

THUNBERGIA

26

Fungi Exsiccati Suecici Praesertim Upsalienses

Mandatu Collegii ex Friesio nominati
edendos curaverunt

L. Holm et S. Ryman

Fasc. 71 & 72 (Nos 3501 – 3600)

DISTRIBUTED BY THE BOTANICAL MUSEUM, UPPSALA UNIVERSITY
1997

THUNBERGIA is the continuation of 'Publications from the Herbarium, University of Uppsala', of which 19 numbers were issued between 1978 and 1986. The name is given in memory of Carl Peter Thunberg (1743–1828), a disciple of Linnaeus and a famous traveller to South Africa and Japan. His collections, about twentyseven thousand sheets, were transferred to our University in 1785, and became the foundation of the Botanical Museum. Thunberg succeeded Linnaeus filius as professor in 1785 and held the professorship to his death.

Thunbergia is issued irregularly and distributed on exchange basis or by order to the address below.

Contributions are refereed by external specialists.

THUNBERGIA 26

Fungi Exsiccati Suecici, Praesertim Upsalienses

Fasc. 71 & 72

L. Holm & S. Ryman

UPPSALA 1997

Distributor: Botanical Museum, Uppsala University

Fungi Exsiccati Suecici, Praesertim Upsalienses

Fasc. 71 & 72

Lennart Holm & Svengunnar Ryman

Holm, L. & Ryman, S. 1997. Fungi Exsiccati Suecici, Praesertim Upsalienses. Fasc. 71 & 72 (Nos 3501–3600). – Thunbergia 26: 1–41.
ISSN-0283-2275.

The fascicles 71 & 72 consist of 75 nos unitunicate Pyrenomycetes and 25 nos Agarics. The name *Hypocreopsis riccioides* is reinstated instead of *Hypocreopsis lichenoides*. *Hypomyces spadiceus* is considered to be the correct name for *Hypomyces torminosus* sensu auct. plur. non sensu orig. *Ganoderma lucidum* is a new host for *Albertiniaella polyporicola*. Diagnostic data are given for the type material of four species of *Coniochaeta*.

Lennart Holm, Institute of Systematic Botany, Uppsala University, Villavägen 6, S-752 36 Uppsala, Sweden.

Svengunnar Ryman, Botanical Museum, Uppsala University, Villavägen 6, S-75236, Uppsala, Sweden. Email: Svengunnar.Ryman@fyto.uu.se

If nothing else is stated Pyrenomycetes are determined by L. Holm and Hymenomycetes by S. Ryman.

FUNGI EXSICCATI SUECICI, PRAESERTIM UPSALIENSES

Ed. cur. L. Holm et S. Ryman

3501. *Cordyceps entomorrhiza* (Dicks. : Fr.) Link ("entomorhizus")

Handbuch zur Erkennung der....Gewächse 3: 347 (1833). – Syn.: *Sphaeria entomorrhiza* Dicks., Fasc. Plant. Crypt. Brit. 1: 22 (1785) : Fr., Syst. Mycol. 2: 324 (1823).

On larvae (and rarely adult specimens) of *Carabus nemoralis*, in moist frondose wood with hazel, elm etc.

NÄRKE: Hallsberg parish, Herrfallsäng.

24.VII.1979

leg. & det. S. Ryman (no. 5240)

Many specimens are parasitized by *Polycephalomyces ramosus* (Peck) Mains (cfr Seifert, Stud. Mycol. 27: 172–174. 1985). Formally Link described a new species as he did not cite *Sphaeria entomorrhiza*, apparently by inadvertance. – L.H.

FUNGI EXSICCATI SUECICI, PRAESERTIM UPSALIENSES
Ed. cur. L. Holm et S. Ryman

3502. Claviceps nigricans Tul.

Ann. Sci. Nat. Bot. ser. 3. 20: 51 (1853).

Sclerotia in flowers of *Eleocharis palustris*.

TORNE LAPPMARK: Jukkasjärvi parish, Vittangi, Kuoksu, bank of the River Torne älv.

15.IX.1970

G. Lohammar

The same species, from Närke, was issued as No. 2152.

FUNGI EXSICCATI SUECICI, PRAESERTIM UPSALIENSES
Ed. cur. L. Holm et S. Ryman

3503. Claviceps purpurea (Fr.) Tul.

Ann. Sci. Nat. Bot. ser. 3. 20: 45 (1853). – Syn.: *Sphaeria purpurea* Fr., Syst. Mycol. 2: 325 (1823).

Sclerotia in flowers of *Anthoxanthum odoratum*.

GÄSTRIKLAND: Ovansjö parish, roadside near Lake Grindsjön.

24.VIII.1958

R. Morander (no. 1556)

The same species, on various grasses, was earlier distributed as Nos 2153–2156 and is now issued as Nos 3503–3517.

FUNGI EXSICCATI SUECICI, PRAESERTIM UPSALIENSES
Ed. cur. L. Holm et S. Ryman

3504. Claviceps purpurea (Fr.) Tul.

Sclerotia in flowers of cultivated *Bromus cappadocicus*.

UPPLAND: Uppsala, Botanic Garden.

29.VIII.1958

N. Hylander

The same species, on various grasses, was earlier distributed as Nos 2153–2156 and is now issued as Nos 3503–3517.

FUNGI EXSICCATI SUECICI, PRAESERTIM UPSALIENSES
Ed. cur. L. Holm et S. Ryman

3505a. Claviceps purpurea (Fr.) Tul.

Sclerotia in flowers of *Calamagrostis arundinacea*.

UPPLAND: Uppsala, the forest Nåsten.

13.VIII.1954

H. Smith

The same species, on various grasses, was earlier distributed as Nos 2153–2156 and is now issued as Nos 3503–3517.

