#### 24830 - CRUSTACEANS (EFSA FOODX2)

**FTC** A02FD

**BT** 22110 - FISH, SEAFOOD, AMPHIBIANS, REPTILES AND INVERTEBRATES (EFSA FOODX2) [A026T]

**AI** The group includes any type of Crustacean (ISSCAAP division 4). Crustaceans are aquatic animals of various species, wild or cultivated, which have an inedible chitinous outer shell. A small number of species live in fresh water, but most species live in brackish water and/or in the sea. Crustaceans are prepared for wholesale or retail distribution at a "raw" stage, often still live, "raw" and deep-frozen, or cooked directly after catching and deep-frozen. Shrimps or prawns may also be parboiled and thereafter deep-frozen. The part consumed/analysed is by default the whole or a portion of it representing the observed heterogeneity. ] and [<https://en.wikipedia.org/wiki/Crustaceans>] and [<https://www.google.co.uk/search?tbm=isch&q=Crustaceans>]

**BT** 27080 - TRADITIONAL NORDIC FERMENTED MILKS (EFSA FOODEX2) [A02NY]  
**AI** The group includes any type of Filmjök (also known as fil or the older word surmjök), a Nordic mesophilic fermented milk product that is made by fermenting cow's milk with a variety of bacterium from the species *Lactococcus lactis* and *Leuconostoc mesenteroides*. The bacteria metabolize lactose, the sugar naturally found in milk, into lactic acid. The acid gives filmjök a sour taste and causes proteins in the milk, mainly casein, to coagulate, thus thickening the final product. The bacteria also produce a limited amount of diacetyl, which gives filmjök its characteristic taste. Filmjök is similar to cultured buttermilk, kefir, or yoghurt in consistency, but fermented by different bacteria and thus has a slightly different taste. Compared with yoghurt, filmjök tastes less sour. The part consumed/analysed is by default the whole or a portion of it representing the observed heterogeneity.[<https://en.wikipedia.org/wiki/Filmjök>] and [<https://www.google.co.uk/search?tbm=isch&q=Filmjök>]

- FTC** A02PB  
**BT** 27080 - TRADITIONAL NORDIC FERMENTED MILKS (EFSA FOODEX2) [A02NY]  
**AI** The group includes Viili (Finnish viili, Swedish fil), a type of yoghurt (a mesophilic fermented milk) that originated in the Nordic countries. It has a ropey, gelatinous consistency and a sour taste resulting from lactic acid. This cultured milk product is the result of microbial action of lactic acid bacteria (LAB) and a surface-growing yeast-like fungus *Geotrichum candidum* present in milk, which forms a velvet-like surface on viili. In addition, most traditional viili cultures also contain yeast strains such as *Kluveromyces marxianus* and *Pichia fermentans*. The LAB identified in viili including *Lactococcus lactis* subsp. *cremoris*, *Lactococcus lactis* subsp. *lactis* biovar. *diacetylactis*, *Leuconostoc mesenteroides* subsp. *cremoris*. Among those mesophilic LAB strains, the slime-forming *Lc. lactis* subsp. *cremoris* produce a phosphate-containing heteropolysaccharide, named viilian. - FTC** A039B  
**BT** 30910 - ANIMAL AND VEGETABLE FATS AND OILS AND PRIMARY DERIVATIVES THEREOF (EFSA

FOODEX2) [A036M]

- AI The group includes any type of fat emulsions and blended fats. The part consumed/analysed is by default the whole or a portion of it representing the observed heterogeneity.

### 31480 - BUTTER (EFSA FOODEX2)

FTC A039C

BT 31470 - FAT EMULSIONS AND BLENDED FATS (EFSA FOODEX2) [A039B]

- AI The group includes butter, i.e. a fat emulsion obtained from dairy cream (cultured or not) by churning or equivalent technologies. The part consumed/analysed is by default the whole or a portion of it representing the observed heterogeneity. ] and [<https://en.wikipedia.org/wiki/Butter>] and [<https://www.google.co.uk/search?tbm=isch&q=Butter>]

### 31490 - MARGARINES AND SIMILAR (EFSA FOODEX2)

FTC A0F1G

BT 31470 - FAT EMULSIONS AND BLENDED FATS (EFSA FOODEX2) [A039B]

- AI The group includes any type of margarines, i.e. butter-like preparations from different non-dairy or only partially dairy sources] and [<https://en.wikipedia.org/wiki/Margarin>] and [<https://www.google.co.uk/search?tbm=isch&q=Margarines>]

### 31500 - TRADITIONAL MARGARINE (EFSA FOODEX2)

FTC A039D

BT 31490 - MARGARINES AND SIMILAR (EFSA FOODEX2) [A0F1G]

- AI The group includes fat-based emulsion resembling in the aspect butter but normally not including significant amounts dairy fat. The fat sources are usually vegetable fats, though historically animal fats including dairy fats have been used. The basic process is emulsifying a blend of vegetable oils and fats, which can be modified using fractionation, interesterification, and/or hydrogenation. The term traditional margarine refers here to the types more solid, most often used for cooking, baking or frying.[<https://en.wikipedia.org/wiki/Margarin>] and [<https://www.google.co.uk/search?tbm=isch&q=Traditional margarine>]

### 31510 - BLENDED MARGARINE (EFSA FOODEX2)

FTC A039E

BT 31490 - MARGARINES AND SIMILAR (EFSA FOODEX2) [A0F1G]

- AI The group includes margarines blended with vegetable oils, in many cases leading to spreadable products, used for consumption as such, on bread or similar.[<https://en.wikipedia.org/wiki/Margarin>] and [<https://www.google.co.uk/search?tbm=isch&q=Blended margarine>]

### 31520 - FUNCTIONAL VEGETABLE MARGARINES/FATS (EFSA FOODEX2)

FTC A039H

BT 31490 - MARGARINES AND SIMILAR (EFSA FOODEX2) [A0F1G]

- AI The group includes fat emulsions and/or fats with added functional substances like omega 3, phytosterols. All margarines and spreadable fat mixes including functional substances are included.[<https://www.google.co.uk/search?tbm=isch&q=Functional vegetable margarines>]

### 31530 - BLENDED FAT AND OILS (EFSA FOODEX2)

FTC A04SD

BT 31470 - FAT EMULSIONS AND BLENDED FATS (EFSA FOODEX2) [A039B]

- AI The group includes blends of different fats/oils or of different fats/oils with margarines or butter

### 31540 - BLENDED FRYING OIL/FATS (EFSA FOODEX2)

FTC A039J

BT 31530 - BLENDED FAT AND OILS (EFSA FOODEX2) [A04SD]

- AI The group includes blends of oils specifically tailored in their formulation and production to be suitable for frying, optimising the frying process and reducing the undesirable process contaminants.[<https://www.google.co.uk/search?tbm=isch&q=Blended oil/fats for frying>]

### 31550 - BUTTER AND MARGARINE/OIL BLENDS (EFSA FOODEX2)

FTC A039F

BT 31530 - BLENDED FAT AND OILS (EFSA FOODEX2) [A04SD]

- AI The group includes blends of butter with margarine or oils/fats. These are relatively popular in some countries, particularly for direct use on bread or similar.[<https://www.google.co.uk/search?tbm=isch&q=Butter blended with margarine/oil>]

### 31560 - SHORTENING AND SIMILAR BAKING FATS (EFSA FOODEX2)

FTC A039G

BT 31530 - BLENDED FAT AND OILS (EFSA FOODEX2) [A04SD]

**AI** The group includes Shortening and similar baking fats, i.e. any fat (or mixture of fats) that is solid at room temperature and used to make pastry. The part consumed/analysed is by default the whole or a portion of it representing the observed heterogeneity. [[https://www.google.co.uk/search?tbm=isch&q=Shortening baking fats](https://www.google.co.uk/search?tbm=isch&q=Shortening+baking+fats)]

#### **38050 - FORMULAS FOR METABOLIC DISORDERS (EFSA FOODX2)**

FTC A03SG

BT 38020 - DIETARY FOODS FOR SPECIAL MEDICAL PURPOSES (EFSA FOODX2) [A03SD]

AI The group includes any type of Formulas for metabolic disorders (usually genetic disorders). The part consumed/analysed is by default the whole marketed unit or a homogeneous representative portion.[[https://en.wikipedia.org/wiki/Medical\\_food](https://en.wikipedia.org/wiki/Medical_food)] and [<https://www.google.co.uk/search?tbm=isch&q=Formula for metabolic disorder food for special medical purposes>]

#### **38060 - ORAL REHYDRATION PRODUCTS (EFSA FOODX2)**

FTC A03SH

- BT** 38020 - DIETARY FOODS FOR SPECIAL MEDICAL PURPOSES (EFSA FOODEX2) [A03SD]  
**AI** The group includes any type of oral rehydration products, for replacement of water and electrolytes. The part consumed/analysed is by default the whole marketed unit or a homogeneous representative portion. [[https://en.wikipedia.org/wiki/Medical\\_food](https://en.wikipedia.org/wiki/Medical_food)] and [[https://www.google.co.uk/search?tbm=isch&q=Oral rehydration products](https://www.google.co.uk/search?tbm=isch&q=Oral+rehydration+products)]

**38070 - FOOD SUPPLEMENTS AND SIMILAR PREPARATIONS (EFSA FOODEX2)**

- FTC** A03SJ  
**BT** 37910 - PRODUCTS FOR NON-STANDARD DIETS, FOOD IMITATES AND FOOD SUPPLEMENTS (EFSA FOODEX2) [A03RQ]  
**AI** The group includes any type of Food supplements intended for general population or specific age groups and also other preparations that, while not necessarily providing nutrients to integrate the diet, are a source of nutraceutical substances. These preparations are commonly either in capsules / tablets or in powder or in liquid form. Supplements for sporting people are included in a specific separate group because they have tentative classes in view of possible regulations. The part consumed/analysed is by default the whole marketed unit or a homogeneous representative portion. [[https://en.wikipedia.org/wiki/Dietary\\_supplement](https://en.wikipedia.org/wiki/Dietary_supplement)] and [[https://www.google.co.uk/search?tbm=isch&q=Food supplement](https://www.google.co.uk/search?tbm=isch&q=Food+supplement)]

**38080 - MIXED SUPPLEMENTS/FORMULATIONS (EFSA FOODEX2)**

- FTC** A03TC  
**BT** 38070 - FOOD SUPPLEMENTS AND SIMILAR PREPARATIONS (EFSA FOODEX2) [A03SJ]  
**AI** The group includes any type of supplements combining different principles without a strong dominance of one. If relevant, all the characterising ingredients should be reported with additional facet descriptors. The part consumed/analysed is by default the whole marketed unit or a homogeneous representative portion. [[https://en.wikipedia.org/wiki/Dietary\\_supplement](https://en.wikipedia.org/wiki/Dietary_supplement)] and [[https://www.google.co.uk/search?tbm=isch&q=multi supplement](https://www.google.co.uk/search?tbm=isch&q=multi+supplement)]

**38090 - VITAMIN AND MINERAL SUPPLEMENTS (EFSA FOODEX2)**

- FTC** A03SK  
**BT** 38070 - FOOD SUPPLEMENTS AND SIMILAR PREPARATIONS (EFSA FOODEX2) [A03SJ]  
**AI** The group includes any type of supplements based on vitamins and minerals, excluding those claimed for sporting people and the carbohydrate-electrolyte solutions, addressed by a specific group. The part consumed/analysed is by default the whole marketed unit or a homogeneous representative portion. [[https://en.wikipedia.org/wiki/Dietary\\_supplement](https://en.wikipedia.org/wiki/Dietary_supplement)] and [[https://www.google.co.uk/search?tbm=isch&q=Vitamin and mineral supplements](https://www.google.co.uk/search?tbm=isch&q=Vitamin+and+mineral+supplements)]

**38100 - VITAMIN ONLY SUPPLEMENTS (EFSA FOODEX2)**

- FTC** A03SL  
**BT** 38090 - VITAMIN AND MINERAL SUPPLEMENTS (EFSA FOODEX2) [A03SK]  
**AI** The group includes all supplements based only on vitamins. If relevant, all the characterising ingredients should be reported with additional facet descriptors. The part consumed/analysed is by default the whole marketed unit or a homogeneous representative portion. [[https://en.wikipedia.org/wiki/Dietary\\_supplement](https://en.wikipedia.org/wiki/Dietary_supplement)] and [[https://www.google.co.uk/search?tbm=isch&q=Vitamin only supplements](https://www.google.co.uk/search?tbm=isch&q=Vitamin+only+supplements)]

