

# Yarrow

## Achillea 'Moonshine'

Still one of the most popular garden plants today, A. 'Moonshine' is valuable in the landscape because it combines well with almost everything. It is a terrific foil for many other colors including purple, blue, and pink. Its flat-topped, canary yellow flower clusters and bright silver foliage light up the garden. This is a clump-forming selection that blooms over a long period beginning in early summer. Plants will rebloom if they are cut back after the first round of flowering.

# Holly Hock

## Alcea 'Las Vegas'

“Like the bright colorful lights of Las Vegas”, this mixed color strain of fig leaf hollyhocks bears large, saucer-shaped flowers in unique shades of red, copper, chestnut brown, yellow, pink, and white over a long period beginning in early summer. This hardy species of hollyhock has decorative lobed leaves that are borne all the way up the stems, leaving little bare stem at the base. ‘Las Vegas’ is a bit shorter than the species, standing about 5-6 feet tall in bloom.

# Onion, Ornamental

## Allium 'Millenium'

It forms a compact, upright clump of glossy green, thick and strappy leaves which emit a slight smell of onion when crushed. In late July and August here in Michigan, a profusion of large 2", bright rosy purple, tightly rounded clusters of flowers appear on strong stems just above the attractive foliage. Butterflies and honeybees adore the flowers' sweet nectar but deer and rabbits steer clear of this perennial beauty.

# Japanese Anemone

## Anemone 'Wild Swan'

This Anemone has been instantly popular everywhere it has been introduced, and we're sure you're going to love it too. Unlike the typical Japanese hybrids that only bloom in fall, this Anemone rupicola hybrid blooms from late spring until frost with continuous prolific bloom. Huge 3-3½" white flowers will delight you with their lilac-blue bands on the backside. These bands will be a main feature as the flowers close at night.

# Butterfly Flower

## Asclepias tuberosa

A virtually hassle-free, very long lived perennial, offering three months of tangerine orange blooms (occasionally red or yellow) from early through late summer. Deadheading the flowers will stimulate another bloom cycle about a month after the first one. The flowers, which are heavily laden with nectar and pollen, are particularly attractive to hummingbirds, Monarch butterflies, bees, and other beneficial insects. Gather bouquets of Asclepias all summer long; the long stems are wonderful for cutting and are long-lasting. Sear the ends of the cut stems over a flame to stop the milky sap from leaking out.

# AKA Rhododendron

## Azalea 'Bloom-A-Thon Double Pink'

© Proven Winners® ColorChoice®

Twice as nice as other azaleas! Why settle for just a week or two of flowers when you can enjoy up to five months of blooms? Large flowers appear in April, then rebloom in early July, continuing through fall until hard frost. Even high summer temperatures don't stop this beauty from producing loads of late summer and fall flowers. The evergreen foliage is disease resistant, and maintains excellent color year-round. Flowering lasts for 4-6 weeks in spring, and then another 12-16 weeks in summer and fall.

Reblooming and shade tolerant!

# Butterfly Bush

## Buddleia 'Buzz Hot Raspberry'

If you want a fool-proof butterfly-attracting garden, Buzz Hot Raspberry Butterfly Bush is the place to start. This new Buddleia davidii is taking the garden world by storm. Be the first in your neighborhood to have this beauty. The list of wonderful qualities of this Butterfly Bush is long. For starters, it is more compact and less gangly than the species so it is the perfect fit for smaller gardens. It's not a dwarf, though, so it still gives you a good vertical presence. (This also makes it a perfect plant for larger containers.) The flowers are unforgettable. Long tapering spikes of bright hot, raspberry -pink florets bloom continuously from spring to fall. They are famously fragrant, to you and to pollinators.

## Clematis 'Jackmani Superba'

Clematis can be grown in full sun or light shade, but its base and roots must be completely shaded. You may need to plant a small shrub or large perennial directly in front of its rootball to keep it cool and shaded. A thick layer of mulch will also help to keep the soil moist. This vine prefers to be grown in moist, well-drained, slightly alkaline soil. Adding lime to the soil will help to provide these conditions.