FUNGI EXSICCATI SUECICI, PRAESERTIM UPSALIENSES
Ed. cur. L. Holm et S. Ryman

3505b. Claviceps purpurea (Fr.) Tul.

Sclerotia in flowers of *Calamagrostis arundinacea*.

UPPLAND: Gamla Uppsala parish, Stengärde.

9.IX.1962

C.M. Norrman

The same species, on various grasses, was earlier distributed as Nos 2153–2156 and is now issued as Nos 3503–3517.

FUNGI EXSICCATI SUECICI, PRAESERTIM UPSALIENSES
Ed. cur. L. Holm et S. Ryman

3506. Claviceps purpurea (Fr.) Tul.

Sclerotia in flowers of *Calamagrostis neglecta*.

DALARNA: Mockfjärd parish, northern shore of Lake Löfsen.

7.IX.1958

R. Morander (no. 1559)

The same species, on various grasses, was earlier distributed as Nos 2153–2156 and is now issued as Nos 3503–3517.

FUNGI EXSICCATI SUECICI, PRAESERTIM UPSALIENSES

Ed. cur. L. Holm et S. Ryman

3507a. *Claviceps purpurea* (Fr.) Tul.Sclerotia in flowers of *Dactylis glomerata*.

UPPLAND: Gamla Uppsala parish, Stengärde.

9.IX.1962

C.M. Norrman

The same species, on various grasses, was earlier distributed as Nos 2153–2156 and is now issued as Nos 3503–3517.

FUNGI EXSICCATI SUECICI, PRAESERTIM UPSALIENSES

Ed. cur. L. Holm et S. Ryman

3507b. *Claviceps purpurea* (Fr.) Tul.Sclerotia in flowers of *Dactylis glomerata*.

DALARNA: Husby parish, northern shore of Lake Edsken.

21.IX.1958

R. Morander (no. 1561)

The same species, on various grasses, was earlier distributed as Nos 2153–2156 and is now issued as Nos 3503–3517.

FUNGI EXSICCATI SUECICI, PRAESERTIM UPSALIENSES

Ed. cur. L. Holm et S. Ryman

3508. *Claviceps purpurea* (Fr.) Tul.Sclerotia in flowers of *Deschampsia caespitosa*.

DALARNA: Mockfjärd parish, c. 600 m W of Säl.

7.IX.1958

R. Morander (no. 1558)

The same species, on various grasses, was earlier distributed as Nos 2153–2156 and is now issued as Nos 3503–3517.

FUNGI EXSICCATI SUECICI, PRAESERTIM UPSALIENSES

Ed. cur. L. Holm et S. Ryman

3509. *Claviceps purpurea* (Fr.) Tul.Sclerotia in flowers of cultivated *Elymus multicaulis* var. *araliensis*.

UPPLAND: Uppsala, Botanic Garden.

29.VIII.1956

N. Hylander

The same species, on various grasses, was earlier distributed as Nos 2153–2156 and is now issued as Nos 3503–3517.

FUNGI EXSICCATI SUECICI, PRAESERTIM UPSALIENSES

Ed. cur. L. Holm et S. Ryman

3510. *Claviceps purpurea* (Fr.) Tul.Sclerotia in flowers of *Elytrigia repens*.

UPPLAND: Uppsala, behind the Astronomical Observatory.

7.IX.1954

J.A. Nannfeldt (no. 13634)

The same species, on various grasses, was earlier distributed as Nos 2153–2156 and is now issued as Nos 3503–3517.

FUNGI EXSICCATI SUECICI, PRAESERTIM UPSALIENSES

Ed. cur. L. Holm et S. Ryman

3511. *Claviceps purpurea* (Fr.) Tul.Sclerotia in flowers of cultivated *Elytrigia smithii*.

UPPLAND: Uppsala, Botanic Garden.

29.VIII.1956

N. Hylander

The same species, on various grasses, was earlier distributed as Nos 2153–2156 and is now issued as Nos 3503–3517.

FUNGI EXSICCATI SUECICI, PRAESERTIM UPSALIENSES

Ed. cur. L. Holm et S. Ryman

3512. *Claviceps purpurea* (Fr.) Tul.Sclerotia in flowers of *Festuca arundinacea*.

UPPLAND: Forsmark parish, 300 m N of Storskäret.

26.IX.1962

N. Lundqvist (no. 3775)

The same species, on various grasses, was earlier distributed as Nos 2153–2156 and is now distributed as Nos 3503–3517.

FUNGI EXSICCATI SUECICI, PRAESERTIM UPSALIENSES

Ed. cur. L. Holm et S. Ryman

3513. *Claviceps purpurea* (Fr.) Tul.Sclerotia in flowers of *Festuca ovina*.

LYCKSELE LAPPMARK: Tärna parish, Umfors, regio subalp., alt. c. 550 m.

12.IX.1961

L. Holm

The same species, on various grasses, was earlier distributed as Nos 2153–2156 and is now issued as Nos 3503–3517.

FUNGI EXSICCATI SUECICI, PRAESERTIM UPSALIENSES

Ed. cur. L. Holm et S. Ryman

3514. *Claviceps purpurea* (Fr.) Tul.Sclerotia in flowers of *Festuca rubra*.

GÄSTRIKLAND: Ovansjö parish, near Lake Grindsjön.

24.VIII.1958

R. Morander (no. 1555)

The same species, on various grasses, was formerly distributed as Nos 2153–2156 and is now issued as Nos 3503–3517.

FUNGI EXSICCATI SUECICI, PRAESERTIM UPSALIENSES

Ed. cur. L. Holm et S. Ryman

3515. *Claviceps purpurea* (Fr.) Tul.Sclerotia in flowers of *Milium effusum*.

LYCKSELE LAPPMARK: Tärna parish, Umfors, regio subalp., alt. c. 600 m.

10.IX.1961

L. Holm & E. Hesselman

The same species, on various grasses, was formerly distributed as Nos 2153–2156 and is now issued as Nos 3503–3517.

