WHO WE ARE

We are Bromelia Specialist, based in the Netherlands, and bromeliads are what we live and breathe. Our experienced growers, keen order processors, and passionate sales team work hard to promote and bring these fascinating, flowering houseplants to the rest of the world.

As market leader, we are specialised in plant breeding, cultivating, product development, and assembly to create premium consumer products. Together with our service partners or direct-sourcing parties, we daily deliver all our bromeliad varieties to garden centres, DIY stores, supermarkets, and wholesalers throughout Europe.

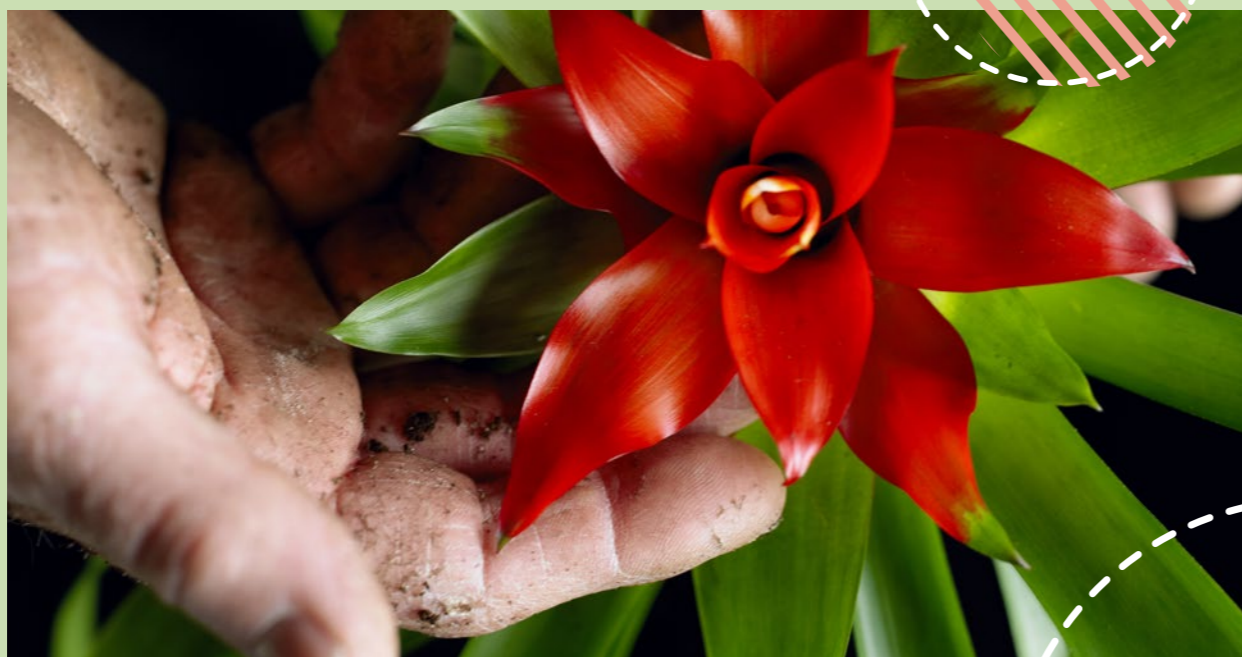

Thanks to our many years of experience and knowledge of the plants and the market, we know exactly which and how bromeliads are best suited for each country, retail format, and consumer. We love to translate our valuable expertise into the most effective and profitable proposals for our clients.

In this catalog we present our varied range of Bromeliads with added value. The wide range makes it easy to choose your favorites in various seasons, themes and lifestyles.

Bromeliads fit perfectly into the trend of 'Urban Jungle'. The product group is growing in relevance through product development and strongly growing consumer interest.

Do you have questions or would you like to exchange ideas that may contribute to your format's goal and sales targets with flowering houseplants like the bromeliads? Please contact us. You ask and we will answer!

Siegfried Bunnik
Commercial Manager

BROMELIADS

Bromeliads have become true world travellers. Their ancestors grew high in the rugged Cordilleras de los Andes mountain range and deep in the tropical jungles of Uruguay. Bromeliads, in all their varieties and splendour, still grow abundantly throughout Central and South America.

Then, in the eighteenth century, Belgian traders visiting these regions noticed the beauty of the plants and brought a few back to Europe. And this was the start for all the bromeliad varieties you can choose from today.

EASY CARE

Bromeliads are strong, easy to care for, and flower beautifully for no less than 3 to 6 months on average. They love a light spot (no direct sunlight) and need to be watered via their so-called 'tank' once a week.

Depending on your climate, bromeliads can move from indoor to a balcony or terrace from mid-May. As tropical plants, they don't like frost so, if temperatures can still drop, we advise that you cover them during the night. And like indoors, don't place them in direct sunlight.

VARIETIES

In their natural habitat, the Bromeliad family includes over 3000 varieties. The most well-known bromeliad in our collection is the Ananas, better known as the pineapple, but we also grow the Vriesia, Guzmania, Tillandia, Aechmea, and Multiflower varieties.

OUR GROWERS

The Bromelia Specialist company is the result of a unique collaboration between our growers. All growers are specialised in certain parts of the cultivation process.

