## ACKNOWLEDGEMENTS

We would like to express our gratitude to the Center for Food Safety and Applied Nutrition (CFSAN) of the United States Food and Drug Administration (FDA) for so willingly sharing all the information concerning LanguaL™ and other indexing systems at the FDA. Special thanks goes to *Michele R. Chatfield*, *Ann Marie Poulsen* and *Charles E. Exley* of CFSAN for providing the original Factored Food Vocabulary and LanguaL™ files, and for many good discussions concerning LanguaL™ over the years. Special thanks goes to *Elizabeth C. Smith*, whose enthusiasm and energy has been inspiring for us in the EuroFIR food indexing courses and during the assessment of the indexed files, and without whom the LanguaL™ thesaurus would not be where it is today. Also, thanks to *Joanne Holden*, USDA Nutrient Data Laboratory, for following the continued work on LanguaL™ so closely.

LanguaL™ has a foundation that goes far back in time, and we find it important to mention the people, who brought LanguaL™ forward to us. Especially thanks to *Bradley Rosenthal* and *Thomas Hendricks*, both now retired from the FDA, for their enthusiasm and energy in promoting the LanguaL™ ideas in the past. We would especially like to express our gratitude to *Ivan Varsanyi* and his colleague *Judit Monspart-Senyi*, Hungary, who during the bilateral French-Hungarian BALATON and the European COST Action 99 projects persistently invoked updates and changes to the LanguaL™ Thesaurus to make the thesaurus up-to-date.

The most important event since the introduction of the LanguaL™ 2000 Thesaurus in 2000 is the introduction of the LanguaL™ Food Product Indexer, which greatly facilitates the indexing of foods in food data bases. The Food product Indexer was originally developed by *Erik Nørby*, *PolYTEC*, and *Anders Møller*, Danish Food Information, with a lot of help and constructive criticism from *Jayne Ireland*, Danish Food Information, and *Tue Christensen*, National Food Institute, Danish Technical University. It has taken much thought and many hours to develop the software to the present stage as a user-friendly LanguaL™ indexing tool.

For the most recent versions of the LanguaL™ Thesaurus we also owe special thanks to *Johanna Dwyer* and *Leila Saldanha* of the US Office of Dietary Supplements and to *Heli Reinivuo*, *Elly Buurma*, *Isabelle Berta-Vanrullen* and *Benoit Labarbe* of the national EuroFIR food composition database teams for their expertise in the inclusion of Dietary Supplements in the thesaurus.

We would also like to extend our thanks to *David Haytowitz* of the USDA Agricultural Research Service, to *Antoni Colom Umbert*, *Antoni Colom Fernández*, *Pere Palou Vidal*, *Manuel Moñino Gómez*, *Marta Autonell Caldentey* and *Ignacio Ricci Cabello* of the Ministry of Health and Consumers of the Balearic Islands and to the members of the EuroFIR food composition database teams. The compilers in the USDA and the EuroFIR network indexed the foods in their food composition databases, using the LanguaL™ Food Product Indexer. This work has led to many comments and suggestions, most of which are now included in the LanguaL™ Thesaurus.

Furthermore, we would like to thank *Marie Machackova*, *Irena Sukova* and *Maria Garcia Dias* in the EuroFIR Network for their translations of the thesaurus to Czech and Portuguese, and to *Gig Graham* of Benetta Corporation, USA, for many lively discussions and proposals for updating and extending the LanguaL™ thesaurus.

We also wish to thank *Damion Dooley*, University of British Columbia, and colleagues in the FoodOn food ontology initiative.

Roskilde, April 2018

## 1 WHAT IS LANGUAL™?

LanguaL™ stands for "Langua aLimentaria" or "language of food". It is an automated method for describing, capturing and retrieving data about food. The work on LanguaL™ was started in the late 1970's by the Center for Food Safety and Applied Nutrition (CFSAN) of the United States Food and Drug Administration (FDA) as an ongoing co-operative effort of specialists in food technology, information science and nutrition. The original name of the thesaurus was Factored Food Vocabulary (FFV).<sup>1</sup> Since then, LanguaL™ has been developed in collaboration with the US National Cancer Institute (NCI), and, more recently, its European partners, notably in France, Denmark, Switzerland and Hungary. Since 1996, the European LanguaL™ Technical Committee has administered the thesaurus.

The thesaurus provides a standardised language for describing foods, specifically for classifying food products for information retrieval.<sup>2</sup> LanguaL™ is based on the concept that:

- Any food (or food product) can be systematically described by a combination of characteristics
- These characteristics can be categorised into viewpoints and coded for computer processing
- The resulting viewpoint/characteristic codes can be used to retrieve data about the food from external databases.<sup>3</sup>

As constructed, LanguaL™ is a multilingual thesaural system using faceted classification. Each food is described by a set of standard, controlled terms chosen from facets characteristic of the nutritional and/or hygienic quality of a food, as for example the biological origin, the methods of cooking and conservation, and technological treatments.

One problem concerning multilingual thesauri is the multiplicity of natural languages: corresponding terms of different languages are not always semantically equivalent. A first approach would be to limit the terms of different languages in which the descriptors are provided. Another is to render it language-independent. This approach was chosen by the LanguaL™ thesaurus, which is used in the USA and Europe for numeric data banks on food composition (nutrients and contaminants), food consumption and legislation. Each descriptor is identified by a unique code pointing to equivalent terms in different languages (currently Czech, Danish, English, French, German, Hungarian, Italian, Portuguese and Spanish).

This paper will describe the LanguaL™ thesaurus in some detail. It will then present an in-depth example of how LanguaL™ can be applied and give general rules for indexing. Finally, it will review the individual facets of the LanguaL™ thesaurus.

<sup>3</sup> FDA/CFSAN. *LanguaL User's Manual*, version 1993.

## 1.1 INTERNATIONAL USE OF LANGUAL™

LanguaL™ can facilitate direct links to many different food consumption and analytical databases as well as bibliographic files, worldwide. For example, LanguaL™ has been used to index all 1988 USDA Nation-wide Food Consumption Survey (NFCS) foods, foods whose standards are specified by the US Code of Federal Regulations (CFR), and foods in Codex Alimentarius standards. LanguaL™ has also been used by the National Cancer Institute (US NCI) and the International Agency for Research in Cancer (WHO IARC)<sup>4</sup> in their studies on the relationship of diet and cancer. LanguaL™ is currently being used to index foods in most official food composition databases in Europe.

**Figure 1. information flow**

The flexibility and multidisciplinary nature of a multifaceted approach allow expertise on food description to be divided up among smaller, ad hoc expert committees. The Working Group on Food Description thus took over the development of the multilingual LanguaL™ thesaurus in 1996.<sup>5</sup> The information flow decided upon is illustrated in the figure above.

Although it is not the only food description language, LanguaL™ is considered the most definitive at the present time. Altogether, over 75,000 food products have been indexed in various countries using this system. Despite its shortcomings, the LanguaL™ thesaurus remains a good starting point for development of a truly international and flexible faceted thesaurus for food description.

## 1.2 CONTACTS

A thesaurus is an evolving language, which should reflect scientific and technological evolutions in the field of foods. Suggestions to introduce new concepts or to improve those proposed in this edition are therefore welcome. Eventual suggestions for updates/corrections should be send to the

**LanguaL™ Secretariat:**

## 2 THE LANGUAL™ THESAURUS

### 2.1 THESAURUS STRUCTURE

A thesaurus is a structured, normalised and dynamic vocabulary destined to cover terminology of a field of specific knowledge. It is used for indexing and retrieving information in a natural language in a system of controlled terms.

English is the *dominant language* used in the LanguaL™ thesaurus. Spelling was originally US English. Later updates include British English, as these updates were based on European legislation. Other languages (*secondary languages*) include Czech, Danish, French, German, Hungarian, Italian, Portuguese and Spanish; the translations having been prepared by the corresponding national centres. The thesaurus has, moreover, been partially translated into Catalan, Dutch, Swedish and Serbian. These translations are available from the national centres.

Contrary to some multilingual thesauri, LanguaL™ does not make use of an *exchange language*. Instead, interchange of food description information is based on the use of descriptor codes.

Terms in the thesaurus are generally expressed as singulars or plurals in accordance with the conventions recognised separately in each of the languages, especially when these are subject to national standards. For example, English indexers select the plural or the singular according to rules associated with the kind of concept represented by the term (count nouns or non-count nouns). In French, singular forms, similar to those found in dictionaries, are generally preferred.

### 2.2 HIERARCHY

Equally as important as the identification of meaningful characteristics is the arrangement of facet terms in a hierarchic structure so that information can be retrieved at varying levels of specificity. In a particular search, one might be interested in all products with peanut as the food source. In another, one might need products with any nut as the food source. Alternatively, one might search specifically for \*VITAMIN A ADDED\*, more broadly for \*VITAMIN ADDED\*, or, still more broadly, for \*NUTRIENT OR DIETARY SUBSTANCE ADDED\*. These are all examples of hierarchical relationships among facet terms.

Hierarchical relationships are extremely important for searching. Hierarchy is also a useful tool for displaying the thesaurus in a logical way so that both searcher and indexer can easily comprehend it. Finally, it underlies the aggregation of numerical values when the food vocabulary is used in compiling data.

For these reasons, all of the facets are fully structured. Care has been taken to include all useful hierarchical relationships. Some concepts can belong, on logical grounds, to more than one category at the same time; they are then said to possess **poly-hierarchical relationships**. Corresponding to its many uses, for instance, **\*FIELD CORN\*** appears under several broader terms:

- under **\*SUGAR-PRODUCING PLANT\***
- under **\*STARCH-PRODUCING PLANT\***
- under **\*OIL-PRODUCING PLANT\***
- and under **\*GRAIN\***

In this example, the term “FIELD CORN” is assigned to subordinate positions based on its generic relationship to four broader terms. In other cases, poly-hierarchical links may be based upon whole-part relationships.

Example:

Example:

Broad terms can be used to describe very general groups of food products, such as vegetables. Such a general description can be made more specific by using narrower terms and/or adding terms from other facets (e.g. **\*FROZEN\***).