## Crocosmia 'Prince of Orange'

Developed for its exceptional seedpods in fall, this new hybrid from The Netherlands forms an upright clump of dark green, sword-like foliage topped with arching stems of 20 or more vivid red-orange blossoms with a distinctive, burgundy speckled, gold center. The flowers are spaced very close together on the stems, resulting in a more concentrated blast of color from midsummer through late summer. The decorative seed pods that develop in fall are popular in dried flower arrangements.

## Delphinium 'New Millenium Mini Stars'

If you love the look of traditionally tall Delphiniums but they're just too tall for your use, you're in luck! From the breeder of the New Millennium Hybrids comes a brand new series of truly dwarf Delphiniums that have all the beautiful characteristics of their taller cousins except their height! Topping out under 2 ½ feet tall, these new dwarf Delphiniums never need staking and won't fall over in their pots. They can be grown near the front to middle of the border and work better in windy sites than taller varieties.

## Delphinium 'New Millennium Stars'

New Millennium Stars' is a mix of all the New Millennium Hybrid delphiniums including: 'Blue Lace', 'Blushing Brides', 'Green Twist', 'Double Innocence', 'Misty Mauves', 'Morning Lights', 'Pagan Purples', 'Purple Passion', 'Royal Aspirations', and 'Sunny Skies'. Therefore, the flowers will range in color from white to pink to purple and will range in height from 3 to 6 feet. This plant is an English hybrid type of delphinium bred by Dowdeswell's Delphiniums in New Zealand. They are hand crossed by the breeder in order to produce the highest quality seed. These F1 hybrids have excellent form, strong stems, and a vigorous growth habit. They were selected for their improved tolerance of heat and humidity, while retaining their cold hardiness.

# Bleeding Heart

## Dicentra eximia 'Luxuriant'

Cherry red, heart-shaped blooms dance charmingly above spreading mounds of ferny, blue-green foliage. This selection is everblooming, flowering most freely in spring and continuing throughout the summer and into fall. It also seems to tolerate more sun and summer heat than most other varieties. Unlike the Common Bleeding Heart, D. 'Luxuriant' will not go dormant in midsummer as long as the soil is kept moist. Rather, it will enchant passersby all season long.

Every bit as charming as the pink form, *D. s.* 'Alba' forms large, bushy clumps of powdery-light green foliage comprised of cut or lobed leaves on fleshy stems. In late spring, chains of puffy, white, heart-shaped flowers dangle beneath the arching, leafless stems. These racemes make delightful additions to fresh bouquets, lasting about 2 weeks in a vase. In cooler climates with adequate moisture, the bloom time may be extended into early summer.

# Coneflower

## Echinacea 'Cheyenne Spirit'

Incredible color range of these first year-flowering perennials which includes rich shades of tomato red, near-fluorescent orange, magenta, golden yellow, and white. Though the height of each color varies slightly, they are all very well-branched, bushy plants that fill out the pot nicely and have high color impact in the landscape.

## Echinacea 'Delicious Candy'

The color on this double coneflower is practically fluorescent, with glowing fuchsia pink flowers. The single ray petals are held horizontally underneath the large pom-pom blooms. 'Delicious Candy' is one of the first Echinacea to flower and stays fresh looking long into the season. In addition to its beautiful flowers, this coneflower also has attractive dark green leaves and dark stems on compact plants. Praised for their cheerful brightly colored flowers, coneflowers are a mainstay in today's garden. Be sure to leave some spent blooms on the plants in the fall because their seeds provide winter food for finches and other birds. The dried seed heads also provide architectural interest in the winter.

## Echinacea 'Pow Wow Wildberry'

Wow! This new variety is incredibly impressive for a seed grown Echinacea. It's no surprise that it is a 2010 All America Selections winner. Each stocky, relatively short plant carried a bouquet of fragrant, 3-4", deep purple-pink to near-magenta flowers on stiff, branched stems. More branches result in more flowers per plant and a showier display in the landscape. We noted that the older flowers were nearly the same magenta color as the new flowers; the flowers held their bright coloration very well as they aged. This first year flowering perennial reportedly keeps on blooming without having to be deadheaded, though you may still want to trim back spent flowers to maintain a tidy appearance.