Bromelia Specialist has eight different locations with a total of 240,000 m2 of greenhouses and our growers cultivate a total of around 8,500,000 bromeliads per year.

To deliver uniform and premium-quality plants all year round, they are sorted and given more space to grow multiple times, which is an automated and highly precise process. We also use ethylene, a natural product, to stimulate them to flower. By matching the moment of this treatment to the demand, we can carefully schedule the cultivation and delivery of flowering plants.

We control the entire process, from seedling to the final assembly of the ready-to-sell store product. How efficient is that?

SUSTAINABLE CULTIVATION

Bromelia Specialist likes to colour the world with these beautiful bromeliads. And with smart, sustainable solutions and innovations, we contribute to a green and healthy planet. The choices we make in the short and long term all contribute to a healthy environment – and this is good for people and plants.

The result: a strong and healthy plant, cultivated via a process that involves a minimum of energy, chemical wastewater, wastage, and plastics.

PARTNER IN INNOVATION

The quality of our Bromeliads is continuously monitored and improved. Our growers share their knowledge and information about market developments and consumer needs with the propagation companies.

We love to be inspired and develop new, beautiful varieties, which are assessed on quality, colour, volume, inflorescence, uniqueness, and use.

CUSTOMISED ADVICE

Thanks to our many years of experience and knowledge of the plants and the market, we know exactly which and how bromeliads are best suited for each country, retail format, and consumer.

We love to translate our valuable expertise into the most effective and profitable proposals for our clients.

RETAIL SERVICES

Bromeliad annual programme

Together, we set up a well-considered annual delivery programme with bromeliads and colours per country, season, retail format, and mood boards. We offer fixed shipments, promotions, novelties, and pay special attention to themes like Valentine's Day, Easter, and Christmas.

Branding Breasy

Our bromeliads are grown with great care and so our "warranty card" is actually our own brand – Breasy. Breasy is our way of showing that bromeliads are so easy to care for. People who'd like to know everything about bromeliads can also follow the Breasy social media channels and visit the website where we share care tips, fun facts, and inspirational posts.

Private label

Do you carry a private label and want to use your company style to ensure a certain uniformity in your stores? No problem. We can add your private label to our bromeliads at request. Our processes to realise this are optimised to perfection so just get in touch and we can discuss the options and your needs. The bromeliads are packaged as ready-to-sell store products in your company style. And if you have any questions or need marketing advice, please let us know.

Concepts

The Bromelia Specialist account managers will gladly help you develop complete and sophisticated concepts, such as presentation tables in garden centres, store displays, etc. Bromeliads also take centre stage when combined with green houseplants. Store employees only need to present the plants in the right place and manner to realise the best sales results.

Marketing

Are you interested in the unique stories behind our bromeliads? We love to share them with you. For instance, when you would like to add content or professional images of the plants and interiors to your online or offline communication channels. Our Marketing Department is here to help you.

Shopper Activation

Another value-adding method to entice and direct consumers to and inside your store with beautiful bromeliads is called shopper activation. This often involves multiple parties to make sure that the most effective activation is achieved for your shopping audience. We also know exactly how to logistically handle such large orders where everything comes together and a great team is the key to success.

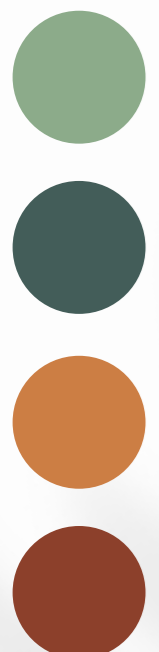

Dropshipping

Consumers also increasingly often order plants online. So now we offer you the option to sell our products directly from your online shop, including the product information. You sell the bromeliads and we take care of the rest. Dropshipping is for your convenience and has many advantages. Your online shop can have a broad range of products without the risk of maintaining large stocks. The broad assortment will appeal to more consumers and, thus, increase sales. Customer orders are directly forwarded to the nursery where they are packaged and shipped fresh every day. We will be more than happy to further discuss the various options.

GREEN RITUALS

Nature all the way. This natural style is for those who see the beauty in small things. Materials such as craft, terracotta, glass and jute are indispensable in this collection. Nature has so much to offer! Why would you only enjoy it outdoors when you can also bring some in?

... nature all the way

STAND TALL BE SWEET

The pineapple plant. A pineapple PLANT? Yes, really! In this case it is not in a fruit bowl, but it shines on a stem above a lush bunch of leaves. A strong plant that is a real eye-catcher from its fruit to its crown. Give some water to this topical specie now and then and it will give you months of living pleasure!

SPRING IS IN THE AIR

A green meadow with leaping lambs, flowers with busy bees flying over them, and of course the long-coveted sun rays. Spring is the time of the year when everything grows and blooms. Bring the spring into your home with a colorful bromeliad and enjoy all the beauty that nature has to offer.

SPARKLING XMAS

Breathing in snowflakes. The world covered with a white blanket. Just because in winter you stay much more indoors, the atmosphere in the house becomes even more important. Fortunately, plants are real mood makers. With a bromeliad at home, you can easily defy these gray days. If you light the fire, grab a nice cup of chocolate milk and take a look at your winter bromeliad, the moment of happiness is guaranteed.