**38110 - MINERAL ONLY SUPPLEMENTS (EFSA FOODEX2)**

- FTC** A03SM  
**BT** 38090 - VITAMIN AND MINERAL SUPPLEMENTS (EFSA FOODEX2) [A03SK]  
**AI** The group includes all supplements based only on minerals (normally salts of different chemical elements). If relevant, all the characterising ingredients should be reported with additional facet descriptors. The part consumed/analysed is by default the whole marketed unit or a homogeneous representative portion. [[https://en.wikipedia.org/wiki/Dietary\\_supplement](https://en.wikipedia.org/wiki/Dietary_supplement)] and [[https://www.google.co.uk/search?tbm=isch&q=Mineral only supplements](https://www.google.co.uk/search?tbm=isch&q=Mineral+only+supplements)]

**FTC** A03SQ  
**BT** 38130 - MISCELLANEOUS SUPPLEMENTS OR NUTRACEUTICALS (EFSA FOODEX2) [A03SP]  
**AI** The group includes any type of supplements/nutraceuticals originating from apiculture. The part consumed/analysed is by default the whole marketed unit or a homogeneous representative portion.[[https://www.google.co.uk/search?tbm=isch&q=Bee-produced product](https://www.google.co.uk/search?tbm=isch&q=Bee-produced+product)]

#### 38150 - FIBER SUPPLEMENTS (EFSA FOODEX2)

**FTC** A03SR  
**BT** 38130 - MISCELLANEOUS SUPPLEMENTS OR NUTRACEUTICALS (EFSA FOODEX2) [A03SP]  
**AI** The group includes any type of Fiber supplements. The part consumed/analysed is by default the whole marketed unit or a homogeneous representative portion.[[https://en.wikipedia.org/wiki/Fibre\\_supplements](https://en.wikipedia.org/wiki/Fibre_supplements)] and [[https://www.google.co.uk/search?tbm=isch&q=Fiber supplements](https://www.google.co.uk/search?tbm=isch&q=Fiber+supplements)]

#### 38160 - HERBAL FORMULATIONS AND PLANT EXTRACTS (EFSA FOODEX2)

**FTC** A03SS  
**BT** 38130 - MISCELLANEOUS SUPPLEMENTS OR NUTRACEUTICALS (EFSA FOODEX2) [A03SP]  
**AI** The group includes any type of supplement based on Herbal formulations and/or plant extracts (with exclusion of algae, having a specific group). The part consumed/analysed is by default the whole marketed unit or a homogeneous representative portion.[[https://en.wikipedia.org/wiki/Dietary\\_supplement](https://en.wikipedia.org/wiki/Dietary_supplement)] and [[https://www.google.co.uk/search?tbm=isch&q=Herbal formulations and plant extracts supplement](https://www.google.co.uk/search?tbm=isch&q=Herbal+formulations+and+plant+extracts+supplement)]

#### 38170 - ALGAE BASED FORMULATIONS (E.G. SPIRULINA, CHLORELLA) (EFSA FOODEX2)

**FTC** A03ST  
**BT** 38130 - MISCELLANEOUS SUPPLEMENTS OR NUTRACEUTICALS (EFSA FOODEX2) [A03SP]  
**AI** The group includes any type of Algae based supplements (e.g. containing Spirulina, Chlorella). The part consumed/analysed is by default the whole marketed unit or a homogeneous representative portion.[[https://en.wikipedia.org/wiki/Spirulina\\_\(dietary\\_supplement\)](https://en.wikipedia.org/wiki/Spirulina_(dietary_supplement))] and [[https://www.google.co.uk/search?tbm=isch&q=Algae based formula \(e.g. Spirulina, chlorella\)](https://www.google.co.uk/search?tbm=isch&q=Algae+based+formula+(e.g.+Spirulina,+chlorella))]

#### 38180 - PROBIOTIC OR PREBIOTIC FORMULATIONS (EFSA FOODEX2)

**FTC** A0F3Y  
**BT** 38130 - MISCELLANEOUS SUPPLEMENTS OR NUTRACEUTICALS (EFSA FOODEX2) [A03SP]  
**AI** The group includes any type of Probiotic or prebiotic formulations, i.e. formulations addressed to the probiotic gut flora (bacteria colonizing the gut with putative beneficial health effect, like replacing harmful bacteria or producing beneficial metabolites). They may be based on probiotic bacteria and/or on substances favouring the development of probiotic bacteria in the gut (prebiotic substances).[[https://www.google.co.uk/search?tbm=isch&q=Probiotic or prebiotic formula](https://www.google.co.uk/search?tbm=isch&q=Probiotic+or+prebiotic+formula)]

#### 38190 - FORMULATIONS CONTAINING SPECIAL FATTY ACIDS (E.G. OMEGA-3, ESSENTIAL FATTY ACIDS) (EFSA FOODEX2)

**FTC** A03SX  
**BT** 38130 - MISCELLANEOUS SUPPLEMENTS OR NUTRACEUTICALS (EFSA FOODEX2) [A03SP]  
**AI** The group includes any type of supplements/nutraceuticals containing special fatty acids (e.g. omega-3, essential fatty acids). Medium-Chain Triglycerides (MCT), often consumed by sporting people are also included in this group. The part consumed/analysed is by default the whole marketed unit or a homogeneous representative portion.[[https://en.wikipedia.org/wiki/Dietary\\_supplement](https://en.wikipedia.org/wiki/Dietary_supplement)] and [[https://www.google.co.uk/search?tbm=isch&q=supplement essential fatty acids](https://www.google.co.uk/search?tbm=isch&q=supplement+essential+fatty+acids)]

#### 38200 - PROTEIN AND AMINO ACIDS SUPPLEMENTS (EFSA FOODEX2)

**FTC** A03SY  
**BT** 38130 - MISCELLANEOUS SUPPLEMENTS OR NUTRACEUTICALS (EFSA FOODEX2) [A03SP]  
**AI** The group includes any type of Protein and amino acids supplements. Branched Chain Amino Acids (BCAA), often consumed by sporting people are also included in this group. The part consumed/analysed is by default the whole marketed unit or a homogeneous representative portion.[[https://en.wikipedia.org/wiki/Dietary\\_supplement](https://en.wikipedia.org/wiki/Dietary_supplement)] and [[https://www.google.co.uk/search?tbm=isch&q=Protein and amino acids supplements](https://www.google.co.uk/search?tbm=isch&q=Protein+and+amino+acids+supplements)]

#### 38210 - COENZYME Q10 FORMULATIONS (EFSA FOODEX2)

**FTC** A03SZ

- BT** 38130 - MISCELLANEOUS SUPPLEMENTS OR NUTRACEUTICALS (EFSA FOODEX2) [A03SP]  
**AI** The group includes any type of Coenzyme Q10 supplements/nutraceuticals. The part consumed/analysed is by default the whole marketed unit or a homogeneous representative portion.[[https://www.google.co.uk/search?tbm=isch&q=Coenzyme q10 supplement](https://www.google.co.uk/search?tbm=isch&q=Coenzyme+q10+supplement)]

**38220 - ENZYME-BASED FORMULATIONS (EFSA FOODEX2)**

- FTC** A03TA  
**BT** 38130 - MISCELLANEOUS SUPPLEMENTS OR NUTRACEUTICALS (EFSA FOODEX2) [A03SP]  
**AI** The group includes any type of Enzyme-based supplements/nutraceuticals. The part consumed/analysed is by default the whole marketed unit or a homogeneous representative portion.[[https://www.google.co.uk/search?tbm=isch&q=Enzyme supplement](https://www.google.co.uk/search?tbm=isch&q=Enzyme+supplement)]

**38230 - YEAST BASED FORMULATIONS (EFSA FOODEX2)**

- FTC** A03TB  
**BT** 38130 - MISCELLANEOUS SUPPLEMENTS OR NUTRACEUTICALS (EFSA FOODEX2) [A03SP]  
**AI** The group includes any type of Yeast (normally *Saccharomyces cerevisiae*) based supplements. The part consumed/analysed is by default the whole marketed unit or a homogeneous representative portion.[[https://www.google.co.uk/search?tbm=isch&q=yeast supplement -red](https://www.google.co.uk/search?tbm=isch&q=yeast+supplement+-red)]

**38240 - OTHER COMMON SUPPLEMENTS (EFSA FOODEX2)**

- FTC** A03SV  
**BT** 38130 - MISCELLANEOUS SUPPLEMENTS OR NUTRACEUTICALS (EFSA FOODEX2) [A03SP]  
**AI** The group includes any type of common supplements or fortifying agents not listed elsewhere. The part consumed/analysed is by default the whole marketed unit or a homogeneous representative portion.[[https://en.wikipedia.org/wiki/Dietary\\_supplement](https://en.wikipedia.org/wiki/Dietary_supplement)] and [[https://www.google.co.uk/search?tbm=isch&q=Other supplements](https://www.google.co.uk/search?tbm=isch&q=Other+supplements)]

**38250 - MEAT AND DAIRY IMITATES (EFSA FOODEX2)**

- FTC** A03TD  
**BT** 37910 - PRODUCTS FOR NON-STANDARD DIETS, FOOD IMITATES AND FOOD SUPPLEMENTS (EFSA FOODEX2) [A03RQ]  
**UF** meat and dairy substitutes  
**AI** The category covers all meat and dairy imitates (substitutes). The part consumed/analysed is by default the whole marketed unit or a homogeneous representative portion.[[https://en.wikipedia.org/wiki/Meat\\_analogue](https://en.wikipedia.org/wiki/Meat_analogue)] and [[https://www.google.co.uk/search?tbm=isch&q=Meat alternatives and dairy alternatives](https://www.google.co.uk/search?tbm=isch&q=Meat+alternatives+and+dairy+alternatives)]

**38260 - MEAT IMITATES (EFSA FOODEX2)**

- FTC** A03TE  
**BT** 38250 - MEAT AND DAIRY IMITATES (EFSA FOODEX2) [A03TD]  
**UF** meat substitutes  
**AI** The group includes any type of Meat imitates and substitutes. The part consumed/analysed is by default the whole marketed unit or a homogeneous representative portion.[[https://en.wikipedia.org/wiki/Meat\\_analogue](https://en.wikipedia.org/wiki/Meat_analogue)] and [[https://www.google.co.uk/search?tbm=isch&q=Meat alternatives](https://www.google.co.uk/search?tbm=isch&q=Meat+alternatives)]

**38270 - TEXTURED SOY PROTEIN (EFSA FOODEX2)**

- FTC** A03TF  
**BT** 38260 - MEAT IMITATES (EFSA FOODEX2) [A03TE]  
**AI** The group includes any type of Textured soy protein. The part consumed/analysed is by default the whole marketed unit or a homogeneous representative portion.[[https://en.wikipedia.org/wiki/Textured\\_soy\\_protein](https://en.wikipedia.org/wiki/Textured_soy_protein)] and [[https://www.google.co.uk/search?tbm=isch&q=Textured soy protein food](https://www.google.co.uk/search?tbm=isch&q=Textured+soy+protein+food)]

**38280 - TEXTURED FUNGAL PROTEINS (EFSA FOODEX2)**

- FTC** A03TG  
**BT** 38260 - MEAT IMITATES (EFSA FOODEX2) [A03TE]  
**UF** quorn  
**AI** The group includes any type of Textured fungal proteins, such as quorn. The part consumed/analysed is by default the whole marketed unit or a homogeneous representative portion.[<https://en.wikipedia.org/wiki/Quorn>] and [[https://www.google.co.uk/search?tbm=isch&q=Textured fungal proteins quorn](https://www.google.co.uk/search?tbm=isch&q=Textured+fungal+proteins+quorn)]

**38290 - TEMPEH (ALL TYPES) (EFSA FOODEX2)**

- FTC** A16RC  
**BT** 38260 - MEAT IMITATES (EFSA FOODEX2) [A03TE]  
**AI** The group includes any type of tempeh, a traditional fermented food product from Indonesia. It is high in protein and used as meat imitate in different countries. Since tempeh is mainly made from whole soybeans, but also from

other beans, coconut, peanut and other raw primary commodities, the source commodity should be specified with additional facet descriptors. The part consumed/analysed is by default the whole marketed unit or a homogeneous representative portion.[<https://en.wikipedia.org/wiki/Tempeh>] and [<https://www.google.co.uk/search?tbm=isch&q=Tempeh>]

### 38300 - DAIRY IMITATES (EFSA FOODX2)

**FTC** A0BXC  
**BT** 38250 - MEAT AND DAIRY IMITATES (EFSA FOODX2) [A03TD]  
**UF** dairy substitutes  
**AI** The group includes dairy imitates and substitutes, i.e. products that are used to replace dairy-milk in the human diet, made with non-dairy ingredients. The part consumed/analysed is by default the whole or a portion of it representing the observed heterogeneity.[[https://en.wikipedia.org/wiki/Milk\\_substitute](https://en.wikipedia.org/wiki/Milk_substitute)] and [[https://www.google.co.uk/search?tbm=isch&q=Dairy\\_imitate\\_alternatives](https://www.google.co.uk/search?tbm=isch&q=Dairy_imitate_alternatives)]

