- FTC** J0131  
**BT** PRESERVED BY CHILLING OR FREEZING [J0142]  
**UF** preserved by storage in refrigeration  
**UF** refrigerated  
**UF** refrigeration, preserved by storage in  
**SN** Preservation methods that imply subsequent chilling are: \*PASTEURIZED BY IRRADIATION\*, \*PASTEURIZED BY HEAT\*, \*PRESERVED BY CHEMICALS \* \*PRESERVED BY FERMENTATION\*, \*SURFACE PASTEURIZED BY ULTRAVIOLET\*, \*PRESERVED BY STORAGE IN MODIFIED ATMOSPHERE\*, \*PRESERVED BY FILTRATION\*.  
**AI** Preserved by cooling and keeping at a temperature between 30°F and 45°F (-1°C and 7°C). The temperature range depends on national legislation.

**PRESERVED BY CHILLING OR FREEZING**

- FTC** J0142  
**BT** J. PRESERVATION METHOD [J0107]  
**UF** refrigeration, preserved by  
**SN** In order to comply with labelling requirements, it must be specified if it is chilling or freezing.  
**AI** Preserved by cooling and storage at low temperature (chilling at around 0-5°C (32 to 41°F), freezing at -18°C (0°F)) to prevent or retard microbial or enzymatic spoilage.

**PRESERVED BY DRY SALTING**

- FTC** J0139  
**BT** PRESERVED BY SALTING [J0103]  
**UF** dry salted  
**AI** Packed in dry salt in sufficient quantity to suppress enzyme activity or growth of undesirable organisms.

**PRESERVED BY ELECTRON ACCELERATOR RADIATION**

- FTC** J0161  
**BT** PRESERVED BY IRRADIATION [J0138]  
**AI** Treated by electron accelerator radiation, for example to kill insects in cereals.

**PRESERVED BY FERMENTATION**

- FTC** J0104  
**BT** J. PRESERVATION METHOD [J0107]  
**AI** Preserved by suppressing undesirable microorganisms and enzymatic activity by the effects of fermentation.

**PRESERVED BY FILTRATION**

- FTC** J0121  
**BT** J. PRESERVATION METHOD [J0107]

AI Preserved by filtering out yeasts and molds, generally followed by aseptic packaging. [FDA CFSAN 1995]

#### **PRESERVED BY FREEZING**

FTC J0136

BT PRESERVED BY CHILLING OR FREEZING [J0142]

UF frozen

AI Preserved by freezing a food product and keeping it at a temperature below the freezing point (20-30 degrees F) without regard to the product's physical state.

#### **PRESERVED BY HEAT TREATMENT**

FTC J0120

BT J. PRESERVATION METHOD [J0107]

AI Preserved by the use of high temperature for a time sufficient to reduce or destroy undesirable microorganisms and enzyme activity. [FDA CFSAN 1995]

#### **PRESERVED BY IONIZING RADIATION**

FTC J0122

BT PRESERVED BY IRRADIATION [J0138]

AI Preserved by irradiation, primarily by gamma radiation.

#### **PRESERVED BY IRRADIATION**

FTC J0138

BT J. PRESERVATION METHOD [J0107]

AI Preserved by the use of radiation to destroy or suppress undesirable microorganisms or enzyme activity.

#### **PRESERVED BY MICRO-FILTRATION**

FTC J0177

BT PRESERVED BY FILTRATION [J0121]

AI Microfiltration is used to remove undesirable micro-organisms and molecules. The membranes have pore diameters from 10 to 10000 nm.

Micro-filtration is often used instead of paturisation, e.g. in the brewing industry.

#### **PRESERVED BY OTHER METHOD**

FTC J0004

BT J. PRESERVATION METHOD [J0107]

SN Used only when the preservation method does not fall under any of the major categories of preservation. Note: wax coating is considered packaging and not preservation.

#### **PRESERVED BY REDUCING WATER ACTIVITY**

FTC J0145

BT J. PRESERVATION METHOD [J0107]

AI Preservation method that lowers the water activity (relative humidity) of a food product. This is accomplished by using mechanical dehydration equipment, by natural drying, by adding salt, sugar or other agents to the food or by surface drying during a refrigeration or freezing operation. This method of preservation may be used in conjunction with other preservation methods such as preservation by thermal processing.

#### **PRESERVED BY SALTING**

FTC J0103

BT PRESERVED BY REDUCING WATER ACTIVITY [J0145]

SN Used when salting is used for preservation. The salt content of the food is generally 8% or higher (e.g. salted fish, etc.).

#### **PRESERVED BY SALTING**

FTC J0103

BT PRESERVED BY ADDING INORGANIC ACIDS OR SALTS [J0154]

#### **PRESERVED BY SMOKING**

FTC J0106

BT PRESERVED BY REDUCING WATER ACTIVITY [J0145]

RT SMOKED BY SMOKE INFILTRATION [H0118]

- SN** Used when smoking is used for preservation.
- AI** In the past, smoking was a useful preservation tool, in combination with other techniques, most commonly salt-curing or drying. For some long-smoked foods, the smoking time also served to dry the food. Drying, curing, or other techniques can render the interior of foods inhospitable to bacterial life, while the smoking gives the vulnerable exterior surfaces an extra layer of protection. [Wikipedia]

**PRESERVED BY SOUS VIDE**

- FTC** J0150
- BT** PRESERVED BY CHILLING OR FREEZING [J0142]
- UF** sous vide
- AI** <DICTION>Sous-vide (pronounced /su 'vid/), French for "under vacuum", is a method of cooking that is intended to maintain the integrity of ingredients by heating them for an extended period of time in vacuum sealed plastic pouches at relatively low temperatures. Food is cooked for a long time, sometimes well over 24 hours. Unlike cooking in a slow cooker, sous-vide cooking uses airtight plastic bags placed in hot water well below boiling point (usually around 60°C or 140°F).[Wikipedia: <http://en.wikipedia.org/wiki/Sous-vide>]

**PRESERVED BY STORAGE IN CONTROLLED ATMOSPHERE**

- FTC** J0176
- BT** PRESERVED BY STORAGE IN MODIFIED ATMOSPHERE [J0111]
- UF** ca
- UF** ca storage
- AI** Storage of fruits and vegetables in an atmosphere in which the concentrations of oxygen, carbon dioxide (and often nitrogen) are different from those in air and at a low temperature. All three (four) factors are controlled at the desired levels in order to suppress the fruits' and vegetables' natural respiration. The process is also denominated CA Storage (synonym).

**PRESERVED BY STORAGE IN INERT ATMOSPHERE**

- FTC** J0173
- BT** PRESERVED BY STORAGE IN MODIFIED ATMOSPHERE [J0111]
- AI** Preserved by storage in inert gases (e.g. nitrogen) to suppress or inhibit undesirable micro-organism growth, oxidation activity, etc.

**PRESERVED BY STORAGE IN MODIFIED ATMOSPHERE**

- FTC** J0111
- BT** J. PRESERVATION METHOD [J0107]
- AI** Preserved by storage in an atmosphere in which the concentrations of oxygen and carbon dioxide are different from those in air. This reduces microbial and enzymatic activity; often used commercially in conjunction with refrigeration (e.g., refrigerated rail cars) for fresh meat and produce.

**PRESERVED BY STORAGE IN REFRIGERATING AGENT**

- FTC** J0172
- BT** PRESERVED BY CHILLING [J0131]
- AI** Preserved by storage in refrigerating agent, e.g. shipment of samples in insulated boxes with solid carbon dioxide

**preserved by storage in refrigeration**

- USE** PRESERVED BY CHILLING [J0131]

**PRESERVED BY STORAGE IN VACUUM**

- FTC** J0174
- BT** PRESERVED BY STORAGE IN MODIFIED ATMOSPHERE [J0111]
- AI** Stored under reduced pressure (e.g. 1.3-2 kPa) in order to suppress or inhibit undesirable micro organism growth, oxidation activity, etc.

**PRESERVED BY TREATMENT WITH CHEMICALS**

- FTC** J0108
- BT** PRESERVED BY CHEMICALS [J0109]
- AI** Preserved by immersing in or spraying with liquids (e.g., sulfite solutions) or surrounding with gases (e.g., ethylene oxide, propylene oxide or sulfur dioxide) to destroy undesirable microorganisms or inactivate enzymes. Diffusion and chemical reaction may create a residue in the food product that contributes to continuing preservation.

**PRESERVED BY ULTRA-FILTRATION**

- FTC** J0157
- BT** PRESERVED BY FILTRATION [J0121]

- SN** Used when a product is preserved by the use of ultra-filtration to remove undesirable micro organisms and molecules. Example: beer.
- AI** Separation of colloidal or very fine solid materials by filtration through microporous or semipermeable mediums. Membranes have pores in the range 2-20 nm diameter. Some dairy product are ultrafiltered in order to obtain a higher protein concentration and hereby, a thicker consistency or texture.

**PRESERVED MEAT (EUROFIR)**

- FTC** A0797
- BT** MEAT OR MEAT PRODUCT (EUROFIR) [A0793]
- RT** CURED MEAT (US CFR) [A0279]

<DICTION>Salsola kali (Synonym Salsola kali subsp. kali), commonly known as prickly saltwort, or prickly glasswort, is an annual plant that grows in salty sandy coastal soils.

Its distributional range is in Europe along the shores of Baltic Sea, North Sea and the Atlantic Ocean. In the Mediterranean and at dry inland places it is replaced by Kali tragus, which is less tolerant to salty soils, and has spread from Eurasia to other continents. Kali turgida does not seem to occur as an introduced species in America. [[http://en.wikipedia.org/wiki/Salsola\\_kali](http://en.wikipedia.org/wiki/Salsola_kali)]

**PROTECTED DESIGNATION OF ORIGIN (PDO)**

- FTC** Z0255  
**BT** PROTECTED GEOGRAPHICAL STATUS (PGS) [Z0254]  
**AI** PDO- covers agricultural products and foodstuffs which are produced, processed and prepared in a given geographical area using recognised know-how [[http://ec.europa.eu/agriculture/quality/schemes/index\\_en.htm](http://ec.europa.eu/agriculture/quality/schemes/index_en.htm)].

**PROTECTED GEOGRAPHICAL INDICATION (PGI)**

- FTC** Z0256  
**BT** PROTECTED GEOGRAPHICAL STATUS (PGS) [Z0254]  
**AI** PGI- covers agricultural products and foodstuffs closely linked to the geographical area. At least one of the stages of production, processing or preparation takes place in the area [[http://ec.europa.eu/agriculture/quality/schemes/index\\_en.htm](http://ec.europa.eu/agriculture/quality/schemes/index_en.htm)].

**PROTECTED GEOGRAPHICAL STATUS (PGS)**

- FTC** Z0254  
**BT** STATUS OF FOOD NAME [Z0087]  
**AI** Protected Geographical Status (PGS) is a legal framework[1] defined in European Union law to protect the names of regional foods. Protected Designation of Origin (PDO), Protected Geographical Indication (PGI) and Traditional Speciality Guaranteed (TSG) are geographical indications, or more precisely regimes, within the framework. The law (enforced within the EU and being gradually expanded internationally via bilateral agreements of the EU with non-EU countries) ensures that only products genuinely originating in that region are allowed in commerce as such. The legislation came into force in 1992. The purpose of the law is to protect the reputation of the regional foods and eliminate the unfair competition and misleading of consumers by non-genuine products,[2] which may be of inferior quality or of different flavour. [Wikipedia]

 <DICTION>Pulaka (*Cyrtosperma merkusii*), or swamp taro, is a crop grown in Oceania (especially Tuvalu) and an important source of carbohydrates for the area's inhabitants. It is a "swamp crop" similar to taro, but "with bigger leaves and larger, coarser roots." Pulaka roots need to be cooked for hours to reduce toxicity in the corms, but are rich in nutrients, especially calcium. Pulaka is an important part of Tuvalu cultural and culinary tradition, now under threat from rising sea level and displacement from the growing use of imported food products.