The hierarchical relationships are complemented by additional cross references among facet terms, e.g., **\*PROTEIN-PRODUCING PLANT\***

- Narrower term **\*ALFALFA\***
- Narrower term **\*SOYBEAN\***
- Narrower term **\*FIELD CORN\***
- Narrower term **\*SESAME\***

This indicates that any search for plant protein sources should employ **\*ALFALFA\***, **\*SOYBEAN\***, **\*FIELD CORN\*** and **\*SESAME\***.

## 2.3 DEFINITIONS

This document follows definitions and conventions given in the International Standards concerning the establishment and development of monolingual thesauri<sup>6</sup> and of multilingual thesauri<sup>7</sup>. In accordance with these standards, the LanguaL™ thesaurus definitions have been expanded to include *additional information*. The following definitions from the standards are used:

**Indexing language:** a controlled set of terms selected from natural language and used to represent, in summary form, the systematic description of foods.

**Thesaurus:** the vocabulary of a controlled indexing language formally organised so that the *a priori* relationships between concepts (for example as “broader” and “narrower”) are made explicit.

**Indexing term:** the representation of a concept, preferably in the form of a noun or a phrase.

**Preferred term:** a term used consistently when indexing to present a given concept, also referred to as the **descriptor**.

**Non-preferred term:** the synonym or quasi-synonym of a preferred term. A non-preferred term is not assigned to documents, but is provided as an entry point in a thesaurus or alphabetical index, the user being directed by an instruction (for example USE or SEE) to the appropriate preferred term; also referred to as **non-descriptor**.

**Precombined terms:** The thesaurus has been further clarified by including Precombined terms (PCT's), which are food product names to which facet terms have been assigned. These are not to be used for indexing, but are included for either of these reasons:

- (1) The Precombined term explains or illustrates the use of the facet terms, e.g., corned beef hash as an example of a food whose physical state is \*SEMISOLID WITH SOLID PIECES\*.
- (2) For some foods, it is difficult for an indexer to select the proper combination of facet terms. For example, it might be obvious that the food product "Rhine wine" should be described as a \*LIGHT WINE, 7-14% ALCOHOL\*, but the indexer might not realise that \*ALCOHOL FERMENTED\* should be used in facet H (Treatment Applied) to describe the fermentation.

Precombined terms are always indexed with descriptors from facets A (Product Type), B (Food Source), C (Part of Plant or Animal) and E (Physical State, Shape or Form). Additional descriptors from other facets are assigned as needed to index the product information. Precombined terms are given in the LanguaL™ Users' Manual, edition 29 September 1993 and included in the Food Product Indexer software as indexing examples, but are not included in this version of the thesaurus.

---

<sup>6</sup> International Standard ISO 2788 (1986). Documentation – Guidelines for the establishment and development of monolingual thesauri

<sup>7</sup> International Standard ISO 5964 (1985). Documentation – Guidelines for the establishment and development of multilingual thesauri

The following **abbreviations**, in accordance with the International Standards, are printed as prefixes to terms etc. Each abbreviation indicates the relationship or function of the term or node that follows:

- BT** Broader term.  
The term that follows the symbol represents a concept having a wider meaning.
- NT** Narrower Term  
The term that follows the symbol refers to a concept with a more specific meaning.
- RT** Related Term  
The term that follows the symbol is associated, but it is not a synonym, a quasi-synonym, a broader term or a narrower term.
- USE** Use  
The term that follows the symbol is the preferred term when a choice between synonyms and quasi-synonyms exists.
- UF** Use For  
The term that follows the symbol is a non-preferred term or synonym.
- SN** Scope Note  
A note attached to a term to indicate its meaning within an indexing language. It is not intended to be a dictionary definition, but it serves instead to indicate the *use* of a term. The language of the food field is not always precise. Scope notes are therefore provided for many descriptors in order to achieve consistency in indexing and searching and, perhaps more importantly, to achieve the purpose of a common language for the description of foods.
- AI** Additional Information  
In addition to indexing information handled by the scope notes, the LanguaL™ thesaurus also includes a special property named Additional Information (AI), to be used for further description of more lexical or encyclopaedic nature (list of many different properties).
- FTC** Facet Term Code  
This symbol is followed by the unique identifier for each descriptor in the LanguaL™ thesaurus. The identifier, the facet term code, consists of one character identifying the facet followed by a four digit number.

In interchange of food description data, the use of facet codes using only the characters A to Z and digits solves the problem of special **character sets**. Using the facet term code in food description data interchange also avoids translation of descriptions.

The following **conventions** are used throughout the LanguaL™ thesaurus.

- a) Preferred terms are printed in upper case.

*Examples:*

BEVERAGE

CONFECTIONERY

- b) Non-preferred terms are printed in lower case except when the non-preferred term is a proper name requiring an upper case initial, or an abbreviation or acronym which should be printed throughout in upper case.

*Examples:*

BEVERAGE

**UF** drink

BREAM

**UF** abramis brama

DENMARK

**UF** DK

## 2.4 DISPLAY OF TERMS AND RELATIONSHIPS

Terms and their interrelationships of the LanguaL™ thesaurus are displayed in a variety of formats to meet different user needs:

- (a) *alphabetical display*, with scope notes and indications of inter-term relationships (originally by FDA called the THESAURUS ENTRY REPORT or VOCABULARY ENTRY REPORT);
- (b) *systematic display*, supported by an alphabetical index and a code index (originally by FDA called the THESAURUS HIERARCHIC REPORT or HIERARCHIC TREE REPORT).

### 2.4.1 ALPHABETICAL DISPLAY

In this form of thesaurus display, all indexing terms, whether preferred or non-preferred, are organised as a single alphabetical sequence. Broader, narrower and related terms and scope notes may also be included. When ancillary information is appended to preferred terms, it should be listed in the following order:

- |    |            |  |
|----|------------|--|
| 1. | <b>FTC</b> | references to the facet term codes representative of the terms |
| 2. | <b>BT</b>  | references to broader terms                                    |
| 3. | <b>NT</b>  | references to narrower terms                                   |
| 4. | <b>RT</b>  | references to related terms                                    |
| 5. | <b>UF</b>  | references to non-preferred terms                              |
| 6. | <b>SN</b>  | scope note   |
| 7. | <b>AI</b>  | additional information about the terms                         |

In the LanguaL™ thesaurus alphabetical display, only one level above (BT) is given. The complete hierarchical relationships between terms are given in the systematic display (see below). Non-preferred terms are usually accompanied only by references (for example **USE**) to their preferred equivalents.

*Example of alphabetical display:*

ABALONE	
FTC:	B1408
BT :	ARCHAEOGASTROPOD (B1002)
NT :	BLACKFOOT ABALONE (B2681)
UF :	haloitis
abramis brama	
USE :	BREAM
ACIDIFIED	
FTC:	H0200
BT :	FLAVORING OR TASTE INGREDIENT ADDED (H0117)
UF :	pickled by acidification
SN :	Used when acid is added to a food product at any level.

## 2.4.2 SYSTEMATIC DISPLAY

The systematic display shows the logical, hierarchical structure of the thesaurus; it consists of two parts:

- *Categories or hierarchies* of terms arranged according to their meanings and logical interrelationships.
- An *alphabetical index* which directs the user to the appropriate part(s) of the systematic section.

The ISO standards explain the link between these two sections to be a system of addresses. An address code is assigned to each of the preferred terms in the systematic section and this code functions as a reference in the alphabetical index. In LanguaL™, these addresses are the *facet term codes*.

The systematic display allows the indexer or retriever to select the most specific term that can be assigned on the basis of the information at hand. It is frequently regarded as the main part of the thesaurus, i.e. the part that carries the most of the definitional and relational information, in which case the alphabetical index assumes the role of a complementary, but secondary, component.

*Example of systematic display:*

G. COOKING METHOD (G0002)
COOKED BY MOIST HEAT (G0012)
COOKED IN STEAM (G0021)
STEAMED WITH PRESSURE (G0022)
STEAMED WITHOUT PRESSURE (G0023)
COOKED IN WATER OR WATER-BASED LIQUID (G0013)
BOILED (G0014)
BOILED AND DRAINED (G0015)
BOILED IN LARGE AMOUNT OF LIQUID (G0016)
BOILED IN SMALL AMOUNT OF LIQUID (G0017)

*Example of alphabetical index of terms:*

B1408	ABALONE
B1645	ABALONE MUSHROOM
B1241	abelmoschus esculentus
B1763	abramis brama
B1327	ACACIA
B1241	acacia insuavis
B1762	acanthistius brasilianus
B1630	acanthocybium solanderi
B2303	acanthuridae
B1360	ACEROLA
H0300	ACETIC ACID FERMENTED
H0200	ACIDIFIED

*Example of alpha-numerical index of codes:*

A0105	DRESSING, CONDIMENT, GRAVY OR SAUCE
A0106	PREPARED GRAIN OR STARCH PRODUCT
A0107	BAKERY PRODUCT, UNSWEETENED
A0108	PASTRY SHELL, UNSWEETENED
A0109	PASTEURIZED PROCESS CHEESE SPREAD
A0110	PASTEURIZED PROCESS CHEESE
A0111	PASTEURIZED PROCESS CHEESE FOOD
A0112	NONALCOHOLIC BEVERAGE
A0113	SPICE OR HERB
A0114	FROZEN DAIRY DESSERT
A0115	CHEESE OR CHEESE PRODUCT

### **3 LINGUAL™ 2017 THESAURUS – ALPHABETICAL DISPLAY**

**"FREE" LABEL CLAIM**

- FTC** P0129  
**BT** GENERAL LABEL CLAIM [P0059]  
**UF** free, label claim  
**AI** Considerations include amounts that are 'nutritionally trivial' and amounts that can be declared as zero on the nutrition label. An additional criterion based on amount per weight (e.g., per 100 grams) is not considered necessary because the amount of nutrient in a 'free' food is so low that even frequent and repeated consumption is unlikely to have physiological consequences. (U.S. proposed)

**"FRESH FROZEN" LABEL CLAIM**

- FTC** P0178  
**BT** GENERAL LABEL CLAIM [P0059]  
**RT** PRESERVED BY FREEZING [J0136]  
**UF** fresh frozen, label claim  
**AI** The food was quickly frozen while still fresh.