### 38310 - MILK IMITATES (EFSA FOODX2)

**FTC** A03TH  
**BT** 38300 - DAIRY IMITATES (EFSA FOODX2) [A0BXC]  
**UF** milk substitutes  
**AI** The group includes any type of Milk imitates and substitutes, i.e. liquid products meant to replace the milk from a mammal. The part consumed/analysed is by default the whole marketed unit or a homogeneous representative portion.[[https://en.wikipedia.org/wiki/Milk\\_substitute](https://en.wikipedia.org/wiki/Milk_substitute)] and [[https://www.google.co.uk/search?tbm=isch&q=dairy\\_milk\\_alternatives](https://www.google.co.uk/search?tbm=isch&q=dairy_milk_alternatives)]

The part consumed/analysed is by default the whole marketed unit or a homogeneous representative portion.[[https://www.google.co.uk/search?tbm=isch&q=Imitation yoghurt, non soy](https://www.google.co.uk/search?tbm=isch&q=Imitation+yoghurt,+non+soy)]

**38450 - COMPOSITE DISHES (EFSA FOOD EX2)**

- FTC** A03VA  
**BT** EFSA FOOD CLASSIFICATION AND DESCRIPTION SYSTEM FOR EXPOSURE ASSESSMENT (EFSA FOOD EX2) [A1895]  
**AI** The category covers all type of dishes containing more than one characterising ingredient and having a recipe

behind them where the ingredients are so diverse that no relevant main category can be identified. [[https://www.google.co.uk/search?tbm=isch&q=food dishes](https://www.google.co.uk/search?tbm=isch&q=food+dishes)]

#### 38460 - DISHES, INCL. READY TO EAT MEALS (EXCLUDING SOUPS AND SALADS) (EFSA FOODEX2)

FTC A03VB

BT 38450 - COMPOSITE DISHES (EFSA FOODEX2) [A03VA]

AI The category covers any type of dishes or ready to eat meals, excluding soups and salads which are listed in a separated group. The part consumed/analysed is by default the whole marketed unit or a homogeneous representative portion. [[https://www.google.co.uk/search?tbm=isch&q=Food dishes -soup -salad](https://www.google.co.uk/search?tbm=isch&q=Food+dishes+-soup+-salad)]

#### 38470 - DISHES EXCLUDING PASTA OR RICE DISHES, SANDWICHES AND PIZZA (EFSA FOODEX2)

FTC A03VC

BT 38460 - DISHES, INCL. READY TO EAT MEALS (EXCLUDING SOUPS AND SALADS) (EFSA FOODEX2) [A03VB]

AI The group includes any type of dishes, excluding sandwiches, pizza, pasta and rice dishes which are listed in separated groups. The part consumed/analysed is by default the whole marketed unit or a homogeneous representative portion.

#### 38480 - MEAT BASED DISHES (EFSA FOODEX2)

FTC A03VV

BT 38470 - DISHES EXCLUDING PASTA OR RICE DISHES, SANDWICHES AND PIZZA (EFSA FOODEX2) [A03VC]

AI The group includes any type of Meat based dishes, i.e. composite dishes in which the principal characterising ingredient is meat. The part consumed/analysed is by default the whole marketed unit or a homogeneous representative portion. [[https://en.wikipedia.org/wiki/Category:Meat\\_dishes](https://en.wikipedia.org/wiki/Category:Meat_dishes)] and [[https://www.google.co.uk/search?tbm=isch&q=Meat dishes](https://www.google.co.uk/search?tbm=isch&q=Meat+dishes)]

#### 38490 - GOULASH (EFSA FOODEX2)

FTC A03VX

BT 38480 - MEAT BASED DISHES (EFSA FOODEX2) [A03VV]

AI The group includes any type of Goulash, a traditional Hungarian dish based on stewed meat and vegetables, and highly spiced with paprika and other spices. More detailed information on the characterising ingredients can be added with additional facet descriptors. The part consumed/analysed is by default the whole marketed unit or a homogeneous representative portion. [<https://en.wikipedia.org/wiki/Goulash>] and [<https://www.google.co.uk/search?tbm=isch&q=Goulash>]

#### 38500 - MEAT STEW (EFSA FOODEX2)

FTC A03VY

BT 38480 - MEAT BASED DISHES (EFSA FOODEX2) [A03VV]

AI The group includes any type of Meat stew, i.e. meat-based dishes prepared by stewing (by slowly cooking) meat with other ingredients. More detailed information on the characterising ingredients can be added with additional facet descriptors. The part consumed/analysed is by default the whole marketed unit or a homogeneous representative portion. [<https://en.wikipedia.org/wiki/Stew>] and [[https://www.google.co.uk/search?tbm=isch&q=Meat stew](https://www.google.co.uk/search?tbm=isch&q=Meat+stew)]

#### 38510 - MEAT IN ASPIC (EFSA FOODEX2)

FTC A03VZ

BT 38480 - MEAT BASED DISHES (EFSA FOODEX2) [A03VV]

AI The group includes any type of Meat in aspic, i.e. composite dishes made from meat set into a gelatine (aspic). More detailed information on the characterising ingredients can be added with additional facet descriptors. The part consumed/analysed is by default the whole marketed unit or a homogeneous representative portion. [<https://en.wikipedia.org/wiki/Aspic>] and [[https://www.google.co.uk/search?tbm=isch&q=Meat in aspic](https://www.google.co.uk/search?tbm=isch&q=Meat+in+aspic)]

#### 38520 - MEAT LOAF (EFSA FOODEX2)

FTC A03XA

BT 38480 - MEAT BASED DISHES (EFSA FOODEX2) [A03VV]

AI The group includes any type of Meat loaf, i.e. composite dishes usually made from ground meat and other ingredients formed into a loaf shape. More detailed information on the characterising ingredients can be added with additional facet descriptors. The part consumed/analysed is by default the whole marketed unit or a homogeneous representative portion. [<https://en.wikipedia.org/wiki/Meatloaf>] and [[https://www.google.co.uk/search?tbm=isch&q=Meat loaf dish](https://www.google.co.uk/search?tbm=isch&q=Meat+loaf+dish)]

#### 38530 - PORK MEAT LOAF (EFSA FOODEX2)

FTC A03XB

BT 38520 - MEAT LOAF (EFSA FOODEX2) [A03XA]

AI The group includes any type of Pork meat loaf. The part consumed/analysed is by default the whole marketed unit

or a homogeneous representative portion.[<https://en.wikipedia.org/wiki/Meatloaf>] and [[https://www.google.co.uk/search?tbm=isch&q=Pork meat loaf](https://www.google.co.uk/search?tbm=isch&q=Pork+meat+loaf)]

#### 38540 - BEEF LOAF (EFSA FOODX2)

- FTC** A03XC  
**BT** 38520 - MEAT LOAF (EFSA FOODX2) [A03XA]  
**AI** The group includes any type of Beef loaf. The part consumed/analysed is by default the whole marketed unit or a homogeneous representative portion.[<https://en.wikipedia.org/wiki/Meatloaf>] and [[https://www.google.co.uk/search?tbm=isch&q=Beef loaf dish](https://www.google.co.uk/search?tbm=isch&q=Beef+loaf+dish)]

#### 38550 - MEAT LOAF WITH CHEESE, VEGETABLES OR OTHER (EFSA FOODX2)

- FTC** A03XD  
**BT** 38520 - MEAT LOAF (EFSA FOODX2) [A03XA]  
**UF** ham and cheese loaf  
**UF** mixed meat loaf  
**AI** The group includes any type of meat loaf with cheese, vegetables or other ingredients in considerable proportions, e.g. mixed meat loaf or ham and cheese loaf. More detailed information on the characterising ingredients can be added with additional facet descriptors. The part consumed/analysed is by default the whole marketed unit or a homogeneous representative portion.[<https://en.wikipedia.org/wiki/Meatloaf>] and [[https://www.google.co.uk/search?tbm=isch&q=Meatloaf with cheese, vegetables or other](https://www.google.co.uk/search?tbm=isch&q=Meatloaf+with+cheese,+vegetables+or+other)]

#### 38560 - MOUSSAKA (EFSA FOODX2)

- FTC** A03XE  
**BT** 38480 - MEAT BASED DISHES (EFSA FOODX2) [A03VV]  
**AI** The group includes any type of Moussaka, an eggplant and meat based dish of the Balkans, Eastern Mediterranean, and the Middle East. The best known variation outside the region is the Greek moussaka.[<https://en.wikipedia.org/wiki/Moussaka>] and [<https://www.google.co.uk/search?tbm=isch&q=Moussaka>]

#### 38570 - MEAT BURGER (NO SANDWICH) (EFSA FOODX2)

- FTC** A03XF  
**BT** 38480 - MEAT BASED DISHES (EFSA FOODX2) [A03VV]  
**AI** The group includes any type of Meat burger (no sandwich), i.e. patties of ground meat. The part consumed/analysed is by default the whole marketed unit or a homogeneous representative portion.[<https://en.wikipedia.org/wiki/Patty>] and [[https://www.google.co.uk/search?tbm=isch&q=cooked hamburger patties](https://www.google.co.uk/search?tbm=isch&q=cooked+hamburger+patties)]

#### 38580 - MEAT BALLS (EFSA FOODX2)

- FTC** A03XG  
**BT** 38480 - MEAT BASED DISHES (EFSA FOODX2) [A03VV]  
**AI** The group includes any type of Meat balls, usually made from ground meat and other ingredients shaped as small balls. The part consumed/analysed is by default the whole marketed unit or a homogeneous representative portion.[<https://en.wikipedia.org/wiki/Meatball>] and [[https://www.google.co.uk/search?tbm=isch&q=Meat balls](https://www.google.co.uk/search?tbm=isch&q=Meat+balls)]

#### 38590 - MEAT TERRINE (EFSA FOODX2)

- FTC** A03XH  
**BT** 38480 - MEAT BASED DISHES (EFSA FOODX2) [A03VV]  
**UF** galantine  
**UF** meat paté  
**UF** mousseline  
**AI** The group includes any type of meat terrine such as meat paté or Mousseline or galantine. The part consumed/analysed is by default the whole marketed unit or a homogeneous representative portion.[[https://en.wikipedia.org/wiki/Terrine\\_\(food\)](https://en.wikipedia.org/wiki/Terrine_(food))] and [[https://www.google.co.uk/search?tbm=isch&q=Meat terrine](https://www.google.co.uk/search?tbm=isch&q=Meat+terrine)]

#### 38600 - OFFAL BASED DISHES (EFSA FOODX2)

- FTC** A16ER  
**BT** 38480 - MEAT BASED DISHES (EFSA FOODX2) [A03VV]  
**AI** The group includes any type of dishes made with bird and/or mammal offal. The part consumed/analysed is by default the whole marketed unit or a homogeneous representative portion.[<https://en.wikipedia.org/wiki/Offal>] and [[https://www.google.co.uk/search?tbm=isch&q=Offal based dishes](https://www.google.co.uk/search?tbm=isch&q=Offal+based+dishes)]

#### 38610 - FISH AND SEAFOOD BASED DISHES (EFSA FOODX2)

- FTC** A03XJ  
**BT** 38470 - DISHES EXCLUDING PASTA OR RICE DISHES, SANDWICHES AND PIZZA (EFSA FOODX2) [A03VC]

**AI** The group includes any type of Fish and seafood based dishes, i.e. composite dishes in which the principal characterising ingredient is fish or seafood. The part consumed/analysed is by default the whole marketed unit or a homogeneous representative portion. [[https://en.wikipedia.org/wiki/List\\_of\\_seafood\\_dishes](https://en.wikipedia.org/wiki/List_of_seafood_dishes)] and [[https://www.google.co.uk/search?tbm=isch&q=Fish and seafood based dishes](https://www.google.co.uk/search?tbm=isch&q=Fish+and+seafood+based+dishes)]

#### **38620 - BOUILLABAISSÉ (EFSA FOODEX2)**

**FTC** A03XK

**BT** 38610 - FISH AND SEAFOOD BASED DISHES (EFSA FOODEX2) [A03XJ]

**AI** The group includes any type of Bouillabaisse, i.e. a French dish made with various kinds of cooked fish, shellfish and vegetables, flavored with a variety of herbs and spices. More detailed information on the characterising ingredients can be added with additional facet descriptors. ] and [<https://en.wikipedia.org/wiki/Bouillabaisse>] and [<https://www.google.co.uk/search?tbm=isch&q=Bouillabaisse>]

