

# A Look at New Plants 2022

# Growing for Generations *Cultivating Relationships for a Lifetime*

Willoway Nurseries, based in Ohio, is a progressive, forward-thinking company. Although we are a third-generation family-owned business, we are known for always being on the forefront of the horticulture industry with technology, marketing, and growing techniques. We pride ourselves on our established roots and vision to grow for generations into the future.

# New Plant Ideas

This is a starting point to our new plant offerings for 2022. We have over 2000 varieties of plant material. We offer plants that are tried & true that provide top garden performance as well as the cutting-edge plants in our branded plant programs. Our number one goal is to provide the very best for garden success!

Sign up for our customer portal for 24/7 availability and other great features. Our sales team can get you started today!

American Beauties Native Plants gives garden centers, landscapers, and home gardeners the ability to grow native plants in their home environment. Partnering together, native plant and wildlife experts now offer beautiful selections that not only enhance our environment but bring liveliness to your garden. Birds, butterflies, and other beneficial insects can be readily seen around these plants. By growing native plants, you are providing wildlife with its primary diet of foliage, nectar, pollen, berries, seeds, and nuts. Additionally, these plants require less water, maintenance, and have fewer disease problems due to their native origin. From deer-resistant to fragrant plants, there is a wide variety to cater to you and your local ecosystems needs.

# Acer rubrum

This Red Maple offers a dense, rounded form, made thicker by green, trident shaped leaves that provide shade and cover. Deep red flowers appear in early to mid-April offering one of the earliest nectar sources for native bees and butterflies while Autumn's fiery crimson foliage is amazing. Plant in full sun to part shade. Prefers moist, acidic soils with good drainage but grows well in average to wet, well-drained soil. This is a big tree so give it plenty of room to reach full size.

- Height: 35-40ft.
- Spread: 35-40ft.
- Zone: 3-8
- Light: Full sun to part shade

Number to Sell: 100

Finish Date: 04/01/2022

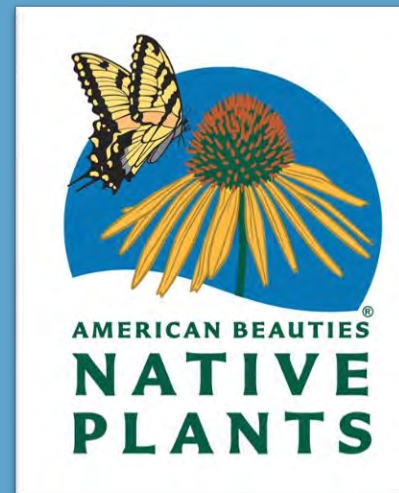

# Acer saccharum

Sugar Maple is one of the trees responsible for giving New England its spectacular fall color, as its green leaves turn brilliant yellow to orange in fall. Its winged seed is a favorite food for wildlife. In addition, this selection has a high sap sugar content making it perfect for syrup production. Grows well in average to moist soils.

- Height: 60-70'
- Spread: 50-60'
- Zone: 4-8
- Light: Full sun to part shade

Number to Sell: 100

Finish Date: 04/01/2022

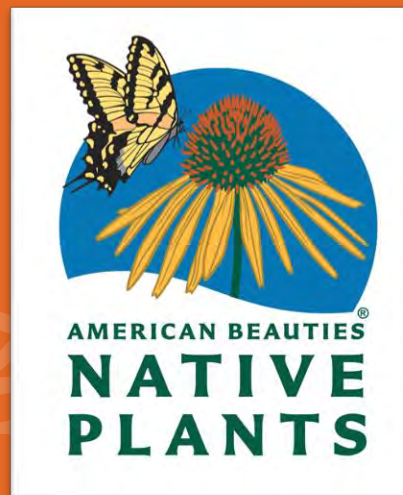

# Asimina triloba

The pawpaw has 6-petaled, purplish-brown flowers. In late summer to early fall, it produces an edible, sweet-tasting, custard like fruit. It is recommended to wear gloves when harvesting as contact dermatitis has been known to occur. The leaves turn yellow in the fall and provide interest. It is a flowering tree that attracts butterflies, pollinators, small mammals, and songbirds, which makes pawpaw a good addition to a butterfly, pollinator, or rain garden. Flies and beetles are attracted to the flower of the tree and are beneficial pollinators that contribute to the odd odor of the flower.

- Height: 30'
- Spread: 30'
- Zone: 5-9
- Light: Full sun to part shade
- Soil: Moist, well drained

Number to Sell: 100  
Finish Date: 08/01/2021

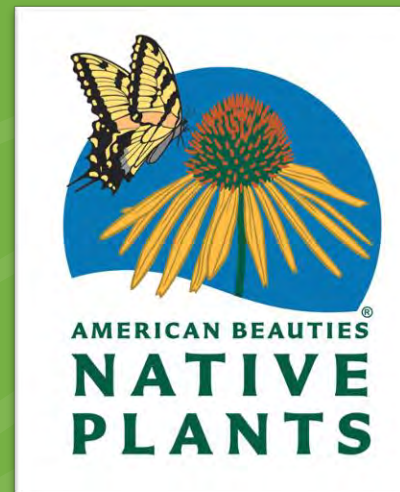

# Betula nigra

Betula Nigra, known as the river birch, naturally grows along riverbanks. As a landscape tree, it can be planted almost anywhere in the U.S. The species is valued for its relatively rapid growth, tolerance of wetness and some drought, unique curling bark, spreading limbs and relative resistance to birch borer.

- Zone: 4-9
- Height: 40 to 50 feet
- Spread: 25 to 35 feet
- Light: full sun to partial shade
- Soil: clay; sand; loam; acidic; wet to well-drained
- Drought tolerance: moderate

Number to Sell: 100  
Finish Date: 04/01/2022

# Amelanchier canadensis

This tree blooms with delicate white flowers arranged in clusters. It is one of the finest small trees for fall color, with leaves turning vivid shades of red and gold. Canadensis produces berry-like fruit which change from green to red to purplish black. Grows in a rounded shape.

- Height: 15–25'
- Spread: 15–25'
- Zone: 4–8
- Light: Full sun and partial shade
- Soil: acidic, moist and well-drained

Number to Sell: 250

Finish Date: 04/01/2022

# Cercis canadensis

The Redbud is a beautiful native flowering tree with pink pea-like flowers which bloom profusely on bare branches in early spring before the foliage emerges. The foliage consists of alternate heart shaped leaves. The Redbud has a short trunk and lateral branches. The bark is reddish-brown with fissures. Seeds are born in brown flattened bean-like dry seedpods 2 to 4 inches long that mature in late summer to autumn. In its natural habitat the Redbud grows as an understory tree in open woodlands and thickets. Its compact size and flowering make it a desirable ornamental landscape tree for gardens, and it attracts bees and birds.

- Zone: 4B - 9A
- Height: 20 to 30 feet
- Spread: 15 to 25 feet
- Flower: light pink to dark magenta, very showy; emerges in clusters along stems in early spring before new growth
- Light: full sun, partial sun or partial shade
- Soil: clay; sand; loam; alkaline; acidic; occasionally wet; well-drained

Number to Sell: 250

Finish Date: 04/01/2022

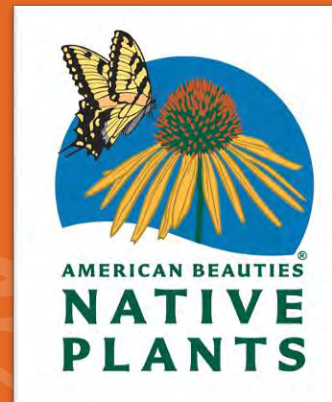

# Chionanthus virginicus

A carefree native, this small tree puts on a heck of a show in late spring with thousands of pendulous, delicately fragrant white flowers covering the tree before the leaves emerge. At the end of bloom season, the green leaf tips accent the snowy blooms for an impressive finale. It's no wonder the Fringetree has been a garden favorite and heritage plant for generations. It is dioecious, meaning that there are male and female trees. The males are typically showier in bloom due to their longer petals; however, it is the female plants that are adorned with dark blue fruit in late summer. Birds relish the fleshy fruit and will find it easily, even though the foliage sometimes hides it from view. The best way to enjoy the fringetree is to have at least one of each, and to be certain you get a male and female, purchase them in late summer or early fall when fruit will be present on the female plants.

Fringetree is easily grown in average to medium wet, well-drained soil in full sun to part shade. It prefers moist, fertile soils, but tolerates a wide variety, including the red clay of the south. *Chionanthus virginicus* seldom needs pruning but benefits from some branch thinning if an open habit is desired. Tolerant of air pollution, it adapts well to urban settings.

- Height: 12-18ft.
- Spread: 12-20ft.
- Zone: 3-9
- Light: Full sun to part shade

Number to Sell: 100  
Finish Date: 04/01/2022

# Clematis virginiana

This easy to grow vine is a rapid grower, climbs by twisting petioles, and has bright green foliage. It prefers rich, moist, well-drained soil in the full sun to partial to heavy shade. Though it will grow in the dry shade. It is one of the few vines that will flower with large amounts of shade. It works well in a woodland or native garden where it has room to twine up supports or fences, otherwise, it will scramble along the ground, and it can grow over and overwhelm landscape shrubs. It can be pruned any time during the growing season to maintain shape and encourage bushiness. If it gets too large, prune it back to 8-12" above the ground - back to strong leaf buds - any time from the late fall to early spring to promote new growth in the spring. It does self-seed and can become weedy through suckering as well. This plant has medium severity poison characteristics.

- Height: 15 - 20 ft.
- Spread: 3 - 6 ft.
- Light: Dappled Sunlight, Deep shade, Full sun, Partial Shade
- Soil: High Organic Matter, Good Drainage, Moist
- Zone: 6b, 6a, 7b, 7a, 8b, 8a

Number to Sell: 300

Finish Date: 10/01/2021

# Cornus florida

Flowering dogwood has spreading horizontal branches and distinctive white flowers in spring. The 3" diameter flower clusters bloom mid-April to mid-May, attracting a number of butterflies and other pollinators. Clusters of glossy red fruit mature in fall and persist into winter when they are eaten by birds. The leaves turn scarlet red in fall.

Grow in full sun to part shade. Plant in well-drained soil with adequate soil moisture. Does not tolerate dry soil. Prefers organically rich, acidic soil.

- Height: 18-22ft.
- Spread: 18-22ft.
- Zone: 5-9
- Light: Full Sun to Part Shade

Number to Sell: 250

Finish Date: 04/01/2022

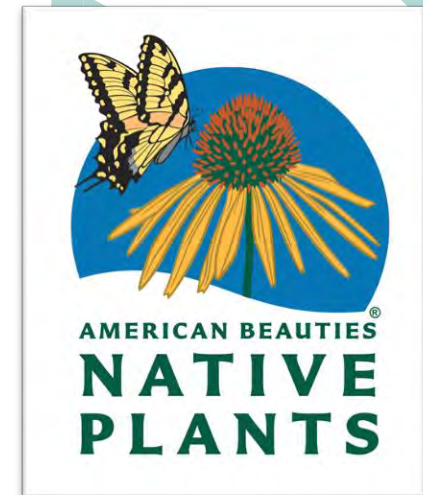

# Diospyros virginiana

## Common Persimmon

Deciduous tree in the ebony family, with a 1-to-2-foot diameter erect trunk with alligator bark. Native to central and eastern US. It is slow-growing and thicket forming and can be a nuisance in fields. It can take 10 to 15 years before the tree bears fruit. The trees are usually dioecious (separate male and female and both are needed for fruiting to occur). Flowering is in spring to early summer with fruit ripening in the fall. The 1-to-2-inch fruits are orange and very sweet when ripe. They are a source of food for many types of birds and mammals. It is astringent when green, but sweet when soft and ripe and may be eaten raw, or used in syrups, jellies, ice cream and pies.

- Height: 30 ft - 80 ft
- Spread: 20 ft - 35 ft
- Light: Full sun Partial Shade
- Zone: 4-9

Number to Sell: 50  
Finish Date: 08/01/2021

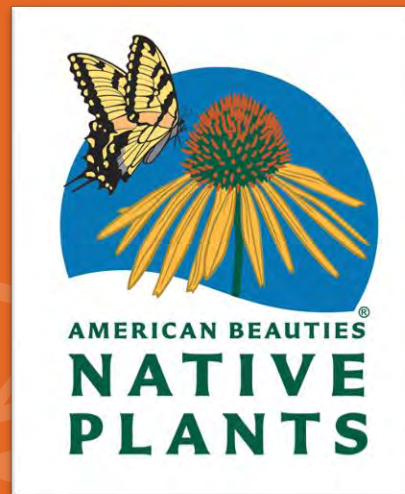

# Eupatorium maculatum 'Gateway'

Joe Pye Weed is common in native to damp meadows, thickets and coastal areas in eastern North America. Plants typically grow 4-7' tall on branched, purple-speckled stems clad with serrate, lance-shaped, medium green leaves (to 8" long) that typically appear in coils of 3-6. Tiny, light to deep purple flowers bloom from mid-summer to early fall.

- Zone: 4 to 8
- Height: 4 to 7 feet
- Spread: 1 to 2 feet
- Flower: Mauve/pink, Showy, Fragrant
- Light: Full sun
- Water: Medium to wet
- Attracts: Butterflies
- Tolerate: Deer, Clay Soil, Wet Soil

Number to Sell: 300  
Finish Date: 09/15/2021

# Helianthus salicifolius

## 'Autumn Gold'

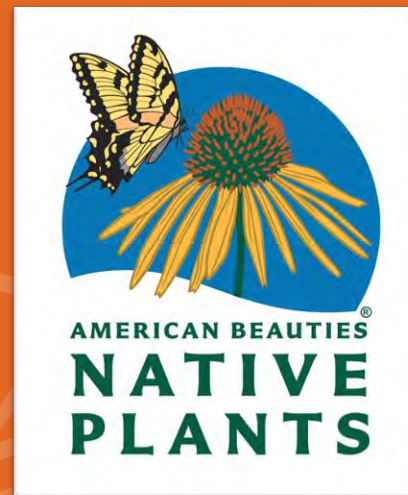

'Autumn Gold' really shines with a carpet of 2" diameter blooms with yellow rays and dark brown center cones. Attractive foliage and massive September - October bloom make this an excellent addition any pollinator garden.

Prefers average, well-drained soils. Grows best with added moisture but can tolerate drought. Allow seed heads to remain for winter food for birds. Divide clumps in spring or fall every 3 to 4 years.

- Height: 16-24"
- Spread: 16-24"
- Zone: 5-9
- Light: Full sun

Number to Sell: 500

Finish Date: 10/01/2021

# Heliopsis helianthoides var. scabra 'Burning Hearts'

This native is a natural show off in the garden with large, daisy-like yellow-orange flowers that fade to bronze. This plant offers a continuous stream of buds that open from July through September. 'Burning Hearts' is cold hardy, deer resistant and provides nectar for many native pollinators. Prefers moist, well-drained soil in full sun, but may tolerate drought. Propagate by seed, cuttings or division every 2-3 years. Deadhead to extend the blooming season. Low maintenance. Best utilized in the back of a border garden to accent lower growing, brightly colored perennials, as well as wildflower and cutting gardens.

- Height: 3-4ft.
- Spread: 12-18in.
- Zone: 3-9
- Light: Full sun

Number to Sell: 150  
Finish Date: 10/01/2021

AMERICAN BEAUTIES  
**NATIVE  
PLANTS**

# Heuchera longiflora

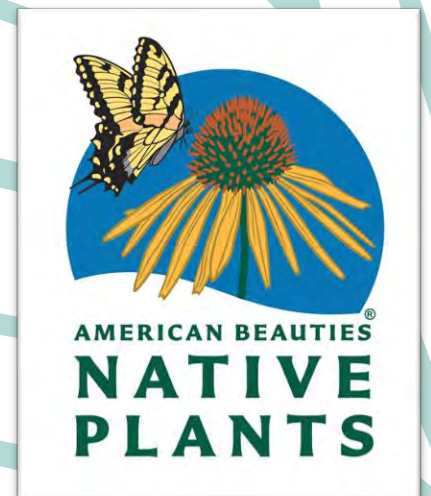

A beautiful display when used in a group, the long flowering stems of this alumroot sway high above deep green foliage mottled in silver highlights. Flowers in May and June attract butterflies and hummingbirds.

Grows best in organically rich, moist, well-drained soils. Grows well in full sun in the northern part of its range but needs afternoon shade in southern areas. Remove stems of faded flower to encourage continued bloom. In cold winter climates, winter mulch applied after the ground freezes helps prevent root heaving. Divide clumps in spring every 3-4 years to keep plants vigorous.

- Height: 8-14in.
- Spread: 12-18in.
- Zone: 4-8
- Light: Part Sun to Full Shade

Number to Sell: 500

Finish Date: 10/01/2021

# Juglans nigra

Black walnuts are very tall, statuesque, shade trees best planted in informal settings. Their wood is prized for furniture building and over harvesting has caused a serious decline in native populations. They are host plants for over 100 species of butterflies and moths! Plant this tree in full sun where it will have room to grow and falling nuts will not be a problem. They prefer full sun and moist, well-drained soil.

Black walnuts produce chemicals called juglones which are very toxic to certain other plants such as azaleas, rhododendrons, blueberries, peonies and solanaceous crops like tomatoes, peppers, potatoes. Most of the toxicity is limited to within the drip line of the tree.

- Height: 50-75ft.
- Spread: 50-75ft.
- Zone: 4-9
- Light: Full Sun

Number to Sell: 100  
Finish Date: 04/01/2022

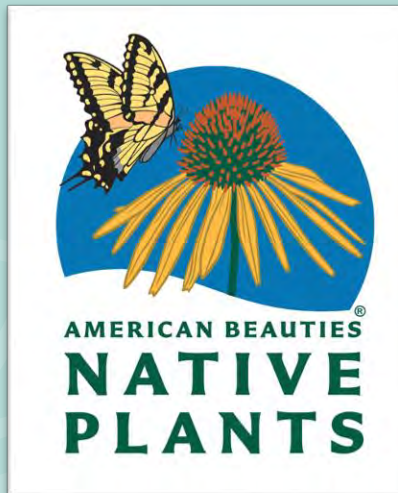

# Liquidambar styraciflua

The American sweetgum — with its star-shaped leaves, neatly compact crown, interesting fruit, and twigs with unique corky growths called wings — is an attractive shade tree. It has become a prized specimen in parks, campuses, and large yards across the country. Features glossy green star-shaped leaves throughout the summer and produces beautiful shades of yellow, orange, red, and purple in the autumn. Keeps its fall leaves late into the season. Is native to North America.

- Height: 60' - 75'
- Spread: 40' - 50'
- Light: Full Sun
- Zone: 5 - 9

Number to Sell: 100  
Finish Date: 04/01/2022

# Lysimachia lanceolata 'Burgundy Mist'

A lance-leaved Loosestrife 'Burgundy Mist' is easy to grow and showy. This short, spreading, groundcover asks for very little but offers great reward in the garden in the form of a summer-long show of bright yellow flowers above wine-colored, lance-like foliage. Perfect for massing, outstanding in container gardens and pollinators love it. This evergreen groundcover likes a partially sunny to full sun location.

- Height: 12-24"
- Spread: 12-24"
- Zone: 4-8
- Flower: Yellow
- Light: Part to full sun
- Attracts: Birds, Butterflies

Number to Sell: 1,054  
Finish Date: 10/01/2021

# Quercus alba

White Oak is one of the preeminent hardwoods of Eastern North America and is long-lived. Although called a White Oak, it is unusual to find an individual specimen with white bark, the usual color is gray. In the forest it can reach a magnificent height and in the open it develops into a massive broad topped tree with large branches striking out at wide angles. In spring, the young leaves are a delicate silver pink and covered with a soft blanket like down, the petioles are short and the leaves which cluster close to the ends of the shoots are pale green and downy with result that the entire tree has a misty frosty look. Many forms of wildlife feed on the acorns during the fall and winter.

- Fruit:  $\frac{3}{4}$  to 1 in. nut
- Height: 50-80'
- Spread: 50-80'
- Light: Full sun
- Water: Dry to medium
- Soil: Deep, moist well-drained soils
- Zone: 3 to 9

Number to Sell: 100  
Finish Date: 04/01/2022

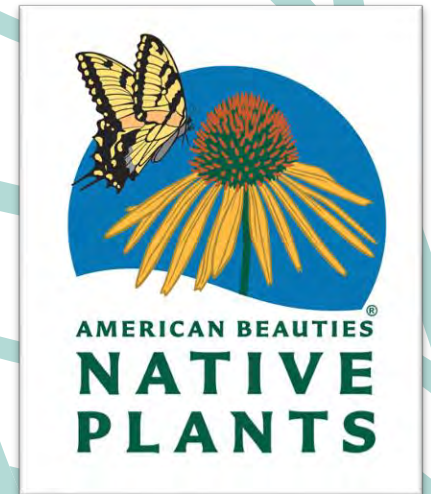

# Quercus bicolor

Swamp White Oak, a relatively large deciduous tree with a long lifespan. The open rounded crown makes it a good shade tree for large areas. It produces a good acorn crop every 3 to 5 years that wildlife love to eat. The acorns are distinguishable by they're long stalks. It is found growing wild in low-lying and swampy areas — often moist bottomlands or riverbanks. Plant in an area along a pond, a stream or other wet sites.