**"FRESH" LABEL CLAIM**

- FTC** P0120  
**BT** GENERAL LABEL CLAIM [P0059]  
**UF** fresh, label claim  
**AI** A raw food that has not been frozen, heat processed or otherwise preserved.

**"HIGH" LABEL CLAIM**

- FTC** P0130  
**BT** GENERAL LABEL CLAIM [P0059]  
**UF** excellent source of label claim  
**UF** high, label claim  
**UF** rich in label claim  
**AI** An amount customarily consumed contains 20% or more of the daily nutritional value to describe protein, vitamins, minerals, dietary fiber, or potassium. May be used on meals or main dishes to indicate that product contains a food that meets the definition.

**"LESS" LABEL CLAIM**

- FTC** P0131  
**BT** GENERAL LABEL CLAIM [P0059]  
**UF** less, label claim  
**SN** Used on label comparison statements to describe foods having 25% or greater reductions in a nutrient. (U.S. proposed)

**"LIGHT" LABEL CLAIM**

- FTC** P0132  
**BT** GENERAL LABEL CLAIM [P0059]  
**UF** light, label claim  
**AI** A claim stating that a product is 'light' or 'lite', and any claim likely to have the same meaning for the consumer, shall follow the same conditions as those set for the term 'reduced', see \*REDUCED {NAME OF NUTRIENT} NUTRITION CLAIM [P0132]\*; the claim shall also be accompanied by an indication of the characteristic(s) which make(s) the food 'light' or 'lite' [REGULATION (EC) No 1924/2006 Corrigendum 2007-01-18].
- Used for foods that have 33.3% fewer calories than a comparable product and a minimum reduction of more than 40 calories per serving. Any other use of 'light' must specify whether it refers to the look, taste or smell; for example, 'light in color'. (U.S. FDA proposed)

**"MORE" LABEL CLAIM**

- FTC** P0133  
**BT** GENERAL LABEL CLAIM [P0059]  
**UF** more, label claim  
**SN** Used in label comparison statement when a food contains at least 10% more of the daily nutritional value per amount customarily consumed.

**"NATURALLY/NATURAL" LABEL CLAIM**

- FTC** P0209  
**BT** GENERAL LABEL CLAIM [P0059]  
**AI** Where a food naturally meets the condition(s) laid down in this Annex for the use of a nutritional claim, the term

'naturally/natural' may be used as a prefix to the claim [REGULATION (EC) No 1924/2006 Corrigendum2007-01-18].

**"NO TRANS FAT" CLAIM OR USE**

FTC P0233

BT TRANS FAT CLAIM OR USE [P0196]

SN Under the new FDA regulations, by Jan. 1, 2006, consumers will be able to find trans fat listed on food nutrition labels directly under the line for saturated fat. The new information is the first significant change on the Nutrition Facts panel since it was established in 1993.  
Source: <http://www.fda.gov/oc/initiatives/transfat/>.

**"SOURCE OF" LABEL CLAIM**

FTC P0134

BT GENERAL LABEL CLAIM [P0059]

UF contains label claim

UF contains, label claim

UF good source of label claim

UF good source of, label claim

UF provides label claim

UF provides, label claim

UF source of, label claim

SN The amount customarily consumed contains 10% to 19% of the daily nutritional value. May be used on meals or main dishes to indicate that product contains a food that meets the definition.

**00010 - GRAINS AND GRAIN-BASED PRODUCTS (EFSA FOODEX2)**

FTC A000J

BT EFSA FOOD CLASSIFICATION AND DESCRIPTION SYSTEM FOR EXPOSURE ASSESSMENT (EFSA FOODEX2) [A1895]

AI The category covers all cereals and cereal-like grains in all their forms, including derivatives and cereal-based products. So, this category contains the raw commodities as well as the primary derivatives of them, like flours, semolina, germ and bran. Moreover, products mainly obtained from cereals and cereal-like grains are included, regardless if they are simple composites, like bread, breakfast cereals and pasta, or complex composites, like filled fine bakery products. The latter are included because of their perceived nature according to tradition. [<https://en.wikipedia.org/wiki/Cereal>] and [<https://www.google.co.uk/search?tbm=isch&q=Grains+grain+based+products>]

**00020 - CEREALS AND CEREAL PRIMARY DERIVATIVES (EFSA FOODEX2)**

FTC A000K

BT 00010 - GRAINS AND GRAIN-BASED PRODUCTS (EFSA FOODEX2) [A000J]

AI The group includes any type of Cereals and cereal-like grains, milling products and other primary derivatives. This group is mainly intended to organise information and not for coding because it collects raw commodities and derivatives in one group.

**00030 - CEREAL GRAINS (AND CEREAL-LIKE GRAINS) (EFSA FOODEX2)**

FTC A000L

BT 00020 - CEREALS AND CEREAL PRIMARY DERIVATIVES (EFSA FOODEX2) [A000K]

AI The group includes any type of Cereal grain and cereal-like grain. The part consumed/analysed is not specified. When relevant, information on the part consumed/analysed has to be reported with additional facet descriptors. In case of data collections related to legislations, the default part consumed/analysed is the one defined in the applicable legislation. [<https://en.wikipedia.org/wiki/Grain>] and [<https://www.google.co.uk/search?tbm=isch&q=Cereal+grains+cereal+like+grains>]

**00040 - MIXTURE OF GRAINS (EFSA FOODEX2)**

FTC A001X

BT 00030 - CEREAL GRAINS (AND CEREAL-LIKE GRAINS) (EFSA FOODEX2) [A000L]

AI The group includes any type of Mixture of grains, i.e. a mixture containing a considerable proportion of grains from different cereals. The part consumed/analysed is by default unspecified. When relevant, information on the part consumed/analysed has to be reported with additional facet descriptors. [<https://en.wikipedia.org/wiki/Grain>] and [<https://www.google.co.uk/search?tbm=isch&q=Mixture+of+grains>]

**00050 - BARLEY AND SIMILAR- (EFSA FOODEX2)**

FTC A0D9Y

BT 00030 - CEREAL GRAINS (AND CEREAL-LIKE GRAINS) (EFSA FOODEX2) [A000L]

- FTC** A0675  
**BT** 02 VEGETABLES (CCPR) [A0650]  
**AI** Brassica (cole or cabbage) vegetables and flowerhead brassicas are foods derived from the leafy heads, stems and immature inflorescences of plants belonging to the genus Brassica or the family Cruciferae. Although Kohlrabi does not comply fully with the description above, for convenience and because of the similarity in residue behaviour the commodity is classified in this group. Kohlrabi is a tuber-like enlargement of the stem.  
 The edible part of the crop is partly protected from pesticides applied during the growing season by outer leaves, or skin (Kohlrabi).  
 The entire vegetable after discarding obviously decomposed or withered leaves may be consumed.

**RT** VEGETABLE OR VEGETABLE PRODUCT (EUROFIR) [A0825]

**RT** 50102100 - VEGETABLES - PREPARED/PROCESSED (GS1 GPC) [A1006]

**AI** Vegetables are foods derived from many different kinds of plants mostly annual and usually cultivated, commonly known by custom and tradition as "vegetables". In several countries, some of these commodities grown on large areas are distinguished as "field crops" or arable crops e.g. sugar beet. For the sake of convenience in this guide such crops are classified under Type 2

Vegetables.

Exposure to pesticides is dependent on the particular part of the plant used for food and the growing practices. Vegetables may be consumed in whole or in part and in the form of fresh, dried or processed foods.

#### 020 CEREAL GRAINS (GC) (CCPR)

- FTC A0683  
 BT 03 GRASSES (CCPR) [A0651]  
 RT RICE OR OTHER GRAIN (EUROFIR) [A0814]  
 RT 10000211 - GRAINS/CEREAL - NOT READY TO EAT - (SHELF STABLE) (GS1 GPC) [A0965]  
 AI Cereal grains are derived from the ears (heads) of starchy seeds produced by a variety of plants, primarily of the grass family (Grainineae)  
 Buckwheat, a dicotyledonous crop belonging to the botanical family Polygonaceae and two Chenopodium species, belonging to the botanical family Chenopodiaceae are included in this group, because of similarities in size and type of the seed, residue pattern and the use of the commodity.  
 The edible seeds are protected to varying degrees from pesticides applied during free growing season by husks. Husks are removed before processing and/or consumption.  
 Cereal grains are often exposed to post-harvest treatments with pesticides.

BT 01980 - RAW DOUGHS AND PRE-MIXES (EFSA FOODX2) [A008G]

AI The group includes any type of Short sweet pastry doughs such as pate sucree, pate sablee and similar. These doughs generally include sugars and high levels of fat and are prepared without gluten development in order to get a relatively brittle baked product. The part consumed/analysed is by default the whole or a portion of it representing the observed heterogeneity.[[https://en.wikipedia.org/wiki/Shortcrust\\_pastry](https://en.wikipedia.org/wiki/Shortcrust_pastry)] and [<https://www.google.co.uk/search?tbm=isch&q=Short+sweet+pastry+doughs+>]

#### 02150 - SHORT SWEET PASTRY DOUGH (PATE SUCREE) (EFSA FOODX2)

FTC A009C

BT 02140 - SHORT SWEET PASTRY DOUGHS (PATE SUCREE, SABLEE) (EFSA FOODX2) [A009B]

AI The group includes any type of Short sweet pastry dough commonly known as pate sucree. The part consumed/analysed is by default the whole or a portion of it representing the observed heterogeneity.[[https://en.wikipedia.org/wiki/Shortcrust\\_pastry](https://en.wikipedia.org/wiki/Shortcrust_pastry)] and [<https://www.google.co.uk/search?tbm=isch&q=Short+sweet+pastry+dough+>]

#### 02160 - SHORTBREAD PASTRY (EFSA FOODX2)

FTC A009D

BT 02140 - SHORT SWEET PASTRY DOUGHS (PATE SUCREE, SABLEE) (EFSA FOODX2) [A009B]

AI The group includes any type of Shortbread pastry dough. The part consumed/analysed is by default the whole or a portion of it representing the observed heterogeneity.[[https://en.wikipedia.org/wiki/Shortcrust\\_pastry](https://en.wikipedia.org/wiki/Shortcrust_pastry)] and [<https://www.google.co.uk/search?tbm=isch&q=Shortbread+pastry>]

