymenomycetes</i>	356
<i>Gasteromycetes</i>	13
<i>Hyphomycetes</i>	7
<i>Coniomycetes</i>	5
<i>Ascomycetes</i>	55
<i>Incomplete</i>	1
	—
	437

Of this total number about 300 are at present confined to Brazil, and 137 are found also in other parts of the world. The number common to Brazil and the island of Cuba is 102, whilst 40 species are also found in the United States, 33 in Europe, 34 in India (including Ceylon), 18 in the Australasian colonies, and 4 are cosmopolitan.

The *Hymenomycetes* of Cuba, with its 886 species, are 488, whilst those of Brazil with its 437 species are 356. Of these the largest number, as usual in tropical countries, belong to the genera *Agaricus*, *Marasmius*, and *Polyporus*. The following comparison is made for these three genera in Cuba, Ceylon, and Brazil, the fractions being those of the total number of species:—

	Ceylon.	Cuba.	Brazil.
<i>Agaricus</i>	$\frac{1}{10}$	$\frac{1}{3}$	$\frac{1}{8}$
<i>Marasmius</i>	$\frac{1}{7}$	$\frac{1}{27}$	$\frac{1}{10}$
<i>Polyporus</i>	$\frac{1}{7}$	$\frac{1}{16}$	$\frac{1}{4}$

From this comparison it will be seen that the proportion is greater for Brazil in all three genera over Ceylon, and in two out of three over Cuba. The genus *Polyporus* has 143 representatives, or more than one fourth of the total number, in Brazil, whilst it has only $\frac{1}{7}$ in Cuba and $\frac{1}{16}$ in Ceylon.

The great absence of microscopical forms in this enumeration is probably to be attributed rather to a deficiency on the part of the collectors than to their absence from the district. It is

clear that we may yet anticipate considerable additions to the mycologic flora of the Brazils.

40. A. (*OMPHALIA*) *NAUSEABUNDUS*, *Mont. Ann. des Sci. Nat.* sér. 4, v. 359.
On trunks.
41. A. (*PLEUROTUS*) *XYLOCHARIS*, *Mont. Ann. des Sci. Nat.* sér. 4, v. 359.
On branches. Goyaz (*Wedd.*).
42. A. (*PLEUROTUS*) *JACKSONI*, *B. & C.* Pileo tenui, radiato-striato, postice fortiter depresso, stipite primum centrali, dein laterali, brevi, cylindrico ; lamellis tenuibus decurrentibus, acie integris.
On decayed wood. Mauhes (*Traill*, no. 125).
Pileus 3 inches across, conchiform, at first entire, then lateral ; stem $\frac{1}{3}$ inch high, about 1 line thick ; gills numerous, shortly decurrent. Mr. Jackson has sent the same thing from the Kew Museum, received from Amoy. The figure of *Lentinus hispidosus*, Fr., in Kalkbrenner gives a good idea of the habit. The colour of the plant when fresh

is uncertain. Traill, no. 51, from Obydos, Brazil, described as reddish brown, has no spores; and therefore the subgenus is doubtful.

43. A. (VOLVARIA) CNEMIDOPHORUS, *Mont. Ann. des Sci. Nat.* sér. 4, v. 360.

In pastures (*Wedd.*). On the ground. Bolivia.

44. A. (PHOLIOTA) TRAILLII, *B. & Cooke.* Pileo hemisphaerico dense piloso-squamoso, fulvo, margine inflexo; stipite subæquali furfuraceo-squamoso pallido, annulo membranaceo; sporis pure fulvis.

On decayed wood. Teffé, Dec. 1874 (*Traill*, no. 129).

Pileus, when dry, more than $\frac{1}{2}$ an inch across, but probably when fresh much larger, tawny, clothed densely with pilose scales; stem 1 inch high, $1\frac{1}{2}$ line thick, paler but clothed with tawny scales; ring membranaceous, white; spores pure tawny, like those of *A. spectabilis*.

45. A. (HEBELOMA) PSAMMINUS, *Berk. in Hook. Journ.* (1856) 132.

On the ground. Panuré (*Spruce*, no. 124).