- Height: 50 - 90 ft.
- Spread: 30 - 100 ft.
- Zone: 3 - 8
- Light: Full Sun, Partial Shade

Number to Sell: 100

Finish Date: 04/01/2022

# Quercus coccinea

Scarlet Oak is a native deciduous tree in the beech family that grows 50 to 80 feet tall and spreads between 45 to 60 feet. It is long-lived, durable and easy to grow. The tree prefers acidic sandy soils on the dry side but will tolerate other soils if they are well-drained. The tree is narrow with an open irregular crown and often retains numerous small dead branches. It is often grown for its beautiful fall color and drought tolerance. It is an important source of food for many wildlife species. This tree has seven-lobed leaves 3 to 6 inches long, each lobe having several sharp points where the veins continue out in the form of bristles.

- Height: 50 - 80 ft.
- Spread: 45 - 78 ft.
- Light: Full sun, Partial Shade
- Soil: Good Drainage, Moist, Occasionally Dry
- Zone: 4 -9

Number to Sell: 100  
Finish Date: 04/01/2022

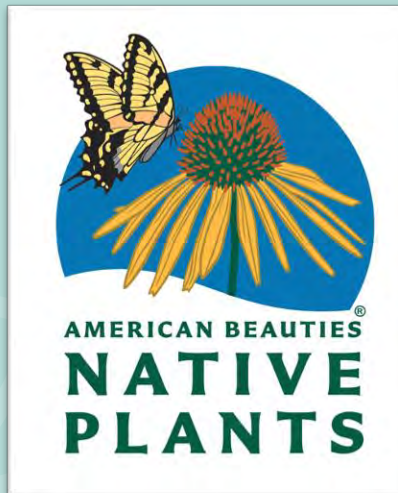

# Quercus palustris

Commonly called pin oak this is a medium sized deciduous tree. Easily grown in average, medium to wet, acidic soils in full sun. Prefers moist loams. Tolerates poorly drained soils and some flooding. May take up to 20 years to bear a first crop of acorns. Pyramidal through early maturity, its form turns more oval in older age. Glossy dark green leaves turn russet, bronze or red.

- Height: 50 - 70 ft.
- Spread: 40 - 60 ft.
- Light: Full sun
- Zone: 4- 8
- Soil: Good Drainage, Moist

Number to Sell: 100  
Finish Date: 04/01/2022

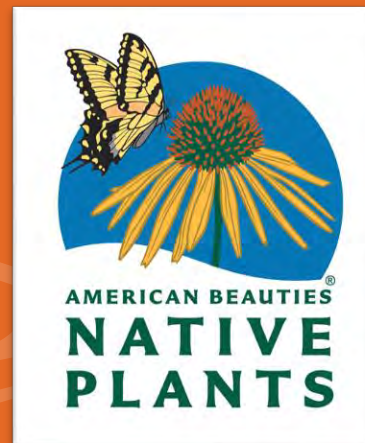

# Quercus rubra

A fast growing medium sized, native American variety of Oak known for its bright red fall color. Dark, glossy green leaves with notched lobes are sharply pointed at the tips.

- Height : 60–75'
- Spread : 45'
- Light : Full Sun
- Soil : acidic, loamy, moist, sandy, well-drained and clay
- Zone: 3–8

Number to Sell: 100

Finish Date: 04/01/2022

# Sambucus canadensis 'Adams'

Adams is a native elderberry. Fruit contains a high amount of vitamin C and has better, consistent quality than wild elderberries. Very juicy, purple berries, excellent for pies, syrups, wine, etc. Late ripening and a heavy producer. Vigorous plants have glossy green foliage and develop large white flower-heads. If not harvested first for tea or wine, elderflowers develop into exceptional, large fruit clusters in the summer. Cold-hardy.

- Height: 6' to 12'
- Spread: 10'
- Light: Full sun to Part Sun
- Soil: consistently moist, fertile soil
- Zone: 3 to 9
- Best pollinator: any other elderberry variety

Number to Sell: 500

Finish Date: 09/01/2021

AMERICAN BEAUTIES®  
**NATIVE  
PLANTS**

# Sassafras albidum

Sassafras is a native tree known for its autumn foliage and aromatic smell. Leaves are bright to medium green in summer changing to interesting colors of yellow, orange, scarlet in the fall. Leaves may also have a mitten shape. Remove shoots that develop for a single-trunk tree.

- Height: 30 to 60 feet
- Spread: 25 to 40 feet
- Light: Full sun to part shade
- Soil: Rich, moist, sandy loams, acidic
- Attracts: Birds , Butterflies

Number to Sell: 100

Finish Date: 04/01/2022

AMERICAN BEAUTIES®  
**NATIVE  
PLANTS**

# Sorghastrum nutans Golden Sunset™ - Grass

One of four dominant native grasses to the tallgrass prairie of the Central United States, *Sorghastrum nutans*, grows on a wide variety of sites and soils. Native plants in natural or restored prairies will be taller in southern states and shorter with earlier flowers in northern locations. This variety has proven winter hardy as far north as USDA Hardiness Zone 3. Its flowers first emerge in mid-August and remain attractive through the winter. Unlike most *Sorghastrum nutans*, it remains upright and does not lodge or fall over. This new patented grass from the University of Minnesota will be a good addition to landscapes throughout the U.S. but especially in northern climates. Plants grow to 4-6 feet tall at maturity but are closer to 4 or 5 feet the first year or two. Large mature plants can be 36 inches wide, with hundreds of flowering stems. It has olive-green foliage that is just over ½ inch wide. Flowers average 9 inches in length and are a showy yellow and golden-bronze color. It has no known pests or diseases.

- Zone: 3-10
- Height: 60 inches
- Foliage: Green
- Light: Full Sun

Number to Sell: 1000  
Finish Date: 10/01/2021

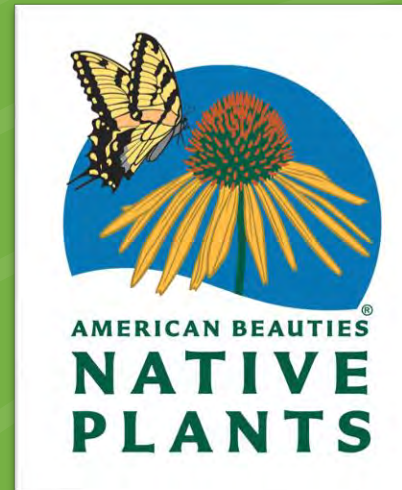

# Verbena stricta

Hoary Verbena is one of the best summer-blooming meadow plants anywhere! Tall with green fuzzy foliage, this becomes a rounded bush by mid-summer that tops itself in July with spikes of pinkish-lavender flowers. Butterflies love the constant summer blooms! Tolerant of poor, dry soil and drought. Host plant for Buckeye butterflies. Prefers average, dry to medium, well-drained soils in full sun. Will thrive in dryish, sandy soils. Naturalizes by self-seeding to form colonies.

- Height: 2-3ft.
- Spread: 2-3ft.
- Zone: 3-7
- Light: Full Sun

Number to Sell: 500  
Finish Date: 10/01/2021

BLOOM · *ables*

everything that blooms

Bloomin' Easy provides a solution for those who are novice to landscaping or too busy to provide constant attention to their yard. This program offers plants that exude the beautiful colors and volume found in attention-intensive plants, but at a low-maintenance level. These plants are gorgeous, but also durable to environment and conditions it is grown in. After purchase, there are how-to and plant care videos to ensure that plant upkeep is as simple and time efficient as possible. These plants have been tested numerous times to ensure that they are quality, durable features for any landscaping area. Perfect for any outdoor space, Bloomin' Easy enables successful growth with minimal care.

# Candelabra® Hydrangea

This award-winning plant has candle-shaped flowers that bloom creamy white and transition into bright red as summer fades. Sturdy red stems carry the beautiful blooms and provide winter attraction, tastefully contrasting the snow.

- Height: 4 – 6 feet
- Spread: 4 – 6 feet
- Zone: 3 – 8
- Habit: Upright

Number to Sell: 5471  
Finish Date: 05/01/2022

# Tilt-A-Swirl® Hydrangea

Its red and green bicolor blooms are a show-stopper and keep performing all summer and fall. Flowers deepen to a bright red and green swirl and keep on transforming into new variations throughout the autumn. Considered a continuous bloomer, the flowers are bred to be tougher than other Hydrangeas on the market and look amazing for months and months. Tilt-A-Swirl® was awarded a Gold Medal at the prestigious Plantarium horticulture event in Holland, and is making its mark in North America. Enjoy the ride with this new addition to the Bloomin' Easy collection – just plant it, water it, and relax.

- Height: 3-4 feet
- Spread: 3-4 feet
- Habit: Mounded
- Light: Part Sun
- Zone: 5 - 8

SHRUBS & TREES

# Cotoneaster 'Bronfire' Autumn Inferno®

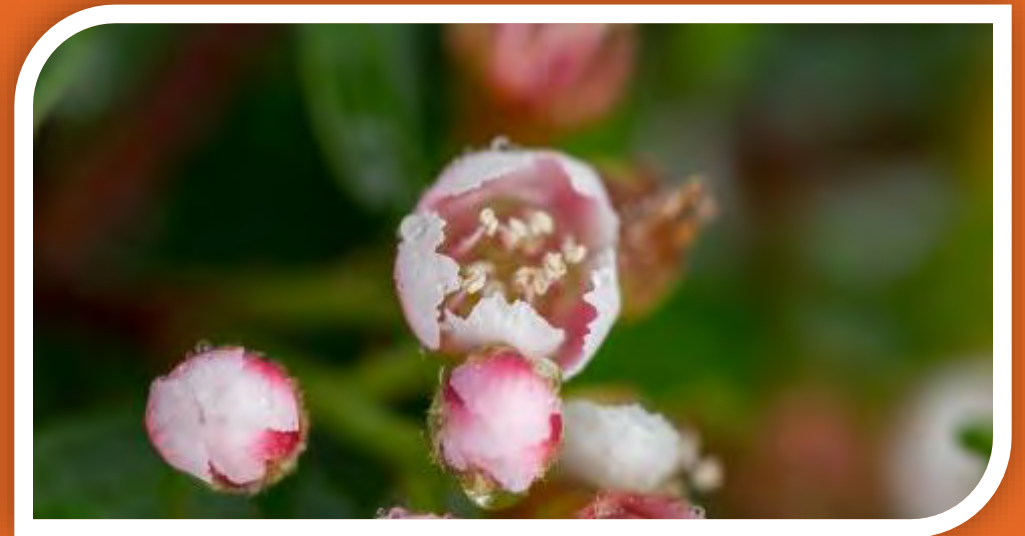

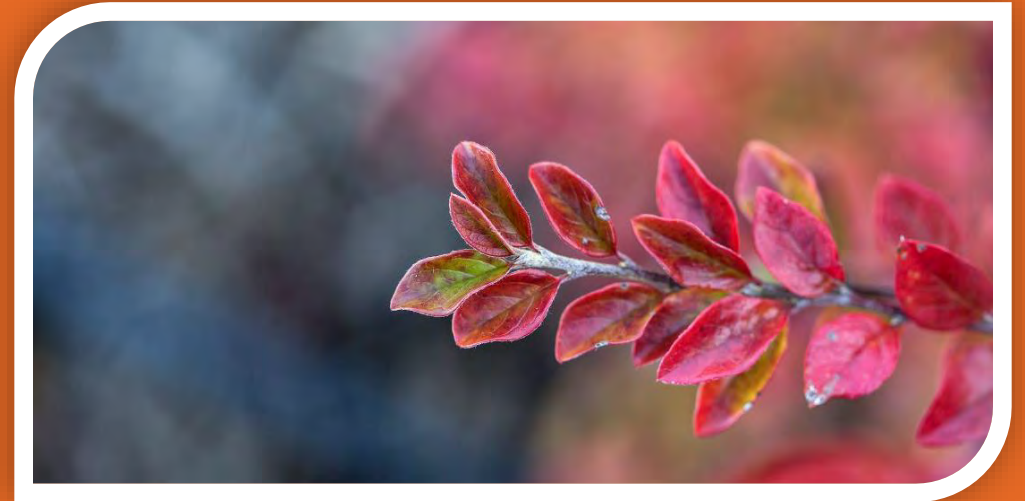

So many attributes for a hedge – great form, easily pruned, great foliage all season long and fiery red fall color. But what we really love about Autumn Inferno® is the small red berries formed along the stems in fall. The berries stay on the plant until the birds come and take them, no mess involved. Perfect as a pruned formal hedge or let it go natural. Just enough height to create privacy.

- Height: 5-6'
- Spread: 4-5'
- Light: Full Sun to Part Shade
- Zone: 5-7
- Flower: Pink
- Foliage: Dark Green
- Fall Foliage: Orange

SHRUBS & TREES

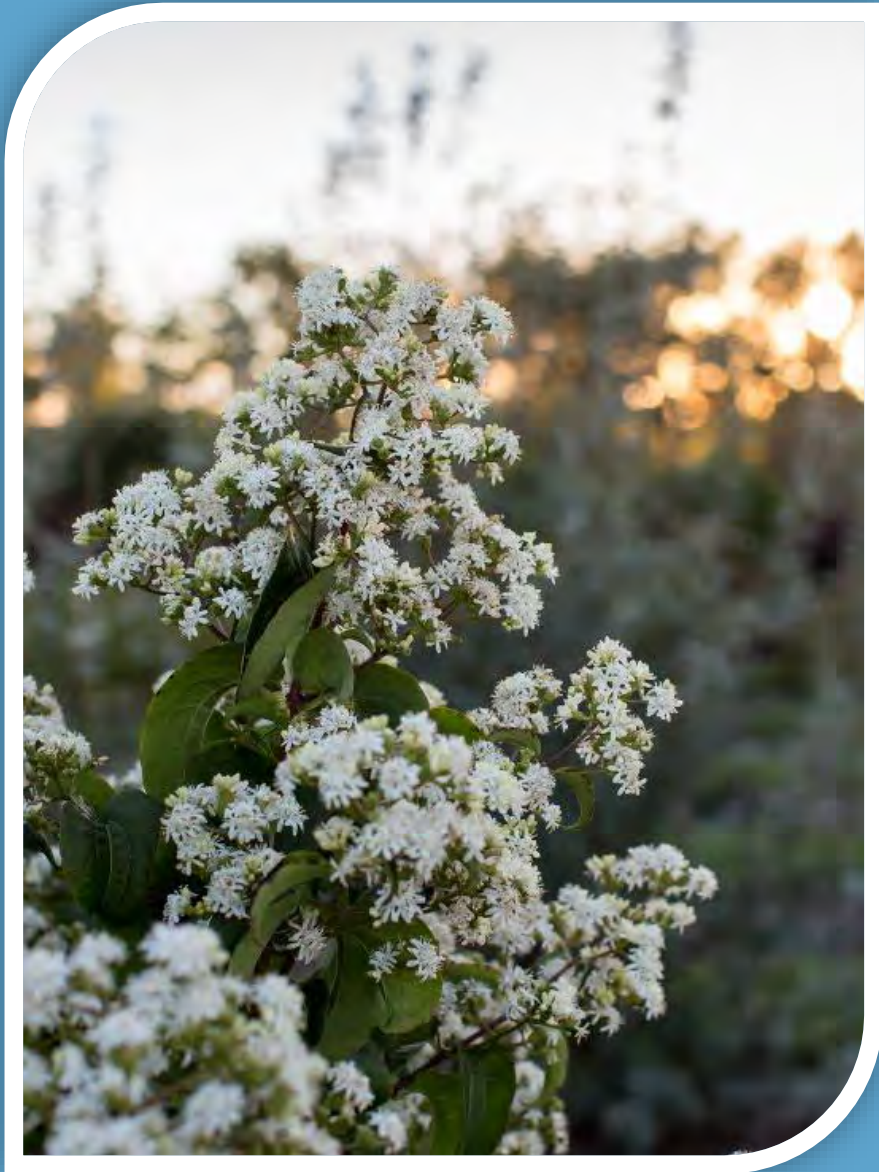

# Tianshan® Heptacodium Miconioides 'MINHEP'

While bred in France, this new cultivar is named after the mountain range in China where the species is native. Clusters of fragrant, creamy-white flowers appear in late summer, with each whorl containing 7 flowers. The blooms are followed in autumn by unusual purplish-red fruits. What makes this variety unique is its compact habit, growing only 8-12', spreading only 5-7'. This small plant is well branched and forms a rounded, upright shrub or small tree with dark green shiny foliage that turns yellow in late fall. Exfoliating bark is very attractive in the winter. Use as a feature plant or as an informal hedge.

- Height: 8-12'
- Spread: 5-7'
- Light: Full Sun to Part Shade
- Zone: 5-9
- Shape: Upright arching
- Flower: White
- Foliage: Bright Green

# Hydrangea Paniculata 'RENBA'

## Berry White®

This variety has abundant, long lasting, rounded flower heads that start white and progress to pink, intense raspberry red and finally wine red. Flowers start blooming in July and take on red coloration early in the season. Flower color is best in the fall when night temperatures are 10 degrees cooler than day temperatures.

- Height: 6-7'
- Spread: 4-5'
- Light: Full Sun to Part Shade
- Zone: 3-8
- Shape: Upright
- Flower: Dark Pink
- Foliage: Green

SHRUBS & TREES

# Hydrangea Panicle Little Hottie®

This little hydrangea is extremely compact with great branching and is much easier to manage in production. Deep green leaves are a beautiful backdrop for the late summer flowers that are held up on strong and sturdy stems. Born in a tight cluster, the blossoms are initially green and open to a creamy white. As evening temperatures drop in the fall, the petals turn shades of white and pink. The small size, reduced need for pruning, and large flowers make this an ideal choice for smaller landscapes where larger traditional panicle hydrangeas won't fit.

- Zone: 3
- Height: 3-5'
- Spread: 3-5'
- Light: Full Sun to Part Shade

# Ilex Crenata 'MAD-IC-I'

## Chubby Hubby™

Chubby Hubby™ Ilex is best described as Ernie to Straight & Narrow® Japanese Holly's Bert, with similar leaves and strong upright branches yet it is considerably wider and more oval in habit than its counterpart. The dad-bod features of this holly are perfectly suited for evergreen hedging, replacing boxwoods and other evergreens that are plagued by diseases, insects, or are weak stemmed. Leaves are flat, do not cup, and remain a shiny dark green all winter. Male. Bred by Dr. Michael Dirr at the University of Georgia.

- Height: 5-7'
- Spread: 3-4'
- Light: Full Sun to Part Shade
- Zone: 6-8
- Shape: Upright, oval
- Flower: White
- Foliage: Dark Green

The background of the entire page is filled with stylized, overlapping leaf outlines. The leaves are drawn with thin lines and are colored in shades of green, orange, and light blue. Some leaves are solid colors, while others are just outlines. They are arranged in a way that creates a sense of depth and movement, with some leaves appearing to be in the foreground and others behind.

# Haywire™ False Cypress

## Chamaecyparis lawsoniana

Unique thread leaf textured foliage. Healthy and hardy, ready to perform reliably in the landscape. Large, statement-making specimen plant with foliage and winter interest. Salt tolerant. Works well as a dramatic specimen or substantial screen. Requires free draining soil with average moisture. Maintain even moisture with a layer of mulch. Rarely requires pruning but may be trimmed in spring if desired.

- Height: 12 - 18 feet
- Spread: 12 - 18 feet
- Foliage: Green
- Light: Part Sun to Sun
- Zone: 5b, 6a, 6b, 7a, 7b
- Water: Average, Needs Good Drainage
- Soil: Average Soil

Number to Sell: 18  
Finish Date: 07/15/2022

# 'Chocoholic'

## Cimicifuga hybrid

Bronze purple foliage is a welcome addition to the shade garden. Rich mauve-pink flowers lighten to white as they age. Flowers and foliage are fragrant. Native to the edges of woodlands in eastern North America, Cimicifuga performs best in partial shade and moist, organically enriched soil. Some direct sunlight is required to draw out the purple coloration in the foliage. Water supply should remain constant throughout the spring, summer and autumn. Cimicifuga takes a few years to get established and reach maturity. Mature clumps should not be disturbed.

