

# Notes on the polypores (Polyporaceae) of Ahvenanmaa

Lalli Laine

The archipelago of Ahvenanmaa at the south-western corner of Finland differs in many regards from the rest of the country. The climate is warmer and more humid and, phytogeographically, its vascular plant flora contains abundantly southern species not known on the mainland of Finland.

Only a few papers have been published on the mycoflora of Ahvenanmaa (Swedish: Åland) FREY 1944, STENLID 1947, SCHULMANN 1960). Polypores (*Polyporaceae*) have been observed only occasionally. Most of these observations have been published by STENLID (1947, p. 87, 27 notes of 18 species) also including some rare species. FREY (1944, p. 15–16) has given somewhat fewer observations of *Polyporaceae* than STENLID. In the collections of mycological herbaria of the Universities of Helsinki and Turku and of the Finnish Forest Research Institute, Helsinki, there are only a few samples (some dozens) of *Polyporaceae* from Ahvenanmaa.

The author has collected polypores in the Ahvenanmaa area during the last two autums (years 1965 and 1966) in connection with his other investigations. I wish express my deep gratitude to Prof. Dr. V. Kujala who has determined the critical and difficult samples and examined the determinations made by me. I wish also to express my thanks to my fellow excursionists, Dr. V. Hintikka and Mr. M. Kaivos as well as to forest officer Bo Högnäs who kindly provided information on many interesting investigation places in Ahvenanmaa.

The following list of species has been arranged alphabetically. The names of the taxa follow in the main that of BONDARTSEV (1953). Some of the names of resupinate species are after CHRISTIANSEN (1960). All specimens in the following list, which have

been collected by myself (marked L.L. & M.K. or L.L. & V.H.), are preserved in the Herbarium of the Finnish Forest Research Institute, Helsinki (abbreviation: HFR). I have also studied the polypores from Ahvenanmaa that are preserved in the Herbarium of the University of Helsinki (H) (collected mainly by Prof. Frey and Dr. Schulmann) as well as those in the Herbarium of the University of Turku (TUR). The collections of STENLID (1947) are located in Sweden and have not been studied by the author. The place names, which have been typed spaced out in the following list of species, refer to the names of the parishes (smallest local government areas in Finland). The following abbreviations of the names of persons have been used: L.L.= Lalli Laine, M.K.=Matti Kaivos, O.v.Sch. =Otto von Schulmann, V.H.=Veikko Hintikka, V.K.=Viljo Kujala. The geographical situation of the Ahvenanmaa area is the following: 60° 40' – 59° 30' N. and 19° 07' – 21° 20' E.

*Abortiporus borealis* (Fr.) Bond. et Sing. (*Spongipellis borealis*).

Eckerö: 3 km to the south of Skag, on a stump of *Picea abies* (8. 10. 1966, L.L. & V.H.). Jomala: Gottby, on a stump of *Picea abies* (6. 10. 1965, L.L. & M.K.).

*Amyloporia calcea* (Fr.) Christ. (Det. V.K.)  
Finström: Mangelbo, on a wooden fence in *Ulmus scabra* stand (10. 10. 1966, L.L. & V.H.). Föglö: Sonnboda E., on a fallen trunk of *Pinus sylvestris* (3. 10. 1965, L.L. & M.K.). Geta: Soltuna, Getaberg, on *Pinus sylvestris* (10. 10. 1966, L.L. & V.H.). Jomala: 1 km to the north of the church, on *Picea abies* (10. 10. 1966, L.L. & V.H.). Lumparland: Långnäs, on rotten wood (11. 10. 1966, L.L. & V.H.); Skag, on *Pinus sylvestris* (7. 10. 1966, L.L. & V.H.).

*A. xantha* (Fr.) Bond. et Sing. (*Poria xantha*)  
Föglö: Sonnboda E., on a fallen trunk of *Pinus*

*silvestris* (3. 10. 1965, L.L. & M.K.); Jyddö, on *Pinus silvestris* (9. 10. 1966, L.L. & V.H.). Geta: Soltuna, Getaberg, on *Pinus silvestris* (10. 10. 1966, L.L. & V.H.)

*Anisomyces odoratus* (Wulf.) Pil. (*Trametes odorata*)

Jomala: 2 km to the northwest of Önningeby, on a stump of *Picea abies* (11. 10. 1966, L.L. & V.H.)

*Antrodia mollis* (Somm.) Karst. (*Trametes mollis*)

Hammarland: 1,5 km to the south-east of the church, on a fallen trunk of *Populus tremula* (8. 10. 1966, L.L. & V.H.)

*Aporplium semisupinum* (Berk. et Curt.) Bond. (Det. V.K.)

Jomala: Ramsholm, on deciduous wood (6. 10. 1965, L.L. & M.K.)

*A. vulgare* (Fr. s. Bres.) Bond. et Sing. (Det. V.K.)

