WATCH PARTS NON BRANDED

ASSORTED WATCH PARTS

Watch Parts Assorted

Watch Parts - All Kinds Mixed

This inexpensive pack of watch parts is a good buy. Ideal pack for that problem job or for arts/crafts pictures or sculptures.

Some of our customers who will have these are hobbyist, students, arts/crafts artists and watch repairers.

Steampunk watch parts jewellery, made with watch parts

The concept of Steampunk was fashioned in the late 1980s, initially inspired through writing, namely science fiction, but has transcended into other genres such as art, gaming, film, music and fashion. Its look focuses around a post-industrial revolution time but before the mainstream use of electricity; primarily using mechanical symbols.

Steampunk fashion incorporates Victorian-esque trends, such as petticoats, corsets, coats with vests, etc. In recent years this has branched off to jewellery and horology, such as a sculpture by the artist Tim Wetherell in 2009 called 'Clockwork Universe' making one of the first working Steampunk styled timepieces of that scale and hence bringing this branch of chic fashion to the mainstream.

This box of Assorted Mechanical Watch Parts is the ideal material starter pack needed to create an innovative range of the latest jewellery craze.

Any parts that are luminous are not radioactive or dangerous.

Top (Domed) Glass Sternkreuz ST

With top glasses, the thickness of the base determines the tight fit in the case. Please note that there are different inside diameters (i.e. different thicknesses of the base) for one and the same outside diameters.

Diameters are expressed in terms of tenth of millimetres. For the correct choice of top glasses one has to measure the appropriate inside diameter carefully.

Domed Top, Sternkreuz ST

Top (Domed) Glass - Sternkreuz (ST)

Range: Ø21.5mm to Ø33.0mm

With top glasses, the thickness of the base determines the tight fit in the case. There are different inside diameters (ie. different thicknesses of the base) for one and the same outside diameter.

• Sizes available A x B: Outside (Ø) x Internal (Ø)