- Height: 48 - 50 Inches
- Spread: 30 - 34 Inches
- Flower: Pink, White
- Foliage: Brown, Purple
- Habit: Upright
- Light: Part Shade to Shade
- Zone: 4a, 4b, 5a, 5b, 6a, 6b, 7a, 7b, 8a, 8b
- Water: Consistent
- Attracts: Bees, Butterflies
- Resists: Deer, Rabbits

Number to Sell: 177  
Finish Date: 09/01/2021

# Legend Of The Small™ Fothergilla x intermedia 'NCFI1'

Legend of the Small Bottlebrush displays abundant, fragrant white blooms in spring. The foliage is blue-green all season until it erupts in amazing fall color. This compact shrub is native to North America, attracts bees, and resists deer. This lovely native plant lends an informal, natural charm anywhere it is planted. It is especially nice grouped under trees or planted as a low hedge. It can also be incorporated into flower gardens or wildlife gardens. This plant has an appealing natural habit and is not suited to being cut back or trimmed regularly.

- Zone: 5-9
- Height: 24 - 30 In
- Spread: 24 - 36 In
- Light: Full Sun, Part Sun
- Flower: White
- Foliage: Blue, Green
- Features: Fragrant, Native to N. America, Resists Deer

Number to Sell: 1000  
Finish Date: 07/15/2022

# Steady as She Goes™ Gardenia jasminoides 'Prince Charles'

A Gardenia you can depend on! This introduction from Phil Dark gives you everything you need - heat tolerance, cold hardiness, and best of all, continuous blooming. You won't have to worry about flower buds dropping off due to bad weather, Steady as She Goes™ will keep blooming up until frost. All the while being complemented beautifully by glossy, evergreen foliage. Fragrant Flower.

- Height: 36 - 60 Inches
- Spread: 48 - 84 Inches
- Light: Part Sun to Sun
- Maintenance: Moderate
- Blooms On: Old Wood

- Zone: 7a, 7b, 8a, 8b, 9a, 9b, 10a, 10b
- Water: Consistent, Needs Good Drainage
- Soil: Average Soil

Number to Sell: 250

Finish Date: 07/15/2022

# Temple of Bloom®

## Heptacodium miconioides

Temple of Bloom seven-son flower is a beautiful, easy to grow small tree which simply can't be matched for year-round beauty. In spring, the leaves emerge, each sporting dramatically deep veins that make the plant stand out in the landscape. As the season progresses, the leaves grow larger and develop a long, twisting tip. In August, when everything else is winding down, it is coming into its own, as it becomes covered in big clusters of fragrant white flowers that pollinators flock to. They last for weeks before gracefully falling to the ground to reveal vivid red, fan-like bracts, which make it look like the plant is blooming again in a completely different color. As winter comes and the leaves drop, the plant's elegant frame is revealed, along with amazing light tan peeling bark. It is the perfect choice for a special spot in your landscape. Plant it where it can be seen, often, and enjoyed any time of the year.

- Attracts: Bees, Butterflies, Hummingbirds
- Height: 72 - 120 Inches
- Spread: 72 - 120 Inches
- Flower: Red, White
- Foliage: Green
- Habit: Upright
- Light : Part Sun to Sun
- Zone: 5a, 5b, 6a, 6b, 7a, 7b, 8a, 8b, 9a, 9b
- Water: Average

Finish Date: 10/01/2021

# Paraplu Rouge™ Hibiscus syriacus 'Minsyrou17'

Big drama blooms. These are the deepest, darkest reddish-pink blooms we've ever seen on a rose of Sharon! Plus, the blooms themselves are quite large. With this duo of characteristics, your garden is sure to stand out on the block. Top reasons to grow Paraplu Rouge™ rose of Sharon in your garden: Lovely dark reddish-pink flowers; Graceful habit that moves in the breeze - not stiff and awkward like other roses of Sharon; Long blooming and low maintenance, so you can just enjoy the season. Thanks to their naturally graceful habit, Paraplu roses of Sharon don't require much pruning. If you wish to prune them, however, early spring is the best time to do so. Note that rose of Sharon is quite late to leaf out in spring, so be patient with it. Recommend full sun for rose of Sharon for the maximum amount of blooming and best color, but it can grow and flower reasonably well in partially shaded spots.

- Height: 72 - 120 Inches
- Spread: 60 Inches
- Light: Sun
- Blooms On: New Wood
- Bloom Time: Summer through Fall
- Zone: 5a, 5b, 6a, 6b, 7a, 7b, 8a, 8b, 9a, 9b
- Water: Average
- Attracts: Butterflies, Hummingbirds
- Resists: Deer

Number to Sell: 250

Finish Date: 07/15/2022

# Lavender Chiffon® Hibiscus syriacus 'Notwoodone'

The newest member of the incredible CHIFFON® rose of Sharon series! Honestly, we just got lucky with this one. It was growing by its parent Lavender CHIFFON® and since then it has proved it's out and out a richer color. Gardeners who prefer a luscious, rich colored flower will be happy to see Dark Lavender CHIFFON® as a hedge, specimen, or within a border. Top reasons to plant Dark Lavender Chiffon rose of Sharon in your landscape: Darker, more impressive purple blooms than the original Lavender CHIFFON®; Produces few to no seeds; Long blooming; Heat Tolerant; Drought Tolerant; Salt Tolerant.

- Height: 96 - 144 Inches
- Spread: 72 - 120 Inches
- Light: Sun
- Maintenance: Easy
- Blooms On: New Wood
- Bloom Time: Early Summer, Mid Summer, Late Summer
- Zone: 5a, 5b, 6a, 6b, 7a, 7b, 8a, 8b, 9a, 9b
- Water: Average
- Attracts: Butterflies, Hummingbirds
- Resists: Deer

Number to Sell: 1000  
Finish Date: 07/15/2022

# Magenta Chiffon® Hibiscus syriacus 'Rwoods5'

The newest color to join the award-winning series. Many superlative qualities set the Chiffon® series of rose of Sharon apart from the rest: graceful, rounded habit. More flowers, for a longer time, and with better coverage of the plant. Powderpuff flowers that face outward like beaming, smiling faces. And now, richly colored Magenta Chiffon joins Lavender, Blue, White, and Pink for a full complement of effortless summer beauty. Whether you plant one striking specimen of your favorite variety or mix and match for a colorful collection, you will see that Chiffon roses of Sharon are anything but conventional. Low seed set means fewer nuisance seedlings popping up everywhere.

- Height: 96 - 144 Inches
- Spread: 72 - 120 Inches
- Light: Sun
- Maintenance: Easy
- Blooms On: New Wood
- Bloom Time: Summer through Fall
- Zone: 5a, 5b, 6a, 6b, 7a, 7b, 8a, 8b, 9a, 9b
- Water: Average
- Attracts: Hummingbirds

Finish Date: 07/15/2022

# Wee Bit Grumpy®

## Hydrangea macrophylla

Selected for its combination of pure, intense, saturated flower color and outstanding landscape performance. In acidic soils, its big, full blooms take on a moody, dramatic deep purple-blue. They appear amid a neat, tidy mound of compact foliage that resists disease and stands up better to cold weather than conventional hydrangeas. Big, full blooms display a deep, moody color. Excellent performance in the landscape. Dark green glossy foliage and continuous bloom or rebloomer. Salt tolerant.

- Height: 24 Inches
- Spread: 30 Inches
- Flower: Purple, Red
- Flower Shade: Bright red in neutral to alkaline soils; red-violet in acidic conditions
- Foliage: Green
- Habit: Mounded
- Light: Part Sun to Sun
- Zone: 5 - 9
- Water: Average
- Soil: Fertile

Finish Date: 09/01/2021

# Little Lime Punch™

## Hydrangea paniculata

Flowers change progressively from the bottom up in a gorgeous array of white, light pink, and rich Hawaiian Punch red. As it reblooms throughout the summer you'll see these four colors mix to create a truly memorable show. With a compact habit and strong stems, you'll find it's as useful in the landscape as it is beautiful. Fantastic color show - a mix of white, green, and pink all on one bloom! Same useful, petite habit as Little Lime. Impactful fall color - fall and winter interest. This compact, hardy hydrangea fits easily into smaller landscapes, including container gardens. Soil pH does not affect bloom color.

- Height: 36 - 60 Inches
- Spread: 36 - 60 Inches
- Flower: Green, Pink, Red, White
- Flower Shade: Blend of colors, turns red in fall
- Foliage Colors: Green
- Habit: Mounded
- Light: Part Sun to Sun
- Zone: 3 - 8
- Water: Average
- Soil: Average Soil

Number to Sell: 986

Finish Date: 04/15/2022

# Gatsby Gal®

## Hydrangea quercifolia

Compact plant with lots of flowers. A little smaller than other oakleaf hydrangeas, but with impressively large flowers, and lots of them. Full panicles of pure white blooms are held upright above the foliage. The flowers are quite large relative to the plant's compact size and make this plant a great choice for smaller gardens. The blooms are not affected by soil pH. Foliage and fall interest. Native to North America.

- Height: 60 - 72 Inches
- Spread: 60 - 72 Inches
- Flower: White, will turn pinkish in fall
- Foliage: Green, wine-red fall color
- Habit: Mounded
- Light: Part Sun to Sun
- Zone: 5a, 5b, 6a, 6b, 7a, 7b, 8a, 8b, 9a, 9b
- Water: Average

Number to Sell: 59  
Finish Date: 08/15/2021

**PROVEN**  
**WINNERS®**  
The #1 Plant Brand.®

# Gatsby Moon®

## Hydrangea quercifolia

Very full, eye-catching flowers. This is a distinctive, showy take on our beloved native oakleaf hydrangea. Doubled florets are like those of 'Harmony,' but more weather-resistant. The tightly packed, pure white florets create very full, conical panicles with a unique 'quilted' effect. As the bloom ages, it turns a nice shade of green that lasts through most of the summer. The green foliage has wonderful wine-red fall color - fall interest. Native to North America.

- Height: 6 – 8 feet
- Spread: 6 – 8 feet
- Flower: Green, White
- Flower Shade: White, changing to green as it ages.
- Foliage: Green, turning burgundy-red in fall.
- Habit: Mounded
- Light: Part Sun to Sun
- Zone: 5a, 5b, 6a, 6b, 7a, 7b, 8a, 8b, 9a, 9b
- Water: Average

Number to Sell: 44

Finish Date: 10/15/2021

# Gatsby Pink®

## Hydrangea quercifolia

Gatsby Pink® oakleaf hydrangea boasts big, showy blooms that quickly transform from pure white to a glorious pink, providing months of color. Handsome dark green foliage turns burgundy-red in autumn. This North American native is perfect for woodland gardens and informal plantings. Excellent fall color and salt tolerant. Best in moist, well-drained soils. Prune after flowering. Fertilize in spring. May need winter protection in colder climates.

- Height: 6 - 8 feet
- Spread: 6 - 8 feet
- Flower: Pink, White
- Flower Shade: White flowers quickly change to pink
- Foliage Shade: Green summer turns mahogany-red in fall
- Habit: Mounded
- Light: Part Sun to Sun
- Zone: 5a, 5b, 6a, 6b, 7a, 7b, 8a, 8b, 9a, 9b

Finish Date: 04/15/2022

# Let's Dance ¡Arriba!™

## Hydrangea x

This cute little shrub will grow to maturity and fill out within a couple seasons. Let's Dance ¡Arriba! is one of the most prolifically flowering, fastest-growing reblooming hydrangeas we've seen! Its flower color is dependent on the soil pH, but no matter what type of soil you have, you can depend on brilliant color. Large, dense flowers look gorgeous well into fall, aging to soft mauve! Salt Tolerant.

- Height: 24 - 36 Inches
- Spread: 24 - 36 Inches
- Light: Part Sun to Sun, Sun
- Maintenance: Easy
- Blooms On: New Wood, Old Wood
- Bloom Time: Summer
- Zone: 4a, 4b, 5a, 5b, 6a, 6b, 7a, 7b, 8a, 8b, 9a, 9b
- Water: Average
- Soil: Fertile Soil
- Flower: Rich violet-purple in acidic soil, saturated pink in basic soil

Number to Sell: 2000  
Finish Date: 09/15/2021

# Fizzy Mizzy™ *Itea virginica*

A sweetspire that literally stands out in the landscape! Its abundant upright flower spikes are bright white and carry a light, lovely fragrance that attracts people and pollinators. An early summer bloom time helps bridge the gap between the seasons seamlessly and its thick, dark green foliage is handsome enough to carry the show for the rest of the season. With a petite size, you'll be able to use it in any size garden. Very tidy, uniform habit one of the most shade tolerant flowering shrubs.

- Height: 24 - 36 Inches
- Spread: 24 - 36 Inches
- Light: Full Shade, Part Shade to Shade, Part Sun to Sun, Sun
- Maintenance: Easy
- Blooms On: Old Wood
- Bloom Time: Early Summer, Mid Summer
- Zone: 5a, 5b, 6a, 6b, 7a, 7b, 8a, 8b, 9a, 9b
- Water: Average
- Soil: Average Soil
- Attracts: Bees, Butterflies
- Resists: Deer

Number to Sell: 1000  
Finish Date: 07/15/2022

# Aquavita™ Juniperus virginiana

This aqua-blue pyramidal juniper caught our attention for its color and kept us hooked with its elegant narrow habit. If you're familiar with 'Blue Arrow', Aquavita™ has a more natural-looking, filled in shape. Excellent deer resistance and low maintenance nature make it a perfect fit for any garden, as a specimen, screen, or hedge. Evergreen, ready for season-long interest. Handsome habit - tall, but still quite narrow. Produces Berries.

- Height: 120 - 180 Inches
- Spread: 36 - 48 Inches
- Light: Sun
- Maintenance: Easy
- Bloom Time: Grown for Foliage
- Zone: 4a, 4b, 5a, 5b, 6a, 6b, 7a, 7b, 8a, 8b, 9a, 9b
- Water: Low
- Attracts: Birds
- Resists: Deer

Number to Sell: 1000

Finish Date: 07/15/2022

# 'Scentsation' Honeysuckle

## 'Scentsation' Lonicera periclymenum

'Scentsation' honeysuckle is a very showy vine with extremely fragrant yellow flowers. Blooms from mid-spring to late summer, followed by bright red berries. This floriferous honeysuckle has a very long bloom time, and is a wonderful addition to summer gardens, especially when trained up a trellis or fence. Not invasive like other honeysuckles. Adaptable to most soils. Pruning is usually not needed but may be trimmed after flowering.

- Height: 96 - 120 Inches
- Spread: 60 - 72 Inches
- Flower: White, Yellow
- Foliage: Green
- Habit: Climbing
- Light: Sun
- Zone: 4a, 4b, 5a, 5b, 6a, 6b, 7a, 7b, 8a, 8b, 9a, 9b
- Water: Average

Number to Sell: 511  
Finish Date: 08/15/2021

# Westcountry™ 'Blacksmith' Lupine *Lupinus polyphyllus*

Bold dark purple and white bi-color Lupine with upright spikes. Fast growing. Lupine prefer to be grown in well drained soil on the slightly acidic side. It is recommended to deadhead Lupine for extended bloom time. Attracts bees and butterflies. Deer and rabbit resistant.

- Height: 24 - 36 Inches
- Spread: 24 Inches
- Flower: Royal purple & white petals
- Foliage: Green shades
- Habit: Upright
- Light: Part Sun to Sun
- Zone: 4a, 4b, 5a, 5b, 6a, 6b, 7a, 7b, 8a, 8b, 9a, 9b
- Water: Consistent, Needs Good Drainage

Number to Sell: 340

Finish Date: 05/01/2022

# Illuminati Arch® Mockorange *Philadelphus coronarius*

Mockorange has long been beloved for its romantic white flowers, full of a sweet, orange blossom fragrance. Enjoy the elegant, arching habit, sweetly fragrant flowers, and handsome, clean foliage that looks great all season. Imagine a fragrant hedge, or a striking specimen - or plant in your perennial garden. Lots of fragrant white flowers in early summer. Never-before-seen space-saving habit takes up a fraction of the room of older varieties. Deer resistant and drought tolerant.

- Height: 48 Inches
- Spread: 48 Inches
- Flower: White
- Foliage: Green, Dark green
- Habit: Upright
- Light: Part Sun to Sun
- Zone: 4b, 5a, 5b, 6a, 6b, 7a, 7b
- Water: Average

Number to Sell: 192  
Finish Date: 08/15/2021

# Illuminati Tower®

## Philadelphus coronarius

Mockorange is a delightfully old-fashioned plant that has unfortunately fallen out of favor, mostly due to its enormous size. Illuminati Tower® mockorange stands to breathe new life into this classic favorite, though, combining a landscape-friendly size with a totally unique space-saving habit. It naturally grows in a very narrow, upright way, each sturdy stem a stack of rugged, deep green leaves that looks like a four-sided tower. In late spring/early summer, hundreds of fragrant white flowers emerge from between the leaves for striking show that truly celebrates the season.

- Height: 36 - 48 Inches
- Spread: 18 - 24 Inches
- Foliage Colors: Green, Dark green
- Light: Part Sun to Sun
- Zone: 4b, 5a, 5b, 6a, 6b, 7a, 7b
- Water: Average

Number to Sell: 192  
Finish Date: 04/15/2022

# 'Opening Act Ultrapink' Phlox hybrid

This early blooming Phlox will add a long season of color to your garden with its fluorescent rose pink flowers. Overall, it looks light pink. The dark green, glossy foliage is mildew and disease resistant. Fragrant Flower. Continuous Bloom or Rebloomer; Long Blooming. Native to North America.

- Height: 22 - 28 Inches
- Spread: 32 - 36 Inches
- Light: Part Sun to Sun
- Maintenance: Easy
- Bloom Time: Early Summer, Mid Summer, Late Summer
- Zone: 4a, 4b, 5a, 5b, 6a, 6b, 7a, 7b, 8a, 8b
- Water: Average
- Soil: Average Soil, Fertile Soil
- Soil PH: Acidic Soil, Neutral Soil
- Attracts: Bees, Butterflies, Hummingbirds

Number to Sell: 500

Finish Date: 07/01/2021

# Luminary™ 'Backlight' Phlox paniculata

Pure white flowers produce well-defined panicles on top of dark green leaves. Great for disease resistance even in hot, humid conditions. Try with other white-flowering plants to create a moonlight garden. Fragrant flower and disease resistant. Native to North America. Grows best in consistently moist, well-drained soil and full sun. Thrives with regular fertilization. Provide good air circulation.

- Height: 28 - 30 Inches
- Spread: 20 - 24 Inches
- Light: Part Sun to Sun
- Maintenance: Easy
- Bloom Time: Mid Summer, Late Summer
- Zone: 3a, 3b, 4a, 4b, 5a, 5b, 6a, 6b, 7a, 7b, 8a, 8b
- Water: Average
- Soil: Average Soil, Fertile Soil
- Soil PH: Acidic Soil, Neutral Soil
- Attracts: Bees, Butterflies, Hummingbirds

Number to Sell: 1000  
Finish Date: 08/01/2021

# Luminary™ 'Opalescence'

## Phlox paniculata

Tall Garden Phlox. Light pink, fragrant flowers have dark pink eyes and form defined panicles. Dark green leaves. One of the very best for disease resistance; a care-free plant. Grows best in consistently moist, well-drained soil and full sun. Thrives with regular fertilization. Provide good air circulation.

- Attracts: Bees, Butterflies, Hummingbirds
- Zone: 3a, 3b, 4a, 4b, 5a, 5b, 6a, 6b, 7a, 7b, 8a, 8b
- Height: 30 - 32 Inches
- Spread: 24 - 28 Inches
- Flower: Light pink with dark pink eye
- Foliage: Dark green
- Habit: Upright
- Light: Part Sun to Sun
- Water: Average

Number to Sell: 1,000  
Finish Date: 5/1/2022

# Luminary™ 'Ultraviolet'

## Phlox paniculata

Tall Garden Phlox. Dark magenta violet flower panicles produced over bright green foliage. Better disease resistance than typical Phlox. Fragrant flower. Grows best in consistently moist, well-drained soil and full sun. Thrives with regular fertilization. Provide good air circulation.