# Ostrich Fern

## fern *Matteuccia struthiopteris*

One of the largest and most popular ferns in cultivation today. The dark green, pinnate fronds are shaped like ostrich plumes, being much wider at the top and tapering down to a bare stipe. The first set of leaves is sterile and has a gracefully arching form. These leaves can reach heights of 6 feet in ideal environments. This set of leaves dies back by early to midsummer and is replaced by a set of fertile, dark green leaves which are about half the height of the sterile ones. These leaves turn a shiny bronze-gold in fall, becoming brown in winter.

## Gaura 'Walberton's Silver Fountain'

Gaura 'Silver Fountain' is a perennial that your pollinators will love! Tall stems of pale pink buds open to clear white flowers that will bloom throughout the season. These pretty blooms have an exceptionally long bloom time and will light up your garden from early summer all the way through the fall! The blooms are settled against and complimented by variegated crisp green and lemon yellow foliage that will provide plenty of interest in your landscape. Gaura is a North American prairie native that is hardy in zones 5-9. Not only is it gorgeous but it's a pollinator magnet! It's commonly known as Whirling Butterflies but it will invite bees, hummingbirds, and butterflies to the show. Add this stunning long bloomer to your garden for endless color and plenty of pollinators in your landscape.

# Carex, Sedge

## grass Carex m. 'Ice Dance'

With its wide, strappy leaves measuring 1/4 to 1/2 inch across, this carex makes a bold statement in the shade garden. The leaves are dark green with bright white variegated edges. Small, cream, bottlebrush-like flowers are produced in mid-spring but are rather insignificant to the plant's ornamental value. This variety will grow in a variety of conditions, from nearly full sun to shade in average to moist soil. Unlike many other sedges, 'Ice Dance' is a slow to moderate spreader that should be used as a groundcover or contained in pots.

# Ornamental Grass

## grass Miscanthus 'Encore'

'Encore' is a perfect choice for northern climates, where the growing season is shorter. Since it blooms so early, this ornamental grass has a chance for an encore performance, shooting up a secondary flush of coppery purple plumes before frost hits. Blooming starts in late summer to early fall and lasts until mid-fall. The flowers turn to a creamy tan color with age. This perennial forms a tall, upright clump of dark green leaves with white midribs. Before blooming, this plant stands around 4 ½' tall. Be sure to leave this grass standing so it can provide winter interest through the snowy months.

# Ornamental Grass

## grass Miscanthus S 'Oktoberfest'

'Oktoberfest' is the gold standard in Miscanthus. The wide, deep green leaves with a white midrib form a narrowly upright tower about 4 ½' tall before blooming. In late summer or early fall, the foliage develops deep purple and red highlights which complement the showy flowers that emerge a rich shade of shimmering burgundy and copper, then mature into fluffy, creamy tan seed heads.

# Bitter Switch Grass

## grass Panicum a. 'Apache Rose'

Neither rain nor wind will knock this solid grass down! 'Apache Rose' has a dense, upright, columnar habit with grey-green leaves. In the fall, the tips of the leaves are flushed with a hint of rosy-red. While other green-leaved Switch Grass typically have cream or tan inflorescences, 'Apache Rose' has unique rose-colored flower panicles—a welcome color in the fall garden. Switch grass gets its name from the peaceful swishing sound it makes when blowing in the wind. All parts of this grass are very sturdy, and will remain standing thru winter unless snows are heavy. This provides important cover for birds during the coldest days of winter. This grass is very versatile from a design standpoint; it is effective as a specimen, in masses, for screening, alongside ponds or streams, or even in large containers.

# Switch Grass

## grass Panicum 'Cheyenne Sky'

Absolutely ideal for growing in decorative containers, this hardy Red Switch Grass is a perennial substitute for Pennisetum 'Rubrum'. Measuring in at just 3ft (2ft before blooming), 'Cheyenne Sky' forms a tight, vase-shaped clump of blue-green foliage that begins turning wine red in early summer. By late summer, nearly the entire clump is drenched in color and is topped by matching wine-red flower panicles held just above the foliage. It makes a dynamite specimen plant and is even more eye-catching when planted en masse.