**AI** <SCIORD>Struthioniformes [ITIS 174372]  
 <DICTION>A ratite is any of a diverse group of large, flightless birds of Gondwanan origin, most of them now extinct. There is still some controversy regarding the systematics involved. Some sources state that Ratites are synonymous with *Struthioniformes*, while other sources state that Ratites are the same group, only that the order *Struthioniformes* contains only the Ostrich and possibly the Elephant Bird. Unlike other flightless birds, the ratites have no keel on their sternum - hence the name from the Latin *ratis* (for raft). Without this to anchor their wing muscles, they could not fly even if they were to develop suitable wings. [<http://en.wikipedia.org/wiki/Ratite>]

 <DICTION>Red kuri squash is thin skinned orange colored winter squash, that has the appearance of a small pumpkin without the ridges. It belongs to the Hubbard squash group. Inside the hard outer skin there is a firm flesh that provides a very delicate and mellow chestnut-like flavor. Red kuri squash is a cultivated variety of the species *Cucurbita maxima*. Other varieties of this subspecies include 'Hokkaido', 'Red Hokkaido' and 'Sweet Meat' squashes.  
 Red kuri squash is commonly called "Japanese squash", "orange Hokkaido squash", "baby red hubbard squash", or "Uchiki kuri squash". In Japan, the word kuri may refer to either the squash discussed in this article or to Japanese chestnuts. In France, it is called potimarron, and in the United Kingdom, it is commonly called "onion squash". <DICTION><SCINAM>Oryza sativa, commonly known as Asian rice, is the plant species most commonly referred to in English as rice. Oryza sativa contains two major subspecies: the sticky, short-grained japonica or sinica variety, and the nonsticky, long-grained indica variety. Rice occurs in a variety of colors, including white, brown, black, purple, and red rices. Black rice (also known as purple rice) is a range of rice types, some of which are glutinous rice. Varieties include Indonesian black rice and Thai jasmine black rice.

<DICTION>There are two species of Roe Deer. The European Roe Deer (*Capreolus capreolus*), a deer species of Europe and Asia Minor, and the Siberian Roe Deer (*Capreolus pygargus*), found from the Ural Mountains to as far east as China and Siberia. The two species met at the Caucasus Mountains, with the European species occupying the southern flank of the mountain ranges and adjacent Asia Minor and the Siberian species occupying the northern flank of the mountain ranges. Within Europe, the European Roe Deer occurs in most areas, with the exception of northern Scandinavia and some of the islands, notably Iceland, Ireland, and the Mediterranean Sea islands; in the Mediterranean region it is largely confined to mountainous regions, and is absent or rare at low levels. The Roe Deer is a relatively small deer, with a body length of 95-135 cm, a shoulder height of 65-75 cm, and a weight of 15-30 kg. It has rather short, erect antlers and a reddish body with a grey face. Its hide is golden red in summer, darkening to brown or even black in winter, with lighter undersides and a white rump patch; the tail is very short (2-3 cm), and barely visible. Only the males have antlers, which are lost during winter, but which re-grow in time for the mating season. [[http://en.wikipedia.org/wiki/Roe\\_deer](http://en.wikipedia.org/wiki/Roe_deer)]

<DICTION>Rooibos, "red bush"; scientific name \$\$\$Aspalathus linearis\$\$\$ is a broom-like member of the legume family of plants growing in South Africa's fynbos.\$br/\$

The generic name comes from the plant *Calicotome villosa*, aspalathos in Greek. This plant has very similar growth and flowers to the redbush. The specific name *linearis* comes from the plant's linear growing structure and needle-like leaves.\$br/\$

The plant is used to make a herbal tea called rooibos tea, bush tea (esp. Southern Africa), redbush tea (esp. UK), South African red tea, or red tea. The product has been popular in Southern Africa for generations and is now consumed in many countries. It is sometimes spelled rooibosch in accordance with the old Dutch etymology. <DICTION>Rapini (also known as Broccoli Rabe (or Raap or Raab), Broccoletti, Broccoli di Rape, Cime di Rapa, Rape, Rappi, Friarielli (in Naples) is a common vegetable in the cuisines of southern Italy (in particular Basilicata, Puglia, and Sicily), Galicia (northwestern Spain), Portugal, the Netherlands and China. The plant is a member of the tribe *Brassicaceae* of the *Brassicaceae* (mustard family). Rapini is classified scientifically as *Brassica rapa* subspecies *rapa*, in the same subspecies as the turnip, but has also been treated as *Brassica rapa ruvo*, *Brassica rapa rapifera*, *Brassica ruvo*, and *Brassica campestris ruvo*. <DICTION>The saguaro (*Carnegiea gigantea*) is an arborescent (tree-like) cactus species in the monotypic genus *Carnegiea*, which can grow to be over 40 feet (12 m) tall. It is native to the Sonoran Desert in Arizona, the Mexican State of Sonora, and the Whipple Mountains and Imperial County areas of California. The ruby red fruits are 2.4 to 3.5 inches (6 to 9 cm) long and ripen in June. Each fruit contains around 2,000 seeds plus sweet fleshy connective tissue. The fruits are edible and prized by local people.

&lt;SCINAM&gt;Rubus spectabilis Pursh [DPNL 2003 12677]

<DICTION>\$\$Rubus spectabilis\$/i\$ (Salmonberry) is a species of \$\$Rubus\$/i\$ native to the west coast of North America from west central Alaska to California. Salmonberries are edible and share the fruit structure of the raspberry, with the fruit pulling away from its receptacle. Books often call the fruit "insipid", but depending on ripeness and site, they are good eaten raw and when processed into jam, candy, jelly and wine. They were an important food for indigenous peoples. Traditionally, the berries were eaten with salmon or mixed with oolichan grease or salmon roe. They were not dried because of their high moisture content.

FTC G0042

BT G. COOKING METHOD [G0002]

UF blanched or scalded

SN This term is used for foods in the preparation process, e.g. preparation in the kitchen of peeled tomatoes, the scalding loosens the tomato skin.  
 For industrial processing, e.g. in the process inactivation of enzymatic activity, use the term \*BLANCHED [J0175]\*.  
 This process is normally always used in the processing of frozen vegetables.

AI A method of precooking food where a liquid is heated to just below the boiling point. Often used to retard the spoiling of milk. Also, to plunge food such as fruit or vegetables into boiling water (or to pour boiling water over them) in order to loosen the skin and facilitate peeling.

<SCIGEN>Allium [DPNL 2003 7304]

<DICTION>Scallions - also known as green onions, spring onions, salad onions, green shallots, onion sticks, long onions, baby onions, precious onions, yard onions, gibbons, or syboes - are the edible plants of various *Allium* species, all of which are "onion-like", having hollow green leaves and lacking a fully developed root bulb. The Welsh onion (*Allium fistulosum*) does not form bulbs even when mature, and is grown in the West almost exclusively as a scallion or salad onion, although in Asia this species is of primary importance and used both fresh and in cooking. "Scallion" is also used for young plants of the common onion (*Allium cepa* var. *cepa*) and shallot (*Allium cepa* var. *aggregatum*, formerly *Allium ascalonicum*), harvested before bulbs form, or sometimes when slight bulbing has occurred. Most of the cultivars grown in the West primarily as salad onions or scallions belong to *Allium cepa* var. *cepa*. Other species sometimes used as scallions include *Allium proliferum* and *Allium wakegi*. [<http://en.wikipedia.org/wiki/Scallion>]

 <MANSFELD>23616  
 <DICTION>Scurvy-grass (*Cochlearia* species; a.k.a. Scurvy grass, Scurvygrass, or Spoonwort) is a genus of about 30 species of annual and perennial herbs in the cabbage family *Brassicaceae*. They are widely distributed in temperate and arctic areas of the northern hemisphere, most commonly found in coastal regions, on cliff-tops and salt marshes where their high tolerance of salt enables them to avoid competition from larger, but less

salt-tolerant plants; they also occur in alpine habitats in mountains and tundra.\$br /\$  
 Scurvy-grass was extensively eaten in the past by sailors suffering from scurvy after returning from long voyages, as the leaves are rich in vitamin C, which cures this deficiency disease resulting from a lack of fresh vegetables in the diet. The leaves, which have a strong peppery taste similar to the related horseradish and watercress, are also sometimes used in salads. [<http://en.wikipedia.org/wiki/Cochlearia>]

**SEARED**

FTC G0045

BT BROILED OR GRILLED [G0006]

AI Searing (or pan searing) is a technique used in grilling, roasting, braising, sautéing, etc. that cooks the surface of the food (usually meat, poultry or fish) at high temperature so that a brownish crust forms by Maillard reaction and denaturation of proteins. A similar technique, browning, is typically used to sear or brown all sides of a particular piece of meat, fish, poultry, etc. before finishing it in the oven. To obtain the desired brown crust, the meat surface must exceed 300 °F (150 °C), so searing requires the meat surface be free of water, which boils at around 212 °F (100 °C).

<SCINAM>Brassica napus L. var. pabularia (DC.) Rchb. [PLANTS BRNAP]

<DICTION>Brassica napus (Pabularia Group) is commonly called Siberian kale. It is native to northern Asia and northern Europe. It primarily differs from a second type of kale known as Brassica oleracea (Acephala Group) by having (a) milder flavor, (b) more tenderness, (c) better resistance to the diseases/insects common to Brassicas and (d) better winter hardiness. Flat blue green leaves with white veins and ruffled edges. Plants typically mature to 12-18" tall and to 24" wide. Brassica napus (Oleifera Group) is grown primarily for vegetable oils including canola. Brassica napus (Napobrassica Group) includes rutabagas. <DICTION>The *Sillaginidae*, commonly known as the smelt-whittings, whittings, sillaginids, sand borers and sand-smelts, are a family of benthic coastal marine fishes in the order Perciformes. The smelt-whittings inhabit a wide region covering much of the Indo-Pacific, from the west coast of Africa east to Japan and south to Australia. The family comprises only three genera and thirty one species, of which a number are dubious, with the last major revision of the family in 1992 unable to confirm the validity of a number of species. They are elongate, slightly compressed fish often light brown to silver in colour with a variety of markings and patterns on their upper body. The Sillaginidae are not related to a number of fishes commonly called 'whiting' in the Northern Hemisphere, including the fish originally called whiting, *Merlangius merlangus*. AI <SCIFAM>Boletaceae Chevall. [INDEX FUNGORUM 80523]

<SCINAM>Suillus luteus (L.) Roussel, 1806 [INDEX FUNGORUM 120823]

<DICTION>Suillus luteus is a basidiomycete fungus, and the type species of the genus Suillus.

It is a common fungus indigenous to coniferous forests of Eurasia and North America, and introduced to southern Australia and New Zealand. Commonly referred to as slippery jack or sticky bun in English-speaking countries, its names refer to the brown cap, which is characteristically viscid in wet conditions. The fungus fruits abundantly in autumn, and is harvested for food. The slime coating, however, may cause indigestion if not removed. [http://en.wikipedia.org/wiki/Suillus\_luteus]

<SCINAM>Prunus spinosa L. [DPNL 2003 12299]

<DICTION>Prunus spinosa (blackthorn, or sloe) is a species of flowering plant in the rose family Rosaceae. It is native to Europe, western Asia, and locally in northwest Africa. It is also locally naturalised in New Zealand and eastern North America. The fruit is similar to a small damson or plum, suitable for preserves, but rather tart and astringent for eating, unless it is picked after the first few days of autumn frost. The juice is used in the manufacture of fake port wine, and used as an adulterant to impart roughness to genuine port. In rural Britain a liqueur is made by infusing gin with sloes and sugar. FTC H0110

BT SMOKED OR SMOKE-FLAVORED [H0172]

AI In modern times, almost all smoking is carried out for its flavor. This flavoring can be purchased as a liquid in most supermarkets to mimic the flavor of smoking—not its preservative qualities—without the actual cooking process... Liquid smoke is often used in the processing of bacon, and is one of the main flavors in the curing solution used for bacon. It is also used to flavor jerky and tofu. Liquid smoke is also used in some soft cheeses and tempeh. [Wikipedia]  
Liquid smoke is also a common ingredient in many barbecue sauces and meat marinades.