#### **38630 - FISH GRATIN (EFSA FOODEX2)**

**FTC** A03XL

**BT** 38610 - FISH AND SEAFOOD BASED DISHES (EFSA FOODEX2) [A03XJ]

**AI** The group includes any type of Fish gratin, i.e. composite fish-based dishes characterised by a browned/golden crust. More detailed information on the characterising ingredients can be added with additional facet descriptors. The part consumed/analysed is by default the whole marketed unit or a homogeneous representative portion. [<https://en.wikipedia.org/wiki/Gratin>] and [[https://www.google.co.uk/search?tbm=isch&q=Fish gratin](https://www.google.co.uk/search?tbm=isch&q=Fish+gratin)]

#### **38640 - SEAFOOD-BASED MEALS (EFSA FOODEX2)**

**FTC** A03XM

**BT** 38610 - FISH AND SEAFOOD BASED DISHES (EFSA FOODEX2) [A03XJ]

**AI** The group includes any type of Seafood-based composite dish. More detailed information on the characterising ingredients can be added with additional facet descriptors. The part consumed/analysed is by default the whole marketed unit or a homogeneous representative portion. [[https://en.wikipedia.org/wiki/List\\_of\\_seafood\\_dishes](https://en.wikipedia.org/wiki/List_of_seafood_dishes)] and [[https://www.google.co.uk/search?tbm=isch&q=Seafood-based meals -fish](https://www.google.co.uk/search?tbm=isch&q=Seafood-based+meals+-fish)]

#### **38650 - SEAFOOD SALAD (EFSA FOODEX2)**

**FTC** A03XN

**BT** 38610 - FISH AND SEAFOOD BASED DISHES (EFSA FOODEX2) [A03XJ]

**AI** The group includes any type of Seafood salad. More detailed information on the characterising ingredients can be added with additional facet descriptors. The part consumed/analysed is by default the whole marketed unit or a homogeneous representative portion. [[https://en.wikipedia.org/wiki/Seafood\\_salad](https://en.wikipedia.org/wiki/Seafood_salad)] and [[https://www.google.co.uk/search?tbm=isch&q=Seafood salad -fish](https://www.google.co.uk/search?tbm=isch&q=Seafood+salad+-fish)]

#### **38660 - PREPARED FISH SALAD (EFSA FOODEX2)**

**FTC** A03XP

**BT** 38610 - FISH AND SEAFOOD BASED DISHES (EFSA FOODEX2) [A03XJ]

**AI** The group includes any type of Prepared fish salad. More detailed information on the characterising ingredients can be added with additional facet descriptors. The part consumed/analysed is by default the whole marketed unit or a homogeneous representative portion. [[https://en.wikipedia.org/wiki/List\\_of\\_fish\\_dishes](https://en.wikipedia.org/wiki/List_of_fish_dishes)] and [[https://www.google.co.uk/search?tbm=isch&q=Prepared fish salad](https://www.google.co.uk/search?tbm=isch&q=Prepared+fish+salad)]

#### **38670 - FISH AND POTATOES MEAL (EFSA FOODEX2)**

**FTC** A03XQ

**BT** 38610 - FISH AND SEAFOOD BASED DISHES (EFSA FOODEX2) [A03XJ]

**AI** The group includes any type of composite dish based on fish and potatoes. The part consumed/analysed is by default the whole marketed unit or a homogeneous representative portion. [[https://en.wikipedia.org/wiki/List\\_of\\_fish\\_dishes](https://en.wikipedia.org/wiki/List_of_fish_dishes)] and [[https://www.google.co.uk/search?tbm=isch&q=Fish and potatoes](https://www.google.co.uk/search?tbm=isch&q=Fish+and+potatoes)]

#### **38680 - FISH AND RICE MEAL (EFSA FOODEX2)**

**FTC** A03XR

**BT** 38610 - FISH AND SEAFOOD BASED DISHES (EFSA FOODEX2) [A03XJ]

FTC A16GF

BT 39730 - RICE BASED DISHES, COOKED (EFSA FOODEX2) [A040Z]

UF sushi based on fish, rice and vegetables

AI The group includes any type of Rice, fish (and/or seafood) and vegetable based dishes. For example Sushi based on fish, rice and vegetables is included in this group. More detailed information on the characterising ingredients can be added with additional facet descriptors. The part consumed/analysed is by default the whole marketed unit or a homogeneous representative portion. [[https://en.wikipedia.org/wiki/List\\_of\\_rice\\_dishes](https://en.wikipedia.org/wiki/List_of_rice_dishes)] and [<https://www.google.co.uk/search?tbm=isch&q=Rice, fish and vegetable dish>]

### 39770 - PAELLA (EFSA FOODEX2)

FTC A041D

BT 39730 - RICE BASED DISHES, COOKED (EFSA FOODEX2) [A040Z]

AI The group includes any type of paella. There are three widely known types of paella: Valencian paella (Spanish: paella valenciana), seafood paella (Spanish: paella de marisco) and mixed paella (Spanish: paella mixta), but there are many others as well. Valencian paella consists of white rice, green vegetables, meat (rabbit, chicken, duck), land snails, beans and seasoning. Seafood paella replaces meat and snails with seafood and omits beans and green vegetables. Mixed paella is a free-style combination of meat, seafood, vegetables, and sometimes beans. More detailed information on the characterising ingredients can be added with additional facet descriptors. The part consumed/analysed is by default the whole marketed unit or a homogeneous representative portion. **BT** 44290 - OTHER REGULATED ADDITIVES (EFSA FOODEX2) [A04QR]  
**AI** The group includes any type of Bulking agent, i.e. substances which contribute to the volume of a foodstuff without contributing significantly to its available energy value. The part consumed/analysed is by default the whole marketed unit or a homogeneous representative portion.[[https://en.wikipedia.org/wiki/Food\\_additives](https://en.wikipedia.org/wiki/Food_additives)]

**44430 - PROPELLENT GAS (EFSA FOODEX2)**

- FTC** A048N  
**BT** 44290 - OTHER REGULATED ADDITIVES (EFSA FOODEX2) [A04QR]  
**AI** The group includes any type of Propellant gas, i.e. gases other than air which expel a foodstuff from a container. The part consumed/analysed is by default the whole marketed unit or a homogeneous representative portion.

**44440 - MISCELLANEOUS AGENTS FOR FOOD PROCESSING (EFSA FOODEX2)**

- FTC** A048P  
**BT** 41530 - MAJOR ISOLATED INGREDIENTS, ADDITIVES, FLAVOURS, BAKING AND PROCESSING AIDS (EFSA FOODEX2) [A046L]  
**AI** The group includes any type of Miscellaneous agents for food processing. Different types of agents are considered in this group. The part consumed/analysed is by default the whole marketed unit or a homogeneous representative portion.

**44450 - HOME-PREPARATION AIDS (EFSA FOODEX2)**

- FTC** A04QQ  
**BT** 44440 - MISCELLANEOUS AGENTS FOR FOOD PROCESSING (EFSA FOODEX2) [A048P]  
**AI** The group includes any type of baking and artisanal-preparation aids. In particular, those preparations used for home-made food. The part consumed/analysed is by default the whole marketed unit or a homogeneous representative portion.

**44460 - PREPARATIONS FOR RAISING AND FLAVOURING HOME-MADE BAKERY (EFSA FOODEX2)**

- FTC** A048Q  
**BT** 44450 - HOME-PREPARATION AIDS (EFSA FOODEX2) [A04QQ]  
**UF** baking powder  
**AI** The group includes any type of Preparations for raising and flavouring bakery products, used in home-made bakery. The part consumed/analysed is by default the whole marketed unit or a homogeneous representative portion.[<https://www.google.co.uk/search?tbm=isch&q=raising+agents+and+flavouring+agents+bakery>]

**44470 - PREPARATIONS FOR GELLING HOME-MADE FOOD (EFSA FOODEX2)**

- FTC** A048R  
**BT** 44450 - HOME-PREPARATION AIDS (EFSA FOODEX2) [A04QQ]  
**AI** The group includes any type of Preparations for gelling home-made food, like marmalades / jams, puddings. The part consumed/analysed is by default the whole marketed unit or a homogeneous representative portion.

**44480 - PREPARATIONS FOR PICKLING VEGETABLES (EFSA FOODEX2)**

- FTC** A048S  
**BT** 44450 - HOME-PREPARATION AIDS (EFSA FOODEX2) [A04QQ]  
**AI** The group includes any type of Preparation used for pickling vegetables. The part consumed/analysed is by default the whole marketed unit or a homogeneous representative portion.

**44490 - PREPARATIONS FOR FOOD FLAVOURING (EFSA FOODEX2)**

- FTC** A0F3T

- BT** 44450 - HOME-PREPARATION AIDS (EFSA FOODX2) [A04QQ]  
**AI** The group includes any type of Preparations for food flavouring, i.e. compositions with essencers and/or flavours for flavouring home-made food. The part consumed/analysed is by default the whole marketed unit or a homogeneous representative portion.

**44500 - PREPARATIONS FOR DESSERT (EFSA FOODX2)**

- FTC** A16GC  
**BT** 44450 - HOME-PREPARATION AIDS (EFSA FOODX2) [A04QQ]  
**AI** The group includes any type of powder mix for making desserts, including dessert sauces. The part consumed/analysed is by default the whole marketed unit or a homogeneous representative portion.

**44510 - PROCESSING AIDS (EFSA FOODX2)**

- FTC** A048T  
**BT** 44440 - MISCELLANEOUS AGENTS FOR FOOD PROCESSING (EFSA FOODX2) [A048P]  
**AI** The group includes any type of Processing aids, i.e. substances intentionally used to process raw materials that are not present or are present at only insignificant levels in the finished food. The part consumed/analysed is by default the whole marketed unit or a homogeneous representative portion.

**44520 - ENZYMES FOR FOOD MANUFACTURE (EFSA FOODX2)**

- FTC** A048V  
**BT** 44440 - MISCELLANEOUS AGENTS FOR FOOD PROCESSING (EFSA FOODX2) [A048P]  
**AI** The group includes any type of Enzymes used for food manufacture. The part consumed/analysed is by default the whole marketed unit or a homogeneous representative portion. [<https://en.wikipedia.org/wiki/Enzyme>]

**44530 - LIVE MICROORGANISMS FOR FOOD PRODUCTION (EFSA FOODX2)**

- FTC** A048X  
**BT** 44440 - MISCELLANEOUS AGENTS FOR FOOD PROCESSING (EFSA FOODX2) [A048P]  
**UF** rpcs of microbiological origin  
**AI** The group includes any type of Microorganisms used in food production. The part consumed/analysed is by default the whole marketed unit or a homogeneous representative portion. [[https://en.wikipedia.org/wiki/Microbial\\_food\\_cultures](https://en.wikipedia.org/wiki/Microbial_food_cultures)]

**44540 - STARTER CULTURES (EFSA FOODX2)**

- FTC** A048Y  
**BT** 44530 - LIVE MICROORGANISMS FOR FOOD PRODUCTION (EFSA FOODX2) [A048X]  
**AI** The group includes any type of bacteria used as starter cultures, i.e. a microbial preparation based on bacteria used in food production intentionally inoculated in a raw material to initiate and carry out fermentations. For example, starter cultures are used in meat and dairy technology. The part consumed/analysed is by default the whole marketed unit or a homogeneous representative portion. [[https://en.wikipedia.org/wiki/Starter\\_cultures](https://en.wikipedia.org/wiki/Starter_cultures)] and [[https://www.google.co.uk/search?tbm=isch&q=Starter\\_cultures](https://www.google.co.uk/search?tbm=isch&q=Starter_cultures)]

**44550 - YEAST CULTURES (EFSA FOODX2)**

- FTC** A048Z  
**BT** 44530 - LIVE MICROORGANISMS FOR FOOD PRODUCTION (EFSA FOODX2) [A048X]  
**AI** The group includes any type of Yeast cultures used in food production, for example in brewing and breadmaking. The part consumed/analysed is by default the whole marketed unit or a homogeneous representative portion. [<https://en.wikipedia.org/wiki/Yeast>] and [[https://www.google.co.uk/search?tbm=isch&q=Yeast\\_cultures\\_for\\_making\\_food](https://www.google.co.uk/search?tbm=isch&q=Yeast_cultures_for_making_food)]

**44560 - BAKING YEAST (EFSA FOODX2)**

- FTC** A049A  
**BT** 44550 - YEAST CULTURES (EFSA FOODX2) [A048Z]  
**AI** The group includes any type of Yeast used in Bakery Product Manufacturing. The part consumed/analysed is by default the whole marketed unit or a homogeneous representative portion. [[https://en.wikipedia.org/wiki/Baking\\_yeast](https://en.wikipedia.org/wiki/Baking_yeast)] and [[https://www.google.co.uk/search?tbm=isch&q=Baking\\_yeast](https://www.google.co.uk/search?tbm=isch&q=Baking_yeast)]