- Attracts: Bees, Butterflies, Hummingbirds
- Zone: 3a, 3b, 4a, 4b, 5a, 5b, 6a, 6b, 7a, 7b, 8a, 8b
- Height: 32 - 36 Inches
- Spread: 28 - 32 Inches
- Flower: Magenta violet
- Foliage: Bright green
- Habit: Upright
- Light: Part Sun to Sun
- Water: Average

Number to Sell: 1,000  
Finish Date: 5/1/2022

# Fine Line® Improved Rhamnus frangula

Fine Line rhamnus has been a best-seller for years - and it just got a whole lot better! Introducing Fine Line Improved, a unique update that is lush and full, from tip to toe. This makes it an even better as a space-saving hedge and gives it even more presence as a specimen. However, you like to use this versatile-yet-exotic-looking, Fine Line Improved will do it even better than the original. Like the original, it sets far fewer fruits than weedy buckthorns, and among the fruits that do develop, only a very low percentage are capable of germination. Improved variety is lush and full all the way to the ground; dense branching provides good coverage; looks exotic but is extremely easy to grow; Foliage and Fall Interest. Deadheading Not Necessary. Drought Tolerant. Fine stems with textured foliage make a nice filler for bouquets and arrangements.

- Height: 60 - 84 Inches
- Spread: 24 - 36 Inches
- Light: Part Sun to Sun, Sun
- Maintenance: Easy
- Bloom Time: Grown for Foliage
- Zone: 2a, 2b, 3a, 3b, 4a, 4b, 5a, 5b, 6a, 6b, 7a, 7b
- Water: Average

Number to Sell: 1000  
Finish Date: 08/15/2021

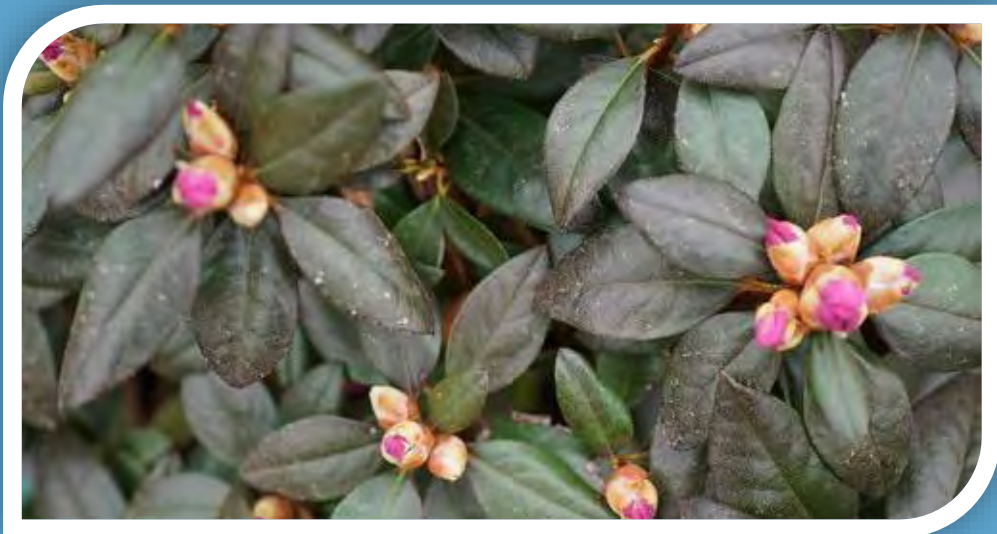

# Black Hat® Rhododendron x

This very early blooming rhododendron is a confection of ruffled lavender flowers in the first few weeks of spring, each a rounded cluster atop a spray of leathery evergreen foliage. It's the foliage that gives this plant its name, in fact - its a very dark purple-green, reaching near black tones, especially in cooler weather. This gives it undeniable drama and chic and really sets it apart from other early blooming rhodies. Thick, durable blooms ensure longer lasting flowers over an extended period.

- Height: 36 Inches
- Spread: 36 Inches
- Flower: Purple
- Foliage: Black, Green, Purple especially in cold weather.
- Habit: Upright
- Light: Part Sun to Sun
- Zone: 4a, 4b, 5a, 5b, 6a, 6b, 7a, 7b, 8a, 8b
- Water : Average

Number to Sell: 142  
Finish Date: 08/15/2021

# Rock 'N Grow® 'Back in Black' Sedum hybrid

Go to the dark side of your sun garden with this fall-blooming perennial! Near black leaves can be enjoyed throughout the summer, and later in the season, flowers bloom with red centers and cream petals. Fall and Winter Interest; Heat Tolerant; Drought Tolerant; Salt Tolerant. Performs best in full sun and poor to average, well-drained soil. Does not require supplemental water. Do not fertilize.

- Height: 20 - 24 Inches
- Spread: 26 - 30 Inches
- Light: Sun
- Maintenance: Easy
- Bloom Time: Late Summer, Early Fall
- Zone: 3a, 3b, 4a, 4b, 5a, 5b, 6a, 6b, 7a, 7b, 8a, 8b, 9a, 9b
- Water: Low, Needs Good Drainage
- Soil: Average Soil, Poor Soil
- Soil PH: Acidic Soil, Alkaline Soil, Neutral Soil
- Attracts: Bees, Butterflies
- Resists: Rabbits

Number to Sell: 1000  
Finish Date: 04/01/2021

# Rock 'N Grow® 'Coraljade' Sedum hybrid

The perfect stonecrop for fall flowering. Rich green leaves are topped by citron green buds that open to soft coral pink later in the season. Forms a beautiful dome of flowers. Foliage, Fall and Winter Interest. Heat Tolerant.

- Height: 16 - 18 Inches
- Spread: 28 - 30 Inches
- Light: Sun
- Maintenance: Easy
- Bloom Time: Late Summer, Early Fall
- Zone: 3a - 9b
- Water: Low, Needs Good Drainage
- Soil: Average Soil, Poor Soil
- Soil PH: Acidic Soil, Alkaline Soil, Neutral Soil
- Attracts: Bees, Butterflies
- Resists: Rabbits

Number to Sell: 1000

Finish Date: 07/01/2021

# Wabi-Sabi® Viburnum plicatum var. tomentosum

This unique space saving dwarf version of the popular doublefile viburnum grows low and wide, making it perfect for the front of beds, planting atop walls, or lining walkways. Every branch bears large, pure white lacecap flowers, giving the whole plant a strong horizontal presence that adds elegant structure to your plantings. Like all viburnums, it is shade tolerant and deer resistant. Practically no maintenance required.

- Height: 24 - 36 Inches
- Spread: 36 - 48 Inches
- Flower: White
- Foliage: Green
- Habit: Spreading
- Light: Part Sun to Sun
- Zone: 5a, 5b, 6a, 6b, 7a, 7b, 8a, 8b

Number to Sell: 25  
Finish Date: 09/15/2021

# Midnight Wine Shine® Weigela florida

This variety has darker, shinier leaves which make a huge impact in the landscape from spring to fall. And as for autumn, it has had displayed much better hardiness when it comes to tip die-back. Very dark, glossy foliage to keep the landscape interesting well past fall bloom. Excellent hardiness. Petite habit fits nicely into most landscapes.

- Height: 12 - 18 Inches
- Spread: 24 - 30 Inches
- Flower: Pink
- Foliage: Purple
- Foliage Shade: Blend of purple, green, and black
- Habit: Mounded
- Light: Sun
- Zone: 4a, 4b, 5a, 5b, 6a, 6b, 7a, 7b, 8a, 8b

Number to Sell: 379

Finish Date: 04/15/2022

# Snippet® Dark Pink Weigela florida

Snippet® reblooms abundantly and naturally grow as a dwarf, rounded mound. They fit perfectly in just about any sunny spot in your landscape to add appealing structure and months of color. Snippet Dark Pink weigela has thick, deep green foliage that perfectly sets off the vivid pink blooms. They appear in late spring along with other weigelas, but then they continue to bloom all through summer with waves of fresh flowers. No deadheading required. Very deer resistant.

- Height: 12 - 24 Inches
- Spread: 12 - 24 Inches
- Flower: Pink
- Flower Shade: Dark Pink
- Foliage: Green
- Foliage Shade: Dark Green
- Habit: Mounded
- Light: Sun
- Zone: 4a, 4b, 5a, 5b, 6a, 6b, 7a, 7b, 8a, 8b

Number to Sell: 158

Finish Date: 4/15/2021

The background of the slide is decorated with stylized leaf outlines in various colors: green, orange, and light blue. The leaves are arranged in a pattern that frames the central text.

# Plants that Work<sup>®</sup>

An in-house program, Plants that Work<sup>®</sup> uses relationships with breeders from around the globe to provide plant varieties that are unique, innovative, and provide solutions for every area of the home and garden. The product line consists of top-quality plants including annuals, perennials, shrubs, succulents, and tropical plants. Regardless of the size of the project, these plants offer all you need for a successful solution for every area of the home and garden.

# Allium 'Lavender Bubbles'

Alliums are charming plants for the rock or herb garden. When the foliage is bruised, it smells like onions since they are in the onion family. Butterflies and honeybees adore the flowers' sweet nectar but deer and rabbits steer clear. Nearing the end of summer, this beautiful perennial brings life to a garden with its beautiful bubble-shaped flowers. Dark dusty purple flower globes are produced above attractive glaucous blue-green foliage. The leaf blades twist and curl to provide additional interest. Compared to the popular 'Millenium', 'Lavender Bubbles' blooms later and is a darker shade of purple. Like other Allium, 'Lavender Bubbles' is carefree and easy to grow.

- Height: 12-14 Inches
- Spread: 20-22 Inches
- Zone: 4,5,6,7,8
- Flower: Purple shades
- Foliage: Green shades, Blue shades
- Light: Full Sun, Part Shade
- Water: Low to Average Water Needs
- Attracts: Butterflies, Bees

Number to Sell: 1000  
Finish Date: 05/01/2022

Plants  
that Work®

# Aster novae-angliae 'Grape Crush'

Bringing refinement to fall blooming Asters, 'Grape Crush' produces a large, very round mound with densely packed flowers. We have observed no lodging in our trials, a phenomenal achievement for fall blooming Asters. Very rich, dark purple flowers are produced above dark green foliage in early fall to midfall. A perfect finale to the growing season! Asters are native to North America and are generally very easy to grow.

- Height: 26.0-30.0 Inches
- Spread: 40.0-44.0 Inches
- Zone: 3,4,5,6,7,8
- Flower: Purple shades
- Foliage: Green shades
- Light: Full Sun
- Water: Average Water Needs
- Soil: Fertile Soil Quality

# Epimedium 'Amber Queen'

The airy, delicate-looking flowers have bright yellow spurs with orange-red centers, looking light orange from a distance. Flowers are produced along the length of the flower stems, which are up to 24" long. Bright green leaves have a blush red color close to the crown. A great addition to the shady landscape that only gets better with time. Epimedium are one of the few plants capable of surviving in dry shade. Although slow to establish, mature plants will not be missed in the landscape, particularly when in flower. These plants are appreciated for their durability but loved for the long sprays of jester hat-like flowers in spring.

- Height: 24.0 Inches
- Spread: 24.0-36.0 Inches

that Work®

# Malus 'Emerald Spire'

This flowering crabapple has a columnar habit and is covered in gorgeous fuchsia to white blooms in spring. It has typical dark green to almost purple leaves that turn golden yellow in the fall. The persistent fruit is dark red, small - up to one inch diameter and may be abundant. It adds ornamental value for fall and winter. Good disease resistance.

- Height: 20 feet
- Spread: 6 feet
- Light: Full Sun
- Zone: 2a

Number to Sell: 38  
Finish Date: 09/01/2021

Plants  
that **Work**®

# Phlox 'Fashionably Early Flamingo'

Each member of the Fashionably Early series has exceptional mildew resistance, thick leathery leaves, and a stoloniferous habit. 'Fashionably Early Flamingo' is a taller variety of Hybrid Phlox that will work best for the middle to back of the border. In addition to being early blooming, it boasts a long season of color. Light lavender pink flowers bloom well into midsummer with some rebloom in fall. Broad, thick, bright green foliage stays beautiful all season. Locate these plants in full sun for the best flowering performance and to help avoid powdery mildew concerns. A favorite of pollinators.

- Height: 30-36 Inches
- Spread: 26-30 Inches
- Zone: 4-8
- Flower: Pink shades
- Foliage: Green shades
- Sunlight: Full Sun, Part Shade
- Water: Average Water Needs
- Attracts: Butterflies, Hummingbirds

*Summer Lights*®  
C O L L E C T I O N  
L I V E I N T H E G L O W™

The background features several stylized leaves in various colors: green, orange, and light blue. The leaves are outlined with thin lines and have a simple vein pattern. They are arranged in a way that some are partially overlapping others, creating a layered effect. The colors are vibrant and the overall style is clean and modern.

# easy elegance®

ROSES YOU CAN GROW™

**Easy Elegance® marries the eye-catching beauty of hybrid tea roses with the low-maintenance of shrub roses, offering the best of both worlds. Choose from rich reds, to radiant pinks and corals, and vibrant yellows. Just plant them in a sunny spot and forget about them. That is until you're struck by their stunning beauty. These long-lasting roses are sure to perform beautifully in your garden all season long, from spring to frost. No complicated pruning or chemical applications required. Nothing bugs these roses. Not even bugs.**

# 'Calypso' EASY ELEGANCE® ROSA 'BAIYPSO'

Calypso is a compact, mounded shrub rose that is covered in repeat-blooming apricot flowers, bringing color to your landscape throughout the season. The soft color of the petals are accented beautifully by dark glossy green foliage that is highly disease-resistant. With its compact size, Calypso is an ideal accent for the garden or in a foundation planting. Good for cut flowers.

**It is part of our culture to have the newest  
and finest plants for our customers.**

# Acer platanoides 'Drummondii'

Suitable for a medium sized garden, large variegated foliage, red tinged yellow spring flowers, creamy white edged leaves turn orange in autumn. Bee friendly.

- Height: 30 – 40'
- Spread: 25'
- Shape: oval
- Flower: yellow

Number to Sell: 30  
Finish Date: 09/01/2021

# Acer rubrum 'October Glory'

Commonly called red maple, it is a medium-sized, deciduous tree that is native to Eastern North America from Quebec to Minnesota south to Florida and eastern Texas. It typically grows 40-50' tall with a rounded to oval crown. It grows faster than Norway and sugar maples, but slower than silver maple. Emerging new growth leaves, leafstalks, twigs, flowers, fruit and fall color are red or tinged with red.

- Zone: 4 to 9
- Height: 40 to 50 feet
- Spread: 30 to 40 feet
- Flower: Red
- Light: Full sun to part shade
- Water: Medium to wet
- Tolerate: Wet Soil, Air Pollution

Number to Sell: 125  
Finish Date: 09/01/2021

# Anemone 'Dainty Swan'

An addition to the 'Swan' series with semi-double white flowers on dark maroon-pink stems, with striking dark pink reverse to the petals.

- Light: Partial shade to sun
- Zone 4-10
- Height: 22"
- Resists: Deer

Number to Sell: 600

Finish Date: 10/1/2021

# Anemone Fantasy™ 'Jasmine'

A compact, upright, perennial with rounded to oval dark green leaves. Deep-pink flowers from late summer into autumn.

- Height: 15-18"
- Spread: 10-15"
- Zone: 6-9
- Soil: Average garden soil
- Water: Moist, well-drained

Number to Sell: 600

Finish Date: 10/1/2021

# Anemone Fantasy™ 'Red Riding Hood'

These compact Windflowers are covered in blooms from mid-summer through fall. A perennial with deep pink flowers and deep green leaves that gives color late into summer. Golden yellow centers convert into puffy seed heads in the fall.

- Light: Full sun to part shade
- Height: 12-18"
- Spread: 18-24"
- Zone: 5-8

Number to Sell: 600  
Finish Date: 10/1/2021

# Aquilegia caerulea 'Origami Yellow'

Uniform with great branching. Many striking yellow flowers are produced in abundance in late spring to early summer. The long-spurred flowers makes it a great addition to any mixed border. It's a compact plant, so flopping is minimal. Ideal for sunny areas with moist, well-drained soils.

- Height: 13-24"
- Spread: 12-18"
- Flower: Yellow
- Zone: 3-8
- Light: Full sun or Part Sun
- Soil: Keep evenly moist
- Features: Attracts Hummingbirds and Butterflies

Number to Sell: 250  
Finish Date: 04/15/2022

# Aquilegia Earlybird™ Purple Blue

Columbine is a favorite perennial. The Earlybird Purple Blue has splendid two-toned purple and blue blooms all spring. At its best with some afternoon shade, columbine can handle sunny or shady locations and will add wonderful color and texture. Grow in fertile, moist but well-drained soil in full sun or partial shade. These mounding plants are deciduous, and so will lose their leaves in mid-fall and form new leaves mid-late winter.

- Height: 14-20 inches
- Spread: 12-20 inches
- Zone: 3 - 9
- Light: Partial Sun, Sun
- Flower: Purple
- Attracts: Bees, Hummingbirds

Number to Sell: 417

Finish Date: 04/15/2022

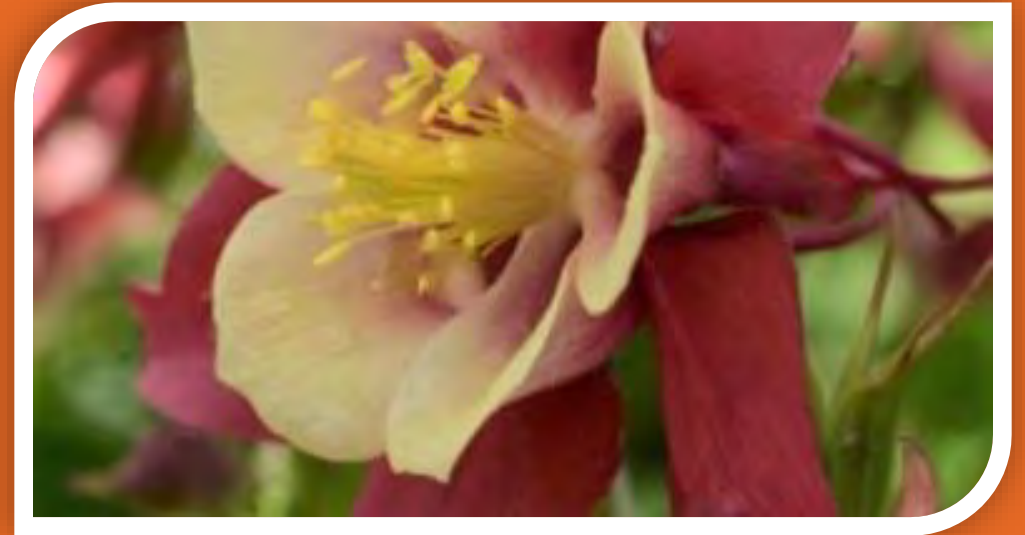

# Aquilegia Earlybird™ Red Yellow

The Earlybird Red Yellow has happy two-toned flowers - red with yellow centers. Late spring-early summer blooms occur on short stems just above the low mounding foliage. They prefer part sun with moist, well drained soil. These columbine are mounding plants and are deciduous, so will lose their leaves in mid-fall and form new leaves mid-late winter.

- Light: Sun, Part Shade
- Zone: 3
- Height: 9-11"
- Spread: 8-10"
- Foliage: Green
- Flower: Red-Yellow
- Attracts: Butterflies

Number to Sell: 500

Finish Date: 04/15/2022

# Buxus Flat-tery™

A low growing, flat boxwood. Stays in juvenile phase longer than most resulting in fewer fruit pods and a good, green winter color. Makes a great groundcover or green accent in a shade garden.

- Height: 24"
- Spread: 4'
- Zone: 4
- Light: Part shade to full shade
- Soil: Prefers moist, well-drained soil

Number to Sell: 500

Finish Date: 08/15/2021

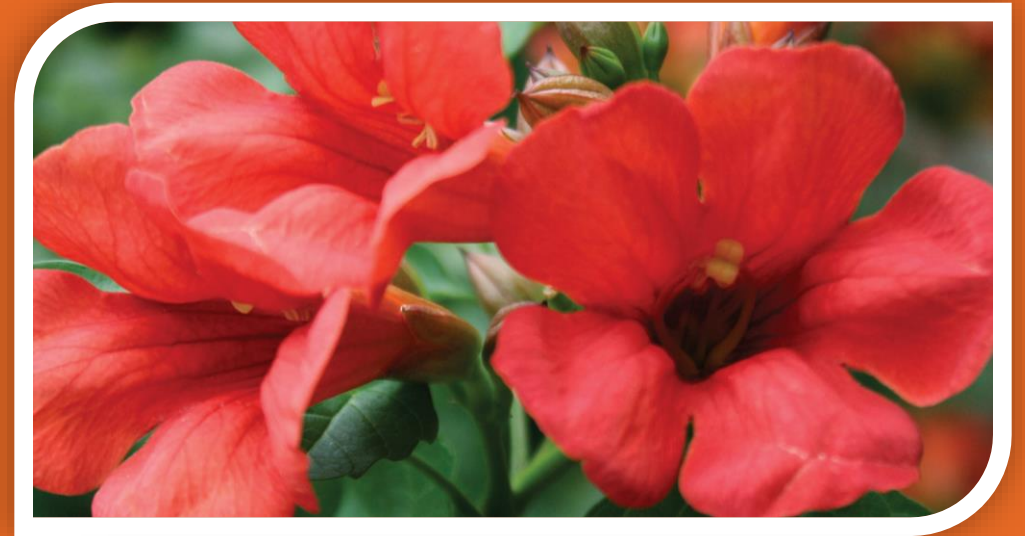

# Campsis Summer Jazz™ Fire

Blazing, trumpet-shaped orange-red blossoms on a compact Trumpet Vine ideal for climbing small trellises and container. The large leaves are compound, divided into many shiny, toothed leaflets. Vines grow very rapidly. They are easily kept in check by pruning.