# Prairie Drop Seed

## grass Sporobolus Heterolepis

Considered by many to be one of the most refined of all native prairie grasses, Prairie Dropseed has a soft, fountain-like look about it. The green leaves are very narrow, almost threadlike, and grow to form an 18 inch tall clump. It often turns rich shades of gold or deep orange in the fall and then light copper to creamy tan in winter. In late summer, soft pinkish brown flowers are produced atop thin, arching stems held high above the foliage. These panicles are filled with distinctly sweet smelling seeds which smell like ground coriander. Though it produces an abundance of seeds, it is not known to seed invasively in the landscape. This grass is very heat and drought tolerant because it is deep rooted. It is often planted en masse as a groundcover or as a specimen.

# Coral Bells

## Heuchera 'Appletini'

Continuing the trend of bringing flower performance back to Coral Bells, 'Appletini' is the perfect combination of lime foliage and red flowers. Medium sized, lime green leaves have a silver overlay that makes the foliage truly attractive. Its best feature is arguably its stunning flower color: dark rose red stems hold rich ruby red flowers, starting in early summer. This plant occasionally reblooms into fall. The bright foliage is the perfect addition to a perennial combination container or the front of the border.

## Heuchera 'Magma'

Extremely heat and humidity tolerant! An absolute "must have" Heuchera 'Magma' astounds and delights with giant, rounded leaves of bright pink or purple with prominent veining. It's an understatement to say that this is an attention-getting plant; the only word that really describes it is "eye-popping"! Content in sun or shade, it reaches just 14 inches high (when not in bloom) and 2 feet wide, but the individual leaves can grow quite large -- 8 inches is not unheard of! It leafs out in mid-spring with pinkish-purple tones overlaid by a silvery sheen, and by early summer is topped with clusters of pink blooms on 30-inch stems.

Hummingbirds and butterflies love these blooms, visiting frequently during this period.

## Hosta 'Empress Wu'

Huge dark green, deeply veined leaves of good substance can measure more than 1½ feet wide and long. Large leaves are formed as a young plant, though entire clump takes about 5 years growing in the ground to achieve mature size. An outstanding focal point and topic of conversation in your shade garden!👍

# Plantain Lily, Hosta

## Hosta 'Guacamole'

- Huge, glossy, apple green leaves are surrounded by streaked, dark green leaf margins just like an avocado
- Leaf centers become brighter gold in summer and when exposed to more sunlight while the margins remain dark green
- Very fragrant, flared, pale lavender flowers appear on 36" scapes in late summer
- Rapid grower that displays good sun tolerance

This brightly colored hosta livens up the shade garden with its sharply contrasting variegation and light lavender flowers in midsummer.

It is a sport of 'Orange Marmalade' with wider, more blue-green margins. Leaves of good substance have yellow centers which brighten to parchment and margins that turn dark green in summer. The leaves of adult vernalized plants are more cupped at the base compared to its parent. Overall a quite distinct and cheerful hosta!

**\$9.99**

# Plantain Lily, Hosta

## Hosta 'Liberty'

This mid-sized selection has thick leaves of matte green, with a contrasting wide, streaky border of yellow that later changes to creamy white. Early summer flowers are lavender. An outstanding specimen selection, with very thick leaves and good slug resistance. While deer enjoy eating Hosta, this variety may be slightly less palatable to deer than others. A sport of the ever-popular H. 'Sagae'. Selected as the 2012 Hosta of the Year by the American Hosta Growers Association.

## Hydrangea 'Let's Dance Can Can'

Let's Dance Cancan hydrangea (*H. serrata*) is an excellent rebloomer, requiring only a short period of vegetative growth in order to create new wood blooms. However, it has another trick up its sleeve: it sets its flower buds along the entire length of the stem, not merely at the tips. This means that if this hydrangea is cut back, or damaged by cold temperatures, those lower old wood buds will still develop into flowers. It's a huge leap forward in achieving success with hydrangeas for landscapers, home gardeners, growers, and retailers alike. Abundant, semi-double, star-like florets make the lacecap flowers very showy.