**44570 - SOURDOUGH STARTER (EFSA FOODX2)**

- FTC** A05QQ  
**BT** 44550 - YEAST CULTURES (EFSA FOODX2) [A048Z]  
**AI** The group includes any type of Sourdough starter, i.e. special mixture of yeasts and bacteria (usually Lactobacilli) for the 'natural' fermentation of bakery products, in primis bread] and [[https://en.wikipedia.org/wiki/Sourdough\\_starter](https://en.wikipedia.org/wiki/Sourdough_starter)] and [[https://www.google.co.uk/search?tbm=isch&q=Sourdough\\_starter](https://www.google.co.uk/search?tbm=isch&q=Sourdough_starter)]

**44580 - MOULD OR MICRO-FUNGAL CULTURES (EFSA FOODEX2)**

- FTC** A049B  
**BT** 44530 - LIVE MICROORGANISMS FOR FOOD PRODUCTION (EFSA FOODEX2) [A048X]  
**AI** The group includes any type of Mould cultures used in food production, for example in blue cheese. The part consumed/analysed is by default the whole marketed unit or a homogeneous representative portion.[<https://en.wikipedia.org/wiki/Mold>]

**44590 - PROBIOTIC CULTURES (EFSA FOODEX2)**

- FTC** A16FP  
**BT** 44530 - LIVE MICROORGANISMS FOR FOOD PRODUCTION (EFSA FOODEX2) [A048X]  
**AI** The group includes any type of probiotic cultures, i.e. Microbial cultures with beneficial effects on the consumers.[<https://en.wikipedia.org/wiki/Probiotic>] and [[https://www.google.co.uk/search?tbm=isch&q=Probiotic cultures](https://www.google.co.uk/search?tbm=isch&q=Probiotic+cultures)]

**44600 - EDIBLE CASINGS (EFSA FOODEX2)**

- FTC** A0F1J  
**BT** 44440 - MISCELLANEOUS AGENTS FOR FOOD PROCESSING (EFSA FOODEX2) [A048P]  
**UF** edible wrappers for sushi  
**UF** sausage casing  
**AI** The group includes the edible external layers containing sausages and similar comminuted meat products. Paper-like edible wrappers for sushi and similar are also included in this group. The part consumed/analysed is by default the whole or a portion of it representing the observed heterogeneity.[[https://en.wikipedia.org/wiki/Casing\\_\(sausage\)](https://en.wikipedia.org/wiki/Casing_(sausage))] and [[https://www.google.co.uk/search?tbm=isch&q=Edible Casing](https://www.google.co.uk/search?tbm=isch&q=Edible+Casing)]

**44610 - OTHER INGREDIENTS (EFSA FOODEX2)**

- FTC** A0F0S  
**BT** EFSA FOOD CLASSIFICATION AND DESCRIPTION SYSTEM FOR EXPOSURE ASSESSMENT (EFSA FOODEX2) [A1895]  
**AI** Chemical, synthetic or highly purified ingredients

**44620 - ARTIFICIAL SWEETENERS (E.G., ASPARTAM, SACCHARINE) (EFSA FOODEX2)**

- FTC** A046M  
**BT** 44610 - OTHER INGREDIENTS (EFSA FOODEX2) [A0F0S]  
**AI** The group includes any type of Artificial sweeteners, i.e. food additives used to impart a sweet taste in foodstuffs (e.g., aspartam, saccharine). The part consumed/analysed is by default the whole marketed unit or a homogeneous representative portion.[[https://en.wikipedia.org/wiki/Artificial\\_sweeteners\\_](https://en.wikipedia.org/wiki/Artificial_sweeteners_)] and [[https://www.google.co.uk/search?tbm=isch&q=Artificial sweeteners](https://www.google.co.uk/search?tbm=isch&q=Artificial+sweeteners)]

**44630 - SACCHARINE (EFSA FOODEX2)**

- FTC** A046N  
**BT** 44620 - ARTIFICIAL SWEETENERS (E.G., ASPARTAM, SACCHARINE) (EFSA FOODEX2) [A046M]  
**AI** The group includes any type of Saccharine. The part consumed/analysed is by default the whole marketed unit or a homogeneous representative portion.[<https://en.wikipedia.org/wiki/Saccharine>] and [[https://www.google.co.uk/search?tbm=isch&q=Saccharin sweetener](https://www.google.co.uk/search?tbm=isch&q=Saccharin+sweetener)]

**44640 - ASPARTAME (EFSA FOODEX2)**

- FTC** A046P  
**BT** 44620 - ARTIFICIAL SWEETENERS (E.G., ASPARTAM, SACCHARINE) (EFSA FOODEX2) [A046M]  
**AI** The group includes any type of Aspartame. The part consumed/analysed is by default the whole marketed unit or a homogeneous representative portion.[<https://en.wikipedia.org/wiki/Aspartame>] and [[https://www.google.co.uk/search?tbm=isch&q=Aspartame sweetener](https://www.google.co.uk/search?tbm=isch&q=Aspartame+sweetener)]

**44650 - ACESULFAME K (EFSA FOODEX2)**

- FTC** A046Q  
**BT** 44620 - ARTIFICIAL SWEETENERS (E.G., ASPARTAM, SACCHARINE) (EFSA FOODEX2) [A046M]  
**AI** The group includes any type of Acesulfame K. The part consumed/analysed is by default the whole marketed unit or a homogeneous representative portion.[<https://en.wikipedia.org/wiki/Acesulfame>] and [[https://www.google.co.uk/search?tbm=isch&q=Acesulfame k sweetener](https://www.google.co.uk/search?tbm=isch&q=Acesulfame+k+sweetener)]

**44660 - SUCRALOSE (EFSA FOODEX2)**

- FTC** A046R  
**BT** 44620 - ARTIFICIAL SWEETENERS (E.G., ASPARTAM, SACCHARINE) (EFSA FOODEX2) [A046M]

**AI** The group includes any type of Sucralose. The part consumed/analysed is by default the whole marketed unit or a homogeneous representative portion.[<https://en.wikipedia.org/wiki/Sucralose>] and [[https://www.google.co.uk/search?tbm=isch&q=Sucralose sweetener](https://www.google.co.uk/search?tbm=isch&q=Sucralose+sweetener)]

**44670 - CYCLAMATE (EFSA FODDEX2)**

**FTC** A046S

**BT** 44620 - ARTIFICIAL SWEETENERS (E.G., ASPARTAM, SACCHARINE) (EFSA FODDEX2) [A046M]

**AI** The group includes any type of Cyclamate. The part consumed/analysed is by default the whole marketed unit or a homogeneous representative portion.[<https://en.wikipedia.org/wiki/Cyclamate>] and [[https://www.google.co.uk/search?tbm=isch&q=Cyclamate sweetener](https://www.google.co.uk/search?tbm=isch&q=Cyclamate+sweetener)]

**44680 - NEO-HESPERIDINE (EFSA FODDEX2)**

**FTC** A046T

**BT** 44620 - ARTIFICIAL SWEETENERS (E.G., ASPARTAM, SACCHARINE) (EFSA FODDEX2) [A046M]

**AI** The group includes any type of Neo-hesperidine. The part consumed/analysed is by default the whole marketed unit or a homogeneous representative portion.[[https://en.wikipedia.org/wiki/Neohesperidin\\_dihydrochalcone](https://en.wikipedia.org/wiki/Neohesperidin_dihydrochalcone)] and [[https://www.google.co.uk/search?tbm=isch&q=Neohesperidine sweetener](https://www.google.co.uk/search?tbm=isch&q=Neohesperidine+sweetener)]

**44690 - THAUMATINE (EFSA FODDEX2)**

**FTC** A046V

**BT** 44620 - ARTIFICIAL SWEETENERS (E.G., ASPARTAM, SACCHARINE) (EFSA FODDEX2) [A046M]

**AI** The group includes any type of Thaumatine. The part consumed/analysed is by default the whole marketed unit or a homogeneous representative portion.[[https://en.wikipedia.org/wiki/Thaumatococcus\\_coccini](https://en.wikipedia.org/wiki/Thaumatococcus_coccini)] and [<https://www.google.co.uk/search?tbm=isch&q=Thaumatococcus+coccini+sweetener>]

**44700 - NEOTAME (EFSA FODDEX2)**

**FTC** A046X

**BT** 44620 - ARTIFICIAL SWEETENERS (E.G., ASPARTAM, SACCHARINE) (EFSA FODDEX2) [A046M]

**AI** The group includes any type of Neotame. The part consumed/analysed is by default the whole marketed unit or a homogeneous representative portion.[<https://en.wikipedia.org/wiki/Neotame>] and [[https://www.google.co.uk/search?tbm=isch&q=Neotame sweetener](https://www.google.co.uk/search?tbm=isch&q=Neotame+sweetener)]

**44710 - STEVIOL GLUCOSIDE (EFSA FODDEX2)**

**FTC** A046Y

**BT** 44620 - ARTIFICIAL SWEETENERS (E.G., ASPARTAM, SACCHARINE) (EFSA FODDEX2) [A046M]

**UF** stevia

**AI** The group includes any type of Steviol glucoside (extracted from Stevia plant). The part consumed/analysed is by default the whole marketed unit or a homogeneous representative portion.[<https://en.wikipedia.org/wiki/Stevia>] and [[https://www.google.co.uk/search?tbm=isch&q=Steviol sweetener](https://www.google.co.uk/search?tbm=isch&q=Steviol+sweetener)]

**44720 - ADVANTAME (EFSA FODDEX2)**

**FTC** A046Z

**BT** 44620 - ARTIFICIAL SWEETENERS (E.G., ASPARTAM, SACCHARINE) (EFSA FODDEX2) [A046M]

**AI** The group includes any type of Advantame. The part consumed/analysed is by default the whole marketed unit or a homogeneous representative portion.[<https://en.wikipedia.org/wiki/Advantame>] and [[https://www.google.co.uk/search?tbm=isch&q=Advantame sweetener](https://www.google.co.uk/search?tbm=isch&q=Advantame+sweetener)]

**44730 - VITAMINS (EFSA FODDEX2)**

**FTC** A0E0G

**BT** 44610 - OTHER INGREDIENTS (EFSA FODDEX2) [A0F0S]

**AI** The group includes Vitamins, either single or in compositions, used for fortification or enrichment of foods. The part consumed/analysed is by default the whole marketed unit or a homogeneous representative portion.[<https://en.wikipedia.org/wiki/Vitamin>]

**44740 - VITAMIN A (RETINOL, CAROTENOIDS) (EFSA FODDEX2)**

**FTC** A0EXZ

**BT** 44730 - VITAMINS (EFSA FODDEX2) [A0E0G]

**AI** The group includes Vitamin A used for fortification or enrichment of foods. Vitamin A is a group of unsaturated nutritional organic compounds, that includes retinol, retinal, retinoic acid, and several provitamin A carotenoids, among which beta-carotene is the most important] and [[https://en.wikipedia.org/wiki/Vitamin\\_A](https://en.wikipedia.org/wiki/Vitamin_A)]

**44750 - VITAMIN B1 (THIAMINE) (EFSA FODDEX2)**

**FTC** A0EXY

**BT** 44730 - VITAMINS (EFSA FODDEX2) [A0E0G]

**AI** The group includes Vitamin B1 used for fortification or enrichment of foods. Thiamine or thiamin or vitamin B1, named as the "thio-vitamine" ("sulfur-containing vitamin") is a water-soluble vitamin of the B complex.[[https://en.wikipedia.org/wiki/Vitamin\\_B1](https://en.wikipedia.org/wiki/Vitamin_B1)]

**44760 - VITAMIN B2 (RIBOFLAVIN) (EFSA FOODEX2)**

**FTC** A0EXX

**BT** 44730 - VITAMINS (EFSA FOODEX2) [A0EVBG]

**AI** The group includes Vitamin B2 used for fortification or enrichment of foods. Riboflavin, also known as vitamin B2, is the vitamin formerly known as G. It is an easily absorbed colored micronutrient with a key role in maintaining health in humans and other animals. Riboflavin is the central component of the cofactors FAD and FMN, and is therefore required by all flavoproteins] and [[https://en.wikipedia.org/wiki/Vitamin\\_B2](https://en.wikipedia.org/wiki/Vitamin_B2)]

**44770 - VITAMIN B3 (NIACIN, NIACINAMIDE) (EFSA FOODEX2)**

**FTC** A0EXV

**BT** 44730 - VITAMINS (EFSA FOODEX2) [A0EVBG]

**AI** The group includes Vitamin B3 used for fortification or enrichment of foods. Niacin (also known as vitamin B3 and nicotinic acid) is an organic compound with the formula C<sub>6</sub>H<sub>5</sub>NO<sub>2</sub> and is one of the essential human nutrients] and [[https://en.wikipedia.org/wiki/Vitamin\\_B3](https://en.wikipedia.org/wiki/Vitamin_B3)]