FUNGI EXSICCATI SUECICI, PRAESERTIM UPSALIENSES

Ed. cur. L. Holm et S. Ryman

3516a. *Claviceps purpurea* (Fr.) Tul.Sclerotia in flowers of *Phalaris arundinacea*.

UPPLAND: Husby, Ärlinghundra parish, Steninge, SW of Fiskartorpet, meadow by Lake Mälaren.

7.X.1962

I. Nordin (no. 1644)

The same species, on various grasses, was formerly distributed as Nos 2153–2156 and is now issued as Nos 3503–3517.

FUNGI EXSICCATI SUECICI, PRAESERTIM UPSALIENSES

Ed. cur. L. Holm et S. Ryman

3516b. *Claviceps purpurea* (Fr.) Tul.Sclerotia in flowers of *Phalaris arundinacea*.

UPPLAND: Vaksala parish, Jälla.

19.IX.1954

T. Ingmar & J.A. Nannfeldt (no. 13630)

The same species, on various grasses, was formerly distributed as Nos 2153–2156 and is now issued as Nos 3503–3517.

FUNGI EXSICCATI SUECICI, PRAESERTIM UPSALIENSES

Ed. cur. L. Holm et S. Ryman

3516c. *Claviceps purpurea* (Fr.) Tul.

Sclerotia in flowers of *Phalaris arundinacea*.

UPPLAND: Värmdö parish, Skägga, Vretavik.

14.IX.1954

H. Smith

The same species, on various grasses, was formerly distributed as Nos 2153–2156 and is now issued as Nos 3503–3517.

FUNGI EXSICCATI SUECICI, PRAESERTIM UPSALIENSES

Ed. cur. L. Holm et S. Ryman

3516d. *Claviceps purpurea* (Fr.) Tul.

In flowers of *Phalaris arundinacea*.

DALARNA: Torsång parish, W. of Tyllahagen, by the River Dalälven.

31.VIII.1958

R. Morander (no. 1557)

FUNGI EXSICCATI SUECICI, PRAESERTIM UPSALIENSES

Ed. cur. L. Holm et S. Ryman

3517. *Claviceps purpurea* (Fr.) Tul.

Sclerotia in flowers of *Phleum pratense*.

DALARNA: Husby parish, northern shore of Lake Edsken.

21.IX.1958

R. Morander (no. 1560)

The same species, on various grasses, was formerly distributed as Nos 2153–2156 and is now issued as Nos 3503–3517.

FUNGI EXSICCATI SUECICI, PRAESERTIM UPSALIENSES

Ed. cur. L. Holm et S. Ryman

3518. *Gibberella pulicaris* (Fr. : Fr.) Sacc.

Michelia 1: 43 (1877). – Syn.: *Sphaeria pulicaris* Fr. in Kunze & Schmidt, Mykol. Hefte 2: 37 (1823) : Fr., Syst. Mycol. 2: 417 (1823).

In dead, still attached branches of *Cytisus (Sarothamnus) scoparius*.

SKÅNE: Trolle-Ljungby parish, between Rosagård and Landön, pasture near the sea.

6.X.1985

K. & L. Holm (no. 3812a)

FUNGI EXSICCATI SUECICI, PRAESERTIM UPSALIENSES

Ed. cur. L. Holm et S. Ryman

3519. *Hypocrea citrina* (Pers. : Fr.) Fr.

Summa Veg. Scand. p. 383 (1849). – Syn.: *Sphaeria citrina* Pers., Obs. Mycol. 1: 68 (1796) : Fr., Syst. Mycol. 2: 337 (1823).

On and around an oakstump.

VÄSTERGÖTLAND: Sätila parish, Tostekulla.

22.X.1955

F. Karlvall (No. 6848)

The same species, from Uppland on spruce bark, was distributed as No. 1062.

FUNGI EXSICCATI SUECICI, PRAESERTIM UPSALIENSES
Ed. cur. L. Holm et S. Ryman

3520. Hypocrea rufa (Pers. : Fr.) Fr.

Summa Veg. Scand. p. 383 (1849). – Syn.: *Sphaeria rufa* Pers., Obs. Mycol. 1: 20 (1796) : Fr., Syst. Mycol. 2: 335 (1823).

On a decaying trunk in spruce forest.

UPPLAND: Forsmark parish, Granskär, c. 1 km NE of the estate Stor-skäret.

30.VIII.1964

R. Santesson (no. 16908)
det. G.J. Samuels 1996

For the time being the sibling species of the *H. rufa* complex cannot be identified on the telemorph alone. The white powder on the stromata consists of discharged part-ascospores. – G.J.S.

FUNGI EXSICCATI SUECICI, PRAESERTIM UPSALIENSES
Ed. cur. L. Holm et S. Ryman

3521. Hypocreopsis riccioidea (Bolton : Fr.) Karst.

Bidr. Känn. Finl. Natur. Folk 23 (= Mycol. Fenn. 2): 251, corr. (1873). – Syn. *Sphaeria riccioidea* (sic) Bolton, Fungi Halifax App.: 182 (1791) : Fr., Syst. Mycol. 2: 527 (1823). – *Hypocreopsis lichenoides* (Tode) Seaver, Mycologia 2: 82 (1910). *Acrospermum lichenoides* Tode, Fungi Mecklenb. 1: 9 (1790).

On fallen branches of *Salix* sp.

VÄSTERGÖTLAND: Göteborg, St. Änggården, "Naturparken", c. 300 m W of Finnsmosssen.

17.X.1952–10.IV.1957

F. Karlvall (no. 5039)

First Swedish collection, cfr. Karlvall in Acta Horti Gotoburg. 26: 35 (1963). – The epithet 'riccioidea' takes precedence as sanctioned by Fries (l.c.) whilst *Acrospermum lichenoides* was not accepted by Fries who considered it to be a "Lichenis monstruositas" (Syst. Mycol. 2: 246) and later (Syst. Mycol. Index p. 1) a synonym of "Lichen elegans". – L.H.

