Introduction

Karl Wilhelm Gottlieb Leopold Fuckel, a well-known German mycologist of the 19th century, was born on 3 Feb. 1821 at Reichelsheim (Wetterau) and died on 8 May 1876 in Vienna on the way back from Italy. Between 1836 and 1852, he worked as pharmacist and later, as owner of a vineyard at Oestrich (Rheingau), he devoted his efforts mainly to mycology. In 1860, he published an enumeration of fungi of the Nassau region (Fuckel 1860). Between 1863 and 1874, Fuckel distributed nos. 1–2700 of his exsiccata “Fungi Rhenani Exsiccati (complete sets of “Fuckel, Fungi Rhenani Exsiccati” are maintained at FH, G and HAL. Scans of labels with taxonomic novelties, used for the present work, have been prepared on the basis of duplicates preserved at HAL (Herbarium, Martin Luther University, Halle (Saale), Germany). According to ICN, Art. 30.2 (Ex. 12), descriptions, new combinations and other taxonomic novelties on

labels accompanying distributed specimens (exsiccata) are effectively published, i.e., valid names published on printed labels of distributed exsiccata have to be taken into consideration with regard to priority issues of taxa. However, experiences have shown as far that names published in exsiccata have often been neglected or wrongly cited in nomenclatural databases and taxonomic treatments.

Fig. 1. K. W. G. L. Fuckel, illustration published at the beginning of Fascicle 1 of Fungi Rhennani Exsiccati.

Fuckel (1870) published a monographic treatment of the fungi of Rhineland [also separately published in book form as “Symbolae mycologicae. Beiträge zur Kenntnis der rheinischen Pilze. Julius Niedner, Wiesbaden” and as facsimile edition, J. Cramer, Lehre 1966], with three supplements (Fuckel 1871, 1874, 1875), the first supplement also separately published in book form [Julius Niedner, Wiesbaden 1971–1875; and as facsimile edition, J. Cramer, Lehre 1966], and the second supplement as preprint published before 21 Jun. 1873 (see Stafleu & Cowan 1976). Fuckel’s herbarium is deposited in “Museum Wiesbaden, Naturwissenschaftliche Abteilung“ (WIES).
