

CORN & SOYBEAN SEED QUALITY

Check the health of your commercial corn and soybean seed lots. Know the quality of the corn inbred seed you are planting for your hybrid productions and the commercial seed you are selling to your clients. Eurofins STA Laboratories can test for the following seed borne pathogens.

Corn

- *Chochliobolus carbonum*
- *Clavibacter michiganensis ssp nebraskensis*
- *Pantoea stewartii*
- *Stenocarpella maydis*
- Maize Chlorotic Mottle Virus
- Maize Dwarf Mosaic Virus
- *Sclerophthora macrospora*

Soybeans

- Bean Pod Mottle Virus
- Phomopsis/Diaporthe complex
- Soybean Mosaic Virus
- Tobacco Ringspot Virus (TRSV)
- Tomato Ringspot Virus (ToRSV)
- *Xanthomonas axonopodis glycines*
- *Pseudomonas syringae glycinea*
- *Curtobacterium flaccumfaciens pv flaccumfaciens*

Contact Eurofins STA Laboratories for pricing and sample submission. We are here to help you provide the best quality seed for your productions and for your clients.
