RESOLUTION NO. 27127.

WHEREAS, the Director General of Railroads increased all freight rates of railroads under Federal Control on crushed rock, sand, and gravel twenty cents (20¢) per ton of two thousand pounds (2000 lbs.) effective June 25, 1918, for the dual purpose of increasing the net earnings of the carriers and discouraging unnecessary building and development work so that mere man-power would be available for other industries more vital to the successful prosecution of the World War, and

WHEREAS the railroad companies under proceedings known as "Ex Parte 74" were authorized by the Interstate Commerce Commission and the Railroad Commission of California to further increase their freight rates twenty-five per cent (25%) on said commodities effective August 26, 1920 resulting in many instances in total increases as great as one hundred per cent (100%) over the rates in effect June 24, 1918, and

WHEREAS these combined increases (although subsequently modified in some instances) have resulted in freight rates which we believe are unreasonable for the service performed, and

WHEREAS road and street improvement work was practically abandoned during our participation in the late World War due to demand for labor in industries more vital to the successful prosecution of the war as well as the prohibitive cost of labor, transportation, and materials, and

WHEREAS the street improvement program of this municipality has been seriously hindered and delayed by the causes recited above and is still being hindered by the existing high freight rates on crushed rock, sand and gravel, the principal materials necessary for such improvement and development work, and

WHEREAS the President of the United States and Governors of several states have urged the vital necessity of reductions of freight rates on building materials to stimulate industry, relieve unemployment and restore our Country to a normal status, and

WHEREAS freight rates on sand, gravel, and crushed rock have been materially reduced in numerous states and sections of the Country recently, while no substantial reductions have been made in the rates on these commodities in California, and

WHEREAS material reductions in the cost of labor and other operating expenses of the common carriers in California have been effected since August 26, 1920 which have not been reflected in the rates on road building materials, and

WHEREAS a general reduction of freight rates on rock, sand, and gravel will undoubtedly result in a heavy increase in tonnage not only of these materials but of numerous other related commodities which carry higher rates thereby maintaining, if not increasing, the net earnings of said carriers,

NOW THEREFORE, BE IT RESOLVED that the Common Council of the City of San Diego, California, hereby respectfully requests the common carriers of California, particularly the Southern Pacific Company, the Atchison, Topeka & Santa Fe Railway Co., the Los Angeles & Salt Lake Railroad, the Pacific Electric Railway Co., and the San Diego and Arizona Ry. Co., to immediately revise their tariffs, restoring rates on crushed rock, sand, and gravel not in excess of those in effect August 25, 1920, and

BE IT FURTHER RESOLVED that a copy of this resolution be sent to the Railroad Commission of the State of California, and to the following named railroads, to-wit:

- The Southern Pacific Company,
- The Atchison, Topeka & Santa Fe Railway Co.,
- The Los Angeles & Salt Lake Railroad,

WHEREAS, the San Diego County Water Company, through Mr. John Treanor, Vice-President and General Manager, has submitted to The City of San Diego a formal proposition to sell water to the City at the rate of fifteen cents per thousand gallons, for a term of forty years, such water to be developed by the installation and construction of a dam at Warner's Dam Site, in San Diego County; and

WHEREAS, the said San Diego County Water Company has also submitted to the City a proposition for the sale of the properties belonging to the said San Diego County Water Company to the City upon certain terms and conditions outlined in a communication on file with the City Clerk, contained in Document No. 140901; and

WHEREAS, this Common Council, though realizing that The City of San Diego should secure for the use of its inhabitants all water available in the County, nevertheless deem it unwise at this time to enter into either of the proposed contracts as submitted, for the following reasons:

WHEREAS, by reason of the above this Common Council is of the opinion that the interests of The City of San Diego will be better served at this time by developing the San Diego River than by the acceptance of the propositions hereinabove outlined, and that, therefore, both said propositions as submitted should be rejected; NOW, THEREFORE,

 That the following Resolution adopted at Santa Ana, California, May 4, 1922, at a called convention of Representatives of The Southern Section of the League of California Municipalities, of the Farm Bureaus and Farm Centers of Southern California and of the Imperial Irrigation Districts, be, and the same is hereby adopted as an expression of opinion of the Common Council of said City:

"WHEREAS, it is apparent to all persons acquainted with the facts that the great Imperial Valley in California is annually in imminent danger of being overflowed and flooded by the Colorado River; that the menace of this river is increasing with the years; that its bed is filling and rising about one foot a year; that its bottom is now several feet higher than it was when it broke into the valley several years ago and formed the Salton Sea; that its levies must be built higher each year; that the only available dirt for levy construction is very poor material for the purpose; that should the Colorado River break through the levies again its destruction would be immeasurable; and that the havoc of its deluge would be great and appalling because it would not only be immediately destructive, but its evil effects would be permanent for the reason that its waters would not run off or subside, as in floods most everywhere else, but would gather in the basin of the valley, which is below sea level, as in the formation of the Salton Sea, and remain until the river again turns to another outlet and until the sunshine of centuries again lifts these waters by evaporation; and

WHEREAS, relief can be had from this portending catastrophe, and the fifty thousand people and the millions of dollars worth of land and other property in this valley can be made safe by the construction of flood control dams in the river basin; and hundreds of thousands of acres of additional lands can be irrigated, and immense amounts of hydro-electric power can be developed; and,

WHEREAS, House of Representatives Bill No. 11449, "To Provide for the Protection and Development of the lower Colorado River Basin," introduced in the House of Representatives by Congressman Phil Swing and in the Senate, Hiram W. Johnson, is a measure looking to the early accomplishment of these purposes in the best and most practical manner;

NOW, THEREFORE, BE IT RESOLVED by the joint convention of the representatives of the Southern Section of the League of California Municipalities, of the Farm Bureaus and Farm Centers of Southern California and of the Imperial Irrigation Districts, duly assembled in the City of Santa Ana, California, on Thursday, the fourth day of May, 1922, pursuant to call and notice regularly made and given,

That House of Representatives Bill No. 11449, "To Provide for the Protection and Development of the Lower Colorado River Basin", be approved and endorsed;

That we urge upon the committee on Irrigation of Arid Lands and upon the Congress the imperative necessity of an early report and passage of this bill that the relief therein proposed may soon be given;

That we request the Senators and Congressmen from California to give their special attention to this measure and press its adoption," and

BE IT FURTHER RESOLVED, that this Common Council urges that all possible means be taken to expedite the passage of the bill mentioned in the above resolution, and

BE IT FURTHER RESOLVED, that a copy of this resolution be forwarded by the City Clerk to each of the Representatives and Senators from the State of California.

Passed and adopted by the said Common Council of the said City of San Diego, California, this 15th day of May 1922, by the following vote, to-wit:

GRANTING PERMISSION TO THE PACIFIC FIRE EXTINGUISHER COMPANY TO CONNECT AUTOMATIC FIRE ALARM APPARATUS TO THE MUNICIPAL FIRE ALARM SYSTEM, IN THE CITY OF SAN DIEGO.

WHEREAS, the PACIFIC FIRE EXTINGUISHER COMPANY has applied to the Common Council of The City of San Diego for permission to connect with the city fire alarm system certain private fire detection service, known as the Reichel Automatic Fire Alarm System, throughout the City; and

WHEREAS, this Common Council is of the opinion that better fire protection will be given to buildings and property in The City of San Diego by the installation of such automatic fire alarm apparatus and its connection with the city fire alarm system, by enabling the Fire Department to more readily respond to fire alarms, and to give better service and protection to the City, NOW, THEREFORE,

BE IT RESOLVED by the Common Council of The City of San Diego, as follows:

That the Pacific Fire Extinguisher Company be, and it is hereby granted permission to connect with the city fire alarm system such automatic fire alarm apparatus as may be approved by the Chief Engineer of the San Diego Fire Department, and to operate and maintain

said automatic fire alarm apparatus in connection with said city fire alarm system, upon the following terms and conditions:

(1) That only such automatic fire alarm apparatus be installed as may be first approved by the National Board of Underwriters.

(2) That all such apparatus shall be installed under the direction and supervision of the Chief Engineer of the Fire Department, and only after a written notice shall be furnished to said Chief Engineer by said Pacific Fire Extinguisher Company, which said notice shall state the address of the owner and tenant of the building or buildings in which such fire detection service system is proposed to be installed, the location of the wire terminals, and any other essential information regarding the proposed installation as may be required for the proper connection of such automatic system to the municipal fire alarm system.