#### 02170 - PIPED SHORTBREAD PASTRY (EFSA FOODX2)

FTC A009E

BT 02140 - SHORT SWEET PASTRY DOUGHS (PATE SUCREE, SABLEE) (EFSA FOODX2) [A009B]

AI The group includes any type of Piped shortbread pastry dough. The part consumed/analysed is by default the whole or a portion of it representing the observed heterogeneity.[[https://en.wikipedia.org/wiki/Shortcrust\\_pastry](https://en.wikipedia.org/wiki/Shortcrust_pastry)] and [<https://www.google.co.uk/search?tbm=isch&q=Piped+shortbread+pastry>]

#### 02180 - SWEET ALMOND PASTRY MASS (EFSA FOODX2)

FTC A009F

BT 02140 - SHORT SWEET PASTRY DOUGHS (PATE SUCREE, SABLEE) (EFSA FOODX2) [A009B]

**AI** The group includes any type of Sweet pastry mass/dough containing almonds. The part consumed/analysed is by default the whole or a portion of it representing the observed heterogeneity. [<https://en.wikipedia.org/wiki/dough>]

**02190 - CHOUX PASTRY DOUGH AND SIMILAR (EFSA FOODX2)**

**FTC** A009G

**BT** 01980 - RAW DOUGHS AND PRE-MIXES (EFSA FOODX2) [A008G]

**AI** The group includes any type of Choux pastry dough and similar. The part consumed/analysed is by default the whole or a portion of it representing the observed heterogeneity. [<https://en.wikipedia.org/wiki/dough>] and [<https://www.google.co.uk/search?tbm=isch&q=Choux+pastry+doughs>]

**022 TREE NUTS (TN) (CCPR)**

**FTC** A0685

**BT** 04 NUTS AND SEEDS (CCPR) [A0652]

**AI** Tree nuts are the seeds of a variety of trees and shrubs which are characterized by a hard inedible shell enclosing an oily seed.

The seed is protected from pesticides applied during the growing season by the shell and other parts of the fruit. The edible portion of the nut is consumed in succulent, dried or processed forms.

**02200 - CHOUX PASTRY DOUGH (EFSA FOODX2)**

**FTC** A009H

**BT** 02190 - CHOUX PASTRY DOUGH AND SIMILAR (EFSA FOODX2) [A009G]

**AI** The group includes any type of Choux pastry doughs, usually used for making profiteroles, beignets, éclairs and similar. The part consumed/analysed is by default the whole or a portion of it representing the observed heterogeneity. [<https://en.wikipedia.org/wiki/dough>] and [<https://www.google.co.uk/search?tbm=isch&q=Choux+pastry+dough>]

**AI** The group includes any type of Sponge cake dough, commonly known as génoise. The part consumed/analysed is by default the whole or a portion of it representing the observed heterogeneity. [<https://en.wikipedia.org/wiki/dough>] and [<https://www.google.co.uk/search?tbm=isch&q=Sponge+cake+dough+>]

**02230 - MIXTURE/MASS FOR BAUMKUCHEN (EFSA FOODX2)**

**FTC** A008S

**BT** 02210 - CAKE PRE-MIXES/BATTER (EFSA FOODX2) [A009J]

**AI** The group includes any type of Mixture/Mass for Baumkuchen. The part consumed/analysed is by default the whole or a portion of it representing the observed heterogeneity. [<https://en.wikipedia.org/wiki/dough>] and [<https://www.google.co.uk/search?tbm=isch&q=baumkuchen+dough>]

**02240 - LAMINATED DOUGHS (EFSA FOODX2)**

**FTC** A009L

**BT** 01980 - RAW DOUGHS AND PRE-MIXES (EFSA FOODX2) [A008G]

**AI** The group includes any type of laminated dough. The part consumed/analysed is by default the whole or a portion of it representing the observed heterogeneity. [[https://en.wikipedia.org/wiki/Laminated\\_dough](https://en.wikipedia.org/wiki/Laminated_dough)] and [<https://www.google.co.uk/search?tbm=isch&q=Laminated+doughs>]

**02250 - COMMON LAMINATED DOUGH (EFSA FOODX2)**

**FTC** A009M

**BT** 02240 - LAMINATED DOUGHS (EFSA FOODX2) [A009L]

**AI** The group includes any type of Laminated dough commonly used for puff pastry or sold as such. The part consumed/analysed is by default the whole or a portion of it representing the observed heterogeneity. [[https://en.wikipedia.org/wiki/Laminated\\_dough](https://en.wikipedia.org/wiki/Laminated_dough)] and [<https://www.google.co.uk/search?tbm=isch&q=Common+laminated+dough>]

#### 02260 - STRUDEL DOUGH (EFSA FOODEX2)

**FTC** A009N

**BT** 02240 - LAMINATED DOUGHS (EFSA FOODEX2) [A009L]

**AI** The group includes any type of Strudel dough. The part consumed/analysed is by default the whole or a portion of it representing the observed heterogeneity. [[https://en.wikipedia.org/wiki/Laminated\\_dough](https://en.wikipedia.org/wiki/Laminated_dough)] and [<https://www.google.co.uk/search?tbm=isch&q=Strudel+dough>]

#### 02270 - PHYLLO DOUGH (EFSA FOODEX2)

**FTC** A16FH

**BT** 02240 - LAMINATED DOUGHS (EFSA FOODEX2) [A009L]

**UF** filo

**AI** The group includes any type of Phyllo or filo dough, a very thin unleavened dough commonly used for making pastries such as baklava. The part consumed/analysed is by default the whole or a portion of it representing the observed heterogeneity. [[https://en.wikipedia.org/wiki/Laminated\\_dough](https://en.wikipedia.org/wiki/Laminated_dough)] and [<https://www.google.co.uk/search?tbm=isch&q=Phyllo+dough>]

#### 02280 - MISCELLANEOUS DOUGHS (EFSA FOODEX2)

**FTC** A009P

**BT** 01980 - RAW DOUGHS AND PRE-MIXES (EFSA FOODEX2) [A008G]

**AI** The group includes miscellaneous doughs. The part consumed/analysed is by default the whole or a portion of it representing the observed heterogeneity. [<https://en.wikipedia.org/wiki/dough>]

#### 02290 - GINGERBREAD DOUGH (EFSA FOODEX2)

**FTC** A009Q

**BT** 02280 - MISCELLANEOUS DOUGHS (EFSA FOODEX2) [A009P]

**AI** The group includes any type of Gingerbread dough, containing ginger and other flavouring ingredients. The part consumed/analysed is by default the whole or a portion of it representing the observed heterogeneity. [<https://www.google.co.uk/search?tbm=isch&q=Gingerbread+dough>]

#### 023 OILSEED (SO) (CCPR)

**FTC** A0686

**BT** 04 NUTS AND SEEDS (CCPR) [A0652]

**AI** Oilseed consists of seeds from a variety of plants used in the production of edible vegetable oils, seed meals and cakes for animal feed. Some important vegetable oil seeds are by-products of fibre or fruit crops (e.g. cotton seed, olives).  
Some of the oilseeds are, directly or after slight processing (e.g. roasting), used as food (e.g. peanuts) or for food flavouring (e.g. poppy seed, sesame seed).  
Oilseeds are protected from pesticides applied during the growing season by the shell or husk.

#### 02300 - QUARK OIL DOUGH (EFSA FOODEX2)

**FTC** A009R

**BT** 02280 - MISCELLANEOUS DOUGHS (EFSA FOODEX2) [A009P]

**UF** quark-öl-teig

**AI** The group includes any type of Quark-oil dough, a common substitute of leavened dough especially known in German speaking countries, containing quark cheese. The part consumed/analysed is by default the whole or a portion of it representing the observed heterogeneity. [<https://www.google.co.uk/search?tbm=isch&q=Quark+oil+dough>]

#### 0230000 - FRUITING VEGETABLES (EC)

**FTC** A1230

**BT** 0200000 - 2. VEGETABLES FRESH OR FROZEN (EC) [A1227]

**AI** COMMISSION REGULATION (EC) No 178/2006 of 1 February 2006 amending Regulation (EC) No 396/2005 of the European Parliament and of the Council.

#### 02310 - SUET PASTRY (PÂTE A GRASSE DE BOEUF) DOUGH (EFSA FOODEX2)

**FTC** A009S

**BT** 02280 - MISCELLANEOUS DOUGHS (EFSA FOODEX2) [A009P]

**AI** The group includes any type of Suet pastry (pâte a grasse de boeuf) dough, containing beef suet. The part consumed/analysed is by default the whole or a portion of it representing the observed heterogeneity. [<https://www.google.co.uk/search?tbm=isch&q=Suet+pastry+dough>]

**02320 - PRE-MIXES (DRY) FOR BAKED PRODUCTS (EFSA FOODX2)**

- FTC** A0CSK  
**BT** 01980 - RAW DOUGHS AND PRE-MIXES (EFSA FOODX2) [A008G]  
**AI** The group includes any type of mixed ingredients in dry form used to prepare the doughs for baked products, after addition of a proper liquid. The part consumed/analysed is by default the whole or a portion of it representing the observed heterogeneity. [[https://en.wikipedia.org/wiki/Baking\\_mix](https://en.wikipedia.org/wiki/Baking_mix)] and [<https://www.google.co.uk/search?tbn=isch&q=premixes+for+baking>]

**02330 - BREAD PRE-MIXES (DRY) (EFSA FOODX2)**

- FTC** A0CSL  
**BT** 02320 - PRE-MIXES (DRY) FOR BAKED PRODUCTS (EFSA FOODX2) [A0CSK]  
**AI** The group includes any type of dry pre-mixes containing flour, dried yeast and other ingredients used for the preparation of bread (usually home-made bread), after addition of a proper liquid. The part consumed/analysed is by default the whole or a portion of it representing the observed heterogeneity. [[https://en.wikipedia.org/wiki/Baking\\_mix](https://en.wikipedia.org/wiki/Baking_mix)] and [<https://www.google.co.uk/search?tbn=isch&q=Bread+premixes+>]

BT 02540 - CAKES (EFSA FOODX2) [A00AN]