**44780 - VITAMIN B5 (PANTOTHENIC ACID) (EFSA FOODEX2)**

**FTC** A0EXT

**BT** 44730 - VITAMINS (EFSA FOODEX2) [A0EVBG]

**AI** The group includes Vitamin B5 used for fortification or enrichment of foods. Pantothenic acid, also called pantothenate or vitamin B5 (a B vitamin), is a water-soluble vitamin. For many animals, pantothenic acid is an essential nutrient] and [[https://en.wikipedia.org/wiki/Vitamin\\_B5](https://en.wikipedia.org/wiki/Vitamin_B5)]

**44790 - VITAMIN B6 (PYRIDOXINE, PYRIDOXAMINE, PYRIDOXAL) (EFSA FOODEX2)**

**FTC** A0EXS

**BT** 44730 - VITAMINS (EFSA FOODEX2) [A0EVBG]

**AI** The group includes Vitamin B6 used for fortification or enrichment of foods. Vitamin B6 is a water-soluble vitamin and is part of the vitamin B complex group. Several forms of the vitamin are known, but pyridoxal phosphate (PLP) is the active form and is a cofactor in many reactions of amino acid metabolism, including transamination, deamination, and decarboxylation. PLP also is necessary for the enzymatic reaction governing the release of glucose from glycogen] and [[https://en.wikipedia.org/wiki/Vitamin\\_B6](https://en.wikipedia.org/wiki/Vitamin_B6)]

**44800 - VITAMIN B7 (BIOTIN) (EFSA FOODEX2)**

**FTC** A0EXR

**BT** 44730 - VITAMINS (EFSA FOODEX2) [A0EVBG]

**AI** The group includes Vitamin B7 used for fortification or enrichment of foods. Biotin, also known as vitamin H or coenzyme R, is a water-soluble B-vitamin (vitamin B7)] and [[https://en.wikipedia.org/wiki/Vitamin\\_B7](https://en.wikipedia.org/wiki/Vitamin_B7)]

**44810 - VITAMIN B9 (FOLIC ACID, FOLINIC ACID) (EFSA FOODEX2)**

**FTC** A0EXQ

**BT** 44730 - VITAMINS (EFSA FOODEX2) [A0EVBG]

**AI** The group includes Vitamin B9 used for fortification or enrichment of foods. Folic acid (also known as vitamin M, vitamin B9, vitamin Bc or folacin, pteroyl-L-glutamic acid, and pteroyl-L-glutamate) is a form of the water-soluble vitamin B9. Folate is a naturally occurring form of the vitamin, found in food, while folic acid is synthetically produced, and used in fortified foods and supplements] and [[https://en.wikipedia.org/wiki/Vitamin\\_B9](https://en.wikipedia.org/wiki/Vitamin_B9)]

**44820 - VITAMIN B12 (CYANOCOBALAMIN, HYDROXOCOBALAMIN, METHYLCOBALAMIN) (EFSA FOODEX2)**

**FTC** A0EXP

**BT** 44730 - VITAMINS (EFSA FOODEX2) [A0EVBG]

**AI** The group includes Vitamin B12 used for fortification or enrichment of foods. Vitamin B-12, also called cobalamin (cyanocobalamin, hydroxocobalamin, methylcobalamin), is a water-soluble vitamin with a key role in the normal functioning of the brain and nervous system, and for the formation of blood] and [[https://en.wikipedia.org/wiki/Vitamin\\_B12](https://en.wikipedia.org/wiki/Vitamin_B12)]

**44830 - VITAMIN C (ASCORBIC ACID) (EFSA FOODEX2)**

**FTC** A0EXN

**BT** 44730 - VITAMINS (EFSA FOODEX2) [A0EVBG]

**AI** The group includes Vitamin C used for fortification or enrichment of foods. Vitamin C or L-ascorbic acid, or simply ascorbate (the anion of ascorbic acid), is an essential nutrient for humans and certain other animal species] and [[https://en.wikipedia.org/wiki/Vitamin\\_C](https://en.wikipedia.org/wiki/Vitamin_C)]

**44840 - VITAMIN D (CHOLECALCIFEROL) (EFSA FODDEX2)**

FTC A0EXM

BT 44730 - VITAMINS (EFSA FODDEX2) [A0EVG]

AI The group includes Vitamin D used for fortification or enrichment of foods. Vitamin D refers to a group of fat-soluble secosteroids responsible for enhancing intestinal absorption of calcium, iron, magnesium, phosphate and zinc] and [[https://en.wikipedia.org/wiki/Vitamin\\_D\\_](https://en.wikipedia.org/wiki/Vitamin_D_)]**44850 - VITAMIN E (TOCOPHEROLS, TOCOTRIENOLS) (EFSA FODDEX2)**

FTC A0EXL

BT 44730 - VITAMINS (EFSA FODDEX2) [A0EVG]

AI The group includes Vitamin E used for fortification or enrichment of foods. Vitamin E refers to a group of ten lipid-soluble compounds that include both tocopherols and tocotrienols] and [[https://en.wikipedia.org/wiki/Vitamin\\_E\\_](https://en.wikipedia.org/wiki/Vitamin_E_)]**44860 - VITAMIN K (PHYLLOQUINONE, MENAQUINONES) (EFSA FODDEX2)**

FTC A0EXK

BT 44730 - VITAMINS (EFSA FODDEX2) [A0EVG]

AI The group includes Vitamin K used for fortification or enrichment of foods. Vitamin K is a group of structurally similar, fat-soluble vitamins that the human body needs for modification of certain proteins that are required for blood coagulation, and in bone and other tissue] and [[https://en.wikipedia.org/wiki/Vitamin\\_K\\_](https://en.wikipedia.org/wiki/Vitamin_K_)]**44870 - CHEMICAL ELEMENTS (EFSA FODDEX2)**

FTC A0EVF

- FTC** A0EVX  
**BT** 44870 - CHEMICAL ELEMENTS (EFSA FODDEX2) [A0EVF]  
**AI** The group includes Bromine used for enrichment or fortification of food. Bromine is a chemical element with the symbol Br and atomic number of 35] and [<https://en.wikipedia.org/wiki/Bromine>]

**45010 - CHROMIUM (EFSA FODDEX2)**

- FTC** A16YP  
**BT** 44870 - CHEMICAL ELEMENTS (EFSA FODDEX2) [A0EVF]  
**AI** The group includes Chromium used for enrichment or fortification of food. Chromium is a Group 6 chemical element with the symbol Cr and atomic number 24] and [<https://en.wikipedia.org/wiki/Chromium>]

**45020 - SPECIAL FATTY ACIDS (EFSA FODDEX2)**

- FTC** A0EVS  
**BT** 44610 - OTHER INGREDIENTS (EFSA FODDEX2) [A0F0S]  
**AI** The group includes Special fatty acids used as fortifying agents. The part consumed/analysed is by default the whole marketed unit or a homogeneous representative portion.[[https://en.wikipedia.org/wiki/Essential\\_fatty\\_acids](https://en.wikipedia.org/wiki/Essential_fatty_acids)]

**45030 - OMEGA-3 FATTY ACIDS (EFSA FODDEX2)**

- FTC** A0EVV  
**BT** 45020 - SPECIAL FATTY ACIDS (EFSA FODDEX2) [A0EVS]  
**UF** n-3 fatty acids  
**AI** The group includes Omega-3 fatty acids used as fortifying agents. Omega-3 fatty acids (also called n-3 fatty acids are polyunsaturated fatty acids (PUFAs) with a double bond (C=C) at the third carbon atom from the end of the carbon chain. The part consumed/analysed is by default the whole or a portion of it representing the observed heterogeneity. ] and [[https://en.wikipedia.org/wiki/Omega-3\\_fatty\\_acid](https://en.wikipedia.org/wiki/Omega-3_fatty_acid)]

**45040 - OMEGA-6 FATTY ACIDS (EFSA FODDEX2)**

- FTC A0EVT  
 BT 45020 - SPECIAL FATTY ACIDS (EFSA FODDEX2) [A0EVS]  
 UF n-6 fatty acids  
 AI The group includes Omega-6 fatty acids used as fortifying agents. Omega-6 fatty acids (also referred to as n-6 fatty acids) are a family of polyunsaturated fatty acids that have in common a final carbon-carbon double bond in the n-6 position, that is, the sixth bond, counting from the methyl end. The part consumed/analysed is by default the whole or a portion of it representing the observed heterogeneity. ] and [[https://en.wikipedia.org/wiki/Omega-6\\_fatty\\_acid](https://en.wikipedia.org/wiki/Omega-6_fatty_acid)]

**45050 - DIETARY FIBRE (EFSA FODDEX2)**

- FTC A0EVR  
 BT 44610 - OTHER INGREDIENTS (EFSA FODDEX2) [A0F0S]  
 AI Fortifying agents containing considerable amounts of dietary fiber. The part consumed/analysed is by default the whole or a portion of it representing the observed heterogeneity. ] and [[https://en.wikipedia.org/wiki/Dietary\\_fibre](https://en.wikipedia.org/wiki/Dietary_fibre)]

**45060 - PHYTOCHEMICALS (EFSA FODDEX2)**

- FTC A0EVM  
 BT 44610 - OTHER INGREDIENTS (EFSA FODDEX2) [A0F0S]  
 AI The group includes Phytochemicals used as fortifying agents. They are produced from herbs or extracted from vegetables. The part consumed/analysed is by default the whole marketed unit or a homogeneous representative portion. ] and [<https://en.wikipedia.org/wiki/Phytochemicals>]

**45070 - PHYTOSTEROLS (EFSA FODDEX2)**

- FTC A0EVQ  
 BT 45060 - PHYTOCHEMICALS (EFSA FODDEX2) [A0EVM]  
 AI The group includes Phytosterols, which encompass plant sterols and stanols, used as fortifying agents. They are steroid compounds similar to cholesterol which occur in plants and vary only in carbon side chains and/or presence or absence of a double bond. The part consumed/analysed is by default the whole or a portion of it representing the observed heterogeneity. ] and [<https://en.wikipedia.org/wiki/Phytosterols>]

**45080 - POLYPHENOLS (EFSA FODDEX2)**

- FTC A0EVP  
 BT 45060 - PHYTOCHEMICALS (EFSA FODDEX2) [A0EVM]  
 AI The group includes Polyphenols used as fortifying agents. They are a structural class of mainly natural, but also synthetic or semisynthetic, organic chemicals characterized by the presence of large multiples of phenol structural units. The part consumed/analysed is by default the whole or a portion of it representing the observed heterogeneity. ] and [<https://en.wikipedia.org/wiki/Polyphenols>]

**45090 - CAROTENOIDS (EFSA FODDEX2)**

- FTC A0EVN  
 BT 45060 - PHYTOCHEMICALS (EFSA FODDEX2) [A0EVM]  
 UF lutein  
 AI The group includes Carotenoids, such as Lutein, used as fortifying agents. They are organic pigments that are found in the chloroplasts and chromoplasts of plants and some other photosynthetic organisms, including some bacteria and some fungi. The part consumed/analysed is by default the whole or a portion of it representing the observed heterogeneity. ] and [<https://en.wikipedia.org/wiki/Carotenoids>]

**45100 - ALGAE BASED FORTIFYING AGENTS (E.G. SPIRULINA, CHLORELLA) (EFSA FODDEX2)**

- FTC A0EVL  
 BT 44610 - OTHER INGREDIENTS (EFSA FODDEX2) [A0F0S]  
 AI The group includes fortifying agents based on or containing algae (e.g. Spirulina, chlorella). The part consumed/analysed is by default the whole or a portion of it representing the observed heterogeneity. ] and [[https://www.google.co.uk/search?tbm=isch&q=Algae based fortifying agents \(e.g. Spirulina, chlorella\)](https://www.google.co.uk/search?tbm=isch&q=Algae+based+fortifying+agents+(e.g.+Spirulina,+chlorella))]

**45110 - CAFFEINE (EFSA FODDEX2)**

- FTC A0EVK  
 BT 44610 - OTHER INGREDIENTS (EFSA FODDEX2) [A0F0S]  
 AI The group includes Caffeine used as ingredient in e.g. energy drinks, soft drinks and food supplements. The part consumed/analysed is by default the whole or a portion of it representing the observed heterogeneity. ] and [<https://en.wikipedia.org/wiki/Caffeine>]

**45120 - TAURINE (EFSA FODDEX2)**

- FTC A16GT  
 BT 44610 - OTHER INGREDIENTS (EFSA FODDEX2) [A0F0S]

**AI** The group includes taurine, an organic compound widely distributed in animal tissues, used as ingredient in e.g. energy drinks. The part consumed/analysed is by default the whole or a portion of it representing the observed heterogeneity. ] and [<https://en.wikipedia.org/wiki/Taurine>]

#### **45130 - GLUCOSAMINE (EFSA FOODEX2)**

**FTC** A16YQ

**BT** 44610 - OTHER INGREDIENTS (EFSA FOODEX2) [A0F0S]

**AI** Glucosamine (C<sub>6</sub>H<sub>13</sub>NO<sub>5</sub>) is an amino sugar and a precursor in the biochemical synthesis of glycosylated proteins and lipids. Glucosamine is commonly used as a food supplement to support the structure and function of joints.[<https://en.wikipedia.org/wiki/Glucosamine>]

#### **45140 - BEE-PRODUCED FORTIFYING AGENTS (EFSA FOODEX2)**

**FTC** A0EVH

**BT** 44610 - OTHER INGREDIENTS (EFSA FOODEX2) [A0F0S]

**AI** The group includes fortifying agents produced by honey bees. The part consumed/analysed is by default the whole marketed unit or a homogeneous representative portion.