# Hydrangea, Hardy

## Hydrangea 'Limelight'

An exciting hardy Hydrangea from Holland, 'Limelight' has unique bright chartreuse blooms in mid-summer that hold bright and refreshing color right into autumn when the blooms change color to a rich deep pink. The autumn display of chartreuse and pink blooms on the same plant is breathtaking! The color makes a great addition to the garden and it blends wonderfully with all other colors. Use 'Limelight', either fresh or dried, in bouquets to make a unique floral design. This is an easy to grow plant with reliable flowering and flower color regardless of soil pH. The flower heads are of good size, ranging from 6 to 12 inches and are held upright on the shrub. The blooms are well distributed making a very nice plant and display.

## Hydrangea 'Pinky Winky'

Pinky Winky has an unusual name, and an even more unusual flower. The large white panicles open in mid to late summer, and as summer turns to fall the florets at the base of the panicles turn pink. The flower panicles continue to grow, producing new white florets at the tip. The result is spectacular two-toned flower panicles that can reach up to 16 inches in length! This is a real show-stopper that's also very easy to grow. Adaptable to most soils and both sun and shade, Pinky Winky will thrive in most gardens.

Huge two-toned blooms!

## Hydrangea 'Red Sensation'

This compact shrub earns its name with every mophead bloom it sets! Part of the exciting Next Generation™ series of reblooming Hydrangeas, 'Red Sensation' wows with rounded "snowballs" of lime green that turn bright red at maturity . . . then mature to rich antique purple! All this on a shrub just 3 feet high and wide -- compact enough for a patio container! 'Red Sensation' is a powerhouse in a very petite package. Well-branched and bushy, it sets masses of flowers, but you'd never know it from the slender, rounded silhouette it presents! Large, toothy bright green leaves bank the blooms in fresh color from spring through frost, then drop for winter. It never needs trimming or pruning to keep its neat little shape!

# Dwarf Crested Iris

## Iris cristata - WILD FLOWER

Dwarf Crested Iris is a wildflower that is native to areas in the United States. It has bluish purple blooms. This perennial is small but very attractive. This small flower attracts hummingbirds and other friendly wildlife. They can grow 6 to 9 inches tall (15 to 23 centimeters) and 6 to 12 inches wide (15 to 30 centimeters.) These plants can grow in calcareous soil, woodland soil, rocky ledges, or along streams. They appreciate full sun to partial shade. It makes for a great cover plant. This flower is well known for its unique crested flower. Their unusual shape, bright blue color and yellow crested accents make them a highlight to any flower bed.

# Shasta Daisy

## Leucanthemum 'Spoonful of Sugar'

The first thing you'll notice about this cute Shasta Daisy is the enormous flower size. The second thing you'll notice is its incredibly compact, dome-like habit, with flowers produced almost all the way to the ground. 4.5in, creamy white flowers have two rows of very long petals. Flowers are held tight and compact against the attractive, dark green foliage, with a second wave of flowers following the initial wave. Growers will appreciate that 'Spoonful of Sugar' is a free-flowering variety. Try growing this cute perennial in containers or in the landscape where it will shine brightly near the front of the border.

# Bee Balm

## Monarda 'Pardon My Cerise'

No room for the tall, bushy, traditional Bee Balm in your garden? Here is a petite selection that's easy to tuck into the front of your sunny border and combination containers. Reaching just a little over a foot tall at maturity, this compact selection forms a bushy, well-branched clump of green, semi-glossy foliage. From mid through late summer, dark cherry pink flowers sit just at the top of the foliage. Though the plant may be dwarf, the flowers are the same size as taller selections, measuring a full 2½ - 3 inches across. They add a bright splash of color to the border in high summer.

# Cat Mint

## Nepeta 'Cat's Meow'

Unlike most Nepetas that have a bit of a wild, unkempt look, this first class selection keeps its tidy, dense, rounded shape all season long. Its small, grey-green, aromatic leaves are topped with well-branched stems carrying spikes of sky blue flowers with purple calyxes from early summer into early fall. 'Cat's Meow' has everything today's gardeners are looking for: a low maintenance, drought tolerant, deer resistant, long blooming perennial that looks great all season.

