Shrubs, Trees & Vines

In this section, you will find a wide range of exciting and colorful woody plants. From the ever popular standard items to the new award winning varieties, you will find many of the essential elements of the evolving American landscape.

Due to their growth traits, we grade most evergreens, and some deciduous shrubs, in traditional measured sizes. This provides you with predictability and consistency. They have been fertilized and sheared religiously to end up with dense, lush plants that stand apart from the ordinary.

With most other deciduous shrubs and some evergreens, we are able to put the yardstick aside, because we "trim in" the consistency – with each plant as dense and beautiful as the next.

This allows us to use a simpler grading system: "Promo" (cute and economical), "Impact" (wow), "Super Impact" (super wow), or "Jumbo" (landscape size). A minimum size standard is used for each grade.

Our trees are grown with our Pot-in-Pot production system. In-ground "nest" pots help keep the roots cool in the summer and warm in the winter. To prevent circular root growth, we use Spin Out™. This painted coating on the inside of our containers helps to develop a fibrous, outward growing root system that speeds establishment in the landscape.

Vines come trained on a "redwood" stake and are trimmed to create a natural look. They are carefully developed and graded as "Impacts".

Perennials & Ornamental Grasses

The popularity of colorful perennials goes on and on. Now you can have all the latest varieties and sizes that your customers want – all from one convenient source. Our “Lil’ Cutie” lineup provides the ultimate in economy while utilizing a 4 1/2” pot. With our #1.5 container “Promo” program you can offer your customers the perfect balance between economy and effect. Next up is our #2C, #2.5C, and #3C “Impact” program that provides the “wow” factor - with big and beautiful plants.

For added sales appeal, take a look at our comprehensive collection of ornamental grasses. Outstanding varieties provide a range of foliage interest and intriguing plume shapes. These are likewise offered in a range of sizes from “Lil’ Cutie” and “Promo” up to our “Jumbo” grade (which is grown in a full-sized #3 container for added “stand up” capability). For smaller varieties we limit the size to our “Impact” grade, which is grown in a #2 container.

Pollinators

Is there a bigger buzz word (pun intended) in our industry than “pollinator”? And with good reason: according to the National Pollinator Garden Network, 1 out of every 3 bites we take is dependent on pollinators – how’s that for pollinator power! This cultivated collection of pollinator favorites takes the guess work out of selecting plants and makes it easy for your customers to

join in on the Million Pollinator Garden Challenge launched by The National Pollinator Garden Network. Offered in our economical Lil’ Cutie pots, this lineup is project perfect whether it is a community garden, window box, or patio planter. As with everything we grow, these plants offer consumers the peace of mind of being certified as **Veriflora® Sustainably Grown**.