FUNGI EXSICCATI SUECICI, PRAESERTIM UPSALIENSES
Ed. cur. L. Holm et S. Ryman

3522. Hypocreopsis riccioidea (Bolton : Fr.) Karsten

On fallen or on still attached branches of *Salix caprea*, associated with *Phellinus punctatus* and *Hymenochaete tabacina* (det. I. Nordin).

SMÅLAND: Jönköping, western shore of Lake Rocksjön.

8.II.1987

M. Koschatzky (no. 315)

The same species, from Västergötland, is distributed as No. 3521.

FUNGI EXSICCATI SUECICI, PRAESERTIM UPSALIENSES
Ed. cur. L. Holm et S. Ryman

3523. Hypomyces luteovirens (Fr. : Fr.) Tul. & C. Tul.

Ann. Sci. Nat. Bot. ser. 4. 13: 13 (1860). – Syn.: *Sphaeria luteovirens* Fr., K. Vet.-Akad. Handl. 1817 p. 251 : Fr., Syst. Mycol. 2: 339 (1823). *Peckiella luteovirens* (Fr. : Fr.) Maire, Ann. Mycol. 9: 318 (1911).

On mummified ?*Russula* sp. in spruce forest.

UPPLAND: Ärentuna parish, Storvreta, 1 km E of the Railway Station.

23.IX.1965

N. Lundqvist (no. 4760)

FUNGI EXSICCATI SUECICI, PRAESERTIM UPSALIENSES
Ed. cur. L. Holm et S. Ryman

3524. Hypomyces ?polyporinus Peck

Bull. Buffalo Soc. Nat. Sci. 1: 71 (1873).

On old polypore (cfr *Ceraporia viridans* fide S. Lundell) on fallen decaying branches of *Alnus glutinosa*.

UPPLAND: Alsike parish, "Rickebastaträsk".

10.IX.1955

L. Holm

According to Dr. G. J. Samuels (in litt.) the material compares well with the teleomorph of *H. polyporinus*; however, in the absence of an anamorph the determination should be accepted with some reservation for the possible confusion with *H. semitranslucens* G. Arnold. – Not reported from Sweden before. – L.H.

FUNGI EXSICCATI SUECICI, PRAESERTIM UPSALIENSES
Ed. cur. L. Holm et S. Ryman

3525. Hypomyces spadiceus Fr. ex Th. Fr.

Öfvers. K. Vet.-Akad. Förhandl. 30:5: 9 (1873) ("*Hypomyce spadicea*"). – Syn.: *Hypomyces torminosus* (E.J. Durand & Mont.) Tul. sensu auct. non *Sphaeria torminosa* E.J. Durand & Mont. fide Rogerson & Samuels, Mycologia 86: 853 (1994). *Hypomyces lithuanicus* Heinrichson-Normet, Eesti NSV Tead. Akad. Toim. Biol. 18: 76 (1969) fide Rogerson & Samuels l.c.

On mummified *Lactarius torminosus* in coniferous forest.

UPPLAND: Ärentuna parish, eastern outskirts of Storvreta.

9.VIII.1990 N. Lundqvist (no. 18329)

This species, also from Uppland, was earlier distributed as No. 2169. – Nannfeldt, in sched., pointed out that the forgotten name *H. spadiceus* refers to this species.

FUNGI EXSICCATI SUECICI, PRAESERTIM UPSALIENSES
Ed. cur. L. Holm et S. Ryman

3526. Nectria coccinea (Pers. : Fr.) Fr.

Summa Veg. Scand. p. 388 (1849). – Syn.: *Sphaeria coccinea* Pers., Ic. Descr. Fung. 2: 47 (1800) : Fr., Syst. Mycol. 2: 412 (1823).

In bark of *Alnus glutinosa*.

GÄSTRIKLAND: Gävle, in the forest Tolfforsskogen, c. 400 m NW of the manor of Tolffors.

3.I.1960 J.A. Nannfeldt (no. 16227)

Nectria coccinea var. *minor* Wollenw. on *Ulmus glabra* from Uppland, was distributed as No. 1063.

FUNGI EXSICCATI SUECICI, PRAESERTIM UPSALIENSES
Ed. cur. L. Holm et S. Ryman

3527. Nectria fuckeliana C. Booth

Mycol. Papers 73: 56 (1959). – Syn.: *Nectria cucurbitula* sensu auct. rec., non *Nectria cucurbitula* (Tode : Fr.) Fr., fide Booth l.c.

In the bark of a windfallen spruce trunk.

UPPLAND: Funbo parish, Långängen.

23.VI.1961

E. Åberg

FUNGI EXSICCATI SUECICI, PRAESERTIM UPSALIENSES
Ed. cur. L. Holm et S. Ryman

3528. Nectria magnusiana Rehm ex Sacc.

Michelia 1: 294 (1878).

On stromata of *Diatrypella verruciformis* on *Betula verrucosa*.

UPPLAND: Västeråker parish, moist grove c. 500 m ESE of Torresta.

26.III.1978

K. & L. Holm (no. 1250b)

FUNGI EXSICCATI SUECICI, PRAESERTIM UPSALIENSES
Ed. cur. L. Holm et S. Ryman

3529. Nectria purtonii (Grev.) Curr.

Trans. Linn. Soc. London 22: 282 (1858) ("*Purtoni*"). – Syn.: *Sphaeria Purtoni* Grev., Scott. Crypt. Fl. 6, Synopsis p. 23 (1828).

On old stromata of *Valsa* sp. on cut twigs of *Salix cinerea*.

UPPLAND: Dalby parish, field edge clearing c. 700 m SW of "Jerusalem".