46. A. (NAUCORIA) PANURENSIS, *Berk. in Hook. Journ.* (1856).

On the ground. Panuré (*Spruce*, no. 124).

115. **L. CRASSIPES**, *Berk. Hook. Lond. Journ. ii. (1843) 633.*
Minas Geraes (*Gardner*).116. **L. NICOTIANA**, *Berk. in Hook. Journ. (1856) 141, t. v. f. 7.*

On decayed trunks. Panuré (*Spruce*, no. 45).

117. **L. VELUTINUS**, *Fr. Ep. i. 392; Hook. Journ. ii. (1843) 633.*
Minas Geraes (*Gardner*).118. **L. CALVESCENS**, *Berk. in Hook. Journ. (1856) 141.*

On decayed trunks. Panuré (*Spruce*, no. 136).

119. **L. FULVASTER**, *B. & Cooke.* Pileo orbiculari, albo, sicco fulvescente, umbilicato, glabro; stipite gracili, glabro, concolori; lamellis angustis, dentatis.

On dead wood. Resaca, Rio Purus, Nov. 1, 1874 (*Traill*, no. 50).

Pileus orbicular, $\frac{3}{4}$ in. in diameter, umbilicate, at first white, but becoming, like the rest of the plant, tawny when dry; stem slender, 2 in. high, about 1 line thick, smooth; gills narrow, decurrent. Varying much in size, stem sometimes almost capillary.

120. **L. FURCATUS**, *B. & Cooke.* Albus; pileo reniformi-flabellato, glabro, sicco radiato-subrugoso, margine inflexo; stipite brevi, hirto; lamellis tenuibus, celluloso-furcatis, dentatis, decurrentibus.

On dead wood. Rio Solimões, Nov. 1874 (*Traill*, no. 7).

Pileus $2\frac{1}{2}$ in. across, smooth, but marked with little pits and ridges; stem lateral, scarcely $\frac{1}{2}$ in. high, 2 lines thick, shortly hispid; gills crowded, thin, with a jagged margin, decurrent, forked, and cellular.

If the division of the gills were carried further, the species would belong to *Favolus*.

121. **L. COMPRESSUS**, *B. & Cooke.* Albus; pileo flabelliformi, radiato-lineato, stipiteque brevi sursum canaliculato-compresso, velutinis; lamellis tenuibus decurrentibus, laciniatis.

On dead wood. Teffé (*Traill*, no. 124).

Pileus $1\frac{1}{2}$ in. across, flabelliform, clothed with thin velvety down, as is also the short stem ($\frac{3}{4}$ in. high, $\frac{1}{4}$ thick above), which is compressed in consequence of a depression continued from the pileus, and dilated upwards, where it runs laterally into the pileus; gills very thin, the edge strongly lacinate.

122. **L. ALBIDUS**, *Berk. in Hook. Journ. ii. (1843).*

On a Lime tree (*Gardner*).

123. **LENTINUS LEUCOCHROUS**, *Lév. Ann. Sci. Nat.* 1844, t. 14. f. 1.
On dead wood. Teffé (*Traill*, no. 106).
124. **L. TRICHOLOMA**, *B. & Cooke*. Albus; pileo orbiculari, umbili-
cato, glabro, margine ciliato; stipite gracili, glabrescente, lamellis
angustis, arcuatis, parce dentatis, decurrentibus.
On dead wood. Rio Jurua, April 25, 1873 (*Traill*, no. 35).
Pileus orbicular, $\frac{1}{3}$ in. across, smooth, umbilicate, with the margin fringed;
stem slender, central, $\frac{3}{4}$ -1 in. high, at first somewhat scaly, then quite
smooth.
The habit is exactly that of *Polyporus tricholoma*, M.