#### **45150 - POLLEN (RESIDUES OF VEGETAL POLLENS) (EFSA FOODEX2)**

**FTC** A0CVH

**BT** 45140 - BEE-PRODUCED FORTIFYING AGENTS (EFSA FOODEX2) [A0EVH]

**AI** The group includes Pollen (residues of vegetal pollens) as defined in EU pesticide regulation. The part consumed/analysed is not specified. When relevant, information on the part consumed/analysed has to be reported with additional facet descriptors. In case of data collections related to legislations, the default part consumed/analysed is the one defined in the applicable legislation.[[https://en.wikipedia.org/wiki/Bee\\_pollen](https://en.wikipedia.org/wiki/Bee_pollen)] and [<https://www.google.co.uk/search?tbm=isch&q=edible+bee+pollen>]

#### **45160 - ROYAL JELLY (EFSA FOODEX2)**

**FTC** A0CVG

**BT** 45140 - BEE-PRODUCED FORTIFYING AGENTS (EFSA FOODEX2) [A0EVH]

**AI** The group includes Royal jelly as defined in EU pesticide regulation. The part consumed/analysed is not specified. When relevant, information on the part consumed/analysed has to be reported with additional facet descriptors. In case of data collections related to legislations, the default part consumed/analysed is the one defined in the applicable legislation.[[https://en.wikipedia.org/wiki/Royal\\_jelly](https://en.wikipedia.org/wiki/Royal_jelly)] and [<https://www.google.co.uk/search?tbm=isch&q=Royal+jelly+edible>]

#### **45170 - OTHER EDIBLE APICULTURE PRODUCTS (EFSA FOODEX2)**

**FTC** A0CVF

**BT** 45140 - BEE-PRODUCED FORTIFYING AGENTS (EFSA FOODEX2) [A0EVH]

**AI** The group includes edible apiculture products other than honey, pollen and royal jelly. It is a collective generic group referring to the pesticide grouping in EU pesticide regulation. The part consumed/analysed is not specified. When relevant, information on the part consumed/analysed has to be reported with additional facet descriptors. In case of data collections related to legislations, the default part consumed/analysed is the one defined in the applicable legislation.

#### **45180 - CO-FACTORS TO METABOLISM (EFSA FOODEX2)**

**FTC** A0F4M

**BT** 44610 - OTHER INGREDIENTS (EFSA FOODEX2) [A0F0S]

**AI** The group includes ingredients, used in fortified foods and dietary supplements, which influence the metabolism as co-factors. The part consumed/analysed is by default the whole or a portion of it representing the observed heterogeneity.

#### **45190 - CARNITINE (EFSA FOODEX2)**

**FTC** A0F4N

**BT** 45180 - CO-FACTORS TO METABOLISM (EFSA FOODEX2) [A0F4M]

**AI** The group includes Carnitine used in fortified foods and dietary supplements. Carnitine is a quaternary ammonium compound biosynthesized from the amino acids lysine and methionine. It is required for the transport of fatty acids from the intermembrane space in the mitochondria, into the mitochondrial matrix during the breakdown of lipids (fats) for the generation of metabolic energy. The part consumed/analysed is by default the whole or a portion of it representing the observed heterogeneity. ] and [<https://en.wikipedia.org/wiki/Carnitine>]

#### **45200 - ENZYMES FOR FORTIFICATION (EFSA FOODEX2)**

**FTC** A0EVJ

**BT** 45180 - CO-FACTORS TO METABOLISM (EFSA FOODEX2) [A0F4M]

**AI** The group includes Enzymes with biological roles, used in fortified foods and dietary supplements. The part consumed/analysed is by default the whole or a portion of it representing the observed heterogeneity.

**45210 - CREATINE-CREATININE (EFSA FOODEX2)**

FTC A0F4P

BT 45180 - CO-FACTORS TO METABOLISM (EFSA FOODEX2) [A0F4M]

AI The group includes Creatine-creatinine used in fortified foods and dietary supplements. Creatine is a nitrogenous organic acid that occurs naturally in vertebrates and helps to supply energy to all cells in the body, primarily muscle. This is achieved by increasing the formation of adenosine triphosphate (ATP). The part consumed/analysed is by default the whole or a portion of it representing the observed heterogeneity. ] and [<https://en.wikipedia.org/wiki/Creatinine>]

**45220 - OTHER EDIBLE INGREDIENTS FROM ANIMAL AND PLANT COMMODITIES (EFSA FOODEX2)**

FTC A16PP

BT 44610 - OTHER INGREDIENTS (EFSA FOODEX2) [A0F0S]

AI The category covers edible ingredient from animal and plant commodities not mentioned elsewhere.

**45230 - BIRD NEST (EDIBLE PART) (EFSA FOODEX2)**

FTC A16PQ

BT 45220 - OTHER EDIBLE INGREDIENTS FROM ANIMAL AND PLANT COMMODITIES (EFSA FOODEX2) [A16PP]

AI The group includes edible bird's nests harvested for human consumption. In the Asian cuisine bird nests are used as ingredient in soups and drinks (e.g. minuman sarang burung). The part consumed/analysed is not specified. When relevant, information on the part consumed/analysed has to be reported with additional facet descriptors. [[https://en.wikipedia.org/wiki/Edible\\_bird%27s\\_nest](https://en.wikipedia.org/wiki/Edible_bird%27s_nest)] and [] and [<https://www.google.co.uk/search?tbm=isch&q=Edible+bird%27s+nest>]

<DICTION>The flowering tree *Crateva religiosa* (syn *Crateva religiosa*, *Crateva adansonii*) is called the sacred garlic pear and temple plant, and many other names in a variety of dialects, including Balai Lamok, abiyuch, barna, varuna, and bidasi. The tree is sometimes called the spider tree because the showy flowers bear long, spidery stamens. It is native to Japan, Australia, much of Southeast Asia and several south Pacific islands. It is grown elsewhere for fruit, especially in parts of the African continent. The fruit of the tree is edible. <DICTION>The fruit is a large berry containing numerous small seeds; in most species, the fruit is edible. In particular, this genus is known for the species *Actinidia deliciosa*, the kiwifruit or Chinese gooseberry, and for the hardy ornamental *Actinidia kolomikta*.

Kiwifruit (often abbreviated as kiwi) or Chinese gooseberry is the edible berry of several species of woody vines in the genus *Actinidia*. The most common cultivar group of kiwifruit is oval, about the size of a large hen's egg. It has a fibrous, dull greenish-brown skin and bright green or golden flesh with rows of tiny, black, edible seeds.

The most common kiwifruit is the fuzzy kiwifruit, from the species *Actinidia deliciosa*. Other species that are commonly eaten include golden kiwifruit (*Actinidia chinensis*), Chinese egg gooseberry (*Actinidia coriacea*), hardy kiwifruit (*Actinidia arguta*), Arctic kiwifruit (*Actinidia kolomikta*), purple kiwifruit (*Actinidia melanandra*), silver vine (*Actinidia polygama*), hearty red kiwifruit (*Actinidia purpurea*).

<SCINAM>Salsola soda L. [PLANTS SASO3]  
<DICTION>Salsola soda, more commonly known in English as Opposite Leaved Saltwort, Oppositeleaf Russian Thistle, or Barilla Plant, is a small (to 0.7 m tall), annual, succulent shrub that is native to the Mediterranean Basin. It is a halophyte (a salt-tolerant plant) that typically grows in coastal regions and can be irrigated with salt water. The Italian name agretti is commonly used in English to refer to the edible leaves of Salsola soda. [http://en.wikipedia.org/wiki/Salsola\_soda]**AGRICULTURAL PRODUCTION ENVIRONMENT**

 <MANFELD>1655  
 <DICTION>:Angelica is a genus of about 60 species of tall biennial and perennial herbs in the family Apiaceae, native to temperate and subarctic regions of the Northern Hemisphere. Some species are grown as flavoring agents or for their medicinal properties. The most notable of these is garden angelica (A. archangelica), which is commonly known simply as angelica. Natives of Lapland use the fleshy roots as food and the stalks as medicine. Crystallized strips of young angelica stems and midribs are green in colour and are sold as decorative and flavoursome cake decoration material, but may also be enjoyed on their own. The roots and seeds are sometimes used to flavor gin. Its presence accounts for the distinct flavor of many liqueurs, such as Chartreuse. [<https://en.wikipedia.org/wiki/Angelica>]

<DICTION>Sow thistles have been used as fodder, particularly for rabbits, hence the other common names of "hare thistle" or "hare lettuce". They are also edible to humans as a leaf vegetable; old leaves and stalks can be bitter but young leaves have a flavour similar to lettuce. Going by the name puha or rareke (raraki) it is frequently eaten in New Zealand as a vegetable, particularly by the native Maori. When cooked it tastes a little similar to chard. [Wikipedia]

 <DICTION>The Antarctic minke whale or southern minke whale (*Balaenoptera bonaerensis*) is a species of minke whale within the suborder of baleen whales. It is the second smallest rorqual after the common minke whale and the third smallest baleen whale. Although first scientifically described in the mid-19th century, it wasn't recognized as a distinct species until the 1990s. Once ignored by whalers due to its small size and low oil yield, it is now one of the mainstays of the whaling industry alongside its cosmopolitan counterpart the common minke. It is the most abundant baleen whale in the world, numbering in the hundreds of thousands. It is primarily restricted to the Southern Hemisphere (although vagrants have been reported in the North Atlantic) and feeds mainly on euphausiids. <DICTION>*Ascomycota* is a Division/Phylum of the kingdom *Fungi* that, together with the *Basidiomycota*, form the subkingdom *Dikarya*. Its members are commonly known as the sac fungi. They are the largest phylum of *Fungi*, with over 64,000 species. The *Ascomycetes* are a monophyletic group, i.e., all of its members trace back to one common ancestor. This group is of particular relevance to humans as sources for medicinally important compounds, such as antibiotics and for making bread, alcoholic beverages, and cheese, but also as pathogens of humans and plants. Familiar examples of sac fungi include morels, truffles, brewer's yeast and baker's yeast, dead man's fingers, and cup fungi. [<http://en.wikipedia.org/wiki/Ascomycota>]

 <SCINAM>Fratercula arctica (Linnaeus, 1758) [ITIS 177025]  
 <DICTION>The Atlantic Puffin (*Fratercula arctica*) is a seabird species in the auk family. It is a pelagic bird that feeds primarily by diving for fish, but also eats other sea creatures, such as squid and crustaceans. Its most obvious characteristic during the breeding season is its brightly coloured bill. Also known as the Common Puffin, it is the only puffin species which is found in the Atlantic Ocean. The curious appearance of the bird, with its large colourful bill and its striking piebald plumage, has given rise to nicknames such as "clown of the ocean" and "sea parrot".  <DICTION>The Finger Lime plant, *Citrus australasica* (syn. *Microcitrus australasica*) is a thorny understory shrub or small tree of lowland subtropical rainforest and dry rainforest in the coastal border region of Queensland and New South Wales, Australia. The plant is 2-7 metres in height. Leaves are small, 1-6 cm long and 3-25 mm wide, glabrous, with a notched tip and crenate towards the apex. Flowers are white with petals 6-9 mm long. The fruit is cylindrical, 4-8 cm long, sometimes slightly curved, coming in different colours, including pink and green. Early settlers consumed the fruit and retained the trees when clearing for agriculture. Colonial botanists suggested that they should be cultivated. The finger lime has been recently popularised as a gourmet bushfood. The globular juice vesicles have been likened to a "lime caviar", which can be used as a garnish or added to various recipes. The fresh vesicles have the effect of a burst of effervescent tangy flavour as they are chewed. The fruit juice is acidic and similar to that of a lime. Marmalade and pickles are also made from finger lime. The finger lime peel can be dried and used as a flavouring spice. There is a wide range of different coloured variants of finger lime fruit, including green, yellow, orange, red, purple, black and brown. Finger lime is thought to have the widest range of colour variation within any *Citrus* species.  <SCINAM>Citrus × oleriferi Mabb. 'Australian Sunrise' [http://users.kymp.net/citruspages/australian.html#sunrise]  
 <DICTION>A hybrid cross of Finger Lime and a calamondin which is pear shaped and orange inside.  
 [http://en.wikipedia.org/wiki/Australian\_lime] The Australian Sunrise lime is a seedling of a Fastrimedon (originally bred in California in 1911), a hybrid of the Finger lime (*Citrus australasica*) and the Calamondin (*Citrus × microcarpa*), itself a hybrid between the Nagami kumquat (*Citrus japonica* 'Nagami') and the sour mandarin (*Citrus sunki*). Australian Sunrise produces attractive golden-coloured fruit on an upright shrub to small tree, usually 2 to 3 m high and 1.5 to 2.5 m wide. Foliage is dark, glossy-green. The oval leaves are approximately 40 to 45 mm long by 20 to 30 mm wide. The cream-coloured flowers occur in spring to early summer. Fruits ripen in winter, are pearshaped and usually 30 to 45 mm long by 20 to 40 mm wide. Seeds are small and plump. Juice squeezed from the fruit has a sharp, clean flavour and a light 'floral' aroma. The fruit may be eaten whole and like a kumquat, have a sharpish flesh and a sweet albedo and skin. They can be used in products such as in cordials, beverages, preserves, puree, pastes, sauces, marmalade, syrups and garnishes. [http://users.kymp.net/citruspages/australian.html#sunrise]