UF cake-based cupcake

AI The group includes any type of plain cakes, i.e. cakes mainly constituted of a baked sweet dough. Small cakes such as cupcakes mainly constituted of a baked sweet dough are also included in this group. The part consumed/analysed is by default the whole or a portion of it representing the observed heterogeneity. [<https://en.wikipedia.org/wiki/Cakes>] and [<https://www.google.co.uk/search?tbm=isch&q=Plain+cakes>]

**02560 - SPONGE CAKE (EFSA FOODX2)**

FTC A00AQ

BT 02550 - PLAIN CAKES (EFSA FOODX2) [A00AP]

AI The group includes any type of Sponge cake, i.e. a cake based on a particularly aerated and flexible baked product, rich in eggs. The part consumed/analysed is by default the whole or a portion of it representing the observed heterogeneity. [[https://en.wikipedia.org/wiki/Sponge\\_cake](https://en.wikipedia.org/wiki/Sponge_cake)] and [<https://www.google.co.uk/search?tbm=isch&q=Sponge+cake>]

**02570 - SPONGE CAKE ROLL (EFSA FOODX2)**

FTC A00BB

BT 02560 - SPONGE CAKE (EFSA FOODX2) [A00AQ]

AI The group includes any type of Sponge cake roll, i.e. a sponge cake in form of roll. The part consumed/analysed is by default the whole or a portion of it representing the observed heterogeneity. [[https://en.wikipedia.org/wiki/Sponge\\_cake](https://en.wikipedia.org/wiki/Sponge_cake)] and [<https://www.google.co.uk/search?tbm=isch&q=Sponge+cake+roll>]

**02580 - CREAM CAKE (EFSA FOODX2)**

FTC A00AV

BT 02550 - PLAIN CAKES (EFSA FOODX2) [A00AP]

AI The group includes any type of Cream cake, i.e. a cake containing a considerable proportion of a cream. Cakes containing a cheese-based cream are not included in this term and are listed under A00AR 'Cheese cake'. The part consumed/analysed is by default the whole or a portion of it representing the observed heterogeneity. [[https://en.wikipedia.org/wiki/Cream\\_cake](https://en.wikipedia.org/wiki/Cream_cake)] and [<https://www.google.co.uk/search?tbm=isch&q=Cream+cake>]

**02590 - CREAM CUSTARD CAKE (EFSA FOODX2)**

FTC A00AX

BT 02580 - CREAM CAKE (EFSA FOODX2) [A00AV]

**AI** The group includes any type of Cream custard cake, i.e. a cake containing a considerable proportion of custard, regardless of the bakery part. The part consumed/analysed is by default the whole or a portion of it representing the observed heterogeneity. [<https://en.wikipedia.org/wiki/Cakes>] and [<https://www.google.co.uk/search?tbm=isch&q=Cream+custard+cake>]

**02600 - CREAM CUSTARD SPONGE CAKE (EFSA FOODX2)**

**FTC** A00AY

**BT** 02580 - CREAM CAKE (EFSA FOODX2) [A00AV]

**AI** The group includes any type of Cream custard sponge cake, i.e. a custard cake where the bakery part is a sponge base. The part consumed/analysed is by default the whole or a portion of it representing the observed heterogeneity. [[https://en.wikipedia.org/wiki/Sponge\\_cake](https://en.wikipedia.org/wiki/Sponge_cake)] and [<https://www.google.co.uk/search?tbm=isch&q=Cream+custard+sponge+cake>]

**0260000 - LEGUME VEGETABLES (EC)**

**FTC** A1233

**BT** 0200000 - 2. VEGETABLES FRESH OR FROZEN (EC) [A1227]

**AI** COMMISSION REGULATION (EC) No 178/2006 of 1 February 2006 amending Regulation (EC) No 396/2005 of the European Parliament and of the Council.

**02610 - NUT CREAM CAKE (EFSA FOODX2)**

**FTC** A00AZ

**BT** 02580 - CREAM CAKE (EFSA FOODX2) [A00AV]

**AI** The group includes any type of Nut cream cake, i.e. a cake containing a cream with a considerable proportion of nuts. The part consumed/analysed is by default the whole or a portion of it representing the observed heterogeneity. [<https://en.wikipedia.org/wiki/Cakes>] and [<https://www.google.co.uk/search?tbm=isch&q=Nut+cream+cake>]

**02620 - CHEESE CAKE (EFSA FOODX2)**

**FTC** A00AR

**BT** 02580 - CREAM CAKE (EFSA FOODX2) [A00AV]

**AI** The group includes any type of Cheese cake, i.e. a cake containing a considerable proportion of cheese/cheese-based cream. The part consumed/analysed is by default the whole or a portion of it representing the observed heterogeneity. [[https://en.wikipedia.org/wiki/Cheese\\_cake](https://en.wikipedia.org/wiki/Cheese_cake)] and [<https://www.google.co.uk/search?tbm=isch&q=Cheese+cake>]

**02630 - CREAM CHEESE CAKE (EFSA FOODX2)**

**FTC** A00AS

**BT** 02620 - CHEESE CAKE (EFSA FOODX2) [A00AR]

**AI** The group includes any type of Cream cheese cake, i.e. a cake containing a considerable proportion of a cheese-based cream, regardless of the bakery part. The part consumed/analysed is by default the whole or a portion of it representing the observed heterogeneity. [[https://en.wikipedia.org/wiki/Cheese\\_cake](https://en.wikipedia.org/wiki/Cheese_cake)] and [<https://www.google.co.uk/search?tbm=isch&q=Cream+cheese+cake>]

**FTC** A00AT

**BT** 02620 - CHEESE CAKE (EFSA FOODX2) [A00AR]

**UF** tiramisù

**AI** The group includes any type of Cheese cream sponge cake, i.e. a cheese cake where the bakery part is a sponge base, including sponge biscuit base. The Tiramisù is included in this term. The part consumed/analysed is by default the whole or a portion of it representing the observed heterogeneity. [[https://en.wikipedia.org/wiki/Cheese\\_cake](https://en.wikipedia.org/wiki/Cheese_cake)] and [<https://www.google.co.uk/search?tbm=isch&q=Cheese+cream+sponge+cake>]

**02650 - FRUIT CAKE (EFSA FOODX2)**

**FTC** A00BA

**BT** 02550 - PLAIN CAKES (EFSA FOODX2) [A00AP]

**AI** The group includes any type of Fruit cake, i.e. a cake containing a considerable proportion of fruit. The part consumed/analysed is by default the whole or a portion of it representing the observed heterogeneity. [<https://en.wikipedia.org/wiki/Cakes>] and [<https://www.google.co.uk/search?tbm=isch&q=Fruit+cake>]

**02660 - MUFFINS (EFSA FOODX2)**

**FTC** A00BC

**BT** 02550 - PLAIN CAKES (EFSA FOODX2) [A00AP]

**UF** muffin-based cupcake

**AI** The group includes any type of Muffins, individual-sized bakery products with or without fillings/inclusions.

Cupcakes consisting of a muffin base are also included. When relevant, information on toppings/fillings/inclusions should be reported with additional facets descriptors. The part consumed/analysed is by default the whole or a portion of it representing the observed heterogeneity. [<https://en.wikipedia.org/wiki/Muffins>] and [<https://www.google.co.uk/search?tbm=isch&q=Muffins>]

#### 02670 - MERINGUE TART (EFSA FOODX2)

- FTC A00BD  
 BT 02550 - PLAIN CAKES (EFSA FOODX2) [A00AP]  
 AI The group includes any type of Meringue tart, i.e. a cake containing a considerable proportion of meringue, which usually represents the baked part. The part consumed/analysed is by default the whole or a portion of it representing the observed heterogeneity. [[https://en.wikipedia.org/wiki/Meringue\\_tart](https://en.wikipedia.org/wiki/Meringue_tart)] and [[https://www.google.co.uk/search?tbm=isch&q=cake with meringue base](https://www.google.co.uk/search?tbm=isch&q=cake+with+meringue+base)]

#### 02680 - ROTATION COOKED LAYERED CAKES (EFSA FOODX2)

- FTC A0C6L  
 BT 02550 - PLAIN CAKES (EFSA FOODX2) [A00AP]  
 AI The group includes any type of traditional bakery wares normally produced on a spit-like device that cooks the dough and rotates. As soon as one layer is cooked, a following layer of dough/thick batter is painted on the surface. With this process, the cake assumes the same layered appearance as the rings of wood. The part consumed/analysed is by default the whole or a portion of it representing the observed heterogeneity. [[https://en.wikipedia.org/wiki/Spit\\_cake](https://en.wikipedia.org/wiki/Spit_cake)] and [<https://www.google.co.uk/search?tbm=isch&q=Rotation+cooked+layered+cakes>]

#### 02690 - PYRAMID CAKE (EFSA FOODX2)

- FTC A00BE  
 BT 02680 - ROTATION COOKED LAYERED CAKES (EFSA FOODX2) [A0C6L]  
 UF sakotis  
 UF sekacz  
 AI The group includes any type of Pyramid cake, i.e. a typical Polish-Lithuanian cake in form of pine or pyramid, obtained by rotational painting-cooking of a dough, such as Sakotis and Sekacz. The part consumed/analysed is by default the whole or a portion of it representing the observed heterogeneity. [<https://en.wikipedia.org/wiki/%C5%A0akotis>] and [[https://www.google.co.uk/search?tbm=isch&q=Sakotis and Sekacz](https://www.google.co.uk/search?tbm=isch&q=Sakotis+and+Sekacz)]

#### 027 HERBS (HH) (CCPR)

- FTC A0688  
 BT 05 HERBS AND SPICES (CCPR) [A0653]  
 AI Herbs consist of leaves, flowers, stems and roots from a variety of herbaceous plants, used in relatively small amounts as condiments to flavour foods or beverages. They are used either in fresh or naturally dried form. Herbs are fully exposed to pesticides applied during the growing season. Post-harvest treatments are often carried out on dried herbs. Herbs are consumed as components of other foods in succulent and dried forms or as extracts of the succulent products.