 <SCINAM>Solanum L. [PLANTS SOLAN]  
 <SCINAM>Solanum [DPNL 2003 13160]  
 <DICTION>The genus *Solanum* is a large and diverse genus of flowering plants, which include two food crops of high economic importance, the potato and the tomato. It also contains the nightshades and horse nettles, as well as numerous plants cultivated for their ornamental flowers and fruit. *Solanum* species show a wide range of growing habits, such as annual and perennials, vines, subshrubs, shrubs, and small trees. Many formerly independent genera like *Lycopersicon* (the tomatoes) and *Cyphomandra* are now included in *Solanum* as subgenera or sections. Thus, the genus today contains roughly 1,500-2,000 species. [<https://en.wikipedia.org/wiki/Solanum>]

 <SCINAM>Triticum aestivum subsp. spelta (L.) Thell. [MANSFELD 34190]  
 <DICTION>Spelt (*Triticum spelta*; *Triticum dicoccum*), also known as dinkel wheat or hulled wheat, is a species of wheat cultivated since approximately 5000 BC. Spelt was an important staple in parts of Europe from the Bronze Age to medieval times; it now survives as a relict crop in Central Europe and northern Spain, and has also found a new market as a 'health food'. Spelt is sometimes considered a subspecies of the closely related species common wheat (*Triticum aestivum*), in which case its botanical name is considered to be *Triticum aestivum* subsp. *spelta*. It is a hexaploid wheat, which means it has six sets of chromosomes. [<https://en.wikipedia.org/wiki/Spelt>]

&lt;DICTION&gt;\$\$Sonchus asper\$\$ (Sharp-fringed Sow Thistle, Prickly Sow Thistle, Spiny Sow Thistle, or Spiny-leaved Sow Thistle) is an annual plant with spiny leaves and yellow flowers resembling those of the dandelion. The leaves are bluish-green, simple, lanceolate, with wavy and sometimes lobed margins, covered in spines on both the margins and beneath. The base of the leaf surrounds the stem. The plant can reach 180 cm (6 ft) in height. The

leaves and stems emit a milky sap when cut. The flowers grow in clusters and the end of the stems.  
This plant is native to Europe, but is also a common weed in North American roadsides, landscapes, and pastures. Its edible leaves make a palatable and nutritious leaf vegetable. [[http://en.wikipedia.org/wiki/Sonchus\\_asper](http://en.wikipedia.org/wiki/Sonchus_asper)]

FTC A0348  
 BT FOOD ADDITIVE CLASSIFICATION, EUROPEAN COMMUNITY [A0324]  
 AI Substance that makes it possible to maintain the physico-chemical state of a foodstuff; stabilisers include substances that enable the maintenance of a homogenous dispersion of two or more immiscible substances in a foodstuff and include also substances that stabilise, retain or intensify an existing colour of a foodstuff. European Council Directive 95/2/EC.

**STABILIZER (US CFR)**

FTC A0321  
 BT STABILIZER, THICKENER OR GELLING AGENT (US CFR) [A0319]  
 AI Substance used to produce viscous solutions or dispersions, to impart body, improve consistency, or stabilize emulsions.

**STABILIZER ADDED**

FTC H0368  
 BT FOOD ADDITIVE ADDED, USA [H0371]

SN Used when a stabilizer is added at any level. A stabilizer is a food additive that thickens, prevents separation, prevents flavor deterioration, retards oxidation by increasing the viscosity or gives a smooth texture to the food.

**STABILIZER, THICKENER OR GELLING AGENT (US CFR)**

FTC A0319  
 BT FOOD ADDITIVE (US CFR) [A0181]  
 UF gelling agent  
 UF jelling agent  
 UF thickener  
 AI Substance used to product viscous solutions or dispersions, to impart body, improve consistency, or stabilize emulsions. Includes suspending and bodying agents, setting agents, jelling agents, bulking agents, viscosity modifiers, etc.

**stachys affinis**

<SCINAM>Stevia rebaudiana (Bertoni) Bertoni [DPNL 2003 13323]

<DICTION>Stevia is a genus of about 240 species of herbs and shrubs in the sunflower family (Asteraceae), native to subtropical and tropical regions from western North America to South America. The species *Stevia rebaudiana*, commonly known as sweetleaf, sweet leaf, sugarleaf, or simply stevia, is widely grown for its sweet leaves. As a sweetener and sugar substitute, stevia's taste has a slower onset and longer duration than that of sugar, although some of its extracts may have a bitter or licorice-like aftertaste at high concentrations. With its steviol glycoside extracts having up to 300 times the sweetness of sugar, stevia has garnered attention with the rise in demand for low-carbohydrate, low-sugar food alternatives.  UF sugar added  
 SN Added sugar or sugar syrup is indexed if it is the second or third ingredient in order of predominance or if it amounts to 5% or more. When percentage figures are known, total the sugar contribution from all added ingredients (e.g., from added milk chocolate). Use the most specific term(s) applicable. Use the broad term \*SUGAR OR SUGAR SYRUP ADDED\* only if (1) the specific sugar is not in the vocabulary, (2) the specific sugar is not known, or (3) no individual sugar is indexable but several added sugars together amount to 5% or more. Special notes: (1) lactose is indexed at any level. (2) on a product label or recipe 'sugar' means \*SUCROSE\* and should be so indexed.

UF caplet

UF pill

AI A tablet is a mixture of active substances and excipients, usually in powder form, pressed or compacted into a solid. Tablets can be made in virtually any shape, although requirements of patients and tableting machines mean that most are round, oval or capsule shaped. Medicinal tablets and capsules are often called "pills". This is technically incorrect, since tablets are made by compression, whereas pills are ancient solid dose forms prepared by rolling a soft mass into a round shape. A caplet is a smooth, coated, oval shaped medicinal tablet in the shape of a capsule. [Wikipedia]

 <DICTION> The tangerine (*Citrus tangerina*) is a group of orange-colored citrus fruit consisting of hybrids of mandarin orange (*Citrus reticulata*). The name was first used for fruit coming from Tangier, Morocco, described as a mandarin variety. Under the Tanaka classification system, *Citrus tangerina* is considered a separate species. Under the Swingle system, tangerines are considered to be a group of mandarin (*C. reticulata*) varieties. Tangerines are smaller and less rounded than common oranges. The taste is considered less sour, as well as sweeter and stronger, than that of an orange. [<https://en.wikipedia.org/wiki/Tangerine>]

<SCINAM>Salix pulchra Cham. [PLANTS SAPU15]

<DICTION>\$i\$Salix pulchra\$/i\$ is a species of flowering plant in the willow family, known by the common names diamondleaf willow, tealeaf willow, and thin red willow. It is native to northern North America, where it occurs in Alaska, Yukon, the Northwest Territories, and Nunavut. The species is also found in northern British Columbia, and occurs in Russia. \$i\$Salix pulchra\$/i\$ is one of the least bitter-tasting willows in Alaska, and in the springtime, young leaves may be harvested for human consumption. The leaves and shoots were eaten by the Eskimo raw and dried, or stored in seal oil for future use. The leaves were also used to brew tea and make soup. At Nunivak Island, parts of this plant were chewed to treat ailments such as mouth sores and pain. This willow also provides a good source of vitamin C.  <DICTION>\$\$Rubus parviflorus\$/i\$, commonly called thimbleberry or salmonberry, is a species of \$\$Rubus\$/i\$, native to western and northern North America. Thimbleberry fruits are larger, flatter, and softer than raspberries, and have many small seeds. Because the fruit is so soft, it does not pack or ship well, so thimbleberries are rarely cultivated commercially. However, wild thimbleberries make an excellent jam which is sold as a local delicacy. The fruits can be eaten raw or dried. FTC P0237

BT TRADITIONAL FOOD CLAIM OR USE [P0234]

- SN** Use when "Traditional composition" is claimed.
- AI** The uniquely identifiable composition (in terms of ingredients) that was first established prior to the Second World War and passed down through generations by oral or other means (taking into account cases where composition was abandoned for a time and then reinstated) and when necessary is differentiated from the composition defined by the generally recognized characteristics of the wider food group to which the product belongs. [Traditional Foods in Europe, EuroFIR Synthesis report No 6, 2009]

**TRADITIONAL FOOD CLAIM OR USE**

- FTC** P0234
- BT** RELIGION- OR CUSTOMS-RELATED CLAIM OR USE [P0126]
- AI** 'Traditional' means proven usage on the Community market for a time period showing transmission between generations; this time period should be the one generally ascribed to one human generation, at least 25 years [COUNCIL REGULATION (EC) No 509/2006 of 20 March 2006 on agricultural products and foodstuffs as traditional specialities guaranteed].

A traditional food product is a product frequently consumed or associated to specific celebrations and/or seasons, normally transmitted from one generation to another, made with care in a specific way according to the gastronomic heritage, with little or no processing/manipulation, that is distinguished and known because of its sensory properties and associated to a certain local area, region or country. [<http://www.truefood.eu/>]

Traditional means conforming to established practice or specifications prior to the Second World War. Traditional food is a food of a specific feature or features, which distinguish it clearly from other similar products of the same category in terms of the use of traditional ingredients (raw materials or primary products), traditional composition or traditional type of production and/or processing method. [Traditional Foods in Europe, EuroFIR Synthesis report No 6, 2009]

**TRADITIONAL INGREDIENT CLAIM OR USE**

- FTC** P0236
- BT** TRADITIONAL FOOD CLAIM OR USE [P0234]
- SN** Use when "Traditional ingredients" is claimed.
- AI** Raw material (species and/or varieties) or primary product either alone or as an ingredient that has been used in identifiable geographical areas and remains in use today (taking into account cases where use was abandoned for a time and then reinstated) and its characteristics are in accordance with current specifications of national and EU legislation. [Traditional Foods in Europe, EuroFIR Synthesis report No 6, 2009]

<DICTION>Triggerfishes are about 40 species of often brightly colored fishes of the family *Balistidae*. Often marked by lines and spots, they inhabit tropical and subtropical oceans throughout the world, with the greatest species richness in the Indo-Pacific. Most are found in relatively shallow, coastal habitats, especially at coral reefs, but a few, such as the aptly named oceanic triggerfish (*Canthidermis maculata*), are pelagic. While several species from this family are popular in the marine aquarium trade, they are often notoriously ill-tempered. [<http://en.wikipedia.org/wiki/Balistidae>]

<DICTION>Senna alexandrina (Alexandrian senna) is an ornamental plant in the genus Senna. It is used in herbalism. It grows natively in lower Egypt, especially in the Nubian region, and near Khartoum (Sudan), where it is cultivated commercially. It is also grown elsewhere, notably in India and Somalia. Historically, Senna alexandrina was used in the form of senna pods, or as herbal tea made from the leaves, as a laxative. It also serves as a fungicide. &lt;SCINAM&gt;Craterellus tubaeformis (Fr.) Quél. 1888 [INDEX FUNGORUM 455453]

<DICTION>Craterellus tubaeformis (formerly Cantharellus tubaeformis) is an edible fungus, also known as Yellowfoot, winter mushroom, or Funnel Chanterelle. It is mycorrhizal, forming symbiotic associations with plants, making it very challenging to cultivate. It is smaller than the golden chanterelle (Cantharellus cibarius) and has a dark brown cap with paler gills and a hollow yellow stem. Craterellus tubaeformis tastes stronger but less fruity than the golden chanterelle. It has a very distinctive smokey, peppery taste when raw.  <DICTION>Tunicates, previously known as *Urochordata* or urochordates, are members of the *Tunicata*, a subphylum of the phylum *Chordata*. They are marine filter feeders with a saclike morphology. In their respiration and feeding they take in water through an incurrent (or inhalant) siphon and expel the filtered water through an excurrent (or exhalant) siphon. Most adult tunicates are sessile and attached to rocks or similarly suitable surfaces on the ocean floor; others such as salps, doliolids and pyrosomes swim in the pelagic zone as adults. Various species are commonly known as sea squirts or sea pork. [<http://en.wikipedia.org/wiki/Tunicate>]

FTC B4490

BT OWL ORDER [B4489]

UF strigidae

AI <SCIFAM>Strigidae [ITIS 177854]

<DICTION>True owl or Typical owl (family *Strigidae*) are one of the two generally accepted families of Owls, the other being the barn owls (*Tytonidae*). The Sibley-Ahlquist taxonomy unites the *Caprimulgiformes* with the owl order; here, the typical owls are a subfamily *Strigidae*. This is unsupported by more recent research (see *Cypselomorphae* for details), but the relationships of the owls in general are still unresolved. This large family comprises around 189 living species in 25 genera. The typical owls have a cosmopolitan distribution and are found on every continent except Antarctica. [<http://en.wikipedia.org/wiki/Strigidae>]

UF unleavened bread

SN Renamed from \*FLATBREAD (EUROFIR)\* (LanguaL 2010).

AI A flatbread, or unleavened bread, is a simple bread made with flour, water, and salt and then thoroughly rolled into flattened dough. Many flatbreads are unleavened-made without yeast or sourdough culture-although some flatbread is made with yeast, such as pita bread. There are many other optional ingredients that flatbreads may contain, such as curry powder, diced jalapeños, chili powder, or black pepper. Olive oil or sesame oil may be added as well. Flatbreads can range from one millimeter to a few centimeters thick. [Wikipedia].  
Includes pitta bread, matzo, tortilla.