On stem of old tree. Minas Geraes (*Gardner*).
168. **P. (PLEUROPIUS) SEMINIGRITA**, B. & Cooke. Pusillus; pileo tenui umbilicato, margine membranaceo, inflexo; stipite abrupte nigro; poris subhexagonis, acie obtusa.
On dead wood. Obydos, Feb. 1st, 1874 (*Traill*, no. 102).
Pileus $\frac{1}{2}$ an inch or more across, smooth, infundibuliform, margin very thin; stem 2 lines high, dilated above, about 1 inch thick, abruptly black; pores subhexagonal, with an obtuse margin, about .01 inch across.
Belongs to the same group as *P. vorius*, but quite distinct.
169. **P. (PLEUROPIUS) GRAMMOCEPHALUS**, Berk. Hook. Lond. Journ. (1842) p. 148.
Var. poris minoribus.
On dead wood. Obydos (*Traill*, no. 96).
Quite agreeing with *P. gramocephalus*, but with rather smaller pores. Specimens, however, from different localities differ in this respect.

 cuneiformi, radiato-lineato, margine lobato; stipite brevissimo cum
 pileo confluente; poris irregularibus, dissepimentis tenuibus, decur-
 rentibus.

On dead wood. Rio Trombetas, Jan. 31, 1874 (*Traill*, no. 11).

Yellow-brown; pileus subcoriaceous, cuñeiform, with a lobed margin,
 thickly and finely radiato-striate, $1\frac{1}{4}$ inch across; stem very short, and
 confluent with pileus; pores irregular, with thin dissepiments, about
 $\frac{1}{8}$ inch across, edge jagged.

191. P. (PLEUROPIUS) **GALLINACEUS**, B. & Cooke. Pileo tenui, characeo, flabelliformi, zonato, postice umbilicato, subtiliter tomentoso, glabrescente, radiato-lineato; stipite cylindrico, tomentoso, e basi orbiculari oriundo, poris minimis.

On dead wood. Obydos, Feb. 12, 1874; Rio Purus (*Traill*, nos. 58, 83, 95).

Pileus $1\frac{3}{4}$ in. across, ochraceous, with frequent darker zones, sometimes inclined to brown; margin very thin, sometimes jagged; stem $\frac{1}{4}$ in. high, 1 line thick, the pileus running down the wood beyond the orbicular base. Pores $\frac{1}{260}$ in. across.

Allied to *P. stereinus*, B. A smaller form occurred at Rio Purus (*Traill's* no. 88), resembling somewhat in form and colouring a turkey's feather.

On trunks. Panuré (*Spruce*, nos. 28, 60). Rio Mauhes, May 1, 1874;
Prainha (*Traill*, nos. 4, 82).
No. 120, from the same locality, is probably the same, but almost destroyed by insects.
233. **P. (INODERMEI) CAPERATUS**, *Klotsch. Ann. Nat. Hist.* iii. 391; *Berk. in Hook. Journ.* 1856.
On dead trunks. Panuré (*Spruce*, no. 23).
234. **P. (INODERMEI) SULCIFER**, *B. & Cooke*. Pileo vertice affixo, transversim elongato, sulcato, interstitiis elevatis, spongioso-velutinis, umbrinis, sulcis brunneis; contextu fulvo; poris mediis hexagonis, umbrinis; dissepimentis tenuibus.
On dead wood. Pio Purus, Sept. 1874 (*Traill*, no. 97).
Pileus $\frac{3}{4}$ in. long, $1\frac{1}{4}$ broad, dimidiate, marked with deep brown furrows, and raised umber velvety ribs; pores about $\frac{1}{48}$ in. in diameter.
Resembles *P. caperatus*, but with very different pores, by which it approaches *Hexagona*.
235. **P. (INODERMEI) ACULEANS**, *Berk. in Hook. Journ.* (1856) 199.

Brazil (*M. J. B.*).

243. **P. (RESUPINATUS) OBLIQUUS**, *Fr. Epic.* p. 482.
On dead wood. Rio Javary (*Traill*, no. 101).

244. **P. (RESUPINATUS) BISTRATOSUS**, *B. & Cooke*. Effusus, umbribinus, contextu parcissimo ; poris stratosis punctiformibus.
On dead wood. Paricatuba ; Rio Purus (*Traill*, no. 78).
Effused, rather rigid, umber, with very little subiculum ; pores in two layers, very minute, punctiform.