- Height: 3'
- Spread: 3'
- Zone: 5–9
- Light: Full Sun
- Soil: Adaptable to most soil types if they are not overly wet. Average moisture but drought tolerant once established.
- Attracts: Hummingbirds

Number to Sell: 3030  
Finish Date: 05/01/2022

# Carex testacea 'Prairie Fire'

## Prairie Fire™ Sedge

This grass is a low-growing sedge, and changes colors with the seasons. It has grass like foliage that turns from olive green, to orange, to reddish brown. The more sun this ornamental grass receives, the more orange the foliage turns. In early summer, red-brown plumes open above the upright foliage. Prairie Fire™ Carex adds color, texture and movement to containers, landscapes and gardens. It grows best when planted in moist, well-drained soil in full sun.

- Height: 20"
- Spread: 24"
- Zone: 6-9
- Flower: Red-brown plumes
- Soil: Moist, well-drained soil
- Light: Full Sun

Number to Sell: 500  
Finish Date: 10/01/2021

# Blight Resistant Chestnuts - *Castanea mollissima*/hybrids

This tree is a scientifically modified version of one of the most beloved and fundamental trees in the history of our nation. After the blight fungus wiped out nearly the entire population of American chestnut trees, few, if any were left. This variety is resistant to the blight. The dense foliage grows into a rounded canopy providing shade and sweet tasting chestnuts for human consumption and attracts a vast array of wildlife. The dark green leaves love the fall weather, and give way to yellow, gold, and brown color.

- Zone: 5 - 9
- Height: 30' - 50'
- Wildlife Value: Excellent.
- Soil: Well drained soils are favorable but can adapt to most sites. Avoid wet areas.
- Requires Pollinator: more than one tree is required to produce mast

Number to Sell: 100

Finish Date: 08/01/2021

# Cercis canadensis 'Alley Cat'

A variegated eastern redbud, the 'Alley Cat' has heart shaped green foliage that is spotted and streaked with white. Leaves emerge a copper pink and soft green and as they mature the white variegation appears. Features pink pea-like flowers that hug close to the branches.

- Height: 20-30 feet
- Spread: 25-35 feet
- Light: Full sun
- Zone: 4-9

Number to Sell: 15  
Finish Date: 09/01/2021

# Chamaecyparis obtusa 'Torulosa'

An upright, tangled shrub form of Hinoki cypress with twisted branches and twigs. Like many contorted conifers, 'Torulosa' makes a nice feature plant with its unusual structure. After 10 years of growth, expect the plant to be about 5 feet tall and about 4 feet wide. As is true of many members of this species, it is a good plant for full sun and well-drained soil. It is also very drought tolerant. Foliage emerges light green and turns to a deeper green.

- Height: 6'-12'
- Spread: 5'-10'
- Zone: 5a-8b
- Light: Full Sun, Part Shade
- Water: Regular, Even Moisture

Number to Sell: 248  
Finish Date: 03/01/2021

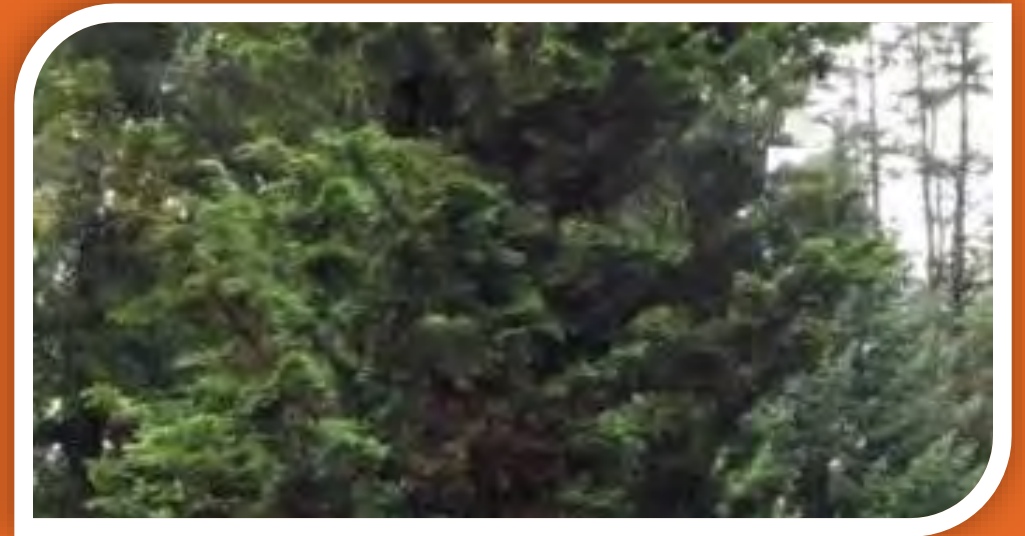

# Chamaecyparis obtusa 'Wells Special'

A narrow, upright, mid-size tree. Foliage is scale-like, flattened and dark green. The branches are slightly arching. This evergreen shrub has been described as one of the nicer, larger growing selections of the species - it is slow-growing. Great for a shrub border or foundation planting.

- Light: Full to Part sun
- Water: Well drained soil
- Zone: 5
- Height: 10-15 ft
- Spread: 4-6 ft
- Habit: Upright
- Foliage: Deep green
- Fall Foliage: Evergreen

Number to Sell: 80

Finish Date: 03/01/2021

# Cladrastis kentukea 'Perkins Pink'

A medium-sized, deciduous tree of the legume family that typically grows 30-50' tall with upright branching and a broad, rounded crown. It is noted for its pinnately compound foliage, panicles of fragrant white spring flowers, autumn seed pods and yellow fall color.

- Zone: 4 to 8
- Height: 30 to 50 feet
- Spread: 30 to 50 feet
- Flower: Pink, Showy, Fragrant, Good Cut
- Light: Full sun
- Water: Medium
- Suggested Use: Shade Tree, Street Tree, Flowering Tree

Number to Sell: 25  
Finish Date: 09/01/2021

# Cotoneaster x suesicus Emerald Beauty™

Shiny evergreen leaves give Emerald Beauty its name. Tight, mounding habit is perfect for massing or as a groundcover. Resistant to fire blight and requires minimal or no pruning. Excellent container production performance.

- Height: 18-24"
- Spread: 48-60"
- Flower: white flowers
- Zone: 5-9
- Light: Full Sun
- Soil: Prefers moist, well-drained soil
- Features: colorful orange berries in fall

Number to Sell: 250

Finish Date: 09/15/2021

# Cotoneaster x suesicus

## Emerald Sprite™

Compact, mounding shrub with glossy dark green leaves. New growth is tinged with purple. Tiny pink buds open to small white flowers. Orange berries further accent this plant. No trimming needed and evergreen to semi-evergreen. Disease resistant.

- Height: 1'
- Spread: 3'
- Flower: White
- Zone: 6–9
- Light: Full Sun
- Soil: Thrives in any type of soil but not too dry
- Features: Attracts birds

Number to Sell: 250  
Finish Date: 09/15/2021

# Dianthus plumarius Delilah™ Bicolor Purple

A series of hardy dianthus with semi-double lively flowers that bloom in spring to early fall. Silvery-green foliage. Compact and easy to grow. Good for containers. A neat and compact plant, it will re-bloom with proper deadheading.

- Height: 8-10 in
- Spread: 12-14 in
- Zone: 4-9
- Flower: Pink, Purple
- Attracts: Butterflies
- Resists: Deer, Rabbit
- Light: Full Sun
- Soil: Moist/Well-Drained

Number to Sell: 1191  
Finish Date: 05/01/2022

# EverBloom™ 'Strawberry Tart' Dianthus

Vibrant, two-toned pink flowers. Continuous flowering from spring to fall. Larger blooms for visual impact. Densely branched, short but strong stems with little to no flopping. Good disease resistance. Wide, groundcover like habit.

- Height: 6-8"
- Spread: 18-24"
- Light: Sun
- Zone: 4

Number to Sell: 60

Finish Date: 06/15/2022

# Dianthus EverBloom™ 'Watermelon Ice'

Spirited light pink and white blooms with frilly edges add texture and interest. Crisp, multi-toned, pink shades. Will flower all summer - this non-stop bloomer is vigorous and will add color to beds and would make a superb border plant. Can be added to containers.

- Light: Sun
- Height: 6 to 8 in
- Spread: 12 to 15 in
- Resists: Deer
- Zone: 4
- Soil: Tolerates Dry Soil

Number to Sell: 2000  
Finish Date: 06/15/2022

# Dicentra spectabilis 'Cupid'

A new color, soft pink in heart shaped blooms. Flowers hang on racemes on arching stems. Best in light shade. Try Cupid in a container. Blooms April - May (Mid to late spring).

- Zone: 3-9
- Height: 24 inches
- Spread: 24-26 inches
- Light: Part Shade, Full Shade
- Resists: Deer
- Attracts: Pollinators
- Soil: Regular to Moist

Number to Sell: 2000  
Finish Date: 05/01/2022

# Diospyros virginiana 'Magic Fountain'<sup>TM</sup> ' /

This Weeping Persimmon has large drooping leaves, heavily weeping branches and a columnar habit. It can produce good crops of orange fruit late in the season. Fruit is sweet when ripe.

- Zone: 5-9
- Height: 13-15'
- Spread: 5-7'
- Light: Full to Part Sun
- Foliage: Dark Green
- Fall Foliage: Yellow
- Flower: Creamy White to Light Yellow

Number to Sell: 38  
Finish Date: 09/01/2021

# Fern - Godzilla Painted *Athyrium niponicum* var. *pictum*

A beauty with 12–18" fronds that blend gray green and wine red. This most colorful of Ferns shows its markings best in partial shade and evenly moist soil.

- Hardiness Zone: 4-8S/9W
- Exposure: Part Shade
- Height: 12-18"
- Deer Resistance: Yes

Number to Sell: 1512

Finish Date: 04/15/2022

# Fern Soft-Shield *Polystichum setiferum*

FronDS of shiny leaflets unfurl from unique fiddleheads in early spring. Creates a soft, delicate look for the shade garden. The evergreen foliage is excellent for cutting. Prefers cool, moist sites.

- Height: 8 - 24 Inches
- Spread: 12 - 16 Inches
- Light: Part Shade to Shade
- Zone: 6a, 6b, 7a, 7b, 8a, 8b, 9a
- Water: Average
- Uses: Container, Landscape

Number to Sell: 300

Finish Date: 08/01/2021

# Blue Ivory Hosta hybrid

Showy, medium sized Hosta. Blue leaves have wide, creamy white margins. Margins take a greenish blush in summer. Foliage interest and attracts hummingbirds.

- Height: 16 Inches
- Spread: 30 Inches
- Flower: Purple
- Foliage: Green, Variegated
- Habit: Mounded
- Light: Part Shade to Shade
- Zone: 3a - 9b
- Water: Average
- Soil: Average - Fertile

Number to Sell: 1508

Finish Date: 03/01/2022

# Captain Kirk Hosta hybrid

Large Hosta perfect for shade gardens. Bright gold foliage with wide, dark green foliage. Broad leaves have heavy substance. Best in partial to full shade. Prefers moist, organic soils. Easy to grow and very adaptable.

- Attracts: Hummingbirds
- Height: 20 Inches
- Spread: 36 Inches
- Flower: Purple
- Foliage: Green, Variegated
- Habit: Mounded
- Light: Part Shade to Shade
- Zone: 3a - 9b
- Water: Average
- Soil: Average, Fertile, Acidic, Neutral Soil

Number to Sell: 320  
Finish Date: 03/01/2022

# Hosta 'Maui Buttercups'

One of the very best small, yellow Hosta with bright gold, 5", rounded leaves. Deeply cupped and corrugated, they are of heavy substance and demonstrate good slug resistance. Near white flowers appear on 18" scapes in midsummer.

Hosta are exceedingly popular perennials due to their versatility in the landscape. Their subtle colors, tall flower scapes, and broad, coarse leaves fill a niche in garden designs that few other plants can achieve. Their large leaves provide excellent coverage for dying bulb foliage. They grow well in city environments. Attract hummingbirds.

- Height: 10 Inches
- Spread: 14 Inches
- Zone: 3-9
- Flower: Purple shades
- Foliage: Yellow shades
- Light: Part - Full Shade
- Water: Average, Consistent

Number to Sell: 791  
Finish Date: 03/01/2022

# Hosta 'Minuteman'

Stunning, very dark green leaves are surrounded by a wide, pure white margin. Leaves have good substance and are sometimes cupped and slightly wavy. Pale lavender striped flowers appear on 24" scapes in early to midsummer. One of the most popular white-margined Hosta.

- Height: 18 Inches
- Spread: 30 Inches
- Zones: 3 - 9
- Flower: Purple shades
- Foliage: Variegated
- Light: Part - Full Shade
- Water: Average, Consistent Water Needs

Number to Sell: 285

Finish Date: 10/01/2021

# Hosta 'Rainbow's End'

This unique Hosta exhibits incredibly variegated, shiny foliage. The bright yellow leaves of good substance have dark green margins that jet into the center, and the center brightens to creamy white in summer. It forms a medium sized mound of attractive foliage in the landscape. In late summer, showy red scapes (16-19 inches in height) carry the dark lavender, tubular flowers.

- Height: 11 Inches
- Spread: 21 Inches
- Zone: 3,4,5,6,7,8,9
- Flower: Purple shades
- Foliage: Variegated
- Light: Part - Full Shade
- Water: Average, Consistent Water Needs

Number to Sell: 792

Finish Date: 03/01/2022

# Juniperus squamata 'Blue Carpet'

It is noted for its attractive silver-blue foliage (blue green in winter), carpet-like habit and scaly brown bark. Ground hugging shrub that forms an excellent ground cover. Compact, rounded.

- Height: 1'
- Spread: 4-5'
- Flower: Non-Flowering
- Zone: 4 - 7
- Light: Full Sun
- Soil: Grow in average, medium moisture, well-drained soils.
- Features: Effective in foundations, borders, banks and slopes.

Number to Sell: 300

Finish Date: 09/15/2021

# Kniphofia 'First Sunrise'

These color earlier in the season than other hybrids. Loads of bright orange, torch-shaped flower spikes stand atop a somewhat compact clump of green, foliage beginning in early summer. Kniphofia is a sun lover that likes it hot and dry, though a good supply of water is appreciated when blooming. It can be grown in any well-drained soil. Kniphofia is evergreen in mild regions and herbaceous in cooler zones. In both areas, it will benefit by having its leaf tips trimmed in the spring to stimulate healthy, new growth. In zones 4-6, the foliage can be tied up over the crown of the plant in the fall to eliminate water from settling there and freezing, which would be deadly.

- Height: 30-36 Inches
- Spread: 16-20 Inches
- Zone: 5,6,7,8,9
- Flower: Gold/Orange Shades
- Foliage: Green shades
- Light: Full Sun
- Water: Low, Average

Number to Sell: 184

Finish Date: 10/01/2021

# Laburnum × watereri 'Vossii'

Commonly called golden chain tree, it is noted for its yellow, wisteria-like flowers that bloom in spring. This hybrid typically grows 25-30' tall as a tree, and 15-20' tall as a shrub. Medium green leaves have little fall color. The pea-like yellow flowers in racemes appear in an abundance, spectacular as a late spring bloom. Flowers give way to seedpods that ripen in the fall. All parts of this tree are poisonous.

- Zone: 5 to 7
- Height: 15 to 30 feet
- Spread: 15 to 30 feet
- Flower: Yellow, Pea-like
- Sun: Full sun to part shade
- Water: Medium

Number to Sell: 43  
Finish Date: 09/15/2021

# Lavandula angustifolia

## Avignon Early Blue

Large flower spikes on well-branched, bushy plants have a feel-good fragrance. Long-flowering plants work well in planters and garden beds.

- Light: Full Sun
- Zone: 6 - 8
- Height: 10 - 12 inches
- Spread: 9 - 11 inches
- Flowers: Showy Fragrant Blue Purple
- Uses: Culinary Herb, Cut Flower, Dried Flower
- Attracts: Bees and Butterflies

Number to Sell: 1500

Finish Date: 11/01/2021

# Lavandula angustifolia 'Imperial Gem'

Richly colored blooms topping grayish green, somewhat relaxed stems, vibrant violet petals and fuzzy dark purple calyxes form a broadly cylindrical head distinguished by a separate whorl of flowers at its base. A well-formed, midsized gray-green bush, 'Imperial Gem' delivers a dazzling effect, especially when planted en masse.

- Soil: Moderate
- Plant Shape: Mounded
- Light: Full Sun
- Flower: Purple
- Attracts: Butterflies
- Zone: 4 - 9

Number to Sell: 375

Finish Date: 06/01/2022

# Liriodendron tulipifera

## 'Arnold'

This tree is cultivated for its stately growth habit, unusual foliage and tulip-like, late spring flowers. Leaves are bright green, squarish and lobed at the tips, hollowed at the bases, with pointed lobes on each side. Flowers are pale yellow-green and cup-shaped, to 2 1/2 inches long. Great for creating shade where there is none, this fast-growing tree does not get that wide considering its height. Not suggested for small properties. May be brittle during ice or windstorms.

- Height: 50 ft. to 70 ft.
- Spread: 20 ft. to 30 ft.
- Foliage: medium leaves, deciduous,
- Flower: greens, yellows,
- Tolerances: deer, drought, heat & humidity, pollution, rabbits, slope,
- Zone: 5 to 9
- Light: Sun to Full Sun
- Soil: Mostly Sand to Some Clay
- Water: Dry to Moist

Number to Sell: 30  
Finish Date: 09/15/2021

# Staircase Blue Lupine

## Lupinus Staircase™ Blue

This series has long lasting, showy flowers. Tall spires of lavender-blue flowers appear in late spring. Encourage new buds by removing spent flowers. These are short-lived perennials, so you may want to allow some plants to set seed for future, or trim back after flowering is over. Makes a nice cut flower. Because these are day-length neutral – you will see blooms all summer long.

- Zone: 4-8
- Light: Full Sun
- Height: 16-20"
- Spread: 12-18"
- Attracts: Hummingbirds, Butterflies

Number to Sell: 499  
Finish Date: 05/01/2022

# Lupinus Staircase™ Rose White

This plant has long lasting, showy pea shaped flowers. Tall spires of pink and white flowers appear in late spring. Encourage new buds by removing faded flowers. Makes a nice cut flower too. Because these are day-length neutral – it will bloom all summer. Let some plants set seed for future, or trim back after flowering is over as these plants are short-lived - consider digging out in the spring every 3-5 years, woody parts removed, and new plants put back to encourage new growth.

- Zone: 4-8
- Light: Full Sun
- Height: 16-20"
- Spread: 12-18"
- Attracts: Hummingbirds, Butterflies

Number to Sell: 358

Finish Date: 05/01/2022

# Westcountry™ Tequila Flame Lupine

Westcountry Lupine Series grows larger than other varieties of its genus. Extra strong, tall spikes produce a terrific display of bright, unique colors. Tequila Flame features bright, fiery colors of alternating red and yellow. Creates an exciting show, complimenting its darker red-tinged foliage.

- Height: 30-36"
- Spread: 21-25"
- Flower: Red and Yellow
- Zone: 4-8
- Light: Full Sun
- Soil: Sandy or clay; Average or moist
- Features: Attracts pollinators, deer resistant

Number to Sell: 360

Finish Date: 05/01/2022

# Westcountry™ Terracotta Lupine

These sunrise colors rise on thick, cut-worthy stems of this tall summer stunner. These delightful blooms are a must have for the cutting garden. The statuesque flowers add nice vertical interest to the landscape and are a hit with gardeners across the nation. The handsome medium to dark green foliage heightens the colorful display of blooms. These plants are easy to care for and do best in full sun to partly shaded areas of the garden. Light pruning is recommended to rejuvenate its foliage after blooming.