<SCINAM>Vanilla [DPNL 2003 13764]

<DICTION> Vanilla, the vanilla orchids, forms a flowering plant genus of about 110 species in the orchid family (*Orchidaceae*). The most widely known member is the flat-leaved vanilla (*V. planifolia*), native to Mexico, from which commercial vanilla flavoring is derived. The fruit is termed "vanilla bean", though true beans are fabacean eudicots not at all closely related to orchids. Rather, the vanilla fruit is technically an elongate, fleshy and later dehiscent capsule 10-20 cm long. It ripens gradually for 8 to 9 months after flowering, eventually turning black in color and giving off a strong aroma. Each pod contains thousands of minute seeds, and both the pods and seeds within are used to create vanilla flavoring. Vanilla beans are harvested by hand from commercial orchards. UF	sweet corn
UF	zea mays var. rugosa
AI	<SCIFAM>Poaceae [ITIS 40351] <SCINAM>Zea mays L. [ITIS 42269] <DICTION>Sweet corn ( <i>Zea mays</i> convar. <i>saccharata</i> var. <i>rugosa</i> ; also called Indian corn, sugar corn, and pole corn) is a variety of maize with a high sugar content. Sweet corn is the result of a naturally occurring recessive mutation in the genes which control conversion of sugar to starch inside the endosperm of the corn kernel. Unlike field corn varieties, which are harvested when the kernels are dry and mature (dent stage), sweet corn is picked when immature (milk stage) and prepared and eaten as a vegetable, rather than a grain. Since the process of maturation involves converting sugar to starch, sweet corn stores poorly and must be eaten fresh, canned, or frozen, before the kernels become tough and starchy.[ <a href="http://en.wikipedia.org/wiki/Sweet_corn">http://en.wikipedia.org/wiki/Sweet_corn</a> ]

 <DICTION>Wheat (*Triticum* spp.) is a domesticated grass from the Levant that is cultivated worldwide. Major cultivated species of wheat:  
 \* Common wheat or Bread wheat (*Triticum aestivum*) A hexaploid species that is the most widely cultivated in the world.  
 \* Durum (*Triticum durum*) The only tetraploid form of wheat widely used today, and the second most widely cultivated wheat.  
 \* Einkorn (*Triticum monococcum*) A diploid species with wild and cultivated variants. Domesticated at the same time as emmer wheat, but never reached the same importance.  
 \* Emmer (*Triticum dicoccon*) A tetraploid species, cultivated in ancient times but no longer in widespread use.  
 \* Spelt (*Triticum spelta*) Another hexaploid species cultivated in limited quantities.

 <SCINAM>Asplodinotus grunniens; syn: Pomoxis annularis Raf. [Codex CCPR]  
 <DICTION>The white crappie, *Pomoxis annularis* Rafinesque, 1818, is native throughout the eastern half of Canada and the United States, and has been widely introduced in the west as well. The white crappie is generally deep-bodied and silvery in color, with darker vertical stripes. The dorsal fin of the white crappie has six spines. The maximum recorded length for a white crappie is 53.0 cm (21 in), with a maximum weight of almost 2.35 kg (more than 5.18 lb); it can live as long as thirty years. This species prefers slower-moving water, whether a backwater of a small creek or a large lake. Some sources say the White Crappie will overpopulate in lakes less than 1000 acres (4 km<sup>2</sup>). White Crappie often school around structure such as submerged trees. ([http://en.wikipedia.org/wiki/White\\_crappie](http://en.wikipedia.org/wiki/White_crappie))

&lt;SCINAM&gt;Bos taurus indicus Linnaeus, 1758 [MSW3 14200689]

<DICTION>Zebus (*Bos taurus indicus*), sometimes known as 'nothing cattle', are better-adapted to tropical environments than other domestic cattle. Their scientific name was originally *Bos indicus*, but this name is now deemed invalid by ITIS, who classify the zebu under *Bos taurus* along with all other domestic cattle, and their aurochs ancestors, domesticated in India about 10,000 years ago. The ancient species of *Bos nomadicus* cattle or even gaur may have contributed to the development of the zebu. There are some 75 known breeds, split about evenly between African breeds and South Asian ones. The major Zebu cattle breeds of the world include Gyr, Guzerat, Indu-Brazilian, Nellore, Ongole and Brahman. Zebu have humps, large dewlaps

and ears. They have more sweat glands than European cattle (*Bos taurus*). They handle hot, humid climates well and have pest resistances not seen in European cattle. (<http://en.wikipedia.org/wiki/Zebu>)

 <DICTION> *Maclura tricuspidata* is a tree native to East Asia, occasionally grown for its fruit, somewhat similar to that of the related mulberry (*Morus* spp.). It is also known by common names including cudrang, mandarin melon berry, silkworm thorn, zhe or che, and Chinese mulberry (but not to be confused with *Morus australis* also known by that name). ([https://en.wikipedia.org/wiki/Maclura\\_tricuspidata](https://en.wikipedia.org/wiki/Maclura_tricuspidata))

      - GREAT BLACK-BACKED GULL [B4570]
      - LESSER BLACK-BACKED GULL [B4569]
    - MAGPIE GOOSE [B4618]
    - OWL ORDER [B4489]

TYPICAL OWL FAMILY [B4490]  
     GREAT HORNED OWL [B4491]  
 PARTRIDGE [B1382]  
 PHEASANT [B1460]  
 PIGEON [B1304]  
     COMMON GROUND DOVE [B3482]  
     DOVE [B1203]  
 PLOVER [B3504]  
 PTARMIGAN [B2697]  
 PUFFIN [B4292]  
     ATLANTIC PUFFIN [B4294]  
     HORNED PUFFIN [B4295]  
     TUFTED PUFFIN [B4293]  
 QUAIL [B1346]  
     CALIFORNIA QUAIL [B4365]  
     COMMON QUAIL [B4366]  
     JAPANESE QUAIL [B4852]  
     NORTHERN BOBWHITE [B4364]  
 RATITE [B4362]  
     EMU [B2719]  
     KIWI [B4363]  
     OSTRICH [B2118]  
     RHEA [B4556]  
         GREATER RHEA [B4557]  
         LESSER RHEA [B4558]  
 SHEARWATER [B4296]  
     SOOTY SHEARWATER [B4297]  
 SNIPE [B2696]  
 SWIFT [B4523]  
     SWIFTLET [B4522]  
         EDIBLE-NEST SWIFTLET [B4524]  
 TASMANIAN NATIVEHEN [B4617]  
 TURKEY (POULTRY) [B1236]  
     OCELLATED TURKEY [B4167]  
     WILD TURKEY [B4166]  
 WOODCOCK [B2119]  
 TERRESTRIAL INVERTEBRATE [B4899]  
     ARACHNID [B4901]  
     EARTHWORM [B4902]  
     INSECT [B1220]  
         ANT (INSECT) [B2495]  
             GREEN TREE ANT [B4643]  
             HONEYPOT ANT [B4642]  
         BEETLE [B4645]  
         BLOODWOOD APPLE [B4647]  
         GRASSHOPPER [B2496]  
         MOTH [B4644]  
             BOGONG MOTH [B4816]  
             SILKMOTH [B4900]  
         PLANT LOUSE [B4646]  
             EUCALYPTUS PSYLLID [B4817]  
     LAND SNAIL [B1455]  
         GARDENSNAIL [B4904]  
             BROWN GARDENSNAIL [B3662]  
             ESCARGOT [B3663]  
             GREEN GARDENSNAIL [B3661]  
             TURKISH SNAIL [B3664]  
         GIANT SNAIL [B4386]  
 CHEMICAL FOOD SOURCE [B1041]  
     FOOD ADDITIVE [B2972]  
         4-HEXYLRESORCINOL [B4434]  
         ACESULFAME K [B2976]  
         ACETIC ACID [B2977]  
         ACETIC ACID ESTERS OF MONO- AND DIGLYCERIDES OF FATTY ACIDS [B2978]  
         ACETYLATED DISTARCH ADIPATE [B2979]  
         ACETYLATED DISTARCH PHOSPHATE [B2980]  
         ACETYLATED OXIDISED STARCH [B4401]  
         ACETYLATED STARCH [B2981]  
         ADIPIC ACID [B2982]  
         AGAR [B2983]

ALGINIC ACID [B2984]  
ALLURA RED AC [B2985]  
ALPHA-TOCOPHEROL [B2986]  
ALUMINIUM [B2987]  
ALUMINIUM AMMONIUM SULPHATE [B2988]  
ALUMINIUM POTASSIUM SULPHATE [B2989]  
ALUMINIUM SILICATE (KAOLIN) [B2990]  
ALUMINIUM SODIUM SULPHATE [B2991]  
ALUMINIUM SULPHATE [B2992]  
AMARANTH [B2993]  
AMIDATED PECTIN [B2994]  
AMMONIA CAMEL [B2995]  
AMMONIUM ALGINATE [B2996]  
AMMONIUM CARBONATE [B2997]  
AMMONIUM CARBONATES [B4405]  
AMMONIUM HYDROGEN CARBONATE [B2998]  
AMMONIUM HYDROXIDE [B2999]  
AMMONIUM PHOSPHATIDES [B3000]  
AMMONIUM SULPHATE [B3001]  
ANNATTO, BIXIN, NORBIXIN [B3002]  
ANTHOCYANINS [B3003]  
ARGON [B3004]  
ASCORBIC ACID [B3005]  
ASCORBYL STEARATE [B3007]  
ASPARTAME [B3008]  
AZORUBINE, CARMOISINE [B3009]  
BASIC METHACRYLATE COPOLYMER [B4406]  
BEESWAX, WHITE AND YELLOW [B3010]  
BEETROOT RED, BETANIN [B3011]  
BENTONITE [B3012]  
BENZOIC ACID [B3013]  
BENZYL ALCOHOL [B4407]  
BETA-APO-8'-CAROTENAL (C 30) [B3014]  
BETA-CAROTENE [B3015]  
BETA-CYCLODEXTRIN [B4408]  
BIPHENYL, DIPHENYL [B3016]  
BORIC ACID [B3017]  
BRILLIANT BLACK BN, BLACK PN [B3018]  
BRILLIANT BLUE FCF [B3019]  
BROWN FK [B3020]  
BROWN HT [B3021]  
BUTANE [B4409]  
BUTYLATED HYDROXYANISOLE (BHA) [B3022]  
BUTYLATED HYDROXYTOLUENE (BHT) [B3023]  
CALCIUM HYDROGEN CARBONATE [B3024]  
CALCIUM 5'-RIBONUCLEOTIDES [B3025]  
CALCIUM ACETATE [B3026]  
CALCIUM ALGINATE [B3027]  
CALCIUM ALUMINIUM SILICATE [B3028]  
CALCIUM ASCORBATE [B3029]  
CALCIUM BENZOATE [B3030]  
CALCIUM CARBONATE [B3031]  
CALCIUM CHLORIDE [B3032]  
CALCIUM CITRATES [B4411]  
CALCIUM CYCLAMATE [B3033]  
CALCIUM DIGLUTAMATE [B3034]  
CALCIUM DIHYDROGEN DIPHOSPHATE [B3035]  
CALCIUM DISODIUM ETHYLENE DIAMINE TETRA-ACETATE (CALCIUM DISODIUM EDTA) [B3036]  
CALCIUM FERROCYANIDE [B3037]  
CALCIUM GLUCONATE [B3038]  
CALCIUM GUANYLATE [B3039]  
CALCIUM HYDROGEN MALATE [B3040]  
CALCIUM HYDROGEN SULPHITE [B3041]  
CALCIUM HYDROXIDE [B3042]  
CALCIUM INOSINATE [B3043]  
CALCIUM LACTATE [B3044]  
CALCIUM MALATE [B3045]  
CALCIUM MALATES [B4403]  
CALCIUM OXIDE [B3046]  
CALCIUM PHOSPHATES [B4413]