Has the habit of *P. chromaticus* ; but the pores are not oblique, and the colour is altogether different.

245. **P. (RESUPINATUS) CHROMATICUS**, *B. & Cooke*. Effusus, citrinus ; poris obliquis, minutis, integris ; contextu parco.
On dead wood. Prainha, Dec. 12, 1873 (*Traill*, no. 13).
Effused, resembling in habit *P. obliquus*, lemon-coloured or pale chrome-yellow ; substance scarcely any ; pores minute ; mycelium bright yellow.

246. **P. (RESUPINATUS) CRYPTACANTHUS**, *Mont. Ann. des Sci. Nat.* sér. 4, v. 369.

270. **H. VARIEGATA**, Berk. *Ann. Nat. Hist.* x. p. 280.
On dead wood. Rio Purus (*Traill*, no. 86).
271. **H. CORIACEA**, B. & Cooke. Dimidiata, coriacea, postice longe decurrens, pallide fulva; pileo demum rigido, zonato, radiato-rugoso, lineato, margine acuto; poris hexagonis, dentatis, parvis.
On dead wood. Teffé (*Traill*, no. 134).
An inch or more across, decurrent and attached behind; pileus with a few pale zones, marked with radiating raised lines and ridges; pores about $\frac{1}{50}$ in. across; edge of dissepiments thin and toothed.
Somewhat resembling on a small scale *H. rigida*, B., in which, however, the pores are $\frac{1}{12}$ inch across, and their margin quite entire.
272. **H. LEPRODES**, Fr.
On dead wood. Igarapé de Marapata. Rio Negro, Dec. 30, 1874 (*Traill*).
Traill's No. 10 is apparently a resupinate form of *H. leprodes*, Fr., a species from Costa Rica.
273. **FAVOLUS SPRUCEI**, Berk. in Hook. *Journ.* (1856) 237, t. v. f. 8.

On the ground. Panuré (*Spruce*, no. 156).

339. **C. FUSCO-LILACINA**, Berk. in *Hook. Journ.* (1856) 276.

On sandy ground. Panuré (*Spruce*, no. 152).

340. **C. SUBULATA**, B. & Cooke.

Simplex, insititia, filiformis, subulata, subtiliter pruinosa.

On the midrib of dead leaves. Rio Jurua (*Traill*, no. 172).

About half an inch high, filiform, rather translucent, pale umber when dry, sprinkled with minute white meal.

341. **C. VERPIFORMIS**, B. & Cooke.

Minuta, alba; stipite brevissimo, basi dilatata; capitulo glanduliforme rugoso.

On dead bark. Rio Jurua (*Traill*, no. 180).

Very minute, about a line high, white; stem short, cylindrical, dilated at the base; head acorn-shaped, resembling that of some *Verpa* in miniature.

342. **C. SCABRA**, Berk. in *Hook. Journ.* (1856) 276.

On the ground. Panuré (*Spruce*, no. 157).

343. **C. CORNEA**, Fr.

On decayed wood. Barreiras de Jutahy Rio Solimões (*Traill*, no. 168).

344. **C. RUBRA**, B. & Cooke.

Læte rubra, furcata, apicibus acutis; stipite deorsum attenuato.

In forests on logs. Trombetas (*Traill*, no. 25).

About 1½ inch high, magenta-red, stem ½ inch, attenuated below, forked twice, tips acute.

345. **TYPHULA TRAILLII**, B. & Cooke.

Translucens, firma; stipite elongato; capitulo oblongo.

On vascular bundles of *Attalea compta*. Rio Madeira (*Traill*, no. 174).

A larger species than *T. gyrans*, and apparently much firmer; the colour in the dried specimens is yellow; but the original colour was probably white. There is a small *Pistillaria* on twigs (Rio Jurua, *Traill*, no. 171); but without notes it cannot safely be distinguished.