- Height: 3'
- Spread: 12-15"
- Flower: Coral
- Zone: 3-9
- Light: Full Sun to Part Shade
- Features: Fragrant spears attract butterflies; bloom early spring through early summer

Number to Sell: 360  
Finish Date: 05/01/2022

# Arkansas Black Apple Tree

## Malus 'Arkansas Black'

Arkansas Black is a late season apple variety with very dark red fruit that looks almost black. The fruit is harvested in September and October and is an excellent keeper and will store for months. Great for eating and cooking as well as preserves. Requires Pollinator. Plant at least two trees for pollination; however, each additional tree will increase pollination for better mast production.

- Height: 15' - 20'
- Spread: 5' - 10'
- Zone: 5 - 8
- Soil: Well-drained
- Light: Full Sun
- Suggested Pollinators: Plant two apple varieties for cross pollination

Number to Sell: 50

Finish Date: 08/01/2021

# Malus 'Braeburn'

Firm, crisp, sweet and very juicy fruit has excellent quality and is beautiful with crimson blush and striking red stripes. Ripens late, making it an excellent keeping apple. Moderately vigorous tree is highly advanced, fruiting at a young age. Also, a consistent heavy producer.

- Light: Full Sun
- Zone: 5a
- Height: 12 to 16 feet
- Spread: 10 to 15 feet
- Leaves: Good fall color
- Flowers: White, Showy, Fragrant
- Uses: Shade Tree, Flowering Tree
- Attracts: Bees, Birds, Butterflies

Number to Sell: 100

Finish Date: 08/01/2021

# Malus 'Centennial'

A low-spreading tree. One of the sweeter more delicious ornamental apples for eating out-of-hand. Very hardy. Pretty early bloom and tree shape. Apples have a hint of crab apple flavor. Be prepared for heavy crops of small, sweet, oval-shaped fruit. Use these crispy, juicy, white-fleshed apples for canning, making jelly, or just popping in your mouth! Centennial is a bright orange-red apple that ripens early in the season, is very resistant to apple scab, and its mid-season bloom time makes it a fantastic pollinator for your home orchard.

Centennial is also a great ornamental tree, producing an abundance of striking red buds that open into a showy display of snow-white flowers. Naturally dwarfing, Centennial tops out at 8' making it an easy fit for most locations.

- Zone: 3-9
- Height: 8' (Semi Dwarf)
- Light: Full Sun
- Pollination: Needs a Pollinizer

Number to Sell: 50

Finish Date: 08/01/2021

# Malus 'Donald Wyman'

A large, spreading crabapple that matures to 15-20' tall and slightly wider. Fragrant, white, single flowers (to 1 3/4" diameter) bloom in abundance in spring. Flowers are followed by bright red crabapples (to 3/8" diameter) that mature in fall. Crabapples persist on the tree well into winter, providing additional interest. Birds are attracted to the fruit. Leaves are dark green and toothed. Leaves turn amber-gold in fall.

- Zone: 4 to 8
- Height: 15 to 20 feet
- Spread: 17 to 22 feet
- Flower: White
- Light: Full sun
- Water: Medium
- Attracts: Birds, Butterflies
- Fruit: Showy, Edible

Number to Sell: 100

Finish Date: 09/01/2021

# Malus 'Empire'

'Empire' is a semi-dwarf, McIntosh-type apple tree. Pinkish white flowers appear in April and medium sized, red apples mature in mid-September. Need another variety of apple tree to help with pollination. Fruit is good for fresh eating and cooking.

- Zone: 4 to 7
- Height: 12 to 15 feet
- Spread: 12 to 15 feet
- Flower: Pinkish white, Showy, Fragrant, Good Cut
- Light: Full sun
- Water: Medium
- Suggested Use: Flowering Tree
- Attracts: Birds, Hummingbirds, Butterflies
- Fruit: Edible

Number to Sell: 100  
Finish Date: 08/01/2021

# Malus domestica 'Fuji'

Pollinators are needed for this species; potential pollinizers could be Rome or Braeburn. Almost any apple tree would work if the bloom periods overlap so that male and female flowers are blooming at the same time, usually on separate trees. Check the bloom time for your area for both the Fuji and other nearby pollinating apple trees. The Fuji tree will produce apples in 3 to 5 years. Soil type needed is average to loamy but responds to enriched soil with better production. Most apple trees do best with a slightly acidic soil pH. Pink backside and white frontside flowers appear in April. Fruit usually ripens about mid October.

- Height: 8-15'
- Fall Foliage: yellow
- Spread: 8-15'
- Habit: upright-spreading
- Flower: white, pink
- Fruit: red apple
- Light: Full Sun
- Zone: 6-8

Number to Sell: 50  
Finish Date: 08/01/2021

# Malus 'Golden Sentinel'

A columnar apple tree it is a neat little cultivar that has a vertical growth habit and stays narrow and tidy. Naturally dwarf, columnar trees easily fit into any sized garden space, including large containers. It produces sweet, firm and delicious, golden-yellow fruit. In spring it is covered in beautiful blossoms that are fragrant and turn the whole tree into a column of snow-white flowers. Full-sized apples grow in clusters all along the tree trunk. They are similar in flavor to Golden Delicious, with crisp white flesh that's sweet and flavorful.

- Height: 10-12 feet
- Spread: 2-3 feet
- Light: Full Sun
- Flower: White
- Foliage: Green
- Attracts: Pollinators
- Zone: 4-8

Number to Sell: 26

Finish Date: 08/01/2021

# Malus domestica 'Granny Smith'

Sometimes called the best apple to cook and bake with, granny smith apples are tart to sweet fruit with a firm, crisp bite. They keep well, freeze well, and are great for fresh eating, baking, and cooking. They are also one of the few apples that don't brown quickly once cut. Can be pollinated with red delicious, fuji, red Jonathan, gala, and suncrisp.

- Zone: 5–9
- Light: Full sun
- Fruit: Produces a medium to large green apple with white specks and firm, creamy white flesh
- Yield: ripe fruit typically between August and September. Bears fruit in 3–5 years.

Number to Sell: 150  
Finish Date: 08/01/2021

# Malus 'Gravenstein'

Gravenstein apples are prized for their juicy, fine-grained flesh and mildly tart flavor. An excellent apple for making sauce, cider and for baking. Harvest in mid to late summer. This cultivar produces very little pollen. In order to get fruit, a second apple variety must be planted nearby to provide pollen.

- Height: 12-15'
- Spread: 12-15'
- Light: Full Sun
- Companion Plants: Pear, Plum, Cherry
- Zone: 3-9

Number to Sell: 50

Finish Date: 08/01/2021

# Malus domestica 'Jonagold'

The Jonagold apple requires preferably two other apple cultivars for pollination. Example pollinators include Gala, Empire, Fuji, and Honeycrisp. The fruit is crimson red flecked with yellow-gold showing through and has a bit of green-yellow color. It usually ripens in mid-September into October and holds well in the refrigerator for a few months. Its growth rate is moderate and produces fruit in about 3 to 6 years, depending on soil and environment. Note that all apple tree fruit production will respond best to full sun and air movement around the tree and through its branches.

- Zone: 5 to 8
- Height: 12 to 15 feet
- Spread: 12 to 15 feet
- Flower: White, Showy, Fragrant
- Light: Full sun
- Water: Medium
- Attracts: Birds, Hummingbirds, Butterflies

Number to Sell: 50

Finish Date: 08/01/2021

# Malus domestica 'Jonathan'

Jonathan Apples are usually small to medium in size and can be slightly striped in skin color or have a red color with yellow background. The flesh is slightly tart and great to eat fresh or use for cooking. Exceptional pie apple. Annual pruning during the dormant season (late winter/early spring) is suggested in order to obtain a more open tree canopy that allows for increased light penetration and better air flow. Jonathan Apple must be cross-pollinated with a crabapple or different apple variety to produce fruit.

- Height: 10'-12'
- Spread: 10'
- Zone: 4-8
- Light: Full Sun
- Soil: Well-drained
- Flower: White
- Fruit: Small/medium fruit; red with yellow background; slightly striped

Number to Sell: 50  
Finish Date: 08/01/2021

# Malus 'KinderKrisp'

This smaller apple is early ripening, and great for home landscapes. Needs well-drained soil and full sun. KinderKrisp Apple is a small tree that is commonly grown for its edible qualities. It produces small light green round apples with a red blush and yellow flesh which are usually ready for picking in late summer. The apples have a pleasant taste and a crisp texture. The apples are most often used for: Fresh Eating, Cooking, Baking, Juice-Making, Sauces. The tree features showy clusters of lightly-scented white flowers with shell pink overtones along the branches in mid spring, which emerge from distinctive pink flower buds. It has forest green foliage throughout the season. The pointy leaves turn yellow in fall. The fruits are carried in abundance from mid to late summer.

- Height: 12-15 feet
- Spread: 12-15 feet
- Light: full sun
- Zone: 3-7

Number to Sell: 50  
Finish Date: 08/01/2021

# Malus 'Liberty'

Best grown in deep, loamy, moderately fertile, slightly acidic, medium moisture, well-drained soils in full sun. Features white blossoms which appear in spring and are followed by small to medium-sized, red-over-green, McIntosh-type apples which ripen in early September (USDA Zone 5). Liberty is pruned and grown primarily with a view toward producing quality fruit, and its ornamental features are usually considered secondary. It should be grouped in a sunny location with other apple varieties.

- Zone: 5 to 8
- Height: 8 to 10 feet
- Spread: 8 to 10 feet
- Flower: White, Showy, Fragrant
- Light: Full sun
- Water: Medium
- Attracts: Birds, Hummingbirds, Butterflies

Number to Sell: 100

Finish Date: 08/01/2021

# Malus domestica 'Macoun'

A perfectly ripe Macoun is deep purple-red with a crisp, juicy, bright white flesh that delivers the perfect blend of sweet and tart flavors. True apple lovers may also pick up subtle notes of berry, grape, and spice. This apple is not a good keeper, so you really must eat it fresh. Needs another apple variety for pollination.

- Zone 4 - 8
- Light: Full Sun
- Height: 12-15'
- Spread: 12-15'
- Flower: White
- Fruit Time: Fall - Early Season

Number to Sell: 150

Finish Date: 08/01/2021

# Malus 'Pink Lady'

Named for the pretty pink blush covering its yellow skin, this delicious Australian apple tree is wonderfully crisp and crunchy, the first bite is tart, then followed by the perfect amount of sweetness; a late season apple usually ripening in October (200 days to ripen), best pollinators are Granny Smith, Fuji or Gala. Fruit is good for fresh eating and cooking. Fragrant white pink flowers in spring. Prefers well drained soil.

- Bloom Time: Spring
- Zone: 6-9
- Height: 12-20 feet
- Spread: 12-20 feet
- Light: Full Sun
- Attracts: Bees, Butterflies, Hummingbirds

Number to Sell: 150

Finish Date: 08/01/2021

# Malus domestica 'Red Delicious'

The Red Delicious bloom starts, on average, late April to early May and is called a mid-season bloomer. Pollinators would include other mid-season blooming apple trees. This tree grows well in slightly acidic, moist, and well-drained soil. This apple tree does not tolerate a long drought period. Fruit production will respond best to full sun and air movement around the tree and through its branches. The apples have a sweet taste and a crisp texture. The apples are most often used in the following ways: Fresh Eating, Cooking, Baking.

- Height: 20 feet
- Spread: 20 feet
- Light: full sun
- Zone: 5a

Number to Sell: 100  
Finish Date: 08/01/2021

# Malus 'Scarlet Sentinel'

This tree grows narrow and straight and has nearly no branches. It's a good choice for restricted areas - its dwarf size means it fits in anywhere. The Scarlet Sentinel Columnar provides sweet, crisp fruit for baking, snacking and more. The apples grow in clusters on short spurs along the trunk and are large greenish-yellow fruit heavily blushed with red. The flesh is white. Like other apples, you will need two different cultivars for pollination. Columnar apple varieties are good pollinizers for any other apple variety.

- Height: 8-12 feet
- Spread: 2-3 feet
- Light: Full Sun
- Flower: White
- Foliage: Green
- Attracts: Pollinators
- Zone: 4-8

Number to Sell: 18

Finish Date: 08/01/2021

# SnowSweet® Apple

## Malus 'Wildung'

This tree is becoming increasingly popular because of its delightful sweet tasting fruit, with a slight tart balance and rich overtones. It has a unique characteristic - the fruit's snowy white flesh is very slow to oxidize and turn brown after cutting. Fruit can be sliced for snacking or cut for salads well in advance and dishes maintain an appetizing appearance. Excellent for fresh eating, snack trays, salads, sauces. This variety requires a different selection of the same species growing nearby in order to set fruit.

- Height: 15 Feet
- Spread: 15 Feet
- Pollination: Requires Pollinator
- Light: Full Sun
- Zone: 4-7
- Fruit: 2.8 to 3.1 inches; bronze-red blush

Number to Sell: 50  
Finish Date: 08/01/2021

# Malus Winecrisp™

This beautiful, deep red patented variety is receiving rave reviews from all who try it. Fruit is large, sweet, firm, juicy and full of flavor. The tree is totally free of Apple Scab and resistant to most other Apple diseases. Recently introduced from a long-term university breeding program, this very productive variety ripens in late September and can be stored for several months.

- Zone: 4-8
- Height: 15 feet
- Spread: 15 feet
- Light: Full Sun
- Soil: Well-drained site
- Flower: White
- Foliage: Green

Number to Sell: 50

Finish Date: 08/01/2021

# Malus domestica 'Yellow Delicious'

The large, golden fruit of the yellow delicious apple tree ripens late, developing a fine, sweet flavor. While they are best known as fresh-eating apples, yellow delicious also work well for pies, applesauce, and preserves. They also store well, keeping 3–6 months if refrigerated. When planting these trees, be sure to include other apple varieties such as red delicious, red Jonathan, or early harvest to ensure pollination.

- Height: 12-15 Feet
- Spread: 12-15 Feet
- Zone: 5-8
- Light: Full Sun
- Soil: Moisture Average Water

Number to Sell: 125

Finish Date: 08/01/2021

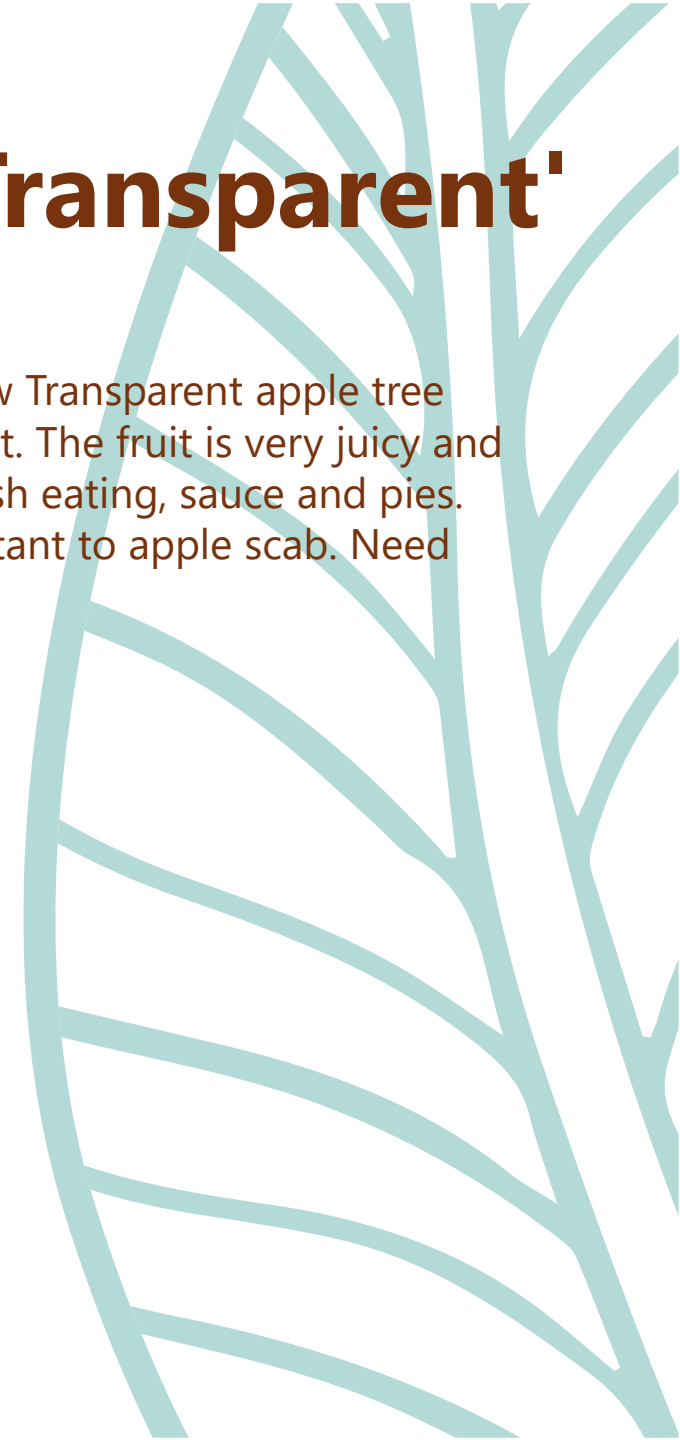

# Malus 'Yellow Transparent'

This delicious and disease resistant Yellow Transparent apple tree greets us with early summer ripening fruit. The fruit is very juicy and sweet. This trees' apples are great for fresh eating, sauce and pies. Vigorous and easy to grow it is also resistant to apple scab. Need another variety nearby for pollination.

- Height: 16 feet
- Spread: 15 feet
- Ripening Time: Early August
- Zone: 4-8
- Light: Full sun
- Soil: Well-drained

Number to Sell: 100  
Finish Date: 08/01/2021

# Malus Zestar!®

Sweet red and yellow fruit that ripen in late August. Crisp, juicy, zesty fruit. This relatively new introduction, from the same folks who brought us the wildly popular Honeycrisp, delivers the perfect balance of sweetness and acidity and adds a unique twist of its own—just a hint of brown sugar flavor. You'll love these apples fresh, but they are also good for apple pie, sauce, or cider. A smart choice for homeowners in cold climates. It sails through harsh winters, and with proper care it will set moderately heavy crops of fruit year after year. Site your tree in a sunny location where air flows freely all around (to discourage the diseases that can afflict Apples). Regular water and fertilizer will help your tree grow strong and sturdy.

- Zone: 4 - 8
- Light: Full Sun
- Height: 12-15'
- Spread: 12-15'
- Fall Leaf : Yellow/Brown
- Flower: White
- Fruit: Bi-Color - Red and Green
- Attracts: Pollinators

Number to Sell: 100  
Finish Date: 08/01/2021

# Malus Ivory Spear® Crabapple

This crabapple tree is pollinator-friendly and remarkably narrow. Offers excellent disease resistance, a brilliant flower display and generous crops of persistent (meaning they don't drop and make a mess), brightly colored fruit. Features deep pink buds that open to white flowers on this densely upright tree. The bright cherry red fruits contrast well with the leaves and persist into late autumn, when a touch of yellow fall color adds seasonal interest.

- Zone: 4
- Habit: Narrow, Upright
- Fall Color: Yellow
- Flower Color: White
- Foliage: dark green
- Height: 18-20'
- Spread: 6-8'
- Light: Full Sun

Number to Sell: 250  
Finish Date: 09/01/2021

# Malus 'Parrisi'

The leaves of this crabapple emerge purple and becomes bronze-green as the season progresses. Pink blossoms are followed by red fruit in the fall. This cultivar has a dwarf, spreading habit. Crabapples are small flowering trees that provide a showy display in the spring landscape for 1 to 2 weeks. In addition to the eye-catching buds and flowers, their foliage, habit, and fruit make them attractive plants almost year-round. Crabapple fruits are usually not eaten by humans but are beloved by birds. Most crabapples benefit from modest amounts of pruning to eliminate water sprouts and improve airflow.

- Zone: 4
- Height: 8 ft
- Width: 12 ft
- Light: Full Sun
- Water: Moist, acidic, well-drained soil
- Foliage: Purple to bronze-green
- Fall Foliage: Yellow
- Flower Color: Rose pink
- Fruit: Deep red
- Attracts: Birds, Butterflies

Number to Sell: 50

Finish Date: 09/01/2021

# Phlox 'Bedazzled Lavender'

The Bedazzled series members produce star-shaped, notched flowers that cover a rounded, spreading habit. These will be moderate growers the first year in the garden but will become a groundcover with age. 'Bedazzled Lavender' has lavender flowers with lighter halo centers and a dark purple, star-shaped eye.