I.III.1986

K. & L. Holm (no. 3928a)

FUNGI EXSICCATI SUECICI, PRAESERTIM UPSALIENSES
Ed. cur. L. Holm et S. Ryman

3530. *Thyronectria berolinensis* (Sacc.) Seaver

Mycologia 1: 205 (1909). – Syn.: *Pleonectria berolinensis* Sacc., Michelia 1: 123 (1878).

In dead heaped up branches of *Ribes rubrum*.

VÄSTMANLAND: Sala, Skuggan, Fiskarbo.

3.VIII.1949

R. Morander (no. 1426)

This species, from Södermanland, was previously issued as No. 498.

FUNGI EXSICCATI SUECICI, PRAESERTIM UPSALIENSES
Ed. cur. L. Holm et S. Ryman

3531. *Nectriella paludosa* Fuckel

Symb. Mycol. p. 176 (1870).

In dead leaves of *Typha latifolia*.

UPPLAND: Dalby parish, ditch c. 300 m SSW of "Jerusalem".

7.VIII.1990

K. & L. Holm (no. 5587a)

Not reported from Sweden before.

FUNGI EXSICCATI SUECICI, PRAESERTIM UPSALIENSES
Ed. cur. L. Holm et S. Ryman

3532. *Albertiniella polyporicola* (Jacz.) Malloch & Cain

Can. J. Bot. 50: 71 (1972). – Syn.: *Cephalotheca polyporicola* Jacz., Mater. Mikol. Fitopat. Rossi 4: 15 (1922).

On the pore surface of old *Ganoderma lucidum*.

UPPLAND: Alsike parish, "Rickebastaträsk".

23.IX.1963

leg. & det. N. Lundqvist (no. 4192)

First record on *Ganoderma lucidum*! Inadvertantly, this collection was not included in my monograph in Svensk Bot. Tidskrift 86: 261–270 (1992). N.L. – The same species, on *G. lipsiense* from Västmanland, is distributed as No. 3533.

FUNGI EXSICCATI SUECICI, PRAESERTIM UPSALIENSES
Ed. cur. L. Holm et S. Ryman

3533. *Albertiniella polyporicola* (Jacz.) Malloch & Cain

On the pore surface of old *Ganoderma lipsiense* (= *G. applanatum*), growing on a stump of *Ulmus glabra*.

VÄSTMANLAND: Rytterne parish, 500 m W of Sylta, S of the high-road.

19.X.1984

I. Nordin (no. 9440)
det. N. Lundqvist

This find was published by Lundqvist, Svensk Bot. Tidskr. 86: 267 (1992). – Another collection, on *Ganoderma lucidum* from Uppland, is distributed as No. 3532.

FUNGI EXSICCATI SUECICI, PRAESERTIM UPSALIENSES
Ed. cur. L. Holm et S. Ryman

3534. *Klasterskyia acuum* (Mouton) Petr.

Ann. Mycol. 38: 227 (1940). – Syn.: *Lentomita* (?) *acuum* Mouton, Bull. Soc. Roy. Bot. Belge 26: 173 (1887).

On decaying needles on lopped-off branches of *Pinus sylvestris*.

UPPLAND: Ärentuna parish, southern outskirts of Storvreten, in coniferous forest.

12.IV.1992

leg. & det. N. Lundqvist (no. 18888)

The same species, also from Uppland, was issued as No. 2171.

FUNGI EXSICCATI SUECICI, PRAESERTIM UPSALIENSES
Ed. cur. L. Holm et S. Ryman

3535. Rhynchostoma minutum Karst.

Fungi Fenn. exs. No. 950 (1870). – Syn.: *Rhynchostoma rubrocinctum* Karst., Hedwigia 29: 178 (1890).

On dry wood of *Populus tremula*.

VÄRMLAND: Bjurtjärn parish, clearing W of Botjärnsmossen (UTM VF6177).

18.VII.1977

L.-E. Muhr

Second Swedish find. – The anamorph *Arthropycnis praetermissa* Constant. is also present (see Constantinescu & Tibell, Nova Hedwigia 55: 172, 1992).

UPPLAND: Dalby parish, c. 500 m SW of Viggeby, roadside.

10.IV.1984

K. & L. Holm (no. 3075d)

The lignicolous Coniochaetaceae have so far not been critically revised and their identification is notoriously uncertain as old names remain to be typified and original descriptions often are but little informative. The two collections issued here, Nos 3546–3547 represent one and the same species, characterized i.a. by: setae 25–50 x 5 µm, ascii 90–110 x 9 µm, spores 11–12.8 x 8–9 x 5.5–6 µm, with a narrowly elliptical lateral profile and a onesided, lateral germ slit; no gelatinous sheath. I have compared these specimens with type material of the following species; *Coniochaeta lignaria* (Grev.) Cooke (holotype in K), *C. malacotricha* (Auersw. ex Niessl) Traverso (syntype in M), *C. sordaria* (Fr.) Petr. (syntype in Fries, Scler. Suec. 270, UPS), *C. subcorticalis* (Fuckel) Cooke (syntype in Fuckel, Fungi Rhen. 1812, S). None of these type specimens fits the present material. Niessl's syntype does not even answer to this description, nor to *C. malacotricha* sensu auctt. and is almost indistinguishable from *C. lignaria*. A later sample in herb. Niessl, sub nomine *C. malacotricha*, represents yet another species. *C. lignaria* and *C. sordaria* differ from the present species by larger spores (14.5–16 x 7–8 x 6 µm and 13.8–16 x 11.5–13.8 x 9–11.5 µm resp.); moreover, in *C. sordaria* they have a germ slit that goes all around the spore. *C. subcorticalis*, on the other hand, has smaller spores than our taxon (9–11 x 5.5–6.5 x 4.5–5 µm). – Nils Lundqvist.

The same species, from Gästrikland, is distributed as No. 3547.