 <SCINAM>Dipteryx alata Vogel [GRIN 317431]  
 <DICTION>\$\$\$Dipteryx alata\$/i\$ (Baru) is a species of legume in the family \$i\$Fabaceae\$/i\$. It is a large tree, usually referred to as "Baruzeiro" (Baru tree) in Portuguese and its fruits or almond-like beans are known as Baru. Other names besides Baru are Cumaru, Cumbaru, Barujo, Coco-feijão, Cumarurana, Emburena-brava, Feijão-coco, and Pau-cumaru.\$br/ \$  
 It is found only in the Cerrado region of Brazil, and the Chiquitano region of eastern Bolivia, and is threatened by habitat loss. Historically it has been used as lumber, for charcoal production and for shade in pastures. The fruits

are used as feed for cattle bovine and are also an important food source for small mammals, rodents, birds, bats, etc. They are also consumed by people.

 <DICTION> *Myrica* is a genus of about 35-50 species of small trees and shrubs in the family Myricaceae, order Fagales. The genus has a wide distribution, including Africa, Asia, Europe, North America and South America, and missing only from Australia. Common names include bayberry, bay-rum tree, candleberry, sweet gale, and wax-myrtle. The wax coating on the fruit of several species, known as bayberry wax, has been used traditionally to make candles. The fruit of *Myrica rubra* is an economically important crop in China, sold fresh, dried, canned, for juice, and for alcoholic beverages. *Myrica* is used to spice beer and snaps in Denmark.  <DICTION> *Corylus cornuta* Marsh. is a deciduous shrubby hazel found in most of North America, from southern Canada south to Georgia and California. *Corylus cornuta* is named from its fruit, which is a nut enclosed in a husk with a tubular extension 2-4 cm (0.79-1.6 in) long that resembles a beak. Tiny filaments protrude from the husk and may stick into, and irritate, skin that contacts them. The spherical nuts, which are surrounded by a hard shell, are edible. There are two varieties: *Corylus cornuta* var. *cornuta* - Eastern

Beaked Hazel; small shrub, 4 to 6 m tall; 'beak' longer, 3 cm or more. *Corylus cornuta* var. *californica* - Western Beaked Hazel or California Hazelnut; large shrub, 4 to 15 m tall; 'beak' shorter, usually less than 3 cm.  <DICTION>The beet (*Beta vulgaris*) is a plant in the Chenopodiaceae family which is now included in the Amaranthaceae family. It is best known in its numerous cultivated varieties, the most well known of which is the root vegetable known as the beetroot or garden beet. However, other cultivated varieties include the leaf vegetables chard and spinach beet, as well as the root vegetables sugar beet, which is important in the production of table sugar, and mangelwurzel, which is a fodder crop. Three subspecies are typically recognised. All cultivated varieties fall into the subspecies *Beta vulgaris* subsp. *vulgaris*, while *Beta vulgaris* subsp. *maritima*, commonly known as the sea beet, is the wild ancestor of these, and is found throughout the Mediterranean, the Atlantic coast of Europe, the Near East, and India. A second wild subspecies, *Beta vulgaris* subsp. *adanensis*, occurs from Greece to Syria. [[http://en.wikipedia.org/wiki/Beta\\_vulgaris](http://en.wikipedia.org/wiki/Beta_vulgaris)]

 <SCINAM>Delphinapterus leucas Pallas, 1776 [MSW3 14300105]  
 <DICTION>The beluga or white whale, *Delphinapterus leucas*, is an Arctic and sub-Arctic cetacean. It is one of two members of the family *Monodontidae*, along with the narwhal, and the only member of the genus *Delphinapterus*. This marine mammal is commonly referred to simply as the beluga or sea canary due to its high-pitched twitter. Using the term "white whale" to refer to belugas is, in the strictest sense, erroneous, as the term "whale" is usually applied to the *Mysticeti* (baleen whales) and not to toothed cetaceans which belong to the suborder *Odontoceti*, which also includes dolphins and porpoises.

BT FRUIT-PRODUCING PLANT [B1140]

AI <DICTION> A berry is a small, pulpy, and often edible fruit. Berries are typically juicy, rounded, brightly colored, sweet or sour, and do not have a stone or pit, although many pips or seeds may be present. Common examples are strawberries, raspberries, blueberries, red currants, and blackcurrants. \$br/\$ The scientific usage of the term "berry" differs from common usage. In scientific terminology, a berry is a fruit produced from the ovary of a single flower in which the outer layer of the ovary wall develops into an edible fleshy portion (pericarp). The definition includes many fruits that are not commonly known as berries, such as grapes, tomatoes, cucumbers, eggplants (aubergines) and bananas. Fruits excluded by the botanical definition include strawberries, raspberries, and

blackberries, which are aggregate fruits, and mulberries, which are multiple fruits.

&lt;SCINAM&gt;Pomoxis nigromaculatus [2010 FDA Seafood List]

&lt;SCINAM&gt;Pomoxis nigromaculatus (Lesueur, 1829)

<DICTION> The black crappie, *Pomoxis nigromaculatus* (Lesueur, 1829), is very similar to *P. annularis* in size, shape, and habits, except that it is darker, with a pattern of black spots. The black crappie has 7-8 spines on its dorsal fin. The number of spines on the dorsal fin, is occasionally the only way to differentiate between a juvenile black crappie and a white crappie. The black crappie tends to prefer clearer water than the white crappie does. Its native range is uncertain, since it has been so widely transplanted, but it is presumed to be similar to the white crappie's. The black crappie is also known as the strawberry bass or Oswego bass. ([http://en.wikipedia.org/wiki/White\\_crappie](http://en.wikipedia.org/wiki/White_crappie))

 <SCINAM>Fucus vesiculosus L. [DPNL 2003 9897]  
 <DICTION>\$iFucus vesiculosus\$/i\$, known by the common name bladder wrack or bladderwrack, is a seaweed found on the coasts of the North Sea, the western Baltic Sea, and the Atlantic and Pacific Oceans, also known by the common names black tang, rockweed, bladder fucus, sea oak, black tany, cut weed, dyers fucus, red fucus, and rock wrack. It was the original source of iodine, discovered in 1811, and was used extensively to treat goitre, a swelling of the thyroid gland related to iodine deficiency. <MANSFELD>7673  
<DICTION>The blood orange is a variety of orange (*Citrus sinensis*) with crimson, almost-blood-colored flesh. The fruit is smaller than an average orange; its skin is usually pitted, but can be smooth. The distinctive dark flesh color is due to the presence of anthocyanins, a family of pigments common to many flowers and fruit, but uncommon in citrus fruits. The flesh develops its characteristic maroon color when the fruit develops with low temperatures during the night. Sometimes there is dark coloring on the exterior of the rind as well, depending on the variety of blood orange. The skin can also be more tough and harder to peel than other oranges. While all oranges are likely of hybrid origin between the pomelo and the tangerine, blood oranges originated as a mutation of the sweet orange. Within Europe, the Arancia Rossa di Sicilia (Red Orange of Sicily) has Protected Geographical Status. [[http://en.wikipedia.org/wiki/Blood\\_orange](http://en.wikipedia.org/wiki/Blood_orange)]

           <SCINAM>Zea mays subsp. mays [GRIN 311987]  
           <DICTION>Blue corn (also known as Hopi maize) is a variety of Flint maize grown in northern Mexico and the Southwestern United States, particularly in the states of Arizona and New Mexico. It was originally developed by the Hopi, and remains an essential part of Hopi dishes like piki bread. Blue corn meal is a corn meal that is ground from whole blue corn and has a sweet flavor. It is also a staple of New Mexican cuisine. In addition to its sharply different color, blue corn has several nutritional advantages over standard yellow or white corn varieties. It contains 20% more protein and has a lower glycemic index than white corn. When used to make tortillas, blue corn produces a sweeter, nuttier taste than yellow or white corn, and is a more complete protein source. A certain technique is used to grind the blue maize and make it release niacin. [[http://en.wikipedia.org/wiki/Blue\\_corn](http://en.wikipedia.org/wiki/Blue_corn)]

 <SCINAM>Brosimum alicastrum Sw. [DPNL 2003 8147]  
 <DICTION>\$i\$Brosimum alicastrum\$/i\$, the breadnut or Maya nut, is a Brosimum tree species under the

**Moraceae** family of flowering plants, whose other genera include fig and mulberries. The plant is known by a range of names in indigenous Mesoamerican and other languages, including but not limited to: ramon, ojoche, ojite, ojushte, ujushte, ujuxte, capomo, mojo, ox, iximche, 'masica' in Honduras and uje in Michoacan Mexico. The fruit, the breadnut, is extremely high in fiber, calcium, potassium, folic acid, iron, zinc, protein and B vitamins. It has a low glycemic index (<50) and is very high in antioxidants. The fresh seeds can be cooked and eaten or can be set out to dry in the sun to roast and eaten later. Stewed the nut tastes like mashed potato, roasted it tastes like chocolate or coffee and can be prepared in numerous other dishes. In Petén, Guatemala, the breadnut is being cultivated for exportation and local consumption as powder, for hot beverages, and bread.  <DICTION>Brewing yeasts may be classed as "top-cropping" (or "top-fermenting") and "bottom-cropping" (or "bottom-fermenting"). Top-cropping yeasts are so called because they form a foam at the top of the wort during fermentation. An example of a top-cropping yeast is *Saccharomyces cerevisiae*, sometimes called an "ale yeast". Bottom-cropping yeasts are typically used to produce lager-type beers, though they can also produce ale-type beers. These yeasts ferment well at low temperatures. An example of bottom-cropping yeast is *Saccharomyces pastorianus*, formerly known as *Saccharomyces carlsbergensis*. [<http://en.wikipedia.org/wiki/Yeast#Beer>]  
 <DICTION>*Saccharomyces pastorianus* is a yeast used industrially for the production of lager beer, and is named after Louis Pasteur. It is a synonym of the yeast species *Saccharomyces carlsbergensis*, which was originally described in 1883 by Emil Christian Hansen, who was working for the Danish brewery Carlsberg. &lt;MANSFELD&gt;37506

&lt;DICTION&gt;Broccoli is a plant in the cabbage family, whose large flower head is used as a vegetable. The word broccoli, from the Italian plural of broccolo, refers to "the flowering top of a cabbage". Broccoli is usually boiled or steamed, but may be eaten raw and has become popular as a raw vegetable in hors d'oeuvre trays. \$br /\$Broccoli is classified in the \$i\$Italica\$/i\$ cultivar group of the species \$i\$Brassica oleracea\$/i\$. Broccoli has large flower heads, usually green in color, arranged in a tree-like fashion on branches sprouting from a thick, edible stalk. The mass of flower heads is surrounded by leaves. Broccoli most closely resembles cauliflower, which is a different cultivar group of the same species. [http://en.wikipedia.org/wiki/Broccoli]

&lt;SCINAM&gt;Amanita caesarea (Scop.) Pers. 1801 [INDEX FUNGORUM 208468]

&lt;DICTION&gt;Amanita caesarea, commonly known in English as Caesar's mushroom, is a highly regarded edible mushroom in the genus Amanita, native to southern Europe and North Africa. This mushroom was first described by Giovanni Antonio Scopoli in 1772. This mushroom was a favorite of early rulers of the Roman Empire.

It has a distinctive orange cap, yellow gills and stipe. Organic acids have been isolated from this species. Similar orange-capped species occur in North America and India. It was known to and valued by the Ancient Romans, who called it Boletus, a name now applied to a very different type of fungus.