- Height: 6-8 Inches
- Spread: 32-38 Inches
- Zone: 4,5,6,7,8
- Flower: Purple shades
- Foliage: Green shades
- Light: Full Sun
- Water: Low – Average

Number to Sell: 514

Finish Date: 09/01/2021

# Phlox 'Bedazzled Pink'

The Bedazzled series members produce star-shaped, notched flowers that cover a rounded, spreading habit. These will be moderate growers the first year in the garden but will become a groundcover with age. 'Bedazzled Pink' has bright, medium pink flowers with a small, dark purple star-shaped eye.

- Height: 6-8 Inches
- Spread: 32-38 Inches
- Zone: 4,5,6,7,8
- Flower: Pink shades
- Foliage: Green shades
- Light: Full Sun
- Water: Low – Average

Number to Sell: 68

Finish Date: 06/01/2022

# Phlox paniculata 'Flame'™ Pro Purple'

Suited for containers or garden, the Phlox FLAME™ Pro Series is a group of naturally dwarf, compact cultivars. Offers good disease resistance, a bushy habit, and large, fragrant magenta and white flowers. Plant in moist, well-drained soil in full sun.

- Height: 14-16 Inches
- Spread: 12-24 Inches
- Zone: 4-10
- Light: Full Sun

Number to Sell: 2033

Finish Date: 05/15/2022

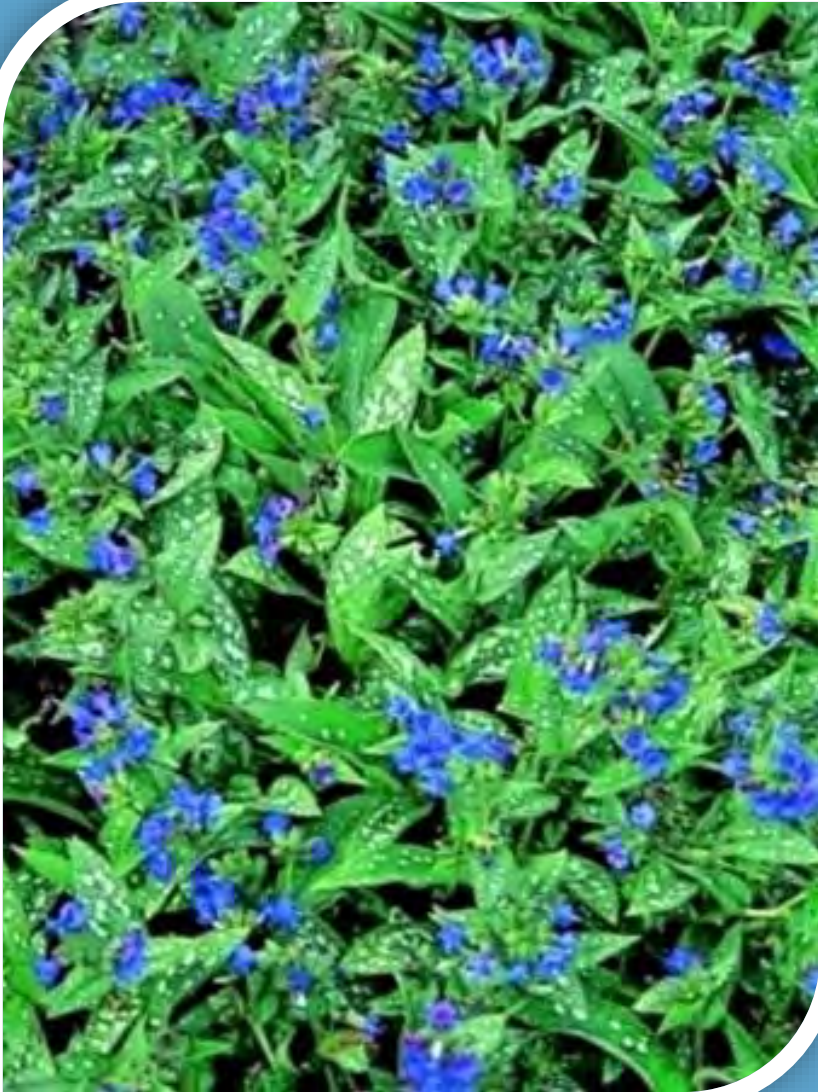

# Pulmonaria 'Little Star' Lungwort

'Little Star' has silver spotted, lance-shaped leaves with cobalt-blue flowers that start in early spring as pink buds and continue for months.

- Height: 6-12"
- Spread: 12-18"
- Light: Part Shade
- Zone: 3-9

Number to Sell: 250

Finish Date: 10/01/2021

## Early Golden Apricot *Prunus armeniaca*

The early golden apricot grows large, flavorful, golden fruit. Harvest time varies from early July to early August, depending on location. The fruit is great for fresh eating, baking, canning, or drying. This fast-growing fruit tree is self-fertile but planting two varieties is recommended for a better crop. Beyond bearing fruit, the tree is also considered an attractive landscape specimen, given its attractive leaves and spring bloom of pink or white flowers. Grows well in acidic, loamy, moist, rich, sandy, silty loam and well-drained soil. It is not drought-tolerant.

- Zone: 5–8
- Height: 15–20'
- Spread: 15–20'
- Light: Full sun

Number to Sell: 50

Finish Date: 08/01/2021

# Prunus armeniaca 'Moongold'

Moongold Apricot is a medium-sized tree that is commonly grown for its edible qualities. It produces gold round fruit (drupes) with a red blush and orange flesh which are usually ready for picking in late summer. The fruits have a sweet taste and a juicy texture. Moongold Apricot is smothered in stunning clusters of fragrant white flowers along the branches in early spring, which emerge from distinctive shell pink flower buds before the leaves. It has green foliage throughout the season. The pointy leaves turn yellow in fall.

- Height: 30 feet
- Spread: 25 feet
- Light: Full Sun
- Zone: 4-8

Number to Sell: 50  
Finish Date: 08/01/2021

# Prunus Armeniaca 'Moorpark'

This fruit tree is known for its juicy, sweet-tasting apricots that are good for fresh eating, canning or drying. Harvest time spans from early July to early August, but the fruit does not ripen all at once. The fast-growing Moorpark apricot tree is self-fertile but planting two varieties is recommended for a better crop. It is not drought-tolerant.

- Height: 15-20'
- Spread: 15-20'
- Flower: whitish-pink flowers in spring
- Zone: 4-8
- Light: Full Sun
- Soil: acidic, loamy, moist, rich, sandy, silty loam, well-drained
- Features: considered an attractive landscape tree

Number to Sell: 50

Finish Date: 08/01/2021

# Prunus avium 'Black Tartarian'

A very popular species of sweet cherry, the Black Tartarian makes a great choice for home orchards. It produces large, purplish-black fruit with a sweet, rich, full-bodied flavor that is great for fresh eating and preserves. Heavy fruit production. This cultivar is also the best pollinator for other dark sweet cherries.

- Zone: 5-8
- Height: 15-30 ft.
- Spread: 10-30 ft.
- Light: Full Sun

Number to Sell: 50

Finish Date: 08/01/2021

# Prunus avium 'Lapins'

## Sweet Cherry

Grow in average, medium moisture, well drained soil in full sun. Prefers moisture-retentive soils with good drainage. No tolerance for wet soils. Self-pollinating. A semi-dwarf sweet cherry cultivar. It typically grows 12-18' tall and produces a crop of red-fruited, sweet cherries in early summer. A good pollinator for other cherry varieties which are not self-fertile. White blossoms in spring.

- Zone: 5 to 8
- Height: 12 to 18 feet
- Spread: 12 to 15 feet
- Light: Full sun
- Water: Average
- Flower: Showy
- Attracts: Birds
- Fruit: Showy, Edible

Number to Sell: 50  
Finish Date: 08/01/2021

# Prunus cerasifera 'Krauter Vesuvius'

Commonly called cherry plum or Myrobalan plum. This is a small, sometimes spiny, deciduous tree has a shrubby, spreading, rounded habit. Very fragrant, mostly solitary, 5-petaled, white flowers bloom in early spring. Flowers are followed by small edible fruit (to 1" diameter) that are sweet but somewhat tasteless. No fall color. It is a very popular ornamental landscape tree.

- Zone: 5 to 8
- Height: 15 to 20 feet
- Spread: 15 to 20 feet
- Light: Full sun to part shade
- Water: Medium
- Attracts: Birds

Number to Sell: 200  
Finish Date: 09/01/2021

# Prunus cerasus 'North Star'

North Star is a dwarf cherry cultivar which typically grows only 7-9' tall and produces one crop per year of large, bright red, sour cherries with red flesh. Cherries ripen in June (USDA Zone 5). Cherries are recommended for pies. White blossoms in spring. Grow in average, medium moisture, well drained soil in full sun. Prefers moisture-retentive soils with good drainage. No tolerance for wet soils.

- Zone: 4 to 8
- Height: 7 to 9 feet
- Spread: 8 to 10 feet
- Flower: White, Showy, Fragrant
- Light: Full sun
- Attracts: Birds, Butterflies
- Fruit: Edible

Number to Sell: 150

Finish Date: 08/01/2021

# Italian Plum Tree

## *Prunus domestica* 'Italian'

Italian prune plum trees are an excellent choice of plum varietal to grow. They can be kept as dwarf trees around 10-12 feet through careful pruning. They are self-fertile, winter hardy, and the delicious fruit can be eaten fresh, dried, or canned. Prune trees produce five years after planting just as plum trees. However, their fruit has a much higher sugar content, making it preferable for drying with the pit inside without the risk of fermenting. Italian prune tree plantings are ready for harvest in early September.

- Water: Moderate
- Foliage: Green
- Light: Full Sun
- Height: 10-20'
- Spread: 5-10'
- Flower: White, Showy
- Zone: 5-9

Number to Sell: 50  
Finish Date: 08/01/2021

# Prunus persica 'Belle of Georgia'

The Belle of Georgia peach is an old-time favorite that produces brilliant red flowers each spring and large fruit in late August. The peaches are very firm and highly flavored, with creamy white freestone flesh tinged with red. While excellent for fresh eating, the fruit is widely used for desserts and canning. While it is self-fertile, planting more than one tree is recommended to ensure a good crop.

- Height: 18-25'
- Spread: 18-25'
- Flower: Bright pink to brilliant red
- Zone: 5-8
- Light: Full Sun
- Soil: Sandy, well-drained soils. It is not drought-tolerant.
- Features: The fruit is sugary and juicy

Number to Sell: 100

Finish Date: 08/01/2021

# Prunus persica 'Bonanza'

Bonanza is a dwarf, self-fertile peach that will reach 5-6' tall with an equal spread (smaller if grown in a container). The bright pink, fragrant, semi-double blooms cover the branches in early spring and are followed by full-sized peaches. The edible fruits have orange to red skin and sweet, flavorful, yellow flesh.

- Zone: 6 to 9
- Height: 5 to 6 feet
- Spread: 5 to 6 feet
- Light: Full sun
- Water: Medium
- Flower: Showy, Fragrant
- Attracts: Birds

Number to Sell: 50

Finish Date: 08/01/2021

# Hardired Nectarine

## *Prunus persica* 'Hardired'

Large spring pink blossoms. Fruit ripens in August – bears large quantities, and has smooth skin that is nearly all red. A semi-freestone, it has tasty yellow flesh that has good texture too. Good for eating fresh or cooking. This is an extra-hardy variety. Self-pollinating.

- Height: 10-15
- Spread: 10-12
- Zone: 5-9
- Light: Full sun

Number to Sell: 45  
Finish Date: 08/01/2021

# Prunus persica 'Red Skin'

With the Redskin Peach Tree, you get juicy texture and a sweet, tangy punch of flavor in every bite. Trees are **self-fertile**. You will get fruit with only one plant. However, adding an additional pollinator will drastically increase the size of your crop. And you can use these peaches for canning, baking or eating freshly-picked – no matter what, they retain their flavor.

- Height: 10-15'
- Spread: 10-15'
- Flower: Pink
- Zone: 5–8
- Light: Full Sun
- Soil: Well drained soil
- Features: Delicious fruit

Number to Sell: 83  
Finish Date: 08/01/2021

# Prunus persica 'Rose Princess'

This nectarine features white flesh and a sweet, peach-like flavor. This is a very productive tree that will keep you in nectarines for most of the summer. Produces large, freestone fruit, ripens in late July, resists bacteria, winter-hardy.

- Spread: 15-20'
- Height: 15-25'
- Light: Full Sun
- Soil: Moist, Loamy, Well Drained
- Zone: 5 – 8
- Attracts: Bees

Number to Sell: 80  
Finish Date: 08/01/2021

# Prunus persica 'Rubyprince'

The Rubyprince Peach is an early-ripening variety of clingstone peach, with yellow flesh and skin that is almost completely scarlet red. It is self-fertile, carrying a full crop when grown alone, and the attractive pink blooms, make it beautiful enough to grow right in your flower garden. Grow it as an espalier in colder zones to harvest a big crop of ripe fruit. Very early variety, ripening in early June. Fruit holds well on the tree once it is ripe. Planting in full sun will give the best results. Grow in well-drained, and lighter sandy soils. Plant on high ground in heavier soils. Generally resistant to diseases, this variety is relatively easy to grow. Prune in late winter or after harvest to maintain an open, vase-shaped tree for the best quality and ripening of fruit. Moderate drought tolerance.

- Zone: 4-8
- Spread: 12-15 ft
- Height: 12-15 ft
- Soil: Well-Drained
- Light: Full Sun

Number to Sell: 50

Finish Date: 08/01/2021

# Prunus persica 'Scarlet Prince'

With a brilliant red-pink bloom and a sweet, white-fleshed fruit this peach tree is quick to produce and is fragrant when in bloom. The fruit is exceptionally sweet, it is ideal for desserts and preserves but might be even better eaten right off the branch. It's a freestone variety. Peaches ripen in early August. Early each spring the red-tinged flowers put on an amazing show. They cover the tree in brilliant blooms that carry a delightful fragrance. If you choose a Scarlett Prince, you'll only need one tree, but you may want more to maximize your fruit production. It's a self-pollinating tree so it needs no other tree to cross-pollinate. All it needs is full sun and regular watering. This tree is considered a dwarf. Its mature height of just 10-15 feet makes fitting it into your garden easy and harvesting the fruit easy.

- Zone: 5-8
- Height: 10-15 ft.
- Width: 5-10 ft.
- Light: Full to Partial Sun

Number to Sell: 50

Finish Date: 08/01/2021

# Van Zyverden June Princess Nectarine Prunus Persica

An easy-to-grow tree, the June Princess nectarine makes a beautiful addition to any orchard. Self-pollinates, blooms attractive pink blossoms, ripens in June and July, resists disease. Nectarine trees are a type of peach tree, differing only slightly in their genes, providing delicious free-stoned fruit and an attractive and pleasing tree. The medium sized fruit has a red skin with yellowish flesh that is sweet in flavor and a favorite for eating. The skin is smooth and shiny. The tree is also ornamental with attractive foliage and pink blossoms in the spring. Fast grower.

- Light: Full Sun
- Zone: 5-9
- Height: 15-25'

Number to Sell: 65  
Finish Date: 08/01/2021

## Prunus persica 'White Lady'

The trees are mid-late bloomers covered in durable, dainty pink blossoms that tolerate fluctuating spring weather conditions. The White Lady Peach Tree, is among the best of the new low acid, high sugar, fresh market white peaches. The red-skinned fruits are medium to large, very firm, and is a freestone. The harvest season begins in late July. The fruit surface is covered with a dark pinkish red over a cream background. The White Lady does not need a pollinator to produce fruit.

- Height : 15-18 feet
- Spread: 8-12 feet
- Light: Full Sun
- Zones : 5 – 9

Number to Sell: 66

Finish Date: 08/01/2021

# Methley Plum

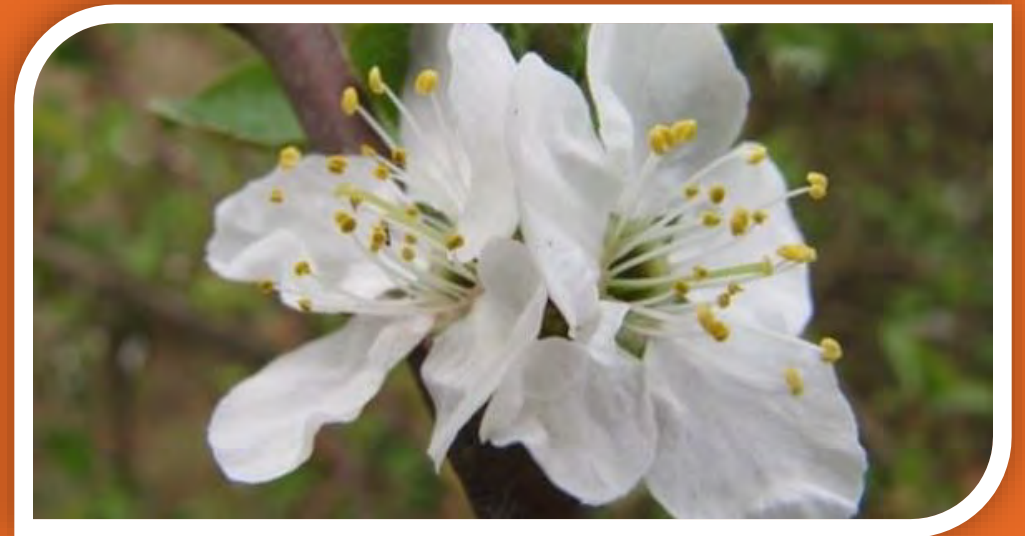

## *Prunus salicina* 'Methley'

This is a heavy bearing plum that will start to produce fruit in 2-4 growing seasons. The early blossom smells sweet but may be vulnerable to spring frost damage. It is self-fertile but planting two cultivars is recommended. Heat tolerant. The medium to large sized fruit has purple to red skin, round to tapering shape, and flesh that is red, juicy and sweet. Good for eating fresh and making jelly.

- Zone: 5-9
- Height: 8-20'
- Spread: 10-20'
- Light: Full sun

Number to Sell: 32

Finish Date: 08/01/2021

# Santa Rosa Japanese Plum

## *Prunus salicina* 'Santa Rosa'

Small, somewhat rounded canopy plum tree with showy pink-white blossoms in the spring. The fruit is sweet and slightly tart, with yellow flesh (clingstone). The thin skin is purple-red. This variety begins to bear fruit sooner than other plum varieties. Fruit is good for fresh eating or cooking. It is a self-pollinator, but if cross pollinated with other Japanese varieties it will increase crop size.

- Height: 15 – 20'
- Spread: 15 – 20'
- Flower: White
- Foliage: Green
- Light: Full Sun
- Zone: 5-9
- Water: Average, Well Drained

Number to Sell: 127  
Finish Date: 08/01/2021

# Shiro Japanese Plum

## *Prunus salicina* 'Shiro'

'Shiro' is an early-blooming variety with soft pink, fragrant flowers. The fruit is round-to-oval, with deep, yellow skin and flesh. The plums, ripe around August, are medium-size. It is a clingstone plum great for fresh eating or cooking/canning. Though it is self-fertile, a much larger harvest will be seen when another is planted near.

- Height: 12-15
- Spread: 10-12
- Zone: 5-8
- Light: Full Sun
- Attracts: Bees
- Water: Moderate, Well Drained

Number to Sell: 50

Finish Date: 08/01/2021

# Prunus sargentii

## Pink Flair® Cherry

Pink Flair Cherry makes a beautiful multi-use shade tree. Perfect for creating your own Japanese garden. Its compact height and upright symmetrical form is great for small spaces. Enjoy the year-round interest of its dark and shiny bark, bright orange-red fall color, and pink spring flowers. Known to be one of the hardiest flowering cherry trees. Water regularly and deeply but infrequently; more in extreme heat.

- Zone: 4 - 9
- Height: 20 - 30 ft.
- Spread: 15 - 20 ft.
- Flower: Pink
- Fall-Color: Orange-red
- Light: Full Sun
- Water: Moderate

Number to Sell: 50

Finish Date: 08/01/2021

# Brookcot Apricot

## Prunus 'Brookcot'

Bright yellowish orange with a red blush, fruit is juicy with good flavor for fresh eating or canning. Semi-freestone fruit ripens in early August, 1.25" diameter at maturity. Self-fruitful, however yields improve with cross-pollination.