FUNGI EXSICCATI SUECICI, PRAESERTIM UPSALIENSES

3571. Lulworthia sp.

On driftwood in the *Verrucaria maura* zone.

BOHUSLÄN: Skaftö parish, Usholmen (Ullsholm), c. 2.5 km WNW of Kristineberg.

19.VII.1955

R. Santesson (no. 10945b)

The Nos 3571–3575 represent a group of species that cannot be definitely classified for the time being (cfr e.g. J. & B. Kohlmeyer, Bot. Mar. 34: 24, 1991). The present collection is i.e. characterized by the very light perithecial wall. – R.S.

FUNGI EXSICCATI SUECICI, PRAESERTIM UPSALIENSES
Ed. cur. L. Holm et S. Ryman

3572. *Lulworthia* sp.

On a testboard of oak, 80–105 cm below water level, immersed 21 Aug. 1955.

BOHUSLÄN: Skaftö parish, Kristineberg, outside the Marine Research Station.

21.X.1956

R. Santesson (no. 11569)

The Nos 3571–3575 represent a group of species that cannot be definitely classified for the time being (cfr e.g. J. & B. Kohlmeyer, Bot. Mar. 34: 24, 1991). The present collection matches well the description of *Lulworthia salina* (Linder) Cribb & J.W. Cribb. – R.S.

FUNGI EXSICCATI SUECICI, PRAESERTIM UPSALIENSES
Ed. cur. L. Holm et S. Ryman

3573. *Lulworthia* sp.

On a testboard of oak, 5 m below water level, immersed 21 Aug. 1959.

BOHUSLÄN: Skaftö parish, Kristineberg, outside the Marine Research station.

26.VII.1960

R. Santesson (no. 13826)

The Nos 3571–3575 represent a group of species that cannot be definitely classified for the time being (cfr e.g. J. & B. Kohlmeyer, Bot. Mar. 34: 24, 1991). The present collection matches well the description of *Lulworthia salina* (Linder) Cribb & J.W. Cribb. – R.S.

FUNGI EXSICCATI SUECICI, PRAESERTIM UPSALIENSES
Ed. cur. L. Holm et S. Ryman

3574. *Lulworthia* sp.

On a testboard of oak, c. 1 m below water level, immersed 21 Aug. 1959.

BOHUSLÄN: Skaftö parish, Kristineberg, outside the Marine Research Station.

26.I.1960

R. Santesson (no. 13652)

The Nos 3571–3575 represent a group of species that cannot be definitely classified for the time being (cfr e.g. J. & B. Kohlmeyer, Bot. Mar. 34: 24, 1991). The present collection matches well the description of *Lulworthia floridana* Meyers. – R.S.

FUNGI EXSICCATI SUECICI, PRAESERTIM UPSALIENSES
Ed. cur. L. Holm et S. Ryman

3575. *Lulworthia* sp.

On manila hemp rope, 1.5–2.5 m below water lever, immersed 21 Aug. 1959.

BOHUSLÄN: Skaftö parish, Kristineberg, outside the Marine Research Station.

1.VIII.1960

R. Santesson (no. 13892)

The Nos 3571–3575 represent a group of species that cannot be definitely classified for the time being (cfr e.g. J. & B. Kohlmeyer, Bot. Mar. 34: 24, 1991). This material was in the fresh state characterized by a reddish perithecial wall and might correspond to *Lulworthia rufa* (I.M. Wilson) T. Johnson. – R.S.

FUNGI EXSICCATI SUECICI, PRAESERTIM UPSALIENSES

3576. Cortinarius elegantissimus Rob. Henry

Docum. Mycol. 20(77): 69 (1989). – Syn.: *Cortinarius cedretorum* Maire subsp. *elegantissimus* Brandrud & Melot, Docum. Mycol. 20(77): 94 (1989). – *Cortinarius aurantioturbinate* J.E. Lange, Dansk Bot. Arkiv 8, 7: 18 (1935, not validly published).

Fagus forest.

SKÅNE: Degeberga, 500 m SSE of "hembygdsgården".

20.IX.1981 Stig Jacobsson (no. 81157, *C. aurantioturbinate*)

FUNGI EXSICCATI SUECICI, PRAESERTIM UPSALIENSES
Ed. cur. L. Holm et S. Ryman

3577. Cortinarius fraudulosus Britzelm.

Naturhist. Vereins. Augsburg 28 (=Hym. Südbayern): 122 (1885). – Syn.: *Phlegmacium fraudulosum* (Britzelm.) M.M. Moser, Gatt. Phlegm. p. 157 (1961 "1960"). *Cortinarius argutus* Fr. subsp. *fraudulosus* (Britzelm.) Brandrud & Melot in Melot, Docum. Mycol. 20(77): 94 (1989).

In old ant-hill under spruce (*Picea abies*).

UPPLAND: Börstil parish, Tuskö, 700 m W. Marieberg.

16.IX.1984 Svengunnar Ryman (no. 7767)

A colour photo of this species from the same locality was published by Brandrud & al. in *Cortinarius Fl. Photogr.* 1 (1989) as *Cortinarius argutus* subsp. *fraudulosus*.

FUNGI EXSICCATI SUECICI, PRAESERTIM UPSALIENSES
Ed. cur. L. Holm et S. Ryman

3578. Cortinarius saturninus (Fr.) Fr.

Epicr. p. 306 (1838). – Syn.: *Agaricus saturninus* Fr., Syst. Mycol. I p. 219 (1821).

Forming a large ring under *Salix caprea* in deciduous forest.

VÄSTERGÖTLAND: Eggby parish, Drottningkullen.

29.IX.1984 Svengunnar Ryman (no. 7835)

A colour photo of this species from the same locality was published by Brandrud & al. in *Cortinarius Fl. Photogr.* 3 (1994).

