HOW TO FIGURE PARCEL POST

To find your zone, determine the distance you are from Houston and use the zone covered by this distance.

If you do not know your distance from Houston, phone your local post office to determine the zone in which you are located.

Add up the weights of the articles selected.

Refer to the chart at the left to determine your postage.

Add in the amount of the Insurance Fee as per the chart below.

(Example: If you are in Zone 3 and your purchase totals 15 lbs. in weight, and \$46.50 in amount, the postage is \$1.35 and the insurance fee is 30¢, so the total amount to send is the \$46.50, plus \$1.65, or a total of \$48.15.)

NOTE: THE MINIMUM MAILING FEE IS 75c FOR HANDLING, MAILING AND INSURANCE.

ITEMS ILLUSTRATED THAT DO NOT SHOW SHIPPING WEIGHT, WEIGH LESS THAN ONE (1) POUND. USE MINIMUM MAILING FEE OF 75c FOR THESE ITEMS.

You may order as many items as you desire for only one 75c mailing charge in the following classifications only:

RAILWAY EXPRESS INFORMATION

Certain items in this catalog are indicated to be shipped via Railway Express only. Express is the fastest way to ship merchandise, where it cannot be shipped via Parcel Post.

EXPRESS CHARGES — It is easy to estimate express charges. Find your zone, determine the distance you are from Houston, and refer to the Express Chart at the left.

(Example: If you are 280 miles (Zone 3) from Houston, and the merchandise you are ordering weighs 25 lbs., the approximate express charge would be \$4.20.)

Railway Express charges include insurance up to \$50.00. There is a charge of 23c for each additional \$100.00 valuation over the first \$50.00.

EXPRESS COLLECT — All express orders will be shipped "express charges collect," unless you specify "prepaid" and include the charges with your remittance.

EXPRESS SERVICE — Make sure your town is served by a Railway Express Agency before requesting express shipment of your orders. Be sure to include complete street address and number. Railway Express cannot deliver to a Post Office Box Number.

Diamond Classifications

Our Diamonds are carefully selected and much time and care put into the examination of these gems before purchasing. Our large diamond business is the result of the confidence of thousands of satisfied customers. Remember weight only does not determine values. Other factors—such as Cutting, Color and Perfection—affect the prices of diamonds, regardless of size or weight.

Cutting

The degree of brilliance of a diamond is determined by the excellence of its proportions and the quality of cutting. A correctly proportioned diamond should have 2/5ths of its weight above the girdle and 3/5ths below. A properly proportioned diamond has maximum brilliance over its entire surface.

Color

There is a wide range of color from finest blue white to fine white, white, yellow, and brown.

Perfection

The degree of perfection is a major factor in determining the value of a diamond. Some imperfections in diamonds can be seen by the naked eye; others can be seen only under strong magnification. A flawless diamond (often referred to and described by most jewelers as "perfect") is one without any imperfections whatsoever; that is, none that can be seen by a trained expert using a powerful magnifying glass (10X magnification).

Grading of Diamonds Illustrated in Catalog	
AAA-1	 <p>Identifies extra fine quality and blue-white color. This grade is so fine that even under ten-power magnification it is very difficult for anyone except a diamond expert to detect the faintest type of imperfection. Proportions and quality of cutting are exceptional . . . resulting in the greatest beauty and brilliance possible. This grade is often sold for perfect or flawless.</p>
AAA	 <p>Identifies extra fine quality and color . . . equal to the AAA-1 Grade in every respect except in a slight degree of color. This grade under ten-power magnification reveals the faintest of flaws if critically examined. In appearance it is the equal of the finest diamond.</p>
AA	 <p>Identifies fine color diamonds of slightly less perfection than Grade AAA. The two, or three, very small flaws in most cases can be seen only under a jeweler's magnifying glass. This grade of diamonds is especially appealing to those desiring a larger stone with very little sacrifice in beauty and brilliancy.</p>
A	 <p>Identifies diamonds of fairly nice quality and color. This grade has flaws, visible to the naked eye if closely examined. The quality of cutting and brilliancy is of a slight degree under AA grade.</p>

BEWARE OF MISREPRESENTATION The term "perfectly cut" does not apply to the perfection of a diamond. It describes the cutting only, and is therefore misleading if used to infer quality. Do not be misled.

Diamond Rings and Mountings in 14k Gold

The 'Linde' Star has essentially the same chemical and physical properties of the natural gem and practically the same degree of beauty, at a fraction of the price of the natural stone. It is as hard and timeless as its natural counterpart and possesses a beauty unlike anything you have ever owned. Its six white sharp rays are visible from both top and sides.

All above Diamonds AAA quality unless otherwise specified — See page 4 for explanation of Diamond grading. It is not always possible to obtain the exact weight of diamonds ordered. Weight may vary slightly. Price may vary according to weight.

We use only genuine 'Linde' Stars, unconditionally guaranteed. All items are stocked in White Gold only.