346. **PTERULA PLUMOSA**, Fr.; *Berk. in Hook. Journ.* ii. (1843) 642.
Clay banks. Maranham (*Gardner*).
347. **TREMELLA FUCIFORMIS**, *Berk. in Hook. Journ.* (1856) 277.
On trunks. Panuré (*Spruce*, no. 9).
348. **T. LUTESCENS**, Fr. Ep. p. 588; *Berk. in Hook. Journ.* (1856) 277.
On trunks. Panuré (*Spruce*, no. 151).
349. **T. PULVINULUS**, B. & Cooke. Gregaria, pallide lutea, parva,
pulviniformis, demum confluens.
On dead wood. Rio Purus (*Traill*, no. 164).
About 1 line in diameter, cushion-shaped, at length confluent, pale
yellow; conidia very minute.
350. **HIRNEOLA PROTRACTA**, Lév. (*sub Exidia*), *Ann. Sci. Nat.* Oct.
1844, p. 218; *Berk. in Hook. Journ.* (1856) 277.
On dead wood. Panuré (*Spruce*, no. 84).
351. **H. AURIFORMIS**, Fr. *Fungi Nat.* p. 26; *Berk. & Curt. Cüb. Fungi.*
Brazil (*M. J. B.*).
352. **H. POLYTRICHA**, Fr. *Fungi Nat.* p. 26.
(*Exidia polytricha*, Mont.)
Brazil (*M. J. B.*).
353. **H. HISPIDULA**, B. *Ann. Nat. Hist.* iii. 396.
Urupa, Rio Mauhes (*Traill*, no. 167).
354. **H. AURICULA JUDÆ**, Fr.—*Exidia auricula Judæ*, *Berk. in Hook. Journ.* (1856) 277.
On half-decayed trunks. Panuré (*Spruce*, no. 18); Rio Purua (*Traill*).
355. **H. EXIMIA**, B. & Cooke. Pusilla; pileo tenui, orbiculari, lobato;
margine ciliato; stipite gracili, deorsum incrassato hispidulo.
On dead wood. Lago Cerrado, Rio Jurua, Oct. 30, 1874 (*Traill*, no. 28).
Pileus about $\frac{1}{2}$ inch across below; margin ciliated; stem $\frac{1}{2}$ inch high,
hispida, dilated downwards, springing from an orbicular hispid disk.
356. **NEMATELIA CORTICOLA**, B. & Cooke. Parva, pallide aurantiaca,
erumpens, e basi plana candida oriunda.
On stringy bark. Rio Purua (*Traill*, no. 165).
Bursting through the bark from a white flat base, pale orange, very soft;
spores oblong-elliptic $\frac{1}{750}$ inch long, $\frac{1}{1500}-\frac{1}{2000}$ inch broad. On the
same matrix deep violet spots occur which stain the spores of the
same colour. They look at first sight most like *Corticium cæruleum*,
but are probably of animal origin.
357. **CYCLODERMA WEDDELLII**, Mont. *Ann. des Sci. Nat.* sér. 4, v.
373.
Brazil.

