## Alphabetical index to fungal taxa

Numbers in brackets refer to synonyms (incl. anamorph and teleomorph names), to admixed species, to fungal host species, to taxa mentioned in the annotations, and to taxa mentioned in schedae emendatae. References to schedae emendatae are inserted in superscript (<sup>I–V</sup>, see above).

Some helpful additional entries to currently used names and orthographic variants (mainly from KLENKE & SCHOLLER 2015, INDEX FUNGORUM, MYCOBANK) are inserted in square brackets.

## Substrate Index

### Plants

This index refers only to fungi on identifiable, uniform plant material. Species on other hosts/substrates (fungi, soil, unidentified wood or plant litter) are listed separately below. Some plant names and their synonyms have been updated in accordance with FISCHER et al. (2008) or THE PLANT LIST. Current names are given in normal print, others in *italics*.

Numbers in brackets refer to admixed species, to host species of hyperparasitic fungi, to taxa mentioned in the annotations, and to taxa mentioned in schedae emendatae. References to schedae emendatae are inserted in superscript (<sup>I-V</sup>, see p. 18 for bibliographical references). Some current names and orthographic variants (mainly from KLENKE & SCHOLLER 2015, INDEX FUNGORUM, MYCOBANK) are inserted in square brackets.