CALCIUM POLYPHOSPHATES [B3047]  
CALCIUM PROPIONATE [B3048]  
CALCIUM SACCHARIN [B3049]  
CALCIUM SILICATE [B3050]  
CALCIUM SORBATE [B3051]  
CALCIUM STEAROYL-2-LACTYLATE [B3052]  
CALCIUM SULPHATE [B3053]  
CALCIUM SULPHITE [B3054]  
CALCIUM TARTRATE [B3055]  
CANDELILLA WAX [B3056]  
CANTHAXANTHIN [B3057]  
CARBAMIDE [B3058]  
CARBON DIOXIDE [B3059]  
CARBOXY METHYL CELLULOSE [B3060]  
CARBOXY METHYL CELLULOSE, SODIUM CARBOXY METHYL CELLULOSE, CELLULOSE GUM [B4454]  
CARNAUBA WAX [B3061]  
CAROTENES [B4414]  
CARRAGEENAN [B3062]  
CASSIA GUM [B4415]  
CAUSTIC SULPHITE CAMEL [B3063]  
CELLULOSE [B4416]  
CHLOROPHYLLINS [B3064]  
CHLOROPHYLLS [B3065]  
CHLOROPHYLLS AND CHLOROPHYLLINS [B4417]  
CITRIC ACID [B1650]  
    CITRIC ACID [B3066]  
CITRIC ACID ESTERS OF MONO- AND DIGLYCERIDES OF FATTY ACIDS [B3067]  
COCHINEAL, CARMINIC ACID, CARMINES [B3068]  
COPPER COMPLEXES OF CHLOROPHYLLINS [B3069]  
COPPER COMPLEXES OF CHLOROPHYLLS [B3070]  
COPPER COMPLEXES OF CHLOROPHYLLS, CHLOROPHYLLINS [B4395]  
CROSS-LINKED SODIUM CARBOXY METHYL CELLULOSE, CROSS LINKED CELLULOSE GUM [B4412]  
CURCUMIN [B3071]  
CYCLAMATES [B4410]  
CYCLAMIC ACID [B3072]  
DELTA-TOCOPHEROL [B3073]  
DICALCIUM CITRATE [B3074]  
DICALCIUM DIPHOSPHATE [B3075]  
DICALCIUM PHOSPHATE [B3076]  
DIMETHYL DICARBONATE [B3077]  
DIMETHYL POLYSILOXANE [B3078]  
DIPHOSPHATES [B4388]  
DIPOTASSIUM DIPHOSPHATE [B3079]  
DIPOTASSIUM GUANYLATE [B3080]  
DIPOTASSIUM INOSINATE [B3081]  
DIPOTASSIUM PHOSPHATE [B3082]  
DIPOTASSIUM TARTRATE [B3083]  
DISODIUM 5'-RIBONUCLEOTIDES [B3084]  
DISODIUM CITRATE [B3085]  
DISODIUM DIPHOSPHATE [B3086]  
DISODIUM GUANYLATE [B3087]  
DISODIUM INOSINATE [B3088]  
DISODIUM PHOSPHATE [B3089]  
DISODIUM TARTRATE [B3090]  
DISTARCH PHOSPHATE [B3091]  
DODECYL GALLATE [B3092]  
ENZYMATICALLY HYDROLYSED CARBOXY METHYL CELLULOSE, ENZYMATIALLY HYDROLYSED CELLULOSE GUM [B4389]  
ERYTHORBIC ACID [B3093]  
ERYTHRITOL [B4390]  
ERYTHROSINE [B3094]  
ETHYL CELLULOSE [B4391]  
ETHYL ESTER OF BETA-APO-8'-CAROTENIC ACID (C 30) [B3095]  
ETHYL METHYL CELLULOSE [B3096]  
ETHYL-P-HYDROXYBENZOATE [B3097]  
EXTRACTS OF ROSEMARY [B4392]  
FATTY ACID ESTERS OF ASCORBIC ACID [B4402]  
FATTY ACIDS [B3098]  
FERROUS GLUCONATE [B3099]  
FERROUS LACTATE [B3100]  
FUMARIC ACID [B3101]

GAMMA-TOCOPHEROL [B3102]  
GELLAN GUM [B3103]  
GLUCONIC ACID [B3104]  
GLUCONO-DELTA-LACTONE [B3105]  
GLUTAMIC ACID [B3106]  
GLYCEROL [B3107]  
GLYCEROL ESTERS OF WOOD ROSINS [B3108]  
GLYCERYL DIACETATE (DIACETIN) [B4394]  
GLYCERYL TRIACETATE (TRACETIN) [B3109]  
GLYCINE [B3110]  
GLYCINE AND ITS SODIUM SALT [B4387]  
GOLD [B3111]

 HYDROLYZED [H0277]  
 IRRADIATED [H0121]  
 IRRADIATED BY IONIZING IRRADIATION [H0179]  
 IRRADIATED BY ULTRAVIOLET RADIATION [H0261]  
 LIQUID INJECTED [H0275]  
 PARBOILED (GRAIN) [H0220]  
 PHOSPHATED [H0278]  
 PREVIOUSLY FROZEN [H0241]  
 PUFFED [H0268]  
 ROASTED (PROCESSING METHOD) [H0391]  
 ROLLED [H0239]  
 TEXTURED [H0192]  
 RENDERED [H0760]  
 INGREDIENT ADDED [H0225]  
 CARBOHYDRATE OR RELATED COMPOUND ADDED [H0301]  
 ALCOHOL ADDED [H0332]  
 ALCOHOLATED [H0160]  
 CARBOHYDRATE ADDED [H0209]  
 MALTODEXTRIN ADDED [H0315]  
 OLIGOSACCHARIDE ADDED [H0240]  
 POLYDEXTROSE ADDED [H0314]  
 POLYSACCHARIDE ADDED [H0120]  
 CELLULOSE ADDED [H0218]  
 HEMICELLULOSE ADDED [H0125]  
 PECTIN ADDED [H0145]  
 STARCH ADDED [H0146]  
 DEXTRIN ADDED [H0390]  
 MODIFIED STARCH ADDED [H0279]  
 SUGAR OR SUGAR SYRUP ADDED [H0136]  
 CARAMELIZED SUGAR ADDED [H0360]  
 DEXTROSE ADDED [H0154]  
 FRUCTOSE ADDED [H0168]  
 GALACTOSE ADDED [H0265]  
 INVERT SUGAR ADDED [H0211]  
 LACTOSE ADDED [H0157]  
 MALTOSE ADDED [H0155]  
 SUCROSE ADDED [H0158]  
 BROWN SUGAR ADDED [H0361]  
 WHITE SUGAR ADDED [H0749]  
 SUGAR SYRUP OR SUGAR SYRUP SOLIDS ADDED [H0280]

- CANE SYRUP ADDED [H0283]
- CORN SYRUP ADDED [H0224]
  - HIGH FRUCTOSE CORN SYRUP ADDED [H0281]
- HONEY ADDED [H0149]
- MAPLE SYRUP ADDED [H0282]
- MOLASSES ADDED [H0156]
- SORGHUM SYRUP ADDED [H0284]
- SUGAR ALCOHOL ADDED [H0302]
  - ERYTHRITOL ADDED [H0801]
  - LACTITOL ADDED [H0554]
  - MALTITOL ADDED [H0571]
  - MALTITOL SYRUP ADDED [H0572]
  - MALTITOLS ADDED [H0816]
  - MANNITOL ADDED [H0304]
  - SORBITOL ADDED [H0303]
  - XYLITOL ADDED [H0305]
- COATED OR COVERED [H0353]
  - CAROB COATED OR COVERED [H0357]
  - CHOCOLATE COATED OR COVERED [H0355]
  - OTHER SUBSTANCE COATED OR COVERED [H0356]
  - SUGAR COATED OR COVERED [H0354]
- COLOR ADDED [H0150]
  - CAROTENES ADDED [H0317]
  - CERTIFIED COLOR ADDED [H0133]
  - NONCERTIFIED COLOR ADDED [H0106]
- FAT OR OIL ADDED [H0221]
  - ANIMAL FAT OR OIL ADDED [H0262]
    - BUTTER ADDED [H0271]
    - FISH OIL ADDED [H0853]
  - FAT OR OIL COATED [H0233]
    - ANIMAL FAT OR OIL COATED [H0335]
    - VEGETABLE FAT OR OIL COATED [H0334]
- MARGARINE ADDED [H0272]
- VEGETABLE FAT OR OIL ADDED [H0263]
  - CANOLA OR RAPESEED OIL ADDED [H0851]
  - CORN OIL ADDED [H0343]
  - COTTONSEED OIL ADDED [H0346]
  - FLAXSEED OIL ADDED [H0852]
  - OLIVE OIL ADDED [H0341]
  - PALM, PALM KERNEL OR COCONUT OIL ADDED [H0345]
  - PEANUT OIL ADDED [H0344]
  - SAFFLOWER OR SUNFLOWER OIL ADDED [H0347]
  - SOYBEAN OIL ADDED [H0342]
- FILLED OR STUFFED [H0207]
- FLAVORING OR TASTE INGREDIENT ADDED [H0117]
  - ACIDIFIED [H0200]
    - MARINADED [H0396]
  - ALCOHOLATED [H0160]
  - CARBONATED [H0175]
    - ARTIFICIALLY CARBONATED [H0109]
    - CARBONATED BY FERMENTATION [H0246]
  - FLAVORING, SPICE OR HERB ADDED [H0227]
    - FLAVORING ADDED, ARTIFICIAL [H0228]
      - ARTIFICIAL CHOCOLATE FLAVORING ADDED [H0394]
      - ARTIFICIAL FRUIT FLAVORING ADDED [H0395]
    - FLAVORING, SPICE OR HERB ADDED, NATURAL [H0229]
      - CAROB ADDED [H0267]
      - CHOCOLATE OR COCOA ADDED [H0231]
      - FLAVORING OR SPICE EXTRACT OR CONCENTRATE ADDED [H0100]
      - SPICE OR HERB ADDED [H0151]
        - MARINADED [H0396]
  - SALT ADDED [H0367]
    - SALTED [H0173]
  - SMOKED OR SMOKE-FLAVORED [H0172]
    - SMOKED BY ADDING SMOKE CONCENTRATE [H0110]
    - SMOKED BY SMOKE INFILTRATION [H0118]
  - SWEETENER ADDED [H0202]
    - NONNUTRITIVE SWEETENER ADDED [H0108]
    - NUTRITIVE SWEETENER ADDED [H0105]
      - SUGAR OR SUGAR SYRUP ADDED [H0136]

- CAMELIZED SUGAR ADDED [H0360]
- DEXTROSE ADDED [H0154]
- FRUCTOSE ADDED [H0168]
- GALACTOSE ADDED [H0265]
- INVERT SUGAR ADDED [H0211]
- LACTOSE ADDED [H0157]
- MALTOSE ADDED [H0155]
- SUCROSE ADDED [H0158]
  - BROWN SUGAR ADDED [H0361]
  - WHITE SUGAR ADDED [H0749]
- SUGAR SYRUP OR SUGAR SYRUP SOLIDS ADDED [H0280]
  - CANE SYRUP ADDED [H0283]
  - CORN SYRUP ADDED [H0224]
    - HIGH FRUCTOSE CORN SYRUP ADDED [H0281]
  - HONEY ADDED [H0149]
  - MAPLE SYRUP ADDED [H0282]
  - MOLASSES ADDED [H0156]
  - SORGHUM SYRUP ADDED [H0284]
- FOOD ADDED [H0180]
  - CHOCOLATE OR COCOA ADDED [H0231]
  - DAIRY PRODUCT ADDED [H0242]
    - CHEESE ADDED [H0143]
    - MILK OR MILK PRODUCT ADDED [H0297]
      - CREAM ADDED [H0296]
      - MILK ADDED [H0184]
        - PUDDING OR CUSTARD ADDED [H0132]
      - WHEY ADDED [H0260]
  - EGG ADDED [H0186]
    - EGG WHITE ADDED [H0205]
      - WHIPPED EGG WHITE ADDED [H0365]
    - EGG YOLK ADDED [H0185]
  - FRUIT ADDED [H0147]
    - DRIED OR CANDIED FRUIT ADDED [H0364]
    - FRUIT JUICE ADDED [H0362]
    - FRUIT PEEL ADDED [H0363]
    - JELLY, JAM OR PRESERVE ADDED [H0122]
      - ARTIFICIALLY SWEETENED FRUIT JELLY ADDED [H0131]
  - GRAIN ADDED [H0152]
    - BARLEY ADDED [H0323]
      - BARLEY MALT ADDED [H0754]
    - BRAN ADDED [H0318]
    - BREADED OR BATTER-COATED [H0188]
    - BUCKWHEAT ADDED [H0336]
    - CORN ADDED [H0320]
    - OAT ADDED [H0322]
    - RICE ADDED [H0321]
    - RYE ADDED [H0337]
      - RYE MALT ADDED [H0756]
    - WHEAT ADDED [H0319]
      - WHEAT GERM ADDED [H0222]
      - WHEAT MALT ADDED [H0755]
  - MEAT ADDED [H0191]
    - BEEF ADDED [H0763]
    - LAMB MEAT ADDED [H0764]
    - LARD ADDED [H0762]
    - MEAT PRODUCT ADDED [H0759]
      - HAM ADDED [H0765]
    - ORGAN MEAT ADDED [H0307]
      - BLOOD ADDED [H0339]
        - PLASMA ADDED [H0397]
    - PORK ADDED [H0768]
    - POULTRY ADDED [H0171]
      - CHICKEN ADDED [H0766]
      - POULTRY ORGAN MEAT ADDED [H0308]
      - TURKEY ADDED [H0767]
  - NUT OR SEED ADDED [H0177]
    - PEANUT OR PEANUT BUTTER ADDED [H0124]
    - SEED ADDED [H0333]
    - TREE NUT ADDED [H0757]
      - COCONUT ADDED [H0340]