FUNGI EXSICCATI SUECICI, PRAESERTIM UPSALIENSES
Ed. cur. L. Holm et S. Ryman

3579. Cortinarius urbicus (Fr.) Fr.

Epicr. p. 293 (1838). – Syn.: *Agaricus urbicus* Fr., Syst. Mycol. I p. 216 (1821).

In a ring in an old lawn under planted *Betula* in a park.

UPPLAND: Uppsala, the Botanical Garden.

2.IX.1986

Svengunnar Ryman (no. 8279)

A colour photo of this species, collected only a few days later from the same mycelium, was published by Brandrud & al. in *Cortinarius Fl. Photogr.* 3 (1994).

FUNGI EXSICCATI SUECICI, PRAESERTIM UPSALIENSES
Ed. cur. L. Holm et S. Ryman

3580. Cantharellopsis prescotii (Weinm.) Kuyper

in Borghi (ed.), Famig. Tricholomataceae p. 99 (1986 "1984"). – Syn.: *Cantharellus prescotii* Weinm., Flora 9: 452 (1832). *Gerronema prescotii* (Weinm.) Redhead, Can. J. Bot. 62: 884 (1984).

Amongst mosses in coniferous forest on calcareous soil.

JÄMTLAND: Mattmar parish, Storbodarna.

16.VIII.1984

Svengunnar Ryman (no. 7710)

Since a long time the name *Cantharellus albidus* Fr. has been applied to this species. However, as suggested by Corner in Ann. Bot. Mem. 2: 131 (1966) (= A monograph of cantharelloid fungi), the original *Cantharellus albidus* is a true *Cantharellus*. – S.R.

FUNGI EXSICCATI SUECICI, PRAESERTIM UPSALIENSES

Ed. cur. L. Holm et S. Ryman

3581. *Hygrocybe fornicata* (Fr.) Singer

Lilloa 22: 152 (1951, "1949"). – Syn.: *Hygrophorus fornicatus* Fr., Epicr. p. 327 (1838). *Hygrophorus fornicatus* * *H. clivalis* Fr., Hymen. Suec. 2: 134 (1863). *Hygrocybe clivalis* (Fr.) P.D. Orton & Watling, Notes Royal. Bot. Garden Edinb. 29: 131 (1969). – *Hygrophorus streptopus* Fr., Epicr. p. 328 (1838). *Hygrocybe streptopus* (Fr.) Bon, Bull. Soc. Mycol. France 86: 174.

In oak-hazel grove.

UPPLAND: Uppsala-Näs parish, 1 km NW of Vreta udd, at "Toran".

6.IX.1992 leg. & det. Nils Lundqvist (no. 19224)

For some time three nearly related species have been recognized, viz. *Hygrocybe clivalis*, *fornicata* and *streptopus*. Arnolds, Agarica 6 (12): 178–190 (1985), treats these names as synomyms with *H. fornicata* as the preferred name, and he is followed here. When proposing the new combination *Hygrocybe streptopus* (Fr.) Bon, the reference is to Fries, Hymen. Suec. (1863), not Epicr. (1838) where the basionym was validly published. However, this bibliographic error do not invalidate the new combination (ICBN Article 33.3). – S.R.

FUNGI EXSICCATI SUECICI, PRAESERTIM UPSALIENSES

Ed. cur. L. Holm et S. Ryman

3582. *Hygrocybe splendidissima* (P.D. Orton) M.M. Moser

in Gams, Kl. Krypt.-Fl. II, b/2, (3. Aufl.) p. 67 (1967) – Syn.: *Hygrophorus splendidissimus* P.D. Orton, Trans. Brit. Mycol. Soc. 43: 265 (1960). *Hygrocybe punicea* (Fr. : Fr.) Kummer f. *splendidissima* (P.D. Orton) Reid, Fung. Rariorum Icon. Color. 6: 1 (1972). *Hygrocybe punicea* (Fr. : Fr.) P. Kumm. var. *splendidissima* (P.D. Orton) Krieglst., Beitr. Kenntn. Pilze Mitteleur. 8: 176 (1992).

Unfertilized pasture.

SKÅNE: Röstånga parish, Blinkarp, Blinkarps fälad.

24.IX.1989 Sigvard Svensson
det. Erik Malm & Sigvard Svensson

Flesh in stipe saffron. Smells of honey on drying. This species, then new to Sweden, was reported from this locality by Malm, Jordstjärnan 9(3): 17–19 (1988), with a colour foto on the back cover. Malm also has a colourful description of the collection distributed here in Puggehatten 2(3): 14–16 (1990 "1989"). – S.R.

Ed. cur. L. Holm et S. Ryman

3583. *Hygrophorus korhonenii* Harmaja

Karstenia 25: 42, 1985.

Amongst grasses (*Agrostis*, *Poa*, *Deschampsia*) and mosses (*Rhytidiodelphus*) at the edge of a spruce forest.

VÄSTERGÖTLAND: Borgstena parish, 0.8 km S of Fagerås.

19.IX.1992 leg. & det. Åke Strid (no. 19423)

Hygrophorus korhonenii is a near relative of *H. olivaceoalbus* (Fr. : Fr.) Fr., with more greyish colours and slightly smaller spores. – S.R.

FUNGI EXSICCATI SUECICI, PRAESERTIM UPSALIENSES

Ed. cur. L. Holm et S. Ryman

3584. *Hygrophorus purpurascens* (Alb. & Schwein. : Fr.) Fr.

Epicr. p. 322 (1838). – Syn.: *Agaricus purpurascens* Alb. & Schwein., Conspr. Fung. p. 182 (1805) : Fr., Syst. Mycol. I p. 34 (1821). *Limacium purpurascens* (Alb. & Schwein. : Fr.) P. Kumm., Führ. Pilzk. p. 118 (1871).

In spruce forest.

UPPLAND: Österåker parish, Lövsättra.