- Height: 10-15'
- Spread: 8-12'
- Light: Full Sun
- Zone: 3-8

Number to Sell: 75  
Finish Date: 08/01/2021

# Prunus 'Okame'

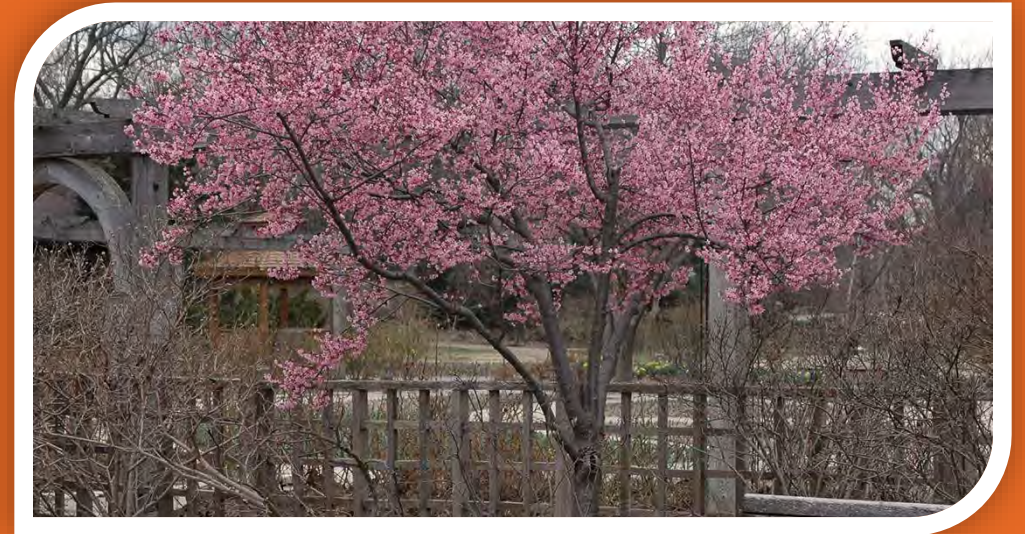

## Okame Cherry

The okame cherry is a small, deciduous tree in the Rosaceae (rose) family. This tree was a gift from Japan to our capital in the early 1900s and is the one currently featured in Washington DC's "Cherry Blossom Festival" each spring. The okame cherry transplants easily, requires full sun to partial shade, and grows well in almost any soil, including in heavy clay if there is good drainage. It does prefer protection from hot afternoon or reflected sun. This tree requires little pruning once scaffold branches are established, but the canopy can be pruned to best fit its planting location. It produces plentiful, mildly fragrant, rosy-pink flowers with one-inch-long petals in early spring. The flowers completely cover bare branches, appearing earlier than most and lasting longer than other flowering cherries. This tree requires a low number of chill hours, so it blooms reliably even in the south. The tree has polished, reddish-brown bark and fall foliage that ranges from bronzy red to bright orange. Bees and other pollinators are attracted to the flowers.

- Height: 15 ft. - 30 ft.
- Spread: 20 ft. - 30 ft.
- Light: Full sun
- Zone: 6b, 6a, 7b, 7a, 8b, 8a, 9b, 9a

Number to Sell: 50

Finish Date: 09/01/2021

# Prunus 'Toka'

## Toka Plum

Only one Toka plum is required because it self-pollinates. Tons of pollen is produced that gives you a heavy harvest of fruit that also pollinates other plum trees. The fruits ripen August - September. The skin is reddish-bronze and the flesh of the plum is an apricot-color. It tastes extremely sweet, like candy, which is why it is sometimes called bubblegum plum. Creamy white flowers bloom in spring giving your landscape a beautiful display. The green foliage turns burgundy-purple in the autumn. Toka plum has a vase-shaped form and medium growth rate. Any soil type is fine for this tree. It likes full sun to part shade, well-drained soil, and medium moisture.

- Zone: 3 to 8
- Height: 15 to 20 ft
- Spread: 15 to 20 ft
- Light: Full sun , Part shade

Number to Sell: 50

Finish Date: 08/01/2021

# Pyrus communis 'Bosc'

Bosc are easily identified by their cinnamon-brown skin and unique shape. The elongated neck of a Bosc pear sharply widens out to a rounded form on the bottom. Bosc is famous for being one of the densest pears, meaning that they are incredibly durable and thrive in conditions where softer pears wouldn't stand a chance. Their thick outer skin and densely firm texture protects them from both pests and harsh weather conditions. Beneath its tough exterior, Bosc pears are extremely sweet and delicious. The creamy white flesh inside is quite soft, juicy, and contains aromatic floral tasting notes. This tree also has one of the latest harvest seasons of all pears. These delicious pears typically don't reach their peak ripeness until late September to the middle of October.

- Zones: 4–9
- Height: 20'
- Spread: 20'
- Light: Full sun
- Soil: slightly acidic, deep, heavy, and moist (but well-drained)

Number to Sell: 50

Finish Date: 08/01/2021

## **Pyrus Communis 'Flemish Beauty' Pear**

Flemish Beauty is an old-fashioned European eating pear. The large, rounded fruit has light yellow skin blushed red. The creamy-white firm flavorful flesh is sweet and ripens mid-season. To some extent this variety is self-fertile though having another pear tree nearby is recommended for cross-pollination.

A more cold-hardy pear, it also bears fruit at a younger age.

- Height: 10-12 ft
- Spread: 8-10 ft
- Zone: 4-8
- Light: Full Sun

Number to Sell: 38

Finish Date: 08/01/2021

# Green Bartlett European Pear

## *Pyrus communis* 'Green Bartlett'

A true “pear shape” fruit, Bartletts are extremely aromatic pears. These trees produce excellent quality yellow-green fruit in early fall – good for fresh eating and canning. In spring enjoy showy white flowers before leaves emerge. Needs a pollinator.

- Height: 15-20'
- Spread: 12'
- Light: Full Sun
- Zone: 4-9
- Soil: Rich, Well Drained
- Habit: Oval, Upright

Number to Sell: 114

Finish Date: 08/01/2021

# Pyrus communis 'Kieffer'

This pear tree features large yellow fruit. The white flesh is crisp, juicy, with a coarse texture. It produces fruit in late September to October. Very hardy and tolerates hot climates. Self-fertile, plant two trees to ensure pollination. Quite sensitive to salt but will tolerate both drought and flooding.

- Zones: 4–9
- Height: 20 ft.
- Spread: 20 ft.
- Light: Full sun
- Soil: Slightly acidic, deep, heavy, & moist well-drained

Number to Sell: 66

Finish Date: 08/01/2021

# Pyrus communis 'Red Bartlett'

Slightly sweeter and finer textured than regular Bartlett, they are excellent for fresh eating, canning and drying. Ripens along with Bartlett in mid-late August. As with other pears, if allowed to ripen on the tree, these pears may become grittier due to deposits of lignin and cellulose; they are much smoother in texture if picked and allowed to ripen at room temperature.

- Light: Full Sun
- Flowers: Spring, Showy, White
- Attracts: Bees, Butterflies
- Height: 12-15'
- Spread: 12-15'
- Zone: 5-9

Number to Sell: 50

# Pyrus communis 'Seckel'

## Seckel Pear

This easy-grown tree can be very productive - partially self-fertile but will produce higher yields with another individual nearby for pollinating. It is cold-hardy and frost resistant. Blooms in April to May. The white flowers are followed by small to medium sized fruits. Fruit has a bronze purple to yellow skin with sweet flesh. Tree has a rounded to spreading canopy and upright habit and will do best in slightly acidic, heavy and moist well-drained soil.

- Zone: 5 to 8
- Height: 10 to 15 feet
- Spread: 8 to 12 feet
- Sun: Full sun
- Water: Medium
- Flower: Showy, Fragrant, White
- Attracts: Birds
- Fruit: Showy, Edible
- Tolerate: Clay Soil

Number to Sell: 10  
Finish Date: 08/01/2021

# Pyrus pyrifolia Asian Pear

Asian Pear is a fruit tree in the rose family native to Asia that produces large, crisp, juicy fruits that are quite good and can be eaten raw or cooked. It typically grows 30-40 feet tall and prefers deep fertile soils but is adaptable to clay soils. Flowers are produced in spring and fruit takes 4-7 months to ripen. Fruit production is best in full sun and with another cultivar nearby that blooms at the same time. Deer will browse the tree.

- Height: 30 ft. - 40 ft.
- Spread: 30 ft. - 40 ft.
- Light: Full sun
- Zone: 5b, 5a, 6b, 6a, 7b, 7a, 8b, 8a
- Flower: White flowers in spring
- Fruit: 3-4 inch round and firm with tan skin and speckles or yellow-green smooth skin.
- Leaf: Gold/Yellow, Green, Orange

Number to Sell: 100  
Finish Date: 08/01/2021

A close-up photograph of a branch of a pear tree in bloom. The branch is covered with numerous small, five-petaled white flowers with prominent yellow stamens and green sepals. The background is a soft, out-of-focus green, suggesting a natural outdoor setting. The image is framed with a white border and rounded corners.

# Pyrus serotina 'Shinseiki'

## Shinseiki Asian Pear

Early-mid spring fragrant, white blossoms bear medium-sized, round, yellow skin fruit. Long, bright green leaves turn red in fall. This tree is winter hardy but is best suited for areas that don't regularly go below 10 degrees. Fruit is delicious when crisp at harvest, as well as when ripened to a softer, but still firm texture. The flesh is sweet, slightly tart, firm and juicy.

- Height: 8-10'
- Spread: 6'-7'
- Light: Full Sun
- Zone: 5-9
- Soil: Moist, Well Drained
- Habit: Oval, Upright

Number to Sell: 100

Finish Date: 08/01/2021

# Quercus robur x alba Streetspire® Oak

Streetspire offers beautiful dark green foliage and will turn a handsome, rusty red in fall. It will then drop acorns, attracting a variety of wildlife. It does not hold its brown foliage through winter. Its narrow, columnar form and short upsweeping branches provide a storm-resistant structure. Mildew resistant. A great selection for narrow spaces in your yard or landscape. It's often planted in rows to provide screening, a windbreak, or just to provide a formal look. Its columnar form is a perfect fit for narrow or confined spaces. Planted alone, in groves, or in rows, it's the perfect vertical design element. Streetspire prefers well-drained soil and about 6 - 8 hours of full sun per day.

- Zone: 4 to 8
- Fall Color: Rusty red
- Fruit: Annual acorns provide food for wildlife
- Height: 45'
- Spread: 14'

Number to Sell: 50

Finish Date: 09/01/2021

# 'Mount Aso' Pussy Willow

## *Salix gracilistyla* 'Mount Aso'

Bluish-gray leaves that are silky underneath. The twigs are covered with a grayish-tan fuzz and in fall the pink flower buds start to develop. Non-fussy shrub that will grow almost anywhere in full sun; in sandy, average or moist soil (if it is watered regularly in areas of low rainfall). They should be cut back to get the best displays of catkins.

- Height: 5-6'
- Spread: 5-6'
- Flower: Pink, Silver Gray
- Zone: 4-9
- Light: Full Sun
- Soil: Sandy, Average or Moist
- Features: Dense stem of flowers good for cutting, drying and preserving

Number to Sell: 500

Finish Date: 09/15/2021

# 'Flamingo' Willow

## *Salix integra* 'Flamingo'

This willow is a fast-growing deciduous broad-leaf shrub that prefers a moist location. Flamingo offers nice stem and foliage color; the foliage is variegated with three colors during spring—white, green, and touches of pink—giving way to white and green in summer. Its red stems provide winter interest.

- Light: Full Sun, Part Shade
- Height: 4 – 6'
- Spread: 5 – 7'
- Zone: 5-9

Number to Sell: 222

Finish Date: 05/15/2022

# Willow 'Golden Curls'

## *Salix matsudana* 'Golden Curls'

This willow tree has a weeping corkscrew growth habit. Although the trunk and larger branches are upright, the younger branches weep downward in graceful curling gold and green tresses. Younger branches and leaves are a golden-green color in spring and mature to bronze-gold branches in summer with soft willow green leaves. The leaves are also slightly twisted enhancing the tresses-like effect of the weeping branches. The flowers emerge in spring with the leaves and are pale green and insignificant.

- Soil: Moderate
- Habit: Weeping
- Light: Full Sun
- Zone: 5 – 8
- Height: 30'
- Spread: 15'

Number to Sell: 85  
Finish Date: 09/01/2021

# Schizachyrium scoparium 'Jazz' – Grass Little Bluestem

Little Bluestem is a native clumping warm-season grass. Modern selections exhibit improved color and form. Schizachyrium scoparium 'Jazz,' the latest version, perfects on its predecessor 'The Blues' with a shorter form that doesn't flop plus the steel blue blades that blush reddish-bronze in autumn and persist through winter.

- Zone: 3-9
- Light: Sun
- Height: 24-30"
- Resists: Deer

Number to Sell: 1000  
Finish Date: 07/15/2021

# Schizachyrium scoparium 'Twilight Zone'

Though native Schizachyrium typically color in fall, 'Twilight Zone' possesses a nearly iridescent silvery mauve purple cast all over the whole plant beginning in mid-summer. It retains these beautiful tones through fall when brighter purple highlights appear on the flower stems. The attractive foliage forms a strictly upright, narrowly columnar clump that is about half as wide as it is tall. This grass would be stunning in combination with silver foliage plants like Silver Mound Artemisia in a sunny, hot, dry spot in the landscape. Schizachyrium is a great choice if you are looking to restore an eroded site, or for a plant that will grow in hot, dry areas where other plants have a hard time surviving. Native to North America.

- Height: 4-4.5 Feet
- Spread: 2 Feet
- Zone: 3 - 9
- Flower: Tan shades
- Foliage: Green shades, Purple shades
- Light: Full Sun
- Water : Low - Average Water
- Soil: Average - Fertile Soil Quality

Number to Sell: 62  
Finish Date: 07/15/2021

## **Sedum ROCK 'N LOW™ 'Bright Idea'**

This plant blooms in early summer, and has a rounded, compact habit filled with notched deep green foliage and yellow star-shaped clusters of flowers. Will be great as a filler as well as in containers.

- Zone: 3-9
- Light: Full – Part Sun
- Height: 10-12 in
- Spread: 16-20 in
- Flower: Yellow

Number to Sell: 1004  
Finish Date: 09/15/2021

# Sedum 'Steel the Show'

'Steel the Show' is an excellent groundcover to add to any sunny garden. It is silvery leaved with bright, blue green foliage. The tiny leaves give an airy look to the plant. It's one of the latest to bloom among Sedum, so it can extend the appeal of your garden with its rich, rosy pink flowers. This low spreading sedum will form a solid mat of foliage which is excellent for covering slopes or can be planted as a groundcover in sunny, dry areas. They are extremely drought tolerant, and many are evergreen. These are terrific low-maintenance plants that always look their best.

- Height: 6-8 Inches
- Spread: 14-16 Inches
- Zone: 3,4,5,6,7,8,9
- Flower: Pink shades
- Foliage: Green shades, Blue shades
- Light: Full Sun
- Water: Low, Average Water Needs

Number to Sell: 1,000  
Finish Date: 09/15/2021

# Marley's Pink® Parasol Styrax japonicus 'J L Weeping'

Featuring blushed pink flowers with cotton candy fragrance, this ornamental tree has elegant flowering branching that trails down. Its large, green foliage, in the fall, will turn bright yellow. This Japanese Snowbell makes a perfect patio tree. Include it in plantings around your outdoor living area or consider growing it in a large container either way plant your Marley's Pink Parasol® in a sunny or partly shady spot with moist, well-drained soil. Not necessary, but if preferred, prune immediately after blooming.

- Light: Full Sun, Partial Shade
- Height: 8 - 10 feet
- Spread: 4 - 5 feet
- Zone: 5-8

Number to Sell: 28

Finish Date: 09/01/2021

# Lilac New Age Lavender

## *Syringa vulgaris*

This compact, unique Lilac is beautiful in both the landscape and containers. It produces fragrant, lavender flowers in the spring, is resistant to mildew, and displays attractive foliage throughout the season.

- Height: 4-5'
- Spread: 4-5'
- Flower: Lavender
- Zone: 4-7
- Light: Full Sun
- Features: Fragrant flowers attracts pollinators

Number to Sell: 3030

Finish Date: 05/01/2022

# Lilac New Age White

## Syringa vulgaris

This compact, unique Lilac is beautiful in both the landscape and containers. It produces fragrant, white flowers in the spring, is resistant to mildew, and displays attractive foliage throughout the season.

- Light: Full Sun
- Height: 4–5'
- Spread: 4–5'
- Water: Water regularly until established
- Flower: White
- Zone: 4–7
- Attracts: Pollinators

Number to Sell: 2594  
Finish Date: 05/01/2022

# Thuja occidentalis 'Thusid4' Emerald Petite

This little gem of a plant fills a niche in the landscape that no other evergreen has filled in the past; a compact evergreen that can be planted along property lines or fences to add privacy without taking up too much valuable lawn space. There is simply no better option for a small garden or landscape than Emerald Petite. The dense evergreen foliage reaches all the way to the ground making Petite Emerald perfect to use as a living privacy fence and can also be used to block breezes from your patio or sitting area.

- Height: 5-6'
- Spread: 1-2'
- Foliage: Glossy bright green
- Zone: 3-7
- Light: Full Sun
- Soil: Moist, well drained soils. Acidic, alkaline, and neutral soils.
- Features: able to withstand snow loads

Number to Sell: 500

Finish Date: 08/01/2021

## Full Speed A Hedge® Thuja occidentalis 'American Pillar'

Full Speed A Hedge® provides excellent privacy and windbreak. It naturally grows tall and narrow with dense foliage. A fast grower, it is deer resistant and cold hardy as well as heat tolerant.

- Zone: 3-8
- Light: Full – Part Sun
- Height: 23-30 ft
- Spread: 3-5 ft

Number to Sell: 2533  
Finish Date: 07/01/2021

# Primo™ Arborvitae

## Thuja occidentalis 'IslPrim'

### Primo™

Irregular-growing dwarf, upright selection of eastern arborvitae with firm, spire-like growth which will quickly capture and hold the eye. It grows with refined, scale-like foliage that twists and turns providing textural interest and beauty. In summer, it is a refreshing, vivid green, which eventually becomes muted bronze for the winter in colder regions.

- Height: 3'
- Spread: 1.5'
- Foliage: Medium green
- Zone: 3-8
- Light: Full Sun
- Soil: Moist well drained
- Features: very small and very densely packed fan-shaped foliage

Number to Sell: 44  
Finish Date: 09/15/2021

# Thuja orientalis 'Franky Boy'

An elegant, upright, teardrop-shaped shrub with slightly pendulous branches of finely textured, chartreuse-green foliage and brighter yellow-green new growth that gives it the appearance of a golden aura. Develops a warm bronze-orange coloring during cold winter months.

- Height: 4'
- Spread: 4'
- Zone: 5 to 8

Number to Sell: 500  
Finish Date: 05/15/2022

# American Spice Viburnum

## Viburnum x burkwoodii

### 'Duvone'

The deep green leaves have a crinkled appearance and retain this all growing season. Coral pink buds that become clusters of white blooms all over the shrub. Their spicy clove-like scent attract butterflies and other pollinators. In fall, shiny jewel berries turn nearly black are enjoyed by birds. And the foliage become lovely orange, scarlet, yellow, and green splashes of fall color.

- Light: Full Sun, Partial Shade
- Height: 4 feet
- Spread: 4-5 feet
- Zone: 5-9
- Flower: Pink, White
- Fall Foliage: Orange, Red

Number to Sell: 30  
Finish Date: 10/2021

# Zelkova serrata 'Musashino'

This tree is tailored for tight spaces, with densely upswept branching. Has interesting peeling bark and reliable fall color; is low maintenance and trouble-free, an excellent choice for street plantings or smaller areas. Musashino Zelkova has green foliage throughout the season. The serrated pointy leaves turn a coppery-bronze in the fall. Neither the flowers nor the fruit are ornamentally significant. It has a high canopy with a typical clearance of 6 feet from the ground. This tree should only be grown in full sunlight. It is adaptable to both dry and moist locations and should do fine under average home landscape conditions. It is not particular as to soil type or pH. It is somewhat tolerant of urban pollution.

- Height: 45 feet
- Spread: 15 feet
- Light: Full sun
- Zone: 5a

Number to Sell: 50  
Finish Date: 09/01/2021

# Zelkova serrata 'Schmidtlow' Wireless® Zelkova

This spreading tree does not get very tall. It is a smaller version of the full-sized Zelkova, which is often too large for smaller yards. It is suitable for placement in a lawn. It has attractive, dark green leaves that turn red in the fall. This tree is best with annual pruning when it is young to reduce crowded branches. An ideal shape for street plantings under utility lines.

- Height: 20 to 25 feet
- Spread: 25 to 35 feet
- Soil: medium water
- Fall Color: red
- Flowers: discreet
- Light: Full sun
- Zone: 4-8

Number to Sell: 50  
Finish Date: 09/01/2021