SEAFOOD ADDED [H0153]  
VEGETABLE ADDED [H0212]  
    MUSHROOM ADDED [H0166]  
    ONION ADDED [H0349]  
    PARSLEY ADDED [H0348]  
    SOY ADDED [H0338]  
    TOMATO ADDED [H0350]  
FOOD ADDITIVE ADDED [H0399]  
    4-HEXYLRESORCINOL ADDED [H0782]  
    ACESULFAME K ADDED [H0401]  
    ACETIC ACID ADDED [H0402]  
    ACETIC ACID ESTERS OF MONO- AND DIGLYCERIDES OF FATTY ACIDS ADDED [H0403]  
    ACETYLATED DISTARCH ADIPATE ADDED [H0404]  
    ACETYLATED DISTARCH PHOSPHATE ADDED [H0405]  
    ACETYLATED OXIDISED STARCH ADDED [H0783]  
    ACETYLATED STARCH ADDED [H0406]  
    ADIPIC ACID ADDED [H0407]  
    AGAR ADDED [H0408]  
    ALGINIC ACID ADDED [H0409]  
    ALLURA RED AC ADDED [H0410]  
    ALPHA-TOCOPHEROL ADDED [H0411]  
    ALUMINIUM ADDED [H0412]  
    ALUMINIUM AMMONIUM SULPHATE ADDED [H0413]  
    ALUMINIUM POTASSIUM SULPHATE ADDED [H0414]  
    ALUMINIUM SILICATE (KAOLIN) ADDED [H0415]  
    ALUMINIUM SODIUM SULPHATE ADDED [H0416]  
    ALUMINIUM SULPHATE ADDED [H0417]  
    AMARANTH ADDED [H0418]  
    AMIDATED PECTIN ADDED [H0419]  
    AMMONIA CARAMEL ADDED [H0420]  
    AMMONIUM ALGINATE ADDED [H0421]  
    AMMONIUM CARBONATE ADDED [H0422]  
    AMMONIUM CARBONATES ADDED [H0784]  
    AMMONIUM HYDROGEN CARBONATE ADDED [H0423]  
    AMMONIUM HYDROXIDE ADDED [H0424]  
    AMMONIUM PHOSPHATIDES ADDED [H0425]  
    AMMONIUM SULPHATE ADDED [H0426]  
    ANNATTO, BIXIN, NORBIXIN ADDED [H0427]  
    ANTHOCYANINS ADDED [H0428]  
    ARGON ADDED [H0429]  
    ASCORBIC ACID ADDED [H0430]  
    ASCORBYL PALMITATE ADDED [H0431]  
    ASCORBYL STEARATE ADDED [H0432]  
    ASPARTAME ADDED [H0433]  
    AZORUBINE, CARMOISINE ADDED [H0434]  
    BASIC METHACRYLATE COPOLYMER ADDED [H0785]  
    BEESWAX, WHITE AND YELLOW ADDED [H0435]  
    BEETROOT RED, BETANIN ADDED [H0436]  
    BENTONITE ADDED [H0437]  
    BENZOIC ACID ADDED [H0438]  
    BENZYL ALCOHOL ADDED [H0786]  
    BETA-APO-8'-CAROTENAL (C 30) ADDED [H0439]  
    BETA-CAROTENE ADDED [H0440]  
    BETA-CYCLODEXTRIN ADDED [H0787]  
    BIPHENYL, DIPHENYL ADDED [H0441]  
    BORIC ACID ADDED [H0442]  
    BRILLIANT BLACK BN, BLACK PN ADDED [H0443]  
    BRILLIANT BLUE FCF ADDED [H0444]  
    BROWN FK ADDED [H0445]  
    BROWN HT ADDED [H0446]  
    BUTANE ADDED [H0788]  
    BUTYLATED HYDROXYANISOLE (BHA) ADDED [H0447]  
    BUTYLATED HYDROXYTOLUENE (BHT) ADDED [H0448]  
    CALCIUM HYDROGEN CARBONATE ADDED [H0449]  
    CALCIUM 5'-RIBONUCLEOTIDES ADDED [H0450]  
    CALCIUM ACETATE ADDED [H0451]  
    CALCIUM ALGINATE ADDED [H0452]  
    CALCIUM ALUMINIUM SILICATE ADDED [H0453]  
    CALCIUM ASCORBATE ADDED [H0454]  
    CALCIUM BENZOATE ADDED [H0455]

CALCIUM CARBONATE ADDED [H0456]  
CALCIUM CHLORIDE ADDED [H0457]  
CALCIUM CITRATE ADDED [H0789]  
CALCIUM CYCLAMATE ADDED [H0458]  
CALCIUM DIGLUTAMATE ADDED [H0459]  
CALCIUM DIHYDROGEN DIPHOSPHATE ADDED [H0460]  
CALCIUM DISODIUM ETHYLENE DIAMINE TETRA-ACETATE (CALCIUM DISODIUM EDTA) ADDED [H0461]  
CALCIUM FERROCYANIDE ADDED [H0462]  
CALCIUM GLUCONATE ADDED [H0463]  
CALCIUM GUANYLATE ADDED [H0464]  
CALCIUM HYDROGEN MALATE ADDED [H0465]  
CALCIUM HYDROGEN SULPHITE ADDED [H0466]  
CALCIUM HYDROXIDE ADDED [H0467]  
CALCIUM INOSINATE ADDED [H0468]  
CALCIUM LACTATE ADDED [H0469]  
CALCIUM MALATE ADDED [H0470]  
CALCIUM MALATES ADDED [H0790]  
CALCIUM OXIDE ADDED [H0471]  
CALCIUM PHOSPHATES ADDED [H0791]  
CALCIUM POLYPHOSPHATES ADDED [H0472]  
CALCIUM PROPIONATE ADDED [H0473]  
CALCIUM SACCHARIN ADDED [H0474]  
CALCIUM SILICATE ADDED [H0475]  
CALCIUM SORBATE ADDED [H0476]  
CALCIUM STEAROYL-2-LACTYLATE ADDED [H0477]  
CALCIUM SULPHATE ADDED [H0478]  
CALCIUM SULPHITE ADDED [H0479]  
CALCIUM TARTRATE ADDED [H0480]  
CANDELILLA WAX ADDED [H0481]  
CANTHAXANTHIN ADDED [H0482]  
CARBAMIDE ADDED [H0483]  
CARBON DIOXIDE ADDED [H0484]  
CARBOXY METHYL CELLULOSE ADDED [H0485]  
CARBOXY METHYL CELLULOSE, SODIUM CARBOXY METHYL CELLULOSE, CELLULOSE GUM ADDED [H0792]  
CARNAUBA WAX ADDED [H0486]  
CAROTENES ADDED [H0793]  
CARRAGEENAN ADDED [H0487]  
CASSIA GUM ADDED [H0794]  
CAUSTIC SULPHITE CAMEL ADDED [H0488]  
CELLULOSE ADDED [H0795]  
CHLOROPHYLLINS ADDED [H0489]  
CHLOROPHYLLS ADDED [H0490]  
CHLOROPHYLLS AND CHLOROPHYLLINS ADDED [H0796]  
CITRIC ACID ADDED [H0491]  
CITRIC ACID ESTERS OF MONO- AND DIGLYCERIDES OF FATTY ACIDS ADDED [H0492]  
COCHINEAL, CARMINIC ACID, CARMINES ADDED [H0493]  
COPPER COMPLEXES OF CHLOROPHYLLINS ADDED [H0494]  
COPPER COMPLEXES OF CHLOROPHYLLS ADDED [H0495]  
COPPER COMPLEXES OF CHLOROPHYLLS, CHLOROPHYLLINS [H0797]  
CURCUMIN ADDED [H0496]  
CYCLAMATES ADDED [H0798]  
CYCLAMIC ACID ADDED [H0497]  
DELTA-TOCOPHEROL ADDED [H0498]  
DICALCIUM CITRATE ADDED [H0499]  
DICALCIUM DIPHOSPHATE ADDED [H0500]  
DICALCIUM PHOSPHATE ADDED [H0501]  
DIMETHYL DICARBONATE ADDED [H0502]  
DIMETHYL POLYSILOXANE ADDED [H0503]  
DIPHOSPHATES ADDED [H0799]  
DIPOTASSIUM DIPHOSPHATE ADDED [H0504]  
DIPOTASSIUM GUANYLATE ADDED [H0505]  
DIPOTASSIUM INOSINATE ADDED [H0506]  
DIPOTASSIUM PHOSPHATE ADDED [H0507]  
DIPOTASSIUM TARTRATE ADDED [H0508]  
DISODIUM 5'-RIBONUCLEOTIDES ADDED [H0509]  
DISODIUM CITRATE ADDED [H0510]  
DISODIUM DIPHOSPHATE ADDED [H0511]  
DISODIUM GUANYLATE ADDED [H0512]  
DISODIUM INOSINATE ADDED [H0513]  
DISODIUM PHOSPHATE ADDED [H0514]

DISODIUM TARTRATE ADDED [H0515]  
DISTARCH PHOSPHATE ADDED [H0516]  
DODECYL GALLATE ADDED [H0517]  
ENZYMATICALLY HYDROLYSED CARBOXY METHYL CELLULOSE, ENZYMATICALLY HYDROLYSED CELLULOSE GUM [H0800]  
ERYTHORBIC ACID ADDED [H0518]  
ERYTHRITOL ADDED [H0801]  
ERYTHROSINE ADDED [H0519]  
ETHYL CELLULOSE ADDED [H0802]  
ETHYL ESTER OF BETA-APO-8'-CAROTENIC ACID (C 30) ADDED [H0520]  
ETHYL METHYL CELLULOSE ADDED [H0521]  
ETHYL P-HYDROXYBENZOATE ADDED [H0522]  
EXTRACTS OF ROSEMARY ADDED [H0803]  
FATTY ACID ESTERS OF ASCORBIC ACID ADDED [H0804]  
FATTY ACIDS ADDED [H0523]  
FERROUS GLUCONATE ADDED [H0524]  
FERROUS LACTATE ADDED [H0525]  
FUMARIC ACID ADDED [H0526]  
GAMMA-TOCOPHEROL ADDED [H0527]  
GELLAN GUM ADDED [H0528]  
GLUCONIC ACID ADDED [H0529]  
GLUCONO-DELTA-LACTONE ADDED [H0530]  
GLUTAMIC ACID ADDED [H0531]  
GLYCEROL ADDED [H0532]  
GLYCEROL ESTERS OF WOOD ROSINS ADDED [H0533]  
GLYCERYL DIACETATE (DIACETIN) ADDED [H0805]  
GLYCERYL TRIACETATE (TRIACTIN) ADDED [H0534]  
GLYCINE ADDED [H0535]  
GLYCINE AND ITS SODIUM SALT ADDED [H0806]  
GOLD ADDED [H0536]  
GREENS S ADDED [H0537]  
GUANYLIC ACID ADDED [H0538]  
GUAR GUM ADDED [H0539]  
GUM ARABIC (ACACIA GUM) ADDED [H0400]  
HELIUM ADDED [H0540]  
HEXAMETHYLENE TETRAMINE ADDED [H0541]  
HYDROCHLORIC ACID ADDED [H0542]  
HYDROGEN ADDED [H0807]  
HYDROGENATED POLY-1-DECENE ADDED [H0808]  
HYDROXY PROPYL DISTARCH PHOSPHATE ADDED [H0543]  
HYDROXY PROPYL STARCH ADDED [H0544]  
HYDROXYPROPYL CELLULOSE ADDED [H0545]  
HYDROXYPROPYL METHYL CELLULOSE ADDED [H0546]  
INDIGOTINE, INDIGO CARMINE ADDED [H0547]  
INOSINIC ACID ADDED [H0548]  
INVERTASE ADDED [H0809]  
IRON OXIDES AND HYDROXIDES ADDED [H0549]  
ISOBUTANE ADDED [H0810]  
ISOMALT ADDED [H0550]  
KARAYA GUM ADDED [H0551]  
KONJAC ADDED [H0811]  
LACTIC ACID ADDED [H0552]  
LACTIC ACID ESTERS OF MONO- AND DIGLYCERIDES OF FATTY ACIDS ADDED [H0553]  
LACTITOL ADDED [H0554]  
L-ASCORBYL PALMITATE ADDED [H0812]  
L-CYSTEINE ADDED [H0813]  
LECITHINS ADDED [H0555]  
LITHOLRUBINE BK ADDED [H0556]  
LOCUST BEAN GUM ADDED [H0557]  
LUTEIN ADDED [H0558]  
LYCOPENE ADDED [H0559]  
LYSOZYME ADDED [H0560]  
MAGNESIUM CARBONATE ADDED [H0561]  
MAGNESIUM CARBONATES ADDED [H0814]  
MAGNESIUM CHLORIDE ADDED [H0562]  
MAGNESIUM DIGLUTAMATE ADDED [H0563]  
MAGNESIUM HYDROXIDE ADDED [H0564]  
MAGNESIUM HYDROXIDE CARBONATE ADDED [H0565]  
MAGNESIUM OXIDE ADDED [H0566]  
MAGNESIUM PHOSPHATES ADDED [H0815]  
MAGNESIUM SALTS OF FATTY ACIDS ADDED [H0567]