358. **CYATHUS MONTAGNEI**, *Tul. Ann. Sci. Nat.* (1844) 70; *Berk. & Curt. Cub. Fungi.*
Brazil (*M. J. B.*).
359. **C. MICROSPORUS**, *Tul. l. c.* p. 73.
Rio Janeiro (*Tul.*).
360. **C. LIMBATUS**, *Tul. Ann. Sci. Nat.* 1844, sér. 3, i. 78; *Berk. in Hook. Journ.* (1856) 278.
On semiputrid *Alpinia*. Panuré (*Spruce*, no. 148); *Traill* (nos. 38, 68).
361. **C. PLICATUS**, *Tul.* (*Nidularia plicata*), *Fr. in Linn. v.* 553; *Berk. in Hook. Lond. Journ.* ii. (1843) 639.
On dry banks. Organ Mountains (*Gardner*).
362. **GEASTER SACCATUS**, *Fr. Sys.* iii. 16; *Berk. & Curt. Cub. Fungi.*
Brazil (*M. J. B.*).
363. **G. FIMBRIATUS**, *Fr. Syct. Myc.* iii. 16; *Berk. in Hook. Journ.* ii. (1843) 639.
Rio Janeiro (*Gardner*); Brazil (*Traill*, no. 34).
364. **SCLERODERMA STELLATUM**, *Berk. in Hook. Journ.* (1856) 278.
On the ground. Panuré (*Spruce*).
Traill's no. 45 (Rio Solimoes) is a *Lycoperdon* too young to determine.
365. **LYCOPERDON ASTROCARYI**, *B. & Cooke.* Sessile, globosum, brunneum, granulatum, capillitio sporisque laevibus pallide lilacinis.
On petioles of *Astrocaryum*. Pupanha (*Traill*, no. 20).
Globose, sessile, rough with brown granules $\frac{1}{4}$ — $\frac{1}{2}$ inch in diameter; capillitium and globose even spores very pale lilac.
366. **HIPPOPERDON CRUCIBULUM**, *Mont. Ann. des Sci.* Feb. 1842;
Berk. in Hook. Journ. ii. (1843) 640.
Minas (*Gardner*).
367. **LYCOGALA EPIDENDRUM**, *Fr. Sys. Myc.* iii. p. 80.
Rio Jurua (*Traill*, no. 31).
368. **DIDYMIUM FARINACEUM**, *Fr. Sys. Myc.* iii. 119.
On leaves. Resaca, Rio Jurua, Nov. 1874 (*Traill*, no. 37).
369. **CRATERIUM LEUCOSTICTUM**, *Fr. Sys. Myc.* iii. 151.
On dead leaves. Rio Purus (*Traill*, no. 169).
370. **STEMONITIS FUSCA**, *Roth*; *Fries, Sys. Myc.* iii. 157.
Rio Purus (*Traill*, no. 30).
371. **ARCYRIA PUNICEA**, *Pers. Fr. Sys. Myc.* iii. 177.
On rotten wood. Rio Jurua, Passumba (*Traill*, nos. 18, 33).
372. **A. CINEREA**, *Schum.*; *Fries, Sys. Myc.* iii. 180.
Rio Jurua (*Traill*, no. 32).

373. ASCHERSONIA CUBENSIS, Berk. & Curt. *Cuban Fungi*, no. 557.
Brazil (*M. J. B.*).
374. ASCHERSONIA OXYSPORA, Berk. in *Hook. Journ.* (1856) 278.
On dead leaves. San Carlos (*Spruce*).
375. CERATIUM HYDNOIDEUM, A. & S.
On decayed wood. Passumba, Nov. 5, 1874 (*Traill*, no. 163).
376. STILBUM STROMATICUM, Berk. in *Hook. Journ.* ii. (1843) 642.
On a rotten tree. Minas Geraes (*Gardner*).
377. MYCOGONE SPHÆROPHORA, Berk. in *Hook. Journ.* (1856) 278.
On gills of some Agaric. Rio Uaupés (*Spruce*, no. 96).
378. CLADOSPORIUM HERBARUM, Link, Berk. in *Hook. Journ.* ii. (1843).
On *Leuzites appplanata*. Minas Geraes (*Gardner*).
379. ANTENNARIA PANNOSA, Berk. in *Hook. Journ.* ii. (1843) 640,
t. xxiii. fig. 1.
On leaves of *Pogopetalum*. Prov. Goyaz (*Gardner*).
380. SPHÆRONEMA EPICECIDIUM, Berk. in *Hook. Kew Gard. Misc.* i.
291, t. x. b; *Hook. Journ.* (1851) 18.
On galls. Caripi (*Spruce*); Para (*Sir E. Home*).
381. ECIDIDIUM PALUSTRE, Mont. *Ann. des Sci. Nat.* sér. 4. v. 375.
On leaves of *Polygala*. Brazil.
382. PUCCINIA ARANJA, Lév. *Ann. des Sci. Nat.* sér. 3, iii. 69.
On leaves of *Araujia*. Brazil (*Lév.*).
383. TORRUBIA UNILATERALIS, Tul. *Fung. Carp.* iii. p. 18.
On *Formica* (*Traill*, no. 24).
384. T. SPHINGUM, Tul. *Fung. Carp.* iii. p. 12.—*Isaria sphingum*,
Schwein. Syn. Cat. no. 1298.
On Orthopterous insects (*Traill*, no. 239). On Lepidoptera, São Paulo.
385. T. BICEPHALA, Berk. in *Hook. Journ.* (1856) 278 (*sub Cordicipite*).
Panuré (*Spruce*).
386. NECTRIA COCCINEA, Fr.
Apparently, but without fruit. Rio Purus (*Traill*, no. 179).
387. N. EPISPHÆRICA, Fries, *S. Myc.* ii. 454.
On *Xylaria clavus*. Villa Bella (*Traill*, no. 176).
388. SPHÆROSTILBE CINNABARINA, Tul. *Sel. Fung. Carp.* iii. 130.
On fruit of Tucuma (*Traill*, no. 19).
389. S. LATERITIA, Berk. & Curt. *Cuban Fungi*, no. 764.—*Stilbum lateritium*, Berk. in *Hook. Journ.* ii. (1843) 642.
On sticks. Brazil (*M. J. B.*); Maranham (*Gardner*).
390. XYLARIA GRAMMICA, Lév. *Ann. des Sci. Nat.* sér. 3, v. 256 (*sub Sphæria*).
On trunks. Bahia (*Blanchet*).