#### 02700 - BAUMKUCHEN AND SIMILAR (EFSA FOODX2)

- FTC A0C6M  
 BT 02680 - ROTATION COOKED LAYERED CAKES (EFSA FOODX2) [A0C6L]  
 UF kurtoskalacs  
 UF pruegelkrapfen  
 UF trdelnik  
 AI The group includes different variants of tree cake diffused in many European countries, such as Pruegelkrapfen, Trdelnik and Kurtoskalacs. The part consumed/analysed is by default the whole or a portion of it representing the observed heterogeneity. [<https://en.wikipedia.org/wiki/Baumkuchen>] and [[https://www.google.co.uk/search?tbm=isch&q=Baumkuchen cake](https://www.google.co.uk/search?tbm=isch&q=Baumkuchen+cake)]

#### 0270000 - STEM VEGETABLES (EC)

- FTC A1234  
 BT 0200000 - 2. VEGETABLES FRESH OR FROZEN (EC) [A1227]  
 AI COMMISSION REGULATION (EC) No 178/2006 of 1 February 2006 amending Regulation (EC) No 396/2005 of the European Parliament and of the Council.

#### 02710 - CHOCOLATE-BASED CAKES (EFSA FOODX2)

- FTC A00BF  
 BT 02540 - CAKES (EFSA FOODX2) [A00AN]  
 AI The group includes any type of cakes with a chocolate-based baked part. The part consumed/analysed is by

default the whole or a portion of it representing the observed heterogeneity.[[https://en.wikipedia.org/wiki/Chocolate\\_cake](https://en.wikipedia.org/wiki/Chocolate_cake)] and [[https://www.google.co.uk/search?tbm=isch&q=Chocolate Based cakes](https://www.google.co.uk/search?tbm=isch&q=Chocolate+Based+cakes)]

**02720 - CHOCOLATE CAKE (EFSA FOODEX2)**

FTC A00BG

BT 02710 - CHOCOLATE-BASED CAKES (EFSA FOODEX2) [A00BF]

AI The group includes any type of Chocolate cake. The part consumed/analysed is by default the whole or a portion of it representing the observed heterogeneity.[[https://en.wikipedia.org/wiki/Chocolate\\_cake](https://en.wikipedia.org/wiki/Chocolate_cake)] and [<https://www.google.co.uk/search?tbm=isch&q=Chocolate+cake>]

**02730 - CHOCOLATE CAKE WITH FRUITS (EFSA FOODEX2)**

FTC A00BH

BT 02720 - CHOCOLATE CAKE (EFSA FOODEX2) [A00BG]

AI The group includes any type of Chocolate cake with fruits (eventually chocolate-glazed). The part consumed/analysed is by default the whole or a portion of it representing the observed heterogeneity.[[https://en.wikipedia.org/wiki/Chocolate\\_cake](https://en.wikipedia.org/wiki/Chocolate_cake)] and [<https://www.google.co.uk/search?tbm=isch&q=Chocolate+cake+with+fruits>]

**02740 - CAKE MARBLED, WITH CHOCOLATE (EFSA FOODEX2)**

FTC A00BJ

BT 02710 - CHOCOLATE-BASED CAKES (EFSA FOODEX2) [A00BF]

AI The group includes any type of marble cake with chocolate, i.e. cakes with a marbled appearance achieved by blending a light batter and a dark batter (based on chocolate). The part consumed/analysed is by default the whole or a portion of it representing the observed heterogeneity.[[https://en.wikipedia.org/wiki/Chocolate\\_cake](https://en.wikipedia.org/wiki/Chocolate_cake)] and [[https://www.google.co.uk/search?tbm=isch&q=chocolate marble cake](https://www.google.co.uk/search?tbm=isch&q=chocolate+marble+cake)]

**02750 - YEAST LEAVENED PASTRY (EFSA FOODEX2)**

FTC A00BK

BT 02360 - FINE BAKERY WARES (EFSA FOODEX2) [A009T]

AI The group includes any type of yeast leavened pastry, i.e. pastries obtained from a yeast leavened dough. In some cases the dough is laminated to improve its structure. The part consumed/analysed is by default the whole or a portion of it representing the observed heterogeneity.[<https://www.google.co.uk/search?tbm=isch&q=Yeast+leavened+pastry>]

**02760 - BUNS (EFSA FOODEX2)**

FTC A00BL

BT 02750 - YEAST LEAVENED PASTRY (EFSA FOODEX2) [A00BK]

AI The group includes any type of Buns, i.e. small-sized pastries based on a yeast leavened dough, usually enriched with sugar and butter and sometimes eggs. Savoury variants are also available on the market. All the characterising ingredients should be reported with additional facet descriptors. The part consumed/analysed is by default the whole or a portion of it representing the observed heterogeneity.[<https://en.wikipedia.org/wiki/Buns>] and [[https://www.google.co.uk/search?tbm=isch&q=pastry buns](https://www.google.co.uk/search?tbm=isch&q=pastry+buns)]

**02770 - CROISSANT (EFSA FOODEX2)**

FTC A00BM

BT 02750 - YEAST LEAVENED PASTRY (EFSA FOODEX2) [A00BK]

AI The group includes any type of Croissant, made of a layered yeast-leavened dough with unspecified filling (eventually also without). The part consumed/analysed is by default the whole or a portion of it representing the observed heterogeneity.[<https://en.wikipedia.org/wiki/Croissant>] and [<https://www.google.co.uk/search?tbm=isch&q=Croissant>]

**02780 - CROISSANT, FILLED WITH CHOCOLATE (EFSA FOODEX2)**

FTC A00BN

BT 02770 - CROISSANT (EFSA FOODEX2) [A00BM]

AI The group includes any type of Croissant, filled with chocolate. The part consumed/analysed is by default the whole or a portion of it representing the observed heterogeneity.[<https://en.wikipedia.org/wiki/Croissant>] and [<https://www.google.co.uk/search?tbm=isch&q=Croissant+filled+with+chocolate>]

**02790 - CROISSANT, FILLED WITH CREAM (EFSA FOODEX2)**

FTC A00BP

BT 02770 - CROISSANT (EFSA FOODEX2) [A00BM]

AI The group includes any type of Croissant, filled with cream. The part consumed/analysed is by default the whole or a portion of it representing the observed heterogeneity.[<https://en.wikipedia.org/wiki/Croissant>] and [<https://www.google.co.uk/search?tbm=isch&q=Croissant+filled+with+cream>]

**028 SPICES (HS) (CODEX)**

FTC A0689

BT 05 HERBS AND SPICES (CCPR) [A0653]

AI Spices consist of the aromatic seeds roots, berries or other fruits from a variety of plants, which are used in relatively small quantities to flavour foods.  
Spices are exposed in varying degrees to pesticides applied during the growing season. Also post-harvest treatments may be applied to spices in the dried form.  
They are consumed primarily in the dried form as condiment.

**02800 - CROISSANT, FILLED WITH JAM (EFSA FODDEX2)**

FTC A00BQ

BT 02770 - CROISSANT (EFSA FODDEX2) [A00BM]

AI The group includes any type of Croissant, filled with jam or similar. The part consumed/analysed is by default the whole or a portion of it representing the observed heterogeneity. [<https://en.wikipedia.org/wiki/Croissant>] and [<https://www.google.co.uk/search?tbm=isch&q=Croissant+filled+with+jam>]

**0280000 - FUNGI (EC)**

FTC A1235

BT 0200000 - 2. VEGETABLES FRESH OR FROZEN (EC) [A1227]

AI COMMISSION REGULATION (EC) No 178/2006 of 1 February 2006 amending Regulation (EC) No 396/2005 of the European Parliament and of the Council.

**02810 - DOUGHNUTS-BERLINER (EFSA FODDEX2)**

FTC A00BR

BT 02750 - YEAST LEAVENED PASTRY (EFSA FODDEX2) [A00BK]

AI The group includes any type of Doughnuts-berliner, usually consisting of a fried sweet dough. Baked (not fried) variants are also present on the market. The presence of fillings is unspecified and, when relevant, should be reported with additional facets descriptors. The part consumed/analysed is by default the whole or a portion of it representing the observed heterogeneity. [<https://en.wikipedia.org/wiki/Doughnut>] and [<https://www.google.co.uk/search?tbm=isch&q=Doughnut+Berliner>]

**02820 - KRINGLES (EFSA FODDEX2)**

FTC A00BS

BT 02750 - YEAST LEAVENED PASTRY (EFSA FODDEX2) [A00BK]

UF scandinavian pretzel

AI The group includes any type of kringles, typical Scandinavian pastries such as scandinavian pretzel. The part consumed/analysed is by default the whole or a portion of it representing the observed heterogeneity. [<https://en.wikipedia.org/wiki/Kringles>] and [<https://www.google.co.uk/search?tbm=isch&q=Kringles>]

**02830 - BRIOCHE TYPE PRODUCTS (EFSA FODDEX2)**

FTC A00BT

BT 02750 - YEAST LEAVENED PASTRY (EFSA FODDEX2) [A00BK]

UF cozonac

UF kalac

UF kalacs

UF pandoro

UF panettone

AI The group includes any type of Brioche and similar products (with or without topping-filling). The brioche is usually a yeast-leavened enriched dough based pastry, such as Panettone, Pandoro, Kalacs, Cozonac and Kalac. Information on inclusions/fillings/toppings should be reported with additional facets descriptors. The part consumed/analysed is by default the whole or a portion of it representing the observed heterogeneity. [<https://en.wikipedia.org/wiki/Brioche>] and [<https://www.google.co.uk/search?tbm=isch&q=Brioche+type+products>]

**02840 - FLAT BREAD-BASED PASTRY (EFSA FODDEX2)**

FTC A16FV

BT 02750 - YEAST LEAVENED PASTRY (EFSA FODDEX2) [A00BK]

UF flaouna

UF karelian pasty

AI The group includes any type of baked case of dough with a sweet or savoury filling; whether it is sweet or savoury and information on the filling should be provided with additional facet descriptors. They can be closed or open-faced with no crust on top and in different shapes and forms. In this group are included karelian pasty and Flaouna. The part consumed/analysed is by default the whole or a portion of it representing the observed

heterogeneity.[[https://en.wikipedia.org/wiki/Karelian\\_pasty](https://en.wikipedia.org/wiki/Karelian_pasty)] and [[https://www.google.co.uk/search?tbm=isch&q=Flatbread Based pastry Karelian pastry](https://www.google.co.uk/search?tbm=isch&q=Flatbread+Based+pastry+Karelian+pastry)]

**032 EDIBLE OFFAL (MAMMALIAN) (MO) (CCPR)**

FTC A0739

BT 06 MAMMALIAN PRODUCTS (CCPR) [A0654]

AI Edible offal are edible tissue and organs other than muscles (= meat) and animal fat from slaughtered animals as prepared for wholesale or retail distribution.