MAGNESIUM SILICATE ADDED [H0568]  
MAGNESIUM TRISILICATE ADDED [H0569]  
MALIC ACID ADDED [H0570]  
MALTITOL ADDED [H0571]  
MALTITOL SYRUP ADDED [H0572]  
MALTITOLS ADDED [H0816]  
MANNITOL ADDED [H0304]  
METATARTARIC ACID ADDED [H0574]  
METHYL CELLULOSE ADDED [H0575]  
METHYL P-HYDROXYBENZOATE ADDED [H0576]  
MICROCRYSTALLINE CELLULOSE ADDED [H0577]  
MICROCRYSTALLINE WAX ADDED [H0817]  
MIXED ACETIC AND TARTARIC ACID ESTERS OF MONO- AND DIGLYCERIDES OF FATTY ACIDS [H0578]  
MIXED CAROTENES ADDED [H0579]  
MONO- AND DIACETYL TARTARIC ACID ESTERS OF MONO- AND DIGLYCERIDES OF FATTY ACIDS [H0580]  
MONO- AND DIGLYCERIDES OF FATTY ACIDS ADDED [H0581]  
MONOAMMONIUM GLUTAMATE ADDED [H0582]  
MONOCALCIUM CITRATE ADDED [H0583]  
MONOCALCIUM PHOSPHATE ADDED [H0584]  
MONOPOTASSIUM CITRATE ADDED [H0585]  
MONOPOTASSIUM GLUTAMATE ADDED [H0586]  
MONOPOTASSIUM PHOSPHATE ADDED [H0587]  
MONOPOTASSIUM TARTRATE ADDED [H0588]  
MONOSODIUM CITRATE ADDED [H0589]  
MONOSODIUM GLUTAMATE ADDED [H0369]  
    MONOSODIUM GLUTAMATE ADDED [H0590]  
MONOSODIUM PHOSPHATE ADDED [H0591]  
MONOSODIUM TARTRATE ADDED [H0592]  
MONOSTARCH PHOSPHATE ADDED [H0593]  
MONTAN ACID ESTERS ADDED [H0594]  
NATAMYCIN ADDED [H0595]  
NEOHESPERIDINE DC ADDED [H0596]  
NISIN ADDED [H0597]  
NITROGEN ADDED [H0598]  
NITROUS OXIDE ADDED [H0599]  
OCTYL GALLATE ADDED [H0600]  
ORTOPHENYL PHENOL ADDED [H0601]  
OXIDIZED POLYETHYLENE WAX ADDED [H0602]  
OXIDIZED STARCH ADDED [H0603]  
OXYGEN ADDED [H0604]  
PAPRIKA EXTRACT, CAPSANTHIN, CAPSORUBIN ADDED [H0605]  
PATENT BLUE V ADDED [H0606]  
PECTIN ADDED [H0607]  
PECTINS ADDED [H0818]  
PENTAPOTASSIUM TRIPHOSPHATE ADDED [H0608]  
PENTASODIUM TRIPHOSPHATE ADDED [H0609]  
PHOSPHATED DISTARCH PHOSPHATE ADDED [H0610]  
PHOSPHORIC ACID ADDED [H0611]  
PLAIN CARAMEL ADDED [H0612]  
POLYDEXTROSE ADDED [H0613]  
POLYETHYLENE GLYCOL ADDED [H0819]  
POLYGLYCEROL ESTERS OF FATTY ACIDS ADDED [H0614]  
POLYGLYCEROL POLYRICINOLEATE ADDED [H0615]  
POLYOXYETHYLENE (20) SORBITAN MONOLAURATE (POLYSORBATE 20) ADDED [H0616]  
POLYOXYETHYLENE (20) SORBITAN MONOOLEATE (POLYSORBATE 80) ADDED [H0617]  
POLYOXYETHYLENE (20) SORBITAN MONOPALMITATE (POLYSORBATE 40) ADDED [H0618]  
POLYOXYETHYLENE (20) SORBITAN MONOSTEARATE (POLYSORBATE 60) ADDED [H0619]  
POLYOXYETHYLENE (20) SORBITAN TRISTEARATE (POLYSORBATE 65) ADDED [H0620]  
POLYOXYETHYLENE (40) STEARATE ADDED [H0621]  
POLYPHOSPHATES ADDED [H0820]  
POLYVINYL ALCOHOL (PVA) ADDED [H0821]  
POLYVINYLPIRROLIDONE ADDED [H0622]  
POLYVINYLPIRROLIDONE ADDED [H0623]  
PONCEAU 4R, COCHINEAL RED A ADDED [H0624]  
POTASSIUM ACETATE ADDED [H0625]  
POTASSIUM ADIPATE ADDED [H0626]  
POTASSIUM ALGINATE ADDED [H0627]  
POTASSIUM ALUMINIUM SILICATE ADDED [H0628]  
POTASSIUM BENZOATE ADDED [H0629]  
POTASSIUM CARBONATE ADDED [H0630]

POTASSIUM CARBONATES ADDED [H0822]  
POTASSIUM CHLORIDE ADDED [H0631]  
POTASSIUM CITRATES ADDED [H0823]  
POTASSIUM FERROCYANIDE ADDED [H0632]  
POTASSIUM GLUCONATE ADDED [H0633]  
POTASSIUM HYDROGEN CARBONATE ADDED [H0634]  
POTASSIUM HYDROGEN SULPHATE ADDED [H0635]  
POTASSIUM HYDROGEN SULPHITE ADDED [H0636]  
POTASSIUM HYDROXIDE ADDED [H0637]  
POTASSIUM LACTATE ADDED [H0638]  
POTASSIUM MALATE ADDED [H0639]  
POTASSIUM METABISULPHITE ADDED [H0640]  
POTASSIUM NITRATE ADDED [H0641]  
POTASSIUM NITRITE ADDED [H0642]  
POTASSIUM PHOSPHATES ADDED [H0824]  
POTASSIUM POLYPHOSPHATE ADDED [H0643]  
POTASSIUM PROPIONATE ADDED [H0644]  
POTASSIUM SACCHARIN ADDED [H0645]  
POTASSIUM SORBATE ADDED [H0646]  
POTASSIUM SULPHATE ADDED [H0647]  
POTASSIUM SULPHATES ADDED [H0825]  
POWDERED CELLULOSE ADDED [H0648]  
PROCESSED EUCHEMA SEAWEED ADDED [H0826]  
PROPANE ADDED [H0827]  
PROPANE-1,2-DIOL (PROPYLENE GLYCOL) ADDED [H0649]  
PROPANE-1,2-DIOL ALGINATE ADDED [H0650]  
PROPANE-1,2-DIOL ESTERS OF FATTY ACIDS ADDED [H0651]  
PROPIONIC ACID ADDED [H0652]  
PROPYL GALLATE ADDED [H0653]  
PROPYL P-HYDROXYBENZOATE ADDED [H0654]  
PULLULAN ADDED [H0828]  
QUILLAIA EXTRACT ADDED [H0655]  
QUINOLINE YELLOW ADDED [H0656]  
RED 2G ADDED [H0657]  
RIBOFLAVIN ADDED [H0658]  
RIBOFLAVIN-5'-PHOSPHATE ADDED [H0659]  
RIBOFLAVINS ADDED [H0829]  
SACCHARIN ADDED [H0660]  
SACCHARINS ADDED [H0830]  
SALT OF ASPARTAME-ACESULFAME ADDED [H0831]  
SHELLAC ADDED [H0661]  
SILICIUM DIOXIDE ADDED [H0662]  
SILVER ADDED [H0663]  
SODIUM ACETATE ADDED [H0664]  
SODIUM ACETATES ADDED [H0832]  
SODIUM ADIPATE ADDED [H0665]  
SODIUM ALGINATE ADDED [H0666]  
SODIUM ALUMINIUM PHOSPHATE, ACIDIC ADDED [H0667]  
SODIUM ALUMINIUM SILICATE ADDED [H0668]  
SODIUM ASCORBATE ADDED [H0669]  
SODIUM BENZOATE ADDED [H0670]  
SODIUM CALCIUM POLYPHOSPHATE ADDED [H0671]  
SODIUM CARBONATE ADDED [H0672]  
SODIUM CARBONATES ADDED [H0833]  
SODIUM CARBOXY METHYL CELLULOSE ADDED [H0673]  
SODIUM CITRATES ADDED [H0834]  
SODIUM CYCLAMATE ADDED [H0674]  
SODIUM ERYTHORBATE ADDED [H0675]  
SODIUM ETHYL P-HYDROXYBENZOATE ADDED [H0676]  
SODIUM FERROCYANIDE ADDED [H0677]  
SODIUM GLUCONATE ADDED [H0678]  
SODIUM GLYCINATE ADDED [H0679]  
SODIUM HYDROGEN ACETATE (SODIUM DIACETATE) ADDED [H0680]  
SODIUM HYDROGEN CARBONATE ADDED [H0681]  
SODIUM HYDROGEN MALATE ADDED [H0682]  
SODIUM HYDROGEN SULPHATE ADDED [H0683]  
SODIUM HYDROGEN SULPHITE ADDED [H0684]  
SODIUM HYDROXIDE ADDED [H0685]  
SODIUM LACTATE ADDED [H0686]  
SODIUM MALATE ADDED [H0687]

SODIUM MALATES ADDED [H0835]  
SODIUM METABISULPHITE ADDED [H0688]  
SODIUM METHYL P-HYDROXYBENZOATE ADDED [H0689]  
SODIUM NITRATE ADDED [H0690]  
SODIUM NITRITE ADDED [H0691]  
SODIUM ORTOPHENYL PHENOL ADDED [H0692]  
SODIUM PHOSPHATES ADDED [H0836]  
SODIUM POLYPHOSPHATE ADDED [H0693]  
SODIUM POTASSIUM TARTRATE ADDED [H0694]  
SODIUM PROPIONATE ADDED [H0695]  
SODIUM PROPYL P-HYDROXYBENZOATE ADDED [H0696]  
SODIUM SACCHARIN ADDED [H0697]  
SODIUM SESQUICARBONATE ADDED [H0698]  
SODIUM STEAROYL-2-LACTYLATE ADDED [H0699]  
SODIUM SULPHATE ADDED [H0700]  
SODIUM SULPHATES ADDED [H0837]  
SODIUM SULPHITE ADDED [H0701]  
SODIUM TARTRATES ADDED [H0838]  
SODIUM TETRABORATE (BORAX) ADDED [H0702]  
SODIUM, POTASSIUM AND CALCIUM SALTS OF FATTY ACIDS ADDED [H0703]  
SORBIC ACID ADDED [H0704]  
SORBITAN MONOLAURATE ADDED [H0705]  
SORBITAN MONOOLEATE ADDED [H0706]  
SORBITAN MONOPALMITATE ADDED [H0707]  
SORBITAN MONOSTEARATE ADDED [H0708]  
SORBITAN TRISTEARATE ADDED [H0709]  
SORBITOL ADDED [H0710]  
SORBITOL SYRUP ADDED [H0711]  
SORBITOLS ADDED [H0839]  
SOYBEAN HEMICELLULOSE ADDED [H0840]  
STANNOUS CHLORIDE ADDED [H0712]  
STARCH ALUMINIUM OCTENYL SUCCINATE ADDED [H0841]  
STARCH SODIUM OCTENYL SUCCINATE ADDED [H0713]  
STEARYL TARTRATE ADDED [H0714]  
STEVIOL GLYCOSIDES ADDED [H0842]  
SUCCINIC ACID ADDED [H0715]  
SUCRALOSE ADDED [H0843]  
SUCROGLYCERIDES ADDED [H0716]  
SUCROSE ACETATE ISOBUTYRATE ADDED [H0717]  
SUCROSE ESTERS OF FATTY ACIDS ADDED [H0718]  
SULPHITE AMMONIA CAMEL ADDED [H0719]  
SULPHUR DIOXIDE ADDED [H0720]  
SULPHURIC ACID ADDED [H0721]  
SUNSET YELLOW FCF, ORANGE YELLOW S ADDED [H0722]  
TALC ADDED [H0723]  
TARA GUM ADDED [H0724]  
TARTARIC ACID (L(+)-) ADDED [H0725]  
TARTARIC ACID ESTERS OF MONO- AND DIGLYCERIDES OF FATTY ACIDS ADDED [H0726]  
TARTRAZINE ADDED [H0727]  
TERTIARY-BUTYL HYDROQUINONE (TBHQ) ADDED [H0844]  
TETRAPOTASSIUM DIPHOSPHATE ADDED [H0728]  
TETRASODIUM DIPHOSPHATE ADDED [H0729]  
THAUMATIN ADDED [H0730]  
THERMALLY OXIDIZED SOYA BEAN OIL INTERACTED WITH MONO- AND DIGLYCERIDES OF FATTY [H0731]  
THIABENDAZOLE ADDED [H0732]  
TITANIUM DIOXIDE ADDED [H0733]  
TOCOPHEROL-RICH EXTRACT ADDED [H0734]  
TRAGACANTH ADDED [H0735]  
TRIAMMONIUM CITRATE ADDED [H0736]  
TRICALCIUM CITRATE ADDED [H0737]  
TRICALCIUM PHOSPHATE ADDED [H0738]  
TRIETHYL CITRATE ADDED [H0739]  
TRIPHOSPHATES ADDED [H0845]  
TRIPOTASSIUM CITRATE ADDED [H0740]  
TRIPOTASSIUM PHOSPHATE ADDED [H0741]  
TRISODIUM CITRATE ADDED [H0742]  
TRISODIUM DIPHOSPHATE ADDED [H0743]  
TRISODIUM PHOSPHATE ADDED [H0744]  
VEGETABLE CARBON ADDED [H0745]  
XANTHAN GUM ADDED [H0746]