391. **XYLARIA ALLANTOIDEA**, *Berk. Ann. Nat. Hist.* (1839) 397.
Brazil (*M. J. B.*).
392. X. **HYPERYTHRA**, *Mont. Ann. des Sci. Nat.* 1840; *Berk. in Hook. Journ.* (1856) 279.
On decayed trunks. Panuré (*Spruce*, no. 143).
393. X. **DEALBATA**, *B. & C. Journ. Ac. Sci. Phil.* ii. 284; *Berk. in Hook. Journ.* (1856) 279.
On decayed trunks. Panuré (*Spruce*, no. 145).
394. X. **PALLIDA**, *B. & Cooke*. Suberosa, claviformis, simplex, pallida.
Clavula cylindracea, apice subacuminato; stipite gracili, ad basin discoideo; sporidiis cymbiformibus, fuscis.
On sticks. Papunha, Nov. 5, 1873 (*Traill*, no. 21).
About 1-1½ inch high, stem half the length, slender, dilated and discoid at the base, head cylindrical, usually acuminate at the apex, pallid ostiola punctiform, minute, black; sporidia .015×.005 millim.
395. X. **RHOPALOIDES**, *Kze. Weig. Exs.*; *Berk. in Hook. Journ.* (1856) 279.
On dead trunks. Panuré (*Spruce*, no. 76).
396. X. **SCOPIFORMIS**, *Mont. Ann. Sci. Nat.* 1840, xiii. p. 349; *B. & C. Cuban Fungi*, no. 801.
On stumps (*Traill*, nos. 139, 150).
There are also several other *Xylariæ* in a barren state (nos. 137, 138, 140, 143, 146, 147, 148, 149, 155, 158) in the Traill collection.
397. X. **INÆQUALIS**, *B. & C. Cuban Fungi*, no. 805.
On dead sticks. Rio Jurua (*Traill*, no. 144).
398. X. **GUEPINI**, *Fr. El.* ii. 58.
Brazil (*Fries*).
399. X. **DIGITATA**, *Fr. Sys. Myc.* ii. 326.
Pusumba (*Traill*, nos. 145, 153).
400. X. **POLYMORPHA**, *Pers. Syn.* p. 7; *Berk. in Hook. Journ.* (1856) 279.
On dead wood. Panuré (*Spruce*, nos. 141, 142, 144).
401. X. **CONOCEPHALA**, *B. & C. Cuban Fungi*, no. 780.
On wood. Barcellos (*Traill*, no. 152).
402. X. **HYPOXYLON**, *Fr. (Sphaeria, Ehr.)*, *Berk. in Hook. Journ.* ii. (1843) 639.
Old wood. Goyaz (*Gardner*).
403. X. **IANTHINO-VELUTINA**, *Mont. Syll.* p. 204.
On woody legumes. Obydos (*Traill*, no. 136).
404. X. **FILIFORMIS**, *A. & F. Consp.* p. 2.
On leaves (*Traill*, no. 159).