(3) That upon receipt of such written notice the Chief Engineer of the Fire Department shall determine and designate a point on the nearest municipal fire alarm circuit, closest to the building in which said automatic Reichel system is to be installed, and shall assign a code number for the signal to be transmitted for fire alarms, and likewise a code number for the transmission of trouble alarms, from the particular fire detection service system which is to be connected to the municipal fire alarm system at the point designated.

(4) Each fire detection service system so installed shall be a complete automatic self-contained system within itself, the wires of which terminate in an outside manual positive non-interfering and succession weatherproof, street type, fire alarm box or transmitter, which shall be installed on the outside of the building at or near the building property line, at a point most advantageous for use by the owner or tenant of the building, and readily accessible and available to the general public as a municipal fire alarm box. Each such manual fire alarm box or transmitter for each system connected with the city fire alarm system shall be actuated or tripped automatically by electrical current, provided as a part of the self-contained automatic fire detection service system, causing a coded signal to be transmitted over the municipal fire alarm system in the same manner as a signal is transmitted whenever such box is operated by hand. The wires of the city fire alarm system shall be connected to the manual street box. The manual street box or transmitter shall in transmitting signals, open and close the electrical municipal fire alarm circuit in a manner which shall be in accordance with the standard fire alarm practice, and with the rules of the National Board of Fire Underwriters, and with respect to the particular timing of signals, or otherwise conform to and operate satisfactorily in connection with the city fire alarm system.

(5) All such fire detection service systems shall be under the maintenance and periodical inspection of the Pacific Fire Extinguisher Company. If for any reason the operation of any individual fire detection service system is discontinued before such system has been in service or operated in connection with the city system for less than one year from the date of the first authorized connection of such fire detection service system to the city system, the Pacific Fire Extinguisher Company shall, after thirty days' written notice served upon the Chief Engineer of the Fire Department, have the right to disconnect the outside manual fire alarm box or transmitter furnished by said company in connection with such fire detection service system from the city system, and remove said box or transmitter; provided, however, that where such fire detection service system has been in operation in connection with the city fire alarm system for one year, such individual outside manual fire alarm box or transmitter, together with the wires or wiring construction connecting the same to the city fire alarm system shall not be disconnected or removed without specific permission in writing from the chief Engineer of the San Diego Fire Department, and from and after said date said box, together with the wiring and other equipment shall belong to and become the property of The City of San Diego.

It is expressly stipulated and understood that as a part of the condition precedent to, and as a part of the consideration in granting this permit, such manual street fire alarm box or transmitter, together with the wires or wiring construction connecting the same with the city fire alarm system, shall be and become the property of The City of San Diego after the said year hereinabove specified, and shall not be disconnected or removed from its original location, but shall be available for use by the city in any manner that the city authorities may designate.

(6) All such fire detection service systems shall be installed at the expense of the Pacific Fire Extinguisher Company, and the cost of the construction of lines and the installation of said boxes, and the operation and maintenance of said fire detection service systems shall be borne by the Pacific Fire Extinguisher Company.

(7) Whenever any lines or wire construction are required to be done at the expense of the Pacific Fire Extinguisher Company between the manual street box or transmitter and the city fire alarm lines, it is stipulated and understood that as a part of the consideration in granting this permit, The City of San Diego shall grant to the Pacific Fire Extinguisher Company such permission or rights of access to cables, conduits or poles belonging to the City, and the same right of access to cables, conduits or poles of power, telephone or telegraph companies, persons, firms or individuals, as The City of San Diego would enjoy should The City of San Diego be constructing such lines or wire construction; and that where pin or pole contact rentals, cable rentals, or underground conduit rentals are involved, the expense to the said Pacific Fire Extinguisher Company shall not be any greater than The City of San Diego would be subjected to were said City to construct such lines or wire construction which are, to all purposes and intent, an extension of the city fire alarm system lines; and such wire construction or lines shall immediately on completion thereof become the property of The City of San Diego.

(8) The construction of lines as provided in paragraph Seven, when done by the Pacific Fire Extinguisher Company, shall be of the same type of construction or conform to the specifications of The City of San Diego for such wire or line construction, and shall conform to the rules of the National Board of Fire Underwriters.

(9) The inside construction and installation, electrical apparatus or wires comprising each fire detection service system, shall be in accordance with the rules of the National Board of Fire Underwriters and of The City of San Diego governing signaling system, and each heat detector used in such system shall bear an inspection label of the Underwriters' Laboratories of the National Board of Fire Underwriters. Periodical inspections of each fire detection service system shall be made by authorized capable representatives of the Pacific Fire Extinguisher Company, with such frequency as may be necessary to maintain the equipment in a safe, reliable operating condition.