Examples: liver, kidney, tongue, heart, stomach, sweetbread (thymus gland), brain, etc.

The group name and definitions are in conformity with those recorded in the Codex Standards 89-1981 and 98-1981, Codex Standard for Luncheon Meat and Codex Standard for Cooked Cured Chopped Meat respectively:

"Edible offal" means such offal as have been passed as fit for human consumption, but not including lungs, ears, scalp, snout (including lips and muzzle), mucous membranes, sinews, genital system, udders, intestines and urinary bladder". In the former Classification of Food and Food Groups in the Guide to Codex Maximum Limits for Pesticide Residues 1978; CAC/PR 1-1978 the name Meat by-products was used for this group.

Exposure to pesticides is through animal metabolism following oral intake with feed or through dermal intake as a consequence of external use of pesticides on livestock animals against ectoparasites.

The entire commodity may be consumed.

**03200 - WHEAT ROLLED GRAINS (EFSA FOODEX2)**

FTC A00EB

BT 03100 - CEREAL ROLLED GRAINS (EFSA FOODEX2) [A04LJ]

#### 041 DIADROMOUS FISH (WD) (CCPR)

**FTC** A0746  
**BT** 08 AQUATIC ANIMAL PRODUCTS (CCPR) [A0656]  
**AI** The diadromous fishes in general migrate from the sea to brackish and/or freshwater and in the opposite direction. The anadromous species spawn in fresh water (streams, small rivers and brooks) e.g. several salmon species, whereas eels spawn in the ocean. Some species, such as trout, are domesticated and do not migrate. They are bred in fish farms in ponds, mountain streams etc. The latter species especially may be exposed to pesticides through compounded fish feed and also through water pollution. The fleshy parts of the animals and, to a lesser extent, roe and milt are consumed.

#### 045 CRUSTACEANS (WC) (CCPR)

FTC A0750  
 BT 08 AQUATIC ANIMAL PRODUCTS (CCPR) [A0656]  
 AI Crustaceans are aquatic animals of various species, wild or cultivated, which have an inedible chitinous outer shell. A small number of species live in fresh water but most species live in brackish water and/or in the sea. Exposure to pesticides is through animal metabolism or water pollution. Crustaceans are prepared for wholesale or retail distribution at a "raw" stage, often still alive, "raw" and deep-frozen or cooked directly after catching and deep-frozen. Shrimps or prawns may also be parboiled and thereafter deep-frozen. Although the cooked or parboiled crustaceans should be regarded as processed foods, the animals of this group are primarily classified in the Chapter on Primary food commodities, Type 8: Aquatic animal products, since several crustaceans are also-marketed in a "raw" form, i.e. not exposed to temperatures sufficiently high to coagulate the protein at the surface. A short reference to processed Crustaceans is given in Type 17: Derived edible products of animal origin, Group 084 Crustaceans, processed. The entire commodity except the shell may be consumed: the "raw" commodities, in general, after cooking.

In some countries, species such as the Norway lobster (*Nephrops norvegicus*) are included in the commodity "Prawns" with some qualifying designation, such as Dublin Bay Prawn or Prawn of Bantry Bay (both Ireland). The Codex Stan. 92-1981 on Quick Frozen Shrimps and Prawns does not prevent this practice, provided that the designation on the label ensures that the consumer will not be misled.

There is no clear-cut distinction between Shrimps and Prawns. In several countries the commodity name-Shrimps is used for the small species whereas the slightly larger ones are called Prawns. However, a species marked in certain regions of the world as "Prawn" may be called in the local English language in other areas a shrimp and visa versa, e.g., *Pandalus borealis* is called Northern prawn or Deepwater prawn in the United Kingdom and the same species is named Pink shrimp in Canada. In Australia only the name Prawn is used for animals included in this commodity.

Not including the Freshwater species of the Palaemonidae.

**048 FROGS, LIZARDS, SNAKES AND TURTLES (AR) (CCPR)**

- FTC** A0751  
**BT** 09 AMPHIBIANS AND REPTILES (CCPR) [A0657]  
**AI** Frog, lizard, snake and turtle products are the edible parts from various animal species of the zoological classes Amphibia and Reptilia, usually wild, harvested for food. Some frog species are cultivated in a few European and Asian countries and to a small extent in the USA and "marketed" in the form of deep-frozen frog legs. The wild species are marketed in the same manner.  
 A few turtle species are raised from eggs or hatchlings in some tropical countries, especially the Green Turtle. Exposure to pesticides is through animal metabolism.

The entire product, except the bones and the bony or horny outer shell (turtles), may be consumed.

#### 051 STRAW, FODDER AND FORAGE OF CEREAL GRAINS AND GRASSES, EXCEPT GRASSES FOR SUGAR PRODUCTION (INCLUDING BUCKWHEAT FODDER) (AS/AF) (CCPR)

**FTC** A0754  
**BT** 11 PRIMARY FOOD COMMODITIES OF PLANT ORIGIN (CCPR) [A0659]  
**AI** The straw, fodder and forage of cereal grains are derived from various plants of the grass family (Gramineae). Cereal grains are grown to a limited extent as a forage crop. The immature crop is fed to livestock animals as succulent forage or as silage.  
 The cereal grain crops are mainly grown for human food or raw material for preparing food products. The "waste" parts remaining after harvest of the grain kernels (stems, stalks, leaves and empty ears) are extensively used and distributed for animal feeding purposes, in the form of dry fodder or straw.  
 Several other species of the grass family are exclusively grown as forage crops. These crops are either used for grazing or are prepared for wholesale or retail distribution in the form of grass silage (in general one or more cuttings from immature plants), as artificially dried grass or as hay.  
 The entire commodity may be consumed by livestock animals.

#### 084 CRUSTACEANS, PROCESSED (SC) (CCPR)

**FTC** A0771  
**BT** 17 DERIVED EDIBLE PRODUCTS OF ANIMAL ORIGIN (CCPR) [A0665]  
**RT** SEAFOOD PRODUCT (EUROFIR) [A0803]  
**AI** Crustaceans are processed to a large extent before entering the national or international trade channels. Crabs, lobsters and shrimps or prawns are in general cooked directly after catching. Thereafter either the animals are deep frozen with or without shell, or the meat without shell is canned, with or without a packing medium. The latter may consist of water, salt, lemon juice and sugars. Shrimps or prawns may also be "parboiled" and thereafter deep-frozen. According to the relevant Codex Standards, namely 92-1981, and 95-1981 "cooked" means heated for a period of time such that the thermal centre reaches a temperature adequate to coagulate the protein and "parboiled" means heated for a period of such time that the surface of the product Codex Alimentarius reaches a temperature adequate to coagulate the protein at the surface but inadequate to coagulate the protein at the thermal centre. The cooked commodities are in general subjected to deep-freezing directly after cooking or the cooking is part of the canning process.

The designation cooked after the commodity may include any of the processes mentioned except the parboiled and deep-frozen shrimps or prawns.

The entire commodity except the shell may be consumed.

**FTC** A0774

**BT** 17 DERIVED EDIBLE PRODUCTS OF ANIMAL ORIGIN (CCPR) [A0665]

**RT** CREAM (EUROFIR) [A0782]

**AI** Derived milk products include food or edible substances isolated from the primary food commodity cattle milk, or milks from other mammals, using physical, biological and chemical processes. This group and the commodities therein will only be used if necessary for pesticides which are not partitioned exclusively or nearly exclusively into the milk fat. For further explanation, see Group 082.  
This group includes among others the following food commodities, as defined in the relevant Codex Standards, see CAC/VOL. XXI, Ed-1 (1984): Butter, whey butter, both in Standard A-1 (1971), Butteroil, anhydrous butteroil, both in Standard A-2 (1973); Cream, Standard A-9 (1976); Cream powders (half cream, high fat), Standard A-10 (1971); Edible acid casein, Standard A-12 (1976); Edible caseinates, Standard A-13 (1976).  
Specific commodities will be listed in this group with their code nos. accordingly as the necessity for this arises.

SN Index intended consumer (child all), organic claim, and diet claims in facet P. Index type of juice in facet B.

AI Includes any products that can be described/observed as a powder or concentrate that contains some vegetable juice or a blend of vegetable and fruit juice, having vegetable as the main characteristic together with additional ingredients, such as water, su

**10006259 - SEEDLINGS - READY TO EAT (GS1 GPC)**

FTC A1703

BT 50261900 - MICRO VEGETABLES (GS1 GPC) [A1379]

SN Index geographical origin in facet R.

AI Includes products which are juvenile or immature appearances of vegetables in the form of buds with leaves. Includes exclusively seedling products that are cleaned and suitable for consumption. Specifically excludes: Prepared, Processed and Shelf Stable

**10006260 - SPROUTS (GS1 GPC)**

FTC A1704

BT 50261900 - MICRO VEGETABLES (GS1 GPC) [A1379]

RT GERMINATED OR SPROUTED SEED [C0102]

SN Index geographical origin in facet R.

AI This standard applies to juvenile or immature appearances of vegetables in the form of buds without leaves. Specifically excludes: Prepared, Processed and Shelf Stable instances of Sprouting vegetables.

**10006261 - EDIBLE FLOWERS (GS1 GPC)**

FTC A1535

BT 50262000 - EDIBLE FLOWERS (GS1 GPC) [A1374]

RT FLORET OR FLOWER [C0237]

SN Index geographical origin in facet R, growing method (conventional, organic) in facet Z.

AI This standard applies to edible flowers of plants. Specifically excludes: Prepared, Processed and Shelf Stable instances of Edible flowers.