405. *XYLARIA APEIBÆ*, *Mont. Syll.* p. 205.
On fruit of Apeiba. Obydos (*Traill*, no. 156).
406. *X. MARASMOIDES*, *B. & Cooke*. Sparsa, stipite setaceo penetrante; capitulo globoso primum dealbato, dein secundum perithecia condita fisso.
On bark. Capana, Oct. 3, 1874 (*Traill*, no. 43). Stem scarcely $\frac{1}{4}$ inch high, slender, setiform, penetrating with a small collar at the apex; head $\frac{1}{2}$ line in diameter, soon splitting up. A smaller species than *X. aristata*, from which it differs in the ostiola not being prominent and the whole head splitting up into separate frustules.
407. *X. ABNORMIS*, *Berk. in Hook. Journ.* (1856) no. 279.
On dead wood. Panuré (*Spruce*).
408. *THAMNOMYCES FUCIFORMIS*, *Berk. in Hook. Journ.* (1856) 280.
On decayed trunks. Panuré (*Spruce*, no. 159).
409. *T. CHAMISSONIS*, *Ehr. Hor. Phys. Ber.* 79, t. 17. f. 1; *Berk. in Hook. Journ.* (1851) 17.
Brazil (*Spruce*).
410. *T. ROSTRATUS*, *Mont. Ann. Sci. Nat.* 1840; *Berk. in Hook. Journ.* (1856) 280.
On rotten trunks. Panuré (*Spruce*, no. 163).
411. *HYPPOXYLON CLAVUS*, *Fr. in Linn. v.* p. 543 (*sub Sphaeria*); *Berk. in Hook. Journ.* (1856) 280.
On dead bark. Panuré (*Spruce*); Brazil (*M. J. B.*); Villa Bella (*Traill*, no. 175).
412. *H. CŒNOPOUS*, *Mont. Cub.* p. 341; *Berk. & Curt. Cub. Fungi*. Brazil (*M. J. B.*).
413. *H. MICROPUS*, *Fr. in Linn. v.* 542; *Berk. & Curt. Cub. Fungi*. Brazil (*M. J. B.*).
414. *H. WRIGHTII*, *B. & C. Cuban Fungi*, no. 168.
On dead wood. (*Traill*, no. 16). No. 64 (*Traill*) is apparently an imperfect *Hypoxylon* with somewhat the habit of *Panus stypticus*.
415. *H. OBOVATUM*, *Mont.*, *Berk. in Hook. Journ.* (1851) 17.
On bark. Caripi (*Spruce*).
416. *H. LEPRIEURII*, *Mont. Ann. des Sci. Nat.* i. 352; *Berk. in Hook. Journ.* (1851) 17.
On bark. Caripi (*Spruce*).
417. *DOTHIDEA GRANULOSA*, *Lév. Ann. des Sci. Nat.* sér. 3, v. 264.
On leaves of *Vohiria*. Brazil (*Vauthier*).
418. *D. MYRCIÆ*, *Lév. Ann. des Sci. Nat.* sér. 3, v. 264.
On leaves of *Myrcia*. Brazil (*Claussen*).

419. SPHÆRIA COCCODES, Lév. *Ann. des Sci. Nat.* sér. 3, iii. 50.
On leaves of Leguminosæ. Brazil (Lév.).
420. SPHÆRELLA NITIDULA, Lév. *Ann. des Sci. Nat.* sér. 3, iii. 54.
On leaves of *Melastoma*. Brazil (Lév.).
421. CORDIERITES SPRUCEI, Berk. in *Hook. Journ.* (1856) 280, t. x.
f. 5.
On decayed trunks. Panuré (*Spruce*, no. 85).
422. ASTERINA MELASTOMATIS, Lév. *Ann. des Sci. Nat.* sér. 3, iii.
59.
On leaves of *Melastoma*. Brazil (Lév.).
