## Rejstřík druhových jmen uveřejněných v časopisu Calluna (1996–2019)

Dostává se vám do rukou mimořádné číslo – rejstřík druhových jmen, jehož cílem je zpřehlednění floristických údajů, dosud publikovaných v časopisu Calluna.

**Struktura** rejstříku je velmi jednoduchá. V jediném abecedně řazeném seznamu jsou uvedeny druhy cévnatých i bezcévných rostlin, lišejníků a hub, ve formátu „druh – rok vydání (číslo, pokud je čísel v ročníku více) – čísla stránek“.

### Důležité upozornění:

Druhy jsou v rejstříku uvedeny tak, jak byly publikovány, tedy bez zohlednění synonymiky (jeden druh se tedy může vyskytovat na několika různých místech seznamu a to i pod dnes již neplatnými jmény).

V rejstříku jsou vždy použita druhová jména bez nižších systematických jednotek (subspecií, variet...); stejně tak byly z druhových jmen vypuštěny zkratky typu „cf.“, „agg.“ a podobně.

### Možné chyby:

Pokud šlo o propojení rodových a druhových jmen běžných (lépe řečeno méně známých), nebyla prověřována existence druhu. Pokud šlo o jméno méně podezřelé, hledala jsem druh pomocí Google, Botany.cz, ThePlantList a dalších webů (většinou šlo o exotické rostliny z botanických zahrad). Tak se mohlo stát, že zůstaly chyby.

Jasně překlady byly opraveny, někde ale jde o užívané varianty jména, takže rozhodnutí je prostě subjektivní, ovlivněné např. četností užívání jména.

### Autoři:

Floristické údaje publikované v časopisu Calluna byly získány a shromážděny převážně členy Západočeské pobočky České botanické společnosti.

Podkladem pro vznik rejstříku byly skeny provedené Lenkou Pivoňkovou, Ondřejem Peksou a Ivonou Matějkovou v roce 2012, doplněné o PDF-soubory následujících ročníků.

Celý rejstřík vytvořil Jaroslav Šimeček, který nejenže přišel s touto myšlenkou, ale také odvedl všechnu tu neuvěřitelnou práci. Za to mu děkuji a jsem ráda, že jsem mohla přihlížet.

Pokud najdete v rejstříku chybu, prosím, dejte o ní vědět redakci Calluna. V elektronické verzi budeme moci chyby opravit. Stejně tak budou vítány jakékoli konstruktivní připomínky k vylepšení rejstříku.
