

After the personal names on the numbered pages of *The Centennial History of the Town of Dryden* had been indexed, it was decided that it would be desirable to have an additional index of the maps which are included with the book.

Since two of the five maps are on numbered pages (Varna p. 130, Etna pp. 136-137), there will be some duplication of names previously indexed, but in this case shops, factories, churches, schools, etc., as well as the names of householders, will be identified as to location by the numbers appearing on the maps.

The map of Dryden village (coded DV in this index) is bound between pages 86 and 87. The map of Freeville village (coded FV) is between pages 150 and 151. On these maps, the indexed items will be located by street and number.

The map of the Town of Dryden (coded TD) is contained in an envelope attached inside the front cover of the volume. All locations on this map will be identified by lot number.