# Cat Mint

## Nepata 'Purrsian Blue'

Like 'Cat's Meow', this selection shares an improved tidy habit, though it is a bit smaller and more compact in size overall. In its first year, 'Purrsian Blue' forms a small, perfectly rounded, densely branched clump of tiny, green leaves. In year two, the plant maintains its compact mounding habit but nearly doubles its spread to just over two feet across. This is a very floriferous selection whose flower power is amplified by its having its flowers spaced closely together on the stems. Periwinkle blue flowers are coddled by dark purple calyxes just above the aromatic foliage from early summer into early fall.

# Itoh Peony

## Paeonia 'Bartzella'

'Bartzella' is a cross between a herbaceous and a Tree Peony (known as Intersectional or Itoh Peonies), a horticultural feat that has proved remarkably difficult to accomplish. The result is a stunningly beautiful variety whose deep sulphur yellow flowers, each with red flames at the center, are carried on a plant that looks and behaves like a very big, healthy herbaceous Peony. 'Bartzella' bears dozens of huge flowers (9" across) on strong stems, above rich green foliage. There are very few yellows in the herbaceous Peony world, and none can compare with 'Bartzella' in beauty or performance.

# Phlox, Creeping

## Phlox 'Bedazzled Lavender'

It's easy to see how this series got its name when they explode into bloom come mid spring. Like a party for your garden, the Bedazzled series members produced star-shaped, notched flowers that cover a rounded, spreading habit. These bloom a few days or a week before Phlox subulata, depending on the weather. These will soon become some of your spring favorites for your garden. These will be moderate growers year one in the garden, but will become a groundcover with age.

# Phlox, Garden

## Phlox 'Fashionably Early Crystal'

This new Hybrid Phlox blooms earlier than the average Tall Garden Phlox (*Phlox paniculata*), starting about 2-3 weeks earlier than the typical Phlox. 'Fashionably Early Crystal' is a taller variety of Hybrid Phlox that will work best for the middle to back of the border. In addition to being early blooming, it boasts a long season of color. Pure white flowers with a faint light purple eye appear from early summer well into midsummer with some rebloom in fall. Broad, dark green, thick foliage stays beautiful all season. Each member of the Fashionably Early series has exceptional mildew resistance, thick leathery leaves, and a stoloniferous habit (as opposed to the tightly clumping *P. paniculata* types).

## Salvia 'Color Spires Crystal Blue'

Salvia is a staple item for every sunny garden. It asks little more than sunshine and a little drink every once in a while in return for producing a bountiful mass of colorful flower spires from late spring into early summer. It forms a dense, rounded clump of aromatic, rugose grey-green foliage that looks nice all season long and is not enjoyed by rabbits or deer. 'Crystal Blue' Salvia is the first of its kind—an incredibly unique light sky blue (most perennial Salvias are darker purple), a cool shade perfectly fitting for a perennial that blooms relatively early in the season.

# Spiderwort

## Tradescantia 'Charlotte's Web'

Finally—a gold foliage Spiderwort that doesn't burn in sun! 'Charlotte's Web' excelled from spring until fall, outperforming 'Sweet Kate' and all others in sun tolerance. Its grass-like leaves emerge in spring with a thin red margin on the edges of each leaf blade. The chartreuse foliage transitions to gold with more sun exposure. Small, three-petaled soft blue flowers cover the arching, bushy clumping habit. Like most Tradescantia of its type, flowers will open in the morning and close in the afternoon on sunny days.

## Veronica 'Magic Show Pink Potion'

This variety produces baby pink flowers that cover the top half of the plant, a great match to 'Enchanted Indigo' in terms of habit and landscape performance. The deep green foliage forms a rounded, low habit that is wider than typical and packed full of flowers. Growers will appreciate the vigorous growth rate on this Veronica, quickly filling a pot at the same pace as the other members of the MAGIC SHOW® Collection. 'Pink Potion' does require vernalization to bloom.

## Veronica 'Magic Show Wizard Of Ahhs'

Joining the popular MAGIC SHOW® Collection, this plant brings the "oohs" and "ahhs" with its early blooming performance, outstanding flower color, and impeccable habit. One of the earliest Veronica to bloom, this plant produces thick spikes of violet blue flowers that cover the top half of a low, wide habit. 'Wizard of Ahhs' requires vernalization to bloom.
