### Abstract

Lectotypes are designated here for taxa of the genus *Ammi* L. described by H.C. Watson from the Azores islands. The names *Ammi huntii* H.C. Watson, *A. seubertianum* (H.C. Watson) Benth. & Hook. f. ex Trel. and *A. trifoliatum* (H.C. Watson) Benth. & Hook. f. ex Trel. still remain untypified from their description. Those typifications constitute the starting point to further taxonomical studies on that aggregate.

### Keywords

*Ammi*, Apiaceae, Azores, nomenclature, typification.