6.IX.1985 leg. & det. Åke Strid (no. 17599)

This species was thoroughly treated and illustrated by Strid, Jordstjärnan 7(1): 16–20 (1986), with a colour photo of specimens from this locality, collected in August 1985 (the front cover).

FUNGI EXSICCATI SUECICI, PRAESERTIM UPSALIENSES
Ed. cur. L. Holm et S. Ryman

3585. *Hygrotrama atropunctum* (Pers. : Fr.) Singer

Sydotia Beih. 7: 3 (1973). – Syn.: *Agaricus atropunctus* Pers., Syn. Meth. Fung. p. 353 (1801) : Fr., Syst. Mycol. 1 p. 195 (1821). *Camarophyllospis atropuncta* (Pers. : Fr.) Arnolds, Mycotaxon 25: 642 (1986). *Hygrocybe atropuncta* (Pers. : Fr.) P.D. Orton & Watling, Notes Royal Bot. Gard. Edinb. 29: 134 (1969).

Under oak, hazel and elm on calcareous soil.

ÖLAND: Räpplinge parish, Borgholm, Borge hage.

20.X.1984

leg. & det. Johan Nitare

Arnolds (1986) uses the genus name *Camarophyllospis* Herink for the small, brownish wax caps with hymeniform cap cuticula, earlier placed in *Hygrotrama* Singer. The type species of the genus *Camarophyllospis*, *C. schulzeri* (Bres.) Herink, seems to lack hymeniform cap cuticula and has a gross morphology resembling *Hygrocybe nitrata* (Pers.) Wünsche. As long as the taxonomic position of *C. schulzeri* is uncertain, I prefer to stick to the name *Hygrotrama*. – S.R.

FUNGI EXSICCATI SUECICI, PRAESERTIM UPSALIENSES
Ed. cur. L. Holm et S. Ryman

3586. *Inocybe asterospora* Quél.

Bull. Soc. Bot. France 26: 50 (1880 "1879").

Under *Populus tremula* in mixed forest.

NÄRKE: Askersund, SW of Åviken, near the highroad.

17.IX.1992

leg. & det. Nils Lundqvist (no. 19298)

FUNGI EXSICCATI SUECICI, PRAESERTIM UPSALIENSES
Ed. cur. L. Holm et S. Ryman

3587. *Inocybe hirtella* Bres.

Fungi Trident. 1: 52 (1881).

Under *Betula* and *Alnus incana* on clayey soil in wood margin.

NÄRKE: Lerbäck parish, Karlslund.

22.VII.1979

Svengunnar Ryman (5179)

Smell strong of bitter almonds.

FUNGI EXSICCATI SUECICI, PRAESERTIM UPSALIENSES
Ed. cur. L. Holm et S. Ryman

3588. *Inocybe nitidiuscula* (Britzelm.) Sacc.

Syll. Fung. 11: 53 (1895) – Syn.: *Agaricus nitidiusculus* Britzelm., Hym. Südbayern 8: 7 (1891, n.v.). – *Inocybe friesii* R. Heim, Genre Inocybe p. 319 (1931).

Well-cut lawn with single old pines (*Pinus sylvestris*).

GÄSTRIKLAND: Gävle, Valboåsen, Skogskyrkogården.

6.IX.1978

J. Ax. Nannfeldt (no. 24930)

det. Stig Jacobsson 1985 (as *I. friesii*)

FUNGI EXSICCATI SUECICI, PRAESERTIM UPSALIENSES

Ed. cur. L. Holm et S. Ryman

3590. *Oudemansiella mucida* (Schrad. : Fr.) Höhn.

Fragm. Mycol. 12 (584): 9 (1910). – Syn.: *Agaricus mucidus* Schrad., Spicilegium Fl. Germanicae p. 116 (1794) : Fr., Syst. Mycol. I p. 28 (1821). *Armillaria mucida* (Schrad. : Fr.) P. Kumm., Führ. Pilzk. p. 135 (1871). *Collybia mucida* (Schrad. : Fr.) Quél., Ench. Fung. p. 27 (1886). *Mucidula mucida* (Schrad. : Fr.) Pat., Hymén. d'Europe p. 96 (1887).

On big trunks of planted beeches (*Fagus sylvatica*).

UPPLAND: Roslags-Kulla parish, Östanå.

22.X.1983

leg. & det. Åke Strid (no. 17131)

FUNGI EXSICCATI SUECICI, PRAESERTIM UPSALIENSES
Ed. cur. L. Holm et S. Ryman

3591. Phaeocollybia jennyae (Karst.) Romagn.

Bull. Soc. Mycol. France 58: 127 (1942). – Syn.: *Naucoria jennyae* ("Jennyi") Karst., Hedwigia 20: 178 (1881). *Simocybe jennyae* (Karst.) Karst., Bidr. Känded. Finl. Natur o. Folk 37 (= Hattsvampar, Sednare Delen): 232 (1882). – *Agaricus cidaris* Fr. var. *minor* Fr., Icon. Hymen. 2: 21, 1877.

Young spruce forest (*Picea abies*).

VÄSTERGÖTLAND: Österplana parish, N. Stenrödjan

19.VII.1981 leg. & det. Stig Jacobsson (no. 81037)

The combination *Phaeocollybia jennyae* is usually attributed to R. Heim (Genre *Inocybe* p. 70, 1931). That is, however, incorrect since Heim did not associate the epithet with the genus name (see ICBN Article 33.1). The species is thoroughly treated by Horak, Sydowia 29: 68 (1977), and by Jacobsson & Stridvall in a paper on the genus *Phaeocollybia* in Sweden, Windahlia 12–13: 57–79 (1983). Fries, Icon. Hymen. 2, Pl. 123:2 (1877) as *Agaricus cidaris* var. *minor*. – S.R.

FUNGI EXSICCATI SUECICI, PRAESERTIM UPSALIENSES
