

## Plant Health Clinic 2014 Summary Report

The Plant Health Clinic received 2601 plant samples in 2014. Horticultural samples continue to follow the trend of recent years by comprising the largest percentage of samples received. The largest category of samples in 2014 was for the category Trees/shrubs (40.0%), followed by Turf (24.7%), Vegetables (12.6%), Fruit/Nut (11.7%), Perennials (3.6%), Field Crops (3.3%), Annuals (1.6%), Other (1.0%), Unknown (0.8%), Forage (0.4%), Weed (0.3%). Note that Unknown are samples, either plant or insect that come into the lab to be identified. The Other category is comprised of samples, usually of ambiguous material that neither the grower or county agent can categorize.