(10) If at any time any individual fire detection service system shall be interfering with the safe and reliable operation of the city fire alarm system, The City of San Diego, shall at its option, temporarily disconnect such fire detection service system from connection with the city fire alarm system, until such time as the said Pacific Fire Extinguisher Company has removed the cause of such interference; or otherwise put the fire detection service system in a condition where it no longer interferes with the safe and reliable operation of the city fire alarm system. Whenever any fire detection service system is disconnected by The City of San Diego, as hereinabove provided, The City of San Diego shall immediately notify both the said Pacific Fire Extinguisher Company and the owner or tenant of the building containing the fire detection service system so disconnected,

giving the exact date and clock time the fire detection service system ceased to be connected with the city fire alarm system.

(11) The City of San Diego agrees to record all fire alarm signals and all trouble signals received from each and every fire detection service system, giving the exact date and clock time such signals were transmitted over the city fire alarm system, together with the box number or code for each signal, in the same manner as all signals or alarms are recorded from the city fire alarm boxes or transmitters. The Pacific Fire Extinguisher Company shall notify the Fire Alarm Headquarters of The City of San Diego the exact date and clock time each system is restored to normal condition, after each signal is transmitted, and the said Company shall, at the request of said City, submit to said City, at periods agreed upon, a report or list of all signals with the cause for each signal stated in such report, and said report of causes of signals shall not be exhibited by The City of San Diego to any person, except officials of said City, without the written consent of said Pacific Fire Extinguisher Company. The regular daily log or record of alarm signals maintained by The City of San Diego in which signals from fire detection service systems are recorded, shall be open to the inspection of authorized representatives of the Pacific Fire Extinguisher Company.

(12) As a part of the consideration for the granting of this permit the Pacific Fire Extinguisher Company shall pay to The City of San Diego one dollar (\$1.00) per month for each connection with the city fire alarm system made by said company in the installation, operation and maintenance of said fire detection service systems.

(13) This permit is to be effective and operative for a period of time not to exceed twenty-five (25) years; provided, however, that at any time during the said period of twenty-five (25) years the Common Council may, if in their judgment the best interests of The City of San Diego dictate, the removal and disconnection of said systems, order the same removed and disconnected, and upon the service of a written notice of the action of said common council upon said Pacific Fire Extinguisher Company by said City this permit shall terminate, and the said Company shall immediately disconnect any and all of said fire protection equipment from the city system.

(14) Should the Board of Fire Underwriters having jurisdiction over approval of the granting of fire insurance rates or credits for automatic fire alarm systems, withdraw its rate credit or approval of the Reichel Fire Detection Service System, or should the underwriters' Laboratories discontinue the approval and issuance of label for Reichel Fire Detection Service System detectors; or should the Reichel Fire Detection Service Systems connected to the city fire alarm system become a menace to the safe and reliable operation of the city fire alarm system by reason of neglect on the part of The Pacific Fire Extinguisher Company to properly inspect and maintain a majority of the systems in service in The City of San Diego, then, and in the event of any of these specific conditions, causes or events occurring, The City of San Diego may revoke the privileges granted by this permit by proper resolution of the Common Council of The City of San Diego.

(15) The City of San Diego shall not be held liable for any damage or claims for loss or injury to any employee or property of the Pacific Fire Extinguisher Company that may occur or be occasioned, during or after, and by reason of, the connection of the city fire alarm system to any fire detection service system or systems.

(16) The Pacific Fire Extinguisher Company shall have the right to change its corporate title, or to assign the rights and business for the operation of Reichel Automatic Fire Detection Service Systems in The City of San Diego; but such successors or assigns to the business of operating such fire detection service systems in connection with the fire alarm system of The City of San Diego shall continue to operate and maintain any Reichel Fire Detection Service System in The City of San Diego in a manner equal to the methods and service provided by the Pacific Fire Extinguisher Company; and that failure on the part of any successor or assign to operate or maintain Reichel Fire Detection Service Systems in a manner equal to that of the Pacific Fire Extinguisher Company shall be sufficient cause for therevoking of this permit, by proper resolution of the Common Council of the City of San Diego.