XYLITOL ADDED [H0747]  
 ZINC ACETATE ADDED [H0846]  
 FOOD ADDITIVE ADDED, USA [H0371]  
   MONOSODIUM GLUTAMATE ADDED [H0369]  
     MONOSODIUM GLUTAMATE ADDED [H0590]  
 STABILIZER ADDED [H0368]  
   CELLULOSE DERIVATIVE ADDED [H0372]  
     CARBOXYMETHYL CELLULOSE ADDED [H0374]  
     MICROCRYSTALLINE CELLULOSE ADDED [H0373]  
   GELATIN ADDED [H0165]  
   GUM ADDED [H0375]  
     MICROBIAL GUM ADDED [H0387]  
       DEXTRAN ADDED [H0389]  
       XANTHAN GUM ADDED [H0388]  
     PLANT EXUDATE GUM ADDED [H0379]  
       GUM ARABIC ADDED [H0380]  
       KARAYA GUM ADDED [H0381]  
       TRAGACANTH GUM ADDED [H0382]  
     SEED GUM ADDED [H0376]  
       CAROB BEAN GUM ADDED [H0377]  
       GUAR GUM ADDED [H0378]  
   PECTIN ADDED [H0145]  
   SEAWEED EXTRACT ADDED [H0383]  
     AGAR ADDED [H0384]  
     ALGINATE ADDED [H0385]  
     CARRAGEENAN ADDED [H0386]  
   STARCH ADDED [H0146]  
     DEXTRIN ADDED [H0390]  
     MODIFIED STARCH ADDED [H0279]  
 LEAVENING AGENT ADDED [H0751]  
   CHEMICAL LEAVENING AGENT ADDED [H0351]  
   SOURDOUGH ADDED [H0752]  
   YEAST ADDED [H0753]  
 NUTRIENT OR DIETARY SUBSTANCE ADDED [H0194]  
   AMINO ACID ADDED [H0210]  
   CAFFEINE ADDED [H0849]  
   D-GLUCURONO-GAMMA-LACTONE ADDED [H0850]  
   GUARANA ADDED [H0848]  
   MINERAL ADDED [H0159]  
     CALCIUM ADDED [H0162]  
     CHLORIDE ADDED [H0196]  
     CHROMIUM ADDED [H0778]  
     COPPER ADDED [H0775]  
     FLUORIDE ADDED [H0780]  
     IODIZED [H0189]  
     IRON ADDED [H0181]  
     MAGNESIUM ADDED [H0774]  
     MANGANESE ADDED [H0776]  
     MOLYBDENUM ADDED [H0779]  
     PHOSPHORUS ADDED [H0223]  
     POTASSIUM ADDED [H0195]  
     SELENIUM ADDED [H0777]  
     SODIUM ADDED [H0144]  
     ZINC ADDED [H0273]  
   PLANT STEROLS ADDED [H0854]  
   TAURINE ADDED [H0847]  
   VITAMIN ADDED [H0163]  
     BIOTIN ADDED [H0773]  
     FOLIC ACID ADDED [H0761]  
     PANTOTHENIC ACID ADDED [H0770]  
     VITAMIN A OR CAROTENES ADDED [H0213]  
       CAROTENES ADDED [H0317]  
       VITAMIN A ADDED [H0316]  
     VITAMIN B ADDED [H0216]  
       NIACIN ADDED [H0311]  
       RIBOFLAVIN ADDED [H0310]  
       THIAMINE ADDED [H0309]  
       VITAMIN B12 ADDED [H0772]  
       VITAMIN B6 ADDED [H0771]  
     VITAMIN C ADDED [H0215]

- VITAMIN D ADDED [H0214]
- VITAMIN E ADDED [H0217]
- VITAMIN K ADDED [H0769]
- PHOSPHATE ADDED [H0370]
- PROTEIN ADDED [H0164]
  - GELATIN ADDED [H0165]
  - GLUTEN ADDED [H0758]
  - MILK PROTEIN ADDED [H0748]
  - SOY PROTEIN ADDED [H0257]
- NO TREATMENT APPLIED [H0003]
- TREATMENT APPLIED NOT KNOWN [H0001]
- WATER ADDED OR REMOVED [H0254]
  - REHYDRATED [H0259]
  - WATER ADDED [H0148]
    - DILUTED TO 15-49% OF SINGLE STRENGTH [H0234]
    - DILUTED TO 50-99% OF SINGLE STRENGTH [H0237]
  - WATER REMOVED [H0138]
    - WATER REMOVED TO RECONSTITUTION RATIO 1 PLUS 1 [H0114]
    - WATER REMOVED TO RECONSTITUTION RATIO 2 PLUS 1 [H0113]
    - WATER REMOVED TO RECONSTITUTION RATIO 3 PLUS 1 OR HIGHER [H0112]

  - CLUPEOTOXIC POISONING [Z0226]
  - DIARRHETIC SHELLFISH POISONING [Z0228]
  - DIPHYLLOTHRIUM INFESTATION [Z0227]
  - HAZARD 1 [Z0229]
  - HAZARD 10 [Z0238]
  - HAZARD 2 [Z0230]
  - HAZARD 3 [Z0231]
  - HAZARD 4 [Z0232]
  - HAZARD 5 [Z0233]
  - HAZARD 6 [Z0234]
  - HAZARD 7 [Z0235]
  - HAZARD 8 [Z0236]
  - HAZARD 9 [Z0237]
  - ICHTHYOALLYEINOTOXIC POISONING [Z0239]
  - ICHTHYOCRINOTOXIC POISONING [Z0240]
  - ICHTHYOHEPATOTOXIC POISONING [Z0241]
  - ICHTHYOOTOXIC POISONING [Z0242]
  - LEAD POISONING [Z0243]
  - NEMATODE INFESTATION [Z0245]
  - NEUROTOXIC SHELLFISH POISONING [Z0246]
  - PARALYTIC SHELLFISH POISONING [Z0247]
  - SCOMBROTOXIC [Z0248]
  - SODIUM TRIPOLYPHOSPHATE [Z0244]
  - TETRODOTOXIC POISONING [Z0249]
- MATERIAL OF CONTACT PRIOR TO PACKAGING [Z0077]
  - PROCESSED IN GLASS CONTAINER [Z0082]
  - PROCESSED IN METAL CONTAINER [Z0078]
    - PROCESSED IN COPPER CONTAINER [Z0079]
    - PROCESSED IN IRON CONTAINER [Z0080]
    - PROCESSED IN STAINLESS STEEL CONTAINER [Z0081]
  - PROCESSED IN PLASTIC CONTAINER [Z0083]
  - PROCESSED IN STONE CONTAINER [Z0084]
  - PROCESSED IN TEFLON-COATED CONTAINER [Z0101]
  - PROCESSED IN WOOD CONTAINER [Z0085]
- PRESENCE OF CASING OR RIND [Z0102]
  - TYPE OF RIND OR CRUST [Z0071]
    - CHEESE RIND, ARTIFICIAL [Z0148]
    - CHEESE RIND, MOLDY [Z0073]
    - CHEESE RIND, NATURAL [Z0147]
    - CHEESE RIND, WASHED OR BRUSHED [Z0072]
  - TYPE OF SAUSAGE CASING [Z0092]
    - EDIBLE SAUSAGE CASING [Z0094]
    - INEDIBLE SAUSAGE CASING [Z0093]
    - NO SAUSAGE CASING [Z0096]
    - SAUSAGE CASING NOT KNOWN [Z0095]
- PRESENCE OF PACKING MEDIUM [Z0218]
  - DRAINED [Z0219]
  - NOT DRAINED [Z0220]

- PRODUCTION ENVIRONMENT [Z0206]
  - AGRICULTURAL PRODUCTION ENVIRONMENT [Z0152]
    - DOMESTIC OR CULTIVATED [Z0154]
      - FREE-RANGE [Z0292]
    - SEMIDOMESTIC OR SEMIWILD [Z0204]
    - WILD OR GATHERED [Z0153]
  - GROWING CONDITION [Z0207]
    - ORGANIC GROWING CONDITION [Z0253]
      - ORGANIC OUTDOOR/OPEN-AIR PRODUCTION GROWING CONDITION [Z0210]
      - ORGANIC UNDER GLASS/PROTECTED PRODUCTION GROWING CONDITION [Z0213]
    - OUTDOOR/OPEN-AIR GROWING CONDITION [Z0208]
      - CONVENTIONAL OUTDOOR/OPEN-AIR PRODUCTION GROWING CONDITION [Z0209]
      - ORGANIC OUTDOOR/OPEN-AIR PRODUCTION GROWING CONDITION [Z0210]
    - UNDER GLASS/PROTECTED GROWING CONDITION [Z0211]
      - CONVENTIONAL UNDER GLASS/PROTECTED PRODUCTION GROWING CONDITION [Z0212]
      - HYDROPONIC GROWING CONDITION [Z0214]
      - ORGANIC UNDER GLASS/PROTECTED PRODUCTION GROWING CONDITION [Z0213]
  - ORGANIC PRODUCTION [Z0291]
    - ORGANIC GROWING CONDITION [Z0253]
      - ORGANIC OUTDOOR/OPEN-AIR PRODUCTION GROWING CONDITION [Z0210]
      - ORGANIC UNDER GLASS/PROTECTED PRODUCTION GROWING CONDITION [Z0213]
  - PREPARATION ESTABLISHMENT [Z0108]
    - COMMISSARY PREPARED [Z0113]
    - FOOD INDUSTRY PREPARED [Z0112]
    - HOME PREPARED [Z0109]
    - RESTAURANT OR FAST FOOD PREPARED [Z0119]
      - FAST FOOD RESTAURANT PREPARED [Z0111]
      - RESTAURANT PREPARED [Z0110]
    - STREET VENDOR PREPARED AND/OR SOLD [Z0120]
  - PRODUCTION ENVIRONMENT NOT KNOWN [Z0215]
  - PRODUCTION ENVIRONMENT OTHER [Z0216]
- STATUS OF FOOD NAME [Z0087]
  - CONTROLLED DESIGNATION OF ORIGIN (AOC) [Z0086]
  - CONTROLLED ORIGIN DENOMINATION (DOC) [Z0258]
  - PROTECTED GEOGRAPHICAL STATUS (PGS) [Z0254]
    - PROTECTED DESIGNATION OF ORIGIN (PDO) [Z0255]
    - PROTECTED GEOGRAPHICAL INDICATION (PGI) [Z0256]
  - TRADITIONAL SPECIALITY GUARANTEED (TSG) [Z0257]

LanguaL™ stands for “**Langua Alimentaria**” or “language of food”. It is an automated method for describing, capturing and retrieving data about food. The work on LanguaL™ was started in the late 1970's by the Center for Food Safety and Applied Nutrition (CFSAN) of the United States Food and Drug Administration (FDA) as an ongoing co-operative effort of specialists in food technology, information science and nutrition. Since then, LanguaL™ has been developed in collaboration with the US National Cancer Institute (NCI), and, more recently, its European partners, notably in France, Denmark, Switzerland and Hungary. Since 1996, the European LanguaL™ Technical Committee has administered the thesaurus.

This report presents the details of the present version, LanguaL™ 2017 Thesaurus, according to international thesaurus standards, and alphabetical display of descriptors and synonyms (non-descriptors) as well as the systematic display of the thesaurus hierarchy.