**10006262 - TIDAL SEA VEGETABLES OTHER (GS1 GPC)**

FTC A1886

BT 50262100 - TIDAL SEA VEGETABLES (GS1 GPC) [A1391]

SN Index geographical origin in facet R, growing method (conventional, organic) in facet Z.

AI Includes any products that may be described/observed as tidal sea vegetables products, where the user of the schema is not able to classify the products in existing bricks within the schema. Excludes all currently classified Tidal Sea Vegetables.

**10006263 - BEECH MUSHROOMS (GS1 GPC)**

FTC A1548

BT 50261700 - FUNGI (GS1 GPC) [A1376]

RT BROWN BEECH MUSHROOM [B3744]

SN Index geographical origin in facet R, colour (brown, white) and growing method (conventional, organic) in facet Z.

AI Includes any product that can be described/observed as a fresh commercial variety of Beech mushrooms (cultivars) grown from *Hypsizygus tessulatus*, also known as Shiimeji, to be supplied fresh. Specifically excludes: Prepared, Processed and Shelf Stable Be

**10006264 - ENOKITAKE (GS1 GPC)**

FTC A1552  
 BT 50261700 - FUNGI (GS1 GPC) [A1376]  
 RT ENOKITAKE [B2507]

SN Index geographical origin in facet R, growing method (conventional, organic) in facet Z.  
 AI Includes any product that can be described/observed as a fresh commercial variety of Enokitake (cultivars) grown from *Flammulina velutipes* supplied fresh. Specifically excludes: Prepared, Processed and Shelf Stable Enokitake.

**10006265 - ERYNGII (GS1 GPC)**

FTC A1553  
 BT 50261700 - FUNGI (GS1 GPC) [A1376]  
 RT KING OYSTER MUSHROOM [B3743]

SN Index geographical origin in facet R, growing method (conventional, organic) in facet Z.  
 AI Includes any product that can be described/observed as a fresh commercial variety of Eryngii Mushroom (cultivars) grown from *Pleurotus Eryngii* to be supplied fresh. Specifically excludes: Prepared, Processed and Shelf Stable Eryngii Mushrooms.

**10006266 - WILD MUSHROOMS (OTHER) (GS1 GPC)**

FTC A1559  
 BT 50261700 - FUNGI (GS1 GPC) [A1376]  
 RT MUSHROOM [B1467]

SN Index geographical origin in facet R, growing method (conventional, organic) in facet Z, and variety in facet B.  
 AI Includes any product that can be described/observed as several types of fresh mushrooms sparsely cultivated or found wild which should be identified on attribute level. Specifically excludes: Prepared, Processed and Shelf Stable wild mushrooms, excludes

FTC A1563  
 BT 50350200 - HEAD LETTUCE (GS1 GPC) [A1352]  
 RT ICEBERG LETTUCE [B2083]

SN Index geographical origin in facet R, colour (green, red) and growing method (conventional, organic) in facet Z.  
 AI This standard applies to Iceberg Lettuce of varieties (cultivars) grown from *Lactuca sativa* L. var. *capitata* L. with closed heads to be supplied fresh. Specifically excludes: Prepared, Cut or picked, Processed, Shelf Stable Iceberg Lettuce as well as let

**10006268 - LOOSE LEAF/MULTILEAF LETTUCE OTHER (GS1 GPC)**

FTC A1611  
 BT 50350300 - LOOSE LEAF/MULTILEAF SALAD GREENS (GS1 GPC) [A1354]  
 RT LOOSE LEAF LETTUCE [B2087]

SN Index geographical origin in facet R, colour (green, red) and growing method (conventional, organic) in facet Z.  
 AI This standard applies to loose leaf / multileaf lettuce grown from *Lactuca sativa* L. var. *crispa* L. to be supplied fresh. Includes only loose leaf / multileaf lettuce that is not specified in its own individual brick. Specifically excludes: Prepared, Proc

**10006269 - BABY LEAVES (GS1 GPC)**

FTC A1833  
 BT 50350400 - SINGLE LEAF SALAD GREENS (GS1 GPC) [A1355]  
 RT LEAFY VEGETABLE [B1566]

SN Index geographical origin in facet R, growing method (conventional, organic) in facet Z, types of leaves (beetroot, cabbage) in facet B.  
 AI This standard applies to 3–8 cm (approximately 1 to 3 in) leaved vegetables of varieties (cultivars) grown from all types of botanical species to be supplied fresh as single leaves salad vegetables. Specifically excludes: Prepared, Processed, Shelf Stabl

**10006270 - SNOW PEAS (GS1 GPC)**

FTC A1749  
 BT 50261500 - PEAS (WITH PODS) (GS1 GPC) [A1381]

RT SNOW PEA [B2466]

SN Index geographical origin in facet R, growing method (conventional, organic) in facet Z.

AI This standard applies to Snow Pea of varieties (cultivars) grown from *Pisum sativum* var. *saccharatum* to be supplied fresh. Specifically excludes: Prepared, Processed and Shelf Stable Snow Pea.

**10006271 - CHICKPEAS (GS1 GPC)**

FTC A1484

BT 50262200 - CHICKPEAS (GS1 GPC) [A1370]

RT GARBANZO BEAN [B1172]

SN Index geographical origin in facet R, growing method (conventional, organic) in facet Z.

AI This standard applies to Chickpeas (also called ceci bean, garbanzo bean, chana, sanagalu Indian pea, Bengal gram) of varieties (cultivars) grown from *Cicer arietinum* to be supplied fresh. Specifically excludes: Prepared, Processed and Shelf Stable Chick

**10006272 - FENNEL (SUBSPECIES AZORICUM) (GS1 GPC)**

FTC A1858

BT 50261600 - STEM VEGETABLES (GS1 GPC) [A1387]

RT FENNEL [B1262]

SN Index geographical origin in facet R, growing method (conventional, organic) in facet Z.

AI Includes any product that can be described/observed as a fresh commercial Fennel of varieties (cultivars) grown from *Foeniculum vulgare*. Specifically excludes: Prepared, Processed and Shelf Stable Fennel.

**10006273 - BABY/INFANT - SPECIALISED FOODS (FROZEN) (GS1 GPC)**

FTC A1412

BT 50193000 - BABY/INFANT - FOODS/BEVERAGES (GS1 GPC) [A1062]

SN Index intended age group (0-3 months, 6-12 months). Index the base ingredient (fruit, poultry) in facets B and C (meat, egg). Index organic claim in facet P.

AI Includes any products that can be described/observed as food specifically labelled and marketed for a baby or infant, which is typically intended to provide a healthy, balanced diet for Infants and babies of all ages. These products must be frozen to exte

**10006278 - LAMB - UNPREPARED/UNPROCESSED (GS1 GPC)**

FTC A1668

BT 50240200 - MEAT/POULTRY/OTHER ANIMALS - UNPREPARED/UNPROCESSED (GS1 GPC) [A1020]

RT LAMB [B1669]

SN Index anatomical part in facet C, shape (sliced, chopped) in facet E, any additives in facet H, conservation method in facet J, meat cut and source (domestic/wild) in facet Z.

AI Includes products from immature animals of the genus *Ovis* that have not been subjected to any further manufacturing process such as being cooked, dried, cured, ground, or reformed. Includes products that may be sliced, diced, or mechanically tenderised.

**10006279 - MUTTON - UNPREPARED/UNPROCESSED (GS1 GPC)**

FTC A1673

BT 50240200 - MEAT/POULTRY/OTHER ANIMALS - UNPREPARED/UNPROCESSED (GS1 GPC) [A1020]

RT SHEEP [B1183]

SN Index anatomical part in facet C, shape (sliced, chopped) in facet E, any additives in facet H, conservation method in facet J, meat cut and source (domestic/wild) in facet Z.

AI Includes products from mature animals of the genus *Ovis* that have not been subjected to any further manufacturing process such as being cooked, dried, cured, ground, or reformed. Includes products may be sliced, diced, or mechanically tenderised. Exclude

BT	C. PRIMARY FEED COMMODITIES (CCPR) [A0646]
AI	Type 11 - Primary feed commodities of plant origin

The primary feed commodities of plant origin include products after removal of certain parts of the plants.

Some types of the primary feed commodities are grown and used exclusively for animal feeding purposes, e.g. alfalfa vetch and maize forage. Other types are derived from crops of which the edible parts are used directly or after processing as food, whereas the "waste" parts of these crops are generally used for feeding purposes, e.g. cereal straws, pea vines (fresh = green), pea hay, maize fodder, sugar beet tops or -leaves.

- FTC A0664  
 BT E. PROCESSED FOOD OF ANIMAL ORIGIN (CCPR) [A0648]  
 AI Type 16 - Secondary food commodities of animal origin

The term "secondary food commodity" means a "primary food commodity" which has undergone simple processing, such as removal of certain portions, drying, and comminution, which do not basically alter the composition or identity of the commodity.

Secondary food commodities may be processed further, or used as ingredients in the manufacture of food, or sold directly to the consumer.

This type of processed food includes groups of processed primary food commodities of animal origin which have undergone simple processing, such as processed mammalian meat and poultry meat, fishes and other aquatic animals, e.g. dried meat, dried fish.

**21560 - CURED RIPENED RAW SAUSAGES (EFSA FOODX2)**

- FTC** A024V  
**BT** 21510 - PRESERVED OR PARTLY PRESERVED SAUSAGES (EFSA FOODX2) [A0EYP]  
**UF** dried sausages  
**UF** matured sausages  
**UF** smoked firm sausage  
**AI** The group includes any type of Cured ripened raw sausages such as matured sausages or dried sausages or smoked firm sausages. Ripened raw-fermented sausages are uncooked meat products and consist of more or less coarse mixtures of lean meats and fatty tissues combined with salts, nitrite (curing agent), sugars and spices and other non-meat ingredients filled into casings. They receive their characteristic properties (flavour, firm texture, red curing colour) through fermentation processes. Shorter or longer ripening phases combined with moisture reduction ("drying") are necessary to build-up the typical flavour and texture of the final product. The products are not subjected to any heat treatment during processing and are in most cases distributed and consumed raw. The part consumed/analysed is by default the whole or a portion of it representing the observed heterogeneity. The eventual removal of not edible parts is unspecified. When relevant, information on the part consumed/analysed has to be reported with additional facet descriptors.