Finstrom: Mangelbo, *Ulmus scabra* stand, on *Corylus avellana* (10. 10. 1966, L.L. & V.H.)

*Bjerkandera adusta* (Willd.) Karst. (*Polyporus adustus*)

Hammarland: 1,5 km south-east of the church, on *Picea abies* (8. 10. 1966, L.L. & V.H.). Jomala: Möckelö, on deciduous wood (6. 10. 1965, L.L. & M.K.); Ramsholm, on *Alnus glutinosa* (8. 10. 1966, L.L. & V.H.). Lemland: Nåtö (15. 9. 1946) and Idholm (22. 9. 1946, G. Stenlid, STENLID 1947). Maarianhamina: Ytternäs, on a stump of *Alnus glutinosa* (1. 10. 1965, L.L. & M.K.); on *Fraxinus excelsior* (6. 10. 1965, L.L. & M.K.); Ytternäs (1. 9. 1955, O.v.Sch. HFR)

*Ceraporia incarnata* (Fr. s. Bres.) Bond. (Det. V.K.)

Eckerö: Skag, on *Fraxinus excelsior* (7. 10. 1966, L.L. & V.H.). Jomala: Ramsholm, on a fallen *Fraxinus excelsior*, (8. 10. 1966, L.L. & V.H.). Lumparland: Skag, on *Fraxinus excelsior* (7. 10. 1966, L.L. & V.H.)

*C. viridans* (Berk. et Br.) Donk f. *inconstans* (Karst.) B. et G. (Det. V.K.)

Jomala: Möckelö (21. 8. 1958, O.v.Sch., HFR)

*Cerrena unicolor* (Bull.) Murr. (*Daedalea unicolor*)

Eckerö: Skag (12. 9. 1963, Esteri Kankainen, TUR). Finström: Mangelbo, on *Betula* (7. 10. 1965, L.L. & M.K.); Torrbolstad, on *Betula* (2. 10. 1965, L.L. & M.K.). Föglö: Brättö, on *Betula* (3. 10. 1965, L.L. & M.K.). Geta, Häckböle, on *Corylus avellana* (25. 9. 1942, R. Frey, H.). Jomala: 2 km north-west of Önningeby, on *Betula* (11. 10. 1966, L.L. & V.H.); at the border of Hammarland (21. 9. 1964, Heli Heikkilä, TUR). Maarianhamina: Ytternäs, on *Betula* (10. 10. 1966, L.L. & V.H.). Saltvik: Kvarnbo, on a stump of *Populus tremula* (9. 9. 1945, Carl Cedercreutz, H)

*Chaetoporellus asiaticus* (Pil.) Christ. (Det. V.K.)

Finstrom: Mangelbo, *Ulmus scabra* stand, on rotten wood (10. 10. 1966, L.L. & V.H.; 7. 10. 1965, L.L. & M.K.); Bartsgårda, at the border of Saltvik, on *Picea abies* (5. 10. 1965, L.L. & M.K.)

*Ch. litshaueri* (Pil.) Bond. (Det. V.K.)  
Jomala: Möckelö, on rotten wood (6. 10. 1965, L.L. & M.K.)

*Chaetoporus corticola* (Fr.) Bond. et Sing.  
Föglö: Jyddö, on a fallen trunk of *Quercus robur* 9. 10. 1966, L.L. & V.H. Det. V.K.)

*Ch. euporus* (Karst.) Bond. et Sing. (Det. V.K.)  
Lemland: Flaka, on *Betula* (11. 10. 1966, L.L. & V.H.)

*Ch. radulus* (Pers.) Bond. et Sing. (Det. V.K.)  
Jomala: Möckelö (6. 10. 1965, L.L. & M.K.)

*Coltricia cinnamomea* (Jacq.) Murr. (*Polyporus cinnamomeus*)

Eckerö: on rotten wood (4. 10. 1954, O.v.Sch., HFR)

*C. perennis* (L.) Murr. (*Polystictus perennis*)  
Geta: Snäckö (28. 9. 1949, C. Cedercreutz, H)

*Coriolellus heteromorphus* (Fr.) Bond. et Sing. (*Trametes heteromorpha*)

Föglö: Brättö, on a stump of *Picea abies* (3. 10. 1965, L.L. & M.K.). Geta: Bolstaholm, on a stump of *Picea abies* (30. 9. 1942, R. Frey, (det V.K.), H). Jomala: »in Abiete« (1. 9. 1881, P. A. Karsten, H); Jomala (2. 9. 1881, P. A. Karsten, H)

*C. serialis* (Fr.) Murr. (*Trametes serialis*)

Eckerö: Storby, on a stump of *Picea abies* (13. 7. 1935, L.E. Kari, TUR); (25. 5. 1955, O.v.Sch., HFR); Skag, on *Picea abies* (4. 10. 1965, L.L. & M.K.).
